

PRIORITY™ Price List

Casegoods & Benching

This price list is effective April 10, 2015 and supercedes all previously printed or electronically released versions.

Priority focuses on flexibility and real estate efficiency.

With private office and open plan furnishings, Priority supports classic and progressive work modes for groups and individuals. Priority benching undersurface support rails enable long spans between legs, and ganging of adjacent tables. Height-adjustable tables include manual or electric adjustment—from seated adjustment to sit-to-stand options with programmable memory for three settings. Priority is SCS Indoor Advantage™ certified, may contribute to LEED credits, and is ANSI/BIFMA level® 3 certified.

Finishes & Materials	209

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Standard product modifications are available on select products.
➤ See the Product Modifications Price List at www.kimballoffice.com

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

Only Underwriters' Laboratory (U.L.) or Canadian Standards Association (C.S.A.) listed electrical components are used in electrical devices and are so labeled.

Priority Progressive products (excluding electric height-adjustable tables) are U.L. 962 listed. Electric height-adjustable tables use U.L. recognized components.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

Complete specifications are built by following a set of steps. These “How to Specify” steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ①, ②, or ③) make up the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

Worksurfaces:

- Trim on four sides

How to Specify

• Model

• Worksurfaces material

• Laminated with plastic film

LW = Laminated with wood-surfaced or wood trim

TLW = Laminated with wood-surfaced and wood trim

W = Wood with wood-surfaced or wood trim

WW = Wood with wood-surfaced and wood trim

• Film profile:

• P = Sublimated plastic film, 3 models only

• F = Softwood-surfaced 2.0" or 3" W models only

• M = Flamed-surfaced 2.0" or 3" W models only

• S = Solid, wood-surfaced 1/2" or 3" W models only

• Worksurfaces prefinished with:

• See page 100 for designations.

• No prefinish required

• Worksurfaces finish group designation:

STD = FSC-certified group 1 standard (25%)

STD2 = Group 2 (25%)

STD3 = Group 3 (25%)

• Worksurfaces finish group designation:

STD = FSC-certified group 1 standard (25%)

STD2 = Group 2 (25%)

STD3 = Group 3 (25%)

• Trim finish designation (trim W and TW models)

IMPORTANT: Support rails or height-adjustable base must be specified separately.

Undersurface Support
Feet
• See page 100.

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤ Find more specific details regarding the environmental aspects of our product offerings at:
www.kimballoffice.com

ANSI/BIFMA level™

100% of the products manufactured by Kimball Office are level® certified. We offer the most sustainable portfolio in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet and exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤ See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:

- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification

Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:

- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:

- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:

- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality

One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

Design for the Environment (DfE)

is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.

➤ For environmental data, visit our website at www.kimballoffice.com.

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

The mark of responsible forestry

FSC-Certified Wood

Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood at a 3% upcharge. Applicable models show FSCW as a finish price group designator option. Standard lead times apply to FSC orders.

Asset Network for Education

Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

Classic Priority

HEIGHT-ADJUSTABLE SOLUTIONS:

Progressive Priority

Statement of Line	➤ See page 13
Planning	39
Pricing	89
Finishes & Materials	209

Priority offers you two distinctive styles and aesthetics to select from when planning with Priority:

Progressive Priority details promote a table based product with a lighter scale and ideal for more compact offices. The floating top affect on storage and open leg supports are the signature of Progressive Priority. This aesthetic is evident throughout the progressive section of this price list from benching to private office components.

Classic Priority is the foundational elements of this series. In this section, you will find built up desks as well as modular components that feature a more transitional style with worksurfaces attaching directly to storage element.

Similarities:

- Storage is available in the same heights, widths and depths.
- Overall storage depth, width, and height are the same in both Progressive and Classic.
- Softened- and reed-rim worksurfaces feature the rim on all four sides of the surface.

Differences:

- Classic knife-rim surfaces have the mitred rim on the user edge only and overhangs the storage by 1¼". Knife-rim surfaces on returns and bridges feature a reverse knife edge for a flush fit with the adjoining surface.
- Progressive knife-rim surfaces have the mitred rim on all four sides of the surface and align with the storage. Knife-rim surfaces join together without a coped rim.
- Classic undersurface storage features an unfinished, open top.
- Progressive Priority utilizes finished-top storage with ¾" spacers that mount to the worksurfaces and undersurface support rails providing a "floating" top affect.
- Classic pedestals feature a lock in the top drawer.
- Progressive pedestals feature a lock in the bottom drawer.

Mixing Progressive and Classic Priority:

- There are numerous items in the Priority offering that work well with both styles of Priority. Those items not mounted below the worksurface, such as low storage, overheads, highback organizers, vertical storage, and tables, can be used with both classic and progressive office layouts.
- As a general guideline, classic undersurface storage units, modesty panels, and support panels should not be used with Progressive knife-rim worksurfaces.
- Progressive pedestals can be used with Classic surfaces.
- Mixing softened- or reed-rim worksurfaces will work with either Progressive or Classic arrangements.
- Progressive knife-rim worksurfaces cannot be mixed with Classic bridge and return knife-rim surfaces.
- Pedestal starter brackets, undersurface support rails, and U-leg supports were designed to work with Progressive products. However, pedestal starter brackets and undersurface support rails can be used between Classic storage units where an unsupported span of more than 48"W is desired. These brackets would be mounted at a different height on Classic storage.
- Progressive end panels and Classic modesty panels and end supports should not be mixed in the arrangement.

Progressive Priority

Classic Priority

Low height and mobile storage

Statement of Line	➤ See page 13
Planning	39
Pricing	89
Finishes & Materials	209

Post-Consumer Recycled Content:

- Priority steel components—up to 25%
- Cast aluminum parts—up to 70%

Pre-Consumer Recycled Content:

- Plastic components—up to 30%
- Wood components—up to 85%

Energy:

- LED lighting produces virtually no heat and uses 20% of the energy used in standard fluorescent, for an 80% savings.

Durability:

- Priority is a durable product with a limited lifetime warranty.
- It is designed and constructed for longevity with the potential for a second life.
- It can be refurbished with new components and/or enhancements.

Clean Technology:

The powder coating process for metal components is virtually VOC free.

IAQ/Indoor Air Quality:

- Certified to meet or exceed the indoor air quality requirements set by the U.S. Green Building Council's LEED® rating system.
- Certified to the SCS Indoor Advantage™ standard.
- Wood components are sealed with Pura®, our proprietary water-based ultraviolet (UV) wood finish.
- Metal components are sealed with a powder-coating process that is virtually VOC free

Recyclability:

- Most Priority components are recyclable at the end of the furniture's useful life.

ANSI/BIFMA e3 Sustainability:

- Priority is level 3 certified to the ANSI/BIFMA E3 2010 Sustainability Standard.

LEED for Commercial Interiors:

- Priority can help customers earn valuable LEED CI credits:
Credit 4.1 and 4.2 Recycled Content
Credit 4.5 Low-Emitting Materials
Credit 5.1 and 5.2 Regional Materials (dependent on location)
Pilot Credit 43: Certified Products

Benching tables are

created by selecting:

- Progressive worksurfaces
- Undersurface support rails
- U-legs, open legs, end panels, and/or undersurface storage

Center-mount shelves and storage

connect to U-legs with stanchions using a center-mount overhead shelf bracket. Shelves keep shared materials visible and within easy reach.

U-legs are used to create benching tables. Available in fixed and adjustable-height models.

Undersurface support rails provide strength for the worksurface, connecting between support models.

Worksurfaces are available in 24", 30", 36", 48", and 60" widths. 24" or 30"D worksurfaces are used for dual-sided benching with stanchions; 36", 48", and 60"D models provide a continuous surface for U-legs without stanchions.

Overhead storage is available in 36"–72" widths with sliding door or hinged doors. ▶ See Systems Price List for metal center-mount overheads.

Tiles mount to stanchions to provide privacy above the worksurface. Top caps, shelves or overheads must be specified to complete the top of the tile run when using stanchion U-leg support.

Shared mid-support U-leg supports the ends of two adjoining worksurfaces. Available with or without stanchions.

Privacy screens may be mounted to top or edge of a surface. Brackets for free-standing screen applications are also available.

End-support U-leg without stanchions provides support at the end of a run of surfaces. Available with or without stanchions.

Low storage and mobile cushion top pedestal can stow under the surface in a Progressive application. Mobile BBF and FF units will not stow below the surface due to the location of the undersurface support rails.

Distinctives	▶ See page 6
Typical Configurations	8
Statement of Line	13
Finishes & Materials	209

Dimensions:

* Dimensions in parentheses represent Footprint center-mount overhead

Distinctives	➤ See page 6
Typical Configurations	8
Statement of Line	13
Finishes & Materials	209

Returns are created with 24", 30", and 36"D worksurfaces, undersurface support rails, return mounting brackets, flat brackets, and legs.

There is no length limitation as to the number of tables that can be linked. There is no dimensional creep.

Privacy screens may be specified at the same height or width for consistent aesthetics or at different heights for function.

Materials:

Worksurfaces

- Laminate with a PVC rim
- Laminate with a wood rim
- Wood with wood rim

Supports

- Powder-coated steel

Storage

- Laminate
- Wood

Tiles

- Fabric
- Slat

Privacy Screens

- Resin

Collaboration work and conference tables are created by selecting:

- Progressive worksurfaces
- Undersurface support rails
- U-legs or open legs

Casters are available for field installation, specified separately, on individual tables. Caster height is 1⁷/₈".

Privacy screens are available to provide privacy below the worksurface.

Two sets of undersurface support rails connect to U-legs to provide strength.

48" and 60" U-legs are used to create conference tables.

Worksurface depth matches the depth of the U-legs.

Factory-installed grommets and cutouts are available for power/data centers.

For field-installed grommets, note the location of support legs to eliminate interference with grommets.

Shared mid-support U-leg supports the ends of two adjoining worksurfaces.

Distinctives	➤ See page 6

Finishes & Materials	209

Desking configuration

can be created by selecting:

- Progressive worksurfaces
- U-legs, open legs, or end panels
- Undersurface or low storage

Use worksurfaces with low storage

to create a layered look. Select from rectangular, wedge, arc-end, or other worksurface shapes.

Vertical storage and over-heads, detailed in the Progressive/Classic section of the price list, are universal within the Priority series.

Exterior wood surfaces are available in the following veneers:

- Cherry (plain sliced, slip matched)
- Maple (plain sliced, slip matched)
- Walnut (plain sliced, book matched)
- Sapele (quarter sliced, slip matched) premium veneer; upcharge applies
- Zebrawood premium composite veneer; upcharge applies are available.

Add mobile storage for enhanced flexibility.

Use vertical storage along with low or undersurface storage to create a work-wall.

Face-mounted locks are standard on all undersurface storage and optional on storage doors above the worksurface.

Progressive/classic overheads can be wall-mounted or Traxx-mounted as shown here.

Support options, such as U-legs, open-frame legs (shown), wood end panels, or pedestals, are designed so that the worksurface appears to "float" 3/4" above the support.

➤ See page 6 for Progressive and Classic distinctives

Privacy screens and modesty panel/cable surrounds, specified separately, can attach to worksurfaces for additional privacy.

Dimensions:

- Wood with wood rim

Supports

- Powder-coated steel

Privacy Screens

- Resin

Storage

- Wood
- Laminate
- Writable-glass doors on select models

Height-adjustable tables

are created by selecting progressive worksurfaces and a height-adjustable base.

Table bases are available in stand-alone models, returns, and extension post-leg.

Manual-adjust bases are available in incremental, click, and crank models.

Electric-adjust bases are available in single- and dual-stage models.

Expandable cable manager is ideal to manage cords below height-adjustable tables.

Table Configurations:

- L Configuration** (non-handed)
- Main T-Leg Base
 - Post-Leg Extension

- U Configuration**
- Two Main T-Leg Bases
 - Bridge Mounting Kit

- 90° Corner**
- 90° Base (includes two T-Legs and a corner post leg)

- 120° Corner**
- 120° Base (includes two T-Legs and a corner post leg)

- L Configuration** (non-handed)
- Main T-Leg Base
 - Return T-Leg Base

- Rectangle**
- Main T-Leg Base

- 90° Corner**
(alternate configuration)
- Main T-Leg Base

- 120° Corner**
(alternate configuration)
- Main T-Leg Base

Resin privacy screens and modesty panels can be specified for privacy.

Consider possible pinch points when using height-adjustable tables within your workstation.

Worksurfaces, specified separately from the bases, are not undersized.

Details

IMPORTANT: Progressive Priority worksurfaces are intended for use with Progressive Priority supports:

- Undersurface support rails
- Open-frame or U-legs
- End panels
- Pedestals or low storage

Note: Knife rim worksurfaces cannot be supported by Classic Priority supports or undersurface storage, or used in Systems applications.

Worksurfaces are 1 $\frac{3}{16}$ " thick, 3-ply balanced construction.

P Softened PVC rim **F** Softened wood rim **M** Reed wood rim **S** Knife wood rim

Rim profile is $\frac{1}{8}$ " thick and appears on all edges of the worksurface. Laminate models are available with a softened PVC rim. Wood and laminate with wood rim models are available with a softened, reed, or knife rim.

Knife rim on worksurfaces appears on all four sides and butts end to end.

Wire manager option is available on 24", 30", and 36"W rectangular worksurfaces and corner worksurfaces. This flexible trough allows cords and cables to be routed along the back edge of the worksurface. Selected rim profile appears on the on the

front and side edges. Wire manager is recommended for back-to-back benching applications.

Progressive rectangular worksurfaces are available in five depths: 24", 30", 36", 48", and 60" and in widths ranging from 36" up to 144" depending on the depth of the surface. 120" and 144"W worksurfaces consist of two pieces.

➤ See the Statement of Line for sizing combinations.

24"-36"D rectangular surfaces can be used to build:

- Private office configurations
- Freestanding open-plan applications
- Single-sided benching applications
- Double-sided benching (24" and 30"D only)
- Height-adjustable tables

48" and 60"D rectangular surfaces can be used to build:

- Double-sided benching applications
- Large conference or work tables

Grain direction runs with the width on wood veneer and woodgrain laminate worksurfaces. *Exception: Grain runs with the depth on two-piece (120" and 144"W) worksurfaces with quarter-cut*

veneers (Monterey Oak, Canyon Oak, Tuscan Walnut, and Clear Zebrawood).

Other Progressive worksurface shapes include: U-shape, arc-end, extended, wedge, oval, 90° corner, and 120° corner.

A variety of factory-installed grommet and cut-out options are available.

➤ See pages 100–101.

Connections

Progressive pedestals, U-legs, and open legs, specified separately, are designed to be support so that the worksurface appears to "float" $\frac{3}{4}$ " above support and storage. Undersurface storage satisfies both support and storage needs. Pedestal must match worksurface depth.

IMPORTANT: Supports and brackets must be specified separately for all worksurfaces.

Undersurface support rails, specified separately, are required for all surfaces.

➤ See the Priority Price List.

Note: Rails are standard with height-adjustable bases.

Ganging units together result in no "dimensional creep." There is no limitation as to number and width of tables that can be joined. Varying widths of worksurfaces are not intended for use together in a straight, linear application (side by side).

Return worksurfaces can be created by adding a 24", 30", or 36"D worksurface and appropriate support legs perpendicular to the main worksurface. Use a return mounting bracket and two flat brackets, specified separately. Rail will be 6" longer than the return surface for connection to main surface. ➤ See the Priority Price List for attachment details.

Low storage models can be used when the worksurface is placed at 29"H or higher. Clearance from the undersurface support rail to the floor is 25 $\frac{9}{16}$ ".

U-Legs or
Open-Frame Legs

Height-Adjustable T-Legs
or Fixed-Height T-Legs

78"W oval worksurface can be supported by several different support-U-legs, open-frame legs, height-adjustable, or fixed-height T-legs. Specify components to create a 30"D x 54"W frame for U-legs and open-frame legs. Specify components to create a 30"D x 60"W frame for height-adjustable or fixed-height T-legs.

Support Statement of Line	➤ See page 15
Pricing	102
Integrating with Traxx & Xsite	63
Classic Modular Applications	72

Details

Undersurface support rails are required for all Progressive worksurfaces to provide strength and allow connection of U-legs, open-frame legs, and storage. Rails are powder-coated steel, non-handed, and come in a set of 2; they are 2¼"H and are installed 4½" apart.

Available in 9 lengths from 36"–96" in 6" increments to correspond to worksurface widths.

Connections

Undersurface support rails attach to starter brackets. Starter brackets are welded to all U-legs and open-frame legs. Specify starter brackets separately for attaching rails to undersurface pedestals or end panels.

Return mounting bracket is non-handed and can be attached to either end of an undersurface support rail to attach a 24", 30", or 36"D worksurfaces to the main worksurface as a return. Two flat

plates (model ACAWBP1), specified separately, are also required when mounting each return.

Mounting holes are located on the undersurface support rail in several locations to accommodate various return depths. For a 24"D main worksurface, bolt to the first set of holes; for a 30"D main worksurface, bolt to the middle set of holes; for a 36"D main worksurface, bolt to the nearest set of holes.

Data cabling can be secured to undersurface support rails utilizing cable ties and holes in the rails.

Bridge mounting kits consist of two return mounting brackets and set of undersurface support rails. Undersurface support rails in each kit are 12" longer than the bridge length. For example, 48"W bridge kits ships with 60" undersurface support rails to allow for 6" of connection to the brackets on either side. Four flat plates (model ACAWBP1), specified separately, are required to link surfaces.

Planning Factors

48" and 60"D applications require two sets of undersurface support rails.

For linear applications, specify support rail length to match the width of the worksurface.

IMPORTANT: For returns, specify support rail length that is 6" longer than the width of the return surface. Rail will extend under the main surface and connect to a return mounting bracket.

If the length of rail required is not a size offered, specify the next smaller size. The starter bracket will compensate for the dimensional difference.

When using storage as support, calculate the length of the rail required by deducting the width of the storage from the width of the corresponding worksurface. For example, a 72"W surface with two 15"W pedestals would require a 42"W rail, the length of the unsupported span. A 72"W surface with one 15"W pedestal has an unsupported span of 57" and would require a 54"W rail, the next available smaller size.

Clearance from the rail to the worksurface edge:

Surface Size	Softened or Reed Rim	Knife Rim
24" or 48"D	8¾"	7¾"
30" or 60"D	11¾"	10¾"
36"D	14¾"	13¾"
24"x48" 90° corner	23⅞"	22⅞"
30"x48" 90° corner	19⅝"	18⅝"
24"x48" 120° corner	15"	14"
30"x48" 120° corner	20¼"	19¼"

Typical Configurations	➤ See page 8

Pricing	103
Finishes & Materials	209

Details

IMPORTANT: Only Progressive Priority 1 $\frac{3}{16}$ " work-surfaces are for use with Progressive open-frame legs. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

Open-frame legs are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. They connect directly to undersurface support rails and aligns to solid end panels or progressive pedestals. Open-frame leg models are for use in benching, work table, open plan, conferencing or private office applications.

Fixed-height open-frame legs are 27 $\frac{3}{4}$ "H from undersurface to the floor. Available in 24", 30", 36", 48", and 60" depths. Plastic leveler insert is located at the bottom of each leg. The glide stem is 1" long and provides $\frac{3}{4}$ " of adjustment.

Adjustable-height open-frame legs are 25 $\frac{7}{16}$ "H from undersurface to the floor, at the

lowest position. Available in 24", 30", 36", 48", and 60" depths.

