# You can do great things with a system this intuitive.

## Durable

- 1 UniGroup Too's monocoque construction integrates a rugged steel frame with a honeycomb core and a perforated steel skin. The unique universal hinge accommodates any panel angle and up to one million bends.

## Simple

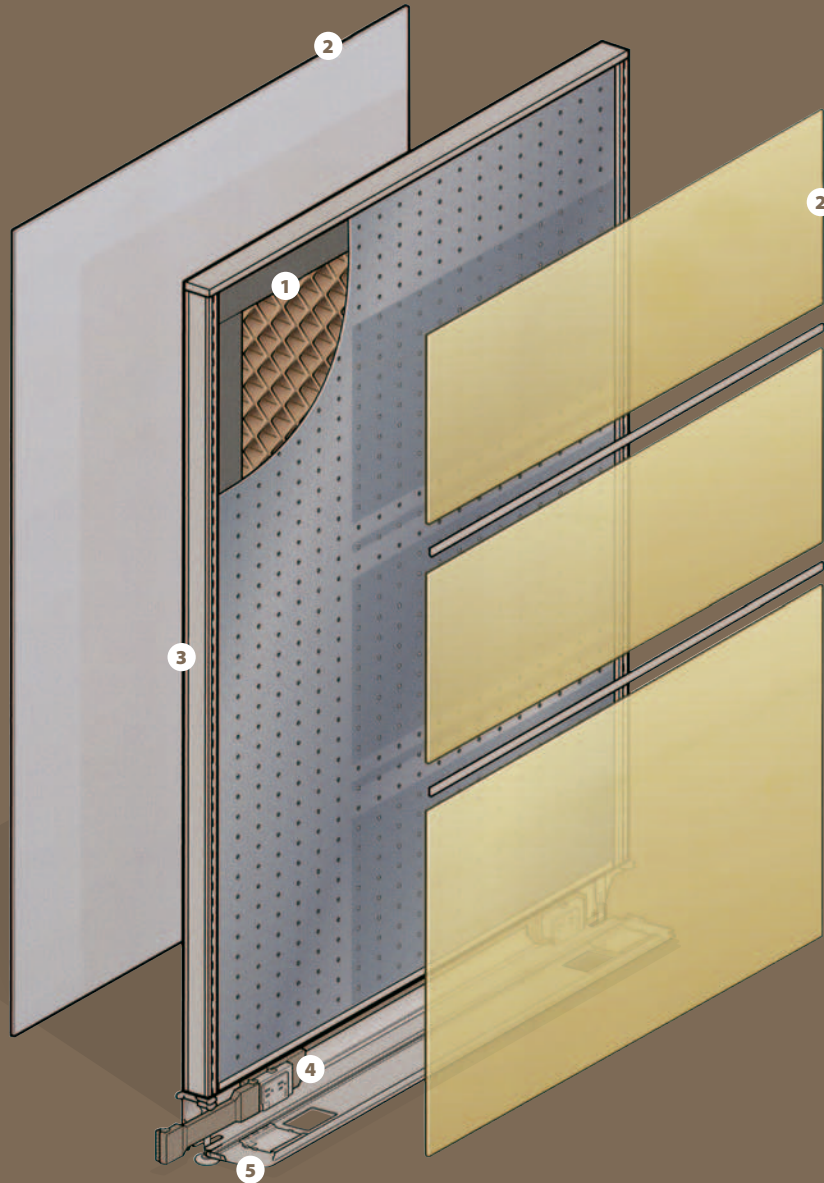

- 2 Monolithic or segmented—you can mix and match and choose fabric, glass, or markerboard. Rigid panel inserts slide in and deliver a slimmer look than stretched fabric.
- 3 Pre-finished trim rails eliminate the need for finish posts. Rails slide to offer easy access for panel removal—even at the center of a run.
- 4 Power Base, the industry's most intelligent power delivery system, handles up to six circuits, 120 amps of power, and works with every building's wiring configuration.

- 5 Built-in outlet covers slide to reveal powered panel outlets; they slide back if you need to configure for a non-powered panel.

## Sustainable

UniGroup Too is GREENGUARD® certified.

UniGroup Too's standard panel has an average recycled content of 33% with 20% post-consumer content. Panels can be ordered with 100% recycled polyester fabrics.
