Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

The beauty of wood is the natural variation of grain patterns and colors that make each piece unique. This variation is also influenced by lighting conditions, orientation of mated parts, and varying acceptance of the finishing process. The varying colors and physical characteristics naturally occur in all wood species but are most pronounced in lighter colored woods, and are especially evident in natural finishes.

GROMMETS ON VENEER WORKSURFACES

Wire management grommets come standard on most veneer worksurfaces. Choose between metal or plastic grommet option. Note: Plastic grommet color is predetermined based on finish selection.

COM Policy

COM Program

Allsteel understands that customers may at times want to specify fabrics outside of Allsteel's standard fabric offering. Our COM program was designed to make specifying COMs on Allsteel products a simpler, friendlier, and hassle-free process. This process is simple and easy to use, and is described below under "Allsteel to Supply." If a Dealer wishes to manage the COM process themselves, they can do so by following guidelines under "Dealer to Supply". Find out more about Allsteel's COM process by emailing our COM Department at **ASICSCOM@allsteeloffice.com**.

Allsteel to Supply:

1. Select the fabric you wish to use and check the COM Search on Synergy. You need the COM supplier's name, fabric pattern name, and color name to search for approved fabrics.
2. If your fabric is listed as an approved fabric, you may place your order directly with Allsteel Customer Support. Please use the fabric code (e.g., S216426XP) from the COM Test Request on your order in the place of the standard fabric code. **Make sure to mark on the top of the order "Allsteel to Supply."** If your fabric is not listed as approved, you will need to select the "Request COM Test" link on the COM Search website. Allsteel will arrange to obtain test fabric and you will be notified of the results within 3 to 5 working days of receipt of the test yardage by Allsteel.
3. If the fabric is approved, you will receive an email summary from Allsteel with the correct price grade and fabric code for order purposes. Written COM price quotes hold pricing for 90 days after issue date.
4. Once the fabric has been approved by Allsteel, enter your order directly with Allsteel Customer Support. Allsteel will purchase all COM fabric directly from the COM suppliers and schedule for production.

   In the event that the Dealer decides to cancel a COM fabric order, the Dealer is responsible for the cost of the fabric plus a handling charge that is equal to 10% of the fabric cost.

Dealer to Supply:

1. Select the fabric you wish to use and check the COM Search on Synergy or call Allsteel Customer Support to see if the fabric you have chosen has already been tested and approved on the product you are interested in.

   You need to have the COM supplier's name, fabric pattern name, and color name for this inquiry.
2. If your fabric is listed as approved, and it is not a Partnership fabric, you may request a "Dealer to Supply" code and estimate the yardage required by using the yardage requirements listed in the price list by model. For questions please contact Allsteel Customer Support.
3. If your fabric is not listed as already tested and approved, you will need to complete a COM Test Request on Synergy. You will need to arrange for the test fabric to be sent to:

   HNI Fabric Testing
   Attn: COM Dept.
   2210 2nd Avenue
   Muscatine, IA 52761

   Allsteel requires 3 yards of fabric and 2 memo samples for each panel system fabric being tested; and 4 - 8" x 8" memo samples for all seating testing. You will be notified of the test results within 3 to 5 working days of receipt of the test yardage by Allsteel.
4. Make sure to use a "Dealer to Supply" COM code (e.g., S216426ZP) and place your order directly with Allsteel Customer Support.
5. All "Dealer to Supply" orders will be charged Grade 4 pricing for seating, Grade 3 for Gather, and Grade D pricing for panels. Dealers will pay for the COM fabric separately.
6. All "Dealer to Supply" fabric must be sent on a fabric roll.
7. Place your fabric order directly with the COM Supplier with instructions for the fabric to be sent on a fabric roll to:

   HNI Fabric Distribution Center — Dealer PO Number
   COM Production Yardage
   Docks 20-22
   200 Oak Street
   Muscatine, IA 52761

   Information that MUST be included in the packing slip attached to the fabric:

   1. Dealer's Purchase Order number to Allsteel
   2. Allsteel's Tracking number for the COM fabric
   3. Dealer Name
   4. Yards of Fabric

   If the fabric shipment does not match the correct fabric and yardage, Allsteel will notify the Dealer for resolution.

   If Allsteel receives fabric with incorrect labeling that cannot be linked to an Allsteel furniture order, Allsteel will hold the fabric for up to 7 days, while the COM Expeditor attempts to identify the order. After 7 days, Allsteel will return the fabric to sender. There are no exceptions to this policy.

   Any cancelled orders are subject to cancellation charges up to the full value of the Allsteel product cancelled. Allsteel will determine the actual cancellation charge at the time the cancellation is requested.
8. For additional details on "Dealer to Supply" fabric refer to your Allsteel terms and conditions.

Additional Policy Information:

The company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality standards. The Company reserves the right to reject a COM if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation within 7 working days of receipt of test materials.

The company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to the manufacturer from the COM supplier. Excess yardage will be disposed of at Allsteel's discretion.

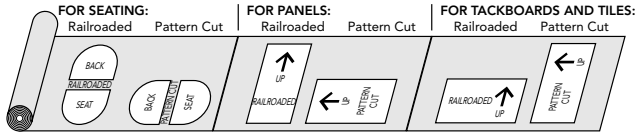
All cancellations or changes to COM orders are subject to Company approval. Because of the nature of COM, special fabrics, finishes, and structural modifications, products ordered as specials and then cancelled prior to shipment are subject to cancellation costs up to the full value of the product cancelled. The company determines the actual cancellation charge at the time the cancellation is requested. Upon approval, a cancellation number is issued to the Customer.

Purchase orders will not be accepted or entered unless the testing process is complete with positive results.

If all testing has been previously completed, re-testing is only necessary if fabric is to be used on a different product, or pattern direction has changed from that previously approved.