Push Button

Screw-Adjust

24", 30", and 36"D adjustable-height open-frame legs feature a push button that indexes into notches in the inner leg member. By depressing the button, the leg releases the lower leg assembly. These models provide maximum height adjustment of 7 $\frac{7}{16}$ " in $\frac{3}{8}$ " increments from 25 $\frac{7}{16}$ " to 32 $\frac{7}{8}$ "H, plus an additional $\frac{3}{4}$ " of adjustment utilizing the plastic leveling insert.

48" and 60"D adjustable-height open-frame legs feature a mechanical screw-adjust mechanism that indexes into notches in the inner leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs

are engineered to carry more load than the smaller width U-leg units. These models provide maximum height adjustment of 7 $\frac{1}{16}$ " in $\frac{3}{8}$ " increments from 25 $\frac{7}{16}$ " to 32 $\frac{1}{2}$ "H, plus an additional $\frac{3}{4}$ " of adjustment utilizing the plastic leveling insert. **IMPORTANT:** The intent of these adjustable U-legs is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.

11"H and 5"H open-frame legs are for use on top of low storage. 5"H model sits atop 22"H storage; 11"H model is for use with 15"H storage. They are not intended for use with adjustable-height open-frame legs in the same configuration.

IMPORTANT: Component tops must be specified for low storage when open-frame legs will be placed on top for worksurface support.

Connections

Undersurface support rails attach to starter brackets. Starter brackets are welded to all open-frame legs.

Field installed caster kits are available for use on the individual tables up to 36"D x 96"W. They are not for use for bases that are linked together. Casters feature a tall neck with an M-10 thread; height is 1 $\frac{7}{8}$ ". Sold in a set of 4.

Planning Factors

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended. By extending some legs further than others, the table leg can compensate for the floors that are out of level.

Create a different visual by placing open-frame legs inboard from the end of the worksurfaces. The undersurface rails would need to be specified in a smaller width to connect the legs together. Legs may be placed inboard 12" on 24"D surfaces, 15" on 30"D surfaces, and 18" on 36"D surfaces.

Typical Configurations	➤ See page 8
Support Statement of Line	15
Pricing	104
Finishes & Materials	209

Details

IMPORTANT: Only Progressive Priority 1 $\frac{3}{16}$ " work-surfaces are for use with Progressive U-legs. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

U-legs are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. They connect directly to undersurface support rails. U-leg models are for use in benching, work table, open plan, conferencing or private office applications.

Fixed-height U-legs are 27 $\frac{3}{4}$ "H from undersurface to the floor. Available with or without a stanchion. Plastic leveler insert is located at the bottom of the leg. The glide stem is 1" long and provides 3/4" of adjustment. Available with or without a stanchion.

Adjustable-height U-legs are 25 $\frac{7}{16}$ "H from undersurface to the floor, at the lowest position. Adjustable-height U-legs provide the best aesthetic

appearance since both the inner and exterior legs are painted the same color. Available with or without a stanchion.

Push Button

Screw-Adjust

24", 30", and 36"D adjustable-height U-legs feature a push button that indexes into notches in the inner leg member. By depressing the button, the leg releases the lower leg assembly. These models provide maximum height adjustment of 7 $\frac{7}{16}$ " in 3/8" increments from 25 $\frac{7}{16}$ " to 32 $\frac{7}{8}$ "H, plus an additional 3/4" of adjustment utilizing the plastic leveling insert.

48", 50", 60", and 62"D adjustable-height U-legs and 24", 30", and 36"D mid-support U-legs feature a mechanical screw-adjust mechanism that indexes into notches in the inner leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs are engineered to carry more load than the smaller width U-leg units. These models provide maximum height adjustment of 7 $\frac{1}{16}$ " in 3/8" increments from 25 $\frac{7}{16}$ " to 32 $\frac{1}{2}$ "H, plus an additional 3/4" of adjustment utilizing the plastic leveling insert.

IMPORTANT: The intent of these adjustable U-legs is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.

Mid-support U-legs link tables together using a single middle leg versus two independent legs.

Single mid-support U-legs are available for use with 24", 30", and 36"D worksurfaces.

Dual mid-support U-legs for use with 48" or 60"D applications have two sets of brackets for mounting surfaces. Two surfaces can be used back to back or one surface can be used as long as the depth equals the U-leg depth. For example, one 48"D or two 24"D surfaces can be used on a 48"D dual mid-support leg. Dual U-leg applications require two sets of undersurface support rails.

Typical Configurations	➤ See page 8
Support Statement of Line	15
Pricing	104
Finishes & Materials	209

Stanchion support U-legs feature a vertical member that supports tiles and center-mount overhead shelves and cabinets. The overall leg is 2³/₈" deeper than the non-stanchion U-legs to accommodate two 24"D or two 30"D worksurfaces and two tiles.

Center-mount overhead/shelf brackets, specified separately, connect directly to the stanchion. Stanchion U-legs connect directly to undersurface support rails. They are available in end- and mid-support models.

Connections

Undersurface support rails attach to starter brackets. Starter brackets are welded to all U-legs.

Field installed caster kits are available for use on the individual tables up to 36"D x 96"W. They are not for use for bases that are linked together or for stanchion models. Casters feature a tall neck with an M-10 thread; height is 1⁷/₈". Sold in a set of 4.

Center-mount overheads, shelves, or top caps are required to complete the top of the tile run.

Tiles mount to the stanchions to provide visual privacy in two directions.

Planning Factors

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended. By extending some legs further than others, the table leg can compensate for the floors that are out of level.

Create a different visual by placing U-legs inboard from the end of the worksurfaces. The undersurface rails would need to be specified in the smaller width to connect the legs together. Legs may be placed inboard 12" on 24"D surfaces, 15" on 30"D surfaces, and 18" on 36"D surfaces.

Typical Configurations	➤ See page 8
Support Statement of Line	15
Pricing	108
Finishes & Materials	209

Details

IMPORTANT: Only Progressive Priority 1 $\frac{3}{16}$ " work-surfaces are for use with Progressive 90° corner supports. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

90° corner support frames with stanchion are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. Frames consist of:

- Center four-way stanchion
- Four legs with adapter brackets
- Undersurface support rails to connect to U-legs

Fixed-height 90° corner support frames is 27 $\frac{3}{4}$ "H from undersurface to the floor. Plastic leveler insert is located at the bottom of the leg. The glide stem is 1" long and provides $\frac{3}{4}$ " of adjustment.

Adjustable-height 90° corner support frames is 25 $\frac{7}{16}$ "H from undersurface to the floor, at the lowest position. They provide maximum height adjustment of 7 $\frac{1}{16}$ " in $\frac{3}{8}$ " increments from 25 $\frac{7}{16}$ " to 32 $\frac{1}{2}$ "H, plus an additional $\frac{3}{4}$ " of adjustment utilizing the plastic leveling insert. Adjustable-height U-legs

Connections

Four U-legs with stanchions, specified separately, are required. Specify end-support U-legs with stanchions to support the ends of the application or mid-support U-legs with stanchions to continue the run with additional worksurfaces.

Undersurface support rails to connect to U-legs are included with the frame.

provide the best aesthetic appearance since both the inner and exterior legs are painted the same color.

Incremental screw-adjust mechanism on adjustable-height model indexes into notches in the inner leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs are engineered to carry more load than the smaller width U-leg units.

IMPORTANT: The intent of these adjustable frames is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.

Connections

Four U-legs with stanchions, specified separately, are required. Specify end-support U-legs with stanchions to support the ends of the application or mid-support U-legs with stanchions to continue the run with additional worksurfaces.

Undersurface support rails to connect to U-legs are included with the frame.

Stanchions on 90° corner support frames accept top caps or shelves, but not both. They also can support overhead storage. Overhead/shelf brackets are required, specified separately.

Tiles mount to the stanchions to provide visual privacy in two directions for all four users. Tiles are required.

Planning Factors

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended.

90° corner supports are available in two sizes that accept either 24"D x 48"W or 30"D x 48"W corner worksurfaces, with or without a wire manager. Larger worksurface spans are not recommended for this application.

90° corner workstations can also be created without the use of a 90° corner support by using end U-legs with stanchions and returns going in the opposite directions. Flat brackets must be specified for the returns for additional support. This application allows for visual privacy in one direction, with tiles down the spine of the station. Privacy screens can also be mounted on the returns for additional side-to-side privacy.

➤ See page 57 for privacy screens information.

Typical Configurations	➤ See page 8
Support Statement of Line	15
Pricing	109
Finishes & Materials	209

Details

IMPORTANT: Only Progressive Priority 1 $\frac{3}{16}$ " work-surfaces are for use with Progressive 90° corner supports. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

120° corner support frames are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. Frames consist of:

- Center three-way stanchion (stanchion model only)
- Three legs with adapter brackets
- Undersurface support rails to connect to U-legs

Fixed-height 120° corner support is 27 $\frac{3}{4}$ "H from undersurface to the floor. Plastic leveler insert is located at the bottom of leg. The glide stem is 1" long and provides $\frac{3}{4}$ " of adjustment.

Adjustable-height 120° corner support is 25 $\frac{7}{16}$ "H from undersurface to the floor, at the lowest position. They provide maximum height adjustment of 7 $\frac{1}{16}$ " in $\frac{3}{8}$ " increments from 25 $\frac{7}{16}$ " to 32 $\frac{1}{2}$ "H, plus an additional $\frac{3}{4}$ " of adjustment utilizing the plastic leveling insert. Adjustable-height models provide the best aesthetic appearance since both the inner and exterior legs are painted the same color.

120° corner supports with stanchions accepts top caps or shelves, but not both. Overhead/shelf brackets are required, specified separately.

120° corner supports without stanchions can be used to create a more open work area.

12" or 16" resin privacy screens can be added for visual privacy.

Incremental screw-adjust mechanism on adjustable-height model indexes into notches in the inner leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs are engineered to carry more load than the smaller width U-leg units.

IMPORTANT: The intent of these adjustable frames is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.

Connections

Three U-legs, specified separately, are required. Specify end-support U-legs to support the ends of the application or mid-support U-legs to continue the run with additional worksurfaces.

Undersurface support rails to connect to U-legs are included with the frame.

Planning Factors

The 120 station is unique to Kimball Office Priority benching. The applications shown above-left depict how the 120 degree stations provide more side-to-side visual privacy than typical lineal benching layouts. There are numerous ways to incorporate the 120 degree station in a floor plan; you are not limited to a typical 3 person station.

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended.

Two sizes accept either 24"D x 48"W or 30"D x 48"W corner worksurfaces, with or without a wire manager.

Tiles mount to the stanchions to provide visual privacy in two directions for all users. Tiles must be specified for both sides of the stanchion.

Benching Overview	➤ See page 40
U-Legs Product Information	48
Pricing	110
Finishes & Materials	209

Details

Tiles are 18½"H and available 36"–96"W (in 6" increments). Select from tackable fabric, slat and fabric/slat combination models.

Tackable fabric tiles are constructed of fiberglass and covered in fabric. Fabric is applied railroad style.

Slat tiles are powder-coated extruded aluminum. Slats are ¾"H with ½" space between each slat; total of 12 slats.

Fabric/slat tiles feature a nominal 6"H of tackable area above a 12"H of slat tile area with a total of 8 slats.

Connections

Tiles install into an L-shaped bracket that is part of the stanchion U-leg assembly.

Width of the tile aligns with the stanchion U-legs. For example, a 72"W tile is a true 72" dimension.

When tables are ganged together using the shared support U-leg, the tiles are centered relative to the mid-support stanchion. There is no dimensional creep.

Slat tiles allow work tools to be placed in appropriate areas to accommodate individual needs. They accommodate all Kimball Office Perks work tools including monitor arm mounts.

Planning Factors

Tiles are required for both sides when using stanchion support U-legs. They do not need to be the same type of tile, but must be the same width.

Tiles must be specified the same width as the surface to mount correctly to stanchions.

When using tiles with stanchion support U-legs, either top caps, shelves or overheads must be specified to complete the top of the tile run.

Related Products

Perks single-monitor arms can be mounted on slat tile and fabric/slat tiles if spaced at least 24" apart. Maximum monitor weight up to 13 lbs.

➤ See the Perks Price List.

Typical Configurations	➤ See page 8
Support Statement of Line	15
Pricing	113
Finishes & Materials	209

Details

IMPORTANT: Only Progressive Priority 1³/₁₆" worksurfaces are for use with Progressive end panels. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

End panels are 1³/₁₆" and available in both veneer and laminate. They are available multiple depths for use in either benching, open plan, or private office applications. End panels can be used in conjunction with other Progressive supports, such as U-legs and open-frame legs.

IMPORTANT: End panel illustrations on this page show end panels with a starter bracket, which must be specified separately.

24", 30", and 36"D end panels can be used for creating private office configurations.

48" and 60"D end panels can be used to benching, collaboration, or conference environments.

50"D and 62"D end panels are for use with end panel stanchion brackets (model 53KSSEPP), specified separately, to create dual sided benching applications. They are for use at the end of a run only.

Note: Stanchion bracket, model 53KSSDPP, cannot be used in this application.

5"H or 11"H end panels can be used to create layered applications with low height storage. 5"H model sits atop 22"H storage; 11"H model is for use with 15"H storage.

IMPORTANT: Component tops must be specified for low storage when short end panels will be placed on top for worksurface support.

Connections

Starter bracket must be specified separately for all end panel applications. Starter brackets are intended to be mounted 3/4" above the top edge of the panel to give the worksurface a "floating" appearance consistent with aesthetic of Progressive Priority. Specify one starter bracket for 24"-36"D end panels; specify two starter brackets for 48"-62"D end panels.

➤ See page 54 for additional information.

Create conventional casegoods assemblies by specifying end panels, starter brackets, privacy screen used as a modesty screen, and undersurface support rails.

Planning Factors

Maximum run is dictated by the length of undersurface rails and the surface size.

End panels are intended for use at the end of runs only not as a shared support.

Typical Configurations	➤ See page 8
Undersurface Support Rails	46
Pricing	113
Finishes & Materials	209

Details

Starter brackets support many office configurations. This bracket connects to the undersurface support rails to provide support to surfaces. It is identical to, and performs the same function, as the brackets that are welded to U-legs and open-frame legs.

Starter brackets are the most versatile items in the Priority offering. Specify this bracket to begin or end an office layout with an end panel, pedestal or storage tower units. When used with an end panel, pedestal, or storage tower, this bracket replaces the need for leg support.

Connections

One bracket is required to connect to each set of undersurface support rails when using with 24", 30", and 36"D end panels or 36"D or smaller depth storage.

Two brackets are required when using 48", 50", 60", or 62"D storage or end panels.

Starter brackets can also be mounted directly to most interior walls, including steel or wood stud walls, masonry block, or solid masonry walls. **IMPORTANT:** It is the responsibility of the installer to ensure that the connection to the studs is adequate to support the worksurface load.

Bridge kits can be used between two surfaces supported by wall-mounted starter brackets to create a U-unit configuration. Connect the undersurface rails of the left and right surfaces to U-legs, open-frame legs, fixed T-legs, or any style of storage.

Details

IMPORTANT: Only Progressive Priority 1 $\frac{3}{16}$ " worksurfaces may be used with Progressive undersurface pedestals. Classic Priority knife rim worksurfaces and Systems worksurfaces are not applicable.

Progressive undersurface pedestals are available in 24", 30", and 36"D x 15"W with box/box/file and file/file drawer configurations and 24"D x 30"W two-drawer lateral file; in wood or laminate. Chassis and door/drawer fronts on laminate models feature thermally fused laminate (TFL). Grain runs top to bottom. All units have finished backs and lock in bottom drawer.

Double-sided pedestals are a unique design to Kimball Office for creating 48"D or 60"D open plan applications. They create a clean aesthetic of one continuous end panel, eliminating the need to position two separate pedestals back to back and add filler panels to fill the gap.

Top of the double-sided pedestal features a 2 $\frac{3}{16}$ " opening for cable routing.

$\frac{3}{4}$ " silver-colored spacers on top of pedestals create a floating worksurface affect. Double-sided pedestals include a total of 8 spaces; regular depth pedestals have 4.

Drawer fronts are $\frac{3}{4}$ "-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.

Drawer sides and back are $\frac{1}{2}$ " thick and wrapped in natural woodgrain vinyl. Bottoms are $\frac{3}{16}$ " thick.

Optional wood drawers are available on wood units. Drawer sides and back are $\frac{1}{2}$ " thick with veneer faces. Bottoms are $\frac{1}{4}$ " thick with veneer faces. Interiors are sealed, sanded, and finished with a clear durable topcoat.

Drawer suspensions feature black slides with precision steel ball bearings to ensure long-lasting, quiet, smooth operation. Box, file, and lateral file drawers feature full extension slides.

Connections

Starter bracket, specified separately, is required to connect pedestals to undersurface support rails and the worksurface.

- One starter bracket is required to connect to each set of undersurface support rails when using with 24", 30", and 36"D surfaces or 36"D or smaller depth storage.
 - Two brackets are required when using 48"D or 60"D storage or surfaces.
- See page 54 for more information on starter brackets.

Pedestal stanchion bracket, (model 53KSSDPP) specified separately, is available for use with the 50" and 62"D double-sided pedestals. Double-sided pedestal models for use with stanchions bracket are deeper than the non-stanchion models (48" and 60"D). The difference accommodates two 24" or two 30"D worksurfaces in addition to the thickness of the stanchion plus two tiles for either side of the stanchion. The pedestal stanchion bracket aligns with stanchion support legs and features a vertical member that supports fabric tiles, slat tiles and fabric/slat tiles. Overhead/shelf brackets, specified separately, connect directly to the stanchion, to support center-mount overhead or shelf.

Two pedestals can be used in a back-to-back application; however, a double-sided pedestal is recommended for a clean visual. A stanchion bracket could not be used in the two-pedestal application.

Details

IMPORTANT: Progressive center-mount overhead storage is intended for use with Progressive Priority benching stanchions, unless otherwise noted.

Center-mount overhead cabinets are available in 30"–72"W (in 6" increments) with hinged doors or sliding door. Units are finished on all sides; flat bottom.

Hinged wood four-door models feature one set of grain pattern matching doors; laminate models feature two sets of two-doors that match in grain pattern.

Sliding-door units feature one door and center divider panel. These units accept five ¾"-thick interior shelves spaced 1¼" apart. Shelves intended for use on the open side of the sliding door unit, specified separately.

Writable glass models features thin aluminum frame finished in silver satin metallic.

Center-mount shelves are available in 30"–96"W (in 6" increments), as well as models for use on 90° and 120° frames. Units have a finished top and bottom and feature a softened rim on all four sides of the shelf.

Connections

Center-mount cabinets can be ganged with the units facing the same direction side to side or facing opposite directions (shown above). Four ganging bolt assemblies ship standard with each model.
Note: Center-mount shelves and cabinets cannot be ganged to each other.

Overhead/shelf bracket (53KBP), specified separately, is required at each stanchion intersection. Sold in a set of two.

Center-mount storage can be mounted on top of Xsite panels using two Xsite transaction counter support brackets. Overheads must be the same length or longer than the frame it will be placed over. For example, a 48"W center-mount overhead can be mounted above a 30"W Xsite frame; however, a 30"W center-mount overhead cannot be mounted onto a 48"W Xsite frame. Not for use on Xsite stackable panels.

➤ See the Systems Price List for other guidelines.

Center-mount storage can be mounted to Xsede accessory rail using an Xsede stanchion kit. Overhead can be any width.

Planning Factors

Multiple units can be ganged and then connected at the stanchion intersection. For example, two 36"W center-mount overheads can be ganged in opposite directions above a 72"W surface, and then connected to the stanchions as an assembled unit.

Shelves and overheads cannot be mixed between stanchions, but can be specified to align at the stanchion intersection (see illustration at left).

On laminate units 60"W and greater, the grain on the back panel runs horizontal.

Related Products

Interior shelves may be specified separately.

