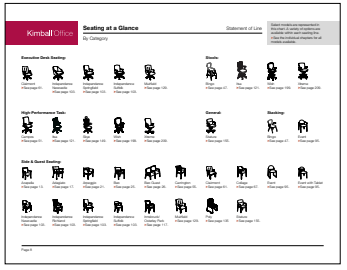
How to Use this Price List

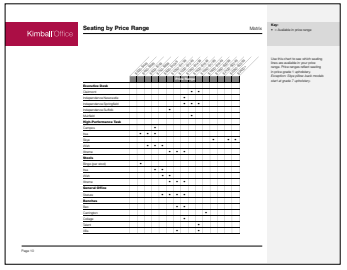
Kwik Office Program ➤See page 4
How to Specify Our Products 3
Sustainability 5

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

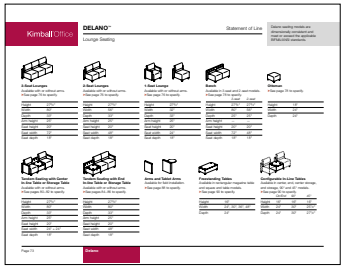
We suggest that you become familiar with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.



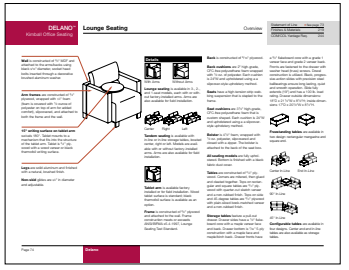
Seating at a Glance matrices provide a quick reference of Kimball Office Seating and Kimball Office | Interstuhl Seating by category.



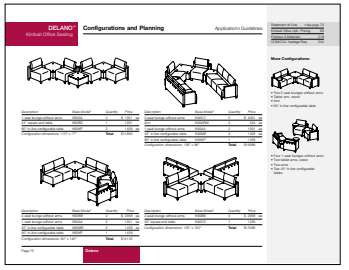
Seating by Price Range provides a quick reference to help you find the right chair for your application.



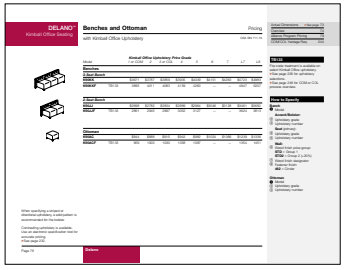
Statement of Line provides a snapshot of the entire product line. We've included an illustration and page cross references to the applicable pricing and how to specify pages.



Overviews offer a quick look at the distinguishing features of the product line.



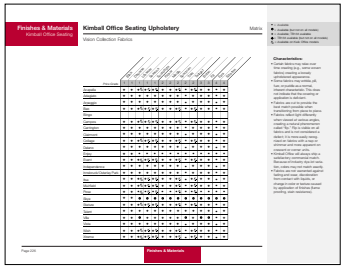
Product Information and Application Guidelines pages provide detailed information about the product, connections that can be made with other models, and planning factors.



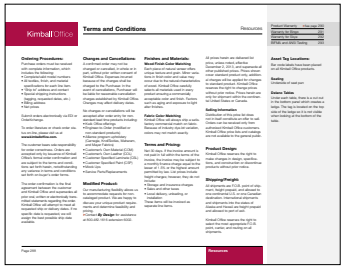
Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.

icon indicates models that are available for quick shipment.
➤See the Kwik Office Price List.

(FSC) icon indicates models available with the FSC option (3% upcharge) at standard leadtime to meet FSC certification.



Look in the Finishes and Materials section to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product.



Use the Resources in the back of the price list. This repository of useful information includes Terms and Conditions, Warranty, Operating Load Capacities. You'll also find a model number index with references to the appropriate pricing page.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

Only Underwriters' Laboratory (U.L.) or Canadian Standards Association (C.S.A.) listed electrical components are used in electrical devices and are so labeled.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

c UL us LISTED

How to Specify Our Products

Kwik Office Program ➤See page 4
How to Use this Price List 2
Sustainability 5

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ❶, ❷, or ❸) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

How to Use this Price List 2
How to Specify Our Products 3

Model Numbers:

Models that are available on Kwik Office have been marked with a K icon in this price list.

Kwik Office model numbers are different from standard model numbers. Base model numbers for Kwik Office products include all options and finish designators.

The K icon on standard lead-time pricing pages indicates availability; it does not provide the correct model numbers and option designators for specifying. You must use the complete model numbers listed in the Kwik Office Price List.

Include only Kwik Office models on your order. Any orders containing non-Kwik Office products will be treated as such and entered at standard lead times. Indicate clearly at the top of your order “Kwik Office.”

Changes and Cancellations:

No changes or cancellations will be accepted after order entry for Kwik Office products.

Order Size:

The Kwik Office program has a limited weekly volume capacity, with orders being entered on a first come, first served basis. Contact Customer Service for availability.

Kwik Office Program ➤See page 4

How to Specify Our Products 3

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤Find more specific details regarding the environmental aspects of our product offerings at: **www.kimballoffice.com**

ANSI/BIFMA level™
100% of the products manufactured by Kimball Office are level® certified. We offer the most sustainable portfolio in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet and exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

ecoScorecard℠
Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:
- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification
Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:
- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:
- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:
- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

SCScertified™ INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality
One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

Design for the Environment (DfE) is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.
➤For environmental data, visit our website at www.kimballoffice.com.

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

FSC www.fsc.org FSC® C010590
The mark of responsible forestry

FSC-Certified Wood
Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood at a 3% upcharge. Applicable models show FSCW as a finish price group designator option. Standard lead times apply to FSC orders.

ANEW

Asset Network for Education Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

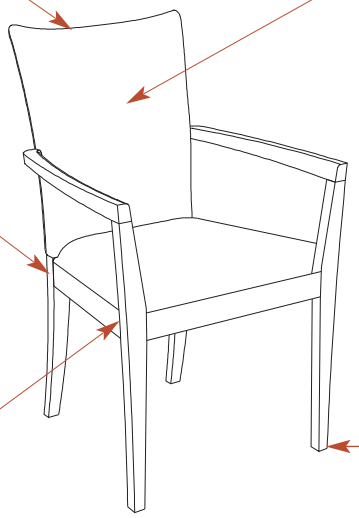
Overview

Statement of Line ➤See page 15
Kimball Office Uph. Pricing 17
COM/COL Yardage Req. 317
Finishes & Materials 295

Frame is constructed of kiln-dried maple hardwoods.

Corners are reinforced with wood corner blocks and lag bolts. Metal brackets are also used on armless models to provide additional support.

Joints are double doweled and securely glued to ensure maximum strength.



Back and seat are fully upholstered. Cushions are high resiliency, CFC-free polyurethane foam.

Nylon glides are 7⁄8" in diameter and dome shaped.

Details

High Back | Mid-Back | Wood Top Rail

Three different Acapella models are available; each has its own distinct design and is available with or without arms.

Seat suspension on high back and mid-back models is constructed of 1⁄2"-thick, 9-ply, molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges.

Seat suspension on wood top rail model is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

Seat cushion, applied to the flexible webbing suspension, is 1 3⁄8" thick on high back models, 1 5⁄8" thick on mid-back models, and 1 1⁄2" thick on wood top rail models.

Seat upholstery on high back and mid-back models is wrapped over the seat cushion and secured to the seat suspension with upholstery staples. The entire seat assembly is fitted into the frame with wood screws inserted into the wood corner blocks.

Seat upholstery on wood top rail model is wrapped over the seat cushion and secured to the side, front, and back rails with upholstery staples.

Back on high back and mid-back models is constructed of heavy webbing secured to the frame with staples. 1"-thick foam is applied to the webbing. Upholstery is wrapped over the foam and secured with upholstery staples.

Back on wood top rail model is constructed using 3⁄16"-thick, 3-ply, contour molded plywood. Press fit fasteners attach the back to the frame. Upholstery is wrapped over 1"-thick foam and secured with upholstery staples.

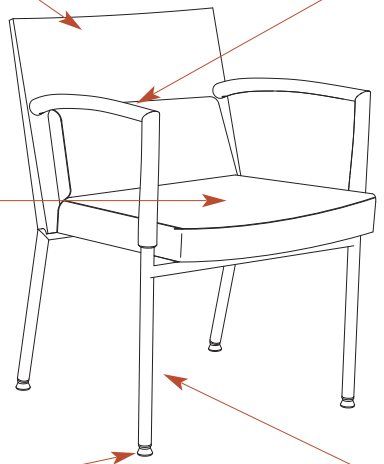
Finishes & Materials 295

Back features a doweled, solid-beech inner frame. 3-ply custom-contoured beech veneer is applied to the front and back surfaces. Back is bolted to a 1/4" steel bracket welded to the frame.

Seat tilts back and the back is slightly reclined so the user can assume a natural, relaxed posture.



Arms are solid beech and connected at miter with a 90° steel dowel. A black decorative bolt attaches the arms to the back. The front of the arms are inserted into the metal leg frame and fastened with a wood screw.

Black nylon glides are 1⅛" in diameter and swivel for maximum stability on all floors.

Legs are 1" diameter, 15-gauge tubular steel. They are welded to 1"-diameter steel cross members. 1⅜" x 1/4" flat steel stretchers, running front to back, join front and back cross members.

Details

Wood Back

Half-Height Cushion

Full-Height Cushion

Three back styles are available—wood back, half-height back cushion, and full-height back cushion.

Seat suspension is constructed of 19/32"-molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a suspension.

Seat cushion is 2"-thick, high resiliency, CFC-free molded polyurethane foam. Cushion is attached to the steel stretchers with wood screws.

Seat upholstery features a wrap-around upholstery method and 2½" boxing with top stitching.

Back cushion, on applicable models, is constructed of ¾"-thick foam applied to a 3/16" hardboard panel. Cushion upholstery with 1" boxing is wrapped over the foam and secured with upholstery staples. Half-height cushion attaches with press-fit fasteners. Full-height cushion attaches with keyhole slot at the top of the cushion and press-fit fasteners at the bottom of the cushion.

Contrasting upholstery is available on half-height and full-height back cushion models. Use an electronic specification tool for accurate pricing.

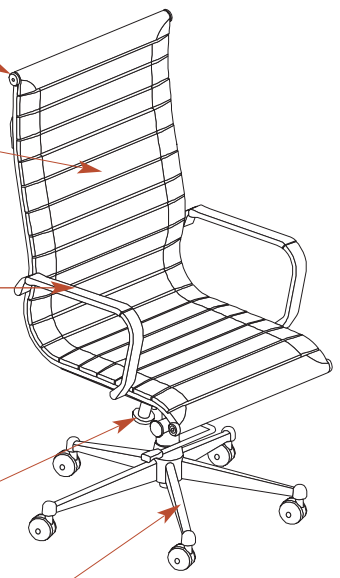
Statement of Line ➤See page 23
Finishes & Materials 295

Frame features a chrome finish.

Back and seat consist of faux leather over top 10mm foam.

Arms are covered with faux leather.



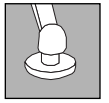
Knee-tilt control is standard.

Five-star base with chrome finish features casters on high-back and mid-back conference models and glides on side chairs.

Details

Alumma seating is available in high-back and mid-back swivel conference models, as well as a mid-back side chair featuring fixed glides.

Back and seat are available in white or black faux leather. Contrasting faux leather is not available.



Side chair features glides on a five-star base for stationary, non-mobile conference seating.

Alumma seating meets all applicable BIFMA and ANSI requirements

TB117 requirements are met by Alumma seating.

TB133 models are not available.

Ships knocked down:
- Back, arms, seat, and controls
- Cylinder
- Base, casters or glides

Adjustability Features

	High Back	*Mid-back*	*Fixed*
Knee tilt	•	•	•
Swivel	•	•	•
Pneu. height	•	•	•

• standard

Knee tilt control provides minimal rise of the front seat edge when reclining, allowing the user's feet to remain firmly on the floor. Back may be locked in a full upright position by pushing in pneumatic height adjustment lever. Recommended for users weighing 253 lbs. or less.

Pneumatic height adjustment allows user to raise or lower the seat height with a control lever while seated. Upward movement of lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

Frame is constructed of kiln-dried maple hardwoods.

Back and seat are fully upholstered. Cushions are high-resiliency, CFC-free polyurethane foam.

Corners are reinforced with wood corner blocks and tie screws.

Joints are double doweled and securely glued to ensure maximum strength.

Nylon glides are 7⁄8" in diameter.

Details

Rolled Back

Pillow Back

Two different Arpeggio models are available; each has its own distinct design.

Seat suspension is constructed of 3⁄4" thick molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a suspension.

Seat cushion, applied to the flexible webbing suspension, is 2" thick.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples. The entire seat assembly is fitted into the frame with wood screws inserted into the wood corner blocks.

Back is constructed using 9⁄16"-thick, 9-ply molded plywood. Machine screws and T-nuts attach the back to the frame. Upholstery is wrapped over 3"-thick sculpted foam and secured with upholstery staples.

Back of pillow back model is topped with 1 1⁄4 ounces of low melt conjugate fiber wrap for added comfort.

Outer back is constructed with 3⁄16" thick 3-ply molded plywood and 1⁄4" thick foam. Outer back is attached with press fit fasteners.

Contrasting piping is available in any Kimball Office fabric or leather.

Contrasting back is available on pillow back model with Kimball Office upholstery, COM, COL, or Alliance Program upholstery. Use an electronic specification tool for accurate pricing.

COM/COL Yardage Req. 317

Steam-bent frame is constructed of kiln-dried European beech to support the body's curves.

Joints are securely fastened with mortise and tenon joinery or double-doweled construction to ensure long-term use.

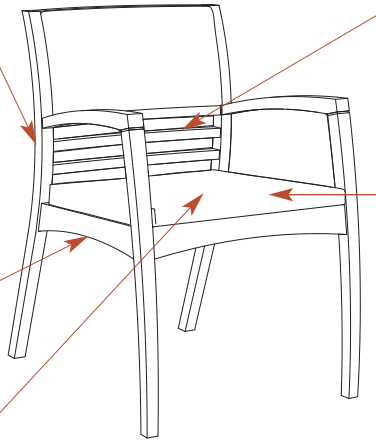
Seat rails are reinforced with wood corner blocks and cleats attached with glue and wood screws.

Seat suspension is constructed of 9/32" thick molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a secure suspension.

Seat assembly is attached with wood screws to wood cleats on the frame.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples.

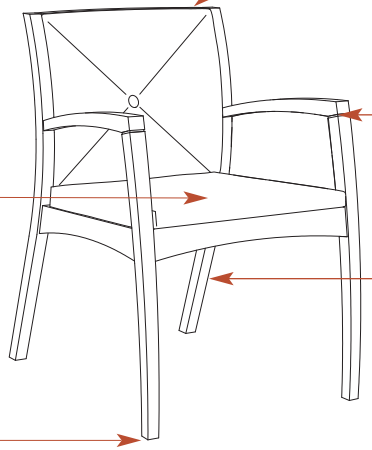
Nylon glides are 7/8" in diameter.



Horizontal back slats on applicable models are individually shaped for optimal comfort. Slats are secured using mortise and tenon joinery.

Seat cushions are made of 1¼" thin-profile, high-resiliency, CFC-free foam for maximum comfort and durability.

Curved top rail is visible. It separates the front and back upholstery panels and adds to Beo's aesthetics.



Decorative reveal detail at the arm/leg joint. Reveal is 2mm deep by 4mm wide.

Wall-saver back legs flare slightly so they contact the baseboard first, saving the wall's finish and protecting the chair back.

Details

Ladder-back

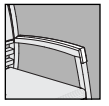
Vertical Insert Back

Full Back

Button Back

Six different back styles are available for Beo side seating.

Upholstered back on applicable models is constructed of two panels that are sandwiched together. Each panel features a contoured 3-ply cross-banded plywood inner panel. Inner panels are covered with high-resiliency, CFC-free foam (1/2" on the front and 1/4" on the back). Upholstery is wrapped around the inner panels and secured with upholstery staples. Both front and back upholstery panels are securely attached to the top wood rail and cleats with Christmas-tree fasteners.

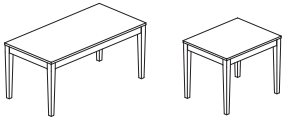


Black polyurethane arm caps are available as an option on Beo side chairs.

Contrasting upholstery on backs and seats is available on Beo side chairs. If different price grades are selected, use an electronic specification tool for accurate pricing.
➤See page 310.

Contrasting button upholstery is available on the button-back model.
Note: Contrasting button must be specified in Kimball Office fabric of leather.

Related Products



Freestanding Beo occasional tables are available in magazine and end models. Tables cannot be ganged to Beo side chairs.

Ganging tables are not applicable for side seating models.

Accent pillows are available.

Overview

Pricing	➤See page 40
Alliance Program Pricing	41
COM/COL Yardage Req.	317
Finishes & Materials	295

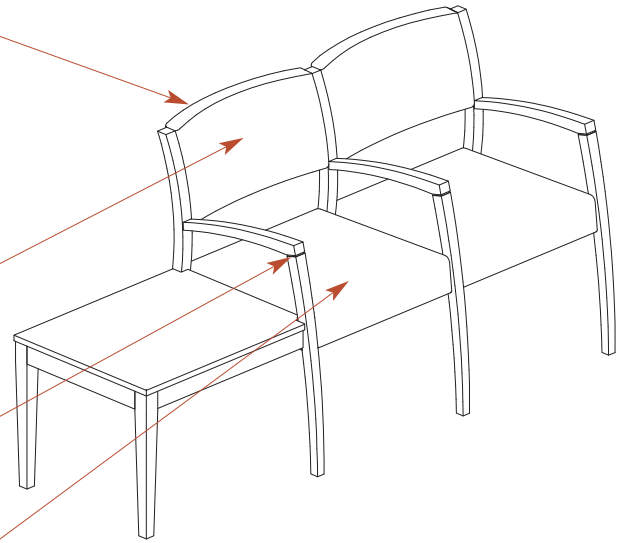
Frame is constructed of kiln-dried European beech. While similar to Beo side chairs, guest seating models are designed to accept add-on kits and ganging tables.

Joints are securely fastened with mortise and tenon joinery or double-doweled construction to ensure long-term use.

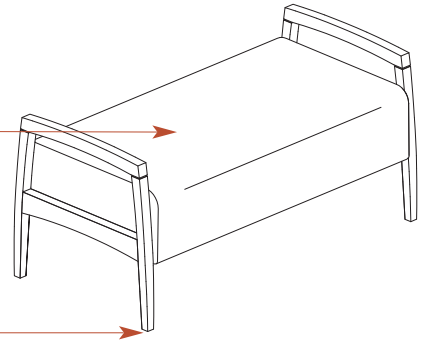
Backs feature a high-tension, sheet webbing suspension that is stapled to the frame, over which upholstery is placed.

