# 4. FIRST-AID MEASURES

# **First Aid Measures**

Eye Contact	Immediately flush eyes with large amounts of water for at least 15 minutes holding lids apart to ensure flushing the entire surface. Do not attempt to neutralize chemically. Seek medical attention immediately. Note to physicians: Decomposition products are alkaline. Insoluble decomposition product formed is brown colored manganese dioxide.
Skin Contact	Immediately wash contaminated areas with water. Remove contaminated clothing or footwear. Wash clothing and decontaminate footwear before reuse. Seek medical attention immediately.
Inhalation	Remove person from contaminated area to fresh air. If breathing has stopped, resuscitate and administer oxygen if readily available. Seek medical attention immediately.
Ingestion	Never give anything by mouth to an unconscious or convulsing person. If person is conscious give large quantities of water. Seek medical attention immediately.
Not to Physician	For inhalation, consider oxygen. Avoid gastric lavage or emesis. Decomposition products are alkaline. Insoluble decomposition product formed is brown colored manganese.

# **5. FIRE-FIGHTING MEASURES**

#### NFPA\* Hazard Signs

**Health Hazard** 1 = Materials that under emergency conditions, can cause significant irritation. Materials that on the skin could cause irritation.

**Flammability Hazard** 0 = Materials that will not burn under typical fire conditions, including intrinsically noncombustible materials such as concrete, stone and sand.

**Instability Hazard** 0 = Materials that in themselves are normally stable, even under fire conditions.

# Special Hazard OX = Oxidizer \*National Fire Protection Association 704 (USA)

# Suitable Extinguishing Media

Use large quantities of water. Water will turn pink to purple when in contact with potassium permanganate. Dike to contain. Do not use dry chemicals, CO<sub>2</sub>, or foams, because they are not effective.

# 7. HANDLING AND STORAGE

# Precautions for safe handling

Advice on Safe HandlingWash hands thoroughly with soap and water after handling potassium permanganate. Do<br/>not eat, drink or smoke when working with potassium permanganate. Wear proper<br/>protective equipment. Remove clothing if it becomes contaminated. Provide sufficient<br/>mechanical and/or local exhaust to maintain exposure below the TLV/TWA.

# Conditions for safe storage, including any incompatibilities

**Storage Conditions** Store in accordance with NFPA 430 requirements for the Storage of Class II oxidizing materials. Protect containers from physical damage. Store in a cool, dry area in closed containers. Segregate from acids, peroxides, formaldehyde, and all combustible, organic, or easily oxidizable materials including antifreeze and hydraulic fluid.

# Individual protection measures, such as personal protective equipment

# Ventilation

Provide local exhaust or process enclosure ventilation system. Ensure compliance with applicable exposure limits.

#### Personal Protective Equipment

#### Eye/Face

Face shield, goggles, or safety glasses with side shields should be worn. Provide eyewash in working area.

#### Gloves

Rubber or plastic gloves should be worn.

# **Other Protective Equipment**

Chemically resistant clothing covering arms and legs, and rubber or plastic apron should be worn. **Caution:** If clothing becomes contaminated, wash off immediately.

#### **Respiratory Protection**

**Evaporation Rate** 

In cases where overexposure to dust may occur, the use of an approved NIOSH-MSHA dust respirator or an air supplied respirator is advised. Engineering or administrative controls should be implemented to control dust.
