CORE PAINTED METAL COLORS

SELECT PAINTED METAL COLORS

ACCENT PAINTED METAL COLORS

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

Light Walnut	NT601

NATURAL VENEERS — NATURAL-2

GRADE V5

Dark Rift Oak	RF331
---------------------	-------

**SE800 and NE800 are not available on Stride trim.

The beauty of wood is the natural variation of grain patterns and colors that make each piece unique. This variation is also influenced by lighting conditions, orientation of mated parts, and varying acceptance of the finishing process. The varying colors and physical characteristics naturally occur in all wood species but are most pronounced in lighter colored woods, and are especially evident in natural finishes.

NEW FINISHES AND FABRICS

HBF Textiles 13 new patterns with 112 colorways — available 1/23/2015
Dark Roast Walnut and Light Walnut — available 12/15/2014
Inertia Upholstery — available 9/28/2014

NEW FABRIC GRADES / SHORTENED CODES

Allsteel fabric grades changed and some codes were shortened in order to standardize across HNI furniture companies:

- Panel fabrics grades went from numeric to alpha:
Grade 1 is now Grade A, Grade 2 is Grade B, etc.
- Seating upholsteries grades went from alpha to numeric: Grade A is now Grade 1, Grade B is Grade 2, etc.
- Four upholsteries moved up from Grade A to Grade 2: Appoint Seating, Moguls, Sockhop, and Whisper Vinyl.
- Upholstery codes were shortened for: Centurion CTU to CU, Whisper WSP to WP, Silvertex STX to SX, Brisa BRS to RS.
- All changes above effective August 1, 2015 and are reflected throughout this price book.

NEW MODEL NUMBERS

Select models have been reassigned new model numbers with an "A" prefix effective 8/3/2014. There is no physical change to the model.

Lifetime Warranty

Allsteel Inc. warrants its products to be free from defects in material and workmanship for as long as the original purchaser owns them, except as set forth below.

Allsteel shall repair or replace with comparable product (at Allsteel's discretion), free of charge, any Allsteel product or component manufactured after March 16, 2015, that fails under normal commercial office use.

This warranty is subject to the following provisions:

Some natural variations occurring in wood, leather, or other natural materials are inherent to their character and not considered defects. Allsteel does not warrant the colorfastness or matching of colors, grains, or textures of these materials. Additionally, a Customer's Own Material (COM) selected by, and used at the request of, a user is not warranted.

The materials and components listed below are covered according to the following schedule from the date of sale:

- Wood products and electrical components (lamps and ballasts are not covered), seating controls, pneumatic cylinders, glides, casters and polymer-based components, and foam — 12 years
- Wood seating, stacking chairs, Sum® AutoFit® technology, and laminates — 10 years
- User-adjustable worksurface mechanisms, tablet arm mechanisms, interior wood-framed seating and lounge products, occasional tables, Mimeo™ 3D knit, Scout® mesh, panel and seating upholstery fabrics, and other covering materials — 5 years
- Marker board surfaces and upholstery on Gather™ products — 3 years
- #19®, Access™, Acuity®, Clarity®, Inspire®, Relate®, Scout, Seek®, Sum, and Trooper® asynchronous and synchro-tilt models are warranted for multiple shifts and users up to 300 lbs. Mimeo is warranted for multiple shifts and users up to 350 lbs. All other Allsteel chairs and components are warranted for single-shift, 40-hour workweek usage.
- #19 chair, including components and material, is warranted for as long as the original purchaser owns the chair.

- #19, Access, Acuity, Clarity, Relate, and Seek mesh/carriers and Mimeo carrier are considered structural chair components and as such are warranted for as long as the original purchaser owns the chair.
- Undercabinet LED light — fixture warranted for 3 years; power supply warranted for 1 year
- Link™ LED light — 5 years
- Wand™ LED Light — fixture warranted for 5 years; power supply warranted for 3 years
- Beyond™ Movable Walls — 10 years; moving parts such as door hardware and door mechanisms — 5 years; customer's own hardware — supplier warranty

This warranty does not apply to:

- Normal wear and tear over the course of ownership, including fabric puddling
- Damage from sharp objects (e.g., writing utensils, heeled shoes, scissors, jewelry, keys)
- Modifications or attachments to the product not approved by Allsteel
- Products not installed, used, or maintained in accordance with product instructions and warnings
- Products used for rental purposes
- Damage caused by the carrier in-transit, which is handled under separate terms
- Third-party products. Allsteel, to the extent possible, will pass through to the original purchaser (and process claims under) any warranty provided by manufacturers of undercabinet lighting, ergonomic work tools, or other third-party products supplied by Allsteel.

TO THE EXTENT ALLOWED BY LAW, ALLSTEEL MAKES NO OTHER WARRANTY, EITHER EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. ALLSTEEL WILL NOT BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES.

This warranty applies only to products sold within the United States of America and the Commonwealth of Canada.

Your Allsteel Dealer is our mutual partner in supporting your warranty requests. To obtain service under this warranty, please contact your Allsteel Dealer.

COM Program

Allsteel understands that customers may at times want to specify fabrics outside of Allsteel's standard fabric offering. Our COM program was designed to make specifying COMs on Allsteel products a simpler, friendlier, and hassle-free process. This process is simple and easy to use, and is described below under "Allsteel to Supply." If a Dealer wishes to manage the COM process themselves, they can do so by following guidelines under "Dealer to Supply". Find out more about Allsteel's COM process by emailing our COM Department at ASICSCOM@allsteeloffice.com.

Allsteel to Supply:

1. Select the fabric you wish to use and check the Tailored Solutions Application on Synergy. You need the COM supplier's name, fabric pattern name, and color name to search for approved fabrics.
2. If your fabric is listed as an approved fabric, you may place your order directly with Allsteel Customer Support. Please use the fabric code (e.g., S216426XP) from the Tailored Solutions Test Request on your order in the place of the standard fabric code. **Make sure to mark on the top of the order "Allsteel to Supply."** If your fabric is not listed as approved, you will need to complete a COM Test Request on Tailored Solutions. Allsteel will arrange to obtain test fabric and you will be notified of the results within 3 to 5 working days of receipt of the test yardage by Allsteel.
3. If the fabric is approved, you will receive an email summary from Tailored Solutions with the correct price grade and fabric code for order purposes. Written COM price quotes hold pricing for 90 days after issue date.
4. Once the fabric has been approved by Allsteel, enter your order directly with Allsteel Customer Support. Allsteel will purchase all COM fabric directly from the COM suppliers and schedule for production.

In the event that the Dealer decides to cancel a COM fabric order, the Dealer is responsible for the cost of the fabric plus a handling charge that is equal to 10% of the fabric cost.

Dealer to Supply:

1. Select the fabric you wish to use and check the Tailored Solutions Application on Synergy or call Allsteel Customer Support to see if the fabric you have chosen has already been tested and approved on the product you are interested in. You need to have the COM supplier's name, fabric pattern name, and color name for this inquiry.
2. If your fabric is listed as approved, you may estimate the yardage required by using Allsteel's COM Calculator on Tailored Solutions.
3. If your fabric is not listed as already tested and approved, you will need to complete a COM Test Request on Tailored

Solutions. You will need to arrange for the test fabric to be sent to:

Panel and Seating Test Fabric:

Allsteel Inc.
Attn: COM Dept.
Dock Doors 46-48
3000 North Hwy 61
Muscatine, IA 52761

Allsteel requires 3 yards of fabric for each panel system fabric being tested and 1 yard of fabric for all seating testing. Make sure to include two memo samples for each fabric to be tested with the test fabric. You will be notified of the test results within 3 to 5 working days of receipt of the test yardage by Allsteel.

4. Place your order directly with Allsteel Customer Support. **Make sure to mark on the top of the order "Dealer to Supply."**
5. All "Dealer to Supply" orders will be charged Grade 2 pricing for seating, Grade 1 pricing for Gather™, and Grade B pricing for panels. Dealers will pay for the COM fabric separately.
6. All "Dealer to Supply" fabric must be sent on a fabric roll.
7. Place your fabric order directly with the COM Supplier with instructions for the fabric to be sent on a fabric roll to:

HNI Fabric Distribution Center — Dealer PO Number COM Production Yardage

Docks 2-4
3000 University Drive
Muscatine, IA 52761

Information that **MUST** be included in the packing slip attached to the fabric:

1. Dealer's Purchase Order number to Allsteel
2. Allsteel's Tracking number for the COM fabric
3. Dealer Name
4. Yards of Fabric

If the fabric shipment does not match the correct fabric and yardage, Allsteel will notify the Dealer for resolution.

If Allsteel receives fabric with incorrect labeling that cannot be linked to an Allsteel furniture order, Allsteel will hold the fabric for up to 7 days, while the COM Expeditor attempts to identify the order. After 7 days, Allsteel will return the fabric to sender. There are no exceptions to this policy.

Any cancelled orders are subject to cancellation charges up to the full value of the Allsteel product cancelled. Allsteel will determine the actual cancellation charge at the time the cancellation is requested.

Additional Policy Information:

The company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality standards. The Company reserves the right to reject a COM if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation within 7 working days of receipt of test materials.

The company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to the manufacturer from the COM supplier. Excess yardage will be disposed of at Allsteel's discretion.

All cancellations or changes to COM orders are subject to Company approval. Because of the nature of COM, special fabrics, finishes, and structural modifications, products ordered as specials and then cancelled prior to shipment are subject to cancellation costs up to the full value of the product cancelled. The company determines the actual cancellation charge at the time the cancellation is requested. Upon approval, a cancellation number is issued to the Customer.

Purchase orders will not be accepted or entered unless the testing process is complete with positive results.

If all testing has been previously completed, re-testing is only necessary if fabric is to be used on a different product, or pattern direction has changed from that previously approved.

Previous test results can be obtained by a customer on the Tailored Solutions Application or by calling Allsteel Customer Support.

COM testing will require 3-5 working days from receipt of test yardage.

All COM fabric will be applied to seating and panel systems Pattern Cut unless Railroad Cut is requested and approved on the COM Test Request in Tailored Solutions. Any fabrics approved as a width pass, the dealer is responsible for clarifying Railroad Cut on orders containing items that are too large to support the Pattern Cut of a fabric application (any items larger than 48" high or wide).

Fire Retardant

The Dealer is responsible for ensuring that the COM fabric is certified to meet all flame retardant requirements.

For more information, please contact Allsteel Customer Support.

YARDAGE REQUIREMENTS FOR FABRIC WITH REPEATS — FOR USE ON GATHER™ PRODUCTS

Fabric Width	Plain Fabric	2" – 14" Repeat	15" – 19" Repeat	20" – 27" Repeat	28" – 36" Repeat
54"	0	+15%	+20%	+25%	+30%
53"	+6%	+19%	+24%	+28%	+36%
52"	+13%	+23%	+28%	+33%	+38%
51"	+19%	+26%	+31%	+36%	+41%
50"	+25%	+30%	+35%	+40%	+45%
49"	+30%	+35%	+40%	+45%	+50%
48"	+35%	+40%	+45%	+50%	+55%
47"	+45%	+50%	+55%	+58%	+65%

Depending upon the pattern repeat, it may be necessary to pattern cut the fabric. This will require 10% additional fabric.

To calculate multiple repeats (vertical and horizontal), add each repeat for total yardage required. For example for a fabric width of 54": 7" vertical requires 15%, 15" horizontal requires 20% total additional yardage required equals 35% (15% + 20%). Therefore, if your chair requires 2 yards of fabric, multiply 2 by 35%. Then 2.7 yards will be yardage required.

Special Paint & Stain Policy

Allsteel at its own discretion may modify its standard products with non-standard paint and stain colors to meet specific needs. Dealer is required to submit a special paint or stain request via the Tailored Solutions Application on Synergy. A sample of the non-standard paint or stain color desired will be required for matching. Pricing, lead time, and order information will be provided at the time of approval.

- For each new requested stain or paint, there will be a \$500 net fee to cover supplier costs to match the special item.
- For existing, previously-approved stains or paints, there is no \$500 matching fee, however, there is a sample chip fee of \$175 net for stains and \$100 net for paints.
- Samples, preferably at least 3" x 5" chips, of the exact color desired should be sent to the Allsteel Tailored Products Group. Paint matches require (3) sample chips and stain matches require (3) sample chips. Please mail these sample chips to the address below and reference the Special Item Request Number from Tailored Solutions.

Allsteel Inc.

Attn: COM Department
Dock Door 46-48
3000 North Hwy 61
Muscatine, IA 52761

- Allsteel will color match the sample and send control samples to the address provided in the request. Dealer will review Allsteel's color match and approve by signing the back of the sample chip. Send the signed sample back to the Allsteel Tailored Products Group.
- Product pricing for all special paints falls under the Select Paint price grade.
- Orders will not be accepted until Allsteel receives the Dealer's written approval on the color match.
- Extended lead times will apply on orders containing special paints or stains.
- Due to manufacturing techniques, materials, and quality issues, some exclusions will apply and some matches may be declined.

Important Notes

- Natural veneer is subject to nature's quality control. Differences in grain and color are naturally occurring variations and cannot be controlled by the manufacturer and cannot be considered as product defects. Natural veneer has the characteristics and beauty of a living organism; with its own variations of grain, growth, and color patterns. For these reasons, Natural veneer is preferred by many for its warmth and personal characteristics.
- Color changes will occur over time when wood is exposed to light. For this reason, when new product is ordered as an addition to existing product, there will be color variances between the old and new product. Please remember when specifying new product that although the species of veneer will be the same, additional product is being manufactured from a different tree. It may take several months for the new

furniture to mature to the color level of existing product. Even with this maturation process the additional product will not be an exact match.

Special Laminate Policy

The Company at its own discretion may modify its standard products with non-standard laminates to meet specific needs. Contact the Allsteel Tailored Products Group for pre-approved Wilson Art laminates and pricing for special laminates. When requesting a special laminate please supply manufacturer, along with name and pattern number of laminate.

- Extended lead times will apply on orders containing special laminates.
- Due to manufacturing techniques, materials, and quality issues, some product exclusions will apply and some requests may be declined.

Veneer Care Instructions

Veneer worksurfaces feature the Gunlocke® finishing system. The finishing system is a process that begins with the application of stains, which promote exceptional depth and clarity. Next the worksurface receives a specialized coating that provides exceptional durability and chemical resistance. The remaining surfaces receive a top coat. These finishing processes ensure depth, clarity, color consistency and durability throughout the product.

Veneer worksurfaces have exceptional resistance to:

- Heat and moisture (hot beverages, pizza boxes)
- Chemicals (liquid paper, nail polish)
- Stains (permanent markers)
- Scratches and impact (everyday wear and tear)

Caring for your veneer finish:

- General maintenance procedures entail wiping clean the entire surface with a clean, water dampened soft cloth once per week (be sure to wipe with the grain)
- Murphy's® Oil Soap may be used as a general purpose type cleaner with warm water to clean tops.
- The finish may also be polished with Guardsman® Furniture Polish (contains no waxes or silicones) to provide renewed luster.
- Be sure to wipe up all spills immediately. Do not allow spills to dry.

Wood owes its inherent beauty to variations in color, grain and texture, and therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next even though they are finished at the same time. Exposure to light and the aging process will cause a darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. Allsteel does not guarantee the exact matching of grain, pattern and color.

A full gallery of typicals from each Allsteel system can be found on our website: www.allsteeloffice.com/TypicalsGallery. Each typical includes a complete BOM with current pricing, downloadable CAD files and PDFs of each drawing.

Use the Allsteel Typicals Gallery to find the components in a Single Terrace Station...

"Irregular" Shape Station 23' x 6'6" (6-pack)

Typical #TDNA-AM

Line Item	Product Description	Qty	Model Number
1	Structural Raceway Panel Frame — No Top Trim 50"H x 48"W	6	TK05048WR
2	Terrace Top Trim 48"W	6	TK348PT
3	E End Trim Connector Kit 50"H	2	TK350E

The building blocks for a better office.

