Attention: Michelle, Finance Manager

Re: 3D Systems Healthcare

This is to inform you that 3D Systems Healthcare is the sole source provider of the Mini AP Express Mentor™ and GI Bronch Mentor™ simulators and services. The University of Mississippi purchased and utilizes these simulators at their facility, AP Express #E00101 and GI Bronch G00107.

Our Mini simulator is designed for the education and training in specific medical procedures.

Simulation-based medical training provides physicians with reinforced technical instruction to prevent errors, provide procedure trouble solving, and teach skills, all in a controlled virtual environment.

Medical simulation training is being utilized worldwide by medical institutions and medical educational facilities due to the proven benefits of being successful and cost-effective in the education and training of medical personnel.

Our 3D Systems technicians are solely responsible for repairs/upgrade and maintenance of the 3D Systems, Mini Products and do not use a third party vendor to service our products.

Our simulators produced by 3D Systems Healthcare have proprietary hardware and software that is not available to resellers.

Sincerely,

3D Systems Representative
