

Paoli LLC Limited Lifetime Warranty

Paoli LLC warrants its products to be free from defects in material and workmanship for as long as the original purchaser owns them.

Paoli LLC will, at its discretion, repair or replace with comparable product, free of charge, any Paoli LLC product or component manufactured after May 21, 2017 that fails under normal commercial office use.

The warranty is subject to the following provisions:

Limitations involving materials and components

Natural variations occurring in wood, leather and other natural materials are inherent to their character and not considered defects. Paoli LLC does not warrant the color-fastness or matching of colors, grains, textures of these materials. Additionally a customer own material (COM) selected by, and used at the request of a user is not warranted.

The material and components listed below are covered according to the following schedule from the date of sale:

- Veneer and Laminate finishes - Twelve years
- Seating wood frame - Twelve years
- Seating controls and electrical components (lamps and ballasts are not covered) - Ten years
- Glides, pneumatic cylinders, casters and polymer based components, foam - Five years
- Upholstery fabric - Three years

Seating Usage

Normal commercial office use for seating is defined as the equivalent of a single shift, forty (40) hour work week. Paoli LLC product used in excess of a single shift will be prorated for warranty purposes.

Exclusions

This warranty does not apply to:

- Normal wear and tear over the course of ownership
- Modifications or attachments not approved by Paoli LLC

Dealer Terms & Conditions

These terms and policies apply to products of Paoli, LLC.
Effective date May 21, 2017

Throughout this document, the term "Company" refers to Paoli, LLC. Headquarters: 201 E Martin Street, Orleans, Indiana 47452. Likewise, the term "product" or "Paoli Product" refers to all Paoli Brand products. The relationship between the Company and the dealer is an at-will relationship. The Company offers to sell its products to dealers solely on the terms and conditions set forth in these terms and conditions. Pre-printed terms and conditions contained in any purchase order from the dealer to the Company's terms and conditions shall be null and void and of no force and effect whatsoever with respect to any transaction between the Company and the dealer. The Company reserves the right to terminate any direct account with or without cause upon written notice. The Company reserves the right to change any aspect of programs with 30 days' written notice. The Company reserves the right to apply fuel surcharges without advance notice. All purchases of product by the dealer from Paoli, LLC pursuant to this agreement shall be governed by the laws of the State of Indiana.

1. Ordering

All orders are subject to approval and acceptance by the Company. If a Customer's purchase order (or other form used by the Customer to order goods) contains any term or condition that is different from, in addition to, or inconsistent with the Company's standard terms and conditions (located in this document or any document referred to in this document), they shall be of no force or effect whatsoever. By placing an order with the Company, whether written, verbal, Electronic Data Interchange (EDI), or by e-commerce, the dealer agrees that the transaction shall be governed by the then current Terms and Conditions of the Company, as of the entered date of the order. Product of the Company shall have the effective published warranty as of the shipment date of the order on which the product was placed.

Sales of the Company's products are made only on the Company's standard Terms and Conditions. The Company's standard Terms and Conditions may be modified or supplemented only by a separate written document signed by the Company's authorized personnel at the Company's headquarters.

Possession of Company pricers or sales and pricing literature does not constitute an offer to sell.

The Company tries to comply with reasonable special instructions on orders, if those instructions do not conflict with the Company's Terms and Conditions and do not involve additional costs.

All dealer orders are to be sent to Paoli Customer Support Department.

Technology and Electronic Orders:

Paoli continues to encourage and support the widespread use of technology to advance business practices. Electronic ordering streamlines our joint order processes, reduces error, and ensures timely exchange of important order related information. Paoli supports the following primary methods for the electronic transmission of orders and order related documents:

- E-Ordering, available at www.PaoliConnect.com. There are multiple options available for utilizing the E-Ordering application:

Integration with Office Furniture business systems such as ECI DDMS PSN, Team Design PSN, Hedberg, Core and other pre-approved proprietary software packages.

SIF file upload using fully optioned SIF files from CAP, GIZA, Project Matrix, or ICE imported into the E-Ordering application.

Manual entry of line items into the E-Ordering application.

- EDI- system to system integration with Office Product systems such as ECI DDMS Supplies PSN, MBS-Dev, BMI, Thalerus, and other pre-approved proprietary software systems.

Training, technical set-up and support is available through our Customer Technology Services Team.

A. When Submitting an Order:

Paoli is aggressively converting to electronic ordering methods and customers are strongly advised to submit orders electronically for increased quality, speed, and control of order processing. If you currently are not submitting orders via electronic methods, please contact customer support for technical assistance.

- Standard colors and finishes are detailed in current sales literature and pricers
- The customer must provide complete and correct information on orders. This includes an accurate model number, finish, color & options. Failure to provide complete and accurate information may result in order entry and shipment delays.
- Orders can only be processed when they are complete and correct; incomplete orders will be held in order processing or returned.
- If bid quotation or other special pricing applies, such information should be clearly stated on the order and any applicable bid number or contract number must be referenced in order to ensure proper pricing.
- The order should identify a contact person by name and phone number for any clarification that might be necessary.

B. Order Processing and Acknowledgment Service

- Orders will be entered within 24 - 48 business hours of receiving complete and accurate order information.
- The order will receive a ship (acknowledged) date when all order holds (credit, COM, specials, incomplete order information, etc.) are released.
- The acknowledgment will be sent the morning after order entry (weekends and holidays are not included) unless order is placed on hold.
- Dealers are strongly advised to review order acknowledgments immediately.
- Orders with requested ship dates in excess of 90 days will be entered but will not be acknowledged until reaching 90-day requested ship-date window.
- Extended request date orders can be subject to price increases.
- Please visit www.PaoliConnect.com to view order status application.

C. Changes and/or Cancellations

All cancellations or changes to orders are subject to Company approval. Raw material planning occurs immediately after the order receives a ship (acknowledgement) date and may involve suppliers who have a no-cancellation policy. Cancellations or changes accepted by the Company may be subject to a cancellation fee.

D. Leadtimes - Please see www.My.Paoli.com for our current leadtimes.

2. Pricing and Discounts – General

All prices are stated in U.S. dollars. All billings and collections are in U.S. currency. All discounts apply to current U.S. list prices when the order is entered. Prices for goods ordered by customers do not include duty, ocean cargo insurance, import fees, or taxes which may be applicable to, measured by, or imposed upon the transaction, the purchased goods, their sale, value, or use, or any services performed in connection therewith. The customer agrees to pay or reimburse the Company for any such taxes which the Company or its subcontractors or its suppliers are required to pay.

The list price of Paoli products on an order, as placed by the Customer, determines appropriate freight terms. If an order does not qualify for company paid freight based on total list price of the order, the "ship-to" location determines the freight cost. Order changes, if approved, may result in a different ship date and may be subject to change order costs. The revised order determines the appropriate freight terms.

Changed orders may result in a different ship date and are subject to change-order costs. The revised order determines the appropriate freight terms.

List prices apply to only the standard products ordered. Other additional charges, when applicable, may be added for planning services, design services, freight, demurrage, storage, installation and packaging.

Prices are subject to change without notice. All orders are subject to the prices in effect when the order is entered. Orders with ship dates prior to effective date of price adjustment are billed at the acknowledged price if late shipment(s) occurs, unless the cause of the late shipment is beyond Company control.

A. Freight

1. Delivery will be made to the acknowledged ship to address unless notification of address change is received ten (10) working days prior to the scheduled ship date. Any address changes received by the driver on arrival will be billed as an additional stop and additional charges may apply.

2. Paoli shipments are scheduled for dock-to-dock delivery and do not include unloading, inside delivery, uncartoning or set up. If additional services are required, please contact customer service for applicable prices.

3. The ability for drop shipments is available. Please contact your customer service representative for information on criteria and fees associated with this service. If delivery is scheduled to a location other than the dealer's location, Paoli must be provided with the name and telephone number of the person to contact at the delivery address. Personnel and facilities for receiving and unloading a semi-tractor trailer must be provided by the dealer. Drivers are not permitted to unload items by themselves. Delays caused by customer's inability to accept or unload merchandise at the destination specified on the order will be billed to the dealer at the rate of \$50.00 per hour.

4. Freight charges for orders that do not qualify for free freight, will be charged a minimum of \$80.00 or 3% of total order at List, whichever is greater.

Paoli will consolidate and ship orders less than truckload on their lane day.

Special delivery requests must be specified at order entry. The Company reserves the right to deny special delivery requests. If approved, orders with special delivery requests may incur additional cost and expense to the Customer.

Paoli standard delivery terms include delivery to warehouse dock and Customer is responsible for unloading the truck.

Full truckload deliveries are to be unloaded within four (4) hours of arrival of truck or the prearranged appointment time, whichever is later. The Company reserves the right to bill back unload time in excess of four (4) hours for a full truckload.

Unload time allowed on stop-off loads will be prorated based on the total cubic feet of product on the full load with a minimum allowance of one (1) hour.

Requests for "Proof of Delivery" may have a charge of up to \$20 per request applied.

Requests for postponement of order shipment are approved at the Company's sole discretion. If approved, the Company reserves the right to transfer the purchased goods to storage for the Customer's account and at the Customer's risk and expense. Fees for storage of product will be \$100 per calendar day per delivery in addition to all associated transportation charges realized due to the shipment change and will be billed to the customer. The customer may be billed for additional transportation charges cause by the postponement. This transfer to storage is deemed delivery to the Customer for all purposes including invoicing, payment, and risk of loss.

Please note that due to carrier limitations, storage options are not always available.

B. Time of Delivery

The Customer can request ship or delivery dates, however, this should be done at time of order entry and are subject to Company approval. In addition, change requests (i.e. – address changes, delivery information) must be done at least ten (10) working days prior to ship date.