Shelf divider Shelf divider provides further organization to shared materials stored on center-mount shelves. Shelf divider, made of powder-coated metal, slides onto the center-mount shelf and attaches to the underside of shelf.

Expo or Expo2 dry-erase markers are recommended for use on writable glass doors.

Typical Configurations	➤ See page 8
Privacy Screens Statement of Line	20
Pricing	121
Finishes & Materials	209

Details

Resin privacy screens provide visual privacy for users when in the seated position. Screens can mount onto worksurfaces in private office, benching, or height-adjustable table applications. Privacy screens are available in nominal 12" and 16"H models and in widths from 24"–90" (in 6" increments).

Screen material is ¼"-thick resin with a bullnose edge. Screens are available in three colors: Mist, Breeze, and Alpine White (upcharge applies). Both sides of the screen have a matte texture.

Two different heights provide different levels of visual privacy.

12"H screens can also be used as an undersurface modesty panel. When used with U-legs or open-frame legs, screens must be specified 6" smaller in width than the nominal worksurface width to allow proper clearance from legs.

End-support screens provide side-to-side visual privacy, and are available in 12" and 16" heights and 22", 28", and 34"W. They are sized 2" smaller in width than the nominal worksurface depth and are mounted inboard of the table legs.

Connections

Four bracket styles are available: freestanding, surface mount, square-edge undersurface mount, and knife-edge undersurface mount. Brackets are extruded aluminum and have a powder-coated finish. Brackets must be specified separately.

Freestanding brackets allow privacy screens to be placed freely on any surface or storage unit.

Surface-mount brackets can be used to mount screens above or below the worksurface. This bracket can also be used to mount screens to Priority top caps in benching applications.

Note: Using this bracket will deface the surface to which it is attached.

Square edge-mount brackets are for use on any worksurface with a softened rim, reed rim, or any worksurface with a wire manager.

Knife edge-mount brackets are for use on any worksurface with a knife rim.

Brackets should be placed 6" inward of either end and then evenly spaced for the remainder of the screen. For example, 72"W screen should have 27" between the center of each bracket.

Brackets are packaged as a set of two. Specify the appropriate number of brackets based on the screen size:

- 24"–54"W screens require 2 brackets
- 60"–78"W screens require 3 brackets
- 84"–90"W screens require 4 brackets

Add another layer of privacy with screens on top of Priority top caps or Xsite flat top caps using surface-mount brackets.

Accessories cannot be mounted on screens.

Planning Factors

Accessories and work tools cannot be mounted on screens.

Typical Configurations	➤ See page 8
Privacy Screens Statement of Line	20
Pricing	124
Finishes & Materials	209

Details

Click-adjust privacy screens are available in three widths: 36", 42", 48". They are constructed of ¾"-thick wood or laminate with a softened rim detail; finished on both sides.

Screen can be adjusted up or down to provide various heights of user-privacy. The screen features a mechanical ratchet mechanism that provides 4" of height adjustment in 1" increments. The height of screens adjusts from 12" above the worksurface to 16" above the worksurface and coordinates with the heights of the resin privacy screens.

At the 16" height position, the privacy screen will clear the underside of an overhead or shelf. The modesty section of the privacy screen varies in height from 7" to 11" depending on the position of the screen.

Connections

Click-adjust privacy screens can be attached to the underside of any style of table.

Planning Factors

Privacy screens do not accept accessories and work tools or carry load.

Take support placement into consideration when using the privacy screens.

Manual Adjust

Details

IMPORTANT: Only Progressive Priority 1³/₁₆" worksurfaces are for use with Progressive height-adjustable table bases. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

Height-adjustable T-leg table bases consist of one or two T-legs and a set of undersurface support rails that run underneath the center of the worksurface. Return T-legs include a return bracket for connecting to a main base at a 90° angle. Bases ship ready to assemble.

Manual-adjust bases are available in three styles: incremental, click, and crank. The T-legs on manual bases feature powder-coated steel 2"D x 2"W upper column, a 2³/₈"D x 2³/₈"W lower column, and a die-cast aluminum base (foot). Glide provides 1⁵/₁₆" of adjustment.

Incremental Click Crank

Incremental-adjust models can be adjusted in 1" increments using a 5mm Allen wrench.

Click-adjust models feature an adjustment mechanism on each leg that works like a ratchet. Table height can be adjusted upward in 3/16" increments by lifting the table. To lower the table, pull and hold the small handle.

Two people are recommended when adjusting height for incremental- and click-adjust models.

Main T-Leg Base

Return T-Leg Base

Crank-adjust models feature an adjustment handle located on the right side of the base. On rectangular surface applications, the crank can be positioned on the left or right side of the base. Handle pulls in and out, receding to store flat under the worksurface. Crank-adjust models also include a hex rod that runs beneath the worksurface that allows both legs to raise and lower simultaneously; ships ready to assemble. These models are not applicable for L- or U-configurations.

Field installed caster kits are available for use on the main T-leg table bases up to 36"D x 96"W and in L-configurations. Casters feature a low neck with an M-8 thread; height is 1⁵/₈"; set of 4.

Connections

IMPORTANT: Above-surface storage, highbacks, and organizers should not be used with height-adjustable tables.

Create a different visual by placing T-leg table base inboard from the end of the worksurface; specify a smaller width table base. Legs may be placed inboard 12" on 24"D surfaces, 15" on 30"D surfaces, and 18" on 36"D surfaces.

Planning Factors

90° and 120° corner worksurfaces can also be supported by height-adjustable T-leg bases placed parallel to the front edge of the worksurface. To create 48"W 90° application, use a 36"W base; for a 120° application, use a 54"W base. This application provides a lower-cost alternative to using a 3-leg base. Casters are not recommended for this application.

Height-Adjustable T-Leg Table Bases Product Information

Electric Adjust

Details

IMPORTANT: Only Progressive Priority 1 $\frac{3}{16}$ " worksurfaces are for use with Progressive height-adjustable table bases. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

Height-adjustable T-leg table bases consist of T-leg(s) and a set of undersurface support rails that run underneath the center of the worksurface. Bases ship ready to assemble. The T-legs on electric bases feature powder-coated steel 2"D x 2"W upper column, a 2 $\frac{3}{8}$ "D x 2 $\frac{3}{8}$ "W lower column, and a die-cast aluminum base (foot). Glide provides 1 $\frac{5}{16}$ " of adjustment.

Electric-adjust bases provide sit-to-stand capabilities.

Single-stage electric models features a two-column leg, that compresses inside itself when in the lower positions.

Dual-stage electric models features a three-column leg, that compresses inside itself when in the lower positions.

90° and 120° height-adjustable 3-leg bases are also available. Center leg is a post leg.

Main T-Leg Base

Return T-Leg Base

Standard

Programmable

Select either a standard switch or a programmable switch. Standard switch features up and down arrows, and is 2 $\frac{1}{2}$ "W x .625" thick x 2 $\frac{1}{2}$ "D (front to back). Programmable switch allows the user to pre-set up to four-different table heights, and is 5 $\frac{1}{2}$ "W x .625" thick x 2 $\frac{1}{2}$ "D (front to back); upcharge applies. To move the table to one of the pre-set heights, the user must depress the button while the table is in motion. A digital indicator shows the overall height of the table. Switch can be located on either side of the table.

Connections

IMPORTANT: Above surface storage, highbacks, and organizers should not be used with height-adjustable tables.

Control box on main table without a return or extension is not interchangeable with control box with 3 outlets that is standard on main table base specified along with a return or extension.

Planning Factors

90° and 120° corner worksurfaces can also be supported by height-adjustable T-leg bases placed parallel to the front edge of the worksurface. To create 48"W 90° application, use a 36"W base; for a 120° application, use a 54"W base. This application provides a lower-cost alternative to using a 3-leg base. Casters are not recommended for this application.

Related Products

Field installed caster kits are available for use on the main T-leg table bases up to 36"D x 96"W.

Details

IMPORTANT: Only Progressive Priority 1 $\frac{3}{16}$ " worksurfaces are for use with Progressive post legs. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

Post legs are a versatile table base extension that can be used in conjunction with other leg styles including U-legs, open-frame legs, fixed-height T-legs, and height-adjustable T-legs.

Rectangular, U-shape, extended, and arc-end worksurfaces can be supported by post legs when used as a return or extension surface.

Incremental Click Crank

Incremental-adjust models can be adjusted manually in 1" increments using a 5mm Allen wrench.

Click-adjust models feature an adjustment mechanism on each leg that works like a ratchet. Pull upward on the handle to extend the height of the leg; to lower the table, depress the release handle and lift slightly.

Two people are recommended when adjusting height for incremental- and click-adjust models.

Single Stage Dual Stage

Single-stage electric models features a two-column leg, that nests inside itself when in the lower positions.

Dual-stage electric models features a three-column leg, that nests inside itself when in the lower positions.

Connections

Return mounting bracket is included with post-leg models for connection to main worksurface undersurface support rails. Post-leg is non-handed and can be attached to either end of an undersurface support rail to attach a 24", 30", or 36"D worksurfaces to the main worksurface as a return. Two flat brackets (model ACAWBP1), specified separately, are also required when mounting each return.

Mounting holes are located on the undersurface support rail in several locations to accommodate various return depths. For a 24"D main worksurface, bolt to the first set of holes; for a 30"D main worksurface, bolt to the middle set of holes; for a 36"D main worksurface, bolt to the end set of holes.

Planning Factors

Extension post-leg base model should be specified to match the adjustability mechanism of the main T-leg table base. For example, if specifying a single-stage electric-adjust height-adjustable T-leg as the main base, specify a single-stage electric-adjust extension post-leg base.

Extension post-leg bases are intended to be used as a return. Depending on the depth of the main worksurface and the depth of the extension worksurface, the post will be inset approximately 12"–15" from the end of the extension worksurface.

Height-Adjustable 90° and 120° Bases Product Information

Manual or Electric Adjust

Details

IMPORTANT: Only Progressive Priority 1 $\frac{3}{16}$ " worksurfaces are for use with Progressive post legs. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

90° and 120° height-adjustable 3-leg bases are available in manual or electric adjust models. These bases must be used with a corresponding size 90° or 120° corner worksurface. Center leg is a post leg.

90° and 120° tables are freestanding use only; L- and U-configurations are not applicable.

T-leg adjustable bases is powder-coated steel, with a 2"D x 2"W upper column, a 2 $\frac{3}{8}$ "D x 2 $\frac{3}{8}$ "W lower column, and a die-cast aluminum base (foot). Glide provides 1 $\frac{5}{16}$ " of adjustment.

Incremental Click Crank

Incremental-adjust models can be adjusted manually in 1" increments using a 5mm Allen wrench.

Click-adjust models feature an adjustment mechanism on each leg that works like a ratchet. Pull upward on the handle to extend the height of the leg; to lower the table, depress the release handle and lift slightly.

Two people are recommended when adjusting height for incremental- and click-adjust models.

Crank-adjust models feature an adjustment handle located on the right side of the base. The handle pulls in and out, receding to store flat under the worksurface. The handle is mounted so that it

swings to the side. Crank-adjust models include a hex rod that runs beneath the worksurface that allows both legs to raise and lower simultaneously; ships ready to assemble. These models are not applicable for L- or U-configurations.

Single Stage Dual Stage

Single-stage electric models features a two-column leg, that nests inside itself when in the lower positions.

Dual-stage electric models features a three-column leg, that nests inside itself when in the lower positions.

Connections

Field installed caster kits are available; however, they are not directly applicable to a 90° or 120° 3-leg base with center post. To create a mobile 3-leg table, order two caster kits, a return foot kit model 53KFKTR for the post leg, and hardware bag #2417313 (service parts) for screw to attach the foot and casters.

Progressive Priority Wall-Mounted Traxx Application

**Classic and Progressive/Classic Priority
Wall-Mounted Traxx Application**

**Xsite-Mounted Center-Mount
Overhead Cabinets**

Structural Wall-Mounted Application

**Structural Wall-Mounted Application
with Bridge Kit**

Guidelines:

- Progressive and Classic Priority worksurfaces and overhead storage can also be attached to Traxx using standard Traxx brackets. Traxx should be installed at heights that correspond with Cetra or Xsite panels.
➤ See the Systems Price List.
- For 48"W and wider Progressive worksurfaces, undersurface support rails must be specified. When using U- or open-frame legs, undersurface support rails must be used regardless of work surface width.
- For 48"W or wider Classic worksurfaces, additional support is required. If spanning 48"W or less, pedestals can be used for end support without support rails.
- Progressive Priority worksurfaces, excluding surfaces with knife rim on all four sides, can also be attached to Xsite Traxx.
➤ See the Xsite chapter in the Systems Price List.
- Progressive Priority center-mount overheads can also be mounted on top of Xsite panels using two Xsite transaction counter support brackets. Overheads must be the same length or longer than the frame it will be placed over. For example, a 48"W center-mount overhead can be mounted above a 30"W Xsite frame; however, a 30"W center-mount overhead cannot be mounted onto a 48"W Xsite frame. Not for use on Xsite stackable panels.
- Footprint center-mount overheads can be mounted on top of Priority stanchion U-legs.
➤ See the Systems Price List.
- Follow the standard overhead/panel guidelines in the Xsite Price List for further Xsite integration.
- Starter brackets can also be mounted directly to most interior walls, including steel or wood stud walls, masonry block, or solid masonry walls. **IMPORTANT:** It is the responsibility of the installer to ensure that the connection to the studs is adequate to support the worksurface load.
- When using pedestal starter brackets in a fixed wall application, you can connect a bridge kit to create a U-unit configuration. Connect the undersurface rails to U-legs, open-frame legs, fixed T-legs, or any style of storage.

Perks Power/Data Drawer	➤ See page 65
Single-Circuit Power	67
Four-Circuit Power	68
Hardwire Power	71

IMPORTANT: The power/data products shown in this section are part of the Perks offering.

➤ See Perks Price List to specify.

Perks power/data sliding drawer brings both power and data to the underside of the worksurface. Unlike fixed troughs or baskets, the drawer pulls out to allow routing of excess cabling once the initial connection has been made.

Mounting hardware is field installed

Metal knock-outs in the front face of the drawer can be removed as needed for data or electrical outlets.

Single-circuit, four-circuit, and hardwire electrical components are for use in power/data drawers.

Cut-outs on the ends (sides) of the drawer allow jumpers to exit for connection inside the next drawer.

Large cut-outs on the bottom of the drawer allow power in-feed to enter the drawer.

Data/telecommunication modules can be used in the power/data drawer bottom cut-outs or the knock-outs on the front or back of the drawer.

Data cables can also be routed in the drawer to service the workstation.

Flexchain (shown) or expandable cable manager, along with undersurface cable managers, are required to protect 8-wire components from physical damage.

Circuitry Options:

Power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably.

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.

➤ See page 67 for application guidelines.

Four-circuit components combine to form an 8-wire, 4-circuit, power system.

➤ See page 68 for application guidelines.

Hardwire components are also available to allow field hardwiring of power within the power/data drawer where required by local codes.

➤ See page 71 for application guidelines.

For Use with Priority

Details

IMPORTANT: The power /data products shown in this section are part of our Perks offering.
➤See Perks Price List to specify.

Power/data drawers are for use in open planning and freestanding applications. They are designed to work with 24", 30" and 36"W worksurfaces in single or back-to-back configurations.

Power/data drawer is powder-coated metal tray that mounts to the underside of a worksurface using two bent sheet metal drawer slides.

1/2" gap between the worksurface and the front and back edges of the drawer allows cords to exit. Cut-outs in the sides allow cables to pass to adjacent drawers.

Holes centered in the floor of the power/data drawer are provided to attach Perks laptop/equipment lock (model 99KLTCK).

Connections

In single worksurface applications, the power/data drawer should be inset 1" from the back of the worksurface.

Modesty panel must be located behind the power/data drawer to allow the drawer to extend forward toward the approach side of the worksurface for cable access.

Factory-installed grommets in benching worksurfaces are located so excess cabling will fall directly into the drawer.

Planning Factors

Specify the drawer size based on the width of the surface to which it will attach. Specify the drawer to be 10" shorter than the worksurface width to allow for it to mount inboard of the surface support. For example, specify a 62"W drawer for a 72"W worksurface. If using a surface with storage, base your calculation on the unsupported surface dimension to determine drawer size.

90° and 120° corner worksurfaces can accommodate a power/data drawer. Specify model 99K26PDD for use with a 90° corner support frame; specify model 99K26PDD or 99K32PDD, for use with 120° corner support frame.

Power/Data Overview	➤See page 64
Single-Circuit Power	67
Four-Circuit Power	68
Hardwire Power	71

Knock-Outs & Cut-Outs:

Knockouts in the front and back of the drawer are compatible with industry-standard data faceplates, such as Tyco/Amp, Panduit, ECA and Hubbell. Individual knockouts are 1 3/8" x 2 1/16". Data and telecommunication modules are the responsibility of the user.

Floor of the drawer features similarly sized pre-punched cut-outs for additional electrical or data outlets. Use these cut-outs for hardwire applications. Receptacles placed in the drawer bottom cut-outs must be installed facing the floor.

Each knockout is 6" on center. Distance between knockouts is 3 1/4".

Surface Width	Drawer Width*	Front Knockouts	Small Bottom Cut-outs	Large Flexchain Cut-outs
36"	26"	3	2	1
42"	32"	5	2	3
48"	38"	5	2	3
54"	44"	7	4	3
60"	50"	7	4	3
66"	56"	9	6	3
72"	62"	9	6	3
78"	68"	11	8	3
84"	74"	11	8	3
90"	80"	13	10	3
96"	86"	13	10	3

*corresponds to the model number 99K**PDD

continued

On 48" and 60"D worksurfaces (depicted above), power/data drawer can be located so that when the drawer is extended, it is located on the centerline of the surfaces. Both the 10" rectangular power/data center (KCU0810ELPDC) and the 40" rectangular power/data center (KCU0840ELPDC) will work in conjunction with the power/data drawer in this application.

➤See the Tables Price List for 10" and 40" power/data centers.

➤See page 101 for factory cutout options.

Note: Not available on all surface widths due to interference with support legs.

Depending on user electrical needs, one drawer can be shared in back-to-back configurations. Some users may require an individual drawer.

When using wire manager worksurfaces in back-to-back configurations, the power/data drawer can be shared between the users depending on user electrical needs. It should align with the wire manager. The drawer can extend forward to store the excess cabling under the wire manager.

Power/data drawers are not intended for use against a wall or in conjunction with Systems panels.

Related Products

Factory-installed grommets in worksurfaces are located so excess cabling will fall directly into the drawer.

Power/data center (99KPDCAM) may be mounted above the surface on 36"D worksurfaces with a power/data drawer.

Use of a power/data center on a 24" or 30"D surface in conjunction with single power/data drawer is not possible due to clearance.

Note: Use two smaller power/data drawers on a single worksurface to allow power/data center, clamp-mounted accessories, or through-grommet accessories to extend below the surface between the power/data drawers.

Power/Data Overview	➤See page 64
Single-Circuit Power	67
Four-Circuit Power	68
Hardwire Power	71

Power/Data Overview	➤ See page 64
Perks Power/Data Drawer	65
Four-Circuit Power	68
Hardwire Power	71

IMPORTANT: The power/data products shown in this section are part of our Perks offering.
➤ See Perks Price List to specify.

Perks power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or four-circuit; they cannot be used interchangeably.

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.

All single-circuit components are U.L. 962 Recognized and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.
Note: Any field modification of the electrical components voids the U.L. listing.

The following components comprise the single-circuit system:

- Power in-feed
- Duplex receptacles with an attached 12" modular feed
- 12", 24", 48", 74", 96" and 120" jumper cables

For ease in installation, jumper cables feature a squeeze-latch connector and will only plug into one way.

