Unite System

General Information

GENERAL INFORMATION

Overview

Unite is the unifying element that brings together architecture and furniture to create highly effective work environments that are both engaging and productive. As a comprehensive Systems offering, Unite features preconfigured panels, worksurfaces, storage elements and accessories, which together allow for dynamic solutions to current and future needs. Yet, Unite also brings a degree of simplicity to Systems furniture that other systems lack. Uncomplicated, but by no means boring, Unite simplifies the entire Systems furniture process—from planning and specifying, to ordering and installing—so more time is spent appreciating the end result and less time is spent worrying about the details.

Panels

Preconfigured monolithic and segmented Unite panels are available. All panels ship knockdown with panel frame, tiles, base components, top caps, adjustable glides, and panel-to-panel connection hardware. Panels may be specified without top caps to allow for attachment of spanning top caps or divider screens. All Unite panels meet the flame spread and smoke generation criteria defined in the UL 1286 safety standard for office furnishings.

Preconfigured panels are 3.5" thick to facilitate integration with KI Genius walls, and are available in the following dimensions:

- Widths: 24", 30", 36", 42", 48", 60" 72" (split tile on 72")
- Heights: 32", 40", 48", 56", 64"

Three base styles allow for functional and aesthetic planning flexibility:

- Standard base
- Elevated base
- Tile-to-floor base

Insert tiles are interchangeable among standard, elevated, and the standard base side of tile-to-floor panels. The tile height of the tile-to-floor tile is unique and not interchangeable. All tiles are hand-placed, requiring no tools for attachment to Unite frames. Standard and elevated base styles support future reconfiguration that substitutes either base style for the other.

Standard bases allow for distribution of power and data at the base of the panel. Elevated bases improve air circulation and lighten overall scale of the panel. Tile-to-floor panels feature a base raceway on the user side and no base raceway on the opposite side. Above worksurface beltline power is available regardless of preferred base style.

Preconfigured monolithic panels feature either fabric or steel tile inserts. Fabric tiles feature a wide variety of vertical fabrics adhered to acoustical fiberglass boards. Fab-

ric wraps around the board on all sides to minimize end fraying. Laminate and veneer tiles are also available as special finishes.

Preconfigured segmented panels are available in a variety of substrate and finish options. Segmented panels universally feature a 32" segmentation height, with specified upper and lower, and front and back tiles. Preconfigured substrates vary by configuration and may include:

- Fabric—upper and lower
- Powdercoated solid steel—lower
- Powdercoated perforated steel—upper
- Single pane glass—upper
- Steel laminated markerboard—upper
- Slat wall—upper

Slat wall tiles feature extruded slat wall on the lowest 8" of the tile, with fabric covering any area above the extrusion.

Preconfigured stacking sections add 16" to any Unite panel, and are retrofittable to existing installations. All parts and hardware are included. Preconfigured models are available with inserts of the following tiles:

- Fabric
- Powdercoated solid steel
- Powdercoated perforated steel
- Single pane glass
- Steel laminated markerboard
- Slat wall/fabric

Fabric Disclaimer:

"Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request."

Connectors and Trim

All Unite panels include necessary panel connector blocks and light blocks. Connectors are universal and allow panel-to-panel connections of same or varied heights, as well as all panel-to-post and top cap connections.

Unite panels also include trim wherever possible. Trim included with panels consists of top cap, bottom trim channel or tile-to floor trim, base raceway cover and foot shroud. Side/end trim and spanning top caps, along with their respective hardware, are specified separately. All Unite trim is powdercoated metal.

Electrical

Unite's electrical planning is simple and easy to specify. All Unite panels of 30" and greater widths feature two knockouts per side which accept duplex receptacles (24" panels feature a single knockout) for base or beltway power distribution. Elevated bases may be specified with power distribution at beltway height only. Tile-to-floor tiles do not feature cutouts, but may run pass-through cabling. Ten-wire electrical is available in

standard format, as well as Chicago- and New York-specific kits. Specifiable grommet locations ensure convenient access to power sources. All electrical components are specified separately and field installed.

Worksurfaces

Unite offers a variety of worksurface shapes designed to complement flexible workstation planning. All are available in a wide range of sizes. Edges and grommet locations may be specified. General worksurface styles include:

- Rectangle
- Corner
- Extended corner
- Extended corner reduction
- Conference end
- Tapered
- Peninsula
- Credenza and underhead tops
- 120 degree

Worksurface Support

Unite showcases a dynamic approach to planning through the use of multiple support options in a given workstation. All supports feature powdercoated steel. Powdercoated perforated steel inserts add design flair and added privacy.

