about us

At naughtone we like to keep things easy; Useful, Beautiful Furniture quite simply explains what we do. Even our name naughtone means no-nonsense.

naughtone is a British company founded in 2005 by industry professionals. We like to consider ourselves friendly experts and we strive to make the process of selecting, purchasing and receiving our products as easy and informative as possible.

Although naughtone is based in Britain our products are available globally. We design and develop in the UK and our manufacturing strategy supports consistent lead times, pricing and environmental factors in our international markets. We have our own showrooms in the UK and North America and our products can be seen in furniture dealer showrooms all over the world.

naughtone furniture is used by some of the most influential brands in commerce and culture; there is no better proof of the relevance and application of the product range. We have built this useful collection of products by reacting quickly to market demands with as straightforward solution as possible.

We like to think that our products perform as you expect them to and are designed with just the right amount of familiarity to make them instantly understood and loved. Simple design paired with our wide variety of finishes means we don't have to tell you how to use our furniture. Instead, enjoy this brochure and be inspired to find the perfect collection to suit your needs, whatever they may be.

environment

As designers and manufacturers, we recognise our responsibility to supply products which will have a lasting value. Consequently, we design without the influence of fashion and we manufacture using the best quality raw materials and processes. We hope that naughtone products will prove to be a positive investment of our planet's resources.

naughtone is based in Yorkshire, Northern England where all our products are designed and developed. As well as our own production facilities in the UK we are increasingly producing our products internationally to more effectively supply local markets.

Architects and Interior designers also have a responsibility and desire to deliver sustainable, low environmental impact projects; naughtone's involvement with major national and international projects since our inception is proof of our ability to deliver modern, environmentally conscious products.

Environmental practice is common sense to us but we don't just rely on our assumptions. We invite external audits such as FISP (furniture industry sustainability program), which we are accredited with, and we also hold tougher industry standards such as ISO 14001. We are FSC® certified (FSC® C134222). In addition we are also PEFC certified.

We have more detailed information on our products and their ingredients; this is information that can assist when scoring building and interior projects for schemes such as SKA and LEED.

Design

Sold by the likes of MOMA in New York, the trace table range is simply a modern classic that speaks for itself. Suffice to say, the immaculate hand made steel frame and repetition of shapes make trace an exquisitely balanced form. Historically seen with a clear glass top, trace works equally well with opulent or contrasting materials recessed flush into the frame. Use trace in the standard sizes in any interior or talk to us about a bespoke size to suit your specific requirements.

Technical

Trace is handmade from cold drawn mild steel. The selection of steel is ideal for achieving sharp lines and a smooth finish. The finished single piece frame has a surface finish of hard wearing polyester powder coat, while the various table top options have their own unique characteristics and can be fully tailored for a client's needs.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

fold

Steel Leg Coffee or Cafe Tables and Benches

Design

Strong and elegant, fold tables and benches provide a simple surface with maximum clearance for legs, chairs and fresh air to fit underneath! The folded steel frame is proportioned carefully and finished beautifully making a low statement product to be used with any chair or as a bench and table set in any environment. Fold is available in a wide range of table top finishes and frame colours as a table and bench set, making fold a truly chameleon like addition to an interior. Practically, fold has adjustable height tilt and glide feet to further compliment it's 'use anywhere' character.

Technical

Fold is handmade from mild steel. The finished single piece frame has a surface finish of hard wearing polyester powder coat. while the various table top options have their own unique characteristics and can be fully tailored for a client's needs.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

frog

Table

Design

The Frog table is an elegant product for the offices, restaurants or in the home. The design of the base pays careful attention to the scale of the material and repetition of bends; the result is a table which is visually light and uncluttered when used in repetition.

Technical

Frog's base is constructed with a cold drawn steel bar to achieve a sharp and smooth finish. This is then finished with a polyester powder coat for a hard wearing finish. Glass tops are connected to the frame with our beautiful, polished aluminium UV bosses. A variety of solid surfaces can be used (see below), some of which are suitable for outdoor use.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

dalby

Wooden Leg Coffee and Cafe Table

Design

Your newest old friend. The Dalby table will inject warmth and quality into an interior without raising any eyebrows. Dalby provides a practical, robust surface and maximised leg positions for clear, useable access all round the table. The simple design easily scales across a wide range of sizes from small three to four people circular tables through to huge meeting tables, to cafe tables and coffee tables. The Dalby table is built from solid materials the good old way and will therefore last as long as it's timeless aesthetic endures.