Previous test results can be obtained by a customer on the COM Search on Synergy or by calling Allsteel Customer Support. COM testing will require 3-5 working days from receipt of test yardage.

COM testing will require 3-5 working days from receipt of test yardage.



All COM fabric will be applied to seating and panel systems Pattern Cut unless Railroad Cut is requested and approved on the COM Test Request. Any fabrics approved as a width pass, the dealer is responsible for clarifying Railroad Cut on orders containing items that are too large to support the Pattern Cut of a fabric application (any items larger than 48" high or wide).

Fire Retardant

The Dealer is responsible for ensuring that the COM fabric is certified to meet all flame retardant requirements.

For more information, please contact Allsteel Customer Support.

YARDAGE REQUIREMENTS FOR FABRIC WITH REPEATS — FOR USE ON GATHER™ PRODUCTS

Fabric Width	Plain Fabric	2"– 14" Repeat	15"– 19" Repeat	20"– 27" Repeat	28"– 36" Repeat
54"	0	+15%	+20%	+25%	+30%
53"	+6%	+19%	+24%	+28%	+36%
52"	+13%	+23%	+28%	+33%	+38%
51"	+19%	+26%	+31%	+36%	+41%
50"	+25%	+30%	+35%	+40%	+45%
49"	+30%	+35%	+40%	+45%	+50%
48"	+35%	+40%	+45%	+50%	+55%
47"	+45%	+50%	+55%	+58%	+65%

Depending upon the pattern repeat, it may be necessary to pattern cut the fabric. This will require 10% additional fabric.

To calculate multiple repeats (vertical and horizontal), add each repeat for total yardage required. For example for a fabric width of 54": 7" vertical requires 15%, 15" horizontal requires 20% total additional yardage required equals 35% (15% + 20%). Therefore, if your chair requires 2 yards of fabric, multiply 2 by 35%. Then 2.7 yards will be yardage required.

Special Paint & Stain Policy

Allsteel at its own discretion may modify its standard products with non-standard paint and stain colors to meet specific needs. Dealer is required to submit a special paint or stain request via the COM Search on Synergy. A sample of the non-standard paint or stain color desired will be required for matching. Pricing, lead time, and order information will be provided at the time of approval.

- For each new requested stain or paint, there will be a $500 net fee to cover supplier costs to match the special item.
- For existing, previously-approved stains or paints, there is no $500 matching fee, however, there is a sample chip fee of $175 net for stains and $100 net for paints.
- Samples, preferably at least 3" x 5" chips, of the exact color desired should be sent to the Allsteel Tailored Products Group. Paint matches require (3) sample chips and stain matches require (3) sample chips. Please mail these sample chips to the address below and reference the Special Item Request Number from Tailored Solutions.

  Allsteel Inc.
  Attn: Tailored Products Group
  2210 Second Avenue
  Muscatine, IA 52761

- Allsteel will color match the sample and send control samples to the address provided in the request. Dealer will review Allsteel's color match and approve by signing the back of the sample chip. Send the signed sample back to the Allsteel Tailored Products Group.
- Special paints will be assigned a paint price grade.
- Orders will not be accepted until Allsteel receives the Dealer's written approval on the color match.
- Extended lead times will apply on orders containing special paints or stains.
- Due to manufacturing techniques, materials, and quality issues, some exclusions will apply and some matches may be declined.

Important Notes

- Natural veneer is subject to nature's quality control. Differences in grain and color are naturally occurring variations and cannot be controlled by the manufacturer and cannot be considered as product defects. Natural veneer has the characteristics and beauty of a living organism; with its own variations of grain, growth, and color patterns. For these reasons, Natural veneer is preferred by many for its warmth and personal characteristics.
- Color changes will occur over time when wood is exposed to light. For this reason, when new product is ordered as an addition to existing product, there will be color variances between the old and new product. Please remember when specifying new product that although the species of veneer will be the same, additional product is being manufactured from a different tree. It may take several months for the new furniture to mature to the color level of existing product. Even with this maturation process the additional product will not be an exact match.

Special Laminate Policy

The Company at its own discretion may modify its standard products with non-standard laminates to meet specific needs. Contact the Allsteel Tailored Products Group for pre-approved Wilson Art laminates and pricing for special laminates. When requesting a special laminate please supply manufacturer, along with name and pattern number of laminate.

- Extended lead times will apply on orders containing special laminates.
- Due to manufacturing techniques, materials, and quality issues, some product exclusions will apply and some requests may be declined.

Veneer Care Instructions

Veneer worksurfaces feature the Gunlocke® finishing system. The finishing system is a process that begins with the application of stains, which promote exceptional depth and clarity. Next the worksurface receives a specialized coating that provides exceptional durability and chemical resistance. The remaining surfaces receive a top coat. These finishing processes ensure depth, clarity, color consistency and durability throughout the product.

Veneer worksurfaces have exceptional resistance to:

- Heat and moisture (hot beverages, pizza boxes)
- Chemicals (liquid paper, nail polish)
- Stains (permanent markers)
- Scratches and impact (everyday wear and tear)

Caring for your veneer finish:

- General maintenance procedures entail wiping clean the entire surface with a clean, water dampened soft cloth once per week (be sure to wipe with the grain)
- Murphy's® Oil Soap may be used as a general purpose type cleaner with warm water to clean tops.
- The finish may also be polished with Guardsman® Furniture Polish (contains no waxes or silicones) to provide renewed luster.
- Be sure to wipe up all spills immediately. Do not allow spills to dry.

Wood owes its inherent beauty to variations in color, grain and texture, and therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next even though they are finished at the same time. Exposure to light and the aging process will cause a darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. Allsteel does not guarantee the exact matching of grain, pattern and color.

