

**REAR SWING FLAILS**

***FINISHING STRONG.***

# **WE FINISH EVERYTHING WE START.**

*At Diamond Mowers, no job is left undone and no work is unimportant. We build the toughest, most reliable and safest heavy-duty equipment in the business. It's that simple. We build everything in the USA and that goes for our Rear Swing Flail Mowers.*

***Demand Better. DEMAND DIAMOND.***

## ***FAR AHEAD OF THE CURVE***

This highly versatile attachment goes into places and into conditions where a tractor and rotary system shouldn't or simply can't. Our Rear Swing Flail (RSF) is engineered to provide a well-groomed finished cut, as opposed to the rough and ragged cut of a rotary mower. The Diamond RSF is ideal for road and irrigation ditch maintenance. The RSF excels where frequent brush, rock and debris build-up occurs, like old fence lines. The RSF reaches and trims back roadside brush by utilizing a 90° vertical cut feature.

The Diamond RSF also performs best on your bottom line by cutting out waste and expense versus the typical mid-mount flail.

***Demand Value. Demand Diamond.***

# REAR SWING FLAIL MOWERS

## SMART, SUPERIOR AND SAFE

Using the right tool for the job is always the first rule of safety. By simply choosing the Diamond Rear Swing Flail, you are already working safer. In addition, the RSF has some heavy-duty safety thinking built right in.

Our ultra-protective bonnet shields more cutting area than a rotary unit, keeping operator and others safer. Also, instead of a large, bulky rotary knife, our individual flail knives are engineered to be far less likely to propel rocks and other nastiness.

*Demand Safety. Demand Diamond.*