Decorative reveal detail at the arm/leg joint. Reveal is 2mm deep by 4mm wide.

Seats feature a high-tension, strip webbing suspension that is stapled to the frame. Seat upholstery features a wrap-around upholstery method and is stapled into place.



Cushions are made of of high grade, high resiliency, CFC-free, laminated polyurethane foam. Seat cushions are 1" thick. Back cushions are ½" thick.



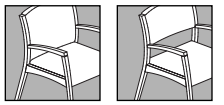
Nylon glides are ⅞" in diameter.

Bench is available to provide accessible seating from both sides. It is intended for freestanding use only.

Details

Fully Assembled | Starter Kit | Add-On Kit

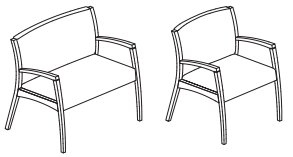
Guest seating is available as fully assembled one-, two, and three-seat runs; ready-to-assemble one-seat starter and one-seat add-on models are available to create seating runs of any length.



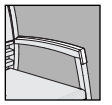
Full Back | Half Back

All guest and bariatric models are available with a fully upholstered back or half upholstered back.

Wall-saver back legs flare slightly so they contact the baseboard first, saving the wall's finish and protecting the chair back.



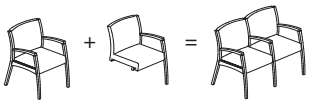
Bariatric chairs fit specialized requirements in a variety of settings. Full-size models are 36"W with a more robust frame that supports up to 500 pounds. Mid-size models are 25¼". They can be ganged to tables.



Black polyurethane arm caps are available on Beo guest one-seat, tandem, and bariatric models. They are not available on benches.

Contrasting upholstery on backs and seats is available on Beo guest chairs.
➤See page 310.

Connections



To build a tandem guest seating run, specify one starter kit and any number of add-on kits. Knocked down units include upholstered seat, upholstered back, and hardware. Starter kits include two arms, one left and one right; add-on kits include one center arm. Arms included with the starter kit will be used at the far left and right ends of the seating run. *Note: One starter kit and one add-on kit will create an identical model to the fully assembled tandem two-seat model.*

Related Products

Ganging tables attach to guest models at the end of seating runs, in-line between seats, or at a corner in a 90° configuration. Ganging tables do not attach to bench, lounge or side seating models.

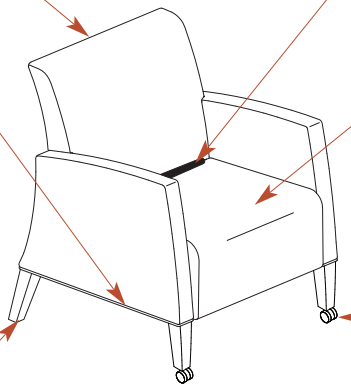
Alliance Program Pricing	50
COM/COL Yardage Req.	318
Finishes & Materials	295

Frame is constructed of ¾" plywood, utilizing lap-joint construction that is glued and screwed.

Legs and base rails are kiln-dried European beech. Legs and rail joints are double doweled, securely glued, and reinforced with corner blocks that are glued and screwed to the base rails. The base frame is attached to the seat frame with wood screws through the rails.

Wall-saver back legs flare slightly so they contact the baseboard first, saving the wall's finish and protecting the chair back.



Clean-out option makes cleaning of seat easier by allowing dirt to exit the chair to the floor where it can be swept up.

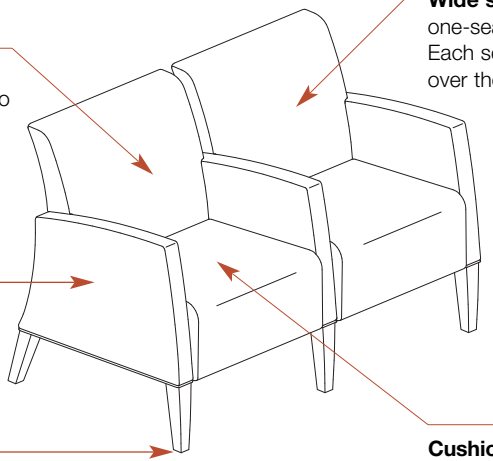
Seats feature a high-tension, strip webbing suspension that is stapled to the frame. Seat upholstery features a wrap-around upholstery method and is stapled into place.

Mobile option, available on one-seaters, provides casters on the front legs and a black handle on the back.

Backs feature a high-tension, sheet webbing suspension that is stapled to the frame, over which upholstery is placed.

Armrest tops and outside panels have ½" thick, high-grade polyurethane foam.

Non-skid, adjustable glides are ¾" in diameter.



Wide seat models are available in one-seat and tandem two-seat styles. Each seat width is increased by 3" over the standard model.

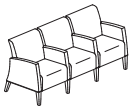
Cushions are made of high grade, high resiliency, CFC-free, laminated polyurethane foam. Seat and back cushions are 3" thick.

Details

One-Seater

Two-Seater

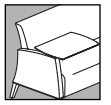
Tandem Two-Seater



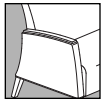
Tandem Three-Seater

Lounge seating is available in one-seat and two-seat models, and in two-seat and three-seat tandem models.

Contrasting upholstery is available on the back, seat and arms. If different price grades are selected, use an electronic specification tool for accurate pricing.
➤See page 310.

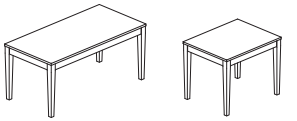


Tablet arms are available.
➤See page 44 for details.



Wood or black polyurethane arm caps are available.
➤See page 44 for details.

Related Products



Freestanding Beo occasional tables are available in magazine and end models. Tables cannot be ganged to lounge seating.

Accent pillows are available.

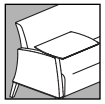
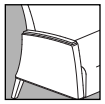
Pricing ➤See page 46
Alliance Program Pricing 50
COM/COL Yardage Req. 318
Finishes & Materials 295



Tablet arms are available. Tablet arms may be specified for the right, left, or center arm (one per model), and are available with a 3D laminate, phenolic-core laminate, or wood surface.
Note: Arm location is defined from the user's perspective when seated in the chair.

If more than one tablet arm is desired on a particular model, specify a tablet grommet, and order a tablet model separately.
➤See page 51.



Arm caps are applicable to arms without a tablet. When specified together on a lounge model, tablet and arm cap materials are paired: Wood arm caps with a wood tablet; black polyurethane arm caps with a 3D laminate or laminate tablet.

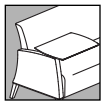
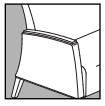
Finishes & Materials 295



Tablet arms are available. Tablet arms may be specified for the right, left, or center arm (one per model), and are available with a 3D laminate, phenolic-core laminate, or wood surface.
Note: Arm location is defined from the user's perspective when seated in the chair.

Center tablet option on tandem three-seater provides one tablet and two grommets, one in each of the center arms.

If more than one tablet arm is desired on a particular model, specify a tablet grommet, and order a tablet model separately.
➤See page 51.



Arm caps are applicable to arms without a tablet. Tablet and arm cap materials on the same lounge model will always match: wood arm caps match wood tablets; polyurethane arm caps match 3D laminate or laminate tablets.

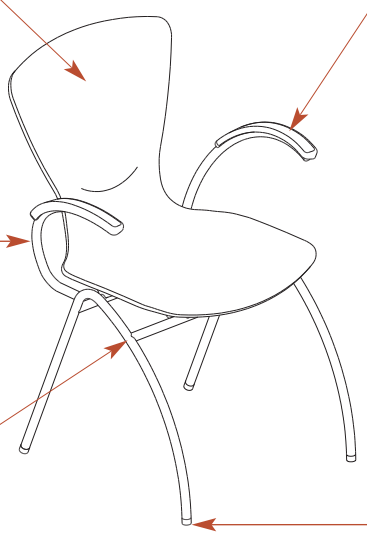
Stacking Side Chairs and Stools

Shell is beech wood that has been custom molded and contoured for comfort and support.

Arm supports, legs, and cross members are 25⁄32" x 3⁄32" hot rolled, welded, chrome plated, tubular steel.

Joints are welded.



Arm caps are 1⅝" thick solid bentwood, finished to match the shell. Two countersunk wood screws attach each arm cap to the arm supports.

Black plastic glides fit like a cap over the ends of the tubular steel frame.

Details

With arms

Without arms

Bingo side chairs are available with arms and without arms.

Bingo stools are available with without arms.

Shell is constructed of 7⁄16"-thick, 8-ply, molded plywood that is cross banded for strength. Shell is attached to the frame with four countersunk wood screws threaded into two wood cleats that are glued to the shell.

Side chairs and stools are each stackable up to four high.

Rubber stack bumpers and tube closures are standard.

Side chairs are shipped four per carton when applicable.

Stools are shipped two per carton.
IMPORTANT: Stools are ordered in sets of 2.

Connections

Side chairs may be ganged with ganging devices that snap onto the legs. Armless models or alternating armless and armchair models may be connected.
Note: Two armchair models cannot be ganged side by side.

Black ganging devices, ordered separately, are sold in packages of 5 pairs. One pair is required to gang two chairs. Two pairs will gang three chairs.

Finishes & Materials 295
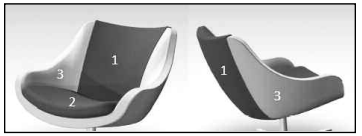
COM/COL Yardage Req. 318

Shell is low-pressure poured, soft urethane foam that is overmolded onto structural urethane foam and reinforced-fiberglass woven sheeting, then fully upholstered.

Four-star fixed base on chairs and tables is light-brushed, solid aluminum with clear floor glides.

Contrasting upholstery may be specified for the back, seat, and arms.



1 = Back
2 = Seat
3 = Arms

Auto return mechanism allows user to swivel up to 90° in either direction (180° motion) and returns to center when the user stands.

Details

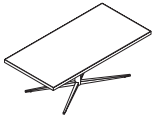


Table tops are available in TFL, 3D laminate, HPL, wood veneer, solid surface, or back-painted glass.

TFL table tops are thermally fused laminate on a 1⅛" particleboard substrate. TFL surfaces feature a 3mm-thick PVC edge banding.

3D laminate tops are vacuum-sealed melamine film on top of a 1⅛" MDF substrate. They are available with a radius or sloped edge profile.

HPL table tops are high-pressure laminate on a 1⅛" particleboard substrate. HPL surfaces can be specified with a 3mm-thick PVC edge or self edge.

Wood table tops feature wood veneer overtop a 1⅛" particleboard substrate. Wood surfaces feature a 3mm-thick wood veneer edge banding.

Back-painted glass tops consist of ⅜"-thick glass with a ½" stanchion. Back paint color is 202G Ice Gloss.

Solid surface tops are 1"-thick acrylic solid surface material.

Bloom chair meets BIFMA large occupant standard (400 lbs.).

Lounge Seating

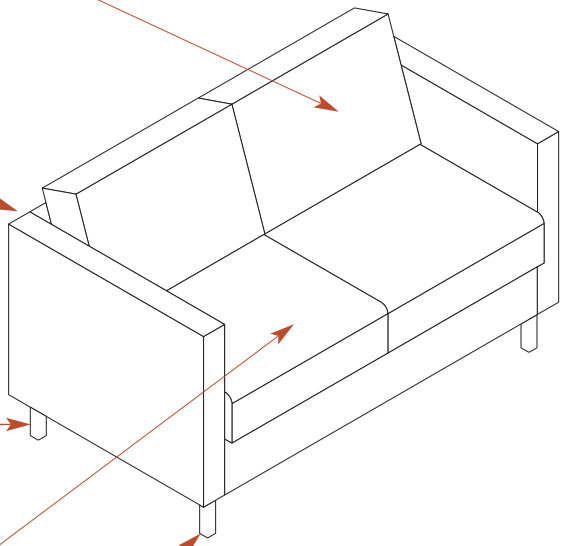
Overview

Statement of Line ➤See page 63
Finishes & Materials 295
COM/COL Yardage Req. 318

Back cushion contains 4¾"-thick high-density, high-resiliency, CFC-free, laminated polyurethane foam. Select standard cushion or sewn-tufted cushion.

Frame is constructed of ¾" plywood, utilizing lap joint construction that is glued and screwed.



6"H legs are platinum metallic powder-coated steel and available in either square or round profile.

Attached seat cushion is 6"-thick thick and made of high-grade, high-resiliency, CFC-free, laminated polyurethane.

Non-skid, nylon glides are ⅞" in diameter.

Details

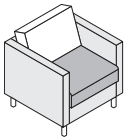
Boyd is offered in one-, two-, and three-seat lounge models. Models meet or exceed the applicable BIFMA/ANSI standards.

Leg and rail joints are double doweled, securely glued, and reinforced with corner blocks that are then glued and screwed to the base rails. The base frame is attached to the seat frame with wood screws through the rails.

Back cushions consist of high-density, high-resiliency foam over a non-stretch woven suspension that is stapled to the frame.

Seat is designed for comfort, giving you a residential feel. Wrinkles in the seat cushion are adherent to the design and should be expected.

Arms feature a sewn slipcover over top ½"-thick, high-grade polyurethane foam.



Contrasting fabric may be specified on the outer frame (back, arms, front kick-rail), back cushion, and seat cushion.

IMPORTANT: Orders cannot be cancelled for chairs specified with Alliance Program upholstery.

When specifying a striped or directional textile, a solid pattern is recommended for the back cushion due to alignment constraints.

Contrasting fabric is available. Use an electronic specification tool for accurate pricing.

TB133

TB133 fire code treatment is available on select Alliance Program upholstery.
➤See page 327 for process and pricing overview.

Note: Chairs are shipped with the column set at a mid-point between the lowest and highest positions

Desk Chairs

Overview

Pricing	➤See page 71
Alliance Program Pricing	72
COM/COL Yardage Req.	319
Finishes & Materials	295

Mesh-back models incorporate a mesh design perfectly proportioned to give ergonomically correct, flexible support in all upright or reclined positions. Available in three colors. The mesh is pulled over a structural, black metal tubular frame.

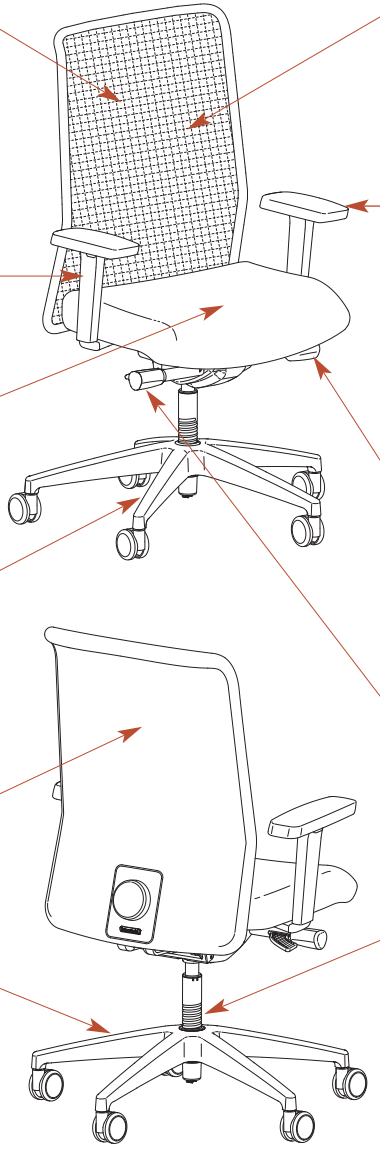
Arm structure consists of a steel upright covered in black nylon.

Seat cushions are 2 1/8" thick—1 3/4" CFC- and CHC-free molded foam, over a seven-layer molded plywood shell.

Black, dual-wheel casters on desk chairs are 65mm in diameter. Specify hard casters (802) for use on carpet (standard) or soft casters (801) for use on hard floors (upcharge applies).

Upholstered-back models feature a nine-layer molded plywood shell surrounded by molded, CFC- and CHC-free foam and upholstery.

Standard five-star base is 30% glass-filled nylon, textured, black plastic. Cast aluminum base with a polished finish is available as an option (upcharge applies).



Back features a three-position lock with release mechanism.

T-shaped arm rests are standard with 2D adjustability. User can adjust the arm vertically within a 4 1/4" range (11 positions) and horizontally within a 2 1/2" range. Arm caps are black polyurethane.

Seat slider is available as an option to adjust the seat depth for comfort. Seat depth is adjusted by grasping the left lever below the seat, pulling upward, and sliding forward or rearward; locks within a 2" range.

Synchro mechanism provides fully synchronized seat-to-back movement. Allows user to lock the chair in multiple positions within the range of movement using a single lever.

Seat height adjusts from 15 7/8"–23" via a patented twist/threaded column adjustment feature and pneumatic (gas) cylinder.

Details

Two back styles are available:
- Mesh back
- Upholstered back

Optional adjustable lumbar support on mesh-back chairs utilizes air-pressure technology integrated into the mesh back.

Optional adjustable lumbar support on upholstered-back chairs features a molded polyurethane lumbar pad that can be manually adjusted by turning a small knob.

Chair is shipped knocked down in four parts and can be assembled without tools.
➤See assembly instructions at www.kimballoffice.com

Campos desk chairs are user rated up to 275 lbs.

Campos is warranted for three-shift (24/7) service.

Adjustability Features

Synchro-tilt	•
Pneumatic height	•
Swivel	•
Lumbar	○
Seat slider	○
Anti-kick back	•
Tilt tension	•
Back tilt lock	•
2-D arms	•
4-D arms	○

• = standard ○ = option

Anti-kick back feature controls forward movement of the back rest when the lock is disengaged.

Tilt tension control adjusts the amount of resistance the user feels when leaning back.

4-D arm option enables the user to make front-to-back adjustment within a 2" range (6 positions), side-to-side adjustment (5 positions), and pivots inward and outward 10° with two stops.

Finishes & Materials	295
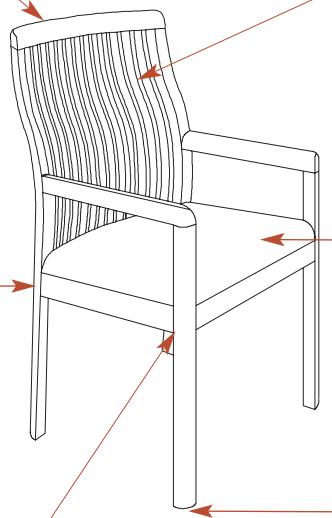
COM/COL Yardage Req.	319

Frame is constructed of kiln-dried maple hardwoods.

