Storage Made Easy

SpacePro[®]

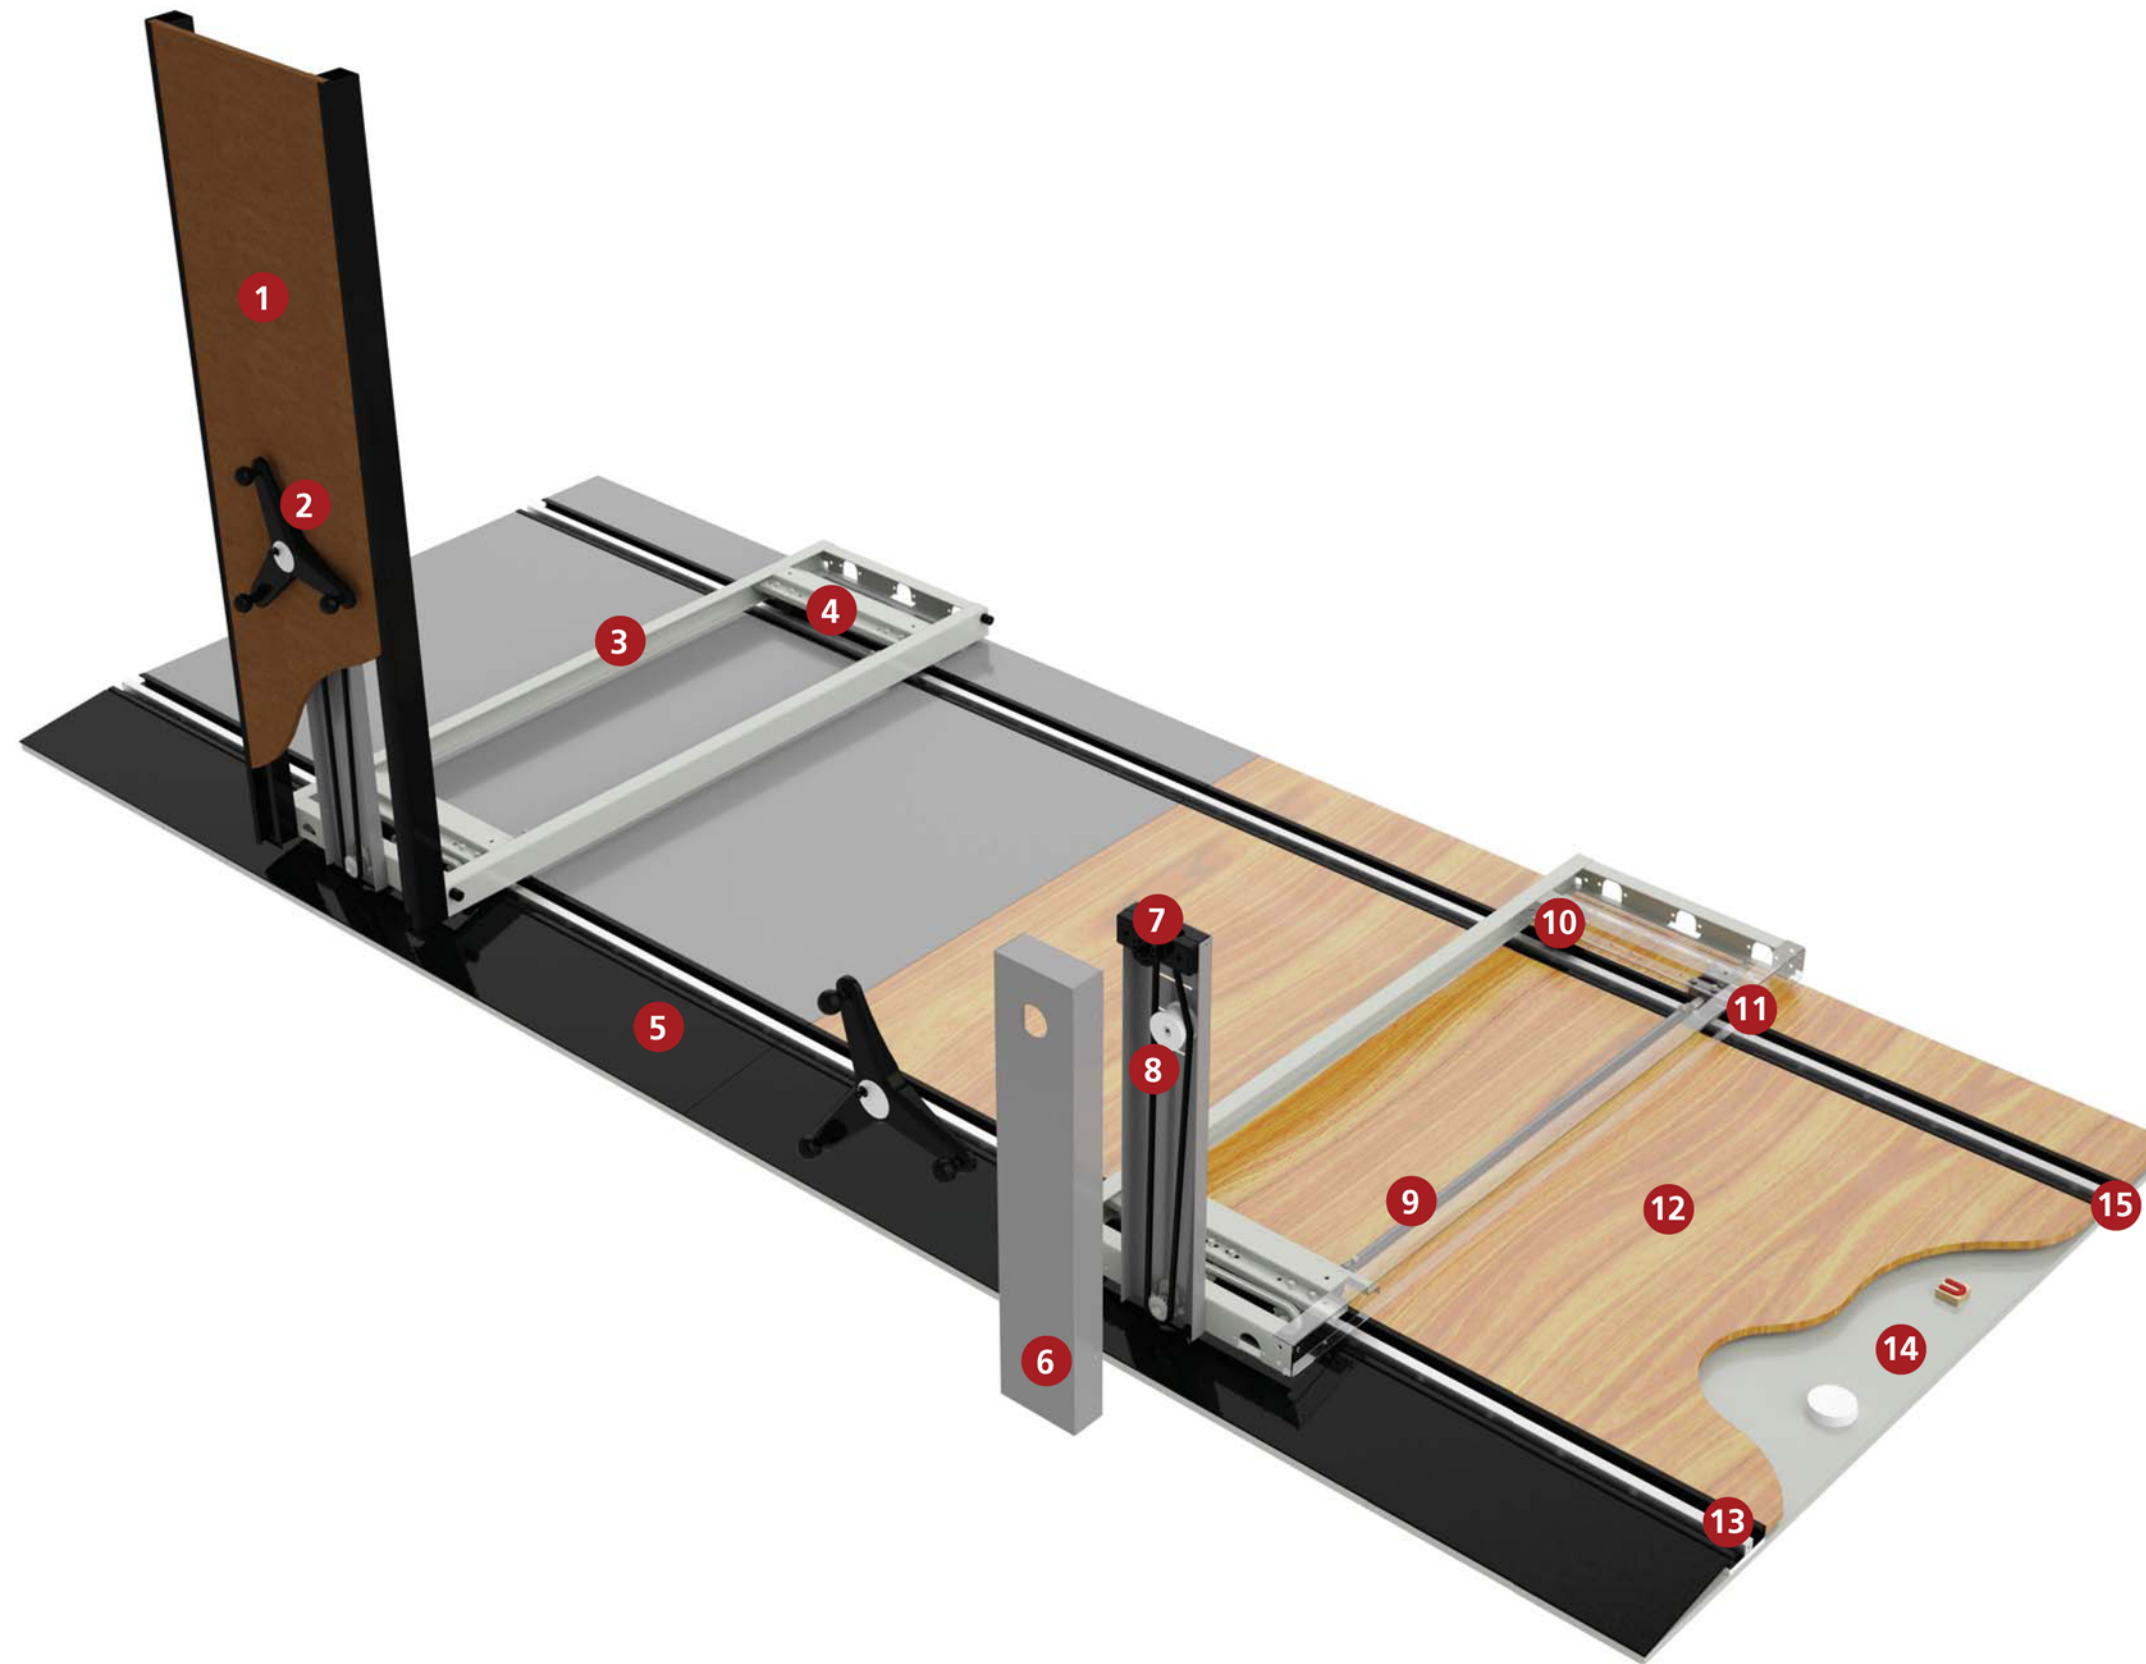

High Density Mobile

PROUDLY MADE IN THE U.S.A.

