How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor's website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

Diagram A

Center on backrest

Center left to right & top to bottom on seat
When directional or patterned fabrics are used, they often require more yardage than solid colors.

C.O.M. must be supplied in continuous yardage.

C.O.M. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer's upholstery must be approved prior to acceptance for production.

After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. upholstery.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled with the KI product order number and customer purchase order number.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer's responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order.

PRODUCT SPECIFICATIONS
WiggleRoom™ Pod

December 2022

PRODUCT OVERVIEW

- Butt hinge door with $1/4$" clear tempered glass and integrated door pull.

- All pods come equipped with an integrated door closer to limit door swing to 88°.

- <u>Exterior Dimensions</u>: 44" W x 44" D x 89-90" H (adjustablity is 1" with glides)
- <u>Interior Dimensions:</u> 41" W x 41" D x 83" H
- <u>Pod Weight (packaged):</u> 650 lb
- <u>Pod Weight (unpackaged):</u> 550 lb
- <u>Door swing footprint:</u> $36 1/2$"
- <u>Door Opening Clearance:</u> 33" W x 80" H

PRODUCT SPECIFICATIONS

Overview

- Pods are available in left- or right-opening orientation (as designated by hinge location when facing the pod). Orientation will dictate placement of interior worksurface/accessory ledge and power module allowing for proper pod entry.
- Door orientation is not interchangeable in the field.

Left-Opening Orientation

(front view)   (top view)

Right-Opening Orientation

(front view)   (top view)
Worksurface & Accessory Ledge

- All worksurfaces and accessory ledges are $3/4$" thick with .030" high-pressure laminate top and 73P polypropylene edge.
- Each surface is supported using two, 14-gauge steel brackets, finished in textured powder-coat paint.
- Worksurface and accessory ledge brackets are field installed to the interior wall panel frames using $1/4$-20 x $1/2$" Torx thread forming screws.

- <u>Worksurface Dimensions:</u> $36^1/_2$" W x 14" D.
- <u>Accessory Ledge Dimensions:</u> $36^1/_2$" W x 5" D.

PRODUCT SPECIFICATIONS

### Voltage Converter, Motion Sensor, LED Light & Ventilation System

- All pods (regardless of power infeed type) will come equipped with a power supply converter, which transforms 120-volt building source power to a 12-volt (DC low voltage) system, providing electricity to the Pod's mechanical components (motion sensor, LED light, and ventilation fans).
- Motion sensor operates on a 15-minute cycle, sending power to the LED light, ventilation fans and optional occupancy indicator light (when specified).
- A single, 24" long LED light, specified to 4.4W/ft and 3500K color temperature will be recessed within the ceiling. Light location will coincide with the pod orientation to illuminate the surface.
- Ventilation includes two, 120 x 120 x 25.4 mm ceiling fans, rated and 62 CFM each.
Ventilation Diagram
**LED Light, Motion Sensor, Power Supply Converter & Fans**

LED Light, Motion Sensor & Vent
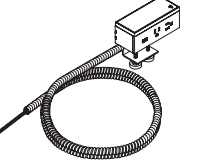

PRODUCT SPECIFICATIONS

Electrical System Options

- Pod is powered from 120-volt building source power using either the standard Byrne Sequence™ system (an ETL-Listed, 120-volt single circuit electrical system), or by hardwired components (installed by an electrician). All pods (standard or hardwired power infeed) will come equipped with a power supply converter, which transforms 120-volt building source power to a 12-volt (DC low voltage) system, providing electricity to the pod's mechanical components (motion sensor, LED light, and ventilation fans).
  - Byrne Sequence™ system consists of an infeed with a 3-prong plug on a power cord leading to a port (for optional power jumper). From the port is a one-foot extension to two duplex receptacles. The receptacles are intended only for use to feed the pod's power supply converter and mechanical components. The power infeed cord is enclosed within the pod and can run down either corner cover located opposite the pod front. A 7-foot length of cord exits the pod to plug-in to building source power.
  - Optional user accessible Dean® Clamp-On power module with Wireless Charging consists of two 120-Volt AC outlets, one USB-A port and wireless charging lid (for Qi-enabled devices). The power module comes with two power jumpers to attach to the module on the electrical system.
  - Hardwired electrical components may be specified for use in installations, where required by local code (such as Chicago). Hardwired components will replace the standard Byrne Sequence™ system and will energize the pod's power supply converter to low-voltage motion sensor, LED light, and ventilation fans. When a Dean Clamp-On power module with Wireless Charging is specified for hardwired applications, the optional module will come equipped with a $^3/_8$" O.D., 72" long metal conduit housing a 3-wire power infeed whip. Power infeed, wiring, connections and all electrical accessories are to be provided and connected by a licensed electrician.