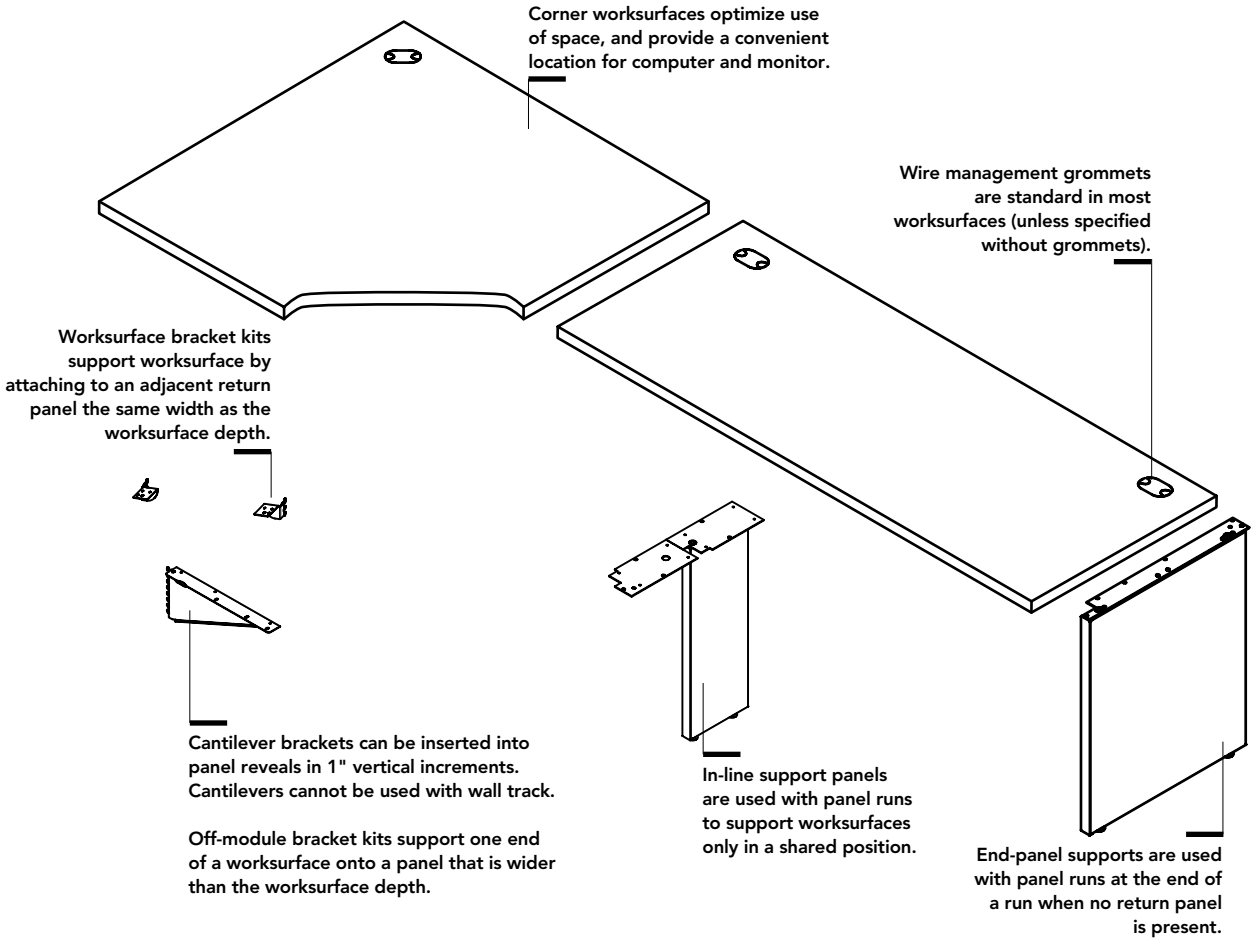
Laminate worksurfaces are 1¼" thick with particle board core and with top surfaces finished in high-pressure laminate. Bottom surfaces are covered with a backer sheet. Wall track allows for mounting of systems panel components on permanent wall structures.



Worksurfaces can be configured at 29½"H or 26½"H with end-panel supports and in-line support panels, or at various heights on 1" increments using specific product configurations.

Worksurface support options include:

- Support column*
- Off-module bracket kit
- Flat brackets
- External support channel
- Worksurface bracket kit
- Height adjustable mechanism
- Cantilever bracket
- In-line support panels*
- End support panel*
- Support storage units*
- Storage unit with stanchion*
- C-Legs*
- Post Legs*

*Units provide floor support.

Support Guidelines - See Drawings on page 86

- Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.
- When using overheads in panel mounted worksurface run applications 72" and greater, floor support* is required. (See list at left.)
- When using overheads at the end of a panel run, floor supports* are required.
- Worksurface bracket kit should be used to tie panels to worksurface for added stability.
- A return panel at the end of a panel run can be substituted with one of these floor supports: storage, open or closed end support panel, O-leg.

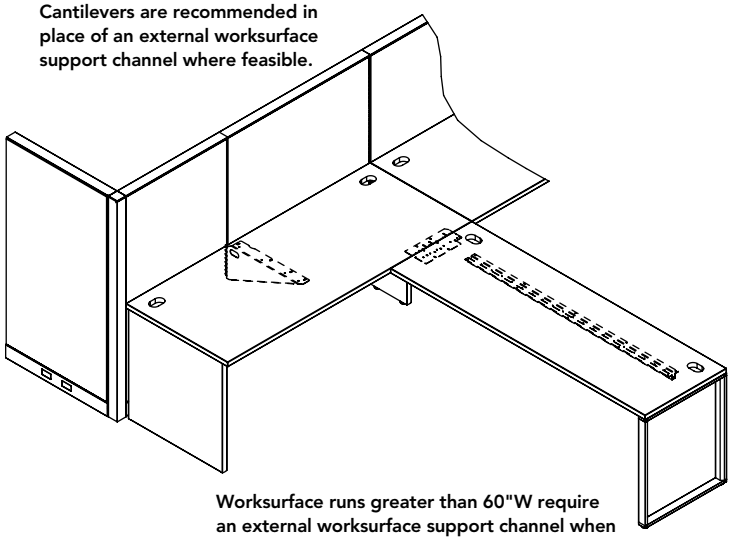
Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return or floor support.