Joints are double doweled and securely glued to ensure maximum strength.

Corners are reinforced with wood corner blocks and tie screws.



Slats on slat back models are individually shaped and hand set using mortise and tenon joints to prevent twisting.

Cushions are high-resiliency, CFC-free polyurethane foam.

Nylon glides are 7⁄8" in diameter.

Details

Slat Back

Upholstered Back

Two different back styles are available on Carrington side chairs; each is available as a high back or mid-back. Two-seat bench is available with slat back.

Seat suspension is constructed of molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a suspension.

Seat cushion, applied to the flexible webbing suspension, is 3¾" thick on high back and mid-back chairs and 4" thick on two-seat bench.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples. The entire seat assembly is fitted into the frame with wood screws inserted into the wood corner blocks.

Back on upholstered back model is constructed using molded plywood that is secured to the frame with wood dowels and screws.1⅝" thick foam is applied to the plywood panel on the inside back of high-back models (foam is 1¼" on mid-back models); ⅜" thick foam is applied to the outside back. Upholstery is wrapped over the foam and secured with upholstery staples.

Arms on upholstered back chairs have upholstered wood inserts shaped to fit the inner arm of the chair frame. ¼" thick foam covers both sides of the 1½" thick panels. Arm inserts are held in place with wood dowels and screws.

Side Chairs and Bench

Overview

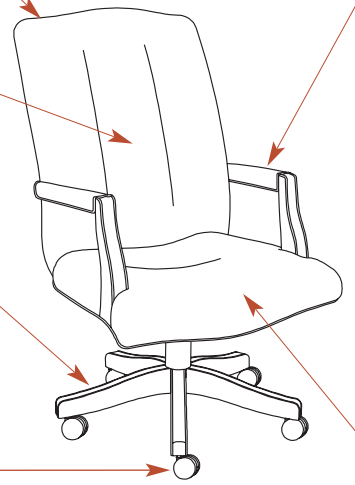
Statement of Line	➤See page 79
Kimball Office Uph. Pricing	81
Finishes & Materials	295
COM/COL Yardage Req.	319

Outer back is upholstered.

Cushions are CFC-free, contoured polyurethane foam.

5-prong base on desk chairs has a rigid, steel understructure. Maple hardwood base caps have a sloped profile.

Black, hard dual-wheel casters for use on carpeted floors are standard.



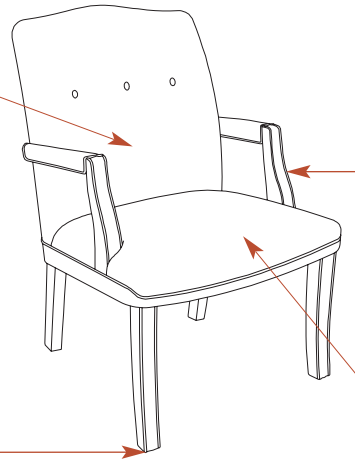
Open arms are upholstered separately and attached to the frame with metal brackets, T-nuts, and ¼"-diameter machine screws.

Enclosed arms on desk chairs are constructed with wood interior members. Arms are attached to the frame with metal brackets, T-nuts, and ¼"-diameter machine screws.

Waterfall front edge slopes forward to reduce pressure and increase a in the user's legs.

Back on side chairs is constructed of webbing that is stretched and stapled to the chair frame. A 2" thick cushion, plus an additional inch of foam in the lumbar area, is applied to the flexible webbing suspension.

Nickel-plated glides on side chairs are ⅞" in diameter.



Front of arms are maple hardwoods with detailing to match the wood base caps.

Seat cushion on side chair is 3¼" thick and is applied to the flexible webbing suspension.

Details

Two different upholstery details are available on Clairmont; both are available high back or mid-back models.

Two different arm styles are available on Clairmont desk chairs: enclosed arm and open arm.

Shell on desk chairs is single-shell construction fabricated with 9-ply molded plywood.

Frame on side chairs is kiln-dried maple hardwoods. Joints of back legs are double doweled and securely glued. Front legs use mortise and tenon joinery. For added strength, wood corner blocks and screws are used in conjunction with tie screws to reinforce frame corners.

Seat suspension on side chairs is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

Cushions on desk chairs are 3" thick on the seat and inside back and ¼" thick on the outside back.

Upholstery is wrapped over cushions and secured with upholstery staples.

Controls are attached to the frame with T-nuts and machine screws.

Soft, black, dual-wheel casters are available as an option and should be specified for use on hard floors; upcharge applies.

Antique English hooded ball casters for use on hard floors are available as an option; upcharge applies.

Adjustability Features

	High Back	*Mid-back*
Knee tilt and upright back lock	•	•
Tilt tension	•	•
Swivel	•	•
Pneu. height	•	•

• standard

Knee tilt control provides minimal rise of the front seat edge when reclining, allowing the user's feet to remain firmly on the floor. Back may be locked in a full upright position by pushing in pneumatic height adjustment lever. Recommended for users weighing 225 lbs. or less.

Tilt tension control adjusts the amount of resistance the user feels when leaning back.

Pneumatic height adjustment allows user to raise or lower the seat height with a control lever while seated. Upward movement of lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

Side Chairs and Bench

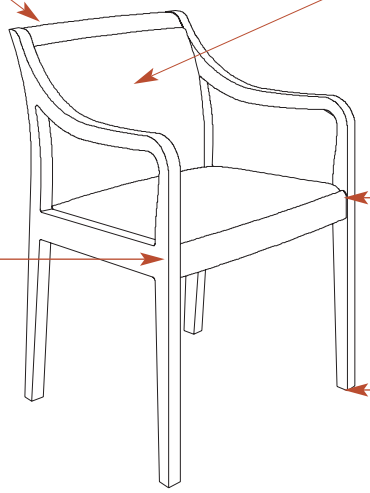
Statement of Line	➤See page 85
Kimball Office Uph. Pricing	87
Finishes & Materials	295
COM/COL Yardage Req.	319

Frame is constructed of kiln-dried maple hardwoods.

Joints are double doweled and securely glued to ensure maximum strength.



Cushions are high-resiliency, CFC-free polyurethane foam.

Corners are reinforced with wood corner blocks and tie screws on all models.

Nylon glides are ⅞" in diameter.

Details

Four different arm shapes are available on Collage side chairs: arched, sloped, rolled, and angular. Each has its own distinct design. Armless side chair is also available.

Wood Top Rail

Fully Upholstered

Top rail styles include fully upholstered and wood.

Back shapes include square, arched, and slat back.
➤See Statement of Line or pricing pages for arm and back combinations.

Two-seat bench is available with arched arms and fully upholstered back.

Bariatric bench is available with arched arms and fully upholstered back; rated to hold up to 500 lbs.

Seat suspension is constructed of ½"-thick, 5-ply molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a suspension.

Seat cushion is applied to the flexible webbing suspension. Foam is 1¾" thick on chairs and 2½" thick on two-seat bench.

Seat upholstery is wrapped over cushion and secured to the seat suspension with upholstery staples. The entire seat assembly is attached to wood cleats on the chair frame with wood screws. Piping trims the front edge of the seat.

Back on fully upholstered models is constructed of 1"-thick foam applied to ⅜"-thick, 5-ply contoured plywood. Back is attached to the frame with press fit fasteners.

Back on wood top rail models is constructed of 1"-thick foam applied to ⅜"-thick, 5-ply contoured plywood. Back is attached to the frame with T-nuts, machine screws, and metal brackets.

Back on slat back chair is constructed of ¼"-thick, 5-ply molded plywood slats that are machined to shape and glued individually into slots in the frame.

Back upholstery is wrapped in place and secured with upholstery staples.

Outer back panel is constructed of ⅜"-thick foam applied to 3/16"-thick, 3-ply contoured plywood. Press fit fasteners attach outer back panel to the inner back.

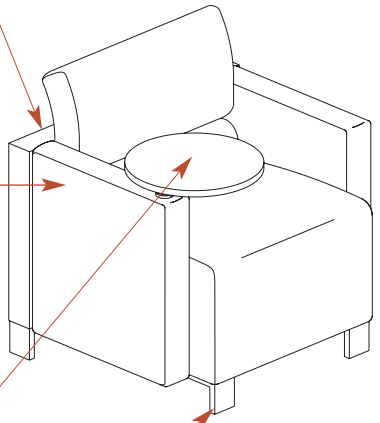
Finishes & Materials 295
COM/COL Yardage Req. 319

Wall is constructed of ¾" MDF and attached to the arms/backs using black 5⁄16" diameter, socket head bolts inserted through a decorative brushed aluminum washer.

Arm frames are constructed of ¾" plywood, wrapped with ¼" foam (foam is covered with ½ ounce of polyester on top of arm for added comfort), slipcovered, and attached to both the frame and the wall.

15" writing surface on tablet arm swivels 180°. Tablet mounts to a mechanism that fits into the structure of the tablet arm. Tablet is ¾" plywood with a wood veneer or black 3D laminate writing surface.



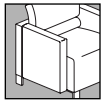
Legs are solid aluminum and finished with a natural, brushed finish.

Non-skid glides are ¾" in diameter and adjustable.

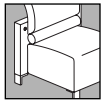
Related Products

Accent pillows are available.
➤See page 13.

Details



With Arms

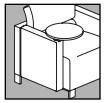


Without Arms

Lounge seating is available in 3-, 2-, and 1-seat models, each with or without factory-installed arms. Arms are also available for field installation.

Center Right Left

Tandem seating is available with in-line or in-line storage tables, located center, right or left. Models are available with or without factory-installed arms. Arms are also available for field installation.



Tablet arm is available factory installed or for field installation. Wood tablet surface is standard; black 3D laminate surface is available as an option.

Frame is constructed of ¾" plywood and attached to the wall. Frame construction meets or exceeds ANSI/BIFMA x5.4-1997, Lounge Seating Test Standard.

Back is constructed of 9⁄16" plywood.

Back cushions are 2" high-grade, CFC-free polyurethane foam wrapped with ½ oz. of polyester. Each cushion is 24"W and upholstered using a slip-cover-style upholstery method.

Seats have a high-tension strip webbing suspension that is stapled to the frame.

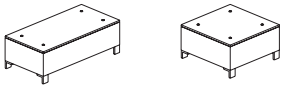
Seat cushions are 3½" high-grade, CFC-free polyurethane foam that is custom shaped. Each cushion is 24"W and upholstered using a slip-cover-style upholstery method.

Bolster is 4½" foam, wrapped with ½ oz. polyester, slipcovered and closed with a zipper. The bolster is attached to the back of the seat box.

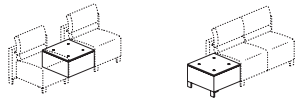
All seating models are fully upholstered. Bottom is finished with a black fabric dust cover.

Tables are constructed of ¾" plywood. Corners are mitered, then glued and cleated together. Tops on rectangular and square tables are ¾" plywood with quarter-cut sketch veneer and a non-rubbed finish. Tops on side and 45-degree tables are ¾" plywood with plain-sliced book-matched veneer and a non-rubbed finish.

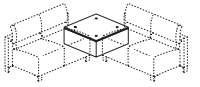
Storage tables feature a pull-out drawer. Drawer sides have a ½" flakeboard core with a maple veneer face and back. Drawer bottom is 7⁄32" 5-ply construction with a maple face and maple/birch back. Drawer fronts have a ¾" flakeboard core with a grade 1 veneer face and grade 2 veneer back. Fronts are fastened to the drawer with washer head (truss) screws. Dowel construction is utilized. Black, progressive-action slides with precision steel ballbearings ensure long lasting, quiet and smooth operation. Slide fully extends (19") and has a 100 lb. load rating. Drawer outside dimensions: 18"D x 21½"W x 8½"H; inside dimensions 17"D x 20½"W x 8¼"H.



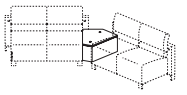
Freestanding tables are available in two design: rectangular magazine and square end.



Center In-Line End In-Line



90° In-Line



45° In-Line

Configurable tables are available in four designs. Center and end in-line tables are also available as storage tables.

Lounge Seating

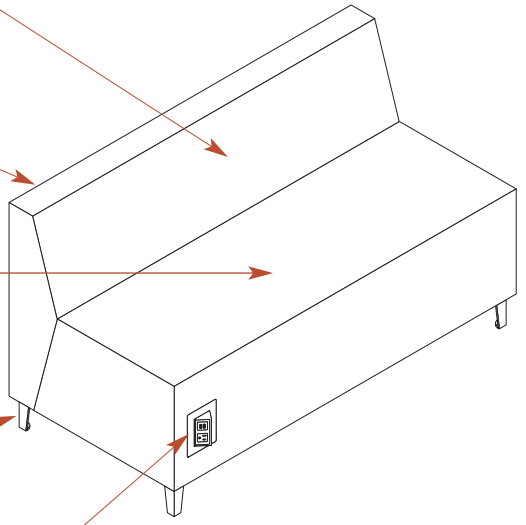
Statement of Line ➤See page 109
Finishes & Materials 295
COM/COL Yardage Req. 320

Back cushion contains high-density, high-resiliency, CFC-free, laminated polyurethane foam. Foam is 2¼" thick on angled-back models and 3½" thick on rounded-back models.

Frame is constructed of ¾" plywood, utilizing lap joint construction that is glued and screwed.

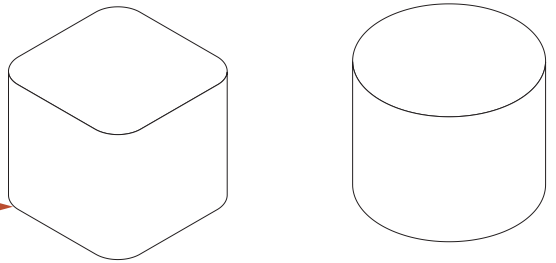
Seat cushion is 3½" thick and made of high-grade, high-resiliency, CFC-free, laminated polyurethane.



4" Legs are aluminum and available in a polished or powder-coated platinum metallic finish.

Non-skid, clear nylon glides enable 2½" of leg height adjustment

Platinum metallic power/USB grommet, featuring one power, two USB outlets, and 6"L cord, are available on lounges and modular ottomans in left, right (as seated; shown), or both kick rail positions.



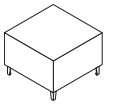
Non-skid, ¾" soft glides are standard on ancillary ottomans; 37mm caster options are available for mobility.

Details

Dwell is offered in 24", 30", 36", and 51"W lounge models, which meet or exceed the applicable BIFMA Heavy Duty Lounge and ANSI standards. Lounge models are available with an angled back or rounded back.

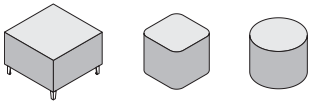
Leg and rail joints are securely glued and reinforced with screws. The base frame is attached to the seat frame with bolts.

Back cushions consist of high-density, high-resiliency foam over a non-stretch woven suspension that is stapled to the frame.

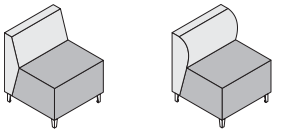


24"W modular ottoman has the same depth as lounge units and can be ganged to lounge units to create a variety of configurations.

20"W ancillary ottomans, shown at left, are available in square or round models. Standard with glides or with optional casters, ancillary ottomans facilitate impromptu meetings and open collaboration.

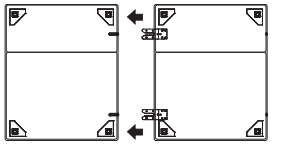


Contrasting fabric on the top and sides may be specified on modular and ancillary ottomans.



Contrasting fabric on the back and seat may be specified on lounge units. When specifying a striped or directional textile, a solid pattern is recommended for the back cushion due to alignment constraints.

Connections



Lounges and modular ottomans may be ganged together. Two ganging brackets (K60GB) are required to join two units together. Pre-drilled holes in the base accept the ganging bracket or its small mating piece. Once brackets are installed, units slide together for a secure connection. To disconnect, lift up and pull outward on the unit with the mating pieces.

Power cannot be daisychained for power/USB grommets.

Related Products

Accent pillows are available.

COM/COL Yardage Req. 320

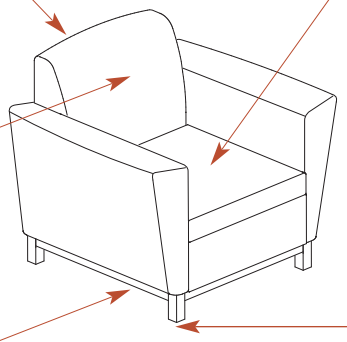
Frame is constructed of ¾" plywood, utilizing lap-joint construction that is glued and screwed.

Back cushions contain 4" high-density, high-resiliency, CFC-free, laminated polyurethane foam.



Legs and base rails are maple and available in a variety of finishes.

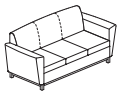
Seat cushions are 5" thick, removable, reversible, and replaceable. Seat cushions are made of high-grade, high-resiliency, CFC-free, laminated polyurethane.

Non-skid, nylon glides are ⅞" in diameter.

Details

One-seat

Two-seat



Three-seat

Enjoy is offered in one-, two-, and three-seat lounge models. Models meet or exceed the applicable BIFMA/ANSI standards and meets Kimball Heavy Duty testing requirements as follows:

One-seat model (K431A)	350 lbs.
Two-seat model (K432A)	700 lbs.
Three-seat model (K433A)	1050 lbs.

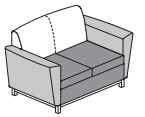
Two- and three-seat lounge models also exceed Bariatric testing requirements.

Legs and rail joints are double doweled, securely glued, and reinforced with corner blocks that are the glued and screwed to the base rails. The base frame is attached to the seat frame with wood screws through the rails.

Backs feature a high-tension, strip webbing suspension that is stapled to the frame, over which upholstery is placed.

Arms and outside panels have 1¼"-thick, high-grade polyurethane foam on the inner and top of the arm and ¼"-thick, high-grade polyurethane foam on the outer arm. Upholstery has ¼" sewn-in foam with slipcover, stapled into place.

Seats feature high-tension strip webbing that is stapled to the frame. Seat cushions are upholstered using a slipcover method that is finished with double-needle stitch detailing.



Contrasting fabric may be specified on the back, base/seat, and arms. Use electronic specification tool for accurate pricing if specifying fabrics in different price grades.

