

MISSISSIPPI DEPARTMENT OF CORRECTIONS

Vendor - Release of Information

To Whom It May Concern:

The Mississippi Department of Corrections will conduct a background investigation to verify information that you have provided in conjunction with your planned visit to our facilities. In order to conduct the investigation, the following information is required.

Social Security #: _____ Date of Birth: _____ Race: _____ Sex: _____

Driver's License Number: _____ State Issued: _____

Current Address: _____
Street Apt #

City

State

Zip Code

Have you ever been arrested and or convicted of a crime? Yes _____ No _____ If yes: Date: _____

Charge: _____ City: _____ State: _____

Have you ever been associated with a street gang? _____ Yes _____ No

Do you have any tattoos on your body? _____ Yes _____ No If you answered yes, what does it
 symbolize? _____

In order that the investigation can be completed, I hereby authorize the Mississippi Department of Corrections and any of its authorized employees to receive and collect information from any law enforcement agency and or judicial entity. I also give MDOC permission to run a NCIC with the information that I provided above for a security clearance.

 Name (Print) Signature Date

NCIC Completed: _____ By: _____
Date Signature of MDOC Staff

Attachment E

Pest Control Process at CMCF

For Central we use a local pest control contractor. They have a schedule to come out every other week to always spray the Central Kitchen.

Between visits Wardens & staff around the facility will call or email to have their specific housing units, departments, or offices treated for whatever the pest problem maybe or if it's a preventative measure they would like to have done. We add their locations to a single work order to keep track of which areas are requested between visits and to make sure it gets treated.

If it's an emergency issue that can't wait for the next scheduled visit we call and have contractor come out immediately. Or say if the Central Kitchen or another area develops a pest problem we up the visits to every week until it's under control.

Attachment E - SMC I Pest Control

Riley Pest Control Inc. will furnish all professional services and labor necessary to provide the insect and rodent control services at South Mississippi Correctional Institute (SMCI) as stated in the proposal for service.*

General:

Target pests include: Ants, roaches, crickets, centipedes, millipedes, Silverfish, mice and spiders.

Termites, fleas, bedbugs, wasps, hornets, yellow jackets and any other unnamed pests are excluded. A separate price quote can be given for these or any other unnamed pests.

Frequency of service and areas of service:

Riley Pest Control will provide the following Pest management program during normal business hours on a schedule agreed upon by CGL Facility Management.

Customer Cooperation – Customer will insure complete access to all service areas, Customer shall insure adequate levels of sanitation, Customer shall make all reasonable efforts to eliminate conditions conducive to infestations.

Business documents can be provided upon request.

Service Guarantee – We guarantee control of the above pests. If you are not satisfied with our service, we will respond within 24 hours of the request.

Contact Info: Jason Riley 601.410.2687

Monthly- interior treatment of Central Kitchen, dining halls, office/administrative areas, Maintenance building, fire station, waste water building and all housing units.

Commercial Kitchen Protocol

Inspection is the key to successful pest control in food handling establishments. Glue Boards should be placed in various areas for pest activity monitoring. Insecticides should never be used in a manner where food could be contaminated.

Gel Baits: Cockroaches and ants are best controlled by baits when in food handling establishments. All Gel baits must be applied into a crack or crevice unless it is contained in a station or arena.

Liquid Insecticide: This will be used for treatment of other pests that are not targeted by baits, such as spiders. This will be applied to cracks and crevices or spot treatment to areas specified on the label.

Rodents: In the event that rodent issues arise, glue boards and bait boxes can be utilized to control the problem.

Products include Gelation Blocks and Contact blocks.