Cantilevers are recommended in place of an external worksurface support channel where feasible.



Worksurface runs greater than 60"W require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48"W. See pages 95 and 134.

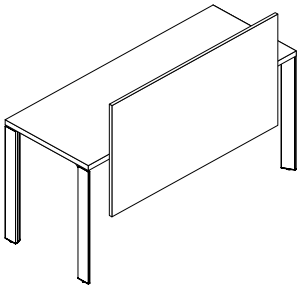
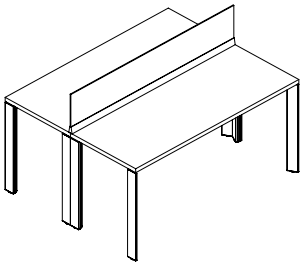
Stride® — Working with Screens and Modesty Panels

GSA Reference Page

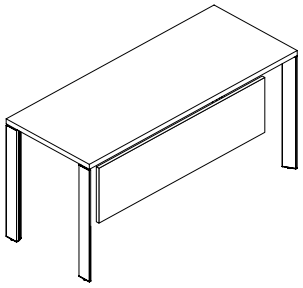
Desk screens and modesty panels provide light-scale space division. There are four options available: full desk screens, shared desk screens, desk modesty panels, and leg modesty panels.



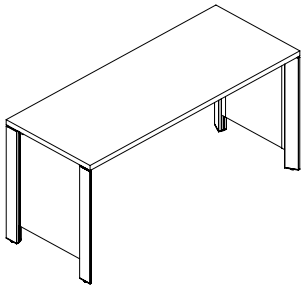
Full desk screens extend above and below the worksurface acting as both a screen and a modesty panel. They are 28"H and available in painted wood or painted wood with fabric Insert. Landscape™ surface material will soon be available as an additional finish option.



Shared desk screens are for use above the worksurface in a back-to-back application for added privacy. They are 13"H and are available in ⅜" Clear or Frosted Glass.

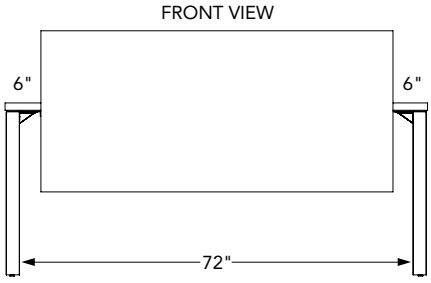


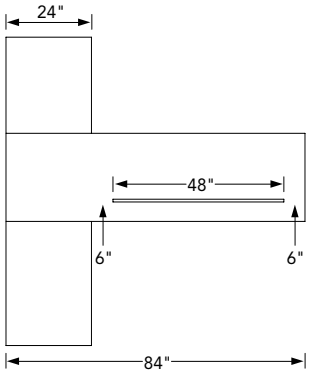
Modesty panels are for use below the worksurface. They must be used with Stride desking worksurfaces or a systems worksurface with an external support channel installed. An optional worksurface wire manager conceals hardware. They are 14"H and available in ¾" thick painted wood or ¼" thick Landscape surface material.



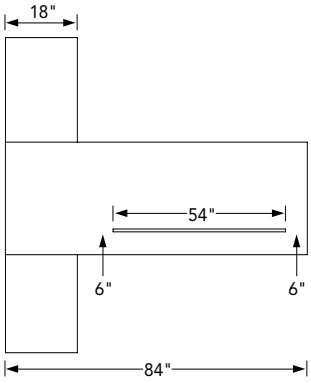
Leg modesty panels are used between two post legs on either a 24"D or a 30"D worksurface. They are 29"H and are available in Landscape surface material.

Specification Rules for Desk-Mounted Screens and Modesty Panels





High Credenzas — TOP VIEW



Low Credenzas — TOP VIEW

Freestanding Table Applications:
Subtract 12" from the size of the table/worksurface to get the recommended screen or modesty widths.

Example for an 72"W table: 72" – 12" = 60"W

Specify a 60"W screen and center-mount on the table.

- **High credenzas** — Subtract 24" for the credenza depth and an additional 12" from the width of the worksurface to get the recommended width.

  Example for an 84"W table: 84" – (24" + 12") = 48"W

  Specify a 48"W screen and center-mount on the worksurface opening.

- **Low credenzas** — Subtract 18" for the credenza depth and an additional 12" from the width of the worksurface to get to the recommended screen width.

ORDERING

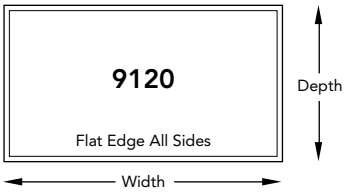
The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in ⅛" increments up to a maximum of 120" W x 36" D.

Specify:

1. **Model Number**
   Specify closest nominal width/depth model (round up).
2. **Grommet Option** (if desired)
   See grommet specification instructions on this page.
3. **Grommet Type:**
   P Plastic
   M Metal (add $11 per grommet for laminate)
4. **Grommet Color:**
   (Metal only)
   EL Matte Silver
   Note: Plastic grommet will match flat edge.
5. **Laminate and Veneer Choices**
   See inside front cover.
6. **Flat Edge Color Choices**
   See edge colors inside front cover for laminates.
7. **Exact Size**
   Specify the **exact width** and **exact depth** you require.
   Width and depth is specified in ⅛" increments which is denoted as a single digit following the whole number dimension at the end of the model number string.