How Mobile Works

Features

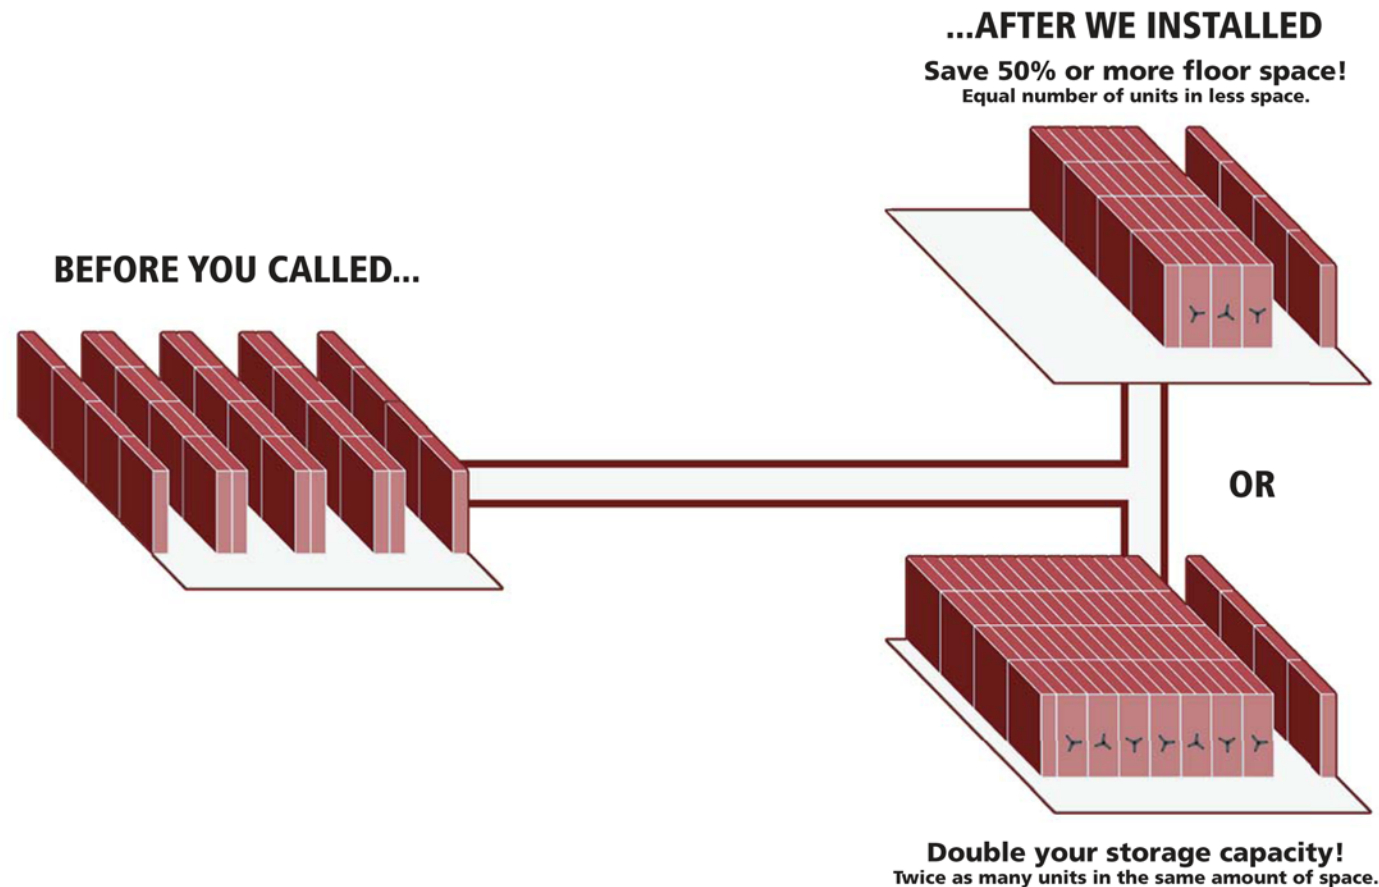

- 1 Full Height End Panel**
High Pressure/Low Pressure laminate options with choice of square edge or radius edge panel support. Steel panels with powder coat finish also available.
- 2 Ergonomic Handle**
3-Prong handle is ergonomic and allows for easy movement of the carriages. Locking option available.
- 3 Mobile Carriage**
3" and 5" carriages constructed of 11 gauge steel with welded construction can handle up to 1,000 lbs./linear ft.
- 4 Double Flanged Pillow Block Bearings**
Permanently sealed and lubricated bearing mean no maintenance.
- 5 Ramp**
Wood and painted steel options are available.
- 6 Chain Drive Cover**
Painted steel cover to protect the mechanical assist drive.
- 7 Chain Drive Assembly**
Constructed of 11 gauge steel and a 35 lb. chain.
- 8 Chain Tensioner**
Nylon tensioner allows for smooth movement of carriage.
- 9 Drive Shaft**
1-1/8" tubular drive shaft is connected to the 3/4" solid, wheel axles in two locations.
- 10 Wheel Channel**
11 gauge hat channel design.
- 11 Dual Flange Wheel**
Fully machined wheel is constructed from C1045 steel, has dual flanges for guidance with a 1" contact surface.
- 12 Decking Options**
Tongue & Groove, Square Edge unfinished plywood and prefinished decking options available.
- 13 Rail Design**
1" C1045 steel bar welded to an 11 gauge "C" channel. Leveling locations every 13-3/8". Anchored or modular options available.
- 14 Grout or Shim Options**
Deck leveling options are grout or shim sets to allow for easy installation of decking material.
- 15 End Stop**
Low profile rubber end stop prevents carriages from running off end of system or hitting a wall.

What is SpacePro?

Space Savings are only the beginning!

Why Mobile

By mounting shelving units on movable carriages that roll on tracks, SpacePro by Tennsco® eliminates the need for aisles. You can select from a wide range of storage options or utilize your existing shelving or filing cabinets with the SpacePro system.

High Density, High Style

From high end legal offices, medical facilities and financial institutions to warehouse operations, SpacePro complements the style of your workplace with a virtually endless selection of end panels in solid colors, woodgrains and beautiful designer patterns.

Custom Designs, Creative Solutions

Our experienced sales and engineering departments can create a custom layout, targeting your specific needs.

More Space, More Versatility, More Value

Large or Small, SpacePro has the solution for your storage requirements. By installing storage equipment on movable carriages (eliminating wasted aisles), you can double your storage capacity or free up valuable floor space for other facets of your operations. Consult your authorized SpacePro distributor for details.

Solid Foundation