Worksurface supporting legs are offered in two styles:

- Panel Supporting includes both open and insert styles. The frame ties the worksurface to an adjacent panel in place of a traditional return panel.
- Non-Panel Supporting legs are not tied to a panel, but offer a consistent aesthetic with the panel supporting frames.

Post legs may be used in place of frames for less foot restriction, or may be used in conjunction with panels or frames to support peninsula worksurfaces.

Cantilever brackets are also offered for more traditional planning. Standard and upscale versions are both offered.

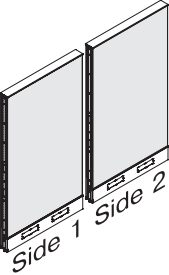

Storage

Unite is designed to support all KI storage lines, but in particular complements U-Series storage. Integrated and freestanding storage is offered, including pedestals, laterals, over/under heads, credenzas, and towers. All work together to make efficient use of a user's valuable time and space.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
• The absence of the ☐ indicates that no choice is required.
• Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select top cap style.
F - Flat trim (std)
N - No topcap
- C** Select electrical code.
DP - Domestic - with cutouts
- D** Select bezel color.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.
- E** Select trim color.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.
- F** Select fabric side 1.
Refer to color addendum at ki.com or in KI Fabrics & Finishes binder.
- G** Select fabric side 2.
Refer to color addendum at ki.com or in KI Fabrics & Finishes binder.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select top cap style.

F - Flat trim (std)

N - No topcap

C Select electrical code.

DP - Domestic - with cutouts

D Select bezel color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

E Select trim color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

F Select paint color side 1.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

G Select paint color side 2.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select top cap style.

F - Flat trim (std)

N - No topcap

C Select electrical code.

CP - Chicago - with cutouts

DN - Domestic - no cutouts

DP - Domestic - with cutouts

D Select trim color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

E Select fabric side 1.

Refer to color addendum at ki.com or in KI Fabrics & Finishes binder.

F Select fabric side 2.

Refer to color addendum at ki.com or in KI Fabrics & Finishes binder.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select top cap style.

F - Flat trim (std)

N - No topcap

C Select electrical code.

DP - Domestic - with cutouts

D Select bezel color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

E Select trim color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

F Select fabric side 1.

Refer to color addendum at ki.com or in KI Fabrics & Finishes binder.

G Select fabric side 2.

Refer to color addendum at ki.com or in KI Fabrics & Finishes binder.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note:

- The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select top cap style.

F - Flat trim (std)

N - No topcap
- C** Select electrical code.

DP - Domestic - with cutouts
- D** Select bezel color.
Refer to color addendum at [ki.com](#) or KI Fabrics & Finishes binder.
- E** Select trim color.
Refer to color addendum at [ki.com](#) or KI Fabrics & Finishes binder.
- F** Select steel bottom color side 1.
Refer to color addendum at [ki.com](#) or KI Fabrics & Finishes binder.
- G** Select fabric side 1.
Refer to color addendum at [ki.com](#) or in KI Fabrics & Finishes binder.
- H** Select steel bottom color side 2.
Refer to color addendum at [ki.com](#) or KI Fabrics & Finishes binder.
- I** Select fabric side 2.
Refer to color addendum at [ki.com](#) or in KI Fabrics & Finishes binder.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.

• Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select top cap style.

F - Flat trim (std)

N - No topcap

C Select electrical code.

CP - Chicago - with cutouts

DN - Domestic - no cutouts

DP - Domestic - with cutouts

C1 - Chicago, 1 side w/cutouts

D1 - Domestic, 1 side w/cutouts

D Select trim color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

E Select glass color.

GLA - Clear (std)

GLC - White laminate

GLV - Satin etch one side

See pricing column for glass upcharge.

F Select fabric side 1.

Refer to color addendum at ki.com or in KI Fabrics & Finishes binder.

G Select fabric side 2.

Refer to color addendum at ki.com or in KI Fabrics & Finishes binder.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select top cap style.

F - Flat trim (std)

N - No topcap

C Select electrical code.

CP - Chicago - with cutouts

DN - Domestic - no cutouts

DP - Domestic - with cutouts

C1 - Chicago, 1 side w/cutouts

D1 - Domestic, 1 side w/cutouts

D Select trim color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

E Select fabric side 1.

Refer to color addendum at ki.com or in KI Fabrics & Finishes binder.

F Select fabric side 2.

Refer to color addendum at ki.com or in KI Fabrics & Finishes binder.