The Company attempts to comply with the Customer's delivery schedule, however, requested ship or delivery dates are estimates only and not an essential term of the agreement. An order that requires an extended shipping date must be marked "Do Not Ship Before" and include the requested date on the Customer's Purchase Order.

Orders that are less than a truckload size must ship on a date with other product shipping to that region. Delivery times will be provided based on delivery availability in that area.

C. Failure of Carrier or Supplier to Deliver on Time

The Company will make every effort in contracting with specialized carriers for delivery requests as stated on orders. However, the Company shall have no liability for failure to deliver or perform, or for delay in delivery due to any cause outside the control of the Company. The liability of the carrier constitutes transport of property with reasonable dispatch and delivered within a reasonable time. The Company will make every effort to deliver within two (2) hours of a confirmed delivery appointment, however the Company assumes no liability for costs incurred due to delayed or late deliveries.

D. Damaged Shipments

Company products are carefully inspected and packed in sturdy packaging that meets transportation requirements. The title and risk of loss with respect to all products purchased by the Customer from the Company transfers to the Customer at the point of shipment and the sale of the product is considered substantially completed at that point. The Company is not responsible for damage in shipment. The transportation company assumes complete responsibility for delivering the product to the customer in good condition when the bill of lading is signed. Any visible damage or shortage should be noted on the Bill of Lading.

E. Returns

Great care should be taken during the specification process to ensure that all items are correct as return shipments and/or product are not accepted by the Company. In extenuating circumstances, the Customer may request a return which is subject to prior approval from the Company. If approved, merchandise must be returned in original shipping cartons, with proper inner packing and is subject to inspection upon return before acceptance. Returns are not accepted for any electrical components – opened or non-opened due to UL restrictions. All returns must be made within 30 days after Return Authorization is issued.

Requests for returns due to Company error must be made within 30 days of receipt of erroneous shipment.

Requests for returns due to reasons other than Company error, if accepted, are subject to a processing fee of up to 45% of the invoiced amount and must be forwarded with transportation charges prepaid.

F. Back Charges

The Company will not pay for expenses incurred by the customer in expediting shipments. The Company will not pay for the repair of damage by others, for the cleaning of products, removal of waste, security service, telephone service, electric service, water, heat, or charges for the use of in-building transportation facilities such as elevators and hoists.

G. Dealer Payment Terms

The following payment terms are available to dealers:

1%/10/receipt, net 30

All invoices are subject to a one percent (1.0%) cash discount if payment is received on or prior to the 10th day from the invoice date. Invoices which do not earn this discount are due net 30 days from the invoice date. Discount is applicable to merchandise invoiced and is not applicable to freight or service charges.

NOTE: Terms of sale are from invoice date, not receipt of merchandise.

Dealers whose invoices are not paid in full at the end of 30 days following invoice date are notified that orders may be delayed until past-due accounts are current.

A finance charge of 1.5% per month (18% annually), or the highest rate allowed by law may be charged on the unpaid balances of past due accounts. Paoli, LLC (or its affiliate companies) has the right to set off any amounts Paoli, LLC (or its affiliate companies) may owe to Dealer from time to time (including but not limiting to, rebates, MDF funds, servicing fees, etc.), against any amounts Dealer may owe Paoli, LLC (or its affiliate companies) from time to time under the terms of this Agreement or otherwise.

Paoli, LLC (or its affiliate companies) will retain a security interest in all products until the invoice is paid in full.

\$25,000 list minimum project size to be eligible for project pricing. Paoli, LLC reserves the right to waive this requirement.

The project must be a competitive situation for Paoli, LLC. Competitive Project Pricing is not a volume discount.

Paoli Brand products are eligible for Competitive Project Pricing.

3. MARKETING CONTENT

The Company may from time to time provide Customers with images, product descriptions, and trademarks related to the Company's products and services in various formats and media ("Content"). All content is and shall remain the sole property of the Company. Customers may copy, download, and use the Content so long as the Customer: (a) uses the Content solely for the purpose of promoting and selling Paoli products; (b) does not modify, rent, lease, loan, sell, distribute to third parties, or create derivative works of such Content, in whole or in part.

4. WARRANTY SERVICE/RESELLER OBLIGATIONS

Dealer agrees to provide prompt and courteous service with respect to all products sold, regardless of where such products are delivered and installed, without compensation from the Company for such activities. The Company will provide replacement parts to repair units under warranty. Dealer agrees to provide labor to repair units under warranty at no charge to the Company, unless unusual warranty claims for significant quantities of product are involved (as determined by the Company in its sole judgment) and dealer obtains advance written agreement from the Company for labor reimbursement.

For unusual warranty claims where significant quantities of product are involved, the Company will consider reimbursement for actual labor expenses only. Requests for pre-approval of warranty labor and subsequent submittal of labor invoices must include the following:

- Complete scope of work, including specific product with quantities to be repaired/installed.
- Actual labor hours and labor rate.
- Number of installers being utilized.
- Dates and location of work performed.

5. CARE INSTRUCTIONS

Finish

All Paoli products feature a low emitting finish system that enhances the beauty of the natural wood and ensures depth, clarity, color consistency and durability throughout the life of the product.

NatureTech Finish

All Paoli veneer casegood and conference products feature NatureTech finish. NatureTech follows a process on all worksurfaces that begins with the application of an alcohol-based NGR dye stain followed by a wipe stain, which further enhances the natural characteristics of wood. Worksurfaces receive a specialized coating of polyurethane acrylic resins cured by ultraviolet light. The result is a low emitting, full-filled, 40 sheen finish on all products. All non-writing surfaces receive an application of 30 sheen, low-emitting, conversion varnish finish. Both processes provide exceptional depth, clarity, durability and chemical resistance throughout the life of the product.

While NatureTech finish is resistant to marring, the veneer beneath the finish is subject to damage from writing instruments, keys, etc. Therefore, Paoli recommends the use of a desk pad or a glass cover surface.

Although there is no present day finish that is fireproof, NatureTech does offer the much sought after quality that resists the spread of flame.

Avoid exposing the furniture to strong sunlight. Although NatureTech finish is as fade proof as possible, the veneer beneath the finish can change color due to sunlight. Avoid exposure of furniture to extremes of heat or cold.

After the furniture is unpacked, we suggest a general wiping of the entire unit with a small amount of no wax, liquid polish applied to a soft, clean cloth to highlight the beauty of the wood. Cleaning:

1. Dust all surfaces frequently with a clean, soft, damp cloth, moving the cloth with the grain.
2. Lift all objects to move them, never drag them across the finished surface.
3. For cleaning, a spray cleaner such as "409 Glass Cleaner" or "Glass Plus" and a water dampened cloth may be used to remove stubborn stains.

6. CUSTOMER'S OWN MATERIAL (COM) PROGRAM

Customer's Own Material (COM) is a request to use fabrics not available as part of Paoli's standard fabric offering. Paoli to Supply (MTS) and Dealer to Supply (DTS) are the two ordering methods. Paoli has partnered with fabric manufacturers to provide competitive pricing and selection through the MTS program. MTS will be the standard offering unless Paoli is unable to procure the fabric. If there is a DTS request submitted, Paoli will advise at the time of the request if DTS is available.

Customer Warranty Exclusion

Paoli shall have no responsibility for the condition, quality, value, performance, physical properties, or any other aspects of the COM. Paoli shall have no liability for any damages, injuries, or losses to the customer or to any third party that shall be caused by any COM or product modification, and the customer shall hold Paoli harmless for all liability. Paoli assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality of the COM or product modification after its application on a Paoli product beyond normal quality standards. Paoli reserves the right to reject a COM fabric if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be

notified with an explanation of the issue. Paoli is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to Paoli from the COM supplier. Paoli is not responsible for excess yardage created by DTS orders and reserves the right to dispose of the excess fabric.

COM Testing

- As a result of recent legal requirements, Paoli will need to obtain specific information from the fabric supplier about treatments and chemicals used in the fabric. To the extent the supplier is unwilling or unable to provide the necessary information, could extend the testing lead time of the request.
- To check if a COM has been tested previously, utilize the COM Search Tool on the Paoli website> Upholstery section using the following information:
 - COM Supplier's Name
 - Fabric Pattern Name
 - Color Name
- If the COM fabric has been tested and previously approved, the COM will not need to be re-tested unless testing standards have changed, fabric is to be used on a different series, or direction of the fabric has changed from what was previously approved.
- If the pattern has previously been tested and approved, but not in the specific requested color, the customer will need to request an order code for that color only. No further testing will be necessary since the pattern has already been approved.
- If the fabric has not previously been tested, the customer must enter the COM request on the COM search tool page.
- The testing timeline will take 3-5 business days once the fabric is received.
- COM yardage in the pricelist is shown as pattern cut only

MTS COM

- As previously mentioned, MTS is the primary COM method.
- If the COM fabric has not been tested, a COM request must be submitted on the Paoli website.
- For MTS orders, Paoli will procure fabric needed for both testing and production phases. Should Paoli not be able to obtain fabric yardage, the customer will be contacted.
- When testing has been completed, the customer will be notified by the COM team of the test results. If the COM is approved, Paoli will provide a COM tracking order code for MTS. That tracking code is required on the order in place of the standard fabric code.
- If approved, MTS product will be assigned an appropriate fabric grade for pricing. The pricing can be found on the Paoli website. (All standard discounts apply).
- Written COM price quotes are valid for 90 days after the issue date.

DTS COM

- DTS COM is only available if the COM fabric cannot be procured by Paoli. If the fabric can be procured by Paoli, the customer will be contacted to switch to MTS or cancel the request.
- All fabric for testing sent direct from supplier must be tagged with the dealership or specifier's name with the Tailored Solutions request number and sent to the location on the email. Untagged fabrics will be rejected and samples will not be returned.