Areas included in the monthly pest program include:

Area 1- Admin building area 1, Housing units STU-7, 8, 9, 10, 11, 12, Dining Hall, Vo-tech/warehouse/Maintenance/Laundry, GYM, Entry, visitation, Chapel, Conjugal area once quarterly, Barber shop,

Area 2 – Admin bldg./MSU/ Barber shop, Infirmary, Housing Units A-1 thru E-2, vocational trailers, dining halls / kitchen, central kitchen area / Post Office / Laundry

Area 3 – Administration, Zones A, B, C, and D, Dining Halls, Kitchen, A&D Trailers, and Barber Shop

Central Security – Fire Station, Outside Maintenance building, Kennel office

Equipment Matrix

BUILDING	ROOM	QUANTITY	MANUFACTURER	MODEL	YEAR	FUNCTION	COMMENTS	PHOTOS
Quick Bed Area_ A Building (1995/1996)	Mech 1	1	Goodman E-Z Filter	EZ-2025		A/C + Heat A/C Filter	Condition ok - Condensation noted on pipes Located directly below A/C Unit Condensation noted on collar Condensation noted on ductwork over A/C Unit All Condensers / AHU located outside within secure fenced-in enclosure	P1070829 P1070831 P1070832 P1070833 P1070849, P1070851
	Mech 2	2	Trane			Condenser	Fan housing damaged due to falling object	P1070835- P1070849
		1	Goodman			Condenser	Safety switches mounted on all Condensers/ AHU	P1070839
		1	Coldzone			AHU	One to Two fans working! No collars/ Escutcheons on pipes penetrating exterior wall of building Where installed collars/escutcheons are corroded	P1070835- P1070849 P1070840 - P1070842 P1070843, P1070851
	Mech 3	3	Trane	XE 80	1995/96	A/C + Heat	Serving Housing / Halls Exhaust flue not connected to Unit towards wall! Corrosion noted on casing of some Units Garden hose being used to replace/ condensate lines?	P1070852- P1070863 P1070860 / 862 P1070857 P1070861
		1			2008	Hot Water Heater	Serving Offices/ Kitchen	
		1	A O Smith			Hot Water Heater		P107064- P1070867
	Elec 1		General Electric	1995/96		Line Control Boxes		P1070872
			General Electric			Electrical Panels	All original Equipment, labelled and in good condition No UPS!	P1070870, P107871 /874 P1070881 - P107887
			Kohler			Transfer Switch Electrical Switchboard Panel		P1070879 P1070880
	Elec 2					Telecom	Thermostat to fan only in Electric Room Installation of Cellphone block in progress	P1070869, P1070873
	Command Mech						All Security Electronics to be replaced. TCI Systems. No Support No Courtyard side cameras! (Applies to all buildings!) Intercom doesn't work No refrigerator or ice machine	P1070875 P1070890
	Kitchen / Dining Mech Elec			1995/96			Controls for Doors/ Lighting Sprinklers & fire protection working - inspected by Fire Chief Main Condensing Unit in room noisy. Loss of efficiency	P1070889 P1070891 - P107898
						Transformer	Located outside (w/ Condensers) on concrete bases within secure fenced-in enclosure	P1070901 - P107903 P1070973
	Mech 4	2	Trane			Condensers for Kitchen/ Dining	Fan guards on top of both units corroded. (1) Unit not working Lock doesn't work!	P1070901 - P1070910 P1070902
	Kitchen						Condensation noted on Ceiling Air Grill! All equipment original apart from Dishwasher (installed 2009) Garbage disposal barely functions	P1070914 P1070911, P1070912 P1070915 - P1070921 P1070919
A Building North	Mech 5/6	1	A O Smith	Mister-Fit. BTR 400A 118	2009	Hot Water Heater (95 Gal.)	both Gas Fired & On-Demand. Located within plumbing chase.	P1070922 - P1070927
			Trane	XE 80		A/C + Heat	Assume same as Mech 4/5	P1070941, P10709550
	Plumbing Chase						Corrosion noted on heating piping. Insulation frayed in places Plumbing pipework blocks access within plumbing chase! Security Control Panel at end of plumbing chase difficult to access	P1070925, P1070928 P1070929, P1070930 P1070931, P1070932
						Sprinkler Main Plumbing Pipework	Sprinkler Control Main - Last inspected in Oct. 2013 Gravity system working ok right now. Sheriffs Office in process of getting grinders for Buildings A B & C Back of plumbing chase - damp problems due to pipe leaks	P1070936 - P1070938 P1070943, P1070965