Side Chairs

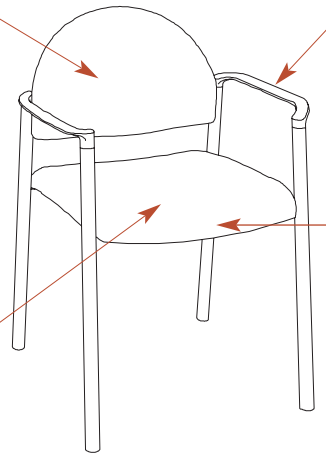
Overview

Statement of Line ➤See page 119
Alliance Program Pricing 125
Finishes & Materials 295
COM/COL Yardage Req. 321

Back and seat are fully upholstered. Seat is tilted back, and the back is slightly reclined to allow the user to assume a more natural, relaxed posture.

Back upholstery, including ¾"-thick foam for the inside back and ¼" thick foam for the outside back, is applied to the back as a slipcover and secured with upholstery staples.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples.

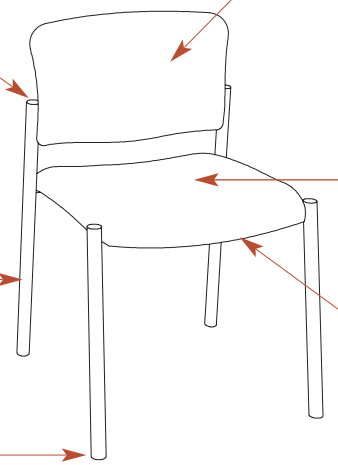


Arm caps are injection molded nylon and attached to the frame with a pressure fit. They are color matched to the frame; 501 Platinum metallic finish receives black armcaps.

Waterfall front edge slopes forward to reduce pressure and increase circulation in the user's legs.

Backs are secured to the frame with 4 countersunk flat-head screws, 11-gauge steel plates, and T-nuts. Round back models are constructed using an injection molded polypropylene panel. Flair back models are constructed using ⅜"-thick, 7-ply, molded plywood.

End caps are fitted into the frames of armless models; they are plastic on Cinder (black) frames and metal (color coordinated to the frame) on platinum metallic frames.



Cushions are high resilience, CFC-free polyurethane foam. Seat cushion is 1¼" thick.

Legs are angled for stability and available in textured powdercoat finish or smooth platinum metallic paint.

Seat pan is contoured, blow-molded polyethylene. Channels within the seat pan fit over the cross members. Seat pan is attached to the seat frame with four machine screws and T-nuts.

Black nylon ball glides are standard on static 4-leg models. Hard casters are standard on mobile models.

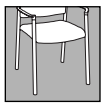
Details

Round

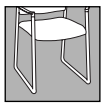
Flair

Two open back shapes are available on all Event models:
- Round (shown at left, top)
- Flair (shown at left, bottom)

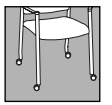
Three arm styles are available: with arms, without arms, and with tablet arm (4-leg non-mobile models only). Tablet arm, ½" x 12¼" x 22¼", is hinged for easy access. It has a black phenolic core with radius edge and black laminate top and bottom surfaces. Mounted on the right.



4-Leg



Sled Base



Mobile

Three unique leg frames are available 4-leg, sled base, and mobile. Frames are ⅞" diameter, 14-gauge tubular steel. Cross members are ¾" diameter, 14-gauge steel. Leg frames are joined to the cross members with metal inert gas (MIG) welds.

4-leg models and mobile models without arms stack up to 6 chairs high; mobile models with arms stack up to 4 chairs high.

Sled base, 4-leg with tablet arm, and bariatric models are non-stacking.

Bariatric 4-leg with arms is available to accommodate up to 500 lbs.

Contrasting upholstery on backs and seats is available on Event side chairs. If different price grades are selected, use an electronic specification tool for accurate pricing.
➤See page 310.

Flat glides are available on 4-leg models for use on textured, soft, or wood surfaces. Glide has a silver-plated top with white nylon pad. Upcharge applies.

Soft casters for use on hard floors are available on mobile models. Upcharge applies.
Note: Sled base should not be used on hard floors for stability reasons and to prevent surface damage.

Chairs are shipped three to a carton when applicable.

Related Products

Ganging devices, ordered separately in sets of 5 pairs, are available to gang like models. The 2½" x 5¾" polypropylene devices snap onto chair legs. One pair is required to gang two chairs.

Transport dolly is available to move up to six 4-leg chairs at a time. Dolly has a tubular steel frame, green powdercoat finish, and 8" semi-pneumatic ball-bearing wheels. Removable handle allows for storage.

SUFFOLK™ Desk and Side Chairs

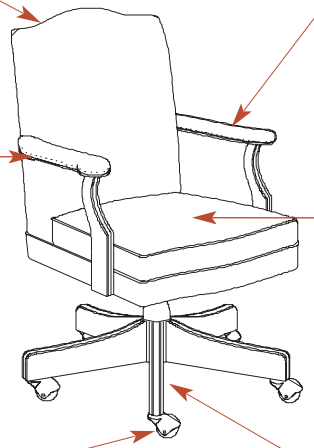
Overview

Statement of Line ➤See page 131
Finishes & Materials 295
COM/COL Yardage Req. 320

Frame is kiln-dried hackberry.

Brass trim nails, standard on all models, are individually driven head to head around the bottom edge of the upholstered arm caps.

Antique English hooded ball casters are standard on desk chair with casters.



Arm caps are upholstered.

Cushions are high-resiliency, CFC-free polyurethane foam.

5-prong base has a rigid steel understructure and hardwood caps with radius ends.

Details

Mid-Back Desk Chair

Mid-Back Side Chair

Open Back Side Chair

Three models are available: mid-back desk, mid-back side, and a complementary open-back side chair.

Joints are double doweled and securely glued to ensure maximum strength. Tie screws are added for strength. Seat is reinforced with corner blocks and four screws.

Side-to-side rails on desk chair provide strength and a secure place to mount the swivel tilt mechanism.

Seat suspension is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

3" thick seat cushion is applied to the flexible webbing suspension.

1½" thick back cushion is bonded to the hardwood back panel.

Upholstery is wrapped over the cushions and secured with upholstery staples.

Swivel tilt mechanism on desk chair is attached with T-nuts and machine screws.

Nickel-plated glides on side chairs are ⅞" in diameter.

Adjustability Features

Desk Chair	
Swivel tilt	•
Pneumatic height	•

• = standard

Swivel tilt control allows reclining while keeping the back-to-seat angle constant. It features a heavy-duty adjustable torsion spring.

Pneumatic height adjustment allows user to raise or lower the seat height with a control lever while seated. Up or down movement of lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

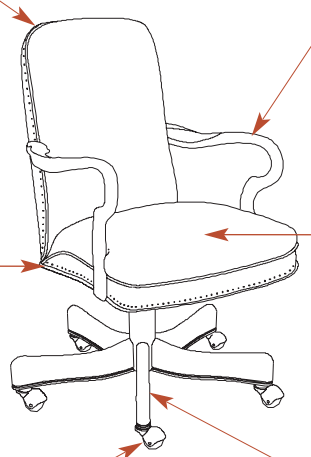
SPRINGFIELD™ Desk and Side Chairs

Overview

Statement of Line ➤See page 131
Finishes & Materials 295
COM/COL Yardage Req. 321

Frame is kiln-dried maple hardwoods.

Arms are maple hardwoods.



Brass trim nails, if selected, are individually driven head to head around the bottom edge of seat and around back.

Cushions are high-resiliency, CFC-free polyurethane foam.

Antique English hooded ball casters are standard on desk chairs.

5-prong base has a rigid steel understructure and curved hardwood caps.

Details

Desk chair (plain upholstery)

Side chair

Desk chair (button-tufted upholstery)

Side chair

Button tufting features hand-pleated diamond tufts on seat and inside back. Metal-prong button unit is pulled through the cover and foam, then inserted through a paperboard washer and a self-locking steel spring retainer and clinched.

Springfield desk chairs are suitable for pull-up use in conference settings.

Joints are double doweled and securely glued to ensure maximum strength. Tie screws are added for strength. Seat is reinforced with corner blocks secured with four screws.

Side-to-side rails on desk chair provide strength and a secure place to mount the swivel tilt mechanism.

Seat suspension is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

Seat cushion is dual density foam applied to the flexible webbing suspension.

Back suspension is constructed of four weaves of heavy webbing secured to the frame with staples. A lighter weight webbing is then applied over the four-weave strips. Foam is applied to the suspension.

Upholstery is wrapped over the cushions and secured with upholstery staples.

Swivel tilt mechanism on desk chair is attached with T-nuts and machine screws.

Nickel-plated glides on side chairs are 7/8" in diameter.

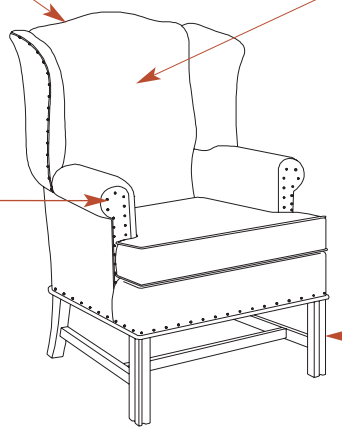
HILLSBOROUGH™ Lounge Seating

Overview

Statement of Line ➤See page 131
Finishes & Materials 295
COM/COL Yardage Req. 321

Frame is kiln-dried maple hardwoods.

Brass trim nails are individually driven head to head around the bottom edge of seat and on the front of rolled arm.



Cushions are high-resiliency, CFC-free polyurethane foam.

Legs are reinforced with stretchers and rails for added durability.

Details

Side Chair

2-Seat Lounge

3-Seat Lounge

Joints are double doweled and securely glued to ensure maximum strength. Tie screws are added for strength. Seat is reinforced with support rails and corner blocks secured with four screws for extreme rigidity and strength.

Seat suspension is constructed with pre-assembled high carbon, high tensile, hand drawn drop-in coil spring units, covered with a high-quality woven webbing. A ¼" insulator pad is applied over the seat suspension. Denim material is upholstered over the pad.

Removable seat cushions have 4¼" of bonded foam on side chair, 4" of bonded foam on 2-seat and 3-seat lounge.

Back suspension is constructed of five 11" gauge sinuous springs that are suspended from the frame by metal clips. Springs are tied together with a strong steel-resistant wrapping.

Back cushion is 3" thick and is supported with a layer of high-quality woven webbing covering the back suspension. Rails are padded with foam for additional cushioning.

Upholstery is wrapped over the cushions and secured with upholstery staples.

Nickel-plated glides are ⅞" in diameter.

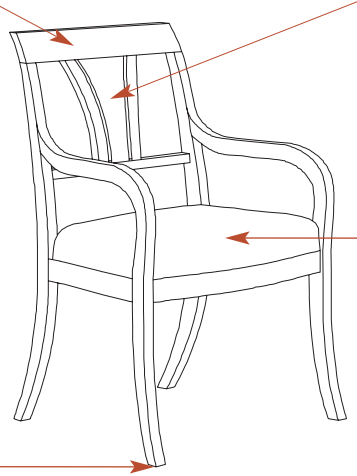
Overview

Statement of Line ➤See page 145
Finishes & Materials 295
COM/COL Yardage Req. 321

Frame is kiln-dried maple hardwoods.



Detailing on veneered, eyes, and scroll splat back has a contrasting Ebony finish. All three splats on triple splat back model have an Ebony finish.

Cushions are high-resiliency, CFC-free polyurethane foam.

Plastic glides are 5⁄8" in diameter.

Details

Uph. Back

Veneered Splat Back

Eyes Splat Back

Three different arched arm models are available: upholstered back, veneered splat back, and eyes splat back.

Uph. Back

Triple Splat Back

Scroll Splat Back

Three different scrolled arm models are available: upholstered back, triple splat back, and scroll splat back.

Joints are double doweled and securely glued to ensure maximum strength. Wood corner blocks, wood screws, and glue reinforce adjacent seat rails.

Seat rails are faced with vertical, straight-cut veneer for grain uniformity throughout the entire chair.

Seat suspension is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

Back on upholstered back models has a contoured interior frame of 5⁄8" thick dimensioned plywood, covered with a solid webbing. 1" thick foam is applied to the webbing. Frame is attached to the chair with steel pins and wood screws.

Top rail on scrolled arm models is white ash burl veneer.

Center splat on veneered splat back model utilizes white ash burl veneer.

Upholstery is wrapped over the cushion, secured with upholstery staples, and finished with upholstery gimp.

Task Chairs and Stools

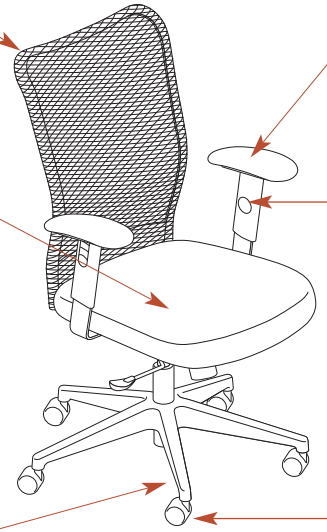
Overview

Statement of Line	➤See page 149
Kimball Office Uph. Pricing	153
Finishes & Materials	295
COM/COL Yardage Req.	321

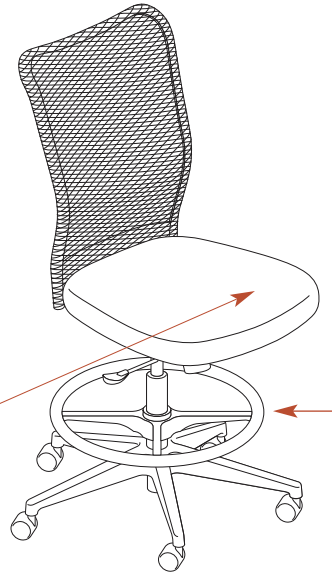
Mesh back, available in seven colors, is 84% texturized polyester and 16% elastin. The mesh is pulled over a metal frame and stapled into a plastic insert at the bottom.

Seat cushions feature a seamless, pull-over style upholstery. 1.0 models have 2½" of molded, CFC-free, urethane foam applied over a recycled plastic seat shell. 2.0 models (shown) have 1" slab foam with a ½" foam overlay topper and a ½" foam bottom (to give contour to seat) applied over a plywood seat shell.

5-prong base on 1.0 and 2.0 task chairs is constructed of extremely rigid, glass-filled nylon. Black surface is textured for scuff resistance.



Contoured "sit spot" and waterfall front edge provides optimal seated support and prevents undue pressure in the lower thigh/knee area.



Arm caps are soft, self-skinning polyurethane foam molded over a steel core for strength.

Arms are height adjustable within a 2½" range by the push of a button. 1.0 models (shown) lock into one of 7 positions. 2.0 models lock into one of 5 positions.

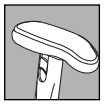
Height- and width-adjustable arms on 1.0 models also have a width adjustable range of 4¼".

Black, hard dual-wheel casters are standard. Soft dual-wheel casters are available as an option on 1.0 and 2.0 task chairs and stools; upcharge applies.

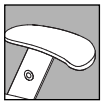
Footring is standard on stools.

Details

Itsa 1.0



1.0 with TB133



Itsa 2.0

Itsa 1.0

Itsa 2.0

Seat cushion and armrest design on 1.0 models make it ideal for users of all sizes. Seat cushion and armrest design on 2.0 models, along with a lower seat height range, make it is ideal for users of smaller stature.

Itsa 1.0 task 300 base is constructed of aluminum with a black, powdercoat finish. Task 300 chairs are rated to seat individuals weighing up to 300 lbs.

Seat slider option is available on all task chair models to adjust the seat depth, providing additional comfort for users with long legs. Seat depth is adjusted via a single lever and locks in one of 6 positions within a 2½" range. Upcharge applies.

TB133 is available. 1.0 models with TB133 will feature a different armcap profile than the standard model.
➤See above.

Itsa seating is warranted for three-shift (24/7) service.
➤See Product Warranty, page 360.

• = standard ○ = option

Knee-tilt control provides minimal rise of the front seat edge when reclining, allowing the user's feet to remain firmly on the floor. Back may be locked in a full upright position by pushing in pneumatic height adjustment lever.

Synchro-tilt control provides fully synchronized seat-to-back movement, plus:
- Free-float movement allows user to lock the chair in one of multiple positions within the range of movement using a single lever.
- Anti-kickback clutch controls forward movement of backrest when the lock is disengaged.
- Reclining tension adjustment is user friendly and accommodates a wide range of weights via a single lever on the left side of the chair (as seated).

Pneumatic height adjustment allows user to raise or lower the seat while seated. Upward movement of control lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

Desk and Side Chairs

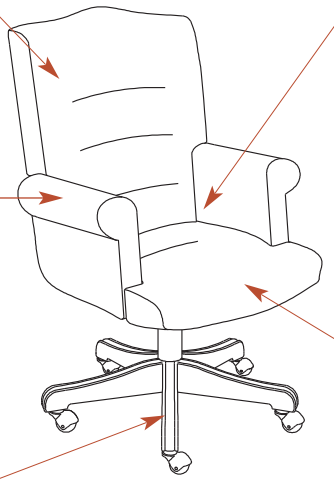
Statement of Line ➤See page 157
Finishes & Materials 295
COM/COL Yardage Req. 320

Outer back has ¼" foam and is fully upholstered.

Arms have rigid, molded-urethane inserts, wrapped with ½"-thick foam (1" thick on arm tops), and secured to the seat and back with metal L-brackets, T-nuts, and machine screws.

5-prong base on desk chairs has a rigid, steel understructure. Maple hardwood radius-end base caps (B75) with Antique English hooded-ball casters are standard.



Cushions are 2¼"-thick, high-resiliency, CFC-free polyurethane foam.

Waterfall front edge slopes forward to reduce pressure and increase circulation in the user's legs.

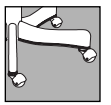
Details

Horizontal Stitching

Vertical Stitching

Button Detailing

Three different upholstery details are available on both high-back or mid-back models: vertical stitching, horizontal stitching, or button detailing.



Curved base caps (B31) with Antique English hooded-ball casters are available on desk chairs; upcharge applies.

Shell on desk chair is a one-piece, 9-ply molded plywood panel.

Frame on side chairs is kiln-dried maple hardwoods. Joints on back legs are double doweled and glued. Front legs use mortise and tenon joinery. Wood corner blocks, screws, and tie screws reinforce frame corners.

Seat suspension on side chair is constructed of unidirectional webbing that is machine stretched across the frame and stapled to the side rails. Seat cushion is 3½" thick.

Back suspension on side chair is constructed of vertical and horizontal webbing stapled to the back frame.

Upholstery is wrapped over cushions and secured with staples.

Nickel-plated glides on side chairs are ⅞" in diameter.

Controls on desk chairs are attached to the frame with T-nuts and machine screws.