Testing yardage requirements:

- The customer will need to submit (2) 8x8 memo samples for testing. Should more yardage be needed, the customer will be contacted.
- Please note, if the mill is not able to supply (2) 8x8 memo samples, then the customer may send 1/2 yard of fabric for testing.
- If the COM has not been tested, a COM request must be submitted on the Paoli website.

- When testing has been completed, the customer will be notified by the COM team of the test results. If the COM is approved, Paoli will provide a COM tracking order code. That tracking code is required on the order in the place of the standard fabric code.
- DTS product is priced at the following grades (all standard discounts apply):
Fabric Grade 2, Leather Grade 3.
- Written COM price quotes are valid for 90 days after the issue date.

COM Lead Time

- Ship dates will be based on fabric receipt and Paoli's standard lead time. All fabric must be properly tagged and shipped to the appropriate producing location (provided in the approval email).
- Specific to DTS orders, COM orders will not receive a ship (acknowledged) date until Paoli has the fabric in its possession for production.
- Specific to DTS orders, the customer may send the required yardage for the order to the address listed on the approval email to arrive no sooner than 4 weeks in advance of the acknowledgment date.
- Paoli will make every effort to locate misdirected COM shipments on behalf of the customer. However, Paoli will not be responsible for any COM received without a tracking number or incorrectly shipped by the fabric vendor to an incorrect producing facility.

COM Ordering Information

The following information must appear on or accompany the product purchase order:

- Approval tracking number and the customer's purchase order number.
- COM supplier, pattern, and color name/number.
- Mark "Paoli to Supply" or "Dealer to Supply".

The packing list for the COM must include the following information when Paoli receives the shipment for production:

Dealer or Wholesaler Name
Purchase order number submitted to Paoli
Fabric name
Yardage shipped
Approval ordering code

- If Paoli receives fabric with incorrect labeling that cannot be linked to an order, Paoli will hold the fabric for up to 7 days while the COM team attempts to identify the order. After 7 days, Paoli will return the fabric to the sender.

- Specific to DTS orders; the customer should send only the amount needed for the order. Excess yardage will be disposed of at Paoli's discretion.

Changes to COM Product

Once a COM product is ordered, no changes or cancellations can be made to the COM product without approval from the Paoli COM team.

Paoli Laminate

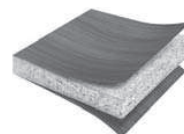

Paoli Laminate

Paoli takes great pride in providing our customers with quality laminate product. Our offering consists of Thermally Fused Laminate (TFL) and High Pressure Laminate (HPL) in a broad spectrum of finishes.

Thermally Fused Laminate

All laminate chassis components are made of TFL. TFL panels are composed of resin-saturated decorative paper bonded directly to Particleboard. No adhesives are used in making TFL panels. The manufacturing process works with low pressure and high temperature. TFL panels are balanced and finished on both sides.

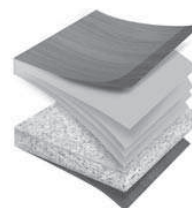

TFL

High Pressure Laminate

HPL finishes are only available on top components. HPL is composed of resin-impregnated kraft paper, decorative paper face material and a clear melamine-impregnated overlay. These sheets are bonded at high pressure and temperature. Pressed sheets are trimmed, and then sanded on back to facilitate bonding to Particleboard or Medium Density Fiberboard (MDF). The HPL sheet is pressed onto one face and the other with a black phenolic backer to create a balanced panel. Both faces are applied with adhesive.

HPL

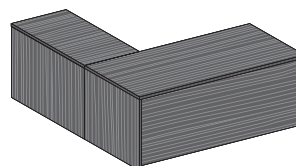

Edge Band

All laminate panels are banded with PVC edges. Tops are banded with 2.0mm and chassis with 0.5mm. The edge banding always comes as a match to the panel finish. On woodgrain finishes, a matching print is on the flat edge of the band and a solid base color is visible on the radius.

Grain Direction on Tops

Paoli advises specifying product where grain runs in the same direction for adjacent pieces. However, it is acceptable to run grain in different directions on layered surfaces. Laminate panels are restricted to 60" for the longest possible short grain part. Returns that are 66" or longer will run long grain on the top.

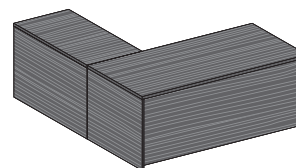

Default Grain

Grain Direction on Chassis

Laminate chassis finishes are available in default for all grades and horizontal for L2 and L3. Similar to tops, any laminate chassis component 66" or longer specified as default will run long grain. The default laminate finishes are available on all models, whereas the horizontal finishes are available on select models. Any model specified with a horizontal finish will have all vertical panels run horizontal. Whether default or horizontal is specified all shelves, top, and bottom panels will run long grain.

Horizontal Grain

Sustainability

Paoli is committed to a strong environmental management program based on sustainability. We recognize the potential impact our products and processes have on the environment. Product is certified through various third party organizations which evaluate these environmental and social impacts. All laminate product meets BIFMA Level 2 certification, SCS Indoor Air Advantage standards, and is LEED eligible.

Paoli takes great pride in providing our customers with quality veneer product. Our offering consists of natural and composite veneers in a broad spectrum of finishes.

Wood is a natural product and no two trees are identical. There are color and grain variations from log to log, and even within a log. These natural characteristics define wood's beauty and should not be viewed as defects.

Variations will be most visible on product with clear or lighter finishes. Paoli does not guarantee exact matching and will not replace product because of natural variations.

Plain Sliced (Flat Cut)

To provide quality product, natural veneer is reviewed to ensure it meets our specifications for uniformity of color and grain pattern. Maple, Cherry, and Walnut are Plain Sliced (Flat Cut) and will include cathedrals.

Stratawood Veneers

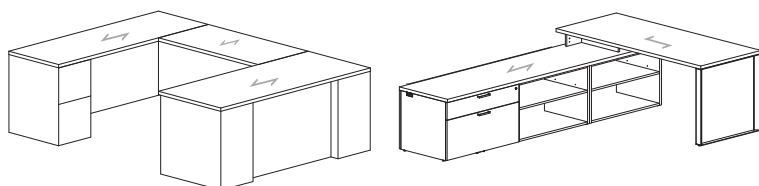

For stratawood veneers; White Oak and Grey Oak are Quarter Cut grain patterns. Paoli only uses double cut composite veneers. This style of veneer is specifically engineered for improved consistency in grain and color.

Slip Matched

Paoli manufacturing begins with balanced panels, meaning flitches are equal in width. As product is built from assembled or modular components the width of flitch may vary. All veneers are slip matched.

Grain Direction on Casegoods

Paoli advises specifying product where grain runs in the same direction for adjacent pieces. However, it is acceptable to run grain in different directions on layered surfaces. Metamerism, or Flip, is an effect produced by wood where two similar pieces of veneer look very different based on viewing angle and direction, lighting, grain pattern, and texture. This may cause a surface to look light from one angle yet look darker from the opposite viewing angle.

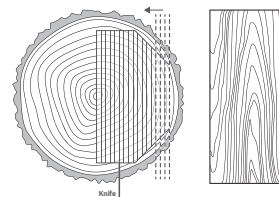

Indoor Air Quality (IAQ) Standards

All Paoli veneer product meets Indoor Air Quality (IAQ) certifications, contributing to a more sustainable environment. Our multi-step ultra (UV) finish process culminates with our ultra-durable and environmentally friendly top coat NatureTech. This non-detectable formaldehyde (NDF) finish, provides high resistance to surface damage such as marring, staining, moisture, and heat under normal workplace conditions.

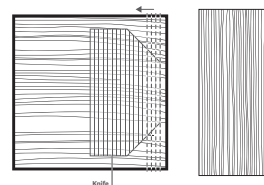

Plain (Flat) Sliced

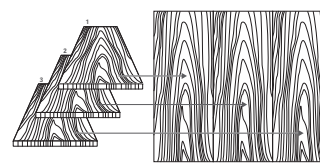

Manufactured by slicing the log in an up-and-down movement. Characterized by straight grain intermixed with cathedrals.

Stratawood

This method bisects annual growth rings and results in a straight grain or ribbon-stripped appearance.

Slip Matched

Veneer pieces are joined in sequence without flipping the pattern.

A full-page sheet of white graph paper featuring a light gray grid. The grid consists of small squares, with thicker vertical and horizontal lines forming a larger square frame around the perimeter. There are no margins or additional markings on the page.

When Specifying Laminate Desks

When ordering a Laminate Kindle One, you will specify these items: Top finish, Chassis finish, Edge, Pull, Drawer Box, Grommet Location & Lock Key

1. Select your top finish (see page KD14 for how to specify)

L1 finish options - no upcharge
L2 & L3 finish options - (\$) upcharges apply

2. Select your chassis finish (see page KD15 for more information)

L1 finish options - no upcharge

General Information

TOPS:

Kindle One tops are 1½" thick and feature a 3-ply balanced construction.

Laminate tops are available in Thermally Fused Laminate (TFL) and High Pressure Laminate (HPL) with a matching 2mm PVC edge. Product specified with Soft (SO) or Ridge (RG) edge will be constructed of 45 lb particleboard. Primary worksurfaces are profiled on approach and user sides; secondary worksurfaces are profiled on user side only. Product specified with the Knife (KF) edge will be constructed of premium grade MDF. KF profile is only available on approach side of desktops. All non-profiled sides will come with 2mm SO edge. All laminate tops come with black backer.

