Re: *Sole Source Letter*

Dear Ms. Bray:

Net Health Systems, Inc. ("Net Health") is currently providing annual maintenance and support services relative to perpetual licenses previously licensed to the University of Mississippi Medical Center.

Net Health is a software company providing solutions for specialized outpatient care, offering fully interoperable EHR solutions for specialty markets. The AgilityEH software is Net Health's hospital employee health software. AgilityEH allows for tracking, notification and reporting of employee injuries, illnesses and vaccinations while keeping employee records confidential.

Net Health is the sole source of support and maintenance services relating to the AgilityEH software.

Sincerely,

A handwritten signature in black ink, appearing to read "JMB", with a long, sweeping horizontal line extending to the right.

John Michael Bonasso