Adjustability Features

Knee tilt and upright back lock	•
Tilt tension	•
Swivel	•
Pneu. height	•

• = standard

Knee tilt control provides minimal rise of the front seat edge when reclining, allowing the user's feet to remain firmly on the floor. Back may be locked in a full upright position by pushing in pneumatic height adjustment lever. Recommended for users weighing 225 lbs. or less.

Tilt tension control adjusts the amount of resistance the user feels when leaning back.

Pneumatic height adjustment allows user to raise or lower the seat height with a control lever while seated.

Finishes & Materials 295

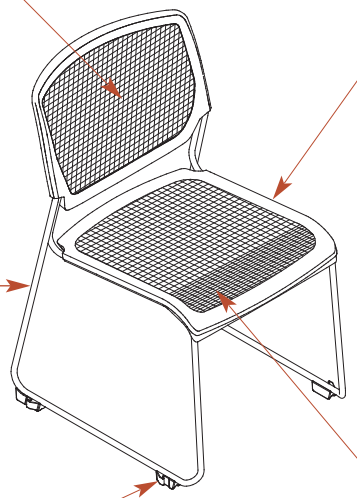
100% polyester mesh back and seat is available in five colors:
- Big Sky
- Black Tie
- Crimson
- Tangerine
- Kiwi



Back and seat frame is black plastic.

Legs have a polished chrome finish.

Mesh on the front of the seat features a tighter weave for additional support.

Black plastic glides are standard and can be used to gang adjacent chairs.

Details

Compact stacking sled-base design enables chairs to be stacked up to 30 high on a dolly or up to 10 high on the floor.

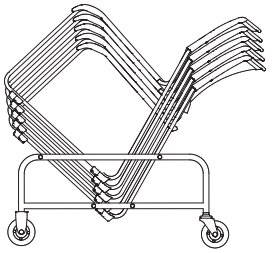
TB133 approved as standard. There are no separate models or pricing.

Chairs are available singly or in sets of four chairs. Sets of four are available under one model number; all chairs in the set will have the same mesh color.

Chairs are shipped four to a carton when applicable.

Poly chairs accommodate up to 253 lbs.

Related Products



Transport dolly is available to move up to 30 chairs. Dolly has a tubular steel frame, gray powdercoat finish, and four 8" semi-pneumatic ball-bearing wheels. Poly chairs stacked 30 high on the dolly will have an overall height of 70" and overall width of 37".

Ganging devices are not required. The black plastic glides that are standard also serve as a ganging bracket.

Lounge Seating

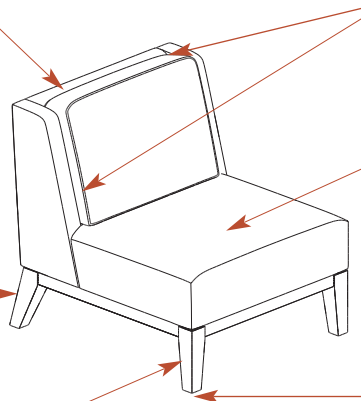
Overview

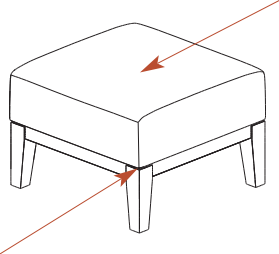
Statement of Line	➤See page 167
Configurations	170
Finishes & Materials	295
COM/COL Yardage Req.	322

Frame is constructed of ¾" plywood, utilizing lap joint construction that is glued and screwed. All upholstered models are standard in kiln-dried maple hardwoods.

Lounge units feature a wall-saver back leg.

Legs and rails of base frames are constructed using double dowel and glue constructions with corner blocks which are also glued and screwed to base rails. The base frame is then attached to the seat frame with wood screws through the corner blocks. Units over 48"L feature additional screws to provide extra support.





Rails and top of the legs are accented with a decorative reveal.

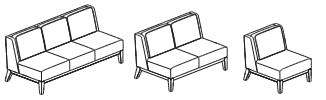
Piping is standard around the entire edge of both the front and back of the back cushion.

Cushions are high-resiliency, CFC-free, polyurethane foam. Seat cushions, specifically, are 5"-thick, high-grade, laminated polyurethane foam that is custom shaped.

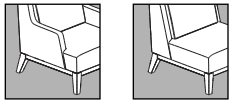
Non-skid glides are ¾" in diameter and adjustable.

Ottoman and bench frame are constructed of 5½"-thick, high-grade polyurethane foam applied to a ¾" plywood frame using lap joint construction that is glued and screwed. A sewn slipcover is applied over the foam and attached with upholstery staples. Benches feature a sewn seam in the center. Legs and rails of base frames are constructed using double dowel and glue construction with corner blocks, which are also glued and screwed to the base rails. The rails feature a ¼" set back when attached to the legs. Tops of the legs are accented with ¼" decorative reveal. The base frame is then attached to the seat frame with wood screws through the corner blocks.

Details



Three-Seat Two-Seat One-Seat



With Arms Without Arms

Lounge seating is available in three-, two-, and one-seat models, each with or without arms.

Seats have a high-tension strip webbing suspension that is stapled to the frame. Seat upholstery features a wrap-around upholstery method and is stapled into place.

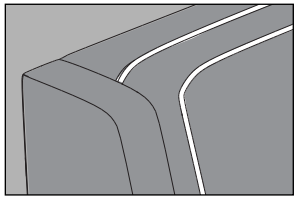
Back features a non-stretch woven suspension that is stapled to the frame, over which upholstery is placed.

Back cushions are 5½"-thick, high-grade polyurethane foam wrapped with ¾ oz. bonded polyester, which is slipcovered and closed with a zipper.

Armrest tops and outside panels are ½"-thick, high-grade polyurethane foam. The interior arm used 1"-thick, high-grade polyurethane foam. Upholstery is a sewn slipcover that is stapled into place.

Pose lounge, ottomans, and benches meet or exceed the applicable BIFMA/ANSI standards and meet Kimball Heavy Duty testing requirements of 350 lbs.

Contrasting upholstery may be selected for the back cushion; use electronic specification tool for accurate pricing.
Note: Seat and outer back/frame upholstery will be the same.



Contrasting piping may be specified in Kimball Office fabric or leather.
Note: Piping appears on the back cushion only and not on the seat cushion or the outer back/frame.

All models are fully upholstered. Bottom is finished with a black, fabric dust cover prior to the wood frame being attached.

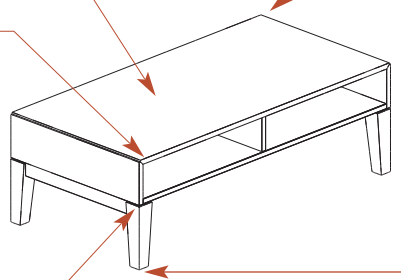
Freestanding Tables

Statement of Line	➤See page 167
Configurations	170
Finishes & Materials	295
COM/COL Yardage Req.	322

Tops feature a 1/4" x 1/4" reveal and are 3/4" veneered plywood.

Corners are mitered utilizing double biscuit joinery which is glued and cleated together.



Corners are mitered utilizing double biscuit joinery which is glued and cleated together.

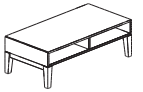
3/4" non-skid, adjustable glides are standard on all Pose tables.

Legs and rails of base frames are constructed using double dowel and glue constructions with corner blocks which are also glued and screwed to base rails. Tops of the legs and rails feature a 1/4" decorative reveal. The base frame is then attached to the table frame with wood screws through cleats.

Details

Freestanding tables are available in three designs.

End and corner tables are constructed of 3/4" veneered plywood. Tops are attached to the table frame with metal brackets and screws.



Magazine table tops feature mitered corners with 1/4" x 1/4" reveal are 3/4" veneered plywood utilizing biscuit joinery that is glued and cleated together. End panels are 3/4" veneered plywood; attachment of bottom shelf utilizes joints which are securely fastened with screws, dowels, and concealed fasteners to ensure maximum strength. The center divider is constructed of 3/4" veneered plywood that is attached to the bottom panel with glue and screws. The side rails feature a 1/4" setback of 5 3/4" and are attached to the underside of the bottom shelf with screws through the corner blocks.

Metal ganging brackets are spaced evenly over the wood base frame of the adjoining models and tightened. All models are capable of ganging, dependent upon user preference and needs.

Kneespace	20½"

Desk and Side Chairs

Overview

Statement of Line ➤See page 177
Finishes & Materials 295
COM/COL Yardage Req. 322

Outer back is fully upholstered.

Back cushion is high resiliency, CFC-free, polyurethane foam.

Hardwood base caps are kiln-dried maple supported by a rigid steel substructure.

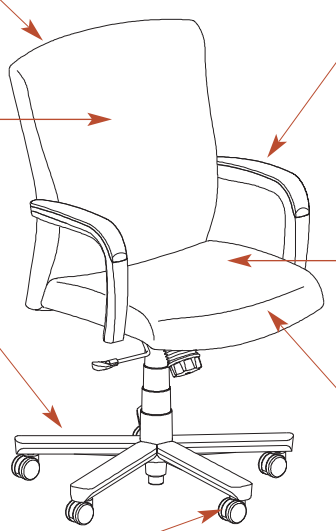
Black, glass-filled nylon base is textured for scuff resistance.

Hard, black, dual-wheel casters for use on carpeted floors are standard.

Soft dual-wheel casters are available and should be specified for use on hard floors. Casters are black. Upcharge applies.

Glides on wood frame side chair are dome-shaped plastic and 7⁄8" in diameter.

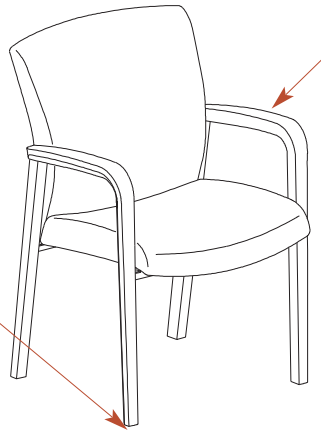
Glides on metal frame side chair are nylon ball inserts and 1⅛" in diameter.



Arms on desk chairs are offered in kiln-dried maple with black urethane caps on models with wood bases, or soft urethane insert-molded over a steel core on models with a black nylon base.

Seat cushion is CFC-free molded urethane foam.

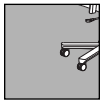
Waterfall front edge slopes forward to reduce pressure and increase circulation for the user's legs.



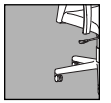
Hardwood-frame side chairs are kiln-dried maple. Joints are double doweled and glued to ensure maximum strength. Frame assembly is mounted in holes bored into the leg and secured with steel brackets and wood screws.

Metal-frame side chairs use 1⅛" diameter, 13 gauge steel tubing and feature a black, textured powdercoat. Frame components are welded together using a precision weld fixture to ensure accuracy and rigidity. Arms have black urethane caps.

Details



Wood base and arms



Black base and arms

Two arm/base styles are available on desk chairs: wood or black urethane. Shroud and controls are black.

Accent/header is available on all Stature desk and side chairs. Contrasting upholstery is an option.

Contoured back shell is blow-molded polyethylene.

Seat rails on side chairs are ¾" diameter (outside), 14-gauge tubular steel.

Back is upholstered using a slipcover-style upholstery technique.

Seat pan is contoured, blow-molded polyethylene. Channels within the seat pan fit over the metal seat rails on side chair frame and the control mechanism of desk chair.

Seat is upholstered using a pull-around upholstery technique.

Cushions are 2" thick on the seat and 1½" thick on the back.

Arms of desk chairs are attached to the seat with a steel support bracket and ¼" diameter machine screws.

Adjustability Features

	Desk Chair
Knee tilt and upright back lock	•
Tilt tension	•
Swivel	•
Pneu. height	•

• = standard

Knee-tilt control provides minimal rise of the front edge of the seat when reclining. Back may be locked in a full upright position by pushing pneumatic height adjustment lever inward. Recommended for users weighing 225 lbs. or less.

Tilt tension control adjusts the amount of resistance the user feels when leaning back.

Pneumatic height adjustment allows user to raise or lower the seat height with a control lever while seated. Upward movement of lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

Note: Tailstock bracket allows the back upright to fasten directly to the control mechanism for added support and rigidity. Back upright mounting plate is 10-gauge metal.

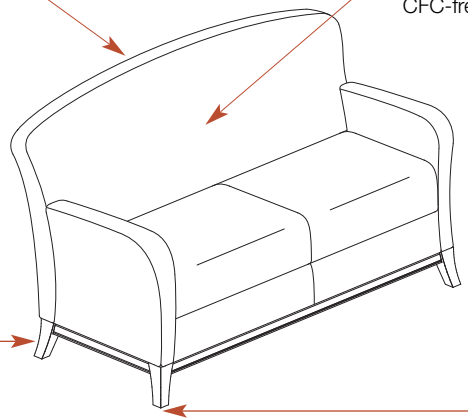
Finishes & Materials 295
COM/COL Yardage Req. 322

Frame is constructed of ¾" plywood, utilizing lap joint construction that is glued and screwed. All upholstered models are standard in kiln-dried maple hardwoods.

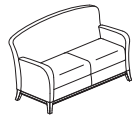
Cushions are high-grade resiliency, CFC-free polyurethane foam.



Legs are flared and accented with a decorative base rail.

Non-skid glides are ¾" in diameter and adjustable.

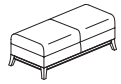
Details



2½-Seat

1-Seat

Lounge seating is available in two-and-half-seat and one-seat models with arms.



Bench is 53"W.

Ottoman is 25"W.

Wood base on all models is available in all Kimball Office standard wood finishes.

Back and seats feature high-tension, strip-webbing suspensions that are stapled to the frame.

Back cushions are 1½"-thick, high-grade, laminated polyurethane foam. Back upholstery features ¼" sewn-in foam and uses a slipcover upholstery method that is stapled into place.

Seat cushions are 6"-thick high-grade laminated polyurethane foam that is custom shaped. Seat upholstery uses a wrap-around upholstery method that is stapled into place.

All models are fully upholstered. Bottom is finished with a black fabric dust cover.

Armrest tops and outside panels are constructed with ¼"-thick, high-grade polyurethane foam. Upholstery features an additional ¼" sewn-in foam and uses a slipcover upholstery method that is stapled into place.

Legs and rails of base frames are constructed using double dowel and glue constructions with corner blocks that are also glued and screwed to the base rails. The base frame is attached to the seat frame with wood screws through the rails. Two-and-a-half seat and bench models have additional screws to provide extra support.

Talent lounge seating and bench meet or exceed the applicable BIFMA/ANSI standards and meet Kimball Heavy Duty testing requirements of 350 lbs.

Related Products

Accent pillows are available.

Lounge Seating

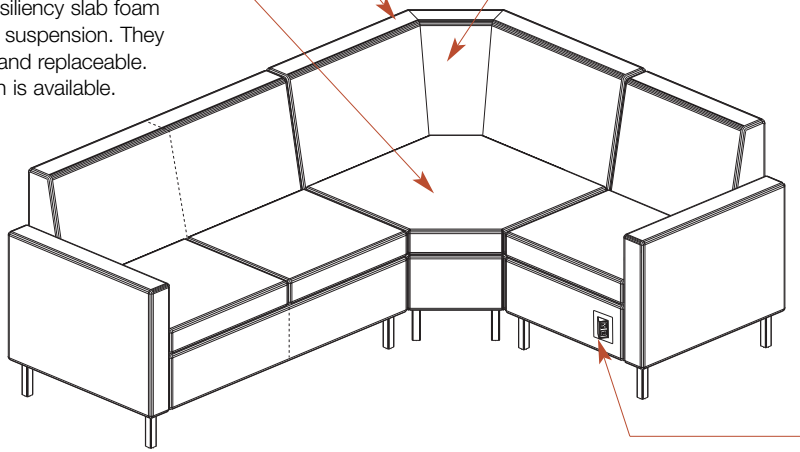
Actual Dimensions ➤See page 197
Finishes & Materials 295

Frame is constructed of ¾" plywood, using a lap-joint construction method. The frame is glued and screwed together.

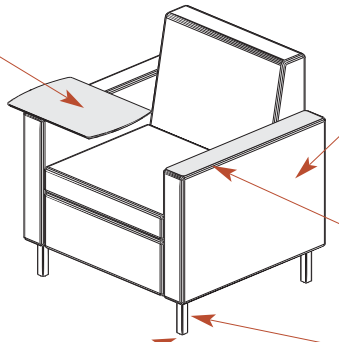
Seat cushions contain 3½" high-density, high-resiliency slab foam over a webbed suspension. They are removable and replaceable. Soft seat option is available.

Back cushions contain 2½" high-density, high-resiliency foam over a non-stretch woven suspension that is stapled to the frame.



Power/USB grommets are available in left (shown), right, or left and right kick rail on all lounge models.

Wood or laminate tablet arms are available on models with 4" arms. Tablet arms may be specified for the right (shown), left, or both left and right arms. Models with 4" arms on both sides may be specified with a tablet arm on one side and an armcap on the other.
Note: Location is defined from the user's perspective when seated in the chair.



Arm tops and outside panels feature ¾"-thick, high-grade polyurethane foam.

Wood or laminate arm caps are available for 4"-arm models.

Square legs are steel with a platinum powdercoat finish. They are attached with wood screws through the frame's corner blocks.

Non-skid, adjustable glides are 2" in diameter.

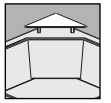
Details

All Villa lounge models are fully upholstered. Bottoms are finished with a black fabric dust cover. Legs are attached after upholstery is applied.

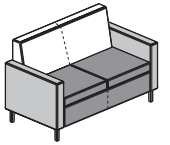
Villa seat and back cushions are upholstered using a slipcover method and finished with single and double French seams.

Arms feature a sewn slipcover with French seams that is stapled into place.

Soft seat cushion option is available on all Villa models, except youth lounge. Provides 10 lb. Visco foam layer atop HR45 foam to provide comfort and support. Certain upholsteries might wrinkle over time with soft seat option.

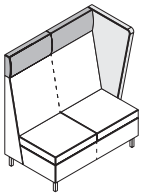


Wood or laminate floating top is available on Villa plateau corner.



Contrasting fabric may be specified on the back, base/seat, arms, and headrest (privacy-back models).

Mobile one-seat lounge features 5" arms on both sides and includes cupholders in both arms, non-handed tablet arm, front casters, and black handle.



Privacy-back seating is available in armless 24"W one-seat, 30"W one-seat, armless two-seat models, with or without Shade, and 90° corner models. Luan material is added to the back for flexibility, support, and overall comfort. Leather is not available on backs of privacy-back models, but may be selected for the headrest and seat.

Tables are available with HPL laminate or wood top; round tables are also available with a white matte glass top. Legs are the same as those featured on lounge seating models; square steel with a platinum powdercoat finish. All tables, except round models can gang to any lounge unit. Grommets are available.
➤See page 193.

