

## Intake Management and Assessment Software

Date: 8/24/22

Sole Source Amount:

\$90,000.00 set up and annual cost

30% of billed assessment revenue

Scheduling features free for 1<sup>st</sup> year

Vendor: ABA Engine

1. The product or services being purchased must perform a function for which no other product or source of services exist – what is the unique functionality of this product?

We are an all-in-one platform for scheduling and assessments for children's mental health care clinics and hospitals. We integrate with EPIC to keep all patient data in one place.

2. What are the specific business objectives that can be met only through the unique product or services – why does UMMC need the specific unique functionality?

UMMC is currently leaving money on the table by not being able to maximize billing the allowable assessments for their patients.

UMMC has a waitlist of potential patients that can be referred to local service providers, referred to the school, or serviced through UMMC clinicians. In order to manage this efficiently, UMMC needs a management tool that can assess and then automatically match and schedule based on those assessments.

Valuable time is being wasted by human capital completing the above tasks that can be automated through this software.

3. The product or services must be available only from the manufacturer and **NOT** through resellers who could submit competitive pricing for the product or services – does the vendor allow resellers/can anyone else give a quote for this item?

ABA Engine is the manufacturer of this software and doesn't have resellers.

Sincerely,

Erica Kinnebrew