Veneer tops are available in Natural and Stratawood veneers with a matching 2mm external band on all sides. Product specified with Soft (SO) or Ridge (RG) edge will be constructed of 45 lb particleboard. Primary worksurfaces are profiled on approach and user sides; secondary worksurfaces are profiled on user side only. Product specified with the Knife (KF) edge will be constructed of premium grade MDF. KF profile is only available on approach side of desktops. All non-profiled sides will come with 1mm SO edge. All veneer tops come with brown backer.

Tops connect to the chassis with wood screws through L-brackets. Top-to-top connections are made with wood screws through ⅛" thick steel flat plates. Maximum unsupported span for all tops should NOT exceed 48". MUST add additional support for longer spans.

CHASSIS CONSTRUCTION:

All Kindle One chassis are ¾" thick and feature a 3-ply balanced construction.

Laminate chassis always come in TFL and are constructed of 45 lb particle board with matching 0.5mm PVC edges. Laminate finishes specified as default will always run vertical until the component exceeds 60", at that point the grain direction will run horizontal. Laminate finishes specified as horizontal will always run horizontal. Horizontal laminate finishes are not available on components over 60" high. Fronts come as matched sets per unit.

Veneer chassis are constructed of 45 lb particle board with matching 1.0mm edge veneer. Natural veneer finishes will always run vertical grain direction. Stratawood veneer finishes will always run horizontal grain direction. Fronts come as matched sets per unit.

Panels are securely fastened with screws, L-brackets, dowels, and concealed fasteners to ensure maximum strength.

HINGES:

All hinged doors use 105° European style soft-close hinges and are fully adjustable. Left hand hinged units have hinges located on the left of the unit, and right hand hinged units have hinges located on the right.

DRAWER CONSTRUCTION TYPE:

Drawer fronts are attached separately to the fully assembled drawer boxes. Drawer fronts are available in laminate material.

Laminate product comes standard with four-sided, miter-folded laminate boxes. Drawers are built with woodgrain laminate ½" sides and ⅜" bottoms.

Veneer product comes standard with wood drawers in natural finish. Drawers are built with finish grade plywood ⅞" sides and ⅜" bottoms. Laminate product is available with wood drawers for an upcharge.

Letter width drawers accommodate letter or legal filing. The top box drawer comes standard with a pencil tray.

All file drawers ship with a filing system.

SLIDES:

All slides are progressive soft-close with heavy duty full extension to permit complete access to the drawer. Box drawer slides are rated to 100 lbs and lateral file drawer slides are rated to 130 lbs.

GLIDES:

All base units have adjustable leveling glides to compensate for uneven floor surfaces. Units height are identified with glide at lowest point. Glides are continuously adjustable up to 1½". The glide bottom is a durable non-rust nylon.

SHELVES:

Shelves always come in matching case finish and are ¾" thick. Adjustable shelves have three positions with 2½" (64mm) hole spacing with one above and below default location. The shelves use a positive engagement system that presses housing onto a connecting bolt for a tool-less connection.

LOCKING:

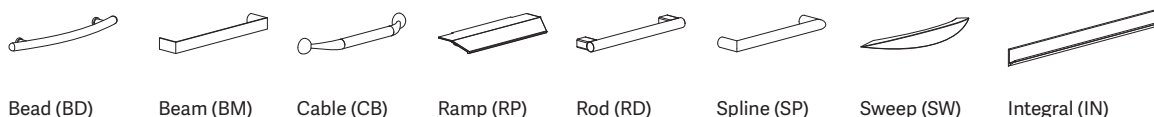

Locking comes standard on all Kindle One product with doors and drawers. All base units lock on the face. All mobile pedestals lock on the right hand side. All stacking upper bookcases and hanging cabinets lock on the underside. All locking models are available as Standard (STD), Keyed Alike (KEY) and Omit (OMT).

Base and mobile pedestal units use a tenon lock (PXLC) that is available in matching metal finishes. Tenon locks are interchangeable. STD will come with a random key number. OMT will remove lock core and deduct list price to reflect cost of core. Must specify the specific key number for lock core you require.

Upper bookcase and hanging cabinets use a plunge lock (PXPLC) that comes standard as polished. If specified as KEY you have the option to replace with the specific keyed lock you require. If specified OMT locks and holes will be removed from the unit.

DRAWER PULLS:

Eight pull styles are available in Silver (PR6) or Black (P71) finish. Specify style and finish when ordering.

Integral pulls are on top edge of front. On above surface hinged doors, a push latch will be used. Bead, Beam, Cable, Rod, Spline and Sweep pulls are interchangeable. Always installed on center. Ramp pulls are always installed on the right. Fronts are machined for both sides if you want to change sides.

GROMMETS

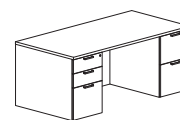

All worksurface grommets are optional and specified in the dot option string. Grommet finish must be specified. Assembled units come standard with chassis grommet on kneewell. Chassis grommet must be specified on modular components. All grommets are approximately 3" round metal (actual hole size is 80 mm)

DESK STYLES:

Kindle One desks are full pedestals. Kindle One is available as assembled or modular components. Assembled desks are available as recessed or stepped. Modular desks can be built as flush or stepped.

Understanding Kindle One

Welcome to Kindle One! The following pages guide you through the thoughtful depth and breadth of Kindle One casegoods. You will find answers to the day-to-day questions pertaining to design details, construction, statement of offering and more. It serves as a single source in discovering just how adaptable this series can be.

Kindle One is Choice, Diversity, and Quality. It sets a new standard for design-friendly casegoods, and is designed to bring visual continuity to countless applications in the workplace.

Enjoy the Power of One.

Paoli - Kindle One

Drawer Construction

All Kindle One drawers except center drawers, feature soft-close glides as the standard mechanism, no up-charge for this premium feature.

Drawer slides are heavy-duty full extension steel ball bearing slides for smooth operation.

- Slides on box drawers and file drawers in pedestals are rated at 100 lbs per set.
- Slides on lateral file drawers are rated 130 lbs per set.

Full-extension metal ball-bearing suspensions are featured on all Paoli drawers – center, box and file – to offer accessibility, strength and ease of use.

Vinyl Wrapped

Vinyl wrapped drawers come standard on Kindle One laminate models.

Construction

Four corner construction miter box and file drawers are built as separate unit.

Drawers are built with $\frac{1}{2}$ " laminate sides and $\frac{3}{16}$ " bottoms.

Drawer fronts are matched sets.

Drawer fronts are 3-ply construction.

Core is 45 lb fiberboard.

Drawer fronts fully overlay the chassis.

File system

File drawers come with an integrated filing system with tool-less reconfiguring.

Letter width file drawers accommodate letter or legal filing.

Wood Drawer

Wood drawers come standard on Kindle One veneer models.

Construction

Four corner construction wood box and file drawers are built as separate unit.

Drawers are built with $\frac{7}{16}$ " wood sides and $\frac{3}{16}$ " wood bottoms.

Drawers are finished with a 3-step catalyzed varnish finish to seal grain.

Drawer fronts are matched sets.

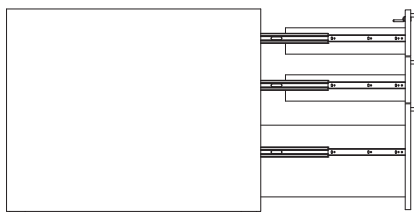

Drawer fronts are 3-ply construction.

Drawer fronts fully overlay the chassis.

File system

File drawers come with a heavy-duty filing system.

Letter width file drawers accommodate letter or legal filing.

Upper Storage with & without Paper

- Hanging Cabinets & Upper Bookcases are available in standard height or tall height. They come with paper storage (P) or without paper storage.
- Standard and tall models up to and including 54" wide are available with open or hinged door options only. Standard and tall hanging cabinets 60" & wider are available with open, hinged or sliding door option.
- Hanging cabinets must be attached to a wall. (mounting hardware included)
- Lighting and tackboards are available accessories for upper bookcases.
- Default Laminate Grain Direction for Door Fronts & Back Panels (up to & including 60"): Vertical
- Back Panels 66" and over: Horizontal
- Horizontal Laminate Grain Direction for Door Fronts: Horizontal
- Natural Veneer Grain Direction for Door Fronts & Back Panels: Vertical
- Stratawood Veneer Grain Direction for Door Fronts: Horizontal
- Laminate hanging cabinets & upper bookcase, chassis and doors can be specified in different materials/ finishes allowing for mixed material aesthetics.
- Veneer upper bookcase doors are the same finish as chassis.