Finishes & Materials 295

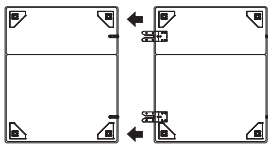
The configurations shown on this page are just a few examples of those possible with Villa components.
Note: Prices shown at right for upholstered models reflect the Kimball Office grade 1 prices.



Units, incuding models with Shade™, may be ganged together. Two ganging brackets are required to join two units together. Pre-drilled holes in the base accept the ganging bracket or its small mating piece. Once brackets are installed, units slide together for a secure connection. To disconnect, lift up and pull outward on the unit with the mating pieces.

➤See page 223 to specify.

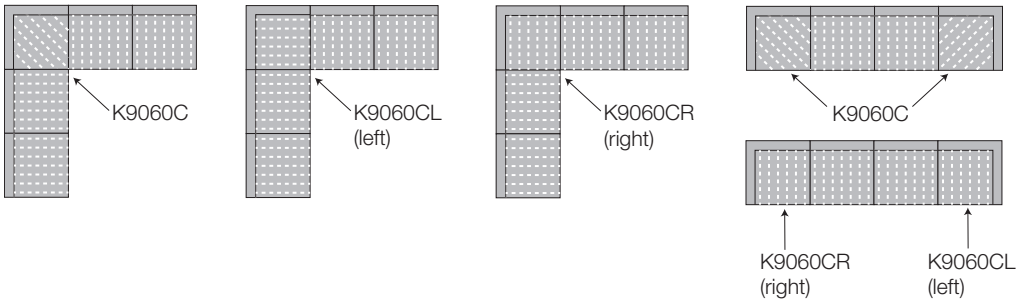
Fabric Application Diagrams (by model):



Ganging devices
➤See page 223.

Certain upholsteries might wrinkle over time with soft seat option.

Use an electronic specification tool for accurate pricing when specifying contrasting fabrics.

IMPORTANT: Fabrics reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all fabrics and is not considered a defect; it is more easily recognized on fabrics with a nap or shimmer and more apparent on crescent or corner units.

Certain upholsteries might wrinkle over time with soft seat option.

Use an electronic specification tool for accurate pricing when specifying contrasting fabrics.

IMPORTANT: Fabrics reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all fabrics and is not considered a defect; it is more easily recognized on fabrics with a nap or shimmer and more apparent on crescent or corner units.

TB133

Fire code treatment is available on select Kimball Office upholstery.
➤See page 303 for upholstery selections.
➤See page 327 for COM or COL process overview.

How to Specify

❶ Model

Back Upholstery:

Pricing

GSA SIN 711-16

Overview ➤See page 191
Finishes & Materials 295

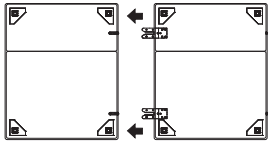
Model	*Price*
Two-Piece Ganging Device	
K60GB	$33

How to Specify

❶ Model



Two ganging brackets are required to join two units together; specify two K60GB models to gang two units together. Pre-drilled holes in the base accept the ganging bracket or its small mating piece. Once brackets are installed, units slide together for a secure connection. To disconnect, lift up and pull outward on the unit with the mating pieces.

➤Assembly instructions and video available at: www.kimballoffice.com

Notes

Vista seating models are dimensionally consistent and meet or exceed the applicable BIFMA/ANSI standards.

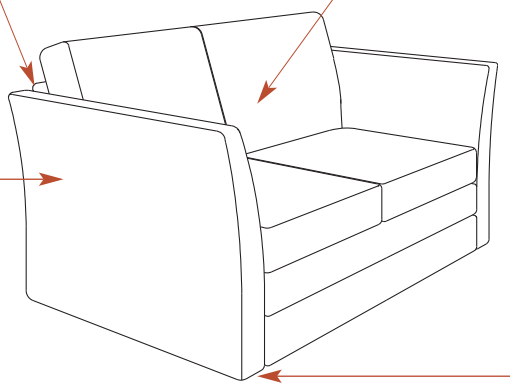
Lounge Seating

Overview

Statement of Line ➤See page 225
Finishes & Materials 295
COM/COL Yardage Req. 325

Frame is constructed of ⅞" plywood.

Cushions are high-resiliency, CFC-free polyurethane foam.

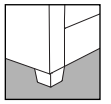


All models are fully upholstered. Bottom is finished with a black fabric dust cover.

Non-skid glides are 1¾" in diameter and adjustable.

Details

Vista is available in three-, two-, and one-seat models and with or without piping.



Models with legs are available on all sizes. Wood finishes are standard.

Seats have a high resiliency sheet webbing suspension that is stapled to the frame. Frame construction meets or exceeds GSA Heavy Duty Testing requirements.

Seat cushions are removable and feature 7" of dual-density, custom-shaped foam. Each cushion is 22"W, slipcovered, and closed with zippers.

Back features a non-stretch woven suspension that is stapled to the frame.

Back cushions are attached and feature 5½" of dual-density, custom-shaped foam.

Armrest frames are wrapped with ½" high-density foam, slipcovered, and attached to units with three 7/16" carriage bolts per arm.

Legs, on applicable models, are kiln-dried select hardwoods and are attached using three wood screws. Each leg contains a non-skid adjustable glide.

Contrasting upholstery is available on models without piping. Back and seat upholstery applies to the cushions; arms and frame upholstery applies to remainder of the lounge model.

Contrasting piping may be specified on applicable models in Kimball Office fabric or leather.

Related Products

Accent pillows are available.

Seating

Overview

High-Performance Task, Sit-to-Stand, and Stools

Statement of Line	➤See page 231
Adjustability Features	236
Typical Configurations	237
Finishes & Materials	295

High-performance task chairs, sit-to-stand seating, and stools are options-rich, making them customizable for any setting, user, or task; select from three performance mesh/upholstery combinations:

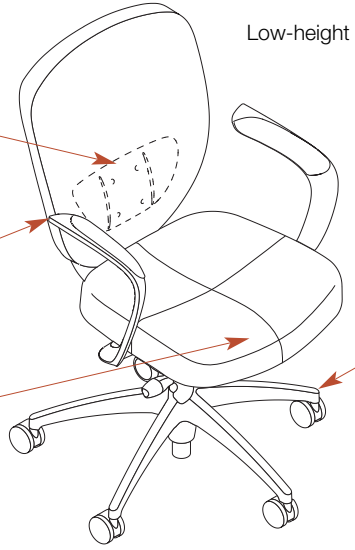
- Mesh-back with mesh-upholstered seat
- Mesh-back and upholstered seat
- Upholstered seat and back

Standard-height task

Arm caps are soft, black, self-skinning polyurethane foam, insert-molded over a steel core.

Arm supports on all height-adjustable arms are glass-filled nylon insert-molded over a steel core for superior support.

Low-height task



Lumbar support pad, standard on upholstered-back models, is made of polypropylene and moves 2½" for optimal comfort and support. Neoprene covers the foam in the lumbar area and facilitates movement of the lumbar pad.

Conference arms are available with or without armcaps.

Contoured seat cushions provide a waterfall front edge to enhance short- and long-term comfort.

Optional lumbar support on mesh-back models is made of high-performance polyurethane elastomer. Position of the lumbar support is adjusted by sliding it up and down on a track within a range of 2¾".

Seat cushion is 2⅛" thick and consists of 1¾" of CFC- and CHC-free molded foam over a seven-layer molded plywood shell. Select performance mesh-covered (shown) or upholstered seat cushions.

5-prong base plastic base is standard on standard-height task chairs and stools. Plastic base is constructed of rigid, glass-filled nylon, features a black textured surface for scuff resistance; aluminum base in platinum metallic or polished finish is available (upcharge applies).

65mm hard dual-wheeled casters (C40) are standard-height task chairs and stools; soft dual-wheeled casters (C41) for use on hard floors are available (upcharge applies).

5-prong base aluminum base is standard on low-height task and sit-to-stand models.

55mm hard dual-wheeled casters (C3) are standard on low-height task chairs and sit-to-stand seating; soft dual-wheeled casters (C4) for use on hard floors are available (upcharge applies).

Details

Six arm styles are available on Wish. ➤See page 236 for details.

Wishbone back is standard in plastic (injection-molded, glass-filled nylon) on all models; polished die-cast aluminum is also available as standard on mesh-back models.

Inner back panel on upholstered-back model is injection molded polypropylene, designed with a reinforcing pattern to ensure rigidity.

Inner seat panel is molded 9/16"-thick, 7-ply, single-shell construction with a waterfall front edge.

All Wish high-performance task, sit-to-stand, and stools meet 300 lb. weight and three-shift work requirements.

Metal footring is standard on sit-to-stand and stool models; 462 cinder.

Wish task chairs are warranted for three-shift, 24/7 service.

Arm Styles and Adjustability Features

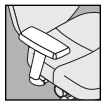
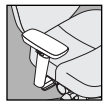
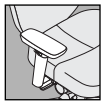
Armless



Height-Adjustable



Height- & Width Adj. 2D



Height- & Width Adj. 4D

Conference

Conference with Arm Pad

Six arm styles are available on Wish seating.

Height-adjustable arms adjust up and down via a push button to one of 9 positions.

Height- and width-adjustable arms adjust up and down via a push button to one of 11 positions and side to side via lever adjustment bracket.

4-D adjustable arm caps on height- and width-adjustable arms adjust in 6 directions: left and right (width), forward and backward (depth), and in and out (pivot).

Width adjustment	
– Number of positions	5
– Range	1"
Depth adjustment	
– Number of positions	5
– Range	1¾"
Pivot adjustment	
– Number of positions	5
– Pivot (each direction)	26°

Adjustability Features

	Standard Height	*Low Height*	*Sit-to-Stand*	*Stools*
Synchro-tilt control	•	•	•	•
Swivel	•	•	•	•
Pneumatic height	•	•	•	•

– Mesh back	○	○	○	○
– Upholstered back	•	•	•	•
Back tilt lock	•	•	•	•
Seat slider	○	○		

• = standard ○ = option

Synchro-tilt mechanism provides fully synchronized seat-to-back movement with a 2:1 ratio. For every 2 degrees the back moves, the seat angle changes 1 degree. Other features:

- Free-float movement allows user to lock the chair in multiple positions within the range of movement using a single lever.
- Anti-kickback clutch controls forward movement of backrest when the lock is disengaged.
- Reclining tension adjustment is user friendly and accommodates a wide range of weights via a single lever on the left side of the chair (as seated)
- Control is standard in cinder paint, but may be specified with a polished shroud to go with polished aluminum wishbone (upcharge applies)

Pneumatic height adjustment allows user to raise or lower the seat while seated. Upward movement of control lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

Lumbar support position is adjusted by sliding it up and down on a track within a range of 2¾".

Arm height*	9"
Seat height	22"–29¾"
Seat width	18¾"
Seat depth	17"

Stools without Arms

➤See page 282 to specify.

Height	44½"–52¼"
Width	27½"
Depth	26½"
Arm height*	—
Seat height	22"–29¾"
Seat width	18¾"
Seat depth	17"

➤See page 277 for additional actual dimensions, including kneespace, arm support width, arm cap distance, seat slider and low-seat options.

** Arm height measurements for high performance task seating are made from upper seat surface to upper arm surface with a BIFMA sanctioned CMD.*

Task Chairs and Stools

Overview

Statement of Line ➤See page 275
Finishes & Materials 295
COM/COL Yardage Req. 322

Lumbar support pad, made of polypropylene, moves 2½" for optimal comfort and support. Neoprene covers the foam in the lumbar area and facilitates movement of the lumbar pad.

Height-adjustable arms adjust with a push button to one of 5 positions within a range of 2¼" and can be specified with fixed arm caps.

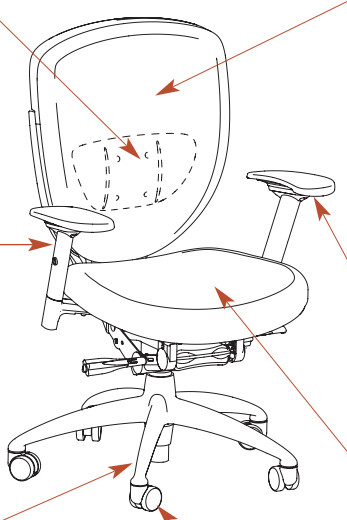
Arm supports are glass filed nylon, insert molded over a steel core for superior support.

5-prong base is constructed of rigid, glass-filled nylon. Black surface is textured for scuff resistance.

5-prong, 27" black aluminum base on Task 300 chairs was tested using 450 lbs. of force.

Seat slider option is available on task chairs to adjust the seat depth for comfort. Seat depth is adjusted via a single lever and locks in one of 6 positions within a 2" range. Upcharge applies. Seat slider is not available on stools.

Low seat-height option, compatible with the BIFMA recommended minimum of 15", is available. The seat height adjustment range is 3". Upcharge applies. Not available on Task 300.



Contoured CFC-free polyurethane foam provides comfort consistency and proper ergonomic support.

Back cushions have 1¾" CFC-free polyurethane foam to enhance comfort and reduce fatigue. Edges of foam used on seat and back are wrapped with ⅜" of higher density foam for cleaner edges and contours.

Arm caps are soft, black, self-skinning polyurethane foam, insert molded over a steel core for strength.

Seat cushions have 2" base foam, plus a ½" soft topper pad to enhance comfort and reduce fatigue. Base foam includes ½" filler centered on the bottom of the cushion for added support. Seat cushions feature a waterfall front edge.

Hard dual-wheel casters (C1) are standard.

Soft dual-wheel casters are available for use on hard floors. Casters are black. Upcharge applies. Not available on Task 300.

Foot ring on stools is height adjustable with a total range of 3½". Foot ring is black tubular steel.

Details

Fixed Conference

Task chairs are available with adjustable-height arms with fixed arms caps, conference arms, or without arms.

Stools are available with adjustable height arms and fixed arm caps or without arms.

Wishbone back frame is injection molded, glass-filled nylon. Frame is attached with 2 high-tensile M10-1.5 x 35mm Allen-head bolts with grade 8 heavy steel flat washers.

Inner back panel is injection molded polypropylene, designed with a reinforcing pattern to ensure rigidity.

Inner seat panel is molded 9⁄16"-thick, 9-ply (1⁄16" poplar per ply), single-shell construction with a waterfall front edge.

Seamed slipcover-style upholstery on the back and seat accommodates a wide variety of fabrics and leather.

Task 300 chairs are rated to seat individuals weighing up to 300 lbs.

Adjustability Features

Synchro-tilt	•
Swivel	•
Pneumatic height	•
Side tension	•
Lumbar	•
Seat slider	○
Back tilt lock	•
Arm height	○

• = standard ○ = option

Synchro-tilt mechanism provides fully synchronized seat-to-back movement with a 2:1 ratio. For every 2 degrees the back moves, the seat angle changes 1 degree. Other features:

- Free-float movement allows user to lock the chair in multiple positions within the range of movement using a single lever.
- Anti-kickback clutch controls forward movement of backrest when the lock is disengaged.
- Reclining tension adjustment is user friendly and accommodates a wide range of weights via a single lever on the left side of the chair (as seated).

Pneumatic height adjustment allows user to raise or lower the seat while seated. Upward movement of control lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

Desk Chairs and Stools

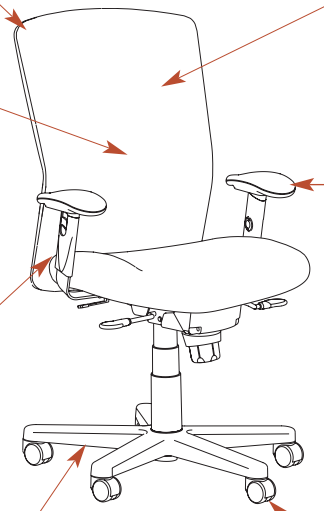
Overview

Statement of Line ➤See page 285
Finishes & Materials 295
COM/COL Yardage Req. 326

Outer back is fully upholstered.

Adjustable-height back, standard on all models, allows proper positioning of lumbar, helping prevent lower back fatigue and ensure comfort. Back adjusts through 6 positions over a 3¼" range.

Arms have a structural metal upright encased in an injection molded, glass-filled nylon shroud. Arms are secured to the chair with metal brackets and ¼" fasteners.



Black, glass-filled base, is available on high and mid-back chairs, is textured for scuff resistance.

Base on stool has a metal understructure and a two-piece polypropylene overlay and lower shroud.

Two densities of CFC-free urethane foam provide seat and back with consistent comfort and appropriate contours for superior ergonomic support.

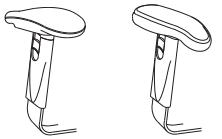
Adjustable arms adjust in width via a lever to one of 4 positions within a 3" range. Push button allows arm height to be adjusted and locked into one of 7 positions within a 2½" range.

Fully adjustable arms combine the standard height and width adjustments with the added benefit of a pivot adjustment. Pivot adjustment allows arm caps to rotate inward or outward to one of 3 different positions over a 30° range.

Black, dual-wheel casters for use on carpeted floors are standard.

Soft, black, dual-wheel casters are available as an option and should be specified for use on hard floors. Upcharge applies.

Details



Standard TB133 compliant

Arms caps on TB133 models have a different profile than those on standard models.

Outer shell is injection-molded polypropylene.

Inner shell is blow-molded polypropylene, designed with a deep ribbing pattern to ensure rigidity.

Seat cushions have 2¼" base foam, plus a ¼" soft topper pad to enhance comfort and reduce fatigue.

Back cushions have 2¾" contoured base foam to enhance comfort and reduce fatigue.

Seamed slipcover-style upholstery on both the back and seat accommodates a wide variety of fabrics and leather.

Seat slider models allow the user to set the depth of the seat to match their physical requirements. Seat depth is adjusted via a single lever and locks in one of 7 positions within a 1¾" range.

Adjustability Features

Synchro-tilt	•
Swivel	•
Pneumatic height	•

• = standard ○ = option

Synchro-tilt mechanism provides fully synchronized seat-to-back movement with a 2:1 ratio. For every 2 degrees the back moves, the seat angle changes 1 degree. Other features:

- Free-float movement allows user to lock the chair in multiple positions within the range of movement using a single lever.
- Anti-kickback clutch controls forward movement of backrest when the lock is disengaged.
- Reclining tension adjustment is user friendly and accommodates a wide range of weights via a single lever on the left side of the chair (as seated).

Seat height is adjusted pneumatically. Range varies with model and choice of options from 15¼"–20½" to 17½"–22¼".
➤See page 287.

Telescoping pneumatic cylinder (P3) is available on desk chairs for lower seat-height requirements. Upcharge applies.