What makes a workspace inspiring? The truth is it's different for every office and every worker. The Terrace frame-and-tile solution offers both flexibility and refined design details, so you can keep it basic or dress it up. And, when paired with other Allsteel products, you can create beautiful, functional spaces that look every bit as good as they work.

Ideas often come from collaboration. Other times from focused research. And sometimes they appear out of the blue. Terrace makes it easy to design environments that help people do better work, from individual workstations for focused activities to teaming areas for group collaboration. With lower panels and frameless glass, open, naturally lit workspaces have an aesthetic that inspires. So nothing gets in the way of the next big idea.

More ways to design one-of-a-kind environments.

With Terrace, spaces can be as active as the people who use them. Worksurfaces of varying heights give people the freedom to enjoy the ergonomic benefits of changing postures. Soft seating integrated within primary and secondary work areas encourages spontaneous collaboration. And customized storage options can be integrated into spaces in a variety of ways to better fit individual workstyles.

Terrace offers unique designs that make a strong visual statement customized for any application. From the clean aesthetic of benching to an open, cross-functional collaborative space to an individual workstation for focused activities, Terrace provides the options and features you want and need.

Make the most of your space and your resources.

With real estate at a premium and the need for workspaces to be more agile to accommodate future needs and changing workstyles, office furniture must work harder than ever. That's why Terrace is built to last with sturdy steel panels that stand up to years of use and numerous reconfigurations. And it's designed to work seamlessly with other Allsteel products, so you can easily integrate a variety of other furniture options whenever the need arises.

Terrace, make it yours.

Once you've selected the furniture for your space, a variety of material options are available to give it a personality all its own. Make a bold statement with woodgrain laminate storage and contrasting trim and panel fabric. Or create a brighter look with panels and storage in light fabrics and finishes. Find the perfect palette to complement your brand or style.

The most beautiful thing about Terrace is all the ways you can customize it for functionality, ergonomics, and aesthetics. It can support heads-down concentration or encourage open interaction. You can mix and match a variety of options, from panel heights to worksurfaces, fabrics to frameless glass, and storage to accessories. The choices are endless.

BASE RACEWAY FRAMES

FOOTED PANEL FRAMES

STACKING FRAMES

DOORS

TOP TRIM / SCREENS

Connector Kits

- "L" 90° Connector Kit
- "T" 3-way Connector Kit
- "X" 4-way Connector Kit
- "S" Extended Straight Connector Kit

- "B" 2-way 120° Connector Kit
- "C" 3-way 120° Connector Kit
- "W" Wall Mount Kit
- "E" End Trim Kit

Frame Dimensions (Actual)

Depth: 2 3/8" (use 2 3/4" to calculate intersections in length of panel run)

Widths: 24", 30", 36", 42", 48", 60"

Heights* with radius painted trim: 34 1/4", 41 1/4", 49 1/4", 56 1/4", 64 1/4"

Stacking Frames: 15"H, 22 1/2"H, 30"H

Leveling Glides on Frames with Raceway Covers: 2 3/4" range

Leveling Glides on Footed Frames: 2 1/4" range

*with levelers fully retracted

Panel Frames (page 26)

- Specifications: formed, steel vertical members, with tubular steel horizontal members are welded into a sturdy, structural panel frame.
- Panels are shipped with base pathway covers or decorative feet installed.
- Top trim, monolithic or segmented tiles, and segment bars are ordered separately with choices of applications.
- Direct connections between same height frames in a continuous run are accomplished with provided hardware. There is no incremental increase in dimension along the run.
- For adequate stability, one of two methods of stabilization shown on page 15 must be adhered to.
- Base raceway panel frames include: frame, base pathway covers, attaching hardware, and bottom segment clip.
- Footed panel frames include: frame, panel feet, attaching hardware, and bottom segment clip.
- No electrical or data capabilities in footed panel frames. Decorative feet replace base raceway covers.

Panel Frame Conversion Kits (page 28)

- Base raceway to footed and footed to base raceway conversion kits can be used to convert existing frames. Footed to base raceway kits ship with glide tower assembly. Conversion process requires panel to be removed from panel run.

Building Vertically with Terrace Frames

Building Horizontally with Terrace Frames

Method 1—Opposing Returns

Method 2—Single-Sided Returns

Important planning guidelines: For adequate stability, one of two methods of stabilization must be adhered to:

Method 1—Opposing returns

- A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels running in opposing directions on each end of run.
- A single return panel (48" nominal minimum length) may be used with a mid-panel connector. The panel must extend at least 24" from one side of the parent run.
- Return panels must not be no more than 30" lower than the maximum height of the parent panel run.

Method 2—Single-sided returns

- A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels totaling at least 58% of its length, extending in one direction.
- Return panels must not be any more than 30" shorter in height than parent run. When using 120° connections, 12" must be added to length of return panels as determined by methods 1 and 2. Any run under 100" must have a minimum combined length of 60" of return panels.

Stacking Frames (page 27)

- When adding stacking frames, remove the top trim from the structural frame, and install it on top of uppermost stacking frame.
- Stacking connection provides a solid metal-to-metal connection, allowing the stacking frame to accept hang-on components, per Allsteel configuration guidelines.
- Includes attachment hardware and uses specified top trim. Add appropriate connectors.
- Stacking frames can be added to the top of a 35"H base panel frame up to 80"H, added to 42½"H and 50"H base panel frames in any combination up to 95"H, and added to the top of 57½"H and 65"H structural panel frames up to 110"H.
- To maintain panel mounting slot modularity 22½"H stacking frames should only be used with 42½"H, 57½"H base panel frames, or 87½"H door frames.
- To match 87½"H door frame height, use a 65"H base panel frame with a 22½"H stacking frame (slot modularity will be lost on stacker).
- To maintain modularity on 35"H, 50"H, and 65"H base panel frames use 15"H or 30"H stacking frames.
- If panel mounting slots are not being used, any stacking frame can be used on any base panel frame.
- Do not combine differing frame widths in a single stack or span multiple base panel frames with stacking frames.
- Stacking frames cannot be used as base frames.
- Tile options for stacking frames are given on page 21.
- Guidelines for using overhead storage with stacking frames are given on page 101.

Segment Bars (page 27)

- Segment bars are horizontal steel cross members required between tile segments. Must be specified on each side of frame.
- Black only.

Horizontal Stiffener Supports (page 27)

- Ordered separately.
- Optional Terrace horizontal stiffener supports can be used to increase the stiffness of interior on Terrace panel when acoustical tiles are on both sides (SS suffix) or acoustic tile one side and tool tile on other side (ST suffix).
- Use electrical mount models for mounting power blocks at locations other than beltline or base pathway (standing height or behind an overhead).
- Includes attaching hardware. Gray only.

Electrical Mount Support Bars (page 27)

- Used to mount electrical in any location in panel frame other than base pathway or beltline. Order electrical mounting brackets separately.
- Tiles must be field ported when electrical is mounted in a location other than just above the worksurface at beltline.
- Can be used with acoustical tiles on one or both sides of the panel frame.
- Includes attaching hardware. Gray only.

Door Panel Frames (page 28)

- The 87½"H door panel includes 42"W frame, 36"W door, hinges, top trim, and attaching hardware. See illustration above left.
- The 95"H door panel includes frame, 42"W door, hinges and attaching hardware, and two 8⅜"H x 42"W fabric tiles for top of door frame.
- Doors available in laminate or veneer.
- Painted top caps available in radius or flat.
- Specify fabric for top tiles on 95"H door.
- Lockset with knob or lever ordered separately.

Sliding Door and Mounting Kit (page 28)

- See illustration and specification information on page 18.

Frames & Connectors

Terrace® — Working with Frames & Connectors

GSA Reference Page

- **Multiple-height connections** also utilize standard “L”, “T”, “X”, “S”, and “E” connectors, with corresponding height connectors stacked according to the number of intersecting panels from the bottom up. (See examples below.)

Connectors and Trim

Off-Modular Panel Connection Kit (page 28)

- Includes top and bottom attachment brackets and top trim finished end.
- Must be field installed. Installation requires defacing of the top tile.
- Cannot be mounted in locations where the bottom bracket is closer than 8 inches from the edge of frame in the base pathway on parent run panels.
- Not structural. No panel mounted glass on spine where attaching or on first off-modular panel.

Top Trim (page 29)

- Use to finish top on base panel frames and footed panel frames.
- Top trim can span individual or multiple base panel or stacking frames.
- It is possible to span multiple frames when the combined frame width is equal to the top trim width.
- Some spanning examples are listed on page 29, other combinations are possible.
- Available in flat or radius in painted finish.

Panel Mounted Screens (page 30)

- Frameless insert integrated into the base panel frame top trim.
- Replaces top trim on structural or stacking frame.
- It is possible to span multiple frames when the combined frame width is equal to the panel mounted screen width.
- Taller adjacent frames require “HG” grooved end trim.
- Panel mounted screens are non-structural. Do not hang or stack on top of panel mounted screens.
- Available in 3/8" thick clear or frosted glass.

Connector Kits (pages 32-33)

- “L”, “T”, “X”, “S”, “B”, and “C” connector kits are used when connecting frames at intersecting runs.
- Base connectors include base pathway and must be specified at base regardless of full height or segmented connection. Specify height that corresponds with segment frame height. See Examples 5 and 6 at left.

“L”, “T”, and “S” Connector Kits (page 32)

- For “L”, “T”, “X”, and “S” connector kits, add 2 3/4" to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.
- “L”, “T”, “X”, and “S” connector kits includes top cap, connectors, vertical cover, light gap extrusion, and attaching hardware.
- “X” connector kits Includes top cap and connectors.
- Extended straight connector kit “S” can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate “T” or “X” intersections. (Add 2 3/4" to the length of the run for every extended straight connector used.) See illustration at left.

2-Way 120° Connector Kits (page 33)

- Includes top cap, connectors, vertical cover, and attaching hardware.

3-Way 120° Connector Kits (page 33)

- Includes top cap and connectors

“E” End Trim Kits (page 33)

- End vertical trim cover (includes top cap — adds 3/8" to run).

High-Low "H" End Trim

Top Stabilizer Brackets
Top and Bottom

Pair of Wall
Track Ends

Tile Attachment Kit
Top and Bottom

Segment Bar

High-Low End Trim Kits (page 33)

- High-low "H" covers the exposed end of a frame when joining frames of differing height in certain configurations — profile adds $\frac{3}{8}$ " to length of panel run. See illustration at left.
- At the end of a panel run use "E" model suffix end trim kit.

Grooved High-Low Trim (page 33)

- For use when the base panel frame of a panel mounted screen is shorter than the adjacent in-line panel. Taller adjacent in-line panel cannot have a panel mounted screen.

"W" Wall Mount Kits (page 33)

- Wall mount kits provide a means to affix a panel run to a permanent building wall.
- Kit adds $1\frac{1}{8}$ " to length of panel run.
- Includes top cap. (Color must be specified.)
- Connector is Black only.

Top Stabilizer Brackets (page 34)

- Optional brackets to provide added strength to reduce flex at panel junctions.
- Lay in cabling below top cap is not possible where bracket is installed.
- Panel mounted screen cannot be used where bracket is installed.

Terrace Wall Track/Tile Attachment Kits (page 35)

- Allows for mounting of system panel components on permanent wall structures except cantilevers and sit-to-stand units.
- Begin with one pair of ends; for multiple kits in line, add middle unit(s) between ends.
- Height of wall track coordinates with panel height. Field cut for lower heights.
- Wall track will add 1" to depth of attached components.
- Use Terrace wall track tile attachment kit to install tiles onto wall track. Tool tiles cannot be used on wall track. Kit includes two tile bars. Top bar may only be used in the top uppermost position on wall track. Bottom bar can be used in the bottom position at any location on wall track.
- When segmenting tiles on wall track, segment bars must be ordered for placement between all vertically adjacent tiles or at the top position of a single tile that is not in the uppermost position.
- It is not recommended to use the following types of Terrace tiles with wall track: solid steel, perforated steel, marker board, Landscape™, or hard surface. If these tiles are required consider using Stride wall track.
- When using Terrace wall track and using tiles to create a tackboard situation under overheads hung at 65"H, make sure to use a 30"H tile or 2-15"H tiles to cover the entire area between the overheads and the worksurface.

Frames & Connectors

Terrace® — Working with Sliding Doors

[GSA Reference Page](#)

Sliding doors for Terrace are a great addition to any new or existing installations. The sliding door can be specified with specific mounting kits for each door ordered. With a Frosted Translucent insert and your choice of Core or Select paint, the sliding door will create a unique look for any office environment.

The sliding doors are available in 50", 65", and 80"H models and can mount to 30", 36", 42", and 48"W panels. They accommodate a 36"W opening and are 42"W, nominally. The doors ship from the factory non-handed and become handed when field installed to fit the scope of the project. The handle pulls located on each side of the door are non-locking and are color matched to the trim to create a uniform style. And with the threshold free design, the sliding door offers better aesthetics and safety by eliminating the potential for tripping.

General Guidelines for Use of Sliding Door

- The system requires the ordering of both a door and a mounting bracket kit.
- All doors are 42" wide to accommodate a 36"W opening and are non-handed. Door leveling is dependant on floor being level.
- A mounting bracket kit must be ordered for each door corresponding to the mounting panels width (30", 36", 42", or 48"W).
- Mounting bracket kits are system specific and for Terrace.

General Guidelines for Layout Planning of Sliding Door

- Stability guidelines must be followed when specifying a sliding door. (Refer to page 15). The sliding door system was designed to close an opening in a run of parallel panels. Doors mounted to long runs of panels without floor support, ties to worksurfaces, or return panels may seem less stable.
- If the door is used to close an opening (A) where the panel opposite the door is at 90°, there will be a gap equal to the panel thickness between the door and the panel end when closed.
- When planning the layout, care must be taken if the plan includes a door mounted on a panel that is less than 42"W. If the panel is at a corner (B), the door will protrude into the aisle or next workstation when in the open position.
- If back-to-back doors are mounted on panels (C) that are less than 42"W they will interfere with each if both are open at the same time.
- The door is attached at the base of the panel at any end position with a wrap around bracket. Bracket kits are ordered in conjunction with appropriate end trim profiles. The slots at the base of the panel must be clear (D) and cannot be utilized by worksurface supports or panel hung components.
- If the door is mounted to a panel run that is positioned adjacent to a wall (E) or an inside 90° angle and there is not a 42" clearance between the track and the wall/inside 90° the assembly of the first stop will be difficult and plans will need to be modified for the assembly.
- If a door is closing an opening of a workstation that includes a "T" connector in the opposite wall, an extended straight connector may need to be used to maintain the 36" required opening.

Tiles — Tackable Acoustical, Steel, Perforated Steel, Markerboard*, Pearlescent Strata™, Foundation™, Infinite Spectrum™, Hard Surface*, and Veneer Tiles.

	24"W	30"W	36"W	42"W	48"W	60"W
7½"H						
15"H						
22½"H						
30"H						

*Not available in 7½"H

Data/Electrical Port (port tiles available as acoustical only)

	24"W	30"W	36"W	42"W	48"W	60"W

Glass Tile Kits

	24"W	30"W	36"W	42"W	48"W	60"W
15"H						
22½"H						
30"H						

Terrace tiles come in a variety of styles. Select the aesthetic* and functional combination that meets your specific requirements. Additional tiles not shown below include Monolithic, Monolithic Port, and Custom.

*Aesthetics of opposing tile surface and/or frame interior should be considered when selecting perforated or light colored sheer materials.

GSA Reference Page

To calculate the total height of tiles(s) required, deduct 5" (height of base/top trim) from the total nominal panel height.