Technical

Dalby table legs are CNC cut and shaped from solid oak and hand finished before receiving a coat of hard wearing matt lacquer. The under table structure is oak veneered and matt lacquered to match. The table frame is component based and is delivered fully dis-assembled for efficient delivery and installation. Dalby table is available with a wide range of table top finishes, from matching oak veneer through to striking coloured laminates.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

ped
Table

*Shown in RAL 9006 silver powder coated base finish

*Shown in RAL 9006 silver powder coated base finish

Design

A simple thing done very well; the naughtone Ped table is pared down to a beautiful brushed aluminium finish and soft square shaped base. Use the Ped table wherever you need a product that performs so well you don't even notice it.

Technical

Ped is manufactured in mild steel tube flat plate and then finished with a hard wearing polyester powder coat. The stem, base and table top are supplied unassembled and bolt together easily with very few fixings. The various table top options have their own unique characteristics and can be fully tailored to suit any requirement.

Base Finishes

megaped

Table

Design

A simple thing done very well; the naughtone Megaped table is pared down to the minimum soft square shaped base and stem. Megaped caters for the larger table functions without a complex or bulky base (up to 2000mm diameter!). Use the Megaped table wherever you need a product that performs so well you don't even notice it.

Technical

Megaped is manufactured in mild steel tube and aluminium flat plate and then finished with a hard wearing polyester powder coat. The stem, base and table top are supplied unassembled and bolt together easily with very few fixings. The various table top options have their own unique characteristics and can be fully tailored to suit any requirement.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

riley

Table

01

02

Design

Riley is a beautifully crafted solid wood pull-up table, sized perfectly to slide over benches, sofa arms or chair arms.

Technical

Riley is made from solid hardwood and veneer faced moulded plywood... nothing else. It is sealed with a light matt lacquer, preserving the natural feel of the wood.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

shard

Coatstand

Design

Shard is a simple coatstand with a bold, graphic aesthetic. Useful as an object and beautiful as a decorative addition to a space. Use shard in conjunction with other naughtone products that use the same bent wire process such as viv chairs, reg chairs, hush chairs and pollen stools.

Technical

Shard is constructed from mild steel wire and welded together into one piece. The finish is a hard wearing polyester powder coat.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

construct

Low Stool, Barstool and Table

Design

The Construct low stool, barstool and coffee table range is a wonderfully useful product range that can be dropped into almost any situation. Construct has a fine balance of materials with a solid hardwood top and a folded steel base that wears its construction method on its sleeve.

Technical

Construct is made from laser cut, folded steel and held together with aluminium aircraft rivets. The base is then finished with a hardwearing polyester powder coat. The top is cut from hardwood then finished with a light matt lacquer.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

Sideboard

Storage

Design

The naughtone Sideboard is designed for practical accessible storage and avoids detail where possible to allow it to feel like part of the building rather than draw attention to itself.

In contrast the Sideboard holds colour very well and can be a great way to add colour or accent to an interior.

Technical

Sideboard is carefully constructed by hand from MDF and quality mechanical components. The MDF can be finished with a silk spray lacquer in various colours or Walnut and Oak veneers. The mild steel sled bases are finished with a hard wearing polyester powder coat or as a premium option in brushed stainless steel.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

pollen

Stool and Table

Design

The hexagon is a natural repeating shape which can be used in either small clusters, straight lines, around bends or tucked into corners. This makes Pollen a truly dynamic seating and table system for any corporate, public or educational space. The tables and seats use the same base options making pollen a simple choice with a sophisticated application.

Technical

Pollen's seat is constructed with a thick plywood base and CMHR foams. The cover can be chosen by the customer or recommended by naughtone. The wire base is made from mild steel and finished in chrome or polyester powder coat.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

W75 D17.5 H16 Seat 16

Design

The pinch stool is one of the originals in the naughtone range and a truly versatile product.

The fully upholstered form of the Pinch stool offers a comfortable seat, whether used at a table or mingled with soft seating. It can be sat on or straddled and the Pinch stool has no obvious direction so lends itself to being scattered in a space. Use the Pinch stool as functional occasional seating and to add life to any interior space.