MISSISSIPPI STATE PENITENTIARY
BUILDING: CID
CONTROL ROOM AND PERIMETER SECURITY

The control room within this building monitors perimeter fence motion detection and perimeter cameras for all facilities at the Parchman Mississippi State Penitentiary. On Thursday, June 26, 2014 I met with Johnny Ware in the Control Room and the following comments were noted regarding perimeter security:

PERIMETER FENCE DETECTION

- Southwest Microwave was the original/first system used at the facility and is installed at Unit 31, and Vocational & Textiles. There is no maintenance on the wire sensors at these facilities and are presumed to have failed.
- Integrated Security Corporation, Infinity 2020 is used at all other facilities and is approximately 1 ½-2 years old.
- Horticulture: Currently no secure perimeter fence, but inmates are present. School will install fence, but detection and cameras needed.

PERIMETER CAMERAS

- All secure perimeter cameras use the Siemens Siveillance system, except Unit 28 and the front/main vehicular gate.
 1. The system was installed in 2009+/- and tracks movement. The system is fading and needs an upgrade.
 2. The maintenance contract was cut/defunded and there is currently no maintenance contract.
 3. Some of the cameras are mounted on wood poles in which the pole movement/shaking exceeds camera capabilities.
- Unit 28: Secure perimeter cameras installed and used are unknown.
 1. No auto-tracking capability at Unit 28 (or front/vehicular gate)
- Unit 30: No secure perimeter cameras, but there is fence detection.
- Unit 25: Camera replacement needed
- Vocational: Cameras and wire pulls needed, especially at the front of the building

CAMERA RECORDING

- All facilities use Pelco Endura for digital onsite storage, except Unit 28.
 1. Digital storage is onsite in the CID building
 2. Capacity to hold 30-45 days of storage, but currently a hard drive issue beyond that capacity.
 3. Goal is to hold 120 days of storage
- Unit 28 uses Pelco DX 8100
 1. Installed separately and not integrated with the Siemens Siveillance system.

MISSISSIPPI STATE PENITENTIARY

BUILDING: CID

CONTROL ROOM AND PERIMETER SECURITY

2. Equipment located in a Boiler Room at Unit 28.
 3. System also installed at Unit 32 (however, note Unit 32 is condemned)
- The battery back-up for all digital recorders is approximately 4-5 years old
 - 1. There is a UPS and emergency generator for recording equipment
 - The battery back-up for computers and servers is failing and shuts down with a power outage
 - There is no power back-up for cameras and monitors
 - The monitors in the control room are a minimum 5 years old and due for replacement.
 - Unit 25 and 26: Recording 'cards' failing

CELL PHONE BLOCKING/DETECTION

- System approximately 1 ½ years old
- System by Global TelLink Corporation Tecore Networks
- System installed at Unit 28 and Unit 29 and is monitored every 30 minutes

Refer to photographs P1100654-P1100677

MISSISSIPPI STATE PENITENTIARY
BUILDING: FIRE DEPARTMENT
FIRE ALARM AND SPRINKLERS

On Thursday, June 26, 2014 I met with the Fire Marshal and the following comments were noted regarding fire protection for the facility:

FIRE ALARM

- Not all buildings have a Fire Alarm system (refer to enclosed list for location and device type)
- If fire alarm device is activated, note the following sequence of operations:
 1. Notification at facility in which device alarms
 2. Notification to Central Security
 3. Central Security contacts the fire house at Parchman
 4. After-hours contact (and alternate daytime) is Sunflower County Fire Department

FIRE SPRINKLERS

- Not all buildings have a sprinkler system (refer to enclosed list for location and sprinkler head type)
- All kitchen equipment has overhead suppression
- Outside vendors provide fire suppression chemicals/cabinets
- Sprinklers are checked every 6 months, including the fusible link

FIRE HYDRANT

- There is no dedicated fire service; it's combined with the domestic water service
- Fire hydrant flow test is performed by the fire department
- Flow test inside buildings is performed by the maintenance department
- Sunflower County Emergency Management department has GPS locations for all fire hydrants (refer to enclosed map for approximate locations)