Example: 65"H Frame takes 2 30"H tiles. $65 - 5 = 2 \times 30$

Tiles can be ordered in the size that matches the frame height plus the stacker height.

Example: Order a 65"H monolithic tile if you are using a 35"H frame plus a 30"H stacker.

Terrace tiles are universal (except glass) and can be placed at any 7½" increment on the frame.

Tile Heights

Monolithic tiles are actually 5" shorter to account for base raceway and top trim.

Typical Tile Height Configurations

Middle segment bars are required between any two tiles — order separately based on tile configuration on each side of frame. **Note:** Most CAD specification programs have tools that will calculate quantity of segment bars required.

Stacking	15"H	22½"H	30"H	15"H	15"H
35"H	15"H	30"H	42½"H	15"H	42½"H Monolithic
50"H	15"H	15"H	30"H	50"H Monolithic	57½"H
65"H	15"H	15"H	30"H	15"H	57½"H Monolithic
80"H	15"H	15"H	30"H	30"H	50"H Monolithic
95"H	15"H	50"H Monolithic	30"H	50"H Monolithic	65"H Monolithic

*Additional tile combinations to those shown above are possible; heights above 65" require stacking frames - maximum height is 110".

Tiles

Tackable Acoustical Tiles (pages 36-37, 40)

- Tiles do not include segment bars — order separately.
- 7½"H, 15"H, 22½"H, and 30"H tiles are non-dedicated. They can be used in any combination and in combination with other tile sizes.
- 30"H tiles can be used as monolithic tiles on 35"H frames.
- 42½"H, 50"H, 57½"H, and 65"H monolithic tiles are non-dedicated.
- 42½"H tiles can be used as monolithic on a 42½"H frame.
- 50"H monolithic tiles are actually 45"H and can be used in any combination with other tiles on a taller frame.
- 50"H tiles can be used as monolithic tiles on a 50"H frame.
- 57½"H tiles can be used as monolithic on a 57½"H frame.
- 65"H monolithic tiles are actually 60"H and can be used in combination with segmented tiles on a frame that is stacked above 65"H.
- 65"H tiles can be used as monolithic on a 65"H frame.

Port Tiles (pages 38-39)

- Receptacle openings with blank covers (1 in 24"W tiles; 2 in wider tiles). Located 30⅜" above bottom of base raceway.
- Tiles do not include segment bars — order separately.
- 15"H and 22½"H port tiles can be used on 42½"H or higher frame for data/power access at beltline.
- 35"H frames do not have beltline data/power capability.
- 30"H port tiles can be used in the base position on 42½"H or higher frames for data/power access at beltline.
- Specify the size that matches the frame size. One tile per frame side on 42½"H, 50"H, 57½"H, and 65"H.

Steel Tiles (page 41)

- Tiles do not include segment bars — order separately.
- Painted steel construction.
- 7½"H, 15"H, 22½"H, and 30"H tiles are non-dedicated and can be used in any tile position.
- Tiles attach with custom tile bracket kit — included. Color will match tile color.
- Do not use this tile with wall track.

Perforated Steel Tiles (page 42)

- Tiles do not include segment bars — order separately.
- Allows air flow when placed on each side of panel.
- 7½"H, 15"H, 22½"H, and 30"H tiles are non-dedicated and can be used in any tile position.
- Tiles attach with custom tile bracket kit — included. Color will match tile color.
- Aesthetics of opposing tile surface and/or frame interior should be considered when using perforated or light colored sheer materials.

Tool Tiles (page 43)

- Tiles do not include segment bars — order separately.
- Sturdy aluminum extrusion with steel support construction.
- Powder-coated for durable finish.
- Work tools to be hung from this tile available in Extensions™ section.
- Use in place of standard 7½"H or 15"H tiles.
- Cannot be used in the bottom location of a panel frame or on wall track.
- Each tool tile has a suggested weight capacity of 80 lbs. of paper management accessories. One monitor arm (listed on page 129) with a maximum monitor weight of 16 lbs. may be attached; however, when a monitor arm is specified, subtract 25 lbs. of paper management capacity.
- Optional horizontal tile stiffener support can be used to increase the stiffness of interior when using tool tiles and an acoustical tile. See page 15.

Glass Tiles (page 44)

- Tempered safety glass encased within a frame with built-in shrouds.
- Single-pane construction, glass is flush on one side.
- For use in stacking frames also.
- Glass opening is 4" less than nominal heights and widths.
- Cannot be used in top tile position of a 42½"H panel frame or any frame with integrated power pole.
- Cannot be used at the bottom or beltline location of panel frame.
- 30"H tiles will work in top position of 65"H frames and in 30"H stacking frame. Segment bar needs to be ordered

Marker Board Tiles (page 45)

- White marker board tile; painted steel surface.
- Accepts magnetic accessories.
- 15" magnetically attachable tray is natural aluminum color — order separately.
- Tiles attach with custom tile bracket kit — included. Specify paint color.
- It is not recommended to use this tile with wall track.
- 15"H, 22½"H, and 30"H tiles are non-dedicated and can be used in any tile position.

- Landscape™ Tiles** (page 46)
- ¼" material encased within a painted steel frame.
 - Paint color for frame must be specified.
 - Tiles do not ship with segment bars — order separately.
 - 7½"H, 15"H, 22½"H, and 30"H tiles are non-dedicated and can be used in any tile position.
 - Aesthetics of opposing tile surface and/or frame interior should be considered when using perforated or light colored sheer materials.

- Infinite Spectrum™ Tiles** (page 46)
- Infinite Spectrum is a color-matched 100% recyclable polyester resin material.
 - Review of PANTONE® sample and customer approval required prior to order entry.
 - Specify PANTONE color using a PANTONE print or paints and interiors color guide number or PANTONE MATCHING SYSTEM®. When using the print color guide, use the uncoated (U) color references, metallics not available; or use the architecture and interior color guide.
 - Sample kit required to confirm PANTONE color meets expectations.
 - Review of PANTONE sample and customer approval required prior to order entry.
 - 100% recyclable polyester resin material.
 - Tiles have a pattern that runs horizontally.

- Foundation™ Tiles** (page 46)
- Fabric laminated between recyclable PETG resin sheets.

- Custom Tile Bracket Kits** (page 47)
- Tile attachment kit allows for any approved ¼" thick “rigid” material to be used as a used as a Terrace tile.
 - Use supplied dimensions below for tile size.

- Hard Surface Tiles** (page 48)
- Melamine-coated MDF construction.
 - Available in two laminate colors: Whitestone and Black.
 - Tiles do not ship with segment bars — order separately.
 - Tiles attach with custom tile bracket kit — included. Specify paint color.
 - It is not recommended to use this tile with wall track.
 - 15"H and 30"H tiles are non-dedicated and can be used in any tile position.

Custom Tile Bracket Kits

Custom material used in the custom tile brackets should be sized according to these dimensions:

Standard Tile Height	Actual Height Dimensions	Standard Tile Width	Actual Width Dimensions
7½"H	7.198"H	20"W	19.481"W
15"H	14.698"H	24"W	23.481"W
22½"H	22.198"H	30"W	29.481"W

Terrace Stratawood Veneer

Wood owes its inherent beauty to variations in color, grain and texture, and therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next, even though they are finished at the same time. Exposure to light and the aging process will cause darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. Therefore, Allsteel does not guarantee the exact matching grain, pattern and color.

Terrace veneer tiles and worksurfaces are offered in Stratawood (composite). (See inside front cover for finishes.) These products offer excellent scratch, stain, and abrasions resistance, plus a high level of clarity.

Terrace Stratawood veneer worksurfaces are protected by one of the world's most advanced wood finishing process. It provides the ultimate in scratch, stain, chemical, and heat resistance for these high-wear surfaces. The jewel-like clarity and depth allow the natural beauty of the wood to glow through.

Stratawood Veneer

Stratawood Veneer

Stratawood veneer features a repeatable straight-grain pattern, absent of the cathedrals seen in Natural veneer. Although slight differences in tone should be expected, the Stratawood pattern will maintain a consistent appearance across all products.

Stratawood veneer is an engineered wood veneer enhanced by technology for consistency in both color and grain pattern resulting in very few defects.

Although exposure to light will cause Stratawood veneer to darken slightly, additional orders at later dates will match existing product pattern and will match the color when matured. This creates a smooth process for adding on to existing installations.

Veneer Tiles (page 49)

- Veneer tiles produced by Gunlocke® available in Stratawood veneer. See page 8 for additional veneer information.
- Stratawood veneer has a consistent straight-grain pattern.
- Veneer tiles ship with factory-installed attachment clips.
- Tiles do not include segment kits — order separately.

Caring for your veneer worksurface finish:

- General maintenance procedures entail wiping clean the entire surface with a clean water dampened soft cloth once per week. (Be sure to wipe with the grain.)
- Murphy's® Oil Soap may be used as a general purpose type cleaner with warm water to clean tops.
- The finish may also be polished with Guardsman® Furniture Polish (contains no waxes or silicones) to provide renewed luster.
- Be sure to wipe up all spills immediately.

For specification information see pages 13-18.

Electrical & Data

Terrace® — Working with Electrical & Data

[GSA Reference Page](#)

Terrace features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway and beltline. The open structure of the frame allows voice and data cables to be routed both vertically and horizontally.

Ceiling in-feed connects to building electrical supply. Ceiling in-feed can also be used at the bottom to feed up into footed panels where exposed flex conduit is permitted by codes. This in-feed can be prewired before panels are installed. A877006 and A877012 in-feeds must be installed in panel before connecting to building wiring.

Integrated power pole accommodates power in-feed and communication/data lines.

Electrical power harnesses have capacity for 2 duplex receptacles (1 in a 24"W panel) per panel side when ported. Non-base pathway power requires electrical mounting brackets.

Cable openings in frame uprights permit cables to be run between frames.

Capacity for lay-in cabling is provided underneath panel top caps.

Fiber optic and other data cabling can be routed through 90° intersections.

No more than one conduit that is connected to a harness mounted to horizontal can be routed through the same cut out in the same horizontal. Attempting to use more will cause binding of conduit and may affect reveals on receptacles.

Beltline area accommodates power and data or communication lines.

Electrical pass-thru harnesses have capacity for one duplex receptacle per panel side.

Jumper is required to connect base pathway power to beltline.

Base pathway accommodates power and lay-in capacity for data and communication.

Power blocks snap into base pathway horizontal frame members and accept duplex receptacles.

Electrical power harness accepts up to 2 duplex receptacles per panel side (24"W limited to 1) at base pathway.

Fiber optic cables can follow 90° turns at the intersection of panel runs.

Base pathway power in-feed mounts into any receptacle position in the base pathway area and is connected to the building electrical supply.

Electrical Systems

Terrace offers a choice of four electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals
- Eight circuits; two four-circuit systems provided back-to-back.
- See pages 52-53 for a detailed explanation of each electrical system.
- All four systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian) - 16 amps planable in U.S.
- Terrace panels and electrical components are UL Listed. Electrical components are also CSA certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.
- Use of a 35"H frame in a panel run will block beltline and above power distribution.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

Note: No more than one conduit that is connected to a harness mounted to horizontal can be routed through the same cut out in the same horizontal at beltline. Attempting to use more will cause binding of conduit and may affect reveals on receptacles.

Hardwire New York Code (page 61)

- Hardwire (New York Code) junction box (model A871400) is used when local electrical codes require hardwire entry.
- For use in panels 30"W to 60"W.
- When used in 30"W and 36"W panels, power can be routed only in one direction.
- When used in 42"W, 48"W, and 60"W panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction.
- Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any duplex receptacle location.

Hardwire Chicago Code (page 62)

- Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all-metallic components.
- The base pathway, junction box (model 873600) clips directly into receptacle locations and can be used both single- and double-sided.
- In the beltline location, junction box (model 873550) can only be used single-sided.
- Base pathway model has a larger volume capacity for wiring to allow for dual-sided applications.
- Customer must furnish conduit, wiring, and designer-type receptacles for the base pathway and conduit, wiring, designer-type receptacles, and receptacle covers for the beltline.
- Tiles at the beltline must be field ported.
- Power entry can be routed from the ceiling, via a Terrace power pole, or from the floor into a junction box (beltline model 873550; or base pathway model 873600).

Electrical In-feeds

- Power in-feed cables deliver power from building to panel's electrical system.
- In-feed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling in-feed cables depending on individual power requirements.

Base In-Feed (page 61)

- Sealtight base pathway power in-feed mounts into any receptacle position in the base pathway area.
- A heavy rubber sheathing shields conduit, allowing in-feed to be exposed.
- A jumper is required to connect base pathway power to beltline.

Sealtight Electrical In-feed (page 61)

- Sealtight electrical in-feed cable is used with footed panels.
- Should not be ordered prior to installation to have pre-wired as in-feed must be routed from inside of panel out to be connected to power.
- Cannot be connected to power harness in panel frame that in-feed is brought into unless additional pass-thru harness without power block is used to feed from below beltline to above beltline.

Ceiling Power In-feed (page 61)

- Ceiling power in-feed connects to a prewired electrical harness in the beltline or base pathway, traverses through an adjacent panel and terminates in the junction box at the top of the integrated power pole.
- Use models A870535 or A870565 with integrated power pole.
- Can also be used as in-feed for footed panels.
- Most codes allow flex conduit to be exposed after installation. Verify code requirements before ordering for exposed application.

Integrated Power Pole (page 61)

- Integrated power and communications poles provide capacity for routing power supply directly through the top of any structural or stacking frame using same width trim/connector kit in place of top cap.
- Avoid glass or translucent tiles in upper position of frames with integrated power poles.
- Power pole has a cavity on each side of a center septum.
- When using a ceiling power in-feed, consider that the in-feed must connect into an electrical harness located in an adjacent panel. (See page 58-59 for cable capacity.)

Electrical & Data

Terrace® — Working with Electrical

To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:
 - The Four-circuit system (4-Hot/2-Neutral/2-Ground)
 - 3 + 1 option
 - 2 + 2 option
 - The three-circuit system (3-Hot/3-Neutral/2-Ground)
 - The eight-circuit system (back-to-back four-circuit systems)
2. Determine location, quantity, and circuit of duplexes.
3. Determine the appropriate choice and use of isolated, isolated/dedicated, and separate neutrals circuits.
4. Specify appropriate power harnesses* and pass-thru cables.*
5. Determine the location, quantity, and type of power in-feed needed.

[GSA Reference Page](#)

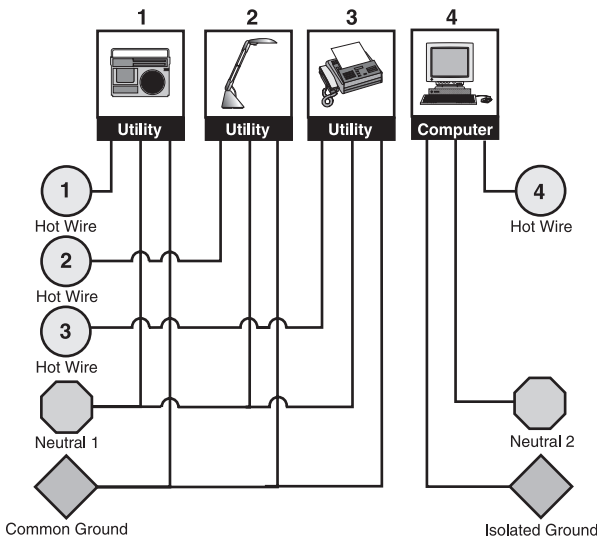

* Select power harness models (A8712XX), pass-thru cables (A8710XX), and pass-thru harness (A8711XX) with the last two digits corresponding with the panel width into which the component is to be positioned. The initial cable length can be stretched approximately 3" to transverse "T", "X", "L", and extended straight connectors.