⅛" =	1	⅝" =	5
¼" =	2	¾" =	6
⅜" =	3	⅞" =	7
½" =	4	no extra increment =	0

For example, when ordering a worksurface that is 34⅜"W x 20½"D, specfication should be 345Wx204D.
Example: **9120R3624.G0.TM33.EU.345Wx204D**.



PRODUCT SPECIFICATIONS

- Flat edge on all sides
- 45 lb. particle board
- 1¼" top thickness
- .020 resin impregnated paper backer sheet
- Grommets available
- Maximum width 120" (maximum recommended unsupported span is 42")
- Maximum depth 36"
- Standard Allsteel laminates andveneers
- Quantities of 10 or greater are palletized; less than 10 are individually cartoned.

Note: 9120 worksurface maximum unsupported span is 42". 9120 worksurfaces do not have pre-drilled pilot holes or threaded metal inserts.

When spanning multiple freestanding storage units with one worksurface, add ⅛" for each additional storage unit. For example, when ordering a worksurface for three 30"W lateral files. 3 units x 30" = 90" + ⅛" + ⅛" = 90¼" worksurface. Do NOT follow this rule if panel wrapping storage units.

CHANGES / CANCELLATIONS

No changes/cancellations for 9120 Program worksurfaces.

GROMMET SPECIFICATIONS

Plastic grommets are made of durable ABS plastic and grommets match edge color on laminate worksurfaces. Metal grommets are only available Matte Silver oval for laminate and square for veneer.

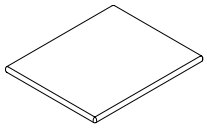
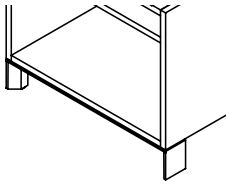
Credenza Top

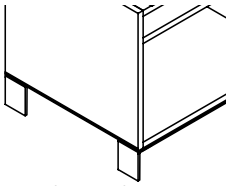
Credenza Rail



Seat Cushion



Credenza Bottom Trim



Credenza Side Trim

Credenzas ship fully assembled except for the credenza top, which must be ordered separately. Credenza tops in laminate or veneer with flat/square or rabbet edge details are available in various depths. Veneer fronts by Gunlocke®.

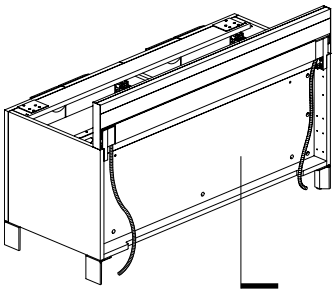
With the addtion of a credenzas rail, low credenzas act as a support for height-adjustable run off worksurfaces at 1" increments from 27½"H to 30½"H. Also provides the ability to run power and to support storage.

Laminate credenza tops, a footed base, and aluminum trim along the front edge of the credenza enchance the durability of the credenza.

A relocatable seat cushion can be placed on the credenza top of a low credenza for additional seating.

Credenza bottom trim is standard on the front of all credenzas.

Optional side trim is an aesthetic piece for end of run credenzas and is ordered separately and field installed.



All credenzas have a recessed back with a cavity to support wire management. An optional metal back should be specified separately to finish the credenza in a single-sided application where the back is exposed.

Relocatable wire trough provides a channel for wire management.

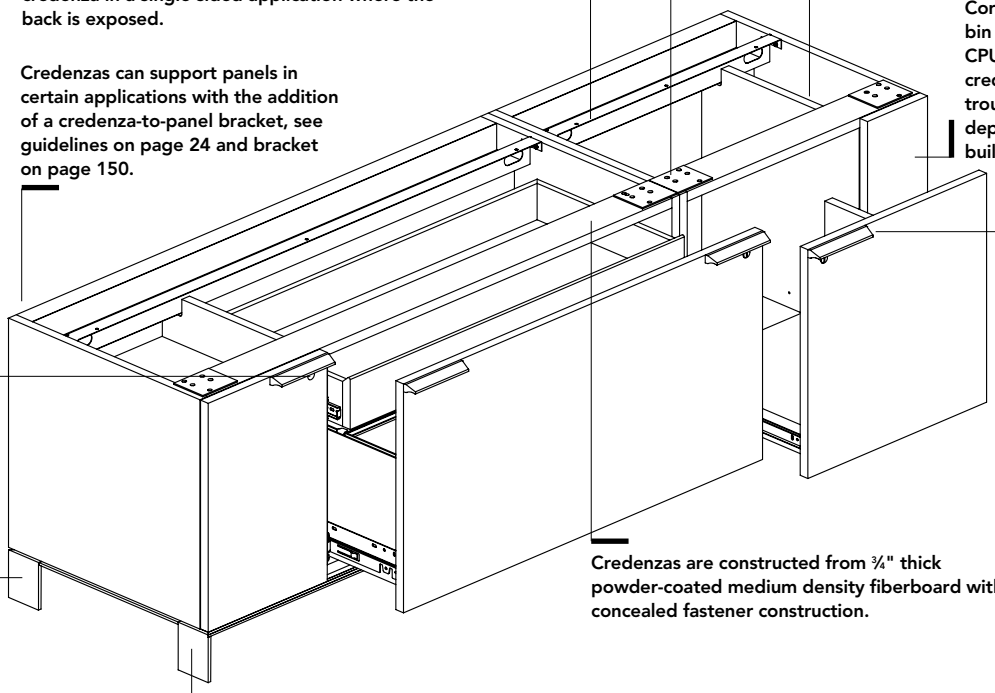
Each credenza ships with one front bracket that can be used to gang (multiple) credenzas inline.

Credenza top must be ordered separately and can span multiple credenzas.

Corner credenzas with bin when housing a CPU must be used with credenza tops for wire trough or rail (not full depth) to minimize heat buildup.