Unite® Rolling Door

General Information

Plan View of Rolling Door Applications

No Jamb Condition (URDNJ)

180° Inline Condition (URD180)

90° Intersection Condition (URD90)

GENERAL INFORMATION

Unite Rolling Doors allow for simple privacy in workstation, and are offered with or without a jamb closure. Doors without a closing jamb simply over-lap the external corner of the closing panel intersection condition. Doors with jambs are shipped with a jamb post and a jamb rail (a receiver where the door can nest there by providing additional privacy).

Sizes

Rolling Doors are offered in the following sizes:

36" w X 64" h (monolithic door core)

36" w X 80" h (segmented door core)

42" w X 64" h (monolithic door core)

42" w X 80" h (segmented door core)

The width dimension provided indicates the nominal opening width that the door will span, and the actual door is oversized to allow for panel overlap.

64" high doors are constructed with a single aluminum frame. 80" high doors have a 16" high segmented top section to correspond

to a 16" high Unite® stacking section.

Panel Attachment and Specification

The panel to which a Rolling Door is attached must be specified the same width or wider than the nominal Rolling Door model (i.e. 36" w door with 36" or wider attach panel). The "No Jamb" model (URDNJ) must be specified with a 6" or wider attaching panel (i.e. 36" w model with 42" w or wider attaching panel). This prevents the door from extending open into an adjacent walkway. This rule is not required if the attaching panel is a member of a panel run.

Door Height Options

80" high Rolling Doors feature a 16" segmented top frame. The top segment of the door is consistent with a 16" panel stacking section on the Unite® panel. 64" Rolling Door models are monolithic and do not feature any segmentation.

Coers

Rolling doors are available with two optional

core inserts that are designated as "clear" and "opal". The insert material is the same and complements KI All Terrain® screens. The insert material is a horizontally fluted Polycarbonate sheet. Both cores are semi-transparent and provide basic privacy while allowing light to penetrate into the office space. The opal core is less transparent than the clear.

Handedness of Models

All Rolling Door models are "non-handed". Wheel assemblies are packaged separately from the door for unilateral application. Jamb post assemblies are reversible for right or left side assembly.

Planning Options

Rolling doors can be ordered after a job site has been installed (reconfiguration) or space planned in advance of job site installation.

If planned in advance, standard Unite® intersections will be replaced with jamb post intersections. If a job site is reconfigured after installation, standard intersections must

be removed and replaced with the appropriate jamb post assembly. The exception is with the "no-jamb" condition which does not require a closing jamb intersection.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select assembly.

F - Fully Assembled; add

\$123

U - Unassembled

C Select paint color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

Metallic paint requires upcharge.

D Select laminate color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

E Select key alike.

KA - Key alike

KS - Key standard

NLC - No lock core

INFORMATION

Steel bottom, top shelf and end panels with powder-coated finish
Accepts shelf divider
Door stores recessed with handle exposed
Double bit lock is included
Shelf depth is 13-1/4"

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select cabinet paint color.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.
- C** Select upper door laminate color.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.
- D** Select laminate door edge color.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.
- E** Select key alike.
- | | |
|------------|----------------|
| KA | - Key alike |
| KS | - Key standard |
| NLC | - No lock core |

INFORMATION

Painted cabinet and lower door
Shelf dividers available separately
Cabinet is fully assembled
Door stores above top of cabinet
Will accept hanging tool rail and tackboards (Attachment bar ordered separately)

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note:

- The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select fabric color.
Refer to color addendum at ki.com or in KI Fabrics & Finishes binder.

Yardage requirements are "per panel side"
(multiply times 2 for a complete panel).

Unite® C.O.M. Yardage Requirements

How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M. Testing

KI will require six yards of actual fabric to be submitted for testing. The test will be completed on panels, tackboards, and overheads. For products shipped from Manitowoc, WI facility, ship upholstery material to:

KI Manitowoc
1400 South 41st Street
Manitowoc, WI 54220
Attn: Fabric Testing

C.O.M. Production

Customer's fabrics must be approved prior to acceptance for production. KI assumes no responsibility for wear, defects, or performance of customer's own materials. C.O.M. orders are available on a deferred delivery basis.

Orders for production of C.O.M. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

Diagram A

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Yardage Specification

The chart on the following page details the yardage requirements for each upholstered item in the price list. To accommodate flaws, wrinkles, and other imperfections, calculate the total yardage and add the appropriate percentage shown below:

1 to 25 yards — Add 5 yards
25 + yards — Add 10% over requirements (5 yard minimum)
