

**ROTARY MOWERS**

***TIME TO WORK.***

# NO TIME TO WASTE.

*Not every job allows you the luxury of time, but you still need every job done right. That's why you use a Diamond Rotary Mower. Our Rotary Mower cuts faster than a flail, and costs less to operate. Demand the Best. **DEMAND DIAMOND.***

## **TOUGH. VERSATILE. GUARANTEED.**

Each of our Rotary Mowers is made of impact resistant steel, and comes with a 1-year warranty on all parts and labor.

The pilot operated brake valve provides controlled shut down when the mower is turned off, and relief protection when it is running, so if the blades hit a large obstacle, the hydraulic system is protected. You can go as fast as you need, without sacrificing control.

Twin Rotary Mowers are available in:

- 60" side and 60" rear rotaries
- 72" side and 60" rear rotaries
- 72" side and 72" rear rotaries

Side Rotary Mowers are available in 60" or 72".

All mowers come equipped with replaceable skid shoes.

# ROTARY MOWERS

## **DIAMOND ROTARY MOWERS** **AS STRONG AND SMART AS THEY ARE FAST.**

With three, full swinging, heat treated suction knives and a heavier deck than our competitors, our rotary mowers are built strong to last. Our hydraulic systems provide greater hydraulic power - which results in doing more work, much faster.

### **THE DIAMOND MOWERS SPINDLE**

Made at our factory in South Dakota, Diamond Mowers' proprietary Spindle has 35% more bearing surface than competing products, and over twice the bearing load rate. Our spindle uses the same self-adjusting bearing used by the rock crushing industry, with a housing twice as thick as its competitors. And it only needs to be greased every 500 hours instead of daily - because you've got better things to do with your time.

Our proprietary replaceable splined insert reduces the cost of spindle spline failure by 93%. Plus, it's a repair that can be made in the field in 30 minutes or less.

### **THE TRI-HEX ADVANTAGE**

The Diamond proprietary Tri-Hex mulching disc on our rotary heads provides greater inertia in tough conditions, and prevents material build-up between the deck and blade carrier. The disc is constructed of 1" thick 50,000 psi rated steel with hardened, replaceable inserts, giving you unparalleled durability and easy blade maintenance.

Blades attach to the Tri-Hex with castle nuts, roll pins, and hex bolts that have 3,000% more load bearing surface than traditional key style bolts. The bolt insert is made of harder steel than the disc. When wear occurs the insert can be easily replaced instead of the whole disc.

And it's covered by an unprecedented 5-year warranty. Not that you'll need it.

### **WANT MORE?**

#### **Optional features:**

- Cable controls
- Double row chain guard

## **PROUD TO BE MADE IN THE USA**

Diamond Mowers was founded on American values and is grounded in a Midwestern work ethic. You want the toughest, smartest, safest, and most reliable equipment available, and that's what we give you. It's what Diamond does best.