Flexconnect™ Electrical System Options

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power in-feed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Four-circuit, 3 + 1 Receptacle Option

The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.

Four-circuit, 2 + 2 Receptacle Option

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

Three-circuit, separate neutrals

The three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/dedicated. The three-circuit components have model numbers with an "A" suffix.

Terrace System Receptacle Usage

Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	3 + 1	Common Circuit-1 A873501	Common Circuit-2 ⁽¹⁾ A873502	Common C ircuit-3 A873503	Iso/Dedicated Circuit-4 A873504
	2 + 2	Common Circuit-1 A873501	Common Cir- cuit-2 A873502	Isolated Circuit-3 A873506	Isolated Circuit-4 A873504
Three-circuit 3-Hot/3-Neutral/2-Ground	w/separate neutrals	Common Circuit-1 A871501A	Common Circuit-2 A871502A	Iso/Dedicated Circuit-3 A871503A	N/A

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel model numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust-colored.

Typical power usage by the most commonly specified office equipment.

20 amp receptacle
(Required by some large copiers.)

Electrical & Data

Terrace® — Working with Electrical & Data

GSA Reference Page

Power Harnesses, Pass-Thru Cables, and Jumpers

Electrical power harnesses are used to distribute power in Terrace panels. Harnesses can be mounted at base pathway or beltline. **Power blocks** on electrical power harness and pass-thru harness accept duplex receptacles.

Electrical Power Harness

Electrical Pass-Thru Harness With Power Block

Electrical Pass-Thru Harness Without Power Block

Electrical Jumper Cables

Dual Electrical Eight-circuit Power Harness Kit

All electrical power harnesses and pass-thru harnesses (except 20"W) will stretch 3½", allowing them to span "T", "X", and 120° intersections and "S" extended straight connections.

Note: "T" intersections require a minimum of one power harness and "X" intersections requires a minimum of two power harnesses.

Use of a ceiling in-feed or jumper at this location requires an additional power harness.

Electrical Power Harnesses (page 60)

- Specify harness length to match panel width. 24" power harness accepts one receptacle on each side of the harness, all other length power harnesses have power blocks to accept four duplex receptacles (two on each side of panel).
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in base pathway; harnesses require optional mounting brackets at beltline or other vertical locations
- Use of a ceiling in-feed or jumper requires one additional harness.

Electrical Pass-thru Harnesses With Power Block (page 60)

- Specify harness length to match panel width.
- Electrical pass-thru harnesses have capacity to handle one duplex receptacle on each side of the panel.
- A 60" pass-thru harness can be used to jump up to a single duplex receptacle per side at beltline and connecting to a power harness at base pathway.
- Electrical power harnesses and pass-thru cables cannot be routed at 90° at beltline once frames are connected to connector blocks.
- Specify harness length to match panel width.

Electrical Pass-thru Harnesses Without Power Block (page 60)

- Specify harness length to match panel width.
- Electrical pass-thru cables distribute power through any panel where receptacles are not required. Cable length cannot be stretched.

Electrical Jumper Cables (page 60)

- Electrical jumper cables connect power from base pathway or beltline to a harness located on any horizontal member as needed.
- Jumper cable plugs into power block end of electrical power harness or electrical pass-thru harness.
- Model A871366 is 66" to jumper up to 30 inches vertically – base pathway to beltline, beltline to base pathway, or up to 30" above or below beltline when connected to beltline electrical.
- Model A8713108 is 108" to jumper up to 65" vertically – from baserail up to the highest 15" opening on an 80"H frame.
- Jumper can also be used from beltline to adjacent beltline at 90° juncture via baseline.

Dual Electrical Eight-circuit Power Harness Kits (page 60)

- Kit provides back-to-back four-circuit systems giving double the capacity of harness and pass-thru cables. Cannot be used at beltline with Terrace. Restricted to base pathway only.
- Requires two four-circuit in-feeds. Uses four-circuit receptacles.
- Models must be positioned "back-to-back" in the panel — single-side use is not permitted.
- Components can only be routed in a single run — a single run cannot branch to multiple panel runs at "T" and "X" junctions.
- Four-circuit jumper cables (A8713xx) can only be connected to a power block at one end of a run — power cannot be routed between a run in the base pathway and beltline area, except at one end of the run.
- Standard four-circuit pass-thru cables (A8710xx) can be used in between power harnesses. Two are required in the back-to back configurations.
- Models can be connected to standard four-circuit power harnesses and pass-thrus, although it is not recommended because of possible circuit number ambiguity.
- Two power in-feeds are required to connect the back-to-back runs. Power A8719xx must be connector to a power block at the end of a run.
- Data faceplates and terminals cannot be positioned in a panel into which back-to-back power harnesses are installed.
- Power in-feeds A8719xx must be routed from a panel wherein no power harness is positioned, into an adjacent panel where a power harness is positioned and connected to the end of a power block.

Power Blocks

Power Block Base Pathway Mounting

Power Block at Beltline

Horizontal Electrical Mount Support

Terrace offers multiple options for mounting electrical:

Base Pathway Mounting

- Power blocks snap directly onto brackets in base pathway area and accept receptacles (sold separately) on each side of harness.

Electrical Mounting Brackets (page 62)

- Package of 12. One bracket required at beltline for each pass-thru harness and 24"W power harness. Two brackets required at beltline for 30"-60"W power harnesses.
- For ported receptacles at beltline or below worksurface, mount power blocks onto electrical mounting brackets which screw into Terrace panel frame.
- Model 8989EB for use with data/electrical port tiles at beltline or directly below standard worksurface height on 42½"H-65"H panels.
- Model 8989BW for use with data/electrical port tiles directly below standard worksurface height on 35"H panels only.
- Data/electrical port tiles must be used where exposed receptacles will be located. No standard port tiles are currently available for below worksurface, either field port using kit model UTP or contact tailored products.
- To connect power between the base pathway and the beltline area, four-circuit jumper cables (A8713xx) must be connected to a power block at one end of a run, routed into an adjacent panel that contains no power harness, then routed back into the panel that contains a power harness (or pass-thru cable), and connected to a power harness in the other pathway.

Horizontal Electrical Mount Support (page 63)

- Use horizontal electrical mount support bar and electrical mounting brackets (sold separately) when mounting power blocks at a location other than beltline or base pathway.
- Specify support bar width to match panel width.
- Tiles must be field ported when electrical is mounted in a location other than just above the worksurface at beltline.
- 22½"H ported tiles can be used to mount power below the worksurface with the electrical mount support bar being field located in the panel to align with the tile's ports.
- Can be used with acoustical tiles on one or both sides of the panel frame.
- One electrical mounting bracket required for each pass-thru harness and 24"W power harness. Two electrical mounting brackets required for 30"-60"W power harnesses.
- Gray only. Includes attaching hardware.

Receptacles

Duplex Receptacle

Receptacle Color Recommended to Coordinate with Paint Color

Paint Color	Receptacle Color
Brilliant White — PQ8	White — EW
Carob — P52	Black — E4
Champagne — PR5	Muslin — EU
Fossil — P28	Flint — E9
Gunmetal — PR3	Brownstone — EY
Parchment — P93	Muslin — EU
Platinum — PR2	Loft — EV

Duplex Receptacles (page 61)

- Duplex receptacles snap into power blocks of power harnesses or pass-through harnesses.
- Duplexes are available in multiple colors. See inside front cover for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3, or 4.
- Duplexes are model specific to support either 3+1 and 2+2 electrical in-feed; or have an "A" suffix and are design to support a three-circuit separate neutral electrical in-feed.

Receptacles

**Pull-up Receptacle** (page 62)

- Mounts in worksurface grommet holes, providing three receptacles to the worksurface.
- Integral 15 amp circuit breaker and 6' cord w/plug included.
- Pull up receptacles may interfere with the placement of pedestals
- Included grommet may not match Allsteel worksurface grommets.

Power/data Dome (page 62)

- Mounts in worksurface grommet holes or into field-cut, 2¼" diameter hole. Includes 6' black power cord.
- May interfere with the placement of optional pedestals.
- Unit has two receptacles to the worksurface plus data ports.
- Includes adapters to allow us of commercially available data terminals or blanks to fill unused openings.
- Many of the AMP, AT&T, Krone, Leviton, and most commercial data terminals can be used.
- Data terminals must be of a design that will snap into .695 x .650, .590 x .790, or .590 x .750 openings in .064 maximum thick faceplate.

Cable and Wire Management

**Cable Management Tray** (page 62)

- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 62)

- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

Cord Retainer Clip (page 62)

- Provides confinement of vertical electrical/data wiring.
- 1½"H cord clips snap into vertical panel slots to contain cords.
- 4 clips are provided standard with each task light cord.
- Package of 50. Available in Black only.

Data Management Organizers (page 62)

- Cable organizers are made of rigid polymer, and hang from the horizontal cross members or in the base raceway. Can be stacked infinitely.
- Cables can be placed into the extensions of the organizers to keep cables aligned as they pass through the panel frame.
- Commercially available tie-wraps can also be used to strap cables to the organizer extensions.
- Organizers are ordered separately in packs of 20.

Universal Tile Port Kit (page 62)

- Allows field installation of additional data accessories.
- Grommet opening dimension — 1.375"H x 2.700"W.

Wireway Grommet (page 62)

- Fits into any receptacle opening.
- Used when routing wires through receptacle opening.

Lighting

Task Lights

Undercabinet LED Light

Task Lights (page 130)

- Task lights can be recessed under storage cabinets or storage shelves, panel-hung, or freestanding.
- Three styles of recessed task lights in four sizes are available to correspond to cabinet or shelf width.
- All styles have 9' power cords in black, connected in the right rear corner.
- All models feature electronic ballast for longer bulb life and cooler operating temperature.
- Task lights with a fused plug to meet Chicago electrical code are also available.

Recommendation: Provide a separate circuit for task lights for proper long-term operation without RF interference to computers that may be in use.

Undercabinet LED Light (page 130)

- Undercabinet LED light can be mounted beneath overhead cabinets with wood screws or magnets.

Data

Base Pathway Cover

Voice/Data Receptacle

ATADF3

ATADF4

AMP Components

Terrace Base Pathway Covers (page 63)

- Features an additional knockout (offset) for improved utilization of power and data. Knockouts are 2.700"W x 1.377"H.
- Due to panel depth, back-to-back data modules should not be used at beltline or in the base on Terrace.

Data Faceplates (page 63)

- Fit into receptacle and data port openings in base raceway covers or into data port (UTP).
- Due to panel depth, data modules should not be used back-to-back at beltline or in the base on Terrace.

AMP® NETCONNECT® Components (page 63)

- AMP NETCONNECT® Components are supported by AMP's 25 year warranty, including reconfiguration.

Cord Organizer (page 63)

- Attaches to bottom of worksurface.
- 4"W x 7/8"D, made from sheet metal.
- Top sits flush with worksurface if mounted to worksurface.
- 4 cable cut outs: 2 – .250" diameter and 2 – 0.147" diameter; .250" diameter cut outs are centered between the .147" diameter cut outs.

Base Pathway Receptacle Locations

Circuit Usage

Strategy 1

Circuits to Equipment

Assign specific uses for each of the circuits:

- For example, in a four-circuit system:
 Circuit 1 — Calculators, fans, etc.
 Circuit 2 — Task lights (could be wired to wall switch)
 Circuit 3 — CRT or flat screen monitors
 Circuit 4 — CPUs

Strategy 2

Circuits to Workstations

Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

Placement of pedestals and lateral files may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

Lay-in Cable Capacity

- The top and base pathway allow continuous voice and data lines to run through and between panels without interruption.
- Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.
- Terrace top pathway accepts up to 7 voice/data cables (.25" dia).
- Terrace variable height junctions accept up to 3 voice/data cables (.25" dia.).
- Terrace base pathway accepts up to 56 voice/data cables (.25" dia.) (6.03 sq. in.) at 60% fill.
- When electrical system shares base pathway, the cable capacity in Terrace is reduced to 18 cables (2.25 sq. in.). Cable quantities listed are at 60% fill ratio.
- Cable capacity of the Terrace power pole, in addition to electrical in-feed is 2.79 sq. in. on one side and 2.91 sq. in. on the other for a total capacity of 66 cables of .25" diameter.

Underside of Base Pathway
Juncture Between Frames

Terrace String-in Capacity

- **Openings in frame sides** permit data and communication cables to be run between frames in Terrace.
- Using tackable acoustical tiles, the beltline pathway accommodates up to 62 cables (.25" dia) or 46 cables with electrical components installed.

DO NOT run electrical equipment or extension cords through cable openings in frame sides. Use beltline or base-mounted electrical system for all electrical supply.

- **Cables can enter/exit panel** through underside of base pathway at juncture between frames.
- Openings are sized as follows (in sq. in.):

Terrace System	Sq. In.
Straight connection	6.0
"S" Extended Straight Connection	10.0
"L" 90° Connection	8.9
"T" Connection	15.9
"X" Connection	17.9
"A" Connection	—
"Y" Connection	—

- When leveling glides are fully retracted, panel-to-floor clearance is $\frac{7}{16}$ ". This may affect the volume of cabling that can be fed into the frame from the bottom of the pathway.

Vertical Capacity

Vertical Capacity Through Panel Frames

	Panel Width	Qty. of .25" Cables at 45% Fill Ratio	Qty. of .25" Cables at 60% Fill Ratio	Total Space (sq. in.)
Terrace	24" – 60" W	45	60	5.26

- A 60% fill ratio is achievable; however, when electrical components are installed in the beltline area, cabling capacity through the beltline area will be limited to approximately 45% fill ratio.

Worksurfaces

Terrace® — Working with Worksurfaces and Supports

GSA SIN 711-1

Worksurfaces are 1¼" thick with particle board core and with top surfaces finished in high-pressure laminate. Bottom surfaces are covered with a backer sheet. Worksurfaces are available in laminate and Stratawood veneer. Veneer worksurfaces are by Gunlocke.

Worksurfaces

- Laminate worksurfaces are 1¼" thick with particle board core and with top surfaces finished in high-pressure laminate. Bottom surfaces are covered with a backer sheet.
- Flat and T-mold edge trim** is available on laminate tops in twenty standard colors (customer specified) to match solid or woodgrain laminates and to complement patterned laminates.
- Veneer worksurfaces have square veneer edge.

- Optional wider width primary worksurfaces** are available for use with Terrace panel runs having a "T" or "S" connection — upcharge applies.

Wire management grommets are standard in most worksurfaces (unless specified with scallops or no grommets) and are specified in plastic or metal.

- Metal grommets** are available in oval or square (shown below).

- Rectangular worksurfaces over 36" W have two grommets. Peninsula and corner worksurfaces have one. D-Shaped worksurfaces and countertops do not have grommets.
- Grommets on standard systems worksurfaces are located 2⅞" from side edges and 3⅞" from back edge.
- Add Suffix "S" for scallop wire management detail for flat edge rectangular models only — no upcharge.
- Add Suffix "N" to a model number for no grommets — no upcharge.

Supports

Worksurfaces can be configured at 29½"H with end-panel supports and in-line support panels, or at various heights on 1" increments using specific product configurations.

Worksurface support options include:

- Support column*
- Flat brackets
- External support channel
- Worksurface bracket kits
- Height adjustable mechanisms
- Cantilever brackets
- In-line support legs*
- End-panel supports*
- Support storage units*
- Pedestal-to-panel attachment kit*
- Desk-to-panel attachment kit*
- Corner desk leg*
- Bridge and return kits
- Modesty panels
- Gussets

*Units provide floor support.

Support Guidelines — See Drawings on page 65

- Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.
- When using overheads in panel mounted worksurface run applications 72" and greater, floor support* is required. (See list at left.)
- When using overheads at the end of a panel run, floor supports* are required.
- Worksurface bracket kit should be used to tie panels to worksurface for added stability.
- A return panel at the end of a panel run can be substituted with one of these floor supports: storage, open or closed end support panel, O-leg.

continued on next page

continued from previous page

- Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return panel or floor support.
- Worksurface runs greater than 60"W require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48"W. See pages 69 and 81.