Modesty Panels

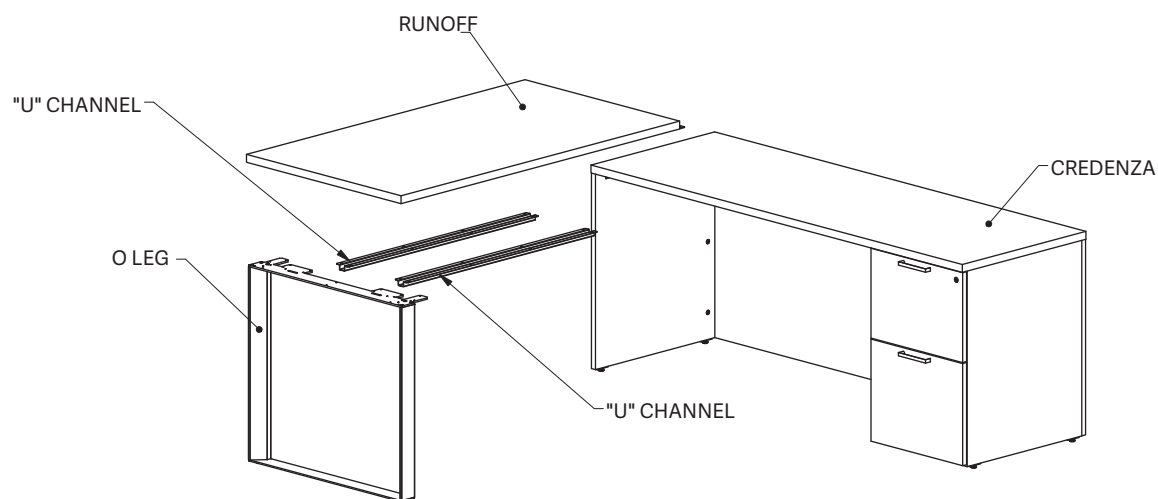

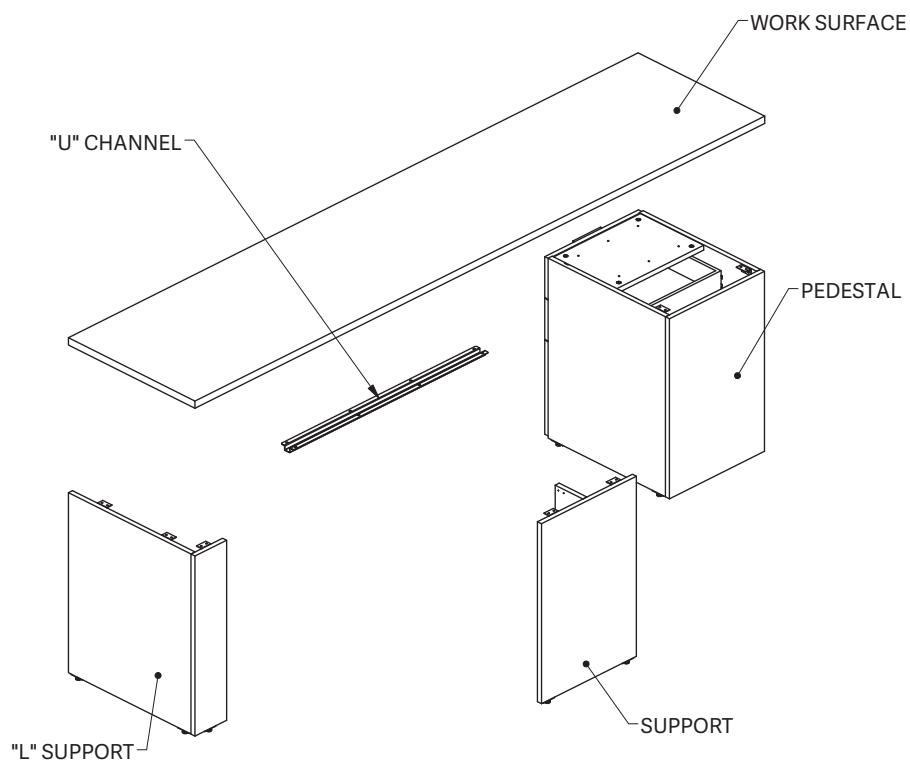

½ or full height modesty panels can be used between pedestals.
Pedestals are also available with optional back panels.

Paoli - Kindle One

L & T Support Panels

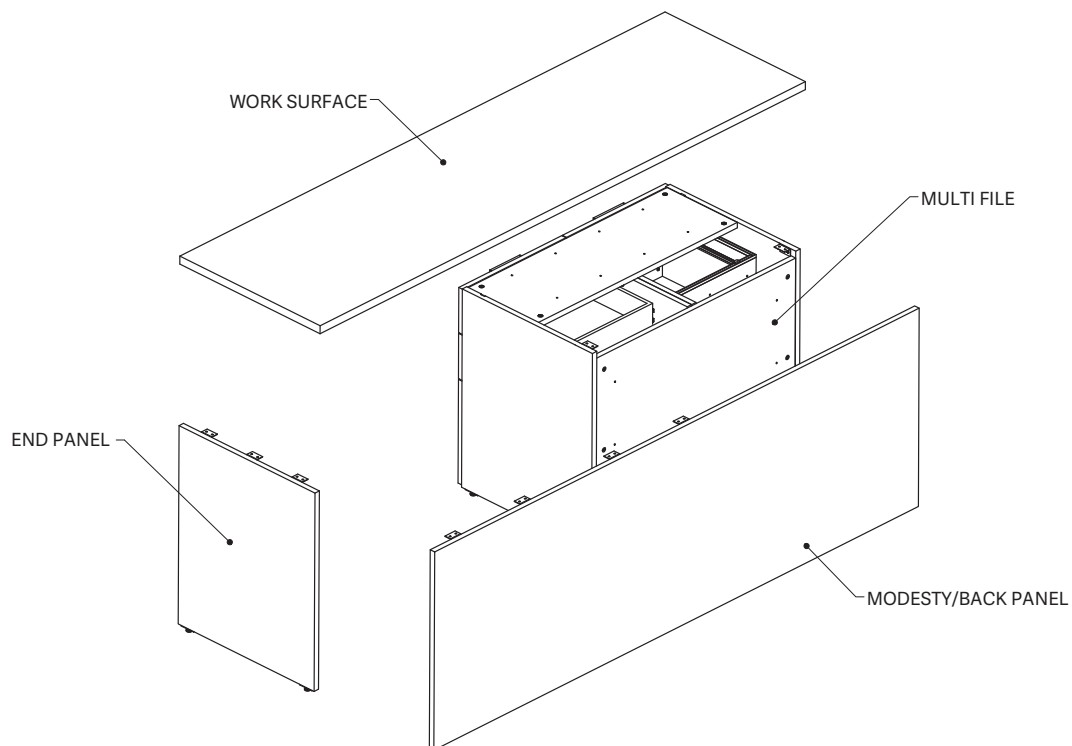

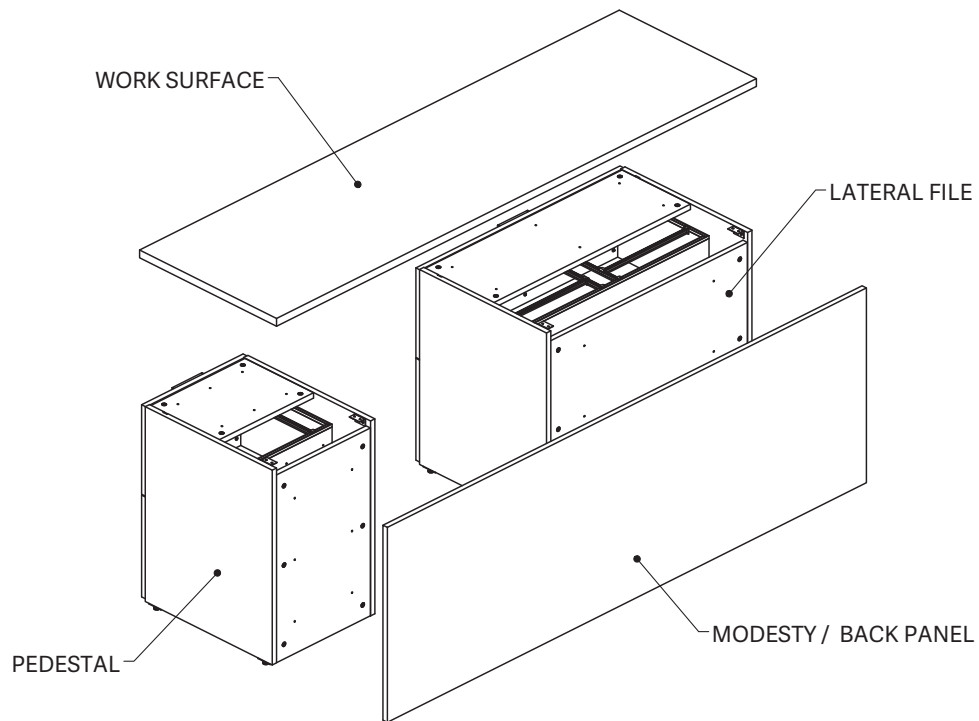

"L" and "T" support panels can be used in place of wing end panels and full back panels. Unsupported spans greater than 48" must have a support added.