Byrne Sequence™ System

Surface/Power Module Option Code	Description	What is Included	What is Included (Image)
1C, 1F, 1I, 1L	No User Accessible Power Module (non-hardwired applications)	1) Infeed with attached port and two duplex receptacles, to power the low voltage system.	**Byrne Sequence™ Infeed**
1A, 1D, 1G, 1J	Includes Power Module with Wireless Charging (non-hardwired applications)	1) Infeed with attached port and two duplex receptacles, to power the low voltage system. 2) User accessible power module with wireless charging. 3) Necessary jumpers to connect infeed to power module with wireless charging.	**Byrne Sequence™ Infeed** **Byrne Sequence™ Power Jumpers** **Dean Clamp-On Power Module with Wireless Charging for Byrne Sequence™**

Hardwired Electrical

Surface/Power Module Option Code	Description	What is Included	What is Included (Image)
1B, 1H, 1K, 1E	User Accessible Power Module with Wireless Charging (hard-wired version)	1) Power Module with 3-wire whip only. 2) Electrician needs to supply power connection to the building, as well as a power box with outlet to power the low voltage driver.	**Dean Clamp-On Power Module with Wireless Charging for Hardwired Applications**
1R, 1P, 1S, 1Q	No Power Module (for hardwired applications)	1) No electrical components supplied by KI. 2) Electrician needs to supply power connection to the building, as well as a power box with outlet to power the low voltage driver.	

PRODUCT SPECIFICATIONS

Markerboard

- Magnetic and dry-erasable surface, consists of a 22-gauge steel panel coated with polyester film.

- Field installed and mechanically fastened at desired height to any non-glass, interior or exterior panel frame.

- When Dean® clamp-on power module is specified, install markerboard a minimum of 5" above a worksurface.

- <u>Markerboard Dimensions:</u> $36^{1}/_{2}$" W x $27^{1}/_{2}$" H.
Occupancy Indicator Light

- A 3-watt LED light illuminates a red acrylic block, set in an aluminum housing, finished in powder-coat paint.

- Unit magnetically attaches to the top of the pod. Relocatable with 79" cord.

- Attached to and activated by the pod's interior motion sensor (light illuminates when pod is occupied).
PRODUCT SPECIFICATIONS

Carpet

- When KI supplied, carpet will be textured grey and is field installed.

- If the pod is configured with the optional WiggleRoom floor mounted stool, the carpet square will contain a 14" diameter circular cutout to ease the stool installation process.

- Commercial grade carpet is fade and stain resistant, as well as waterproof.

- Face weight of 33oz/yd^2 with $^{7}/_{16}$" pile height and has a peel and stick backer.

- When "no carpet" is specified, the OSB floorboard will be supplied unfinished and the customer is asked to furnish and install their own floor covering. 39" x 39" of material is required.
Light Dimmer

- Wireless dimmer controls lighting with cycle dimming between 1-100%.

- Light dimmer is available with either worksurface or accessory ledge.

- Nickel finish dimming switch is located within cutout in a surface.

- Includes an integrated on/off feature. Tap the dimmer switch to turn light on/off. Hold down the switch to dim the light.

- Receiver has a memory feature that will receive the previous setting even if the power is cut off (i.e. the power supply gets unplugged or the circuit loses power).

- Switch is battery operated (replaceable, 3V CR2025 battery included).

Accessories

Upholstered Tackboard Magnetic Inserts

- Tackboard Tiles are constructed of a multilayer fiberglass core, upholstered on one side using adhesive. Magnetic strips are applied to the non-upholstered side using water-based spray adhesive. Nominal thickness is $^1/_2$".

- **$^1/_3$ Height Insert Dimensions:** $36^1/_2$" W x $27^1/_2$" H (up to three inserts may be placed on a single panel).

Note: Magnetic inserts can be attached to interior or exterior magnetic steel panels; cannot be used with fabric, laminate or glass panels.
Solid Polyester Felt Magnetic Inserts

- Solid Polyester Felt Magnetic Inserts are constructed from $^1/_2$" thick tackable, 100% polyester felt and are available in a variety of colors. The inserts have a density of 0.5 lb/ft^2 and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A Mount testing method) and an NRC rating of .81" with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Magnetic strips are applied to one side using adhesive. Nominal thickness is $^1/_2$".

- **$^1/_3$ Height Insert Dimensions:** $36^1/_2$" W x $27^1/_2$" H (up to three inserts may be placed on a single panel).
- **Full Height Insert Dimensions:** $36^1/_2$" W x $81^1/_8$" H.