Technical

The pinch stool is structured with a simple, robust wooden frame, a thin multi density foam then the upholstered cover. It has small plastic glides to protect flooring and the upholstery of the stool.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

bounce

Chair

Design

Called the Bounce chair due to the independent movement of the seat and back, this flex provides a comfort not usually associated with steel and plywood chairs. Bounce also brings a level of sophistication to this type of product — a distinct lack of visible fixings and closely fitting components allow the careful form of the bounce chair to shine. The Bounce chair is aimed across markets from casual meetings spaces, to cafes and educational situations and priced competitively to suit. Bounce chair is easy to lift and carry and stacks neatly.

Technical

The Bounce chair is constructed with a one piece steel tube frame, finished with a hard wearing polyester powder coat finish. The seat and back rest are constructed with veneer faced moulded plywood.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

reg
Chair and Barstool

Design

Robust and elegant, the wire Reg chair is carefully proportioned for maximum comfort. Reg responds to a need for a visually light seating solution that is particularly useful as a slender barstool. With its classic proportions and beautiful form, the Reg chair makes a great impact in offices and homes, but has been most widely used in bars, cafes and restaurants.

Technical

Reg is constructed from mild steel rod the finished with a hard wearing polyester powder coat. Reg can also be treated for outdoor use on request.

polly

Chair

Design

The Polly chair fundamentally provides a very comfortable ergonomic seat with as little visual detail as possible. The Polypropylene seat shell has subtle edge details, a soft texture and just the right amount of flex, all of which combine to provide a tactile and satisfying sitting experience. Polly performs quietly and combined with our easy colour range, we're sure anyone can find a spot for this champion chair.

Technical

Polly is moulded in the UK using 100% recyclable glass re-enforced polypropylene. Polly is available in 6 standard colours. The 2 base options are manufactured using tubular or solid bar steel and are finished with a hard wearing powder-coat (paint) or chrome.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

viv

Chair, Lounger and Barstool

Design

Simple and very comfortable, the Viv chair's paired down shape is highlighted by its tight upholstery, cleverly held deeply into the bucketed seat. Viv was motivated by quality and function and the range of chair, barstool, and lounge chair are a welcome addition to any space, especially as their fully upholstered form can be easily altered with a change of fabrics.

Technical

The main seat area of Viv is constructed with a 3D formed plywood, providing a comfortable bucketed seat. This is then covered with CMHR foams. The base options are both made from mild steel then polyester powder coated or chromed.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

always

Chair

Design

Always' easy form has been designed to compliment any interior no matter what the style; the 5 different base options facilitate this even further. Always is meticulously proportioned to offer a positive back support with a comfortable enclosed feeling. The organic form of Always feels as good as it looks from every angle; it uses contemporary engineered foam techniques to provide the fine shape without compromising comfort and durability. Always has been engineered for beautiful upholstery whatever the fabric or leather.

Technical

Always is upholstered over engineered foam with a steel frame core. There are 4 base options made from polyester powder coated steel, also available with a bright chrome finish. The timber base is constructed with tough oak moulded plywood and has a mild steel sub-frame.

always lounge

Chair

Design

An easy form for an easy chair, the Always Lounge chair hides its complexity well. A very careful combination of shapes have created a lounge chair that is very comfortable and looks great from every angle. Always Lounge chair is available on 4 different base styles and being an upholstered product it is a true chameleon – frankly there is no reason to not have an Always Lounge chair.

Technical

Always lounge is upholstered over engineered foam with a steel frame core. There are 3 base options made from polyester powder coated steel, also available with a bright chrome finish. The timber base is constructed in through oak moulded plywood and has a mild steel sub-frame.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

hush low

Chair

Design

Hush Low is the little brother of the Hush wingback chair. Hush Low has a slender internal frame providing an elegant, graphic shape, but equally providing a generous seat. Hush Low is designed to be comfortable but with an upright positive sit; making it an ideal retreat but perfect for working, reading eating or just taking some time out.

Technical

The main body of the Hush Low chair is constructed with moulded plywood and CMHR foams. Base options are constructed from mild steel and finished with hard wearing polyester powder coat. The wooden base is constructed from turned hardwood and finished with a matt lacquer.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

cloud quilt

Armchair, Sofa and Bench

Design

The Cloud Quilt seating range's tactile, pillowy surround is designed to invite and comfort without consuming masses of space. Whether you are looking for somewhere to shelter or meet or simply to relax, Cloud Quilt has a magnetic appeal.

The Cloud upholstery range consists of various chair and sofa sizes available with high or low back. See the range 'cloud booth' for full booth options.

