Extending the Arm Options

As the seating specialists of the contract furniture industry, Via Seating prides itself on having the greatest breadth & depth of customizable options across its seating lines. The adjustable & fixed arm options you see above are paired to chairs as their preferred options. These are significantly tested, available across our marketing resources and where applicable, placed onto our quick ship program. It is possible that additional pairings exist (ie. an arm you like above is not shown on the series you want to see it on).

All Via Seating products are annually assessed by a 3rd party team of chemists & globally-recognized ISO 17025 accredited lab. They are rigorously tested for conformance to ANSI/BIFMA e3 standard credits 7.6.1, 7.6.2 and/or credit 7.6.3 as well as conformance to low-emitting materials. Prior to product launch, every product is continuously developed testing its functionality & durability within Via Seating's ISO 17025:2017 accredited lab. Via Seating has the ability to test non-standard arm configurations and upon approval from our lab, Via Seating is able to warrant the non-standard configuration.

Arm Options Not Shown in this “Modular Arms” List

Items that are exclusive to specific configurations on specific series have been left off of this modular arms list. These items can instead be found on the individual series pages in the Via Seating Indoor Price List. Examples of series-specific, non-modular arms include fixed arm options on Splash chairs and the fixed arm options on the Run II guest chair.

Adjustable Lumbar Supports

Explore Via Seating's ergonomic, adjustable lumbar support options below. These adjustable lumbar supports provide various levels of adjustments aimed at optimizing support and promoting better posture throughout the day. Adjustable lumbar supports are available on task-work, conference, execu-task and management series. Many Via Seating chairs have neutral spine support engineered into the architecture of the back itself. The adjustable lumbar support options extend the range of this support to accommodate a variety of differently sized individuals.
