

FX-R Turnouts (Coat and Pant)

The items on this page are required for NFPA 1971 compliant coats and pants

The only gear in the industry utilizing Active Posture Design™ (APD). APD is a collection of design elements that are specifically designed to minimize firefighter stress and fatigue by focusing on achieving firefighter comfort & mobility through design rather than by oversizing the garment. This reduces material and bulkiness getting the firefighter in the ready position with design features targeting the center point of a typical firefighter's full range of motion.

FX-M Turnouts (Coat and Pant)

The items on this page are required for NFPA 1971 compliant coats and pants

The latest in the Fire-Dax line of turnouts, FXM features a modern tapered hem coat that is longer in the back and shorter in front giving you maximum coverage where you need it, and just as importantly, less where you don't. In addition, a seamless crotch gusset provides less restriction and more durability
