Amanda McCullough
Laboratory Director- GMC Laboratory
UMMC Grenada Hospital
960 Avent Drive
Grenada, MS 38901
SENT VIA EMAIL: ammccullough@umc.edu

Dear Ms. McCullough,

QML is a proprietary, point of care ("POC") data management and interface management system that is installed at University of Mississippi Medical Center ("UMMC"). While UMMC has already purchased the core components of the QML system, it is our understanding that UMMC now wishes to add a TELCOR device driver in order to interface NovaNet StatStrip Glucose at its Grenada facility. Because QML and the related drivers are products proprietary to TELCOR, they may be purchased only from, and supported by, TELCOR.

Please contact me if you require any further explanation.

Best Regards,

A handwritten signature in cursive script that reads "Alicia Anderson".

Alicia Anderson, MBA
TELCOR, Contract Manager
