Storage Solutions

Steelcase

EFFICIENT ORGANIZATION

Diagnosing user needs and providing efficient storage solutions is important. When not done effectively, users can waste time packing and unpacking, and looking for information and tools.

We also understand people need to store both personal and work-related material. That is why our portfolio of storage is designed to accommodate a variety of items, in different shapes and sizes. So whether you are storing your mobile devices, handbags or archived project documents, Steelcase storage can support all your needs.

UNIVERSAL STORAGE

Manage your information with our most comprehensive and versatile storage system. Universal Storage is designed to seamlessly integrate and simplify the process of choosing compatible storage products without compromising choice. Select from a virtually endless family of sizes, interiors and aesthetic options. And it's all changeable, so your storage can evolve with you.

VERSATILITY IN PLANNING AND APPLICATION

- A wide variety of case heights, widths and depths enhance planning flexibility and support efficient use of space.
- Removable tops enhance aesthetics through the use of wood or laminate.
- Laminate fronts are available on all Steelcase storage.
- Three different feet options are available on Steelcase storage.

VISUAL CHOICE AND ALIGNMENT

- Three front styles available on all product types. Fronts are interchangeable on all cases.
- Proud fronts (both steel and wood) offer four handle pull styles in four finishes. Handle pulls are a common, industry standard dimension for ease of change.
- Flush fronts feature an integral pull for a clean look visual that blends with many environments.
- All product types align dimensionally across tops, bases and fronts to provide a clean, consistent visual while simplifying application and product churn.

SUSTAINABILITY

DESIGNING FOR THE ENVIRONMENT REQUIRES INNOVATIVE THINKING AND SOLUTIONS.

During our products development process we consider each stage of the life cycle: from materials extraction, production, transport, use and reuse, until the end of its life.

LIFE CYCLE ASSESSMENT

Thanks to the Life Cycle Assessment (LCA) method, Steelcase quantified the major products’ environmental impacts to set the stage for further improvements. This method, based on ISO 14040 and 14044 and selected by The European Union for environmental evaluation, allows us to quantify the environmental impact of our products throughout their whole lifecycle. To show continuous improvements, we communicate our products’ environmental performance through voluntary environmental labels and declarations. Sustainability related actions and results are communicated in the annual Steelcase Corporate Responsibility report.