- Support channel may interfere with mounting of some CPU holders and keyboard supports.
- Cantilevers are recommended in place of an external worksurface support channel where feasible.
- Cadence Desking configurations utilize modesty panels and gussets in place of external support channels for worksurfaces up to 72"W. See pages 71-79.

Worksurface bracket kit should be used to tie panels to worksurface for added stability

These floor supports can substitute a return panel at the end of a panel run: storage, open or closed end support panel, O-legs.

Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return or floor support.

Cantilevers are recommended in place of an external worksurface support channel where feasible.

Worksurface runs greater than 60"W require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48"W. See pages 69 and 81.

Worksurfaces

Terrace® — Working with Worksurfaces and Supports

GSA SIN 711-1

Worksurfaces - Laminate (L) w/Flat or T-Mold Edge and Veneer (V) w/Square Edge

Primary Worksurfaces (L page 80; V page 88)

- Primary worksurfaces are available in 24" and 30" depths.
- Nominal worksurface width is equal to nominal panel width.
- Wire management grommets standard, one for widths up to 36", two on widths 42" W and greater.
- Laminate flat edge worksurfaces can be specified with scallop wire management detail with no upcharge by adding suffix "S" to the model number.
- Center support bracket included on 54" W-60" W. Other support hardware is ordered separately.
- Worksurfaces greater than 60" W require a cantilever bracket for center support in panel mounted applications. Specify 18" cantilever on 18"D, and 24" cantilever on 24"D and 30"D worksurfaces.
- Primary worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working With Cadence, pages 71-79.

Wave Worksurfaces (L page 82; V page 90)

- Wire management grommets standard, one for widths up to 36", two on widths 42" W and greater.
- Worksurfaces greater than 60" W require a 24" cantilever bracket for center support in panel mounted applications.
- Wave worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working With Cadence, pages 71-79.

Bow-Front Worksurfaces (L page 81; V page 89)

- Two wire management grommets standard.
- Bow-front worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working With Cadence, pages 71-79.

Corner Worksurfaces (L page 83; V page 91)

- One wire management grommet.
- Corner worksurfaces with woodgrain laminate have grain direction diagonal to adjacent worksurfaces.
- Rear corner left-handed support bracket included. Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner.

Corner Cove Worksurfaces (L page 83; V page 91)

- Two wire management grommets standard.
- Rear corner support bracket included with all surfaces. Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner. All other support hardware is ordered separately.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Cadence pages 71-79.
- Worksurfaces greater than 60" W require a cantilever bracket for center support in panel mounted applications. Specify 24" cantilever on 24"D and 30"D worksurfaces.

Worksurfaces - Laminate(L) w/Flat or T-Mold Edge and Veneer(V) w/Square Edge

Peninsula, P-Shaped, and Jetty Worksurfaces (L page 84; V page 92)

- Wire management grommets standard.
- Support column must be ordered separately.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Cadence pages 71-79.

Boomerang Worksurface (L page 84; V page 92)

- Wire management grommet standard.
- Support column ordered separately.

Reef Worksurface (L page 85; V page 93)

- Wire management grommets standard.
- Includes panel support brackets (T6BK).
- Order support column separately.

D-Shaped Worksurfaces (L page 85; V page 93)

- Order support column and two 24" D in-line support legs separately.
- Not recommended for use with T6CB24L or T6CB24R for shared applications.
- Includes attachment bracket.

Quarter-Round Worksurfaces (L page 85; V page 93)

- Use to connect two 90° panel-attached worksurfaces.
- Order support column and two flat brackets separately.

120° Corner Worksurfaces (L page 85, V page 93)

- Standard with one wire management grommet in corner location.
- Rear support bracket included (left-handed). Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right hand corner.

60° Pie Worksurface (L page 85; V page 93)

- Order support column and two flat brackets separately.

Non-Standard Worksurface Sizes (L, V pages 95 and 96)

- The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in 1/8" increments up to a maximum of 120"W x 36"D.
- Other modification requests should be made through Allsteel Tailored Products Group.

Dual-surface Worksurfaces (L page 82)

- Rectangular and corner dual-worksurfaces provide maximum worksurface adjustability for seated individuals of all heights.
- Can be mounted to panel at any basic product height.
- Keyboard platforms travel from -6" to +6" relative to main worksurface with lift-to-adjust, spring-assisted release. Keyboard platform articulates from +9° to -15° tilt.
- For freestanding applications, see height-adjustable tables pages 190-197 in the Seating, Collaboration, and Tables Price List.

Worksurfaces

Terrace® — Working with Worksurfaces and Supports

GSA SIN 711-1

Countertops - Laminate (L) w/Flat and Veneer (V) w/Square

Countertops

- Countertops are available in straight, corner, and 120° configurations.
- Choose between raised countertops which require raised countertop kit (ordered separately) or flush countertops which include brackets, top trim, and mounting hardware.

Raised Countertops (L page 86; V page 94)

- Countertops are raised 5" above panel top cap.
- Order raised countertop kits separately.
- Add appropriate suffix to end of model number for in-line variable height applications.
- Countertop kit can extend up to 6" beyond end of kit.

Raised Countertop Kits (L page 86; V page 94)

- Includes top cap and attachment hardware.

Flush Countertops (L page 87; V page 89)

- Mounting brackets, top trim, and attaching hardware included.
- Flush countertops come with a painted top cap — specify color.
- Countertops are flush with the ends of panel top cap.

Worksurface Supports

End Supports and Bracket Kits (page 97)

- End-panels are 1½" thick. For use in place of panels at the end of worksurface runs.
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel hung applications.
- Straight worksurfaces adjacent to 120° connections must be supported by full end-panels.
- 11"D end-panel models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.
- Panel mounted end-panel supports are ordered for right- or left-handed application.
- Closed end and open end panel supports are non-handed and are only for panel mounted applications.
- End-panel models can be converted to freestanding with removal of panel mount bracket.
- End-panel bracket kit converts freestanding end-panel support model to panel mounted.

Support Legs and Bracket Kit (page 97)

- Support legs are 1½" thick. Supports the junction of two worksurfaces.
- Non-handed for use at either end of worksurface. Leg portion is 12¼"D.
- Provided with flat bracket.
- Worksurface in-line support legs are used to support worksurfaces only in a shared position.
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel hung applications.
- Closed full length models can be converted to freestanding with removal of panel mount bracket.
- Open in-line support legs are only for panel mounted applications.
- Support Leg Bracket Kit (non-handed) converts closed full length freestanding model to panel mounted.

Support Columns (page 97)

- Used to support one end of curvilinear worksurfaces.
- Includes column, worksurface bracket kit T6BK, attaching hardware, and adjustable glides.
- D-shaped, P-shaped, peninsula, jetty, boomerang, and reef worksurfaces require support columns (ordered separately).

Worksurface Supports

**Handed
Cantilever Brackets**

**Non-Handed
Cantilever Brackets**

Worksurface Brackets

Flat Brackets

**Pedestal-to-Panel
Brackets**

**External Worksurface
Support Channel**

Cantilever Brackets

- Use with runs less than 96". Floor support is required for runs 96" and longer.
- Where applicable, cantilevers are recommended over an external worksurface support channel. Worksurface runs over 60"W require an external worksurface support channel when a cantilever cannot be used.
- Do not use at the end of a worksurface where no 90° return panel is positioned.
- Includes tie bracket and attachment hardware.
- Avoid installation on only one side of a straight connection except to support corner worksurfaces.
- DO NOT use to support worksurfaces from which a hanging pedestal is suspended, or to which a peninsula worksurface is attached.
- DO NOT use cantilever brackets to support worksurfaces supported with permanent-wall hanger kit.
- Do not use with wall track or to support a worksurface to which a return worksurface is attached.

Cantilever Bracket — Handed (page 142)

- Cantilever brackets are handed (left or right) and can be inserted into panel reveals in 1" vertical increments. No assembly required.
- Left- and right-hand brackets required in shared applications.
- 24"D cantilevers are required to be used for both 24"D or 30"D worksurfaces.
- 18"D cantilevers are required to be used for 20"D worksurfaces or center support for 24"D.
- 12"D cantilevers are required to be used for 12"D worksurfaces.

Cantilever Bracket — Non-Handed (page 142)

- Cantilever brackets are non-handed and can be inserted into panel reveals in 1" vertical increments. Assembly required.
- One bracket in shared applications — includes two angled brackets.
- Bracket accommodates 24"D or 30"D worksurfaces.

Worksurface Bracket Kit — T6BK (page 97)

- Worksurface bracket kit allows one end of a worksurface to be supported by a return panel. Return panel width must be the same as the depth of the worksurface.
- Brackets — one pair. Attachment hardware included.

Worksurface Bracket — T6SB (page 97)

- Worksurface storage bracket kit (T6SB) is used for aesthetics where under-desk storage is immediately adjacent to the return panel. In all other applications use worksurface bracket kit (T6BK) to utilize worksurface threaded metal inserts. Black only.
- Brackets do not align with worksurface threaded metal inserts, and therefore require wood screws (included).

Flat Brackets (page 97)

- Bracket and attaching hardware.
- Can be used to connect one worksurface perpendicular to another worksurface.

Pedestal-to-Panel Attachment Bracket (page 97)

- Can be used in place of full end panel or return panel.
- Provides structural support to panel run by securing panel directly to pedestal.
- Attachment hardware included.

External Worksurface Support Channel (page 81)

- Is required on a systems worksurface for additional support for spans greater than 60"W. Width of worksurface span can be reduced by using support storage.
- Extends 1½" below the worksurface.
- When using 28"H mobile pedestals the length of support channel needs to be reduced to accommodate width of the pedestal.
- Support channel may interfere with mounting of some CPU holders and keyboard supports.

Worksurfaces

Terrace® — Overview of Flat Edge and Veneer Worksurfaces

GSA SIN 711-1

Laminate with Flat or Veneer Worksurfaces

Overview of T-Mold Edge Worksurfaces

Laminate with T-Mold Edge Worksurfaces

Note: Add suffix "N" to model number for no grommets, no upcharge.
Add suffix "S" to model number to specify scallop wire management, no upcharge.

Cadence offers unlimited versatility. Its modular flexibility creates office solutions of all shapes, sizes, and styles.

And, it can deliver in 10 days.

Configurations

Full Modesty

Half Modesty

Gussets

All the right choices

Choose Cadence freestanding desking with confidence. It personalizes any work environment, accommodates a range of needs, and offers all the right features — curvilinear worksurface shapes, multiple worksurface edges, and a complete paint finish and laminate offering. Cadence is made to last with heavy-gauge steel construction. Metal-to-metal worksurface connection points make installation and reconfiguration reliable and easy. And Cadence is backed by a lifetime warranty.

Universally flexible

Cadence sets up easily and reconfigures time after time. It even shares components with Terrace, Optimize™, and Concensys®, which simplifies inventory management. Cadence is created with worksurfaces, supports, modesty panels, end panels, and brackets. Cadence is compatible with the entire line of Allsteel metal storage solutions and Extensions™ — work tools to provide personalized organization for every workstyle.

Systems integration — Cadence works in combination with Terrace, Optimize, or Concensys panels, extending the functionality of both product lines.

Highly adaptable — Make the most of building architecture by using an existing wall to create a semi-private workspace.

Space utilization — Multiple worksurface shapes offer unlimited design potential for using space creatively and efficiently.

Team interaction — Cadence design flexibility allows you to create personal workspace and a team collaboration area in the same office.

Express

Cadence is an Express Solutions™ product line. At your request, your order will deliver in ten days or less. We make sure that your order arrives complete and on time.

The Cadence Choice

It works in the open plan, the private office, or in combination with Terrace, Optimize, or Concensys panels, allowing complete office coordination. The flexible, universal design of Cadence supports virtually any workstyle and any interior aesthetic. Backed by Allsteel's Lifetime Warranty and manufactured to strict environmental standards, Cadence provides one high-value package.

Cadence® Freestanding

Terrace® — Working with Cadence

GSA Reference Page

Configurations

End Panels **E** and Support Legs **L**

Each are available in two options: freestanding or panel-mount. The only difference between the two options are the panel-mount models come with a left- or right-handed bracket to attach the support to a panel in a Cadence systems application. If the freestanding version is purchased and later needs to be converted to panel-mount, the proper handed panel-mount bracket may be purchased separately.

The 11"D end panel is used to freestand peninsulas, curvilinear shapes, and D-Tops in panel applications.

Corner Desk Legs **C**

Corner desk legs have a 90-degree bend and welded construction. The strong construction allows gussets or half-height modesty panels to be used with corner legs.

Bridge Kits **B**

Bridge kits include: two flat brackets, two modesty panel-to-end panel attachment brackets, and two tie straps. This kit is used when attaching a bridge unit between two rectangular worksurfaces.

There are some bridge instances where only half of a bridge kit is needed (e.g. using a bridge between a rectangular worksurface and a corner or peninsula). A return kit may be ordered for these instances.

Surface **S**

Support Column **SC**

Used to support one end of curvilinear worksurfaces. Includes column, worksurface bracket kit T6BK, attaching hardware, and adjustable glides.

Return Kits **R**

Return kits include: one flat bracket, one modesty panel-to-end panel attachment bracket, and one tie strap. These are used when attaching a return to a primary desk. Return kits can also be used in some bridge applications — one example is shown below when using a peninsula.

Desk-to-Panel Attachment Kits **D**

Desk-to-panel attachment kits are used to connect a worksurface and modesty panel perpendicular to a panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg or corner leg mounted directly under this worksurface.

When using a corner or corner cove worksurface with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk — use corner w/desk attachment kit. “Hand” of unit is determined from the user’s side of the desk (right hand unit attaches to right side of modesty).

Corner w/Desk Panel Attachment Kit **CW**

Corner w/desk panel attachment kit connects the rear corner of a corner or corner cove worksurface and modesty panel to a panel when the opposing end of the worksurface shares a support leg with an adjacent freestanding desk and the support leg is mounted under the freestanding desk. "Hand" of unit is determined from the user's side of the desk (left hand unit attaches to left side of modesty).

Corner Worksurfaces

Corner worksurfaces to accommodate 90-degree corner desk legs.

In-Line Connections of Desks

Freestanding full end panels must be used to support adjacent rectangular desks, corner desks, and corner desks with returns. Freestanding support legs should NOT be used at the in-line junction. 24"D full end panels may be used at the in-line junction on 30"D rectangular desks if two worksurface tie straps are used to secure the desks together. Contact Allsteel Customer Support for ordering information.

Pedestals and Storage

Pedestals must be ordered one size smaller than the depth of the worksurface. For example, 20"D peds should be used with 24"D worksurfaces. 20"D or 23"D pedestals can be used with 30"D worksurfaces. Using 18"D laterals or personal files provide additional pull style and storage options under 24"D worksurfaces.

Modesty Panels **M**

The following are some general guidelines for Cadence modesty panels:

- **Desk:** Modesty panel width is the same width as the worksurface
- **Return:** Modesty panel width is 6" greater than the width of the worksurface
- **Bridge connecting two rectangular worksurfaces:** Modesty panel width is 12" greater than the width of the bridge worksurface
- **Bridge connecting a rectangular worksurface and corner or peninsula:** Modesty panel width is 6" greater than the width of the worksurface
- **Corner connecting to an adjacent worksurface:** Modesty panel width is the same width as the worksurface.

Stand-Alone Corner Modesty Panels **SM**

Stand-alone corner modesty panels are used only when one or both sides of a corner or corner cove worksurface are freestanding and NOT attached to another worksurface. Specify the width the same as the width of the worksurface.