Modesty / Back Panels

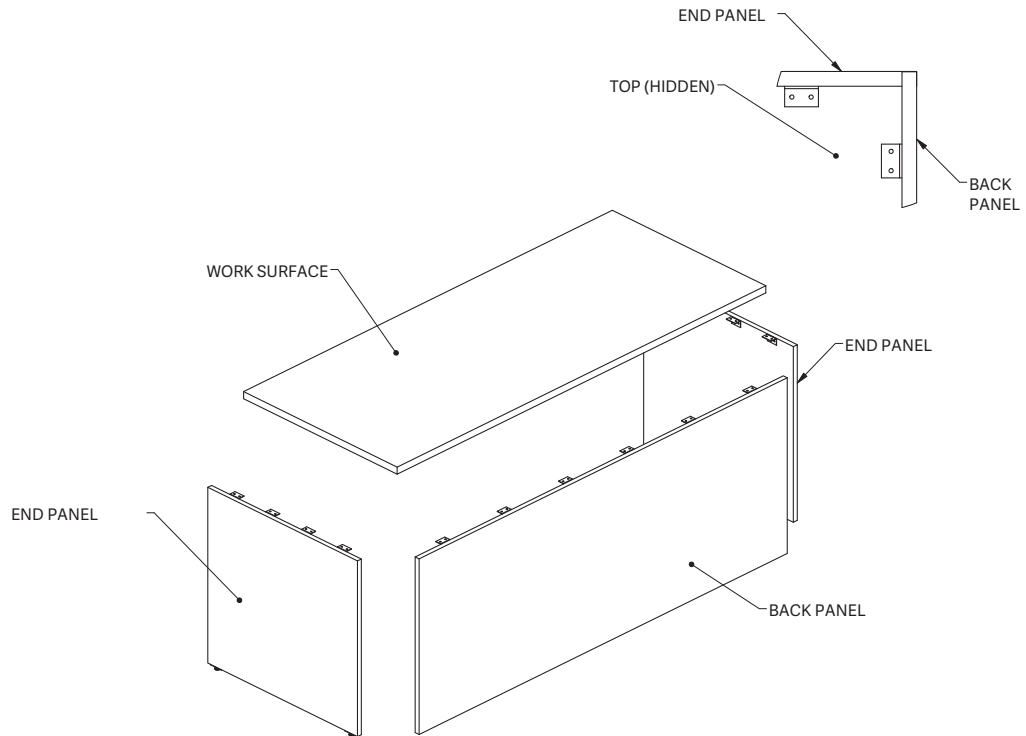

Full width modesty panels are used with a pedestal or an end panel

Paoli - Kindle One

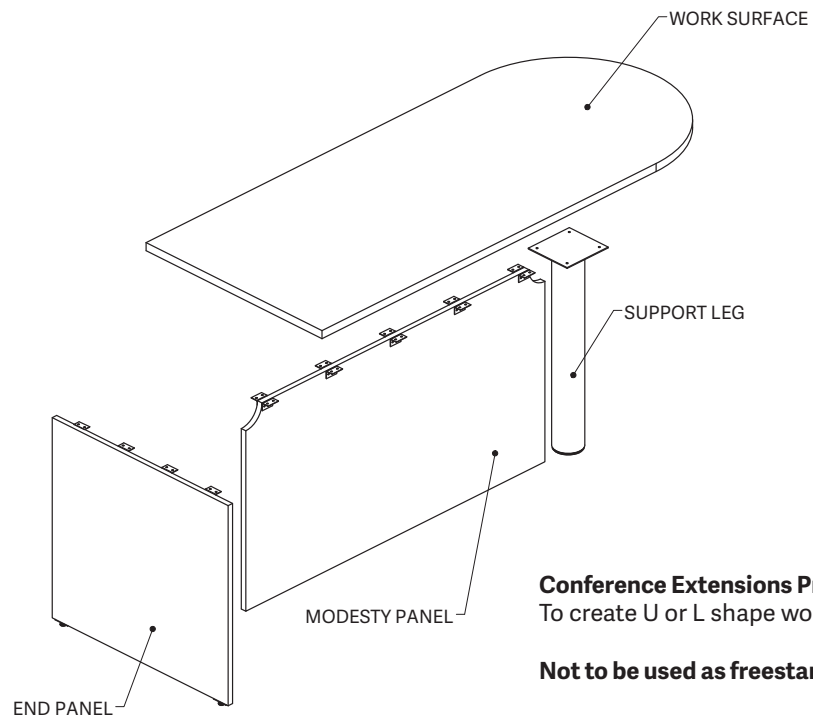

End Panels

Wing end panels are used with full back panels. End panels are used with half height modesty panels

Paoli - Kindle One

Conference Extensions Primary Use:
To create U or L shape workstations.

Not to be used as freestanding units.

Tackboards

Kindle One tackboards are $\frac{3}{4}$ " thick with a 3-ply balanced panel construction. They are available in two styles: standard and wire management. Standard mounts flush to the wall or used with upper bookcases.

Wire management is offset to enable users to run cords vertically. It is attached with an easy-to-remove/reattach system that allows users to access cords if necessary. The wire management routes are visible from the top and bottom of the tackboard so it is recommended to place below a hanging cabinet. If you are not using a hanging cabinet, please specify standard.

Paoli

Shelves

ACCENT SHELVES:

Part of the family of sleek metal accents, Kindle One accent shelves can be used on their own or below wall mount units that do not have paper storage. Available in two heights to work with standard or low storage. The multi-piece back panel comes as a matched set and is available in all veneer and laminate finishes. The metal shelves are available in Paoli standard black or silver metal finishes.

Paoli - Kindle One

Adjustable Height

Kindle One comes in two styles of height adjustability: Concealed and Industrial. For concealed height adjustable models, no mechanism is exposed. Industrial height adjustable models are a metal base and leg system.

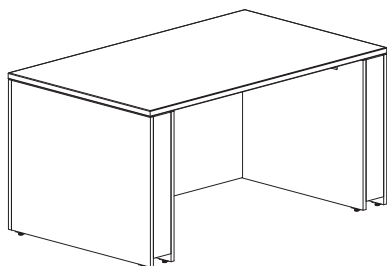

Concealed height adjustable utilizes three stage electric motors that lift up to 50 lbs of additional weight beyond the unit itself. They are available as desks. Industrial height adjustability is available in electric and pneumatic. They are available as bridges. Electric bridges can lift an additional 50 lbs of load. Pneumatic bridges can lift an additional 10 lbs of load.

Some Concealed and Industrial height adjustable units are freestanding. As such, any adjacent piece must also be able to stand alone when placing bridge next to desk. The cantilevered surface requires additional support. Conference Extension with drum or trapezoid bases cannot be placed next to Industrial height adjustable bridges. Specify a disc base, O or H leg or model that utilizes an end panel.

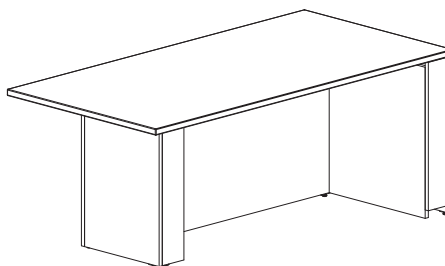

Adjustable height desking can be specified as non-handed desk shell or a handed desk.

Support brackets for non-adjustable units that are adjacent to adjustable units are sold separately.

Cushions

Kindle One cushions are designed for installation on mobile pedestals and low credenzas for an extra guest seat. The cushions use 2" thick high density foam providing maximum comfort.

Paoli - Kindle One

Low Mobile Pedestal
with Cushion

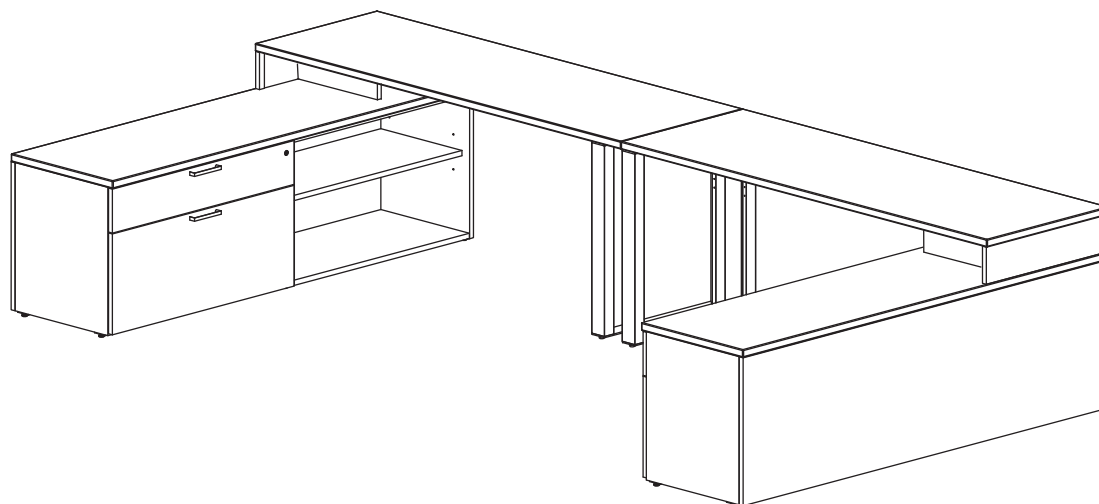

Open Plan Through Storage Based Planning

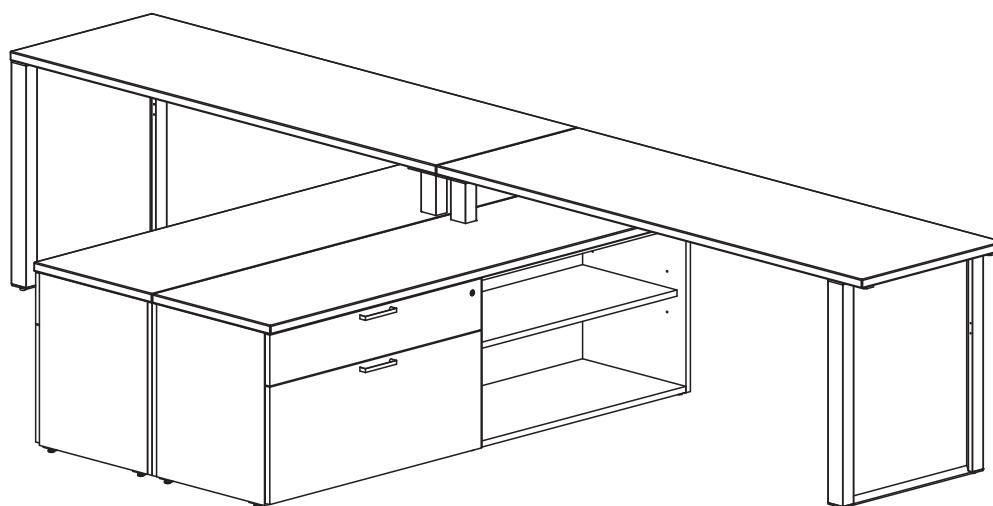

The power of Kindle One expands into the open plan through storage-based planning. You can specify with all modular components or a blend of modular and assembled depending on the application and space. We recommend you add a pedestal cushion to the top of your low credenza for additional seating.

