# 700 Series® Desk Specifications

## 700 Series® Desk Specifications

The 700 Series® Desk line is a free standing, modular system of desks, returns, bridges, credenzas, corner units and overhead storage components. Designed for flexibility, it can be set up to suit differing customer requirements. It is shipped knock-down and accepts 700 Series® or U-Series® Pedestals.

### Worksurfaces

Worksurfaces shall be 1-1/4" thick laminate top with a particle board core. Edge treatments shall be self-edge, wood edge or 74P PVC. All tops shall be pre-drilled for mounting of end panels, modesty panels, wire management channels, return or bridge connectors and hanging or worksurface supporting pedestals. Worksurfaces shall be available with left and right grommet options, or center PowerUp® module.

### Desk Shells

Desk shells shall consist of a worksurface top, two end panels, full or partial modesty panel and wire management channel. Desks are available in depths of 24", 30" and 36", and widths of 48", 54", 60", 66" and 72" and shall be 29" high. The 36" deep desk worksurface shall have a 6" overhang. The desk shall accept a variety of hanging or worksurface supporting pedestals.

### End Panels

Desk, return, corner, and credenza end panels shall be floor height and feature double-wall construction. The outer panel shall be 20-gauge with double flanges formed on both vertical edges and single flanges formed on the top and bottom. The inner panel shall be 20-gauge with flanges formed on all edges. Two keyhole pads of 16-gauge shall be welded into the top of the end panel to interface with shoulder screws for mounting to the top. The outer and inner panels shall be spot welded together, as well as fastened together at the bottom with the nut inserts that accept the leveling glides. Two 20-gauge channels shall be welded into the 36" deep end panels to provide additional reinforcement. All end panels shall feature prepunched holes through two metal thickness for connecting modesty panels.

Desks, credenzas, P-shape worksurfaces, D-shape worksurfaces and corners shall be 29" high. Returns and bridges shall be available in 29" high. Both interface with the desk or corner unit with 16-gauge connectors that are screwed to the tops.

### Modesty Panels

Desk, return, corner, bridge and credenza modesty panels shall span the full width of the unit connecting to the end panels. The modesty panels shall be spaced down from the top by 1-5/8" to allow for the routing of cables. They shall be available in full floor length, for privacy, or partial, which is spaced up off the floor by 8-3/8" for outlet access and increased air circulation. The modesty panels on a 36" deep desk shall be recessed by 6" for visitor knee space. All modesty panels shall be 20-gauge with double flanges formed along the top and bottom. Desk and

credenza panels shall have single flanges formed on both vertical edges. Return panels shall have offset flanges formed on one end and a single flange on the other. Bridge panels shall have offset flanges formed on both ends. The vertical flanges of all modesty panels have prepunched holes for connecting to the end panels.

### Wire Management

Desks, returns, corners, bridges and credenzas shall be equipped with a wire management channel. This 20-gauge channel shall have the bottom edge hemmed for safety and strength. The wire management channel shall fasten to the underside of the top and run between end panels.

### Returns

Returns shall be the same construction as the desk and credenza worksurfaces. Returns consist of a top, end panel, full or partial modesty panel and wire management channel. They are available in depths of 24" and 30". A 24" deep return is available in widths of 24", 30", 36", 42", 48", 54", 60", 66" and 72" and shall be 29" high.