Gussets **G**

Gussets can be used in place of a modesty panel with desks 36"W to 60"W. Gussets can also be used with corner desk legs.

Cadence Supports

End-Panel Supports

End-Panel Supports (page 98)

- End panels are 1½" thick. For use at the end of worksurface runs.
- Levelers provide 1½" vertical adjustment.
- Freestanding models can be converted to Terrace panel-mount with end panel bracket kit.
- Must be connected into panel slots for panel hung applications.
- Straight worksurfaces adjacent to 120° and 135° connections must be supported by full end panels.
- 11"D models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.

Support Leg

Support Legs (page 98)

- Support legs are non-handed. Supports the junction of two worksurfaces.
- Leg portion is 12¼"D and is 1½" thick.
- Flat bracket included.
- Levelers provide 2¾" vertical adjustment.
- Freestanding models can be converted to Terrace panel-mount with support leg bracket (non-handed).
- Must be connected into panel slots for panel hung applications.

Corner Desk Leg

Corner Desk Leg (page 98)

- Attaches two modesty panels at rear of corner desk.
- Leveler provides 2¾" vertical adjustment.
- See examples on pages 76 and 77.

Bridge Kit

Bridge Kit (page 98)

- Connects bridge worksurface and modesty panel to end panels and worksurfaces that are perpendicular to the bridge worksurface.
- Includes two flat brackets and two modesty panel-to-end-panel brackets.
- See examples on pages 72 and 75.

Return Kit

Return Kit (page 98)

- Connects return worksurface and modesty panel to end panel and perpendicular worksurface — non-handed.
- Includes one flat brackets and one modesty panel-to-end-panel bracket.
- See examples on pages 72 and 74.

Desk-to-Panel Attachment Kit

Desk-to-Panel Attachment Kits for Terrace (page 98)

- Used to connect a worksurface and modesty panel perpendicularly to a Terrace Panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg or corner leg mounted directly under this worksurface.
- If using corner or corner cove with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk — use corner w/desk panel attachment kit.
- “Hand” of unit is determined from the user’s side of the desk (left hand unit attaches to left side of modesty).

Corner w/Desk Attachment Kit

Corner w/Desk Panel Attachment Kit for Terrace (page 98)

- Used when the rear corner of a corner or corner cove worksurface and modesty panel is attached to a Terrace panel and opposing end of worksurface is attached to a freestanding desk. Opposing end of worksurface shares the support leg that is mounted under the adjacent freestanding desk.
- “Hand” of unit is determined from the user’s side of the desk.

Flat Bracket

Flat Brackets (page 98)

- Bracket and attaching hardware.
- Can be used to connect one worksurface perpendicular to another worksurface.

Wall Track, Tile attachment Kits, Modesty Panels, and Gussets

Freestanding Pedestals

- Can also be used to support one end of a panel-attached worksurface in conjunction with worksurface bracket.

Freestanding Desks

- Freestanding desks can be created by combining primary and corner worksurfaces with modesty panels and appropriate desk supports. See pages 71-77.

Pedestal Compatibility with Cadence and Panel-hung Worksurfaces

Cadence Desking	24" Deep	30" Deep
19 $\frac{1}{8}$ " D Ped	Yes*	Yes
23 $\frac{3}{8}$ " D Ped		Yes
29 $\frac{1}{8}$ " D Ped		
Systems Panel-hung	24" Deep	30" Deep
19 $\frac{1}{8}$ " D Ped	Yes*	Yes
23 $\frac{3}{8}$ " D Ped	Yes*	Yes
29 $\frac{1}{8}$ " D Ped		Yes*

*Wire management grommet is blocked in these applications.

Note: Pedestal placement may affect access to receptacles in base pathway.

PMP53			•			•	•

Terrace Wall Track/Tile Attachment Kits (page 98)

- Allows for mounting of system panel components on permanent wall structures.
- Begin with one pair of ends; for multiple kits in line, add middle unit(s) between ends.
- Height of wall track coordinates with panel height. Field cut for lower heights.
- Wall track will add 1" to depth of attached components.
- Use Align™/Terrace wall track tile attachment kit to install tiles onto wall track. Kit includes two tile bars. Top bar may only be used in the top uppermost position on wall track. Bottom bar can be used in the bottom position at any location on wall track.
- When segmenting tiles on wall track, segment bars must be ordered for placement between all vertically adjacent tiles or at the top position of a single tile that is not in the uppermost position.
- When using Terrace wall track and using tiles to create a tackboard situation under overheads hung at 65"H, make sure to use a 30"H tile or 2-15"H tiles to cover the entire area between the overheads and the worksurface.

Modesty Panel (page 99)

- Mounts to end-panel supports, desk support legs, bridge kit, return kit, desk-to-panel, and corner w/desk panel attachment kits.
- 29 $\frac{1}{2}$ " H units provide $\frac{3}{4}$ " of space between bottom of modesty panel and floor.
- Actual width of 29 $\frac{1}{2}$ " H modesty panel is $\frac{3}{4}$ " less than the nominal dimension listed in the Systems Price List.
- 14"H units provide $14\frac{1}{4}$ " of space between bottom of modesty panel and floor.
- Refer to pages 335-341 to select proper width.
- Use 14"H modesty panels for desks positioned against a wall to provide access to electrical receptacles.
- 14"H modesty panels, stand-alone corner modesty panels, or gussets can be used with corner or corner cove worksurfaces.

Stand-alone Corner Modesty Panel (page 99)

- 29 $\frac{1}{2}$ " H units provide $\frac{3}{4}$ " of spacing between bottom of panel and floor.
- 14"H units provide $14\frac{1}{4}$ " of space between bottom of modesty panel and floor.
- Actual width of modesty panel is $6\frac{1}{16}$ " less than the nominal dimension listed in the Systems Price List.
- Modesty panels are inset 2 $\frac{7}{8}$ "; when adding pedestals consult chart at left.

Pedestal-to-Pedestal Modesty Panels (page 99)

- Widths available to work with 60"W, 66"W, and 72"W worksurfaces to create freestanding double pedestal desk using two medal support pedestals.

Gussets (page 99)

- Provides easy access to wall outlets.
- Cannot be used with suspended pedestals.
- Gussets can be used on corner and corner cove worksurfaces.

Universal Modesty Panel (page 99)

- Mounts under peninsula, P-Shape, jetty, and boomerang worksurfaces. Refer to chart below to select proper width.
- Can be used with panel-mounted and freestanding worksurfaces.
- Provides 8 $\frac{1}{2}$ " of privacy and is non-handed.
- Constructed of steel. No upcharge for Select paint.
- Only requires attachment to the worksurface.
- Does not provide electrical, data or structural support.
- Panel is 1 $\frac{1}{2}$ " thick and can be mounted at various distances from edge of worksurface based on user's preference for clearance and conferencing requirements.

ORDERING

The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in $\frac{1}{8}$ " increments up to a maximum of 120" W x 36" D.

Specify:

1. **Model Number** (see page 96)
Specify closest nominal width/depth model (round up).
2. **Grommet Option** (if desired)
See grommet specification instructions on this page.
3. **Grommet Type:**
P Plastic
M Metal (add \$11 per grommet for laminate)
4. **Grommet Color:**
(Metal only)
EL Matte Silver
Note: Plastic grommet will match flat edge.
5. **Laminate and Veneer Choices**
See inside front cover.
6. **Flat Edge Color Choices**
See edge colors inside front cover for laminates.
7. **Exact Size**
Specify the **exact width** and **exact depth** you require.
Width and depth is specified in $\frac{1}{8}$ " increments which is denoted as a single digit following the whole number dimension at the end of the model number string.

$\frac{1}{8}$ " = 1	$\frac{5}{8}$ " = 5
$\frac{2}{8}$ " = 2	$\frac{6}{8}$ " = 6
$\frac{3}{8}$ " = 3	$\frac{7}{8}$ " = 7
$\frac{4}{8}$ " = 4	no extra increment = 0

For example, when ordering a worksurface that is $34\frac{5}{8}$ " W x $20\frac{1}{2}$ " D, specification should be 345Wx204D.
Example: 9120R3624.G0.TM33.EU.345Wx204D.

PRODUCT SPECIFICATIONS

- Flat edge on all sides
- 45 lb. particle board
- $\frac{1}{4}$ " top thickness
- .020 resin impregnated paper backer sheet
- Grommets available
- Maximum width 120" (maximum recommended unsupported span is 42")
- Maximum depth 36"
- Standard Allsteel laminates and veneers
- Quantities of 10 or greater are palletized; less than 10 are individually cartoned.

Note: 9120 worksurface maximum unsupported span is 42".
9120 worksurfaces do not have pre-drilled pilot holes or threaded metal inserts.

When spanning multiple freestanding storage units with one worksurface, add $\frac{1}{8}$ " for each additional storage unit. For example, when ordering a worksurface for three 30"W lateral files. 3 units x 30" = 90" + $\frac{1}{8}$ " + $\frac{1}{8}$ " = $90\frac{1}{4}$ " worksurface. Do NOT follow this rule if panel wrapping storage units.

CHANGES / CANCELLATIONS

No changes/cancellations for 9120 Program worksurfaces.

GROMMET SPECIFICATIONS

Plastic grommets are made of durable ABS plastic and grommets match edge color on laminate worksurfaces. Metal grommets are only available Matte Silver oval for laminate and square for veneer.

PRICING

See page 360 for laminate and veneer 9120 worksurface pricing.

One Grommet — GC, GL, or GR Position..... \$16.00

Two Grommets — G3 or G4 Position..... \$32.00

Note: Add \$10 per grommet for metal grommets with laminate.

ORDERING

Specify grommet location and color.

Example: 9120R10836.GCP.TM33.EU.1022Wx326D

Code Grommet Position

- GC Centered side-to-side — $3\frac{1}{8}$ " from rear to grommet edge; $4\frac{1}{2}$ " from rear to grommet center
- GL 3" from left side — $3\frac{1}{8}$ " from rear to grommet edge; $4\frac{1}{2}$ " from rear to grommet center
- GR 3" from right side — $3\frac{1}{8}$ " from rear to grommet edge; $4\frac{1}{2}$ " from rear to grommet center
- G3 Pair of grommets each 18" from side edge — $3\frac{1}{8}$ " from rear to grommet edge; $4\frac{1}{2}$ " from rear to grommet center (Position G3 not available on tops 60"W or less.)
- G4 Pair of grommets each $3\frac{1}{8}$ " from side edge — $3\frac{1}{8}$ " from rear to grommet edge; $4\frac{1}{2}$ " from rear to grommet center
- G0 No grommets

Dimensions are from grommet center line to top edge.

Rectangular Top

Grommet positions other than those shown above are considered non-standard.

Terrace® — Working With Overhead Storage

GSA Reference Page

Product dimensions	
Overhead Storage Cabinet	
Width	24", 30", 36", 42", 48", 60"
Inside width	Flipper or 24"-36"W Hinged door — $\frac{1}{8}$ " less than width 42"-48"W Hinged or Sliding door — two compartments that are half of $\frac{1}{8}$ " less than width
Depth	14 $\frac{1}{4}$ " RTA models 12"
Inside depth	12 $\frac{7}{8}$ " Receding door 12 $\frac{1}{2}$ " RTA models 11 $\frac{5}{8}$ "
Height	15"
Inside height	12 $\frac{3}{4}$ " Receding door 11 $\frac{5}{8}$ " RTA models 12 $\frac{3}{4}$ "
Open Shelf	
Width	24", 30", 36", 42", 48", 60"
Depth	12 $\frac{7}{8}$ " RTA models 11 $\frac{1}{2}$ "
Height	4 $\frac{5}{8}$ " RTA models 5 $\frac{5}{8}$ "

- **Task lights** can be mounted beneath storage shelves and overhead storage cabinets.
- Additional panel hung and freestanding lighting options are available.

- **Cord retainer clips** fasten into panel slots to anchor power cords.
- Available in black only.
- Clips are provided with under-shelf mounted task lights. Additional clips can be purchased separately.

Specification Guidelines

- In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side.
- Do not suspend more than one overhead storage unit per side from panels in a panel run which is mounted, at one or both ends, with an off-module connector kit.
- Overhead storage cabinets and open storage shelves can be mounted on Terrace structural and stacking panels to a maximum height of 80"H.
- When mounting an overhead on a 57½"H base panel frame, select the option for Z57 bracket.
- For all other base panel frame and base panel frames with stacking frames the YZ bracket should be selected.
- Base panel frames with stacking frames that have an overall height of 57½" also use the YZ bracket.

When overhead storage units are suspended from stacking frames, the following guidelines should be adhered to:

- Stacking frames should be added to all the parent run panels, and to, at least the first panel of each return-panel run. Stacking panels added to return panel must match the parent run configuration.
- A maximum of two overhead storage units should be suspended from each side of stacking frames on any given panel.
- With Terrace, a full height panel end cover is required for adequate stability when using overhead storage on the end of a run, or on a return panel.

- No limitation to the number of units on structural frames when run is supported with return panels on each side of storage shelves or overhead storage cabinets.

- **Storage shelf, receding door overhead, RTA overhead, and RTA shelf width** must correspond with width of panel(s).
- It is possible to span two panels when combined panel width equals cabinet or shelf width.

- **Terrace assembled metal overhead cabinets** can be mounted on a panel equal to or up to 18" narrower than cabinet. One side of overhead must be held on-module.

Horizontal Wall Track

Overhead Storage Cabinet (page 104)

- Steel cabinet with backstop.
- Available with sliding, hinged, or flipper door(s).
- Easy-Assist flipper door optional — requires minimal assistance in opening and closing. Not available on 60"W cabinets, specify 2–30"W cabinets with Easy-Assist.
- Self-engaging safety latch to secure cabinet to panel.
- Width can correspond with width of panel, or 2 panels joined without a connector.
- Arch or square pull optional on flipper and hinged doors.
- 60"W flipper door cabinet has 2–30"W doors with 2 independent locks.
- 24"-36"W hinged door cabinets have 1 lock and 2 optional pulls, 42"-48"W have 2 locks and 4 optional pulls.
- Accommodates recessed task lighting (specified separately).
- For locking specifications, see pages 134-136.
- Cabinets are 14¼"D x 15"H.
- 15"H cabinets can also be mounted on a panel equal to or up to 18" narrower than cabinet.
- Sliding doors have a built in pull.
- Sliding, hinged, and flipper door overhead weight limits:

24"W	59 lbs.	42"W	105 lbs.
30"W	74 lbs.	48"W	121 lbs.
36"W	90 lbs.	60"W	152 lbs.
- When mounting an overhead on a 57½"H base panel frame, select the option for Z57 bracket. For all other base panel frame and base panel frames with stacking frames the YZ bracket should be selected. Base panel frames with stacking frames that have an overall height of 57½"H also use the YZ bracket.

Open Shelf (page 104)

- Metal shelf with back stop.
- Locking clips (2) standard.
- Will accommodate recessed task lighting — ordered separately.
- Weight Limits:

24"W	61 lbs.	42"W	108 lbs.
30"W	77 lbs.	48"W	124 lbs.
36"W	93 lbs.	60"W	155 lbs.

Upmount Kits for Assembled Overhead Cabinets (page 104)

- Consists of two upmount brackets, full back panel and required installation hardware.
- Allows mounting of an assembled overhead cabinet up to 15" above height of panel.
- Specify "Z2" prefix model number upmount kits with 15"H, 30"H, 35"H, 50"H, or 65"H frames; and "Z4" prefix model numbers for use with 22½"H, 42½"H, or 57½"H frames.
- Brackets require a clearance of 6½" below bottom of overhead cabinet.
- Width must correspond with width of panel frame or 2 panel frames joined directly inline.
- Full back panel adds ½" to depth of overhead case. Full back panel only used when upmounting cabinet.
- Cannot be used with RTA models.