Credenzas can support panels in certain applications with the addition of a credenza-to-panel bracket, see guidelines on page 24 and bracket on page 150.

Credenzas can be shipped with lock cores removed; cores can be installed after files are in place. Core removable lock feature allows key numbers to be easily changed in the field.



All credenzas feature silver linear pulls. Pulls, feet, and bottom trim are all PR6 Silver finish.

Credenzas are constructed from ¾" thick powder-coated medium density fiberboard with concealed fastener construction.

Credenza feet have sleeves to conceal the leveling glides. Leveling range is 1⅛". The hex-head design of the stem allows leveling to be done even when the credenza is fully loaded.

Credenzas ship with the feet located at the outside corners. Alternate mounting holes are provided for front feet to be inset 4" on mid-run credenzas, during installation.

22"H Low Credenzas

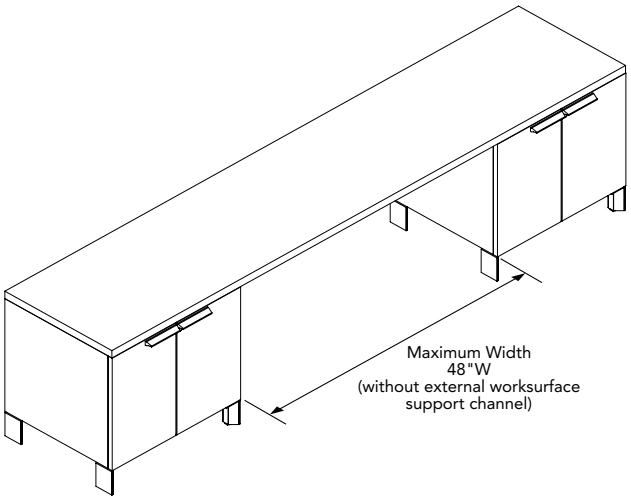
Credenza Tops:



Credenza tops are required to finish top surface of low and high credenzas.

- Credenza tops are 1¼" thick.
- Three types (depths) of credenza tops:
  - Full Depth — to match depth of the credenza.
  - For Rail — 3" less than depth of the credenza, use with credenza rail.
  - For Wire Trough — 1½" less than depth of the credenza, providing access to the wire trough and a channel for wire management when credenza is used along powered panel spine.
- Tops are available in laminate or veneer and with flat/square or rabbet edge detail.
- Veneer credenza tops are by Gunlocke®. Stratawood veneer has a consistent straight-grain pattern.Natural veneer will have cathedrals and as a natural material is subject to nature's quality control with variations in grain pattern and tone.
- Credenza tops have threaded metal inserts at the ends for attachment to credenzas.
- The maximum span of credenza tops is 48". With the addition of an external worksurface support channel the maximum span for credenza tops is 72". Note: The maximum span of standard systems worksurfaces is 60". Grommets on standard systems worksurfaces will interfere with the wire trough on credenzas.

Stride® — Working with Credenza Rail

GSA Reference Page

*The **credenza rail** is a single-sided 1½" thick frame that can be fitted atop credenza units.*

Credenza Rail (pages 174-175)

- Provides support for perpendicular run-off worksurfaces.
- When used on low credenzas, credenza rail supports a height adjustment range of 27½" to 30½" in 1" increments.
- Rail-mounted screens may be specified for added privacy.
- Channel for power and data.
- Connection point for accessories.

Guidelines:

1. The credenza rail may have only one worksurface mounted to each individual rail.
2. The credenza rail can span multiple credenzas, but must stay on-module with credenzas.
3. Credenza rail must be fully supported by a run of credenzas.
4. A worksurface can be mounted off-modular along the rail at four heights — 27½"-30½"H in 1" increments.
5. All components must be specified separately.