Power in-feed is a 10' cord with a "smart box" that monitors the number of receptacles connected. The system will automatically shut off if more than eight receptacles are plugged into the power in-feed. One end of the cord features a three-prong plug that plugs into a standard 110 volt, 15 amp wall or floor outlet.

12" and 24" jumper cables connect duplex receptacles inside the power/data drawer.

Power in-feed sits on the bottom of a power/data drawer.

Duplex receptacles snap into the power/data drawer. Receptacles feature a 12" modular feed with a double-out interface. Power is brought to the receptacle by a power in-feed or jumper cable, and power is passed to adjacent components by a jumper cable forming a daisychain.
➤ See page 66 for receptacle recommendation chart.

Jumper cables feature a squeeze-latch connector.

When planning jumper cable lengths to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

For jumping between receptacles inside a power/data drawer, 12" jumpers are recommended for drawers that are 50"W or smaller; 24" jumpers are for 56"W and wider drawers.

In 120° applications, 24" jumper cables can be used to jump from one power/data drawer to another.

Jumpers must be secured every 24" when spanning under the worksurfaces.

48" jumper cables can be used to connect one power/data drawer to another. They can span over one Progressive Priority 15"W pedestal.

74", 96", and 120" jumpers are for use when spanning over Priority Progressive storage.

Duplex receptacle

This system should not be plugged into a GFCI outlet receptacle. The single-circuit system contains an overload breaker, and the sensing circuit in the "smart box" can affect the sensitivity of a GFCI power feed, causing the GFCI duplex receptacle to trip.

Single-circuit mini-adapt power module features an 18" modular feed with a double-over interface. The unit contains two receptacles for desktop power access. A hand-tightened clamp on the back of the unit allows flexibility for positioning it at the back of the worksurface.

Power/Data Overview	➤ See page 64
Perks Power/Data Drawer	65
Single-Circuit Power	67
Hardwire Power	71

Perks power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or four-circuit; they cannot be used interchangeably.

Four-circuit components combine to form an 8-wire, 4-circuit, power system.

All four-circuit components are U.L. 1286 Listed and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.

Note: Any field modification of the electrical components voids the U.L. listing.

The following components comprise the four-circuit system:

- Hardwire power in-feeds (two options) or ceiling power entry
- Power distribution assemblies
- Duplex receptacles
- Jumper cables

For ease in installation, the connectors will only plug in one way.

There are three ways to bring power to the system:

- 10' floor/wall power in-feed;
- Modular wall starter and modular 10' power in-feed; or
- 12' ceiling power in-feed

IMPORTANT: Power in-feeds entering the power/data drawer from the floor or wall must be secured/protected by a flexchain, expandable cable manager, vertical cable manager, or secured to the legs.

Jumper cable

Floor or wall power in-feed

Duplex receptacle

Power distribution assembly

Modular wall power in-feed starter plate

Floor/wall power in-feed features a 10' liquid tight conduit with a pigtail on one end that must be wired by a licensed electrician to a wall or floor-mounted junction box. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

Modular wall power in-feed features a 10' modular conduit with a squeeze-latch connector on each end. One end must connect to modular wall starter, specified separately, the other end connects to a power distribution assembly. Modular wall starter must be wired to building power by licensed electrician.

Note: This modular power in-feed option allows you to unplug the cable from the wall and store away when not in use.

Ceiling power in-feed features a 12' flexible, galvanized metal conduit with a pigtail on one end that must be wired by a licensed electrician to a junction box in the ceiling. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

Circuit Configurations

Power/data flexible ceiling pole is available to conceal ceiling power in-feed and other data cables. Pole is a flexible, metal conduit. Outer diameter of pole is 2 1/8"; inner diameter is 2".

Trim plates can be specified for field installation to conceal the intersection of the flexible ceiling pole at the ceiling and work surface.

Power distribution assembly supplies power for four duplex receptacles within a power/data drawer. Power distribution assemblies are 36" long.

Duplex receptacles feature a 12" flexible, metal conduit and a single squeeze-latch connector to attach it to the power distribution assembly.

Receptacle models are numbered 1, 2, 3, 4, or 5 to correspond to the circuit to which they provide access.

Jumper cables feature a squeeze-latch connector on each end and are available in 24", 36", 48", 74", 96" and 120" widths. Jumpers are encased in a flexible, galvanized metal conduit.

Use 24" and 36" jumper cables inside the power/data drawer to connect power distribution assemblies and duplex receptacles.

When planning jumper cable lengths to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

Use a 48" jumper cables to connect a two power/data drawers on adjacent surfaces. 48" jumpers may also be used to span over one Priority Progressive 15"W pedestal.

78", 96", and 120" jumpers are for use when spanning over Priority Progressive storage.

Jumpers must be secured every 24" when spanning under the work surfaces.

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Hardware necessary for installation is shipped with all components.

Two wiring configurations are possible—

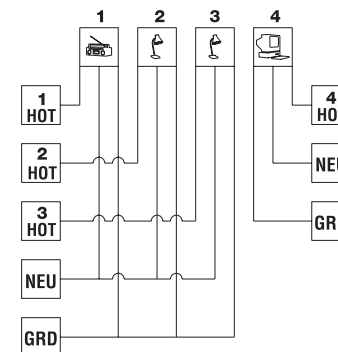

3 and 1 or 2 and 2—utilizing the same components.

Duplex receptacles used for both types of wiring configurations are the same. This simplifies specifications and allows a faster understanding of the system.

➤ See page 66 for receptacle recommendation chart.

A maximum of 13 duplex receptacles can be accommodated per circuit.

3 and 1 (8-wire):

- Three utility circuits share a neutral and common ground.
- One circuit with a DEDICATED hot, neutral and ground.
- Utilize receptacles #1, 2, 3 for utility and #4 for the DEDICATED ground circuit.

Circuits 1, 2, and 3 can be used for general electrical needs. Customarily, one or more of the circuits is reserved for lighting or other everyday uses, which allows control by central or master switching.

Circuit 4 consists of three separate conductors (hot, neutral, and ground) and meets the BIFMA/ANSI definition for a dedicated circuit.

Power/Data Overview	➤ See page 64
Perks Power/Data Drawer	65
Single-Circuit Power	67
Hardwire Power	71

2 and 2 (8-wire):

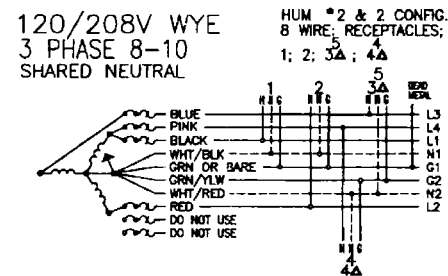

- Two DESIGNATED utility circuits and two DESIGNATED computer circuits.
- Utilize receptacles #1 and #2 for the designated utility circuits and receptacles #4 and #5 for the designated computer circuits.

Note: Receptacle #3 cannot be used in the 2 and 2 configuration. If receptacle #3 is used, possible cross feed or interference from utility circuits one and two can be introduced to computer circuits.

Circuits 1 and 2 provide a pair of designated circuits for general electrical needs, as described for the 3 & 1.

Circuits 4 and 5 provide a pair of designated circuits for computer applications.

The 8-wire, four-circuit configuration provides up to four circuits. Ideally a 4-wire, WYE, 208 volt service provides the best utilization.

Power/Data Overview	➤ See page 64
Perks Power/Data Drawer	65
Single-Circuit Power	67
Four-Circuit Power	68

City of Chicago:

The City of Chicago requires that an electrician hardwire the electrical components to the furniture. The electrician can install hardwire boxes into the bottom of the power/data drawer utilizing the pre-punched rectangular cut-outs. Holes for attaching the duplex to the hardwire box are also provided.

Hardwired receptacles must be placed in the drawer bottom knockouts and be installed facing the floor.

Flexible galvanized metal conduit is recommended so that the power/data drawer can still be extended for excess cable storage.

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Hardware necessary for installation is shipped with all components.

Hardwire components are also available to allow field hardwiring of power within the power/data drawer where required by local codes.

City of New York:

The City of New York requires that an electrician make the connection from the floor entry to the modular electrical system. The electrician can wire the floor/wall power in-feed hardwire boxes into the bottom of the power/data drawer using the pre-punched rectangular cut-outs. Power entry for NYC (model 99KP4FPFNYC) includes a modular floor/wall power in-feed, hardwire box and lid, 2' galvanized metal conduit to encase the power in-feed (not shown), and cover plate.

Statement of Line	➤ See page 22
Assembled Casegoods Product Info	73
Modular Worksurfaces Product Info	74
Finishes & Materials	209

Fully assembled and modular casegoods fit an extensive range of design, application, space, and budget challenges.

Wood veneers on wood and laminate with wood rim models are carefully selected and matched to assure proper balance and consistency.

Chassis and drawer/door fronts on laminate models feature thermally fused laminate (TFL). Grain direction runs top to bottom.

Laminate models offer great flexibility in finish selections. The worksurface, rim, drawer/door fronts, and chassis may be specified in different colors.

Pedestals are full height and letter width on assembled units. They connect directly to surfaces.

Drawer fronts are 3/4"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.

Worksurfaces are 1 3/16"-thick, 3-ply, balanced construction and available in wood or high-pressure laminate (HPL).

Worksurface rims are 1/8" thick. Softened and reed rim profiles appear on all four edges of the worksurface. Knife rim profile appears on the user edge and overhangs by 1 1/4"; side and back edges are flat. *Exception: Desks feature knife rim on the approach and user sides.*

Hinged access doors allow access to cable routing compartment. Both single- and double-pedestal desks feature two access doors, one on the left and one on the right on the approach side.

Opening below hinged access door allows cord to enter or exit the cable routing compartment on the approach side.

Materials:

- W** Wood worksurface, rim, and chassis
- LW** Laminate worksurface, wood rim and wood chassis
- L** Laminate worksurface, PVC rim, and chassis

Worksurface Rim Profiles:

P Softened PVC rim **F** Softened wood rim **M** Reed wood rim

S Knife wood rim

Laminate models are available with a softened PVC (P) rim profile. Wood and laminate/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

Pull Options:

➤ See page 76.

Statement of Line	➤ See page 22
Overview	72
Pricing	135
Finishes & Materials	209

Details

Exterior wood surfaces are available in the following veneers:

- Cherry (plain sliced, slip matched)
- Maple (plain sliced, slip matched)
- Walnut (plain sliced, book matched)
- Sapele (quarter sliced, slip matched) premium veneer; upcharge applies
- Zebrawood premium composite veneer; upcharge applies

Joints are securely fastened with dowels and mechanical fasteners to ensure maximum strength.

Drawer fronts are 3/4"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.

Drawer sides and back are 1/2" thick and wrapped in natural woodgrain vinyl. Bottoms are 3/16" thick.

Optional wood drawers are available on wood and laminate with wood rim/chassis units. Drawer sides and back are 1/2" thick with veneer faces. Bottoms are 1/4" thick with veneer faces. Interiors are sealed, sanded, and finished with a clear durable topcoat.

Drawer suspensions feature black slides with precision steel ball bearings to ensure long-lasting, quiet, smooth operation. Box, file, and lateral file drawers feature full extension slides.

Black filing rods are standard in all file drawers to accommodate various filing requirements.
➤ See page 237 for filing capabilities.

Face-mounted locks are standard on all desks, credenzas, returns, and undersurface pedestals. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.
➤ See page 232 for lock information.

Note: Details above also apply to Priority Classic modular workspaces, support, and storage.

Technology Features

Hinged access doors allow access to cable routing compartment. Both single and double pedestal desks feature two access doors, one on the left and one on the right on the approach side.

Opening below hinged access door allows cord to enter or exit the cable routing compartment on the approach side.

Structural panel separates the drawers from the cable routing compartment to prevent unwanted access to the drawer contents.

Hinged modesty panel, standard on assembled bridges, returns, kneespace, and single pedestal credenzas, swings inward to allow access to wall outlets. It lifts from the floor and is held in place by leveling feet.

Black half-round grommet is available factory installed at the top center of hinged modesty panels; upcharge applies.

Cord openings are standard on fully assembled desks on the kneespace side of each pedestal just below the worksurface, as well as on the user's side of end panels on single-pedestal desks and single-pedestal credenzas for routing cables to return units.

Two cord openings with black grommets—one in the back lower corner of each pedestal side panel—are standard on assembled returns and credenzas.

A variety of factory-installed worksurface grommet options are available.
➤ See page 150.

Connections

Returns and bridges with knife rim profile have a reverse knife edge on abutting edges to provide a flush fit with the adjoining surface.

Flush installation Recessed installation

Hinged modesty panels can be installed in a flush or recessed location. Flush installation visually lines up modesty panel with the adjoining side panels for an exposed orientation. Recessed installation insets modesty panel 6" from the back edge of the work-surfaces to create an area to store cords and cables. Recessed modesty panel allows the whole unit to be placed flush against the wall.

IMPORTANT: Single-pedestal desks and single-pedestal credenzas are not intended for use as standalone units.

Statement of Line	➤ See page 22
Overview	72
Pricing	145
Finishes & Materials	209

Details

Modular worksurfaces are sized in 6" increments that correspond to Priority pedestals and storage. Appropriate bracketry is included. They are available in laminate, laminate with a wood rim, and wood.

IMPORTANT: Fully assembled models and modular components may be used together in the same configuration.

P Softened PVC rim **F** Softened wood rim **M** Reed wood rim **S** Knife wood rim

Laminate models are available with a softened PVC (P) rim profile.

Wood and laminate/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

Attachment brackets based on the application specified are standard on all worksurface shapes.

Connections

Note: Arrows on illustration indicate grain direction.

Modular worksurfaces are interchangeable; however, to receive the correct brackets, the application—main (M), extension (E), or filler (F)—must be specified. Main surfaces receive no attachment hardware; extension surfaces receive 2 flat brackets; and filler surfaces receive 4 flat brackets.

➤ See pricing pages for bracketry options by worksurface shape.

If the application or position of the work-surface needs to be changed, it can be accomplished by changing the bracketry. *Exception: All desk worksurfaces must be used as a "main" worksurface.*

24"D rectangular worksurfaces are for use with 24"D pedestals.

Worksurfaces can be scribed on site to conform with oblique angles, irregular column placement, and historical preservation guidelines. These are just a few instances where this capability becomes an asset.

Filler and extension surfaces with knife rim profile have a reverse knife edge on abutting edges to provide a flush fit with the adjoining surface. Back and exposed side edge of extension worksurfaces are flat.

Main knife rim worksurfaces cannot be used adjacent to a corner worksurface.

Planning Factors

The maximum recommended span of an unsupported worksurface is 48" using Classic storage and support; longer distances require additional support.

A variety of factory-installed worksurface grommet options are available.

➤ See page 150.

The maximum span for an unsupported worksurface can be extended to 96" between Classic pedestals, end panels, or storage units by utilizing Progressive starter brackets and appropriately sized undersurface support rails. Starter brackets would be placed at the side of the storage unit and/or end panels even with the top of the pedestal. Rails would connect to starter brackets at both ends. Storage units will be defaced.

For example: To span 72" unsupported, specify a 72"W (nominal) undersurface support rail and a starter bracket for each storage unit/end panel.

➤ See the Progressive planning section for more information.

Consider the load a worksurface will carry when planning support. Additional support is recommended for surfaces where heavy equipment will be placed. Support can be placed where needed without the limitations of predrilled or predetermined locations.

➤ See following page for modular support product information.

Statement of Line	➤ See page 22
Overview	72
Pricing	157
Finishes & Materials	209

Details

IMPORTANT: Fully assembled models and modular components may be used together in the same configuration.

Modular support components are designed to support classic workspaces.

End supports can support the non-pedestal end of a workspace to create a single-pedestal desk or credenza in freestanding, L-, or U-configurations. End support consists of an end panel, back/modesty panel, and two support panels.

Undersurface pedestals, low storage with support drawers or shelves, and modesty panel/cable surround can also support the end of workspaces.

➤ See page 25 for Classic storage components.

➤ See page 78 for Progressive/Classic storage components.

Hinged modesty panels are for use in conjunction with undersurface pedestals and workspaces to create an enclosed kneewell. A black half-round grommet is available factory-installed at the top center on hinged modesty panels; upcharge applies.

Classic height-adjustable U-leg is 27 $\frac{3}{4}$ "H and adjusts from 24 $\frac{3}{4}$ "–32 $\frac{1}{4}$ " in $\frac{3}{8}$ " increments. U-legs can be used to displace wood end panels on desks, returns or modular return and extension workspaces; not intended for use to create a freestanding table. End U-legs are available in 24", 30", and 36"D. Mid-support U-leg is 10"D and is for use on 24"D, 30"D, and 36"D surfaces only. All adjustable U-legs feature a button that indexes into notches in the inner leg member. By depressing the button, the leg releases the lower leg assembly. This gives the user the ability to change the height as needed throughout the day. Legs can be used with classic Priority, Definition or Footprint workspaces. For 1 $\frac{3}{16}$ " workspaces, support is required every 48"; for 1 $\frac{9}{16}$ " workspaces, support is required every 60".

Hinged modesty panels are used to build bridges and returns along with workspaces and pedestals.

Full-height wood or laminate modesty panels are for use in conjunction with rectangular, P-shaped, or U-shaped workspaces, an end panel, and a square metal column base or wood half-cylinder base. Grain runs horizontal on laminate model. Field installation of grommets is recommended to ensure placement of the grommet on the user's side of the modesty panel.

Partial-height glass modesty panels are for use in with P- or U-shaped workspaces, an end panel, and a square metal column base or wood half-cylinder base.

T-leg end panels can also be used to support the end of a workspace when there is no pedestal. Modesty panel cannot be used in conjunction with T-leg end panels. They cannot be used with a modesty panel.

5" and 11" T-leg end panels are for use on top of low storage to support workspaces. 5"H model sits atop 22"H storage; 11"H model is for use with 15"H storage. Component top is required.

Connections

Hinged modesty panel always spans between two pedestals or between a pedestal and an end-support panel. It cannot extend behind the back of a pedestal. They attach to the underside of the workspace and do not deface the sides of adjacent pedestals. They can be installed flush with pedestal back or recessed. Hinge feature on modesty panels allows easy access to wall power.

Corner-support panels are used with corner workspace. Assembly includes modesty and wing support panels. Corner workspace is specified separately.

Planning Factors

The maximum recommended span of an unsupported workspace is 48"; longer distances require additional support.

Consider the load a workspace will carry when planning support. Additional support is recommended for surfaces where heavy equipment will be placed. Support can be placed where needed without the limitations of predrilled or predetermined locations.

12"D workspace mid-support panel (model 53K1128SSW) can be used for additional support. Workspace support panel does not allow modesty panel to hinge forward. Back edge is chamfered for cable management.

Details

Classic undersurface pedestals feature an open top or unfinished and a fully finished back panel. Pedestals connect directly to worksurfaces. Undersurface pedestals are available as:

- Box/box/file
- File/file
- Two-drawer lateral file
- Multi-file
- Hinged-door storage
- Printer/CPU storage

IMPORTANT: Classic storage models with open tops must be used with Classic modular worksurfaces, specified separately; they cannot be used with Progressive knife rim worksurfaces.

Three-drawer and four-drawer lateral files with open top are also available. These models have an unfinished back.

Locks are located in the upper right corner of the top drawer face.

Printer/CPU storage organizes printers, CPUs, and paper for easy accessibility.

Support drawers and shelves can be used as support on top of low storage. 5"H support drawer unit is for use with 22"H low storage; 11"H support shelf is for use with 15"H low storage. They replace the need for a T-leg end panel as worksurface support on low storage. Component top for low storage must be specified.

