

The Safe Zone 850M9 Mobile UVC disinfection device is specifically designed for maximum effectiveness and ease of use. UVC Cleaning Systems Inc. has developed one of the most efficient solutions for all infection control.

Transportable: The Safe Zone 850M9 has been specifically designed for the institutional environment with five (5) medical grade casters to provide stability and ease of movement in any direction.

Easy to use: Each UVC Cleaning Systems Safe Zone 850M9 units utilize a very simple to on/off wireless remote control that is universal between all UVC Cleaning Systems Safe Zone 850M9 devices.

Durable: The Safe Zone 850M9 is made with a stainless steel cage and an aluminum protective body. The UVC emitters are designed for the physically demanding environmental services industry. Handles are designed as crash bars to minimize accidental damage. Devices ship fully assembled and ready for duty.

Versatile: The Safe one 850M9 are designed to work with global electrical requirements. Two devices can be run on one 15-amp circuit which allow for seamless service implementations. The units base can be disassembled quickly so it can be placed into smaller work areas like ambulances, buses, helicopters, etc.

Wireless Communication: Like all the UVC Cleaning Systems devices, the Safe Zone 850M9 features an Integrated wireless link for up to 2 units. The link feature allows UVC Cleaning Systems customers to operate devices simultaneously to deliver a safe, fast and effective treatment in large areas, and diverse environments, translating into cost effective and scalable infection control.

Intelligent: The Safe Zone 850M9 uses a simple integrated electronic timer to operate with the technician determining the correct run time for each UVC treatment.

Quick: Rapid set up and deployment, instant start lamps, this unit is designed to be quick and easy to treat many areas very quickly and efficiently.

Effective: The Safe Zone 850 provide the lethal UVC dose of 243 watts.

Safe: Two step operations ensure a safe environment. To operate, users must turn the timer switch and activate the unit using the wireless remote.

Affordable: Priced competitive to the marketplace, the Safe Zone 850M9 is the markets best choice for quick, simple UVC treatments.

SafeZone 850M9

High Powered 855 watts @120V

Safe Zone 850M9 US: 120VAC / 7.5 A 60 HZ

Safe Zone 850M9 INT: 240VAC / 4 A 60 HZ

60 lbs (27 kg) with base / 40 lbs (18 kg) without base

45" (113 cm) H x 18" (46 cm) W x 18" (46 cm) D – with base

31" (79 cm) H x 13" (33 cm) W x 13" (33 cm) D – without base