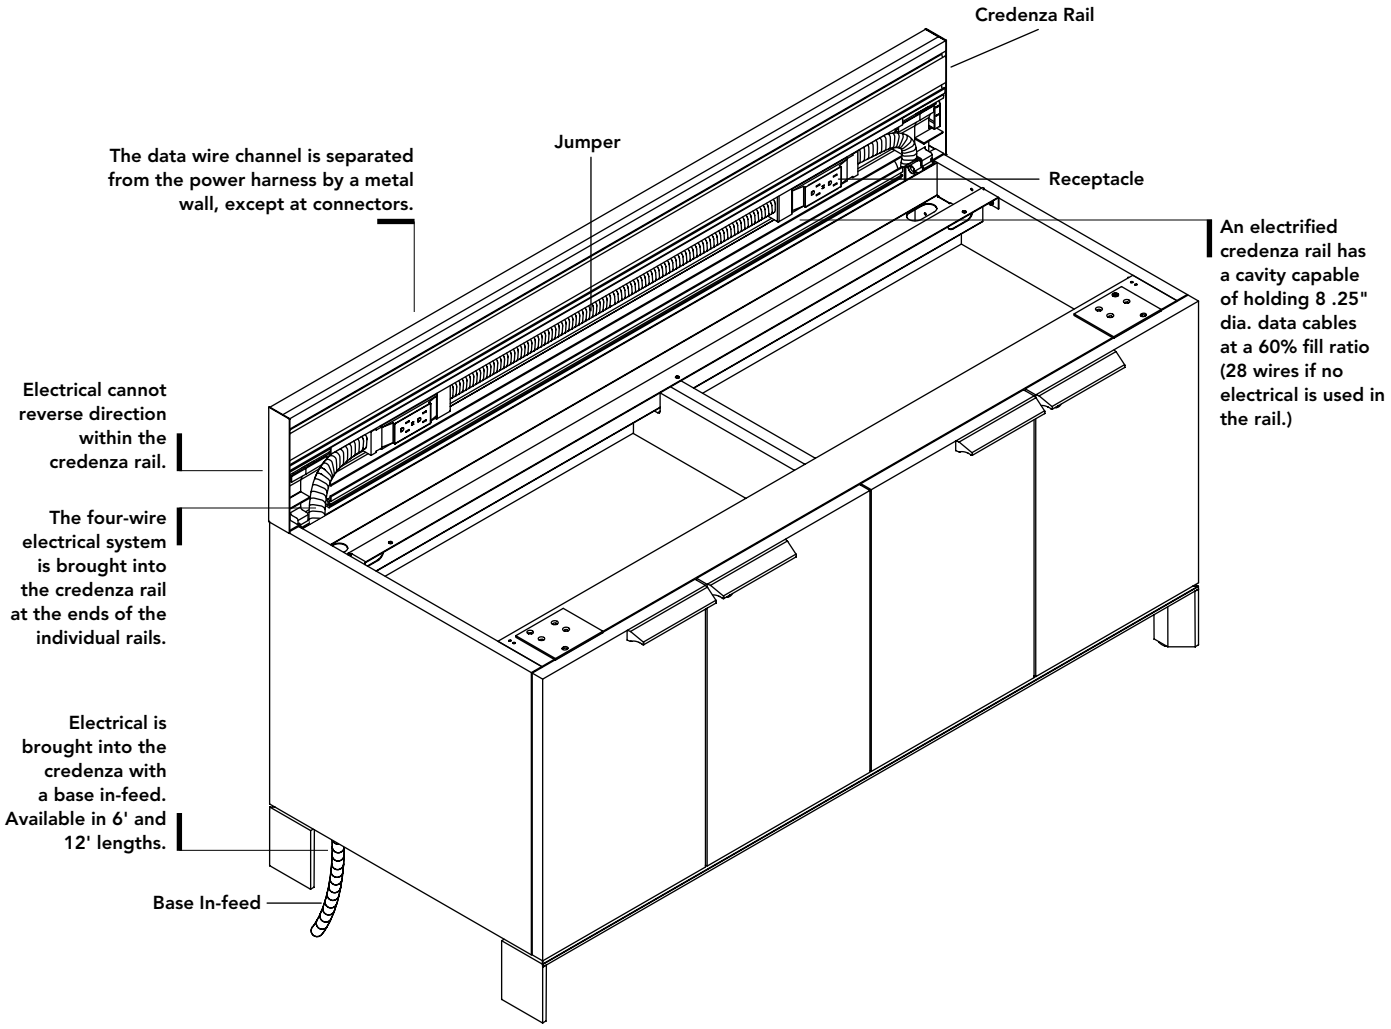
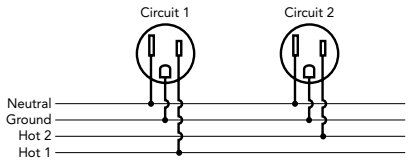
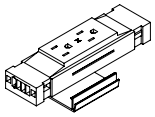
The 4-wire electrical system is a UL183-listed 2 circuit non-dedicated electrical system. The credenza rail supports continuous power and data distribution. With ported trim, the credenza rail provides easy access to power and data. In addition to the standard electrical components, PVC-free components are also available.



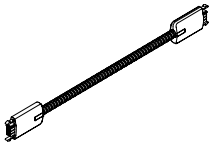
SPECIFICATION INFORMATION





Duplex Receptacle

0"W Desking Power Jumper



Desking Power Jumper

This electrical system has two hot wires, a shared neutral wire, and a shared ground wire. Each circuit is rated at 20 amps. A maximum of 13 duplex receptacles is permitted per circuit. Each receptacle is rated at 15 amps. Consult your electrician to ensure the planned electrical load is within permissible limits.

1. Determine location, quantity, and circuit number for duplex receptacles and power entry.
2. Base electrical in-feed delivers power from building to system.
3. Desking power jumpers connect together duplex receptacles or groups of duplex receptacles.

It is the customer's responsibility to ensure that the installation of the electrical components meets all local and national building codes and all other applicable regulations.

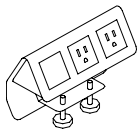
- Feed in from floor.
- UL183 listed to be exposed.
- 4-wire in-feed can enter from the end of a credenza rail only.
- Credenzas ship with clips under the case for holding in-feed off the floor.
- Select quantity of in-feed cables depending on individual power requirements.



Worksurface Power/Data Module (page 176)
- Provides easy access to technology at primary worksurface.
- Mounts to edge of a worksurface and requires ⅜" gap. Consider whether ⅜" gap will work with layout.
- Must be mounted at time of initial worksurface installation if mounting between a worksurface and a panel. Maintaining a ⅜" gap may not be possible with worksurfaces that are panel wrapped.

Wood Storage

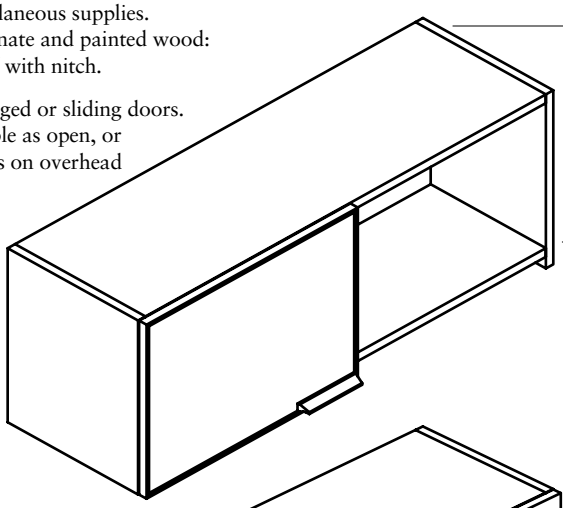
Overhead storage components maximize the use of space in the workstation and also provide convenient access to binders, reference materials, software packages, and miscellaneous supplies. There are three options available in laminate and painted wood: overhead, overhead with nitch, and shelf with nitch.