Foot ring on stools is height adjustable in 1" increments with a total range of 4". Foot ring is tubular and wire steel.

Notes

Samples:

Samples of Kimball Office materials are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur between samples and finished products. Kimball Office carefully selects all materials used in every product, ensuring a commercially acceptable color and finish.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

Program Overview

Wood Finishes	➤See page 297
Kimball Office Upholstery	303
Alliance Program Uphol.	311
COM & COL	314

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The fabric collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Key:
- • = Available
- † = Exceptions apply (see below)

Bingo is available in Amber, Ebony, Honey, and White. Bingo model numbers incorporate the finish designators.

Bloom seating, Event, Itsa, Wish, and Xtreme are non-wood series.

CX Coco and SX Sienna price group 1 finishes on wood seating coordinate, but are not a direct match, with the price group 2 Sapele finishes with the same name that are available on Delano and tables.

† Adagiato and Beo are constructed of beech wood. Brighton and Monterey wood finishes on Beech is complimentary to Brighton on maple and Monterey on oak, but are not a direct match.

Price Group Designators:

STD = Group 1 (list price)
STD2 = Group 2 (20% upcharge)

Wood Finishes

Special Wood Finishes

Key:
• = standard wood species
○ = standard wood species on most models in series.

Kimball Office offers the following options for special wood finishes:
- Standard finish color on alternate wood species
- Previously developed special finish
- Custom finish

Standard finish colors available on an alternate wood species include:
- Amber on Maple
- Amber on Walnut
- Mocha on Walnut

These finishes can be specified without going through the finish approval process described at right.

Previously developed special finishes can be selected from an extensive library developed by Kimball Office. Samples of previously developed special finishes are available from Customer Service upon request.

Custom finishes can be developed to meet specific needs, if an acceptable match is not available in our library.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a finish color.

Upcharges:

A one-time fee of **$300** (net) will be billed for the development of each new custom finish. This fee covers all Kimball Office product lines on which the finish may be used.

A **10%** upcharge per line item (model number) will be applied for a standard finish on an alternative wood species, a previously developed special finish, or a custom finish. This upcharge is calculated on the base price, before other option upcharges are added.

For upholstered products, the upcharge is calculated on the Grade 1 upholstery price then added to the price for the selected fabric grade, to arrive at the list price.

Custom Finish Approval Process:

① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the $300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.

② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. If not, a custom finish will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.

③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

Note: The one-time fee of $300 will not be charged unless a custom match finish is required.

Applicability:

Applicability of special finish colors depends on the wood species to which they are applied. The matrix below shows the types of woods used for each series.

	Beech	*Cherry*	*Maple*	*Walnut*	*Sapele*
Price Group	*1*	*1*	*1*	*1*	*2*

Note: Delano and Bingo are not available in special finishes. Special finishes are not available on Zebrawood, Canyon Oak, Monterey Oak, or Tuscan Walnut.

How to Specify

① **Model:**
Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② **Finish type:**
For the "Finish type" step, insert a special code (in place of STD):
ZCHY1 = Special cherry finish
ZMAP1 = Special maple finish
ZWAL1 = Special walnut finish
ZSAP1 = Special sapele finish
Note: Choose the special finish code based on the standard wood species used in the case-goods line (see matrix at left).

③ **Finish designator:**
For the "Finish designator" step, insert the designator below or the one provided to you by Customer Service:
MA00174KOG = Amber on Maple
WA02905KOG = Amber on Walnut
WA02905KOG = Mocha on Walnut

Wood Finishes

Characteristics Care and Maintenance Tips

Wood Finishes	➤See page 297
Kimball Office Upholstery	303
Alliance Program Uphol.	311
COM & COL	314

Kimball Office's experience in wood finishing extends from past generations of craftsmen to present day state-of-the-art technology.

Our Pura® finish is a proprietary, water-based, ultraviolet (UV) wood finish that has virtually no volatile organic compounds (VOCs). It uses less energy than our conventional finishing process and meets or exceeds BIFMA Furniture Emission Standards (FES) and U.S. Green Building Council LEED requirements for indoor air quality. Pura is exceptionally clear and durable and allows the beauty of our wood to shine through. The durability, depth, clarity, and beauty of Pura meets the high expectations customers have of Kimball Office finishes.

Finish fill and sheen level for the top surfaces is appropriate for the design and wood species. If different specifications are required, contact Customer Service.
➤See the individual chapters for fill and sheen information by line.

All wood products are very susceptible to darkening from age and exposure to UV rays (sunlight and other sources), especially cherry and maple. Although a special UV inhibitor is added to finishes, care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change of the wood.

Fine scratches from everyday use may be more visible on furniture with dark finishes. Darker finishes absorb more light, while fine scratches reflect the light. Therefore, scratches can be more emphasized due to this contrast. The use of a desk pad is recommended to keep scratching to a minimum.

The beauty of wood is that, as a natural product, it will have differences in grain characteristics, color, and other features among wood species. The characteristics of our top grade veneers are appreciated and welcomed; it's the differences in characteristics that offer each office a unique look.

Maple veneers are slip matched. Brighton Maple is a clear finish for those who appreciate the inherent beauty of wood. Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

Walnut veneers are flat cut and applied book and center matched, except for Tuscan Walnut which is quarter cut.

Cherry veneers are slip matched. Grain characteristics of cherry veneer such as gum streaks and gum pockets occur naturally and add to the authentic look and feel of natural veneer. These are inherent to this veneer and should not be considered defects.

Oak veneer is quarter cut.

Specification of particular cuts, characteristics, or wood species can be accommodated. For example, a customer may ask for a limited amount of cathedrals or very limited variation in color from one veneer flitch to the next. Kimball Office systems products are able to satisfy those expectations, as long as we are notified prior to order placement. Depending on the request, the higher grade veneer may require an upcharge. Orders would also need to be handled through our custom quote process.

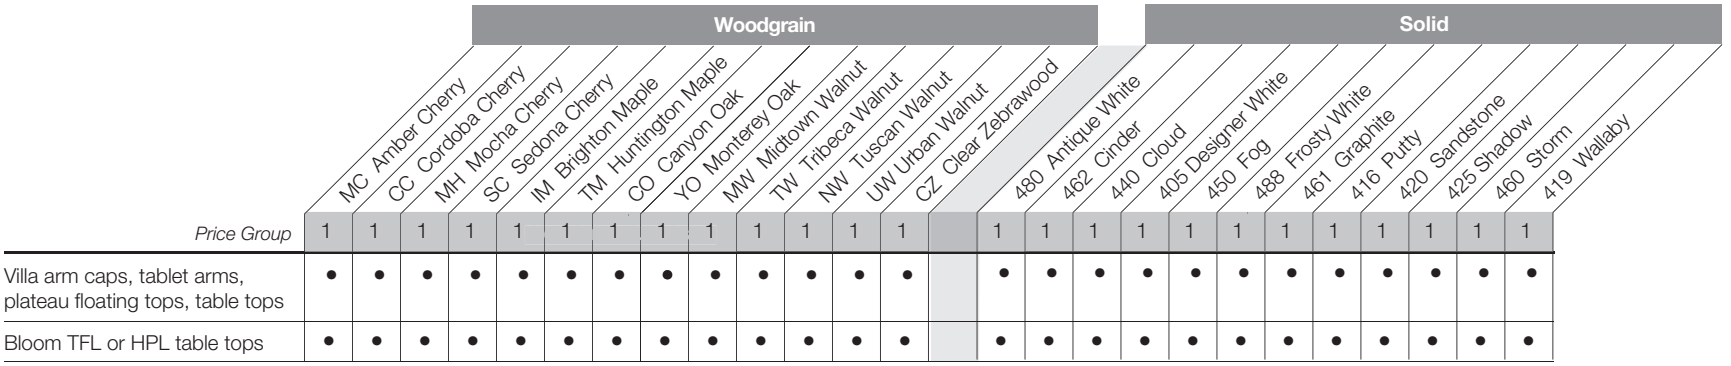
The wood species on seating may vary from the wood species on the casegood or system. Different wood species offer unique texture and grain which provide more variation in finish color; however seating finishes are compatible with casegoods and systems finishes.

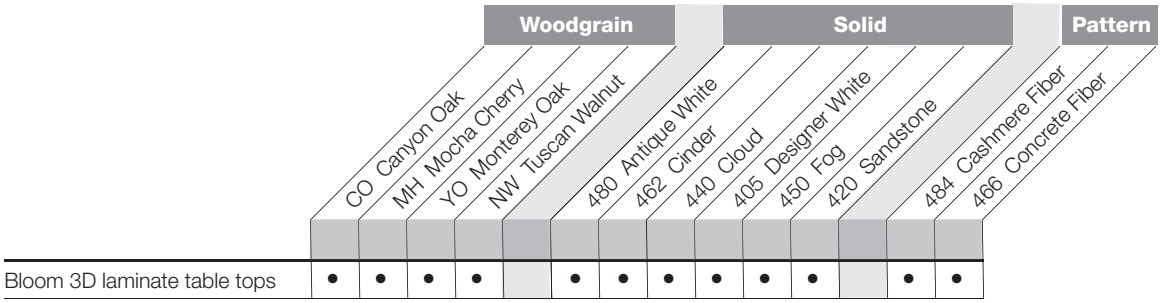
To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth following direction of the grain.
- Dry with a separate cloth if needed.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.

Laminate

Key:
- • = Available





Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminate surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

Price Group Designator:

STD = Group 1 (list price)

Note: Price group designator is not required for 3D laminate or TFL on Bloom.

Key:

- • = Available
- ○ = Available (but not on all models)
- ✦ = Available; TB133 available
- ✧ = TB133 available (but not on all models)

Characteristics:

- Certain fabrics may relax over time (e.g., some woven fabrics) creating a loosely upholstered appearance.
- Some fabrics may wrinkle, pill, fuzz, or puddle as a normal, inherent characteristic. This does not indicate that the covering or application is deficient.
- Fabrics are cut to provide the best match possible when transitioning from piece to piece.
- Fabrics reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all fabrics and is not considered a defect; it is more easily recognized on fabrics with a nap or shimmer and more apparent on crescent or corner units.
- Kimball Office will always ship a satisfactory commercial match. Because of industry dye-lot variation, colors may not match exactly.
- Fabrics are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).

TB117–2013
California Flammability Regulation #117–2013 is a set of minimum allowable standards of flammability to which all upholstered furniture sold in the State of California must comply. It relates primarily to fabric coverings and resilient fillings. All shipments of Kimball Office upholstery comply with Regulation #117–2013 and our invoices and law labels for such goods bear certification that our upholstered products comply.

UFAC
All Kimball Office seating is made in accordance with the Upholstered Furniture Action Council (UFAC) criteria to reduce chance of ignition by burning cigarettes.

TB133 Factor
TB133 factor is a full-scale fire test for furniture manufactured for public use in which an entire piece of furniture is tested as a unit. Kimball Office offers a wide variety of seating products that can be manufactured to meet TB133.

Advisory
Purchaser must consult local fire and code official to determine the suitability of product being selected for any particular application.

Certain jurisdictions may require the use of additional fire retardants or composite flammability testing. Kimball Office assumes no responsibility for composite testing or for compliance with any particular code or other flammability standards different than as contained in applicable catalog information unless such requirements are specified in writing by purchaser to Kimball Office prior to confirmation of order. Cost of additional flammability treatments or testing needs of purchaser shall be borne by purchaser.

Cleaning Codes:

Cleaning Code B
- Cleanable with diluted bleach solution

Cleaning Code D
- Dry clean only.

Cleaning Code L
- Use a clean cloth with warm water and mild soap as soon as possible.

Cleaning Code S
- Use only mild, pure water-free cleaning solvents.
- Cleaning by a professional furniture service is recommended.

Cleaning Code W
- Use water-based cleaning agents or foam.

Cleaning Code WS
- Use water-based cleaning agents or foam. Mild water-free solvents may also be used.
- Cleaning by a professional furniture service is recommended.

Fire Retardant Fabrics
- Solvent-based fabric cleaning or dry cleaning are recommended.
- Cleaning with water or water-based cleaners could result in salt ringing.
- Test proposed cleaning procedure on a small portion of fabric before cleaning entire piece.

Cleaning Leather:

Regular Cleaning

- Remove as much soil or staining as possible by carefully vacuuming or brushing.
- Dust with a dry or damp cloth.

Deep Cleaning

- Use mild non-detergent soap or cleaner. Wipe surface with a light circular motion. Repeat with clean water.
- Do not soak leather.
- Air dry.

Note: Never use furniture polishes, oils, solvents, varnishes, abrasive cleaners, ammonia, wax, or saddle soaps on leather.

Characteristics:

- Leather is a natural product. Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristic of leather.

Contrasting Upholstery and Piping Options

Overview ➤See page 296
Fabric Application Matrix 303
Faux Leather & Leather 304

Contrasting Upholstery:

Contrasting upholstery is defined by entire back and seat upholstery application. Contrasting upholstery is available on the following seating series:

- Adagiato (half- and full-height back cushion models)
- Beo
- Bloom
- Boyd (all models)
- Delano (lounge and tandem models)
- Enjoy (all models)
- Event (all models)
- Pose (lounge models)
- Villa (lounge, corner, and wedge models)
- Wish (upholstered-back models)
- Wish Classic (all models)
- Xtreme (all models)

Select any contrasting Kimball Office, Alliance Program, COM, or COL upholstery.

IMPORTANT: When specifying contrasting fabric, use an electronic specification tools for pricing. If one is not available, you may contact Customer Service.

Special Applications:

- Arpeggio pillow back models—Back upholstery applies to pillow back only. Remainder of the chair (seat, arms, outer shell) is contrasting.
- Delano back upholstery applies to back; bolster applies to pillow; seat and arms applies to remainder of chair. The bolster and seat/arms can both be contrasting.
- Vista (models without piping)—Back and seat upholstery applies to cushions. Remainder of the chair (arms and frame) is contrasting.
- Pose contrasting back upholstery applies to the cushion back only. Remainder of the chair (seat, arms, and outer shell) is contrasting.

Contrasting Button:

Contrasting button is available on the following seating series at no upcharge:

- Beo (button back model)

Kimball Office fabric or leather MUST be specified if you desire a contrasting upholstery on the button; Alliance program upholstery is not available for contrasting button.

Contrasting Piping:

Contrasting piping is available on the following Kimball Office seating at no upcharge:

- Arpeggio (all models)
- Pose (lounge models)
- Vista (models with piping)

Kimball Office fabric or leather MUST be specified; Alliance program upholstery is not available for contrasting piping.

How to Specify

① Follow the “How to Specify” steps on the appropriate pricing pages for the seating model, indicating the contrasting fabric, button, or piping information in the order outlined.

Alliance Program Fabrics

Program Overview

Overview	➤See page 296
Applicability Guidelines	312
TB133 Information	327
TB133 Inquiry Form	328

Kimball Office has formed partnerships with the top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

Patterns from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics are available in a variety of design aesthetics and price points to meet all of your fabric needs. Carded fabrics are listed in this price list. ➤See Surface Materials at www.kimballoffice.com for a wide variety of additional graded-in fabrics from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Application of Alliance Program fabrics will be as depicted on the website or memo sample unless otherwise instructed on the order.

Directional fabrics, such as stripes, patterns, and plaids, may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return.

Fabric that requires non-stock special treatments such as flame proofing, anti-microbial treatment, electrical conductive backing, water repellent, stain repellent, or acrylic backing are not part of this program. Such orders should be specified as a COM.

Alliance graded pricing includes the cost of the material. Repeat is also accounted for and no additional upcharge is required.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

IMPORTANT: The information provided in this section of the price list is the most current information available at the time this price list was published. Contact Customer Service before finalizing any orders to check availability.

Lead Time:

Lead times for alliance fabrics are based on supplier availability. Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply. Contact Customer Service for availability before finalizing orders.

TB133:

Contact Customer Service about TB133 requirements.
Note: Many of these fabrics may pass additional flammability tests. Please inquire about compliance with specific regulations.

Samples:

For memo samples, contact our alliance partners directly.

How to Specify

① Follow the “How to Specify” steps listed on the alliance upholstery pricing page within each section.
② For the “upholstery grade” step, add the appropriate three-letter supplier prefix to the fabric grade:
ARC[grade] = Arc Com
CAR[grade] = Carnegie
CFS[grade] = CF Stinson
KNL[grade] = KnollTextiles
MHM[grade] = Maharam
MAF[grade] = Mayer Fabrics
MOM[grade] = Momentum
ULT[grade] = Ultrafabrics
③ For the “upholstery designator” use the designator for the pattern/color:

Example:

①	②	③	④	⑤

Kimball® Office

Alliance Program Fabric

Applicability by Seating Line

Kimball Office has listed general applicability guidelines for each seating frame due to application constraints or aesthetic concerns in the matrix at right.

Appearance guidelines indicate characteristics that may be apparent when certain types of fabrics are applied; these are not restrictions, but are intended to educate customers on the potential appearance of their product. Guidelines 1 through 4 are explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

Restrictions indicate types of fabrics that cannot be used on the indicated seating line. Fabrics associated with guidelines 5 and 6 prevent us from upholstering them on the applicable chair series.
Note: Specific seating and fabric combinations that are not possible are noted for applicable graded-in Alliance fabrics on the following pages.

IMPORTANT: These guidelines do not constitute any responsibility nor any warranty on the part of Kimball Office as to appearance, behavior, or durability of a material.

	Appearance Guidelines				Restrictions

Wish and Wish Classic	•	•	•	•		•
Xtreme	•		•	•	•	

Key:
- • = Guideline or restriction applies to seating line.

Appearance Guidelines:

1 Thick or stiff textiles may result in gathers and puckers around corners, contours and certain seams.
2 Matched directional textiles, such as stripes, plaids, and patterns, may not align properly (e.g., decorative stitching, tufting, buttons, seams, seat-to-back match, etc.)
3 Textiles with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
4 Mohair, velvet, and chenille may be easily bruised or have the potential for crooked seams due to the heavy nap and flip.

Restrictions:

5 Textiles that are not approved for glue application cannot be used. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing, or glue bleeding through the fabric.
6 Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.

Customer's Own Material and Leather

Process Overview

GSA Non-Contract

Applicability	➤See page 315
Additional Information	316
Yardage Requirements	317
TB133 on COM/COL	327

Kimball Office will upholster its products in fabric or leather supplied by the customer whenever possible.

IMPORTANT: Before placing an order utilizing COM or COL, please read all the information in this section. Orders for COM or COL are not subject to return.

Step ①

Review applicability guidelines and restrictions for the seating frame.
➤See page 315.