Finished top two-, three-, and four-drawer lateral files feature an interlock mechanism that allows only one drawer to be open at a time. Two-drawer units feature a finished back and cord openings; three- and four-drawer units have an unfinished back and no cord openings.

24"D pedestals feature two cord openings with black grommets—one in the back lower corner of each side panel.

30" and 36"D hinged-door pedestals include one fixed shelf and no cord openings.

Connections

Ganging adjacent lateral files is recommended.

Planning Factors

Classic undersurface pedestals can support the end of Classic worksurfaces. Pedestal depth must match desk worksurface end depth.

Hinged modesty panel always spans between two pedestals or between a pedestal and an end-support panel. It cannot extend behind the back of a pedestal.

Storage & Tables

Furniture that works in both Classic & Progressive applications

Overview

Products in this section are universal to both Progressive and Classic styles. Items not mounted below the worksurface, such as low storage, overheads, highback organizers, vertical storage, and tables, can complement both classic and progressive office layouts.

Overheads, highback organizers, and set-on-surface storage are available in a variety of door selections.

Modesty panel/cable surround conceals power and data below the surface and can also provide support in progressive and classic applications.

Utilize low storage for storage, extra work area, occasional seating and to divide space.

Vertical storage can be used in private office, open plan, and benching applications.

Low storage, when used with component worksurfaces and additional support such as a short end panels or modesty panel/cable surround, can provide support for worksurfaces and create a layered affect to the workstation.

Face-mounted locks are standard on all undersurface storage and optional on storage doors above the worksurface.

Progressive/classic overheads can be wall-mounted or Traxx-mounted as shown here.

Stand-alone tables utilizing fixed, round, or square bases complete the office.

➤ See page 6 for Progressive and Classic distinctives.

Details

Pedestals and low storage units are available in wood or laminate and are finished on all sides. Laminate units offer flexibility in color selection in on drawer fronts, back and chassis. This option enables you to utilize storage elements to create an environment to meet your brand and image.

Anti-tip mechanism and lock are standard on all mobile pedestals and low storage with drawers. Mobile low storage units also include counterweights.

Mobile cushion-top pedestal provides occasional seating as well as storage. The 24"H box/file mobile pedestal easily stows under surfaces in both progressive and classic applications.

Mobile box/box/file and file/file pedestals stow under surfaces in Classic applications only. **IMPORTANT:** In Progressive applications, these pedestals interfere with the undersurface support rails; they can be used next to a progressive surface but not underneath.

23"H active file provides two divided sections in the top area to place papers and folders for easy access to work-in-progress. The open slot in the rear of the pedestal allows for hanging Pendaflex® folders for hot project files. Lock in bottom drawer locks both box and file drawer. Active file easily stores under surface of Progressive and Classic offices.

Low storage is available freestanding or mobile. Units are available in two heights (15³/₁₆" and

21³/₈"H), two widths (30" and 36"W), and in two depths (16" and 24"D). Low storage is available in a variety of configurations, including open bookcase, open/lateral file and box/lateral file.

Mobile low storage units feature inset casters enabling the mobile and freestanding units to align when sitting next to each other. Mobile low storage cannot be used to support worksurfaces or other storage.

Priority low storage bottom drawers align with other Priority storage units to keep a consistent visual within the office.

Connections

Use component tops to span multiple low storage units for a cleaner aesthetic.

15"H open bookcase features three holes spaced 3³/₁₆" apart and accepts either three straight or organizer shelves, specified separately.

22"H open bookcase features a fixed shelf. There are two holes spaced 3³/₁₆" apart above the fixed shelf to accept either two straight or organizer shelves. There are 3 holes below the fixed shelf to accept either three straight shelves or organizer shelves, specified separately.

22"H open/lateral file unit accepts either two straight or organizer shelves in open area. If using as a pedestal cushion or component top with an open/lateral, shelves cannot be used in the top position.

Planning Factors

Component tops in either softened or knife rim are required for the box/lateral file units. Knife rim component tops extend 1/4" beyond the drawer fronts.

If using low height storage in conjunction with end panels for support, 1³/₁₆" component tops are required to span the low storage. 5" or 11" end panels are then placed atop the storage and properly align to undersurface height.

If using low height storage as freestanding units, component tops are required for the box/lateral unit but not required on other units.

Low storage cushion, specified separately, is the same thickness as the component tops (1³/₁₆" for visual alignment. In depth, the pedestal cushion aligns with the drawer fronts on the low height storage.

Open areas in the low storage accept either straight or organizer shelves. Organizer shelves should be installed with the organizer leg pointed downward. To add color contrast to units, specify shelves in different finish or material than the low storage unit.

33"H highback organizers can be used above freestanding, fixed-height low storage with component tops to divide space and provide additional storage.

If using low storage in a freestanding application without component tops or with a high-back organizer, pedestal ganging bracket (KACGB1) is recommended.

Overview	➤ See page 77
Statement of Line	29
Pricing	173
Finishes & Materials	209

Details

Modesty panel/cable surround is available in wood 6"H or 12"H models to conceal power and data cables below the surface.

Modesty panel/cable surround can be used in either Progressive or Classic applications. It features 13/16"-thick end panels and 3/4"-thick modesty panels.

Planning Factors

For Progressive applications, specify starter bracket and appropriately sized undersurface support rails for the worksurface. Starter bracket should be mounted flush to the top edge of the surround. The "floating top" appearance will be only on the opposite end where the end panel or leg connects to the surface.

For Classic applications with unsupported spans of 48" or greater, the surround can be used as an end panel above low storage, connecting to a starter bracket mounted flush to the top of the surround. Undersurface support rails would have to be used to connect to a solid end panel or storage on the opposite side. For unsupported spans of less than 48"W, additional support is not required.

Modesty panel/cable surround also functions as an end panel when used with low storage. A component top must be specified for low storage for this application.

Overview	➤ See page 77
Statement of Line	30
Pricing	174
Finishes & Materials	209

Details

Overhead storage cabinets are 16"D and with wood or laminate chassis.

Sliding-door overhead cabinets are 16"H and available in widths from 30"–72". They feature one non-locking, solid or writable glass door that can slide from side to side. One side of the unit will be open at all times; center panel divides the space.

Hinged-door overhead cabinets are available in 30", 36", 48", 60", 66", and 72" widths. These 19"H units offer solid, opaque glass, or writable glass doors.

Finished inset top, finished bottom, and apron rail conceal lighting.

2 door

3 door

4 door

Hinged-Door Configurations:

- 30"W and 36"W overhead storage cabinets have 2 doors.
- 48"W overhead storage cabinets have 3 doors.
- 60"–72"W overhead storage cabinets have 4 doors.

Note: A support panel divides the interior into separate sections as indicated above.

Wood hinged four-door models feature one set of doors with matching grain pattern; laminate models feature two sets of two-doors that match.

Back panels are inset between the end panels on both wall-mount and Traxx-mount models for a neat appearance.

Wall-mount models include attachment brackets and rail.

Traxx-mount models include an attachment bracket. Traxx and tiles must be specified separately.

Connections

Overhead storage cabinets can be Traxx or wall mounted. 30"W overheads must be supported by at least two solid attachment points on a wall. 36"W must be supported by at least three solid attachment points on a wall. 48", 60", 66", and 72"W overheads must be supported by at least four solid attachment points on a wall.

Related Products

Interior shelves, specified separately, are available for wall-mount sliding door overheads to enhance organization.

➤ See page 175.

Glass Pattern/Door Frame Finish:

- Opaque Frost glass (11) with Silver Frost frame (510); available on hinged-door models only
- Ice Gloss Writable Glass (202G) with Silver Satin frame (511)

Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.

Details

Sliding-door highback organizers feature a wood or laminate chassis and one non-locking, solid or writable glass door that can slide from side to side. One side of the unit will be open at all times; center panel divides the space.

33"H sliding-door models are available in 60", 66", or 72" widths. Back is finished and the area below the cabinet is open for use in open plan applications.

38"H sliding-door models are available in 60", 66", 72", 90", and 96" widths. Back is unfinished and is for use in private office applications. Back panel features three black plastic grommets with cover (one at top center and one in each lower corner).

Grain direction on laminate backs 60"W or wider runs horizontally.

Hinged-door highback organizers are available in widths ranging from 60"–108"; they are 38"H (nominal). Back is unfinished for use in private office applications. These units are offered with solid, opaque glass, or writable glass doors.

4 door

6 door

Hinged-Door Configurations:

- 60"–72"W overhead storage and highback organizers have 4 doors.
- 90"–108"W highback organizers have six doors.

Note: A support panel divides the interior into separate sections as indicated above.

Wood hinged four-door models feature one set of doors with matching grain pattern; laminate models feature two sets of two-doors that match.

Finished, inset top and apron rail conceals lighting.

Back panels on overhead storage cabinets are inset between the end panels on both wall-mount and Traxx-mount models for a neat appearance.

Connections

33"H highback organizers can be used above freestanding, fixed-height low storage with component worksurfaces to divide space and provide additional storage.

➤ See dimensions and illustrations at right.

If using low storage in a freestanding application without component tops or with a highback organizer, pedestal ganging bracket (KACGB1) is recommended.

Highback organizers require proper support, such as non-adjustable legs, end panels, or pedestals directly under the worksurface where the end panel of the highback rests.

Planning Factors

Highback organizers can be specified with set-on-surface storage to create a variety of configurations.

Related Products

38"H highback organizers accept slat tiles or tackboards, specified separately.

Details

Set-on-surface bookcases are for use on top of worksurfaces. Chassis is 16"D and available in wood or laminate. Single-door, double-door, and open bookcase models feature two ¾"-thick shelves; top shelf is adjustable.

Set-on-surface organizers can be used in conjunction with set-on-surface bookcases, highback organizers, and overheads.

Doors are available in solid, opaque glass, and writable glass options. Glass doors are non-locking.

Connections

Ganging adjacent units is recommended. Ganging bolts are included.

Planning Factors

Set-on-surface models align with highback organizers for a clean aesthetic.

Nominal widths of 15", 18", 30", and 36" can be used together to create a workwall. Bookcases and organizers can be used together.

IMPORTANT: Set-on-surface storage is not intended for freestanding applications.

Related Products

Project trays, specified separately, are available for use in 18"W set-on-surface organizer models; they will accommodate up to five project trays.

➤ See page 182.

16"D

Details

16"D vertical storage is available in space divider and bookcase/lateral file models. Both are offered in laminate or wood.

►See applicable price list for additional information on options.

Space divider vertical storage units provide storage as well as side-to-side privacy. These units can be positioned so that the overhead section spans above the worksurface while the box/lateral file spans below the surface; open area is 11 $\frac{1}{16}$ ". Units are 16"D x 29 $\frac{1}{4}$ "W and 48 $\frac{7}{8}$ "H and available in left or right orientation. Units feature a two piece, non-matched back panel set for the upper and lower sections.

Each space divider unit consists of:

- Bottom section with a wide box/lateral file with lock in bottom drawer; anti-tip device is standard in bottom drawer.
- Middle section with cubby area on one side (with back panel on full back model) and open area on the other.
- Top section with hinged door on one side and cubby area on the other.

Bookcase with two-drawer lateral files are available in nominal heights of 50", 67" and 80"H in wood or laminate. Lock in top drawer position. These units can be used to divide space in open plan areas. Units feature finished backs with finished inset top. Full back units for the 67" and 80"H units feature three-piece matched back panel set. Partial back units have open center sections and feature two-piece non-matched back panel sets.

All bookcase vertical storage models accept straight or organizer shelves in 20 $\frac{1}{16}$ "H center area, specified separately. 50"H units feature bookcase area with five holes spaced 3 $\frac{1}{4}$ " apart. 67" and 80"H units feature center section with five holes spaced 3 $\frac{1}{4}$ " apart.

Top section with center divider is available with one sliding door (non-locking) or two hinged doors in wood, laminate or writable glass. Hinged doors feature pulls in vertical position with locking or non-locking doors. Top section has 7 holes on 67"H model or 17 holes on the 80" model, spaced 1 $\frac{1}{4}$ " apart to accept straight interior shelves for additional organization.

Overview	►See page 77
Statement of Line	32
Pricing	183
Finishes & Materials	209

Connections

IMPORTANT: All units must be ganged with provided ganging bolt and are not intended for use as a single, freestanding unit.

Starter brackets, specified separately, can be attached to back of unit. Starter brackets connect to undersurface support rails to support surfaces, displacing the need for a support leg on that side. Storage unit will be defaced.

►See page 54 for starter bracket planning information.

Planning Factors

Units are designed so that the middle sections align with worksurface heights; see illustration at left.

Center Back Panel
Installed on Opposite Side

Specify back panels separately in a different material or finish to add a band of color to the center section to create a non-monochromatic aesthetic. Center back panels on full-back models can be removed in the field and replaced with another in a different material or finish, or moved to the front of the unit, exposing the center section to the opposite side.

Vertical Storage

Product Information

24" and 30"D

Details

24" and 30"D vertical storage is available in a variety of shelf, door, drawer, and wardrobe configurations.

Open bookcase with letter-width file drawers have finished inset top and are 23½"D and 14¹⁵⁄₁₆"W. Three height options: nominal 42" and 50"H units have finished backs and one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf.

Front access vertical storage towers with finished inset top are available in left or right configurations and in nominal heights 42", 50", and 67". Nominal 42" and 50" H units have finished backs for use in open plan. Select from either box/box/file or file/file letter width drawer options with lock. Shelf storage above drawers include and one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf. Wardrobe area in applicable models includes removable coat rod and one fixed shelf 12" above bottom panel; interior width is 7⁷⁄₈"W. Door pulls are in vertical application and feature optional locking.

Side-access bookcase vertical storage towers with finished inset top are available in left or right configurations and in nominal heights 42", 50", and 67". Nominal 42" and 50"H units have finished backs for use in open plan. Select from either box/box/file or file/file letter width drawer options with lock. Shelf storage above drawers includes one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf. Wardrobe area includes removable coat rod and one fixed shelf 12" above bottom panel; interior width is 7⁷⁄₈"W. Door pulls are in vertical application and feature optional locking.

Side-access wardrobe units are 29¹¹⁄₁₆"D and are intended for end-of-run applications with wardrobe sections facing outward in left or right configurations. Available in nominal heights of 42", 50", and 67" with finished inset tops. 42" and 50" units have finished backs for use in open plan; 67" units have unfinished backs. Units are 15"W with either letter width box/box/file or file/file configurations with lock. Front-access single-door storage area has one adjustable shelf on 50"H units; and one fixed and one adjustable shelf in 67" units. Wardrobe area is 7⁷⁄₈"W; 42" wardrobe has one coat hook while the 50" and 67" units contain removable coat rod and fixed shelf 12" above bottom panel.

Overview	➤ See page 77

Pricing	190
Finishes & Materials	209

Single- and double-door units are 68"H nominal heights feature combinations of shelf storage. Single-door units are 18" or 30"W nominal with left or right hinged doors with shelf or wardrobe storage. Double-door units offer combinations of shelves and lateral file or shelves and wardrobe. All doors are optional locking; drawers are standard locking.

Connections

Starter brackets, specified separately, can be attached to back of unit. Starter brackets connect to undersurface support rails to support surfaces, displacing the need for a support leg on that side. Storage unit will be defaced.

➤ See page 54 for starter bracket planning information.

Planning Factors

Units are designed to complement Progressive and Classic applications.

When using storage in place of support legs, be aware of starter bracket location. In Progressive applications, bracket is mounted ¾" higher than in Classic applications.

Details

Freestanding shelving units are available in 42" or 50"H with finished backs. Shelves are $\frac{3}{4}$ " thick. These units align with other vertical units and can be used to divide space as well as provide storage. Top section accepts straight and organizer shelves or can remain open for binder storage.

Freestanding bookcases are available with arc front or straight front in laminate or wood. These units have finished inset tops and unfinished backs. Shelves are $\frac{3}{4}$ " thick. Both straight and arc front models are 35 $\frac{7}{8}$ " wide and feature 11 $\frac{7}{8}$ " shelf openings when shelves are in center position unless otherwise noted.

42"H shelving unit accepts up to four organizer shelves and one straight shelf. Straight shelf must always be used in top position. One adjustable shelf can be positioned up or down 1 $\frac{1}{4}$ "; shelves are $\frac{3}{4}$ " thick. 11 $\frac{7}{8}$ " shelf openings when shelves are in center position (excluding top section). Accommodates five straight shelves or four organizer shelves, and/or component top.

50"H unit accepts up to two organizer shelves and one straight shelf. Straight shelf must always be used in top position. Two adjustable shelves can be positioned up or down 1 $\frac{1}{4}$ "; shelves are $\frac{3}{4}$ " thick. 11 $\frac{7}{8}$ " shelf openings when shelves are in center position (excluding top section). Top area holds two organizer shelves or three straight shelves, and/or component top.

Straight front units are 15 $\frac{3}{16}$ "D and feature adjustable shelves as noted below that can be positioned up or down 1 $\frac{1}{4}$ ".

- Two-shelf unit features one adjustable shelf and is 27 $\frac{9}{16}$ "H.
- Five shelf unit features three adjustable shelves and is 66 $\frac{7}{8}$ "H. Top opening is 13 $\frac{3}{8}$ ".
- Six-shelf unit is available in two heights: 79 $\frac{3}{16}$ " or 84". Both units offer three adjustable shelves. 79"H unit has 13 $\frac{3}{8}$ " opening in top position while the 84" model has a 17 $\frac{5}{16}$ " top opening. 84" ships with a tip-resistant kit and must be attached to a wall.

Arc-front bookcases feature shelves that extend 3" beyond the 15 $\frac{3}{16}$ " end panels.

- Two shelf unit is 27 $\frac{5}{8}$ "H with one adjustable shelf.
- Three shelf unit is 40 $\frac{1}{4}$ "H with one adjustable shelf.
- Four shelf unit is 35 $\frac{7}{8}$ "H with two adjustable shelves.
- Five shelf unit is 52 $\frac{7}{8}$ "H with three adjustable shelves.

Details

Table tops are available in wood, laminate with wood rim, and laminate with a PVC rim. Select from round, square, racetrack, and ellipse shapes.

Table tops are 1 $\frac{3}{16}$ " thick, 3-ply, balanced construction. Rims are $\frac{1}{8}$ " thick.

P Softened PVC rim **F** Softened wood rim **M** Reed wood rim **S** Knife wood rim

Laminate models are available with a softened PVC (P) rim profile.

Wood and laminate/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

Base requirements differ based on the table top shape and size.

➤ See page 87 for base requirements.

Cylinder base is available in wood or laminate. For use with round, square, and racetrack tops. Specify two for racetrack tops.

Round and square bases are available in fixed and adjustable-height (gas lift) models. Height-adjustable models are standard with a release paddle for field installation on the underside of the top. Adjustment range is 16" from 26"–42"H. Accepts round 36" or 42" 1 $\frac{3}{16}$ " table tops only; neither base accepts casters.

Column legs are specified singly and are available in static model with glide or mobile model with locking caster. They are available in a paint finishes or chrome. These can be used to support table tops or as support at the end of a worksurface.

Adjustable-height column legs feature a fluted surface and are available in cinder, platinum metallic, or silver frost metallic finish. Static model or mobile model with locking caster are available; both models may be set to heights ranging from 25 $\frac{3}{4}$ "–34 $\frac{5}{8}$ " (without top) to allow the table to nest under other worksurfaces or tables. Mobile models are not applicable to 36" round top. Standard model includes set of four legs.

Modesty panels are available to attach to the underside of 36" x 72" racetrack or 40" x 72" elliptical table tops. They feature a metal frame with silver frost finish and an opaque frost glass insert.

