

TENA® *Dry Comfort™* Pads

For light to maximum bladder and/or bowel leakage protection.

White, **OVAL-SHAPED ELASTICS** hug the body, creating a comfortable seal for greater protection. The oval shape of the elastics create a bowl shape, which provides improved containment, wearer security and comfort.

CONTOURED CORE is less bulky and more comfortable for the wearer. It contains Superabsorbent microbeads that "gel" fluid away from the body, for greater security and skin dryness.

WETNESS INDICATOR (on back) alerts caregivers that the pad has been soiled and needs to be checked.

PRODUCTION CODE allows for tracking of the production date and time for increased quality control.

TENA® Dry Comfort™ Pads

Absorbency levels range from light to maximum bladder and/or bowel leakage protection