Horizontal Wall Track (page 104)

- Allows mounting overheads on permanent wall structures only.
- Cannot be used with RTA models.
- Track is 60"W and notched at 6" intervals as a guide for field cutting.
- For use with 15"H sliding door overhead, field modification is necessary.
- Available in Black only.
- Attachment hardware not included.

Receding Door Overhead

Receding Door Overhead Back

Stack-On Hutch

Tackboards for Hitches

Receding Door Overhead Storage Cabinet (page 105)

- Steel cabinet with open back. Optional back can be ordered separately.
- Arch or Square pull optional.
- 60"W cabinet has 2 30"W doors with 2 independent locks.
- Accommodates recessed task lighting — ordered separately.
- For locking specifications, see pages 134-136.
- Cabinets are 13 $\frac{1}{4}$ "D x 15"H. When door is recessed, interior dimensions are 12 $\frac{1}{8}$ "D x 11 $\frac{1}{8}$ "H.
- Weight Limits:

30"W	70 lbs.	48"W	110 lbs.
36"W	85 lbs.	60"W	138 lbs.
42"W	100 lbs.		

Receding Door Overhead Back (page 105)

- Optional for use with receding door overhead.
- Order width to match overhead cabinet.

Ready to Assemble (RTA) Flipper Door Overhead (page 105)

- Steel cabinet with open back.
- 60"W and 72"W cabinets have 2 doors with independent locks.
- Accommodates recessed task lighting — ordered separately.
- Random keying, for locking specifications see pages 134-136.
- Cabinets are 12"D x 15"H. Interior dimensions 11 $\frac{1}{8}$ "D x 12 $\frac{3}{4}$ "H.

Ready to Assemble (RTA) Shelf (page 105)

- Metal shelf with locking clips.
- Accommodates recessed task lighting — ordered separately.

Stack-on Hutch (page 106)

- Have flipper doors with square horizontal edges.
- Universal model can be converted to open hutch.
- Doors are standard with a core removable lock (60"W, 66"W and 72"W have two doors and two locks.)
- Attachment tape provided.
- Order hutch to match width of worksurface(s) it covers.
- Hutches have clearance of 19 $\frac{1}{4}$ " for computers, etc.
- Ship easy to assemble.
- Depth dimensions shown includes thickness of door.
- Universal model inside depth dimension is 12 $\frac{3}{4}$ "
- Stack-on hutches accommodate recessed task lighting.
- For locking specification see pages 134-136.
- Chicago task light cords cannot be routed through the Hutch end panels, due to the large size of the fused plugs.

Tackboards (page 106)

- Use tackboard to close the back of stack-on or hutch below storage unit.
- Due to width of fabric roll, 66"W and 72"W tackboards are available in railroad cut only.

Storage

Introduction

GSA Reference Page

Storage is an essential part of the productive workplace.

Make storage a matter of personal choice as well as necessity. Choose from features like multiple pull styles, custom drawer sizes, paint finishes, and more. It's your workspace. Shouldn't it look like it?

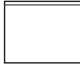

PERSONAL STORAGE

- 1. Pedestal.**
Freestanding, support, mobile, or suspended, with three drawer sizes.
- 2. Personal file.**
Combines pedestal and lateral storage to create a personal filing solution for letter and legal size documents.
- 3. Personal tower.**
Versatile storage with a small footprint. It's storage that goes up, not out. Combine drawers, personal storage, and wardrobe options for the right solution.
- 4. Low credenza.**
Active storage that creates a layered look in any workspace.

LATERALS AND SHARED STORAGE

- 5. Lateral file.**
The storage workhorse, in multiple heights and widths. Works with systems furniture or by itself.
- 6. Combination file.**
The perfect combination of file storage and shelf storage, with concealed or open shelves.
- 7. Storage cabinet.**
Equipped with hinged, locking doors and adjustable shelves to conceal and secure supplies.
- 8. Bookcases.**
Quick access to information, in depths to match laterals or narrower profiles to stand on their own.

Extensions — Introduction

Extensions accessory line by Allsteel is designed to help you create your own space.

• Create a unique space

Each person is unique, no one person works exactly like another, and different tasks require different tools. Extensions work tools allow each person the ability to create a unique environment that is all their own. Lots of paper to manage? Need active files within arm's reach? Want to maximize your workspace space? Need light somewhere other than below a cabinet? Whatever the task, we have the tools to accommodate your workstyle.

• Create a comfortable space

With a full line of organization, ergonomic, and illumination tools, Extensions allow you to create a comfortable, ergonomic work area. Organization tools keep important items visible and within your reach. Ergonomic tools help you stay comfortable while working. Illumination tools allow you to put your light where it suits you.

• Create an organized space

Tired of all the piles of paper building up on your workspace? Organization tools house your materials and keep them in an orderly fashion. With a combination of hanging or freestanding organizational accessories, Extensions let you manage everything from binders to paper clips.

• Organization tools

Work tools are a durable metal construction. Extensions allow you to manage your workspace smartly with tools like the phone caddy to elevate the phone off the worksurface, landscaped mail box trays to minimize worksurface intrusion, folder holders and tool box pen and pencil holders that hang off the slat rail and each other.

Increase your efficiency with organization!

• Ergonomic tools

Ergonomics is more than just comfort, it's flexibility and safety. The adjustable keyboard options allow users to maintain and vary comfortable wrist and arm positions throughout the day, whether typing or mousing. Monitor Arms offer versatile adjustability while providing optimum comfort for the eyes, neck, and shoulders.

• Illumination tools

Sleek and flexible, our lighting components offer you several choices. Recessed task lights conserve space and feature electronic ballast for longer bulb life and cooler operating temperature. LED tasklights' slim design blends in with its surrounding while utilizing energy-efficient LED technology. The Link light offers award-winning style to a highly versatile and energy efficient light.

Extensions™

Working with Organization Tools

GSA Reference Page

Allsteel's tool rail works in conjunction with a variety of accessories. Modular accessories free up worksurface space and provide orderly storage that is well within reach. Units can be arranged and rearranged to respond to changing workflow. The work tools that attach to the tool rail are:

- Mail Box
- Folder Holder
- Phone Caddy
- Binder Bin
- Tool Box
- Clip Caddy™
- Sidebar™ Personal Shelf
- Paper Wave™
- Gripper Clip
- Multi-Media Hangar

Additional accessories that work with the **tool rail work tools** aesthetically are:

- Bookends
- Freestanding Mail Box

Coat hooks, marker boards and center drawers round out the organization offering.

Tool rail, shown above, is height-adjustable in 1" increments using slots in panels or metal hutch. Tool rail shown with two tool boxes, two mail boxes, folder holder, and phone caddy. Folder holders, multi-media hangars, and binder bins extend below a tool rail. Paper Wave and contents extend above a tool rail.

Tool Rails and Work Tools (page 121)

- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.
- For use with Stride®, Terrace®, Concensys®, and Optimize™ systems.
- 5" high rail (widths coordinate with panels).
- Attachment via vertical reveals.
- Can be hung from wall track. Good solution for above copiers.
- Systems tool rail is off-modular — can be used on a panel of equal width or one size smaller.
- May span two panels of appropriate size, i.e., 60" W Tool Rail on two 30" W panels.

Tool Rail for Hutches (page 121)

- Will work on Universal, Terrace, Optimize, and Concensys system hutches produced after July 2, 2000 and Align™ metal hutches.
- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.

Mail Box (page 122)

- Holds standard letter-size paper and inter-office envelopes.
- Minimal horizontal intrusion.

Folder Holder (page 122)

- Holds manila envelopes.
- Is capable of hanging on other folder holders to maximize space.
- Stores vertically for easy access to files.

Phone Caddy (page 122)

- Holds telephone at optimum ergonomic angle.
- Wire management cut-outs.
- Accommodates standard phone sizes.

Binder Bin (page 122)

- Holds folders, binders, and manuals.

Tool Box (page 122)

- Holds pencils and other writing utensils, large post-it notes, and other desk top accessories.

Clip Caddy™ (page 122)

- Holds paper clips and other small objects.

Sidebar™ Personal Shelf (page 122)

- Holds office supplies and personal effects.

Paper Wave™ (page 122)

- Provides 3 fully divided slots for organizing files.
- Keeps papers from "bowing" at bottom.

**Gripper Clip** (page 122)

- Binds project papers together.
- Mounts to tool rail or tool tile.

**Multi-Media Hangar** (page 122) **D**

- Holds 9 CDs.

**Bookends** (page 122)

- Can be used on shelves or in cabinets.
- Used to hold books, binders, and catalogs upright.

**Freestanding Mail Box** (page 122)

- Incorporates similar aesthetic to mounted Mail Box.
- Mounting brackets allow for free access from front and back.
- Sold in pairs of two; will stack up to eight high.
- Individual mail box dimension = 1¼"H.
- Stacking brackets are black.

**Coat Hook APMC6** (page 122)

- Hangs directly into slotted Stride®, Terrace®, Optimize™, or Concensys® panel frame.
- Use for coat or bag.
- Package of six.
- Available in black only.

**Technology Modules** (page 123)

- Can be mounted by clamping to worksurface or mounting flush to the worksurface top.
- Must be installed at time of initial worksurface installation if mounting between a worksurface and panel.
- The USB hub allows simultaneous powering of four USB-A devices. The USB hub is a charger only, no ability to connect to a PC. The charging capability is limited and may not charge all devices.
- Opening size needed to flush mount in worksurface.

**Byrne's Docking Station for iPod® and iPhone®** (page 123)

- The iDoc charges and syncs with patent pending Roc.in.Doc™ technology eliminating the need for charging adapters.
- The mount provides quick access to the iPod or iPhone display for easy user control.
- Contact Byrne to check for compatibility with the latest technology.

**Worksurface Power/Data Module** (page 123)

- Provides easy access to technology at primary worksurface.
- Mounts to edge of a worksurface and requires ⅜" gap. Consider whether ⅜" gap will work with layout.
- Must be mounted at time of initial worksurface installation if mounting between a worksurface and a panel. Maintaining ⅜" gap may not be possible with worksurfaces that are panel wrapped.

Model	Depth of Cut	Width of Cut
A87P2U1R	4"	8"
A87P2D1R D	4"	8"
A87P2U1D1R D	4"	9 1/2"

D Discontinued 12/31/2015

**Marker Board** (page 123)

- For use with dry marking pens.
- Hangs directly on Optimize™ or Concensys® panel frame.
- Brackets are installed for Concensys applications.
- Brackets must be field re-located for use with other systems.
- Porcelain-coated steel surface.
- White with silver trim.
- Width must correspond with width of panel.

**Metal Center Drawers** (page 123)

- All metal center drawers feature pencil trays with three compartments for storage.
- Center drawers will not fit in center of 24"D worksurfaces which are wider than 60" due to location of center support bracket.
- For locking specifications, see pages 134-136.
- Ball-bearing slide suspension.

**Laptop Drawer — U7WDA** (page 123)

- Drawer body made of sheet metal.
- Drawer front made of 3/4" particle board with high pressure laminate on both sides and fused laser edge banding.
- Core removable lock is located on right side drawer front
- 17 5/8"W x 18"D x 3 3/8"H Outside (interior 13"W x 16"D x 1 7/8"H)
- Minimum surface depth is 21" for surfaces not using an external stiffener; and 27" for surfaces using an external stiffener.
- Drawer extends 16"
- Maximum load: 45 lbs (functional BIFMA load)
- Drawer assembly and cover have cut out in back to allow for cables to exit drawer.
- Distance from floor to bottom of unit w/glides fully retracted is 24 3/4".
- Does not interfere with Further leg mounting plates so drawer can be placed directly next to either a system or table leg.
- When being placed next tower storage using the tower ell bracket (Z6LB) to support surface the drawer must be inset 3" to clear the ell bracket.
- Can be placed directly next to any support storage from any Allsteel product line (excluding towers).
- Flat brackets — drawer must be offset 3" from seam between surfaces to clear the bracket. See illustration at left.
- Can be used with rabbet edge worksurface models but there will be a larger reveal between surface and drawer.
- Can be used with knife edge worksurface models but reveal and depth need to be considered.

AKM5 Keyboard Support w/Switch-n-Click Mousepad (page 128)

- Convenient lift and lock mechanism provides 8 $\frac{3}{8}$ " of height adjustment and offers more precise placement accommodated with visual dial-a-tilt height and tilt gauge.
- +10°/-15° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Slim, low-profile design.
- Pairs with a convertible keyboard platform that can be positioned in-line, over, or forward of keyboard platform — without the need for tools.
- Includes detachable leatherette-covered gel palm rest, nonslip pad, mouse pad, mouse guard, and cord management clips.
- Phenolic material on keyboard platform can be cleaned and sanitized to maintain a bacteria-free environment; articulating arm made of cold-rolled steel is recyclable.
- Recommended for straight-edge worksurfaces.

AKM3 Keyboard Support w/Switch-n-Click Mousepad (page 128)

- Features intuitive lift and lock height and tilt mechanism. Provides 7" of height adjustment.
- Slim, low-profile design that can be positioned flush with the worksurface for an extended workspace.
- +15°/-15° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Pairs with a convertible keyboard platform that can be positioned in-line, over, or forward of keyboard platform — without the need for tools.
- Includes detachable leatherette-covered gel palm rest, nonslip pad, mouse pad, mouse guard, and cord management clips.
- Phenolic material on keyboard platform can be cleaned and sanitized to maintain a bacteria-free environment; articulating arm made of cold-rolled steel is recyclable.
- Recommended for straight-edge worksurfaces.

AKMX Cobra™ Keyboard Support w/Mousepad (page 128)

- Lift and lock intuitive height adjustment.
- Positive and negative tilt for the best ergonomic positioning.
- +10°/-20° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Non-handed mouse tray can be moved from right hand to left hand side.
- Surpasses ANSI/BIFMA standards.
- Black powder-coat finish.

AKM1 Keyboard Support w/Mousepad (page 128)

- Simple, spring-assisted mechanism provides 6 $\frac{1}{4}$ " of height adjustment.
- Features soft-touch knob for simultaneous height and tilt adjustments.
- +10°/-15° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Accommodates keyboard and mouse on the same level
- Includes detachable leatherette-covered gel palm rest, nonslip pad, mouse pad, mouse guard, and cord management clips.
- Keyboard platform made of 90% post-consumer recycled materials and completely recyclable. Free of formaldehydes and carcinogens and emits no VOCs.

CPU Hammock™ (page 128)

- Features 360° swivel with 13 $\frac{1}{2}$ " ball bearing glide track.
- Load capacity 55 lbs.
- Fits CPUs 5" to 20" in overall height and 3" to 6" in width.
- Height adjustable from 16" to 23" below worksurface.
- No tools required to make adjustments.
- Features a textured, silver paint finish.

Metal Corner Sleeves (page 128)

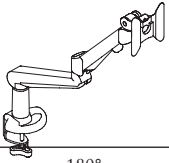

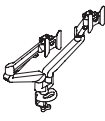

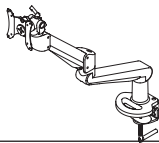

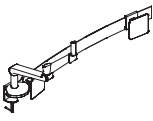

- 22 $\frac{1}{2}$ " W leading edge x 18" D.
- Corner sleeves connect intersecting worksurfaces to create "corner desk" work areas.
- All corner sleeves have pre-drilled holes to allow attachment of articulating keyboard platforms.

Footrest FR100 (page 128)

- Footrests increase comfort and decrease fatigue by redistributing body weight for healthier positioning of the spine and legs.
- Ideal for users who cannot rest feet comfortably on the floor.
- Platform rests 3" from the floor.
- Platform slides back and forth on frame to allow ankle flexion and extension.
- Platform dimensions: 15 $\frac{3}{8}$ " W x 18 $\frac{1}{2}$ " D x 3" H.