Select contemporary table bases, available as part the Kimball Office contemporary tables offering, are available for use Priority table tops:

- 24"-diameter cylinder base (CBS2724CYL)
- 16" soft-square (CBS1627SSW)
- 16" square (CBS1627SQW)
- 24" square (CBS2427SQW)

➤ See the Tables Price List to specify.

Fixed-height T-leg and post-leg style bases, similar to Progressive height-adjustable bases, but with no height adjustability, are available. Fixed-height T-leg bases are applicable to rectangular worksurfaces or racetrack table tops. Fixed-height 90° and 120° bases (shown above) are applicable to 90° and 120° worksurfaces, respectively. These bases ship ready to assemble. Plastic leveling inserts located at the bottom of the feet provides 1" of adjustment. Aluminum foot on T-legs can be specified in polished (upcharge applies) or in a contrasting color from the column. The maximum kneespace clearance is 20 $\frac{9}{16}$ ".

➤ See the pricing pages for the size of base required based on the table top size.

Fixed-height T-leg bases, for use with 24", 30", and 36"D worksurfaces, consist of one or two T-legs with feet and a set of undersurface support rails that run underneath the center of the worksurface. Return mounting bracket is included with the return model. Specify two flat brackets separately for return applications.

Maximum load*: 400 lbs. BIFMA/670 lbs. UL
Max. load L-config*: 775 lbs. BIFMA/1300 lbs. UL

*Maximum load for tables with casters is 120 lbs.; applies to all table base types.

Fixed-height extension post-leg bases consist of one or post-leg and a set of undersurface support rails that run underneath the center of the worksurface. They are intended for use as a return base. Depending on the depth of the main worksurface and the depth of the extension worksurface, the post will be inset approximately 12"–15" from the end of the extension worksurface. Return mounting bracket is included. Specify two flat brackets separately for return applications.

Maximum load*: 400 lbs. BIFMA/670 lbs. UL
Max. load L-config*: 775 lbs. BIFMA/1300 lbs. UL

*Maximum load for tables with casters is 120 lbs.; applies to all table base types.

T-leg casters for field installation may be specified separately for tables up to 36"D x 96"W.

➤ See page 134.

Field installed caster kits for T-leg bases are available.

Note: Casters are not directly applicable to a 3-leg 90° or 120° base with center post. To create a mobile 3-leg table, order two caster kits, a return foot kit model 53KFKTR for the post leg, and hardware bag #2417313 (service parts) for screw to attach the foot and casters.

Workplace furnishings to support diverse work modes.

Priority benching undersurface support rails enable long spans between legs, ganging of adjacent tables, returns, 90° and 120° stations. Stanchions add functionality with fabric/slat tiles and center-mount capabilities for shelves and overheads. Systems-rivaling robust power/data capability. Manual or electric height-adjustable tables—seated adjustment and programmable memory available. Priority is SCS Indoor Advantage™ certified, may contribute to LEED credits, and is ANSI/BIFMA level® 3 certified.

Standard Includes

- Worksurface (120" and 144" widths are two-piece tops)
- Rim on four sides

Grain direction runs with the width on wood veneer and woodgrain laminate worksurfaces.
Exception: Grain runs with the depth on two-piece (120" and 144"W) worksurfaces with quarter-cut veneers (Monterey Oak, Canyon Oak, Tuscan Walnut, and Clear Zebrawood).

How to Specify

- 1 Model
- 2 Worksurface material:
 - L** = Laminate with PVC rim
 - LW** = Laminate with wood softened or reed rim
 - 1LW** = Laminate with wood knife rim
 - W** = Wood with wood softened or reed rim
 - 1W** = Wood with wood knife rim
- 3 Rim profile:
 - P** = Softened PVC (L models only)
 - F** = Softened wood (LW or W models only)
 - M** = Reed wood (LW or W models only)
 - S** = Knife wood (1LW or 1W models only)
- 4 Worksurface grommet/cutout option:
 - See page 101 for designators.
 - X** = No grommet or cutout
- 5 Worksurface finish price group:
 - STD** = Group 1
 - STD2** = Group 2 (+20%)
 - FSCW** = FSC-certified group 1 wood (+3%)
- 6 Worksurface finish designator
- 7 Rim finish price group (omit for L, W, and 1W models):
 - STD** = Group 1
 - STD2** = Group 2 (+20%)
- 8 Rim finish designator (omit for W and 1W models)

IMPORTANT: Support rails must be specified separately.

*G20 cutouts cannot be used on surfaces supported by a main T-leg base.

Related Products

G19 metal grommets for field installation are also available. Note the location of support legs to ensure they do not interfere with grommet locations. ➤ See the Perks Price List.

G20 cut-out is designed to accept 8⁵/₁₆" x 5⁵/₁₆" power/data center (model 99KPD CAM), specified separately.

➤ See the Perks Price List.

Standard Includes/Available Finishes

G1 plastic grommet is a two-piece unit with snap-in lid. Lid cutout slides open to route cables or can be closed when not in use. Available finish: **MB** Matte Black

G19 metal grommet is a two-piece unit with black brush access. Available powdercoat finishes:

- 405** Designer White
- 487** Brushed Nickel
- 490** Polished Chrome
- 501** Platinum Metallic
- 514** Carbon Metallic
- 544** Silver Pearl

How to Specify

- ① Insert the location *and* finish designator into model number sequence as indicated on the corresponding pricing page.

Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.

For example:

G1LMB = G1 grommet, left, matte black

G19R501 = G19 grommet, right, platinum metallic

IMPORTANT: Only the grommet locations shown in the matrix with a designator and price are available. Arc-end, wedge, oval, and U-shaped worksurfaces do not offer factory-installed grommet options.

For 48" and 60"D Worksurfaces

G10 Grommets

C2 Cut-Outs

C3 Cut-Outs

Options

G10 grommet features a touch-latch for open and closure. Pops open for use; push down to close when not in use. Black plastic.

Related Products

C2 cut-out is designed to accept 10" power/data center (models KCU0810ELPDC or KCU0810ELPDCH), specified separately.

➤ See the Tables Price List.

C3 cut-out is designed to accept 40" power/data center (model KCU0840ELPDC), specified separately.

➤ See the Tables Price List.

How to Specify

- ① Insert the location *and* finish designator into model number sequence as indicated on the corresponding pricing page.

IMPORTANT: Only the grommet locations shown in the matrix with a designator and price are available. G10 grommets cannot be specified along with C2 or C3 power/data cutouts.

Flat Bracket				
2"	5 ¹ / ₂ "	1 ¹ / ₁₆ "	ACAWBP1	\$9

IMPORTANT: Return mounting bracket and flat brackets must be specified separately if installing rail set under a return or extension surface. Refer to the planning pages for required rail lengths of returns and bridges. If the length required is not listed above, order the next smaller size; the attaching brackets will compensate for the dimensional difference.

Standard Includes

- Set of 2 rails
- 90" and 96"W rails are comprised of 2 rails and a connecting bracket for the full length (4 rail sections)

Note: Both rails will run parallel under the same surface.

IMPORTANT: Tiles are for use on U-legs with stanchion only.

Center-Mount Shelves
➤ See page 118.

Center-Mount Overheads
➤ See page 116.

Standard Includes

- Tile and tile pan: fabric applied railroaded (horizontal)

Note: COM yardage is the quantity required for one tile.

How to Specify

- ① Model
- ② Fabric grade
- ③ Fabric number
- ④ Finish price group:
STD = Group 1
STD M = Group M (+10%)
- ⑤ Finish designator

Product Information	56
Finishes & Materials	209

Standard Includes

- Shelf, finished on both sides
- Rim on four sides

How to Specify

- ① Model
- ② Worksurface material:
 - L** = Laminate with PVC rim
 - LW** = Laminate with wood softened
 - W** = Wood with wood softened
- ③ Rim profile:
 - P** = Softened (L models only)
 - F** = Softened (LW or W models only)

Note: Reed (M) and Knife (S) rims are not available on center-mount overhead shelves.
- ④ Shelf finish price group:
 - STD** = Group 1
 - STD2** = Group 2 (+20%)
 - FSCW** = FSC-certified group 1 wood (+3%)
- ⑤ Shelf finish designator
- ⑥ Rim finish price group (omit for L and W rim):
 - STD** = Group 1
 - STD2** = Group 2 (+20%)
- ⑦ Rim finish designator (omit for W model)

T-leg Casters for Individual Tables

►See page 134.

How to Specify Our Products	►See page 3
Abbreviation Key	3
Product Information	59
Finishes & Materials	209

Standard Includes

- Undersurface rails
- Two manually adjustable T-legs (2³/₈"D x 2³/₈"W)
 - Incremental model adjusts from 21"–34"
 - Click model adjusts from 22¹/₂"–34⁵/₁₆"
 - Crank model adjusts from 26³/₁₆"–44¹/₂"; crank handle mounts on right
- Attachment hardware
- Ships ready to assemble

How to Specify

- ① Model
- ② Adjustability mechanism/base designator:
 - IMMP** = Incremental Manual Adjust
 - LMMP** = Click Manual Adjust
 - RMMP** = Crank Manual Adjust
- ③ Rail and column finish:
 - 405** = Designer White
 - 501** = Platinum Metallic (+10%)
 - 514** = Carbon Metallic (+10%)
 - 544** = Silver Pearl (+10%)
- ④ Foot finish:
 - 405** = Designer White
 - 497** = Polished Aluminum (+5%)
 - 501** = Platinum Metallic (+10%)
 - 514** = Carbon Metallic (+10%)
 - 544** = Silver Pearl (+10%)

Note: If the same metallic finish is specified for both the rail/column and foot, upcharge is applied only once per model.

Incremental

Click

IMPORTANT: Height-adjustable table bases are for use with 24", 30", and 36"D tops only. Crank-adjust return models are not available.

IMPORTANT: Two flat brackets, specified separately, are required.

(Non-programmable)

Programmable

How to Specify Our Products	►See page 3
Abbreviation Key	3
Product Information	60
Finishes & Materials	209

Standard Includes

- Undersurface rails
- Two electronically adjustable T-legs (2³/₈"D x 2³/₈"W)
 - Single-stage model adjusts from 26¹/₄"–45¹/₈"
 - Dual-stage model adjusts from 21¹/₁₆"–47¹/₁₆"
- Control box with up/down control switch; one box/switch will control main or main plus a return surfaces in an L-configuration; 10' cord
Note: Control boxes are not interchangeable. Specify based on application.
- Attachment brackets
- Ships ready to assemble

How to Specify

- 1 Model
- 2 Adjustability mechanism/base designator:
SEMP = Single-Stage Electric Adjust
DEMP = Dual-Stage Electric Adjust
- 3 Height-adjustment switch/control box:
STD_MAIN = Non-programmable for use with single main surface without a return or extension
PROG_MAIN = Programmable with digital readout (+\$124) for use with single main surface without a return or extension
STD_RETURN = Non-programmable (+\$52) for use in L-configuration when main surface is attached to a return or extension
PROG_RETURN = Programmable with digital readout (+\$176) for use in L-configuration when main surface is attached to a return or extension
- 4 Rail and column finish:
405 = Designer White
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)
- 5 Foot finish:
405 = Designer White
497 = Polished Aluminum (+5%)
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)

Note: If the same metallic finish is specified for both the rail/column and foot, upcharge is applied only once per model.

Single Stage

Dual Stage

IMPORTANT: Height-adjustable table bases are for use with 24", 30", and 36"D tops only.

IMPORTANT: Two flat brackets, specified separately, are required.

How to Specify Our Products	➤See page 3
Abbreviation Key	3
Product Information	60
Finishes & Materials	209

Standard Includes

- Undersurface rails
- One electronically adjustable T-leg (2³/₈"D x 2³/₈"W)
 - Single-stage model adjusts from 26¹/₄"–45¹/₈" at 1¹/₂" per second
 - Dual-stage model adjusts from 21¹/₁₆"–47¹/₁₆" 1¹/₂" per second
- Ships ready to assemble
- Return bracket
- Attachment hardware

Note: Rails will extend underneath the adjoining main surface for connection.

How to Specify

- ① Model
- ② Adjustability mechanism/base designator:
SERP = Single-Stage Electric Adjust
DERP = Dual-Stage Electric Adjust
- ③ Rail and column finish:
405 = Designer White
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)
- ④ Foot finish:
405 = Designer White
497 = Polished Aluminum (+5%)
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)

Note: If the same metallic finish is specified for both the rail/column and foot, upcharge is applied only once per model.

Single Stage

Dual Stage

IMPORTANT: Height-adjustable table bases are for use with 24", 30", and 36"D tops only. Extension post-leg bases are intended for use as a return base. Depending on the depths of the main and extension worksurfaces, the post-leg will be inset approximately 12"–15" from the end of the extension worksurface. Crank-adjust extension post-leg models are not available.

IMPORTANT: Two flat brackets, specified separately, are required.
►See page 102.

*Knife rim overhangs user side by 1¼".

Standard Includes

- File/file letter-width pedestal or 36"W multi-file pedestal (two box drawers, one file drawer, and one lateral file drawer)
- One lock in file/file pedestal; two locks in multi-file pedestal
- Hinged modesty panel (ships unattached; assembly required)
- Two cord openings
- Front-to-back grain direction on worksurface on file/file returns and wood multi-file returns; side-to-side on laminate multi-file return

How to Specify

- 1 Model
- 2 Worksurface/chassis materials:
L = Laminate with PVC rim/laminate
LW = Laminate with wood rim/wood
W = Wood with wood rim/wood
- 3 Pedestal option:
2 = File/file **10** = Multi-file
- 4 Rim profile:
P = Softened PVC (L models only)
F = Softened wood (LW or W models only)
M = Reed wood (LW or W models only)
S = Knife wood (LW or W models only)
- 5 Pull option:
 ➤ See page 76 for designators.
- 6 Lock option:
KRB = Key random, black lock core
KRS = Key random, silver lock core
KS = Key specific (-\$22 per lock); specify lock core(s) separately
- 7 Worksurface grommet option:
 ➤ See page 150 for designators.
X = No grommet
- 8 Modesty panel grommet option:
MG1MB = Center (+\$57)
X = No grommet
- 9 Worksurface finish price group:
STD = Group 1
STD2 = Group 2 (+20%)
- 10 Worksurface finish designator
- 11 Drawer front finish designator (omit for LW and W models)
- 12 Chassis finish designator (omit for LW and W)
- 13 Rim finish price group (omit for L & W models):
STD = Group 1 **STD2** = Group 2 (+20%)
- 14 Rim finish designator (omit for W models)
- 15 Wood interior drawer option (omit for standard drawers and L models):
WD = Wood interior drawers (+10%)

*Knife rim "main" worksurface cannot be used adjacent to corner worksurfaces.
➤ See previous page for **softened and reed rim** rectangular worksurfaces.

Standard Includes

- Worksurface (grain direction runs lengthwise)
- User's edge: knife rim profile (overhangs user side by 1/4")
- Side edges:
 - Flat (no rim profile) on "main" worksurfaces
 - Flat (no rim profile) on the pedestal side (exposed side edge) and reverse knife rim on abutting side on "extension" worksurfaces
 - Reverse knife rim on both sides on "filler" worksurfaces
- Back edge: flat (no rim profile)
- Attachment hardware

How to Specify

- 1 Model
- 2 Pedestal location (include for "extension" worksurface only):
 - R** = Right (shown at left)
 - L** = Left
- 3 Worksurface material:
 - LW** = Laminate with wood rim
 - W** = Wood with wood rim
- 4 Rim profile:
 - S** = Knife wood
- 5 Worksurface grommet option:
 - See page 150 for designators.
 - X** = No grommet
- 6 Worksurface finish price group:
 - STD** = Group 1
 - STD2** = Group 2 (+20%)
 - FSCW** = FSC-certified group 1 wood (+3%)
- 7 Worksurface finish designator
- 8 Rim finish price group (omit for W models):
 - STD** = Group 1
 - STD2** = Group 2 (+20%)
- 9 Rim finish designator (omit for W models)

Undersurface Storage
➤ See pages 151–152.

Support Panels
➤ See page 158.

Hinged Modesty Panels
➤ See page 155.

Worksurface grommets are located 3³/₈" from the side edge. Location relative to the approach or back edge is 13¹/₂" on arc worksurfaces (to top of arc), 7¹/₂" on all rectangular and extended desk worksurfaces, and 3³/₈" for all other surface shapes.

Standard Includes/Available Finishes

G1 plastic grommet is a two-piece unit with snap-in lid. Lid cutout slides open to route cables or can be closed when not in use. Available finish: **MB** Matte Black

G19 metal grommet is a two-piece unit with black brush access. Available powdercoat finishes:
405 Designer White
487 Brushed Nickel
490 Polished Chrome
501 Platinum Metallic
514 Carbon Metallic
544 Silver Pearl

How to Specify

- Insert the location *and* finish designator into model number sequence as indicated on the corresponding pricing page.

Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.

For example:

G1LMB = G1 grommet, left, matte black

G19R501 = G19 grommet, right, platinum metallic

IMPORTANT: Only the grommet locations shown in the matrix with a designator and price are available. Note: P-shaped and U-shaped worksurfaces do not offer factory-installed grommet options.

How to Specify our Products	➤ See page 3
Product Information	76
Finishes & Materials	209
Locking Information	232

Standard Includes

- Finished back panel
- Open top
- Lock
- Two cord openings with black grommets on 24"D pedestals only; one in the back lower corner of each side panel.

How to Specify

- ① Model
- ② Material:
L = Laminate
W = Wood
- ③ Pull option:
➤ See page 76 for designators.
- ④ Lock option:
KRB = Key random, black lock core
KRS = Key random, silver lock core
KS = Key specific (-\$22); specify lock core separately
- ⑤ Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
- ⑥ Wood finish designator (omit for L model)
- ⑦ Drawer front finish designator (omit for W model)
- ⑧ Chassis finish designator (omit for W model)
- ⑨ Wood interior drawer option (omit for standard drawers and L models):
WD = Wood interior drawers (+10%)

Ganging Brackets
➤ See page 207.

Standard Includes

- Finished back panel
- Open top
- Lock (except on printer/CPU storage model)
- Adjustable shelf on hinged-door model
- One lock on hinged-door, two-drawer lateral file, and box/box/open/lateral multi-file pedestal; two locks on box/box/file/lateral multi-file pedestal
- Door and drawer pull on each door/drawer; lateral file drawer on box/box/file/lateral multi-file pedestal has two pulls
- One adjustable shelf at top of printer/CPU storage; printer (bottom) shelf has a 100 lb. weight limit
- Interlock mechanism (allows only one drawer to be open at a time to help prevent tipping)
- Two cord openings with black grommets; one in the back lower corner of each side panel

How to Specify

- 1 Model
- 2 Material:
L = Laminate
W = Wood
- 3 Pull option (omit for printer/CPU storage model):
➤ See page 76 for designators.
- 4 Lock option (omit for printer/cpu storage):
KRB = Key random, black lock core
KRS = Key random, silver lock core
KS = Key specific (-\$22 per lock); specify lock core(s) separately
- 5 Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood; available on hinged-door and printer/cpu storage only (+3%)
- 6 Wood finish designator (omit for L model)
- 7 Drawer front finish designator (omit for W model)
- 8 Chassis finish designator (omit for W model)
- 9 Wood interior drawer option (omit for standard drawers, L models, and printer/cpu storage):
WD = Wood interior drawers (+10%)

IMPORTANT: End-support panels are used to support the non-pedestal end of a worksurface.

Mid-support features a chamfered back edge that allows cords to pass from one side to the other.

Rectangular Worksurfaces
➤ See pages 147–148.