Technical

naughtone applies the signature cloud quilt pattern through most upholstery fabrics and a dacron core. The cover quilt is then pulled over a tubular steel frame with dense foam inserts. The seating area is steel framed with a plywood substructure. The seat foam is CMHR and the back cushions are feather and synthetic fibre filled.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

Black powder coated steel straight legs

Turned solid oak or walnut legs

cloud plain

Armchair, Sofa and Bench

Design

Cloud Plain seating system's tactile, pillowy surround is designed to invite and comfort without consuming masses of space. Whether you are looking for somewhere to shelter or meet or simply to relax, Cloud has a magnetic appeal.

The Cloud Plain upholstery range consists of various chair and sofa sizes available with high or low back. See the range 'cloud booth' for full booth options.

Technical

Cloud plain upholstery is a large cover with foam inserts sewn into the seams. The cover is then pulled over a foam covered tubular steel frame. The seating area is steel framed with a plywood substructure. The seat foam is CMHR and the back cushions are feather and synthetic fibre filled.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

cloud

Plain or Quilt Booth

Design

Cloud seating system's tactile, pillowy surround is designed to invite and comfort without consuming masses of space. Whether you are looking for somewhere to shelter or meet or simply to relax, cloud has a magnetic appeal. The Cloud upholstery range consists of various chair and sofa sizes available with high or low back and also a simple zipped-in screen for creating booth seating areas.

Technical

The signature quilting can be applied to most upholstery fabrics and has a dacron core. This is then layered over woollen felt, in turn layered over a tubular steel frame with dense foam inserts. The seating area is steel framed with a plywood substructure. The seat foam is CMHR and the back cushions are feather and synthetic fibre filled.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

rhyme

Modular Seating

Design

A landscape to approach from all angles, Rhyme is a modular seating system that can be used as a simple island or used to create ad-hoc zones within a space. Each of the 5 pieces in the range have the same trapezoid footprint to allow easy planning – get creative and make your own Rhyme landscape.

Technical

Rhyme is upholstered over CMHR foams and Birch plywood frames. The individual modules are supplied in parts, split sensibly for easy delivery and installations. The units bolt together in position and can be reconfigured if necessary. Rhyme is sat mild steel plinths finished with a hard wearing powder coat finish.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

busby

Chair

Design

Busby is a modern cocoon for everyday situations. Used in a variety of applications Busby works particularly well as a haven for employees in open plan work spaces, suitable for one person to make confidential phone calls, and with the ability to place two or more pieces together for a more collaborative arrangement. Busby was the product of a collaborative project with the BBC and the then student designer Samir Skalli. Busby now features heavily at the BBC's new home at Media City Salford.

Technical

The main body of the busby chair is constructed with a birch plywood internal frame and CMHR foams.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

portion

Armchair, Sofa and Bench

Design

naughtone's original sofa system is characterised by the buttoned seat and scooped back.

The Portion sofa has morphed into many guises and has been used in a wide variety of environments; from schools and offices to homes and bars. Portion merges trusted familiarity with modern proportions and comfort.

Technical

The main body of the Portion range is constructed with a hardwood internal frame and CMHR foams. The two base options are made from hand polished stainless steel and solid hardwood.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

hatch New

Modular Seating

Design

The Hatch range's characteristic quilted seat provides a tactile structure to the fabric and a satisfying repeat pattern. Hatch is designed to be effortless to plan into configurations with straightforward options in 1, 2 and 3 seat units. Hatch has a firm upright sit and compact dimensions, perfect for modern commercial environments where the product must look after itself and space is a premium. Available with 4 different leg options as standard and naughtone's wide fabric selection, Hatch can be tailored to suit any environment.

Technical

Hatch is constructed with a wooden frame and high quality foams, then upholstered in the highest quality fabrics. The different leg options are made from steel finished with a tough powder coat colour and the wooden legs are made from solid oak and solid walnut with a matt lacquered finish.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

clyde club

Sofa, Chair and Bench

Design

The Clyde Club sofa and chair range is a product of our passion for clean tailored upholstery and classic functional design. The quilted and buttoned seat and back of Clyde ooze familiarity while the scooped profile and stainless steel sled base retain its unique contemporary edge. Clyde has a comfortable but formal **sit. ideal** for working, hospitality and retail environments. The compact footprint of Clyde rounds off its practical benefits and go toward making Clyde the successful classic within the naughtone range that it is.

Technical

The main body of the Clyde range is constructed with a hardwood internal frame and CMHR foams. The two base options are made from hand polished stainless steel and solid hardwood.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.
