Michelle Adcox
University of Mississippi Medical Center

Dear Michelle,
PaperSave is proud that the University of Mississippi Medical Center is considering **PaperSave** as a Document Management solution for Raiser's Edge/RE NXT. For over 13 years, PaperSave is the only document management solution which offers a seamlessly integrated document management solution for the Raiser's Edge/RE NXT.

The integration is unparalleled and extensive and difficult to replicate without a significant investment. From a capture perspective, PaperSave offers integrated document capture with vital processes such as Gift Processing which automatically files the document to the respective gift record as the transaction is being created in RE Batch. Documents can also be added using other capture methods right within the RE user interface.

PaperSave offers other unique features such as the Query integration which allows a group of documents to be retrieved based on RE:Query results with a PaperSave Plug-In. This feature alone helped Washington and Lee University save over 4 business days a year by pulling supporting documents for their auditor. Another aspect of the unique integration is when records are merged using the Blackbaud merge tool. With PaperSave, the documents are merged simultaneously.

The PaperSave for Raiser's Edge solution for .only available directly through WhiteOwl, the developer of PaperSave

If you have any questions, please do not hesitate to contact me.

Sincerely,

DocuSigned by:
