CLEARING THE WAY SINCE 1969

ALAMO INDUSTRIAL® IS A MARKET LEADER IN THE RIGHT-OF-WAY VEGETATION MANAGEMENT INDUSTRY

Alamo Industrial® is proud to be a leading manufacturer in the Seguin, Texas community as well as being represented by our major authorized dealers in the United States, Canada, Mexico, South America, Australia, and the Caribbean. We are one of the world's largest manufacturers of tractor-mounted mowers, brush-cutters and land-clearing equipment. We have been here since 1969 working with government agencies and contractors who perform right-of-way clearing, roadside vegetation management and grounds maintenance.

When you work with us, you will find employees from production to our executive managers who are hands-on and fully engaged in the day to day operations. We are constantly looking for ways to make your job easier and to offer you the equipment and training you need to work more efficiently and safely. Our network of dealers is selected with you in mind to give you the full coverage and services you expect to receive locally.

We are a member company of Alamo Group headquartered in Seguin Texas, a global leader in the design and manufacture of high quality agricultural equipment and infrastructure maintenance equipment for governmental and industrial markets. In 2012 Alamo Group was selected by Forbes as one of America's Most Trustworthy Companies.

IF YOU RUN MOWING EQUIPMENT, SAFETY IS YOUR #1 CONCERN.

The challenge is finding a partner that can bring solutions to the table. You need relevant training on the products your operator's actually run, all delivered with a lasting impression.

We can be your partner and our solution is **T.M.O.S.T., TRACTOR MOWER OPERATOR SAFETY TRAINING.**

What is T.M.O.S.T.?

- It is an 8 hour "conversation" on safety which includes both classroom and hands-on training with your actual equipment.
- It is based upon the strict guidelines of the American Equipment Manufacturers Association (AEM).
- It covers any and all industrial mower and agricultural tractor manufacturers.
- It is conducted at your local Alamo Industrial authorized dealer or at your location.
- Pre and Post Course testing is done on all participants giving you an instant measurement of the course affectivity.
- Each participant receives a certificate displaying they have successfully completed all 8 hours of safety related coursework.

Other solutions we can partner with you to cover your training needs include:

T.M.O.S.T. 2.5

Our condensed version of the classic T.M.O.S.T. course.

Workplace Safety and Personal Responsibility

Enhance your personal growth and improve team effectiveness in our 3 hour workshop.

Operator and Technician Service Tips

The one day training topics are geared to help you reduce the equipment down time and allows you to learn preemptive problem resolution and parts inventory control for your Alamo Industrial equipment in your fleet.

Your proactive decision to train supports your commitment to providing a safe, hazard free work environment for all your employees. We want to be your partner to meet your commitment.

THERE ARE MANY REASONS OUR OEM PARTS ARE THE ONLY ONES RECOMMENDED BY US, STARTING WITH OUR 45 PLUS YEARS OF EXPERIENCE BUILDING PARTS.

All parts are not created equal. Before you settle on an imitation part, know this, Alamo Industrial parts offer the safety, durability and warranty protection you expect.

- We design and build to exact specifications requiring strict chemical strength and performance characteristics. **OEM parts have the exact fit and finish of the parts you are uninstalling.**
- Alamo Industrial replacement parts meet the rigid guidelines necessary to satisfy warranty requirements. Using anything less means you are not maintaining the structural, operational and safety integrity of your equipment. **OEM parts are backed by the company who built your equipment.**
- Alamo Industrial parts are tested to meet SAE & ASAE safety standards. We take pride in manufacturing quality parts that consistently test above and beyond the industry standards. **OEM parts offer the quality you have come to expect.**
- Our factory trained parts professionals will offer the highest level of expertise and are available to answer any questions and have first-hand knowledge of our complete line of equipment. **You have access to inventory and expertise locally and from the factory.**
- We are proud to offer \$5,000,000 liability insurance coverage standard for all wholegoods and OEM parts in current production. **How can you afford not to buy OEM?**

ALAMO INDUSTRIAL UNDERSTANDS YOUR TOTAL COST OF OWNERSHIP (TCO).

We know the acquisition costs account for approximately 25 to 40 percent of the total cost for most products and services. The balance and majority of your spend comprises operating, training, maintenance, warehousing, environmental, quality, and transportation costs as well as the cost to salvage the product's value later on.

We can help you identify your TCO and we have established ways, with you in mind, to help you reduce your total cost of ownership.

- We have alliances with our key suppliers to help keep our costs low.
- We participate in numerous national purchasing association and fleet management shows to learn and stay on top of the challenges facing you.
- We hold many Co-Operative Purchasing contracts.
- We hold numerous State and local contracts.
- We optimize our authorized dealer network to support you locally.
- We meet with you and listen to your needs and work with you to find the best solution.
- We can leverage other Alamo Group company products to support your additional roadside equipment requirements.

