

VIP Mobile Magnetic Glassboard
with Linking Device

VIP Mobile Magnetic Glassboard with Linking Device

> eisysVISUAL designers have created a truly unique visual presentation product for the future. And now they've added another attribute, the ability to link two or more boards together.

> The VIP Mobile Glassboard is a highly mobile, double-sided, magnetic, dry marker glassboard. It combines twice the writing surface with the ability to "pin" notices and announcements using magnets, and a safe, stable base on locking casters.

> The mobility of the VIP Mobile Magnetic Glassboard allows for various linear arrangements like circles, semi-circles, straight lines, etc. This means you can create huddle spaces for group study without totally blocking out other areas of the room. And now with the ability to link boards together, a virtual presentation wall can be created using Mobile Glassboards.

> The VIP Mobile Magnetic Glassboard still has the inherent ease of maintenance associated with glass and the minimal open frame allows for easy cleaning and air flow.

Dimensions:

MAX SIZE: 54" w x 48" h

MAX BOARD DIMENSION: 57" w x 78" h