*ZW810T is NOT approved for Tool Rail Models EASRxx or EAHSRxx that attach to system panel slots or hutches.

ZW8 Series Monitor Arms (page 129)

- Versatile adjustability with a refined design and effortless, pneumatic fingertip adjustment.
- Multiple points of adjustment, including 360° swivel at two points, 21" extension and 13" of height adjustment, and a 180° lockout feature.
- Monitor tilts +30°/-25°.
- Tension adjustment feature at two locations to accommodate monitor weight and desired tilt tension.
- Maximize use of worksurface with ability to retract to minimal footprint of 3½", making ZW8 ideal for shallow worksurfaces.
- Model includes grommet and worksurface mounting options.
- Integrated cable management.
- Desk clamp mounts to surfaces ⅞" to 2" thick; grommet mount requires hole diameter of ⅝" to 2" wide, and accommodates surfaces up to 2" thick.
- Single arm supports 6½ to 18 lbs.; dual arm offers perfect horizontal alignment, and each arm supports 6½ to 18 lbs.
- ZW8 for tool tile is compatible on Allsteel tool tiles and Stride bench rail includes one dynamic extension limb. Arm extension is 15" from tile/rail, height adjustment 12".
(Not approved for tool rail models EASRxx or EAHSRxx that attach to system panel vertical slots or hatches.)
- ZW810S and ZW820D will fit all depths of Stride double-sided benches. Interference with support beam on 54" bench, desk clamp will not install flush to edge of worksurface, but will allow power access door to close completely.
- Mounting location on Stride single-sided bench and screen-based bench may be impacted by location of connecting brackets and supports.
- VESA 75mm and VESA 100mm compatible.
- Quick release feature simplifies monitor installation and exchanges.

ZW8 Heavy Duty Series (page 129)

- ZW810H heavy duty arm supports 7.6 to 44 lbs. in total weight.
- ZW820DH supports weight capacity 12 to 38.5 lbs. combined (to accommodate 5.5 lbs. weight of crossbar).
- Single arm features 22¼" extension, dual arm extends 26¾".
- Height adjustment range of 9" to 23" (14" total).
- Features 360° rotation at 3 points.
- Integrated cable management.
- Tension adjustment feature at two locations to accommodate monitor weight and desired tilt tension.
- Quick release feature simplifies monitor installation and exchanges.
- Monitor rotates 180° and tilts +85°/-35°.
- Dual arm crossbar length of 41"; monitors can be positioned by sliding along crossbar to accommodate various sizes. Can accommodate up to two 24" diagonal monitors (total outside casing dimension of 38" wide).
- Cannot be installed on 54" Stride double-sided bench due to interference with support beam.
- Mounting location on Stride single-sided bench and screen-based bench may be impacted by location of connecting brackets and supports.

Laptop Tray (page 129)

- Adjustable laptop tray can be used on ZW810S and ZW820D.
- Features adjustable depth of 11¼" to 17¼" to accommodate docking stations along with laptop computer.
- Width 12".
- Designed with ventilation holes for adequate heat dissipation.
- Non-skid protective pads included to prevent laptop from sliding.
- Weight of laptop tray 7 lbs; include when calculating total weight of tray + laptop to comply with weight capacity.

Allsteel Extensions offers Illumination in four styles — Task Light, Undercabinet LED Light, Wand Light, and Link Light.

Task Light

Recessed task lights conserve space and provide an efficient solution for illuminating the workplace. All models are equipped with electronic ballast for longer bulb life and cooler operating temperature.

Recessed task light models mount under storage cabinets or shelves to provide optimal space utilization. Models are available in two styles and three sizes to correspond with the width of the cabinet or shelf. Task lights with a fused plug are available to meet Chicago electrical code.

Undercabinet LED Light

The Undercabinet LED Light is a low-profile, linear solution for overhead cabinets and shelves and is an ideal solution for painted wood storage. It utilizes energy-efficient LED technology which provides a long life. The Undercabinet LED Light provides the opportunity to mount the fixture where light is needed most.

The Undercabinet LED Light features a metal trough reflector with diffuser lens. The light has a sleek ½" thick profile and provides two options for mounting, either magnetically or with hardware. Undercabinet LED Lights can be daisy-chained.

Optional undercabinet occupancy sensor is available which will automatically turn off the fixture after 30 minutes of no detection and back on immediately as the user re-enters the detection range using Passive Infrared (PIR) sensor technology. Unit features 360° lens with 90° outward detection angle, providing a 36" coverage diameter at 18". Occupancy sensor comes with connector and is required to be connected in the sequence shown below. Connect occupancy sensor to a light, or first light in daisy chain to control all linked lights.

CONNECTION SEQUENCE*

*Cannot deviate from this sequence

Recessed Task Lights (page 132)

- Recessed task lights are black with a 9' long black cord that is attached to the right rear corner of the fixture. (Color does not need to be specified.)
- Bulbs are included.
- RECOMMENDATION: Provide a separate circuit for task lights to ensure proper, long-term operation.
- Includes 4 cord retainer clips.
- Shorter width models can be used on wider overheads, shelves and hutches.
- All models are equipped with electronic ballast for longer bulb life and cooler operating temperature.
- On/Off switch provides individual control of tasklight within the workstation.
- Daisy chain models require a master control model — 10 fixtures maximum.

Undercabinet LED Lights (page 133)

- Low profile energy-efficient LED task light for use with overhead storage cabinets and shelves.
- 20W power supply for 10W 17" unit (.166 amps).
- 20W power supply for 20W 31" unit (.166 amps).
- 60W power supply for daisy-chain starter units (.5 amps). Must order one starter unit for each daisy-chain application.
- Specify up to 5 additional 17" interconnect units (ALED17UJMP30) to daisy-chain together with 17" daisy-chain starter fixture (ALED17U60).

Example: Daisy-chain 4–17" undercabinet LED lights:

- Specify: 1 ALED17U60
- Specify: 3 ALED17UJMP30 with 10" jumper cord
- Specify up to 2 additional 31" interconnect units (ALED31UJMP30) with 10" jumper cords to daisy-chain together with 31" tasklight (ALED31U60); or 17" daisy-chain starter fixture (ALED17U60).
- 3500K color temperature.
- 131 footcandles at 18" on ALED31U; 76 footcandles at 18" on ALED17U.
- Magnetic or screw-mount option — attachment hardware included.
- On 20 watt models, power drive is attached to plug; allow 1½"D space at outlet.
- On 60 watt models, power drive brick is in center of cord and can be attached to underside of worksurface with velcro mount.
- Includes 3 cord retainer clips.
- Meets California Title 24 Energy Efficiency Standards.
- "Instant On" switch with infinite dimming cycle from 100% to 15% with the last state memory, allowing the user to set their desired level of lighting.
- Fixture automatically turns off after 10 hours of use to reduce unwanted energy use.
- Optional occupancy sensor automatically turns off all interlinked fixtures after 30 minutes of no detection and back on immediately when detection is found.

Link™ Light

Link's simple forms, slim profile, and expressive details make a surprising design statement in any workplace. The playful lamp head offers 180-degree movement for natural and precise adjustability. The concentrated array of high-power LEDs delivers a brighter light output than standard fluorescent lights, while operating cooler for consistent, long-lasting, and uniform-quality light. Plus, its efficient design elegantly conserves the amount of materials required, paring them down to their most essential. Engineered for effortless disassembly, Link is 97 percent recyclable.

Wand™ Task Light

Wand freestanding task light offers a clean, simple design along with powerful LED technology to illuminate the workspace. The swivel base and arm tilt allow users to position the light just where they need it. The 7.7 watt LED light offers efficiency and long life, providing up to 25 years of daily use. The slim, sleek design makes it easy to integrate into any workspace. Wand task light is 97% recyclable. Optional Occupancy Sensor available.

Link Light (page 133)

- Single- or dual-arm style.
- 3300K color temperature, 7.5 watts.
- Available in two soft-touch colors (Silver and Black).
- Mounting options include a freestanding base, worksurface edge clamp, or tool rail bracket. Each allows for unobstructed lamp rotation.
- Freestanding base is 9½" x 9½".
- Cord length: 9' with detachable power adapter.
- The lamp head forms the handle, offering 180-degree up/down movement.
- Low Profile worksurface clamp allows for minimal clearance conditions but must be installed before worksurface.
- Power is delivered through a conductive aluminum skin, eliminating internal wiring.
- L-shaped base sits in the corner, using minimal workspace.
- Meets California Title 24 Energy Efficiency Standards.
- Link Light is UL, CE, and RoHS compliant.
- Actual length of model LED18U is 19".
- Actual length of model LED36U is 37¼".

Wand LED Freestanding Task Light (page 133)

- Available in Silver or White. 9'4" cord is Silver.
- Full range dimming from 100% — 10% with last state memory.
- More efficient than original Wand light with brighter and broader range of light.
- Uses 7.7 watts at highest setting and as low as 1 watt at its lowest setting, providing 85 to 12 footcandles of light, respectively (16" above worksurface).
- 7½" round swivel base and 16½"H tilt arm allow versatile positioning of the 13" lampshade.
- Designed for 50,000 hours of life, providing up to 25 years of daily use. Warranty — 5 years (fixture); 3 years (power supply).
- Color Temperature: 3500K. Color Rendering Index (CRI): 80.
- Materials: aluminum arm and lampshade, steel base.
- Weight: 4.4 lbs. 97% recyclable, 76% post-consumer.
- Certifications: UL and CUL. TAA compliant.
- Occupancy sensor available with automatic shut-off after 6 minutes if no motion is detected.

Locking Specifications

GSA Reference Page

Laterals, Pedestals and Storage, Painted Wood Storage

Standard Options

- Random Keying — The factory will assign key(s) arbitrarily using key numbers from chart below.
- Omit Lock Core — The factory will omit lock cores. Removable lock core kits with specific key number must be ordered to facilitate keying alike in the field.

Vertical Files

Standard Options

- Random Keying — The factory will assign key(s) arbitrarily (see below chart for key numbers).

Key Alike Process

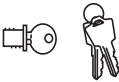

- Order standard product which will be shipped with factory installed locks and random numbered cores.
- Order the appropriate quantity of like numbered cores required for each workstation or keyed area.
- Simply replace the factory installed core with the replacement cores after product has been installed.

Replacing Lock Cores

- Lock must be in the unlocked position.
- Insert core removal key and pull core straight out. (Reach units require rotating key 90° clockwise past unlocked position.)
- Insert new core with core removable key, hold core into lock and withdraw core removal key.
- Retain original core for future use.
- On Persona™ Pedestals, open top drawer and hold lock bars in unlocked position before removal of core.

Locking Specifications — Easy Lock Program

SIN 711-1, 711-3

EASY LOCK PROGRAM

The Allsteel Easy Lock Program simplifies the lock-core ordering process when multiple cores are being specified. The Easy Lock cores can be used with Allsteel storage that currently uses the **ALKF23C** cores (all storage except Receding Door Overheads).

To ensure ease of ordering in different situations the Easy Lock cores can be specified in three different ways — Random, Specified or Sequential.

Random Keying

The Random Keying option is provided for instances where there are multiple orders or phases to a project and the offices need to be keyed alike but the key numbering is not required. With the random keying option key numbers are not specified, however, the core kits will be in sequential order from a random starting point.

Example: *There are 15 offices which each have 5 black locks that need to be keyed alike, but the actual key numbers are not important.*

This order would look like: **LKFE5BLK.X.15**

This specifies that 15 5-core kits are needed in black with random key numbers.

Specified Keying

The Specified Keying option is provided for the instances where there is a specific key number desired for all of the cores ordered.

Example: *There are 10 offices which each have 2 silver locks that need to be keyed-alike with key number 202.*

This order would look like: **LKFE2SLV.X202.10**

This specifies that 10 2-core kits are needed in silver with key number 202.

Sequential Keying

Allsteel Sequential Keying option is provided for the instances when there are multiple orders or phases to a project and it is imperative that key numbers are not duplicated.

Example: *A multiple phase project has 60 total offices — 40 offices in Phase I, and 20 offices in Phase II. The project manager has expressed a need to have keyed-alike offices but doesn't want any of the offices to use the same key numbers.*

The first 40 offices have 4 silver locks each that need to be keyed-alike.

This order would look like: **LKFE4SLV.SEQ/101.40**

This specifies that 40 4-core kits are needed in silver and the starting number is 101.

The second set of 20 offices only have 3 silver locks each that need to be keyed-alike; and it is important which key number starts off the sequence to ensure that no key number is duplicated. It is known that the first key range was key numbers 101-140.

The second order would look like: **LKFE3SLV.SEQ/141.20**

This specifies that 20 3-core kits are needed in silver and key sequence has to start at key number 141.

HOW TO ORDER:

Numbers 101-225 are available. Orders without key numbers specified will be keyed at random.

SAMPLE ORDER FOR EXAMPLES GIVEN:

Model	Key Type	Quantity
LKFE5BLK.	X.	15
LKFE2SLV.	X202.	10
LKFE4SLV.	SEQ/101.	40
LKFE3SLV.	SEQ/141.	20

NOTE: Quantity required is last number in model.option string.

Description	Model / Color	List Price
Easy Lock Lock-Core		
Lock Core Kit — 1 core, 2 keys	LKFE1 <input type="text"/>	\$ 19
Lock Core Kit — 2 cores, 2 keys	LKFE2 <input type="text"/>	\$ 38
Lock Core Kit — 3 cores, 2 keys	LKFE3 <input type="text"/>	\$ 57
Lock Core Kit — 4 cores, 2 keys	LKFE4 <input type="text"/>	\$ 76
Lock Core Kit — 5 cores, 2 keys	LKFE5 <input type="text"/>	\$ 95
Lock Core Kit — 6 cores, 2 keys	LKFE6 <input type="text"/>	\$ 114
Lock Core Kit — 7 cores, 2 keys	LKFE7 <input type="text"/>	\$ 133
Lock Core Kit — 8 cores, 2 keys	LKFE8 <input type="text"/>	\$ 152

Add color suffix to model: **SLV** Silver, **BLK** Black, **MTS** Matte Silver

Note: One core removal key minimum per order. One additional core removal key per 25 lock-cores will be shipped.

Master Key

(One key) Available to authorized dealers only on faxed orders.

AMKF22 \$ 15

How to specify using Easy Lock Program:

Step 1 — Count the number of lock cores and color required in each workstation that need to be keyed alike.

2 overheads with 1 lock-core each = 2
2 pedestals with 1 lock-core each = 2
Total silver lock-cores per station = 4

Step 2 — Count the total number of workstations needing 4 lock-cores.

4 total workstations

Step 3 — Specify model number based on total number of lock-cores in a station and quantity of kits based on number of workstations.

LKFE4SLV.X.4
Lock-Cores per station
Color of Core
Number of workstations

ALLSTEEL

PARTNERSHIP PROGRAM

Allsteel understands that customers may at times want to specify panel fabrics and seating upholsteries outside of Allsteel's standard offering. Allsteel's **Partnership Program** consists of a select group of materials that have been tested and approved by Allsteel for use on Allsteel products. A sampling of these patterns are located in a separate section of the binder and are:

- Carded by the supplier. Memo samples are available directly from supplier (phone number or email is on the back of the card).
- **Not part of Allsteel's standard offering and therefore subject to extended lead times** (please call Customer Support for current offering and lead times).
- Not available on Allsteel's Express Solutions™ or Everyday Advantage® program.

The intent of the **Partnership Program** is to offer a wider variety of textiles to meet your needs. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

† Panel fabric is not available on Optimize® or Concensys®.

♦ Panel fabric is not available on Involve.

Multi-use fabrics are seating fabrics that can be used on specific Allsteel panels systems, providing more color and pattern options. The applicable Allsteel multi-use fabrics are noted with System designators in the Seating, Collaboration, and Tables Price List.