Our focus in being in your supply chain is to help you be the "Best in Class."

BOOM MOWERS

MAVERICK

MAVERICK™

- Turret-mounted design for maximum boom stability and endurance
- Sheet metal boom design for maximum strength
- Variable displacement piston pumps

MACHETE 2
SECOND GENERATION

MACHETE 2™

- High frame design for maximum off-road clearance
- Variable displacement piston pumps
- Boom sections are a heavyweight, space tube design

SAMURAI

SAMURAI™

- High frame design for maximum off-road clearance
- Gear type fixed displacement pumps
- Available in cable-controlled and joystick controlled versions

REAR MOUNT BOOM

REAR MOUNT BOOM

- Self-contained, universal design can be mounted to most tractors
- Fixed displacement gear type pumps
- Heavier-duty design than our competition

McCONEL®

MCCONEL® "PA SERIES" REAR MOUNT BOOMS

- Self-contained, universal design can be mounted to most tractors
- Fixed displacement gear type pumps
- Lighter duty units designed for use on smaller series tractors

ROTARY HEADS

SEVERE DUTY ROTARY HEAD

- Designed for cutting brush up to 5" in diameter. Available for the Maverick, Axtreme, Machete2 and Samurai booms

BOOM-AXE®

- Rated for cutting grass, weeds, and brush up to 5" in diameter. Available in 50' & 60' for A-Boom, Versa, and Rear-Mount booms.

FLAIL HEADS

FLAIL-AXE®

- Cut vegetation up to 4" in diameter. Equipped with 16 anvil style flails. Available for all Alamo Industrial® boom mowers.

BATTLE AXE

- Rated for cutting brush up to 6" in diameter
- Available for the Maverick, Axtreme, Machete2 and Samurai booms

SHD HEAVY DUTY GRASS FLAIL

- Cut grass and weeds up to 2" in diameter. Available for A-Boom, Versa, and Rear Mount booms.

HEAVY DUTY GRASS FLAIL

- Rated for cutting grass and weeds up to 2" in diameter. Available as a 60" model for all Alamo Industrial® boom mowers.

SPECIALTY HEADS

BUZZBAR®

- Cut brush and trees up to 4" in diameter. Available in 48", 69", and 90" configurations for all Alamo Industrial® boom mowers.

TIMBERCAT™ SICKLE LIMB CUTTER

- Rated for tree limbs up to 4" in diameter. Available in cutting widths of 5' and 7' for all Alamo Industrial® boom mowers.

HITCH POST MOUNTED DITCHER

- Heavy duty head for eliminating water flow problems by removing dirt and debris from roadway ditches and waterways.

QUICK HITCH® SYSTEM

- Change cutting heads in the shop or field in approximately 10 minutes. Mounts with all Alamo Industrial® boom mowers.

INTERSTATER

INTERSTATER® FLAIL

- Hydraulically driven 62", 74", or 88" flail-type cutting head
- Adjustable cutting height from 1/2" to 6"
- Cutting capacity: 1" grass and brush

SUPER HEAVY DUTY

SUPER HEAVY DUTY FLAIL

- Mechanically driven flail-type cutting unit available in mowing widths of 62", 74", 88", or 96" with adjustable cutting height from 1/2" to 6"

VERSA® FLAIL

VERSA® FLAIL

- Hydraulically driven flail-type cutting head
- Adjustable cutting height from 1.5"
- Available in 60", 74" and 88" cut widths

GRASS KING®

GRASS KING® FLAIL

- Hydraulically driven 62" or 74" flail-type head
- Adjustable cutting height from 1/2" to 6"
- Cutting capacity: 1" grass and brush

Switch Blade™ Sickle Bar

SWITCH BLADE™ SICKLE BAR

- Available in 5" and 6" lengths
- Tilt angle of 90° up to 75° down
- Cuts up to .5" grass and light brush

FALCON™ HYDRAULIC FLEX-WING

- Adjustable cutting height from 1.5" to 14.5"
- Cutting capacity: 3.5" grass and brush material
- 7-gauge domed style deck design offers easy cleaning

EAGLE™ MECHANICAL FLEX-WING

- Mechanically driven model with flat top deck design
- Adjustable cutting height from 1.5"
- Cutting Capacity: 3.5" grass & brush material

VERSA® ROTARY

VERSA® ROTARY

- Hydraulically driven 60" rotary cutting head
- Adjustable cutting height from 1.5"
- Cutting capacity: 2" grass and brush material

RX SERIES ROTARY

- Mechanically driven 3 point hitch mounted rotary mower
- Cutting Capacity: 2.5" grass & brush material

EXTEN-A-KUT® II

EXTEN-A-KUT® II ROTARY

- Hydraulically driven 60" rotary cutting head with 59.75" cutting swath
- Adjustable cutting height from 3 1/4" to 9 1/2" with adjustable tail wheel