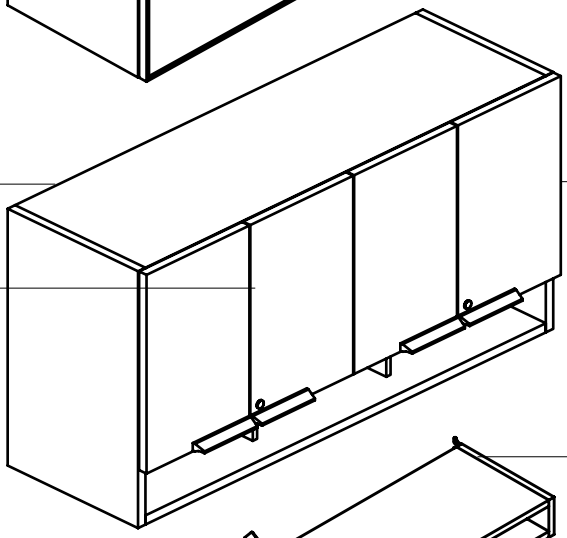
Overhead cabinets are available with hinged or sliding doors. Overhead cabinets with nitch are available as open, or with hinged or sliding doors. Door fronts on overhead storage are available in painted wood, Landscape™ surface material, or veneer.



Overhead storage cabinets can be positioned vertically in 1" increments.

When panel mounting, width of overhead must correspond to width of panel or panels joined without a connector.

Cabinets can be panel-mounted or wall-mounted with horizontal wall mount brackets but cannot be upmounted.

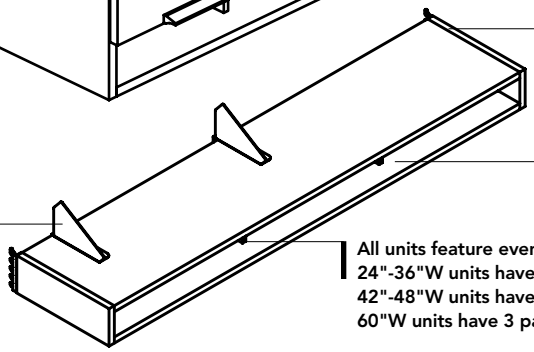


Fully enclosed backs on all units

When panel-mounted, overhead storage cabinets can be positioned vertically in 1" increments.

Core removable locks allow ability to key alike. Omit lock core option available.

Locking Clip feature secures storage cabinets to panel.



Shelf with nitch can be panel or wall-mounted. Wall mounting requires 16"W wall studs.

3⅞"H opening to provide paper management organization.

Two infinitely adjustable dividers allow user to determine configuration.

All units feature evenly spaced partitions.
24"-36"W units have 1 partition;
42"-48"W units have 2 partitions;
60"W units have 3 partitions.

Lateral File (pages 230-231)
- Top cell is available with hinged doors or an open shelf.
- There are two lateral drawers in the lateral file.
- Rails for letter-sized hanging files are provided.
- Lateral file is available 36"W or 42"W and is 18"D x 42½"H.

Painted Wood Mobile Pedestals (pages 230-231)
- Handedness is determined by user's side, placing the pull on the side closest to the user. Specify a left unit to be on the user's left side (pull will be on the right side of the unit); specify a right unit to be on the user's right side (pull will be on the left side of the unit).
- Mobile pedestals are 22"H. They can be used underneath the bench. Support pedestals do not fit underneath the bench.
- Mobile pedestals have four casters — two are locking.
- Ships with counterweight kit.

Seat Cushion (page 232)
- Can be placed on top of toybox or combination storage to provide quick and convenient seating.
- The seat cushion is not permanently affixed.
- COM yardage for seat cushion is 1 yard.

Tackable Cantilever Storage Accessory (page 232)
- For use on back side of single-sided cantilever storage only.
- Available in two heights to match the height of the storage unit.
- Provides tackable surface on the upper portion on the back side of single-sided cantilever storage unit.

Worksurface Mounted Rail (page 233)
- Aluminum extrusion designed to mount to flat edge worksurfaces. Comes with rail and hardware for mounting.
- Mounted rail extends ¾" on underside of worksurface which may interfere with the mounting of storage.
- Widths available 12" through 96" in 6" increments.
- Passes behind worksurface bracket on tethered applications.
- Can span ganged worksurfaces in tethered applications.
- For freestanding applications rail should be 6" shorter than worksurface (i.e. 54" rail for 60" worksurface).
- Not recommended for use on panel systems due to fit up issues created with worksurface and panel.

Rail Mounted Accessories
Not recommended for use on panel systems due to fit up issues created with worksurface and panel. Adding accessory rail shifts worksurface — 3/16" away from panel along that edge. Forcing worksurface into place crushes fabric tile and with tiles of other material (steel, marker board, etc) is likely to scratch, dent, or otherwise damage tile during installation.

U9TM Phone/Tablet Stand (page 233)
- 6⅝"H x 4¾"W and angles back 1¾".
- Has a ¼" x 1" slot in bottom flange to allow for routing cables. Requires 1¾" space behind worksurface edge in order to be used.

U9TP Pencil Holder (page 233)
- 2⅝"H x 6"W x 3"D.
- Holds approximately twenty #2 pencils.

U9TS Rail Mounted Shelf (page 233)
- 8"W x 4½"D and sits 2⅝" higher than top of worksurface.
- Holds up to 8 pounds.

U9TF Vertical Paper Tray (page 233)
- Sits 12"H x 1½"W x 12"D from back of worksurface.
- Folder front stands 9" high from worksurface top, 1¼" space holds about 280 sheets of copy paper.

ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's **Partnership Program** consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, allsteeloffice.com.