Standard Includes

- Support or mid-support panel
- Attachment hardware
- Two cord openings on end supports

How to Specify

Hinged-Door Overhead Storage

Wall Mount or Traxx Mount

Pricing

GSA SIN 711-8
†GSA SIN 711-2
FSC-C01059 available

Standard Includes

- Recessed back panel: full height on wall-mount models; ¾-height on Traxx-mount models
- Finished inset top
- Doors on four-door models: one set of matching doors on wood models; two sets of two matching doors on laminate models
- Attachment brackets and rail on wall-mount models; Traxx overhead brackets on traxx-mount
- Ganging bolt

How to Specify

Solid Door Models:

- 1 Model
- 2 Attachment method:
M = Wall mount **T** = Traxx mount
- 3 Material:
L = Laminate **W** = Wood
- 4 Lock option:
KRB = Key random, black lock cores (+\$58 for two-door, +\$116 for three- and four-door)
KRS = Key random, silver lock cores (+\$58 for two-door, +\$116 for three- and four-door)
KS = Key specific (+\$36 for two-door [specify 1 lock core separately]; +\$72 for three- and four-door [specify 2 lock cores separately])
X = Non-locking
- 5 Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
- 6 Wood finish designator (omit for L model)
- 7 Front laminate designator (omit for W model)
- 8 Chassis laminate designator (omit for W model)

Glass or Writable Glass Models:

- 1 Model
- 2 Attachment method:
M = Wall mount **T** = Traxx mount
- 3 Door material:
G = Glass **G2** = Writable glass
- 4 Chassis material:
L = Laminate **W** = Wood
- 5 Glass pattern/door frame finish:
11 510 = Opaque Frost Glass/Silver Frost
202G 511 = Ice Gloss Writable/Silver Satin
- 6 Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
- 7 Chassis finish designator

Samples:

Samples of Kimball Office materials are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur between samples and finished products. Kimball Office carefully selects all materials used in every product, ensuring a commercially acceptable color and finish.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

Program Overview

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The fabric collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Wood Finishes

Special Wood Finishes

Kimball Office offers the following options for special wood finishes:

- Standard finish color on alternate wood species
- Previously developed special finish
- Custom finish

Standard finish colors available on an alternate wood species include:

- Amber on Maple
- Amber on Walnut
- Mocha on Walnut

These finishes can be specified without going through the finish approval process described at right.

Previously developed special finishes can be selected from an extensive library developed by Kimball Office. Samples of previously developed special finishes are available from Customer Service upon request.

Custom finishes can be developed to meet specific needs, if an acceptable match is not available in our library.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a finish color.

Applicability:

Applicability of special finish colors depends on the wood species to which they are applied. The matrix at right shows the types of woods used for each series.

Note: Special finishes are not available on Zebrawood, Canyon Oak, Monterey Oak, or Tuscan Walnut.

Upcharges:

A one-time fee of **\$300** (net) will be billed for the development of each new custom finish. This fee covers all Kimball Office product lines on which the finish may be used.

A **10%** upcharge per line item (model number) will be applied for a standard finish on an alternate wood species, a previously developed special finish, or a custom finish. This upcharge is calculated on the base price, before other option upcharges are added.

For upholstered products, the upcharge is calculated on the Grade 1 upholstery price then added to the price for the selected fabric grade, to arrive at the list price.

Custom Finish

Approval Process:

- ① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the \$300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.
- ② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. If not, a custom finish will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.
- ③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

Note: The one-time fee of \$300 will not be charged unless a custom match finish is required.

Wood Finishes	➤ See page 211
Laminate	214
Paint	216
Fabrics	219

How to Specify

① Model:

Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② Finish type:

For the "Finish type" step, insert a special code (in place of STD):

ZCHY1 = Special cherry finish

ZMAP1 = Special maple finish

ZWAL1 = Special walnut finish

ZSAP1 = Special sapele finish

Note: Choose the special finish code based on the standard wood species used in the product line (see matrix at left).

③ Finish designator:

For the "Finish designator" step, insert the designator below or the one provided to you by Customer Service:

MA00174KOG = Amber on Maple

WA02905KOG = Amber on Walnut

WA02905KOG = Mocha on Walnut

Wood Finishes

Characteristics, Care, and Maintenance Tips

Kimball Office's experience in wood finishing extends from past generations of craftsmen to present day state-of-the-art technology.

Our Pura® finish is a proprietary, water-based, ultra-violet (UV) wood finish that has virtually no volatile organic compounds (VOCs). It uses less energy than our conventional finishing process and meets or exceeds BIFMA Furniture Emission Standards (FES) and U.S. Green Building Council LEED requirements for indoor air quality. Pura is exceptionally clear and durable and allows the beauty of our wood to shine through. The durability, depth, clarity, and beauty of Pura meets the high expectations customers have of Kimball Office finishes.

Finish fill and sheen level for the top surfaces is appropriate for the design and wood species. If different specifications are required, contact Customer Service.

➤ See the individual chapters for fill and sheen information by line.

All wood products are very susceptible to darkening from age and exposure to UV rays (sunlight and other sources), especially cherry and maple. Although a special UV inhibitor is added to finishes, care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change of the wood.

Fine scratches from everyday use may be more visible on furniture with dark finishes. Darker finishes absorb more light, while fine scratches reflect the light. Therefore, scratches can be more emphasized due to this contrast. The use of a desk pad is recommended to keep scratching to a minimum.

The beauty of wood is that, as a natural product, it will have differences in grain characteristics, color, and other features among wood species. The characteristics of our top grade veneers are appreciated and welcomed; it's the differences in characteristics that offer each office a unique look.

Maple veneers are slip matched.

Brighton Maple is a clear finish for those who appreciate the inherent beauty of wood. Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

Walnut veneers are flat cut and applied book and center matched, except for Tuscan Walnut which is quarter cut.

Cherry veneers are slip matched. Grain characteristics of cherry veneer such as gum streaks and gum pockets occur naturally and add to the authentic look and feel of natural veneer. These are inherent to this veneer and should not be considered defects.

Oak veneer is quarter cut.

Specification of particular cuts, characteristics, or wood species can be accommodated. For example, a customer may ask for a limited amount of cathe-drals or very limited variation in color from one veneer flitch to the next. Kimball Office systems products are able to satisfy those expectations, as long as we are notified prior to order placement. Depending on the request, the higher grade veneer may require an upcharge. Orders would also need to be handled through our custom quote process.

The wood species on seating may vary from the wood species on the casegood or system. Different wood species offer unique texture and grain which provide more variation in finish color; however seating finishes are compatible with casegoods and systems finishes.

Wood Finishes	➤ See page 211
Laminate	214
Paint	216
Fabrics	219

To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth following direction of the grain.
- Dry with a separate cloth if needed.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.

Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminate surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

Customer-Specified Laminate

GSA Non-Contract

Customer-specified, high-pressure laminate (CSL) is available on select products.

- See page 214 for availability.
- Contact Customer Service to initiate approval.

Kimball Office reserves the right to decline a customer specified laminate which may not be suitable for application.

Kimball Office assumes no responsibility for the durability, consistent coloration or any other performance characteristic of a customer specified laminate.

Metal, embossed, specialty, and supplier discontinued laminates must be custom quoted.

- Contact By Design at 800.482.1616 extension 6002.

Kimball Office orders and procures all customer specified laminates.

Laminate sheen level must not exceed 60° for maximum durability of worksurfaces.

Lead times may vary for certain laminates. Minimum order quantities may apply.

Upcharges:

A **20%** upcharge per line item (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

Wood Finishes	➤ See page 211
Laminate	214
Paint	216
Fabrics	219

How to Specify

- ① Model:
Build the complete model specification (excluding the finish type and finish designator) by following the How to Specify on the appropriate pricing page for the product that is to receive the special finish.
- ② Finish type: For the "Finish type" step, insert a special finish code (in place of STD).
ZFMA1 = Formica
ZLMT1 = Lamin-Art
ZLTC1 = Lamitech
ZNEV1 = Nevamar
ZPTE1 = Pionite
ZWST1 = Wilsonart
- ③ Finish designator: For the "Finish designator" step, insert the laminate designator (color number) of the laminate to be applied to the product.

Fabric Application

Program Overview	➤ See page 210
Cut Yardage	219
Seating Upholstery	223
Cleaning Codes	220

Standard Application:

Directional fabrics are “cut up the roll” for standard application unless specified differently.

Railroad Application:

All fabrics will be applied in railroad (horizontal) fashion to:

- Xsite tiles
- Xsede tiles
- Priority tiles
- Stow wallpanels
- Tackboards greater than 48"W when using a seating fabric or greater than 60"W when using a panel fabric

When viewing swatch cards or memo samples, turn 90° to get an accurate indication of how the fabric will appear on when railroaded.

Railroad application of Kimball Office panel fabrics and COM for all products that are not listed above or do not have railroading listed as an option in the price list requires a custom quote.

➤ Please contact **By Design**.

Alliance Fabrics:

Kimball Office has formed partnerships with top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Lead times for alliance fabrics are based on supplier availability. Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply.

➤ Contact Customer Service for availability before finalizing orders.

The information provided in this section is the most current information available at the time this price list was printed.

Application of Alliance Program upholstery will be as depicted on the swatch card unless otherwise instructed on the order.

For memo samples of Alliance fabrics, contact our alliance partners directly.

Cleaning Codes:

Cleaning Code B

- Cleanable with diluted bleach solution

Cleaning Code D

- Dry clean only.

Cleaning Code L

- Use a clean cloth with warm water and mild soap as soon as possible.

Cleaning Code S

- Use only mild, pure water-free cleaning solvents.
- Cleaning by a professional furniture service is recommended.

Cleaning Code W

- Use water-based cleaning agents or foam.

Cleaning Code WS

- Use water-based cleaning agents or foam. Mild water-free solvents may also be used.
- Cleaning by a professional furniture service is recommended.

Fire Retardant Fabrics

- Solvent-based fabric cleaning or dry cleaning are recommended.
- Cleaning with water or water-based cleaners could result in salt ringing.
- Test proposed cleaning procedure on a small portion of fabric before cleaning entire piece.

Cleaning Leather:

Regular Cleaning

- Remove as much soil or staining as possible by carefully vacuuming or brushing.
- Dust with a dry or damp cloth.

Deep Cleaning

- Use mild non-detergent soap or cleaner. Wipe surface with a light circular motion. Repeat with clean water.
- Do not soak leather.
- Air dry.

Note: Never use furniture polishes, oils, solvents, varnishes, abrasive cleaners, ammonia, wax, or saddle soaps on leather.

Leather Characteristics:

Leather is a natural product. Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristic of leather.

Alliance Program Fabrics

For Use on Cushion-Top Pedestals and Low Storage Cushions

Kimball Office has formed partnerships with the top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

Patterns from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics are available in a variety of design aesthetics and price points to meet all of your fabric needs. Carded fabrics are listed in this price list. ▶See Surface Materials at www.kimballoffice.com for a wide variety of additional graded-in fabrics from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Application of Alliance Program fabrics will be as depicted on the website or memo sample unless otherwise instructed on the order.

Directional fabrics, such as stripes, patterns, and plaids, may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return.

Fabric that requires non-stock special treatments such as flame proofing, anti-microbial treatment, electrical conductive backing, water repellent, stain repellent, or acrylic backing are not part of this program. Such orders should be specified as a COM.

Alliance graded pricing includes the cost of the material. Repeat is also accounted for and no additional upcharge is required.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

IMPORTANT: The information provided in this section of the price list is the most current information available at the time this price list was published. Contact Customer Service before finalizing any orders to check availability.

Lead Time:

Lead times for alliance fabrics are based on supplier availability.

Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply. Contact Customer Service for availability before finalizing orders.

TB133:

Contact Customer Service about TB133 requirements.

Note: Many of these fabrics may pass additional flammability tests. Please inquire about compliance with specific regulations.

Samples:

Customer's Own Material (COM) and Leather (COL)

GSA Non-Contract

Program Overview	➤ See page 210
Cut Yardage	219
Seating Upholstery	223
Cleaning Codes	220

Customer's Own Material (COM) Policy:

While Kimball Office inspects fabrics for mill imperfections, some are difficult to recognize. Kimball Office is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring, appearance, or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Customers are responsible for ordering COM/COL and expediting delivery of the material, sent prepaid, to Kimball Office.

IMPORTANT: Kimball Office reserves the right to decline a fabric that may not be suitable for application to product.

COM Application Testing:

Application testing on product for non-preapproved fabrics is required.

➤ Contact your Customer Service Team for the appropriate forms to initiate application testing.

The application test will render your fabric either:

- Approved
- Not recommended
- Restricted

A "not recommended" result is usually due to questionable construction of the material or pattern that is difficult to align. You will be required to sign a waiver to use any "not recommended" COM.

U.L. Listing/Flammability:

COM must be U.L. listed for use on tiles for benching stanchions before Kimball Office accepts and enters an order which will have COM fabrics. All COM testing and processing costs are the responsibility of the customer. A minimum of 2 yards of production run yardage is required for U.L. testing and flammability testing. Approval of a COM fabric may result in extended lead times. For cost estimates, yardage requirements and project lead times, consult your Customer Service Team.

Customer is responsible for fabric meeting the appropriate Cal. TB133.

Customer's Own Leather (COL):

Customer's Own Leather (COL) is available for use on pedestal and low storage cushions.

Yardage/Sq. Footage Requirements:

➤ See the product's pricing pages for COM yardage and COL square footage requirements.

Shipment of COM/COL:

After the fabric has passed the approval process described, Kimball Office will enter the product order and send an acknowledgement of the tentative ship date. A notification will be sent giving the date the COM must be received. If it is not received by the specified date, your ship date will be reassigned.

For Priority tackboards:

Kimball Office
COM Department
Dock 11
1620 Cherry Street
Jasper, IN 47549

For Priority tiles for benching stanchions:

Kimball Office
COM Department—Kimball Office
1881 West Seltice Way
Post Falls, ID 83854

For Priority mobile pedestal cushion and low storage cushions:

Kimball Office
COM Department
340 East 11th Avenue
Jasper, IN 47549-1001

IMPORTANT: Tag all materials with the Kimball Office dealer name and the purchase order number.

Production of Order:

When COM production yardage is received, COM is cut for the order and inspected for flaws. If flaws are found, you will be notified of the additional fabric required.

A return tag (e.g. COD shipment, UPS call tag) is required from the specifier within 45 days of the acknowledged ship date or all excess COM yardage will be discarded.

Preapproved COM:

➤ Contact your Customer Service Team to obtain information on preapproved COMs.

Checklist:

When ordering COM for Kimball Office products, please make sure you have done the following:

- Supplied vendor name, fabric name, color name and number.
- Supplied arrival date of COM to Kimball Office.
- Received application testing approval before sending purchase order (or signed waiver if not approved for application).
- Received U.L. listing before sending purchase order.

Locking Information	232
Terms & Conditions	233
Product Warranty	235
Operating Load Capacities	236
Filing Capabilities	237
Model Number Index	238

Locking storage units can be specified as:

- Key random with a black lock core and hinged key (KRB);
- Key random with a silver (matte nickel) lock core and round-head key (KRS); or
- Key specific (KS)

Black lock cores and hinged keys are identical to the ones used with other caseloads and systems products.

Silver lock cores and round keys are matte nickel. These lock cores and keys are identical to the ones used with Fluent and Hum. Minds at Work. series.

Key Random:

When key random option is selected, key numbers will be assigned arbitrarily at the factory with key numbers ranging from KCCB001 to KCCB300 (black) or KCCG001 to KCCG100 (silver).

Randomly numbered lock core(s) will ship standard along with your order for field installation. *Exception: Randomly numbered lock cores on Kwik Office models are shipped installed.*

With random keying, different furniture units may or may not have the same key number. If you must have all locks keyed differently or all locks keyed the same, choose the key specific option.

Key Specific:

When key specific option is selected, the storage unit will be pre-drilled to accept a lock core; however, no lock cores will be shipped standard with the unit. If lock cores are standard on the unit, the price of the unit is reduced by the price of the lock core or cores.

You must specify lock core(s) separately for key specific option; specify any key number from KCCB001 to KCCB300 (black) or KCCG001 to KCCG100 (silver).

To key all the furniture units in a workstation or department alike, choose the key specific option and order the quantity of locks needed for your installation.

Installing Locks:

Standard key that ships with the lock core can be used for the initial installation of the lock core in the field.

Changing Locks:

IMPORTANT: A change key, specified separately, is required to remove lock cores in the field.

Change key model KCCB1CK allows removal of lock cores within these ranges:
KCCB001–KCCB300
KCCG001–KCCG100

Master Keys:

Master key model KC2GMK will unlock any lock within these key ranges:
KCCB001–KCCB300
KCCG001–KCCG100

Terms & Conditions	➤ See page 233
Product Warranty	235
Operating Load Capacities	236

How to Specify

- 1 Specify exact key number for lock cores or model number for change or master key

Ordering Procedures:

Purchase orders must be received with complete information, which includes the following:

- Complete/valid model numbers
- All textiles, finish, and material specifications for each line item.
- "Ship to" address and contact
- Special shipping instructions (tagging, requested dates, etc.)
- Billing address
- Net prices

Submit orders electronically via EDI or OrderXchange.

To order literature or check order status on-line, please visit us at
www.kimballoffice.com.

The customer bears sole responsibility for order correctness. Orders are accepted only by issuance of Kimball Office's formal order confirmation and are subject to the terms and conditions set forth herein, notwithstanding any variance in terms and conditions set forth on buyer's order forms.

The order confirmation is the final agreement between the customer and Kimball Office and supersedes all prior oral, written or electronically transmitted statements regarding the order. Kimball Office will attempt to meet all requested ship or delivery dates. If no specific date is requested, we will assign the best possible ship date available.

Changes and Cancellations:

A confirmed order may not be changed or cancelled, in whole or in part, without prior written consent of Kimball Office. Expenses incurred because of the changes shall be charged to the Purchaser. In the event of cancellations, Purchaser will be liable for reasonable cancellation charges established by Kimball Office. Changes may affect delivery dates.

No changes or cancellations will be accepted after order entry for non-standard lead time products including:

- Kwik Office offerings
- Engineer-to-Order (modified or non-standard products)
- Alliance program upholstery
- Customer's Own Material (COM)
- Customer's Own Leather (COL)
- Customer Specified Laminate (CSL)
- Customer Specified Paint (CSP)
- Mock Ups
- Service Parts/Replacements

Modified Product:

Our manufacturing flexibility allows us to accommodate requests for non-cataloged product. We are happy to discuss your unique product requirements and determine feasibility and pricing.
➤Contact **By Design** for assistance at 800.482.1616 extension 6002.

Finishes and Materials:

Wood Finish Color Matching

Each piece of natural veneer offers unique texture and grain. Minor variations in finish color and value may occur due to the natural characteristics of wood. Kimball Office carefully selects all materials used in every product ensuring a commercially acceptable color and finish. Factors such as aging and exposure to light alter finishes.

Fabric Color Matching

Kimball Office will always ship a satisfactory commercial match on fabric. Because of industry dye-lot variation, colors may not match exactly.

Terms and Pricing:

Net 30 days. If the invoice amount is not paid in full within the terms of the invoice, the invoice may be subject to a monthly finance charge equal to the lesser of 1.5% or the highest amount permitted by law. List prices include freight charges; however, they do not include:

- Storage and insurance charges
 - Sales and other taxes
 - Local delivery, unloading, or installation
- These items will be invoiced as separate line items.

All prices herein are delivered list price, unless noted, effective December 2, 2013, and supersede all other published prices. Prices shown cover standard product only, additional charges will be applied for changes to standard product. Kimball Office reserves the right to change prices without prior notice. Prices herein are only for shipment within the continental United States or Canada.

Selling Information

Distribution of this price list does not in itself constitute an offer to sell. Orders can be received only from authorized Kimball Office customers. Kimball Office price lists and catalogs are not available to the general public.