Note: Magnetic Inserts can be attached to interior or exterior magnetic steel panels; cannot be used with fabric, laminate or glass panels.

Accessories

Coat Hook

- Optional coat hook is a single piece powder-coat painted steel with rounded corners. Each hook is field installed onto the interior or exterior panel frame using a single #10-24 x $^3/_8$" self-drilled screw, which is painted to match the coat hook.
Coat Hook
Fire Suppression/Sprinkler

- All WiggleRoom pods are designed to accommodate sprinklers if required by local regulations. KI does not provide sprinklers, install them or take responsibility for their installation.
- Refer to assembly instructions for more information.

ceiling

fire suppression/ sprinkler

PRODUCT SPECIFICATIONS

Seismic Brackets

- Pods can be optionally seismically secured by replacing floor glides with brackets and anchoring to the floor using approved fasteners.
Seismic Bracket

Suggestions for Loose Seating Options

- Due to interior space constraints of the WiggleRoom pod, it is recommended to specify armless chairs only when considering a loose seating option. 4-leg chairs should be no larger than 25" wide by 25" deep and task chair base diameter should not exceed $27\frac{1}{2}$".

Stack or Guest Chairs or Café Stools:

- Doni®
- Grazie®
- Katera™
- Strive®
- Torsion Air®

Task Chairs or Task Stools:

- Doni®
- Grazie®
- Strive®
- Torsion Air®

Lounge Seating:

- If specified with 14" deep worksurface: Calida™ Stool.
- If specified with 5" deep accessory ledge: Calida™ 4-leg or Sled Base Chair.

Accessibility Compliance per 2010 ADA Standards for Accessible Design / ICC/ANSI A117.1 Accessible and Usable Buildings and Facilities

- WiggleRoom pod does not have adequate interior space to meet accessibility requirements for maneuvering and turn radius. In addition, the pod is designed with a 3" step up into the unit and is not provided with a ramp to accommodate accessibility requirements for rise and slope. Typically, the pod is planned in spaces where alternate areas are available to meet accessibility requirements. Furthermore, larger free-standing spaces that do meet accessibility requirements may be achieved with various KI Architectural Wall solutions.

DIMENSIONS

(front view)

(side view)

(top view)

(top view)
DIMENSIONS

- Film or vinyl can be applied to the glass surfaces of the pod only. All painted surfaces on the WiggleRoom pod are textured powder-coat paint. Due to the texture of the painted surfaces, proper adhesion for vinyl and film wall covering materials cannot be achieved. Therefore, it is not recommended to apply vinyl or film painted surfaces to the pod. Sourcing and installation of vinyl and films is not included by KI and is supplied by others. Dimensions in this section show the actual sizes of the glass surface on the door and rear panel for reference when planning for film or vinyl on the glass.

W2F

Interior Panels; Left-Fabric Rear-Fabric Right-Steel

- Shown with Left hand orientation, 42" worksurface, markerboard, and occupancy indictor light
- Non-magnetic laminate exterior panels
- Pod includes aluminum textured powder-coated frame, panel materials, LED light, ventilation fans, and adjustable leveling glides
- Power module choice dictates pod power supply (single circuit 3-prong power cord or hardwired whip)
- Specify with or without factory-installed commercial grade carpeting (grey). NOTE: Pods without factory-carpet will require alternative carpet to be field-installed, prior to use
- Self-closing door is aluminum framed and magnetically sealed with 1/4" clear tempered glass insert
- Optional 18" or 30" tall floor-mounted stool and coat hooks ordered separately, and field installed. See color addendum for stool mounting hardware finish.
- Pod ships KD on one 97" long x 53" high x 32" wide skid; can accommodate fire sprinklers and seismic requirements

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.

Interior Panels

Fabric | Glass | Fabric

W2J

Interior Panels; Left-Fabric Rear-Glass Right-Fabric

- Shown with Left hand orientation, 42" worksurface, markerboard, and occupancy indictor light
- Non-magnetic laminate left & right exterior panels
- Pod includes aluminum textured powder-coated frame, panel materials, LED light, ventilation fans, and adjustable leveling glides
- Power module choice dictates pod power supply (single circuit 3-prong power cord or hardwired whip)
- Specify with or without factory-installed commercial grade carpeting (grey). NOTE: Pods without factory-carpet will require alternative carpet to be field-installed, prior to use
- Self-closing door is aluminum framed and magnetically sealed with 1/4" clear tempered glass insert
- Optional 18" or 30" tall floor-mounted stool and coat hooks ordered separately, and field installed. See color addendum for stool mounting hardware finish.
- Pod ships KD on one 97" long x 53" high x 32" wide skid; can accommodate fire sprinklers and seismic requirements