Power is distributed via 4" air gap in the back of all pedestals which also include selectable grommets. Be sure to select a grommet for the side(s) through which you wish to pass power; otherwise field scribing will be required. The grommet location for worksurfaces align with the 4" air gap so you may specify where power needs to exit.

Hardwired power is deployed through the Byrne 4TRAC system. Power is accessed by the proprietary Kindle One slot power module or economical power blocks.

Kindle One Electrical Components

2-circuit, 4-Wire Hardwire Components

Description Model number	Lengths	Features	
Power in-feed PX72PI PX156PI	72" 156"	• Connects to building power source • Must be installed to building power by a licensed electrician • Trimmable	
Jumper PX__PJ PX__PJ	12" 18" 24" 30" 36" 42" 48" 54" 60" 66" 72" 84" 96" 108" 120" 132" 144"	• Adds length to power connection • Connects to in-feed or another jumper via duplex receptacle or 4-way splitter	
Credenza Packs PX60CP PX72CP	60" 72"	• Carries and redirects power within the credenza • Includes one unique jumper and two 4-way splitters	
4-way Splitter PXSPLIT	2"	• Accepts supply jumper and branches off to three additional jumpers • May be connected to in-feed, hardwire grommet or jumpers • Single- and 5-packs	
Duplex Receptacle Connector PXCON	2" Actual 0" Nominal	• Connects two duplexes in-line	
Duplex Receptacles PXD1 PXD2	6"	• Provides power access • Specify circuit 1 or 2 • Single- and 5-packs	

Paoli - Kindle One

Kindle One Electrical Components

Power In-Feed

Model name | PX72PI and PX156PI

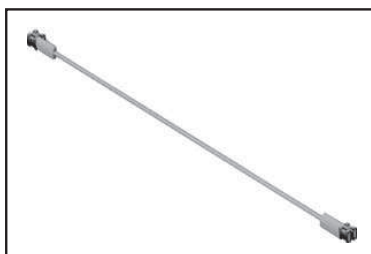

- **Overall Sizes** | Available in 72" and 156" lengths
- **Special Features** | Metal flexible conduit
- **Capabilities** | Connects to building power source; carries two 20 Amp circuits with shared neutral and shared ground
- **Applications** | Use for multi-station applications or when power needs to be routed through a storage unit
- **Must Do** | Use conduit clamps supplied to attach to furniture; must be installed by a licensed electrician
- **Must Not Do** | Cannot connect directly to a jumper (Splitter required)

Credenza Power Packs

Model name | PX60CP and PX72CP

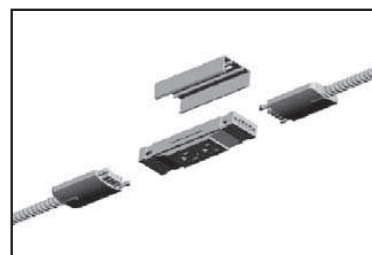

- **Overall Sizes** | Nominal to 60" or 72" credenza
- **Special Features** | Provides three open connection points on each end
- **Capabilities** | Connects to in-feeds, jumpers, or hardwire power hubs
- **Applications** | Use behind a credenza to route power along the floor and/or up to the worksurface
- **Must Do** | Secure to the back of the credenza per the instructions. Use a 24" jumper to connect one credenza power pack to an adjacent credenza. Must specify vertical power delivery separately

Duplex Receptacles

Model name | PXD1 and PXD2

- **Overall Sizes** | Planning length of 6"
- **Special Features** | Circuit 1 and circuit 2
- **Capabilities** | 2 simplexes; 15 Amp capacity. Max 13 per circuit
- **Applications** | Duplex receptacle brackets allows mounting to worksurface, external channel, or wire management tray
- **Must Do** | Connect to jumper, infeed, or duplex connector. Must balance power usage between circuit 1 and circuit 2
- **Must Not Do** | Cannot connect directly to another duplex receptacle

Jumper Cables

Model name | PX __ PJ and PX __ PJ

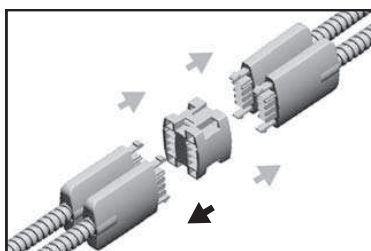

- **Overall Sizes** | 12" to 144"
- **Special Features** | Metal flexible conduit
- **Capabilities** | Carries two 20 Amp circuits with shared neutral and shared ground
- **Applications** | Use for multiple workstation layouts or when electrical is routed through a storage unit
- **Must Do** | Use conduit clamps supplied to attach to furniture
- **Must Not Do** | Cannot connect directly to another jumper (Splitter required)

4-Way Splitters

Model name | PXSPLIT

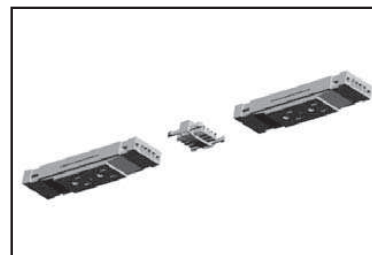

- **Overall Sizes** | Planning length of 2"
- **Special Features** | Three open connections in addition to the supply jumper
- **Capabilities** | Accepts supply jumper and branches off to three additional jumpers
- **Applications** | Use as both a coupler and a 4-way splitter
- **Must Do** | Connects to jumpers, infeeds, or hardwire power hubs only
- **Must Not Do** | Cannot connect directly to duplex receptacles

Duplex Receptacle Connector

Model name | PXCON

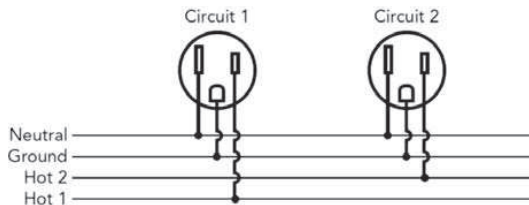

- **Overall Sizes** | 2"
- **Special Features** | Allows two duplex receptacles to be connected in-line
- **Capabilities** | Increases plug-in capacity. Connects to both Circuit 1 and Circuit 2 duplex receptacles
- **Applications** | Acts as a 0" jumper

Determining Your Power Needs

Enhanced Power (Hardwire)

- Hardwire supplies two circuits with 20 Amp capacity each*
- Hardwire power must be specified when:
 - Routing power through any lockable storage unit
 - A single 20 Amp circuit does not provide adequate power capacity
 - A robust power solution with integrated metal shielding is desired
- Hardwire power can be used in conjunction with softwire grommets in most worksurface applications

*Limit actual power usage to 80% of capacity.

Basic Power (Softwire)

- Softwire power performs the same function as a power strip
- Softwire power carries a single circuit up to 20 Amps
- Softwire power must remain accessible at all times per national and local electric codes
- Kindle One offers softwire power grommets in two styles:
 - Power hub, 3" grommet mount which fits flush to the worksurface
 - Desktop Power/Data module for above-worksurface mounting with data versions

Power Delivery

Power may be delivered to the user via hardwire power hubs located in the credenza or worksurface; or via specified jumpers and duplexes. Softwire power hubs can be connected to hardwire duplex receptacles

Circuit Capacity

- Hardwire supplies two circuits with 20 Amp capacity each.* Each circuit may contain a maximum of 13 duplexes
- Power usage should be balanced between first and second circuits by correct specification of circuit number on hardwire models with duplex receptacles or simplexes

Typical power usage by the most commonly specified office equipment.

Equipment	Amps	Equipment	Amps	Equipment	Amps
Computers		Copiers		Fax Machines	
Personal Computer	3	Desktop Copiers	15	InkJet Fax	less than 1
Notebook Computer	3	Console Copiers	20	Plain Paper Fax	20
		Copier/Duplicator	30	Copier/Duplicator	30
Monitors		Printers		Task Lights	
13" Color Monitor	2	InkJet	less than 1	30" T5 Fluorescent	0.12/bulb
17" Color Monitor	3	Personal Laser or LED	8	60" T5 Fluorescent	0.24/bulb
21" Color Monitor	4	Workgroup Laser or LED	15		
15" Plasma Monitor	0.5				
20" Plasma Monitor	1