SpacePro utilizes a fully welded 1" x 1" steel track, which provides a maintenance free, smooth operating system. Our superior design allows for heavy duty applications with a capacity of up to 1,000 lbs. per linear foot.

Benefits of Mobile

Carriage Design

All carriages come complete with welded cross members that utilize factory installed and tested dual flanged wheels, housed in lifetime maintenance free bearings.

Safety First

All mechanical assist handles are equipped with a safety locking pin to disable carriage movement. All electrical SpacePro Systems include a standard three level redundant safety system. Carriage mounted bumpers provide the proper spacing for media protection.

Mechanical Assist Drive System with Ergonomic Handle

Mechanical assist systems feature full-length drive shafts. By turning the handle, the chain drive transfers power to the drive shaft, moving all drive wheels throughout the carriage simultaneously. This prevents racking of carriages. A simple chain tensioning device provides infinite chain adjustment for trouble-free use. Manually moved carriages are also available for smaller systems.

Electrical Drive System with Touchpad Control

With state-of-the-art computerized electrical drive system, multiple carriages can be moved with just a touch. The advanced touchpad design provides oversized touch areas for "hands full" operation and an ADA friendly environment. Options include an interface with file tracking software, building alarm and fire suppression systems as well as remote computer control.

Office Storage Solution

Office Space is valuable. Eliminate wasted aisles and inefficient traditional storage methods.

SpacePro mobiles can provide the storage solution for your office needs in a fraction of the space.

Organized and efficient mobile storage allows you to store files and supplies for a more productive work environment.

Industrial Storage Solution

SpacePro can increase your warehouse or tool room capacity by eliminating the need for multiple aisle ways.

1,000 lbs. per foot capacity ensures that our carriages can hold the heaviest loads, while keeping you organized.

Our industrial shelving products offer a wide range of solutions to address your company's varied storage needs and optimize available storage space.

Healthcare Storage Solution

Storage challenges in healthcare can prohibit healthcare workers from doing what they do best, taking care of patients.

SpacePro systems provide solutions and solve these challenges. Centralized storage for medications and supplies can increase efficiencies and save the valuable space needed for a productive workforce.

From bed linens to IV fluids, wound care supplies and medical equipment, we have a mobilized shelving solution that will store it all.

Storage Solutions

Tennsco manufactures a full range of storage solutions for your mobile needs.