Product Design:

Kimball Office reserves the right to make changes in design, specifications, and construction or discontinue products without prior notice.

Shipping/Freight:

Products are priced and will be delivered C.P.T. one contiguous U.S. destination, one Canadian destination or one port of exit, freight prepaid (Incoterms 2010). Title shall transfer with risk of loss.

Kimball Office reserves the right to select the most appropriate shipping terms.

Locking Information	➤ See page 232
Product Warranty	235
Operating Load Capacities	236
Filing Capabilities	237

Asset Tag Locations:

Bar code labels have been placed on all Kimball Office products.

Products with pedestals or lateral files

Underside of top drawer near front edge in right pedestal (if no right pedestal, left pedestal).

Highback organizers and overhead cabinets

Back left of task light facade.

Bookcases

Underside of lowest shelf (not bottom panel) on the left front edge. If glass shelves, top panel in cornice area.

Vertical storage cabinets

Underside of top drawer near front edge. If no drawers, underside of lowest shelf on left front edge.

Bridges, corner units, worksurfaces, computer support furniture, P-, U-, and keyhole-shaped desks

Underside of the top surface (user's side) on the front edge.

Component modesty panels

Center top of the panel on the inside (kneespace area).

Tables

Underside of table top near the outside edge.

continued

Delivery:

Normal delivery hours are 8:00 a.m. to 5:00 p.m. Monday through Thursday and 8:00 a.m. to 3:00 p.m. on Friday. Any delivery arrangements made outside of normal delivery times are subject to additional charges. ➤See at right.

Any charges incurred because of failure to receive a shipment or offload a shipment in a timely manner (maximum time allowed to offload trailer: 3 hours), will be billed to the sold-to customer.

Any charges as a result of rerouting a shipment while in transit will be billed to the sold-to customer.

Any order requiring **Special Delivery Service** will incur additional charges. All such requirements must be noted on the purchase order. These are services that are not included in the standard price of the product or require the usage of specialized carriers. These services include:

- Weekend delivery (after 3:00 p.m. Friday through Sunday evening)—minimum \$500 charge.
- Inside delivery—minimum \$50 charge.

Note: Must be approved and coordinated 10 days prior to shipment.

- Non-dock delivery—minimum \$50 charge.
- JIT delivery (specific day and/or time)—Orders under \$25,000 list will incur a \$125 charge.
- Rush delivery (1-3 days from ship date)—Contact Customer Service for charges.

Carrier Selection

Kimball Office reserves the right to select the most appropriate mode of shipment. Kimball Office relinquishes all responsibility for goods shipped upon a clean receipt from the carrier. Customer bears the risk of loss or damage during shipment.

Packaging

Kimball Office's standard method of shipping is to carton all items. Certain full truck load shipments may qualify for special consideration. Contact Kimball Office for guidelines. International shipments can be crated at the customer's request. The expense of crating will be the responsibility of the customer.

Palletizing

Kimball Office may elect to palletize key products on projects when it effectively reduces carton waste and improves stability within the shipment.

Loss, Damage, or Delay

Kimball Office shall not be liable for loss, damage, detention or delay resulting from causes beyond its reasonable control including but not limited to fire, strike, weather, wreck or delay in transportation. In the event of delay due to any such cause, the delivery date will be postponed by such length of time as may be reasonably necessary to compensate for the delay.

Storage

If the customer requests a change of ship date and the product is in production, Kimball Office reserves the right to transfer the product to storage at the customer's risk and expense. All requests to store product must be approved by Kimball Office Customer Service and may be subject to storage fees. Such transfer to storage will be deemed delivery to the customer for all purposes including insurance, liabilities, invoicing, and payment.

Returned Merchandise

Merchandise will only be accepted for return under the following conditions:

- ① The product is a "made to stock" item; and
- ② Return Goods Authorization (RGA) is given to you by your Customer Service Team.

All returns are subject to a 50% restocking fee. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect. All merchandise being returned must be properly packed and protected in the original cartons. Upon receipt, all returned merchandise will be thoroughly inspected. Any discrepancies, such as additional damage, signs of usage, missing parts, etc., will result in an adjustment to the amount of credit issued.

Claim Process:

All products produced by Kimball Office are carefully inspected and properly cartoned prior to shipment. All shipments are delivered to the transportation company in good condition. If you receive a shipment that has damage, product shortages, or delivery has been delayed by the transportation carrier, **the following steps must be taken:**

- ① Before signing for the merchandise, make notation of all visible damage, shortages and/or time of truck arrival on the bill of lading.
- ② Contact Customer Service within 15 calendar days of delivery receipt to report issue. We will advise whether a freight claim will need to be filed based on mode of transportation.
- ③ If claim must be filed, carrier must be contacted within 15 calendar days of delivery. Retain all shipping cartons for inspection by the carrier agent.
- ④ A copy of the Carrier Disposition Letter must be sent to Customer Service to receive additional credit on concealed damage issues via Redistribution/ LTL carrier shipments.

For Concealed Damage, follow steps 2 through 4.

Locking Information	➤See page 232
Product Warranty	235
Operating Load Capacities	236
Filing Capabilities	237

Electronic Catalog and Specification Software:

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

Lifetime Assurance of Quality

Our Pledge:

Kimball Office stands behind the craftsmanship of our products. When brought to our attention, we will address warranty issues quickly and effectively.

Recommendations:

Facilities managers and users are urged to make periodic inspections to look for signs of structural fatigue, damage or potential failure that may occur as a result of daily handling and use. Inspections should include the structural joints, corner blocks, screws or fasteners, welds, and any other points of stress. If any problems are found, the product should be taken out of service and Kimball Office Customer Service should be contacted promptly at 800-482-1818.

Limited Product Warranty:

Kimball Office warrants that its products are free from defects in materials and workmanship given normal use and care for a lifetime of single-shift service. Normal use is defined as the equivalent of a single shift, 40-hour work week.

Exception: Itsa and Campos seating models are warranted for three-shift (24/7) service.

Exception: Some products and parts have limited warranty periods.

➤ See lists at right.

At its option, Kimball Office will repair or replace with comparable product, free of charge to the customer, any product, part or component manufactured and/or sold by Kimball Office in North America after November 6, 2000, which fails under normal use as a result of such defect.

In the event that use of a product exceeds normal use as defined above, the warranty period for such product will be reduced to 12 years from date of manufacture, and the warranty for the product's components that fall under different warranty

limitations, as listed at right, will be reduced to one-third of the original warranty.

This warranty is made by Kimball Office to the original customer for as long as the original customer owns and uses the product.

This warranty is only valid if the products are given normal and proper use, and installed or used in accordance with Kimball Office installation and/or application guidelines, and installed by an authorized Kimball Office dealer or agent. Kimball Office assumes no responsibility for repairs to products sustaining damages resulting from user modification, attachments to a product, misuse, abuse, alteration, or negligent use of our products.

EXCEPT AS EXPRESSLY SET FORTH ABOVE, THERE ARE NO OTHER WARRANTIES EITHER EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. WE EXCLUDE AND WILL NOT PAY CONSEQUENTIAL, PUNITIVE, OR INCIDENTAL DAMAGES UNDER THIS WARRANTY.

All warranties run from date of manufacture.

Warranty Periods:

Warranty periods are limited for certain products and/or component parts as follows:

10-Year Warranty

- Seating mechanisms
- Veneers
- Laminate
- Pneumatic lifts (cylinder assembly)

5-Year Warranty

- High-wear parts (such as casters, glides, drawer slides, moving chair arms)
- Electrical/power products
- Inflatable lumbar supports
- Lighting

- Desk sets
- Monitor arms
- Keyboard kits
- Covering materials (such as foam, mesh, textiles, 3D laminate, and decorative trim)
- Marker Boards

3-Year Warranty

- Wool felt
- Custom products
- Carnegie Fabrics
- Itsa Mesh
- Campos Mesh

1-Year Warranty

- Fit lounge and headrest

Warranty Exclusions:

This warranty does not cover:

- The substitution of non-Kimball Office components for use in place of Kimball Office components
- Naturally occurring variations and differences in grain character and color between and within wood species
- Natural variations in marble and leather
- Damage caused by a freight carrier
- Normal wear and tear arising from product use
- Damage resulting from improper use or storage of the product
- C.O.M. (Customer's Own Material) or any other non-standard material specified by the customer, including attributes such as appearance, durability, quality, performance, colorfastness, etc.
- Alliance program fabrics
- Fabric, leather, and felt fading and wear, discoloration from contact with liquids or change in color or texture caused by application of finishes (flame proofing, stain resistance)
- Alterations to the product not expressly authorized by Kimball Office
- Products considered to be of consumable nature (such as bulbs, light ballast, and certain electronic products)

Model Number Index	238

Process for Warranty Issues:

- ① A customer should contact his or her dealer, who will contact Customer Service at 800-482-1818. The purchase order or acknowledgement number, model number, and a detailed description of the warranty issue should be provided. **Serial numbers may be required** before the claim can be processed.
- ② Customer Service will determine and pre-approve all resolutions to the claim, such as replacement units, service parts, and labor charges related to repair or redelivery of damaged or defective product.
- ③ Upon approval, a Case Number and resolution will be assigned to an authorized dealer, and all parts and components necessary for repair/replace will be sent to the authorized dealer, which will carry out the resolution. The dealer should include the Case Number on all invoices for reimbursement once the warranty repair/replace has been completed. Kimball Office shall not be the responsible for any unauthorized expenses. Kimball Office will only accept dealer invoices submitted within 90 days of the final approval by Customer Service; invoices received after 90 days will not be approved for dealer credit or payment. All warranty information should be sent to:
Kimball Office

Locking Information	➤ See page 232
Terms & Conditions	233
Product Warranty	235
Filing Capabilities	237

Component	Operating Load Capacity (Functional Loads)	Example
Desks and worksurfaces <45"W	200 lbs. over 12" diameter area, concentrated loading	
Desks and worksurfaces 45"W–72"W	200 lbs. over 12" diameter area, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 72"W = 288 lbs.
Desks and worksurfaces >72"W	Two 200 lb. loads over two 12" diameter areas, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 84"W = 324 lbs.
Transaction counter, shelf, or secondary surface <16"D	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	12"D x 60"W = 147 lbs. t.w.
Extendible elements (pedestal drawer, shelves, etc.)	.017 lb. per cubic inch of drawer interior filing space, distributive loading <i>Note: File drawers are to support hanging files only; they are not intended for bottom loading.</i>	24"D x 15"W x 12"H = 73 lbs.
Center/pencil drawers	5 lbs., distributive loading	
Freestanding storage or bookcase top <38"H	200 lbs. concentrated loading .20 lb. per square inch of surface area, distributive loading	24"D x 36"W = 173 lbs.
Freestanding storage or bookcase top 38"H–72"H	.20 lb. per square inch of surface area, distributive loading	24"D x 36"W = 173 lbs.
Freestanding storage or bookcase top >72"H	.09 lb. per square inch of surface area, distributive loading	24"D x 36"W = 78 lbs.
Storage or bookcase bottom	.017 lb. per cubic inch above surface, distributive loading (not more than 18" in height)	24"D x 36"W x 18"H = 264 lbs.
Storage or hutch bottom <60"H	.20 lb. per square inch of surface area, distributive loading	
Storage or hutch bottom >60"H	.09 lb. per square inch of surface area, distributive loading	

Square inches should be calculated using this formula: Surface depth x surface width of available storage

Cubic inches should be calculated using this formula: Surface length x surface depth x height of available storage above the surface (limited to 18 inches above the surface)

The table at left lists the operating load capacities of various Kimball Office components. All components meet or exceed the ANSI/BIFMA Functional and Proof Loading requirements X5.5 2014 Desk/Table Products Test and X5.9 2012 Storage Unit Test. The Operating Load Capacities listed represent the BIFMA functional loads which are equivalent to loads that can be expected in normal use of the component.

	24"	36"	15"	32⅜"	9"	Legal, letter, and EDP	Legal and letter
Center Drawers	22"	18"	17"	14½"	1½"	—	—
	22"	30"	17"	26⅜"	1½"	—	—
	22"	36"	17"	32⅜"	1½"	—	—

*For built-up units, such as desks, returns, and credenzas, please reference the applicable pricing page for width (letter or legal) of the pedestal.

Filing Reference:

- Legal size paper is 8½" x 14".
- Letter size paper is 8½" x 11".
- EDP size paper is 8½" x 14⅞".

IMPORTANT: For all pedestals where legal front-to-back filing is standard, letter front-to-back filing is possible by specifying universal file bars separately.

PRIORITY PRICE LIST

Revision Summary

April 2014

This document provides a summary of revisions made to the Priority Price List since December 2, 2013.

These revisions are effective April 15, 2014.

Additions

New Maharam upholstery fabrics are now available.
➤See page 229.

New Momentum upholstery fabrics are now available.
➤See page 234.

Changes

Maharam Medium and Messenger fabrics have been moved from price grade D to B.
➤See page 229.

Clarifications

Classic mid-support end panels feature a chamfered corner at the top back edge to allow cable routing below the worksurface.
➤See page 159.

Kimball Office panel fabric restrictions added:

- Crossroads is not available on Perks tackboards
 - Sprite is not available on fabric-covered overheads
 - Basket is not available on fabric-covered overheads
- See pages 219–220.

Kimball Office upholstery fabric restrictions added:

- Ezra not available on fabric-covered overheads
- See page 226.

Corrections

Option upcharge for KS option on 30"D vertical storage towers with side-access wardrobe has been corrected to "+\$42." All sizes of side-access wardrobes feature a coat hook.
➤See page 193.

Disperse seating upholstery abrasion test rating has been corrected to 100,000 double rubs.
➤See page 223.

Phone number for Maharam has been corrected.
➤See page 228.

Corrections to Maharam and Momentum colorways and specifications have been made to conform to current information from the alliance partner.
➤See pages 229–236.

Deletions

Maharam Milestone fabric is no longer available.

PRIORITY PRICE LIST

Revision Summary

June 2014

This document provides a summary of revisions made to the Priority Price List since April 15, 2014.

These revisions are effective June 23, 2014.

Additions

Center-mount storage can be mounted to Xside accessory rails. Xside stanchion kit has been added.
 ➤ See page 56 for planning information.
 ➤ See page 120 for pricing information.

Three new wood veneers and woodgrain laminates have been added:

- Canyon Oak
- Monterey Oak
- Tuscan Walnut

➤ See pages 211 and 215.

Silver pearl paint is now available on a variety of components, including legs, bases, stanchions, grommets, brackets, and pulls.
 ➤ See page 217.

Changes

Overhead/shelf brackets, mitred shelf brackets, and shelf dividers have been moved to a new page.
 ➤ See page 120.

Price for Classic laminate work-surface mid-support has been lowered to \$168.
 ➤ See page 158.

Updates to the Finishes and Materials chapter have been made to reflect the current offering.
 ➤ See page 209.

Clarifications

BIFMA/ANSI: 100% of the products manufactured by Kimball Office are level® certified.
 ➤ See page 4.

Factory-installed grommet and cut-out option pages have been reformatted and now include the new Silver Pearl paint option.
 ➤ See pages 100, 101, and 150.

Product warranty has been updated to reflect that Itsa and Campos seating lines have a "normal" use classification and warranted for 3-shift, 24/7 service. Itsa Mesh and Campos Mesh models have a warranty period of 3 years.
 ➤ See page 245.

Corrections

None.

Deletions

None.

PRIORITY PRICE LIST

Revision Summary

October 2014

This document provides a summary of revisions made to the Priority Price List since June 15, 2014.

These revisions are effective October 1, 2014.

Additions

Three new woodgrain plastics are now available for softened P rims:

- CO Canyon Oak
 - YO Monterey Oak
 - NW Tuscan Walnut
- See page 218.

Changes

All pricing has been updated to reflect the price adjustment effective October 1, 2014.

Model numbers for round, race-track, and elliptical table tops with knife rim have been changed so that they follow suit with other Priority progressive worksurfaces. Step 2 in the How to Specify steps have been revised,
➤ See pages 199 and 200.

Shipping/freight terms have been changed.
➤ See page 243.

Laminate is warranted for a period of 10 years.
➤ See page 245.

Clarifications

Classic height-adjustable U-legs can be used to displace wood end panels on desks, returns or modular return and extension worksurfaces; not intended for use to create a free-standing table.
➤ See page 75.

12"D mid-support panels feature a chamfered back edge to allow cord management below the worksurface.
➤ See page 75.

Corrections

Progressive private office application typical has been corrected to include model 53KPSBSP (privacy screen attachment brackets) that are required.
➤ See page 10.

Slat wall tiles in 501 Platinum Metallic and 544 Silver Pearl incur an upcharge of 10%.
➤ See page 179.

Deletions

Maharam has deleted several colors from their pattern offering.
➤ See page 229 for the updated list.

PRIORITY PRICE LIST

December 2014

Revision Summary

This document provides a summary of revisions made to the price list since October 1, 2014.

These revisions are effective December 15, 2014.

Additions

None.

Changes

Alliance partner fabric listings have been updated to show only carded fabrics.

➤ See page 229.

➤ See Surface Materials at www.kimballoffice.com for a wide variety of additional non-carded, graded-in fabrics.

Terms and Conditions have been revised to include an updated list of alliance partner names in the “no cancellations or changes” paragraph as follows:

- Alliance program upholstery (Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, Ultrafabrics)

➤ See page 233.

Product Warranty has been revised. Thermofoil is now called 3D laminate in the 5-year warranty section. The Alliance partner list has been updated in the warranty exclusions section as follows:

- Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, Ultrafabrics alliance programs

➤ See page 235.

Clarifications

Plastic rim is now referred to as PVC rim throughout the price list.

Corrections

None.

Deletions

FSCW wood option is no longer available on various products; please refer to the individual pricing pages for availability.

Chamois laminate is no longer available.

➤ See page 215.

April 2015

This document provides a summary of revisions made to the price list since December 15, 2014.

These revisions are effective April 10, 2015.

Planning

Grain direction runs with the width on wood veneer and woodgrain laminate worksurfaces.

Exception: Grain runs with the depth on two-piece (120" and 144"W) worksurfaces with quarter-cut veneers (Monterey Oak, Canyon Oak, Tuscan Walnut, and Clear Zebrawood).

➤ See page 45.

Classic end supports for use in classic freestanding, L-, or U-configurations no longer feature a cord cut-out on the user's side.

➤ See pages 75.

12"D classic worksurface mid-support illustration has been updated to better show the chamfered back edge, which allows cords to pass from one side to the other.

➤ See pages 75.

Pricing

Price for C2C cut-out on 48"-66"W rectangular HPL or wood worksurfaces has been correct to +\$52.

➤ See page 101.

Control boxes on electric, height-adjustable tables bases (main T-leg, 90°, and 120° models) include a 10' cord. The STD_RETURN option on main T-leg with non-programmable switch/control box has an upcharge of +\$52.

➤ See pages 129 and 132.

Classic end supports for use with classic desk worksurfaces no longer feature a cord cut-out on the user's side.

➤ See page 157.

12"D classic worksurface mid-support illustration has been updated.

➤ See page 158.

Metal slat wall tiles for use with highback organizers are available in 514 Carbon Metallic. A 10% upcharge applies.

➤ See page 179.

Finishes & Materials

403 Chamois solid laminate is available.

➤ See page 214.

488 Frosty White is available on TFL worksurfaces and tables, laminate fronts/chassis, and laminate center drawers.

➤ See page 214.

419 Wallaby PVC is now available on worksurface wire manager.

➤ See page 217.

Alliance Program carded pattern price grades have been changed for several fabric patterns.

➤ See page 228.

Minor updates have been made throughout this finishes and materials chapter to bring it up to date and make it more consistent with our other price lists.