Connecting Power to a Row of Power-Ready Credenza at In-Feed

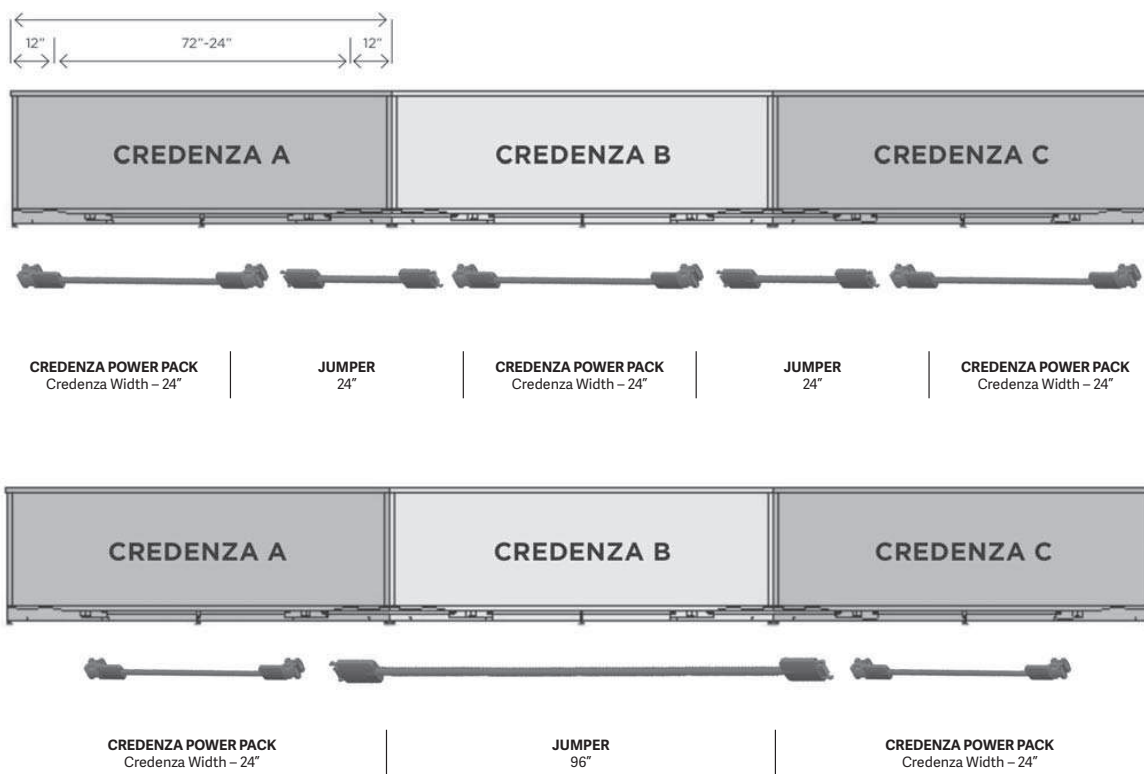

Credenza Power Pack

- Each power-ready credenza will require one credenza power pack if power is desired
- Physical length is 24" less than the case
- Use a 24" jumper when connecting adjacent credenza power packs
- Connects to in-feeds, jumpers, and hardwire power hubs

Passing Through a Credenza

- When passing through a middle credenza, a jumper can be specified instead of a credenza pack. Jumper length should equal the distance between powered credenzas + 24"
- When Credenza B is a pass-thru, jumper length, L is always Case Width + 24"
- Example: Credenza B is 72", therefore $72" + 24" = 96"$ jumper

Paoli - Kindle One

Please Note: Above graphics represent credenzas from the back.

Routing Power Individual Worksurfaces Using Jumpers and Duplexes

A La Carte Solutions

Powering an individual worksurface requires "a la carte" ordering. Once a power in-feed is established, routing hardwire power below the worksurface is accomplished with the combination of jumpers, 4-way splitters, and duplexes. This combination will vary based on the size of the worksurface. Mounting hardware is included with all components.

Transitioning from Hardwire to Softwire

In addition to hardwire duplex receptacles and hardwire power hub, power can be supplied to the user through the use of a softwire power hub or softwire desktop power/data module. These devices have a standard 3-prong cord that may be plugged into a hardwire duplex or directly into a wall outlet.

Planning Increment

Jumpers are available from 12" – 144." Duplexes add 6" of length, 4-way splitters add 2" of length.

Routing Power Between Continuous Worksurfaces.

Running Past O-Legs

The hardwire jumpers and in-feeds are made with flexible metal conduit and easily bend to run beneath the mounting plate of an O-leg. Do not plan any additional jumper length.

Vertical Transitions

When routing hardwire power between the floor and worksurface height, plan to use 36" of jumper length for the vertical transition and associated bend radius. When connecting to a credenza power pack, plan no less than 48" of jumper length. O-leg cord clips are available to manage cable running up an O-leg.

Routing Power to Perpendicular Worksurfaces

Jumper Length

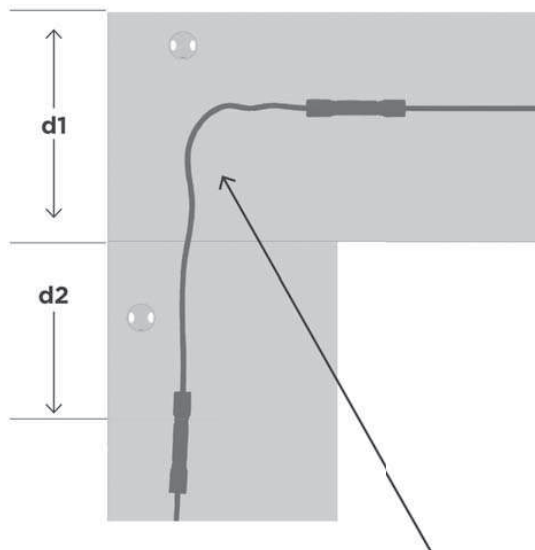

To calculate jumper length required to turn a corner under a worksurface, use dimensions d1 and d2 shown in the illustration in the following formula:

$$\text{Jumper length} = d1 + d2 - 6$$

Tips

Dimension d2 is recommended to be 18.0" minimum for compatibility with all types of worksurface supports.

Example:
d1 = 24" d
worksurface
+
d2 = 18" duplex
position
-
6" = 36"
jumper length

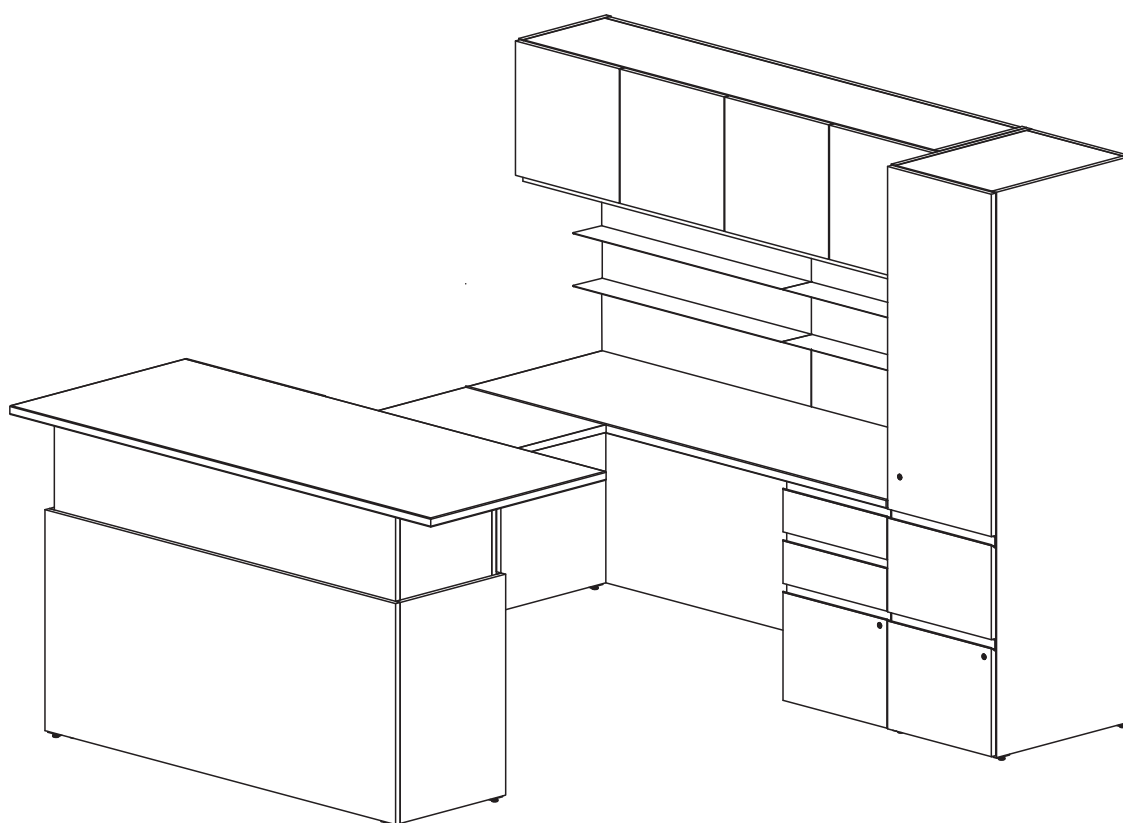

Jumper length = d1 + d2 - 6
When duplexes are 18" from edge.

Kindle One Typicals

How to Use Typicals

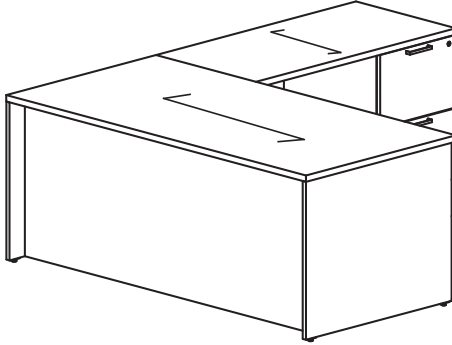

Paoli typicals are a collection of thought-starters intended to show the range of capabilities within a product series. The following pages showcase a variety of Kindle One typicals demonstrating the versatility and range of this powerful casegood series.

PXLC	\$ 12
Specify Metal Finish/Key Number	
Master Key	
PXMK	\$ 5
Change Key	
PXCK	\$ 10
Plunge Lock Core	
PXPLC	\$ 12
Key numbers available for locks are X100T-X250T. Please calculate the total number of locks you need to order. Then calculate how many must be keyed alike. Select the same key number for each of the locks you would like to be keyed alike. For example, if you need 15 locks ordered for your office with 5 keyed alike for one office and 10 keyed alike for another office, it would look like this: 5 - PXLC.X101T, 10 - PXLC.X102T	
Specify Key Number

Notes

This image shows a full page of blank graph paper. The grid consists of thin, light gray horizontal and vertical lines that intersect to form small squares across the entire surface. There are no margins, text, or other markings on the paper.

Notes

This image shows a full page of blank graph paper. The grid consists of thin, light gray horizontal and vertical lines that intersect to form small squares across the entire surface. There are no margins, text, or other markings on the paper.