Step ②

Send a sample to Kimball Office for approval. Sample should be no smaller than 5" x 7" for fabric or 4" x 4" for leather. Include a list of model numbers on which you wish to use the COM. Reference "application approval" and send to:

Kimball Office
Attn: COM Administration
1600 Royal Street
Jasper, IN 47549

Kimball Office will advise of approval or disapproval. Approval signifies only that such fabric or leather can be applied to the products for which intended. Such approval does not constitute any responsibility nor any warranty on the part of Kimball Office as to appearance, behavior, or durability of the fabric or leather.

Step ③

Verify yardage requirements.
➤See page 317.

Step ④

Prepare and send your purchase order. Purchase order must include:

- Fabric vendor
- Pattern number and name
- Color number and name
- Application instructions (i.e., direction of pattern) for striped, plaid, patterned, or unusual fabrics and which face to use if fabric is reversible.
  Note: If you do not supply application instructions, Kimball Office will apply the fabric in what it determines to be the best manner, and cannot be held responsible after the upholstery is applied.

Kimball Office will send an acknowledgement of your order with a tentative order ship date and the date by which your COM or COL must be received. If your material is not received by the specified date, your ship date will be reassigned.

Step ⑤

After you receive order acknowledgement from Kimball Office, ship your material to:

Kimball Office
Attn: COM Department
340 East 11th Avenue
Jasper, IN 47549-1001

Please include:

- Dealer name and p.o. number
- Kimball Office seating model number
- Quantity of chairs
- Kimball Office acknowledgement number

Kimball® Office

Customer's Own Material and Leather

Applicability by Seating Line

GSA Non-Contract

Kimball Office has listed general applicability guidelines for each seating frame due to application constraints or aesthetic concerns in the matrix at right.

Appearance guidelines indicate characteristics that may be apparent when certain types of fabrics are applied; these are not restrictions, but are intended to educate customers on the potential appearance of their product. Guidelines 1 through 4 are explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

Restrictions indicate types of fabrics that cannot be used on the indicated seating line. Fabrics associated with guidelines 5 and 6 prevent us from upholstering them on the applicable chair series.

IMPORTANT: These guidelines do not constitute any responsibility nor any warranty on the part of Kimball Office as to appearance, behavior, or durability of a material.

Customer's Own Material and Leather

Additional Information

GSA Non-Contract

Overview	➤See page 314
Applicability	315
Yardage Requirements	317
TB133 on COM/COL	327

Fabric Characteristics:

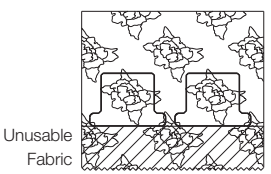
Kimball Office inspects fabrics for mill imperfections, but some are difficult to recognize. Kimball Office is solely responsible for seating workmanship and cannot assume responsibility or liability for the durability, tailoring appearance or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

Directional upholstery, such as stripes, patterns, and plaids may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return. If in doubt about an upholstery application, please contact Customer Service prior to placing the order.

Decorative Fabric Patterns:

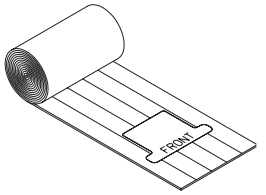
Yardage requirements are greatly affected by not only the size of repeats, but also by the print or pattern. Kimball Office cuts all seating patterns with aesthetic concerns in mind for high quality and consistency.
➤Refer to appropriate column in the COM yardage table on page 317.



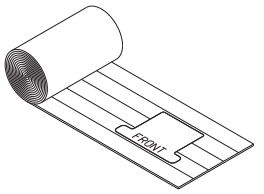
The illustration above depicts two seat cushions in the proper placement on a piece of decorative fabric. Please note the unusable fabric. It is not always appropriate to place a seat pattern at the edge of the fabric. Due to this circumstance, please include an additional one-half yard per order.
Note: If repeats are not to be matched, please contact Customer Service.

Directional Fabrics:

Some COM fabrics are considered directional that may not be considered directional by the fabric supplier due to the upholstering process used by Kimball Office.



"Up the Roll"



"Railroaded"

Application of COM fabrics—"up the roll" or "railroaded"—will be as depicted on the swatch card or website. If a different application is desired, the pattern must be custom quoted.
➤Please contact ***By Design***.

Customer's Own Leather:

Customer's own leather yardage (size) requirements for Kimball Office seating are based on an average hide size of 45–50 sq. feet. Consult Customer Service for requirements for other hide sizes.

The shape of a hide and the usable, clean square footage may make it necessary for us to request more leather after COL is received.

Calf hides must be at least 30 square feet of clean, usable, matching hides. When specifying calf hides, add 15% to COL requirements.
➤See page 317 for COL requirements.

Leather is a natural product and variation in texture is a pleasing quality belonging exclusively to high grade, full top grain leathers.

Flammability Compliance:

Kimball Office assumes no responsibility for the flame retardancy of any COM/COL. Customers are solely responsible for making sure that COM/COL complies with all applicable codes and regulations.

When COM/COL products must meet specific requirements, Kimball Office will require the customer to supply documentation that the material meets the code requirements.

Kimball strives to create upholstered products with no added fire retardant chemicals. Written confirmation is required from the fabric or leather manufacturer stating that the COM/COL provided does not contain any fire retardant chemicals. Without adequate confirmation from the manufacturer, Kimball Office will continue to apply these approved materials, but will consider the COM/COL as containing fire retardant chemicals, and will label as such.

COM/COL Storage:

Kimball Office will store excess COM/COL for 6 weeks after completion of order. Unallocated COM fabric will be stored for three months.

Kimball Office must be advised if COM is to be retained longer than three months for a future order or if it is to be returned.

Customer's Own Material and Leather

Yardage Requirements

GSA Non-Contract

Overview	➤See page 314
Applicability	315
Additional Information	316
TB133 on COM/COL	327

Kimball Office has analyzed each model to most accurately reflect the yardage requirements. The yardage requirement for each model is based on 54"W fabric and cutting the fabric up the roll.

For widths other than 54", increase the yardage requirement by the factors below:

Fabric width	*Increase yardage*
50"–53"	15%
48"–49"	30%
45"–47"	45%

Larger Orders:

When ordering 10 or more chairs in the same COM, yardage requirements may be reduced.
➤Contact Customer Service.

Railroad Application:

If COM fabric is to be "railroaded," contact Customer Service for yardage requirements.

Large Repeats:

For repeats larger than 18", we suggest a swatch with one full repeat be sent for yardage requirement assessment:
Kimball Office
Attn: COM Dept.
340 East 11th Avenue
Jasper, IN 47549-1001
Please note the model number and number of chairs.

How to Use this Table

① Locate the model number
② Select yardage from the appropriate column for non-directional or repeat. For fabrics with nap, use the 1"–4" repeat column.

Customer's Own Material and Leather

Yardage Requirements, continued

TB133 Process

for COM, COL, and Alliance Program Upholstery

COM/COL GSA Non-Contract

Overview	➤See page 296
Alliance Program	311
COM and COL	314
TB133 Inquiry Form	328

Kimball Office provides TB133 testing services for COM (Customers Own Material), COL (Customers Own Leather), and Alliance Program upholstery orders. We require that COM, COL, or Alliance Program upholstery first be evaluated for application approval, then for TB133 approval.

California Technical Bulletin No. 133—Flammability Test Procedure for Seating Furniture for Use in Public Occupancies—provides guidelines for a full-scale, composite burn test. To obtain TB133 certification, a specific model/upholstery combination must be subjected to and pass TB133 testing.

IMPORTANT: The CAL TB133 Seating Fabric Inquiry Form must be submitted prior to order entry for all seating with COM, COL, or Alliance Program upholstery specified to meet TB133.
➤See page 328.

The Process:

① If specifying Alliance Program upholstery for TB133, contact Customer Service to receive a custom quote for your seating order.

② Complete the CAL TB133 Seating Fabric Inquiry Form and submit it to Customer Service.

③ Kimball Office will determine:
- If the fabric is similar in content to a previously approved fabric for the chair model;
- If additional testing is required because no similar test documentation was found for the model/upholstery combination; or
- If the combination will not meet TB133 requirements, based on previous testing.

④ If a burn test is required, pricing for the testing will be as follows:
- $1300 (list, including shipping) for testing services; plus the
- Chair price (test sample)

Note: COM price is invoiced at Kimball Office Upholstery price grade 1, plus the cost of the COM; COL is invoiced at price grade 3 plus the cost of the leather. All Alliance Program upholstery orders must be custom quoted.

⑤ If the model/upholstery combination passes testing, you will receive proof of TB133 certification, at which time you may place your seating order.

NOTE: California Technical Bulletin No. TB133 is a full scale burn test. Kimball Office will provide TB133 testing services for COM (Customer's Own Material), COL (Customer's Own Leather) or Alliance Partner pattern orders. TB133 Certification is based on actual testing. Approval can also be determined by similar, previously tested fabrics on similar chair models by experts familiar with TB133 testing. As there are a wide array of materials and chair models it is inconceivable to test all possible material and model combinations. All COM, COL and Alliance patterns must first be evaluated for application approval, then for TB133 approval.

COM APPROVAL INFORMATION

☐ Fabric is similar in content to a previously approved fabric for this chair model and will not require a full scale burn test. Letter of Assurance is available upon request.

☐ Additional testing will be required because no similar test documentation was found for this content/model. To proceed with TB133 testing, please submit a purchase order and yardage needed for a specific model. Certification Letter is available upon request.

☐ Based on previously tested models, this will not meet TB133 requirements.

Seat height	18³⁄₁₆"–22⁷⁄₁₆"

Note: Chairs are shipped with the column set at a mid-point between the lowest and highest positions.

Desk and Side Chairs

Overview

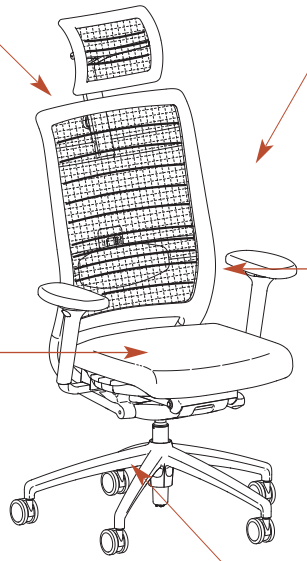
Statement of Line ➤See page 337
Finishes & Materials 349
COM/COL Process 354

Mesh-back models incorporate a ribbed design perfectly proportioned to give ergonomically correct, flexible support in all upright or reclined positions. Available in three colors. The mesh is secured to a structural, black plastic frame made of glass- filled polypropylene.

Seat height adjusts from 16 1/4" to 22 7/16" via a patented twist/threaded column adjustment feature and pneumatic (gas) cylinder.

Adjustable lumbar support for mesh-back desk chairs utilizes a molded polyurethane pad, allowing 2" height and 1" depth adjustments.

Autofit synchro mechanism with automatic weight regulation and fine adjustment is standard. 126° maximum opening angle between seat and back; can be locked in four positions.



T-shaped arm rests are standard with 2D adjustability. User can adjust the arm vertically within a 4" range (11 positions); technician can adjust the arm horizontally within a 1 3/4" range (unlimited positions). Arm caps are black polyurethane.

Seat cushions are 2 1/8" thick—1 3/4" CFC- and CHC-free molded foam, plus 3/8" Dacron top pad.

Fabric or leather upholstery is unglued, ensuring optimal air movement.

Five-star base is available in glass-filled nylon black plastic or cast aluminum in three finish options.

Black, dual-wheel casters on desk chairs are 65mm in diameter and available in hard and soft options. Specify hard casters (802) for chairs that will be used on carpeted floors. Specify soft casters (801) for chairs that will be used on hard floors.

Details

Upholstered-back models features a three-piece assembly—a visible, black plastic/polypropylene back with 3/4" CFC- and CHC-free molded foam covered in specified upholstery. The fabric back assembly is then secured to a structural frame made of glass-filled polypropylene.

Adjustable lumbar support for upholstered-back desk chairs utilizes air-pressure technology. Height is adjustable within a 2 1/2" range.

4-D arm option enables the user to make front-to-back adjustment within a 2" range (7 positions) and 360° pivot (10 positions). Includes the same adjustment features as 2-D arms, as well.

Side chairs feature a 7/8" tubular steel frame. Mesh-back construction is the same as desk chair. Seat cushions are 1 9/16" CFC- and CHC-free molded foam. Stackable up to 4 high.

Desk and side chairs are user rated up to 275 lbs.

Desk Chairs

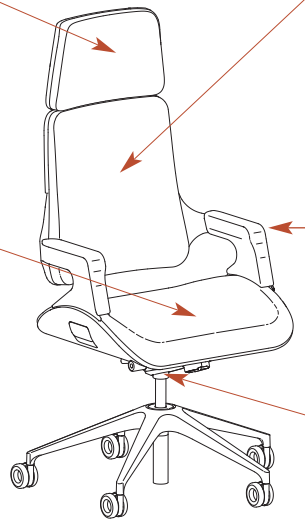
Overview

Statement of Line ➤See page 341
Finishes & Materials 349
COM/COL Process 354

Integrated headrest on high-back model is upholstered to match back and seat.

Seat cushions are 2 3/4" thick, 2 3/8" CFC- and CHC-free molded foam, plus 3/8" Dacron top pad applied over a 1/8"-thick ABS panel.

Fabric or leather upholstery is unglued, ensuring optimal air movement.



Back cushions are 2" thick, 1 5/8" CFC- and CHC-free molded foam, plus 3/8" cotton top pad applied over a 1/8"-thick ABS panel.

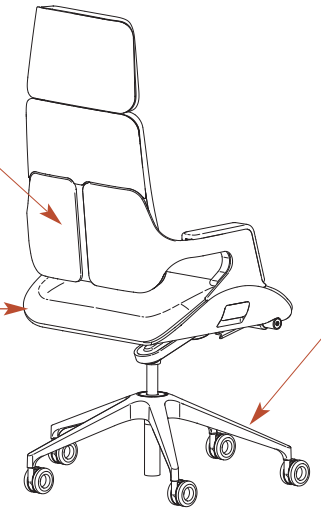
Arm rest cushions are 1 3/16"- thick, CFC- and CHC-free molded foam, applied over a 1/8"-thick ABS panel.

Fold-out crank on the underside of the seat allows the chair's function to be matched specifically to its user's body weight.

Patented synchronous mechanism on desk chairs combines the backward motion of the backrest with balanced inclination of the seat, providing optimum support for the body in any position. 116° maximum opening angle between seat and back, with infinitely lockable positions. Anti-kick back feature controls forward movement of the back rest when the lock is disengaged.

Contoured shell is die cast aluminum and available in white or brushed finish.

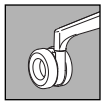
Seat height adjusts from 16 1/2"–20 13/16" via a pneumatic (gas) cylinder.



Five-star cast aluminum base is available in three finishes.

Casters feature a static discharge function and are hermetically sealed to keep bearings free of dirt and dust.

Details



Dual-wheel casters on desk chairs are 65mm in diameter and available in hard and soft options. Hard casters are light grey; soft casters are dark grey. Specify hard casters (804) for chairs that will be used on carpeted floors. Specify soft casters (803) for chairs that will be used on hard floors.

Desk chairs are user rated up to 275 lbs.

Adjustability Features

Synchro-tilt	•
Pneumatic height	•
Swivel	•
Tilt tension	•
Back tilt lock	•

• = standard ○ = option

Synchro-tilt control provides fully synchronized seat-to-back movement, plus:

- Free-float movement allows user to lock the chair in one of multiple positions within the range of movement using a single lever.
- Anti-kickback clutch controls forward movement of backrest when the lock is disengaged.
- Reclining tension adjustment is user friendly and accommodates a wide range of weights via a single lever on the left side of the chair (as seated).

Tilt tension control adjusts the amount of resistance the user feels when leaning back.

- ✦ = Available; TB133 available
- ✧ = TB133 available (but not on all models)

Characteristics:

- Certain fabrics may relax over time (e.g., some woven fabrics) creating a loosely upholstered appearance.
- Some fabrics may wrinkle, pill, fuzz, or puddle as a normal, inherent characteristic. This does not indicate that the covering or application is deficient.
- Fabrics are cut to provide the best match possible when transitioning from piece to piece.
- Fabrics reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all fabrics and is not considered a defect; it is more easily recognized on fabrics with a nap or shimmer and more apparent on crescent or corner units.
- Kimball Office will always ship a satisfactory commercial match. Because of industry dye-lot variation, colors may not match exactly.
- Fabrics are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).

Flame Resistance

Flammability testing determines a fabrics resistance to burning.

Application	Passes
Upholstery	California Bulletin 117–2013
Panels and uphol. walls	ASTM E-84 (unadhered method), Class A or 1

TB117–2013
California Flammability Regulation #117–2013 is a set of minimum allowable standards of flammability to which all upholstered furniture sold in the State of California must comply. It relates primarily to fabric coverings and resilient fillings. All shipments of Kimball Office upholstery comply with Regulation #117–2013 and our invoices and law labels for such goods bear certification that our upholstered products comply.

UFAC
All Kimball Office seating is made in accordance with the Upholstered Furniture Action Council (UFAC) criteria to reduce chance of ignition by burning cigarettes.

TB133 Factor
TB133 factor is a full-scale fire test for furniture manufactured for public use in which an entire piece of furniture is tested as a unit. Kimball Office offers a wide variety of seating products that can be manufactured to meet TB133.

Advisory
Purchaser must consult local fire and code official to determine the suitability of product being selected for any particular application.

Certain jurisdictions may require the use of additional fire retardants or composite flammability testing. Kimball Office assumes no responsibility for composite testing or for compliance with any particular code or other flammability standards different than as contained in applicable catalog information unless such requirements are specified in writing by purchaser to Kimball Office prior to confirmation of order. Cost of additional flammability treatments or testing needs of purchaser shall be borne by purchaser.

Process Overview

GSA Non-Contract

Paints & Non-Paint ➤See page	350
Cleaning Codes	352
Contrasting Upholstery	353
Application Test Form	355

Kimball Office will upholster its products in materials supplied by the customer whenever possible. Before ordering COM/COL, please read all the information in this section.

Application Approval:

Kimball Office requires that a sample (2 yards of fabric or 22 sq. ft. of leather) be submitted along with a purchase order for testing and a COM/COL Application Test Form prior to an order being placed.
➤See page 355 for Test Request Form.

Kimball Office approval signifies only that such materials can be applied to the products for which it was tested. Such approval does not constitute any responsibility nor any warranty on the part of Kimball Office as to appearance, behavior, or durability of the material.

Fabric Characteristics:

Kimball Office inspects fabrics for mill imperfections, but some are difficult to recognize. Kimball Office is solely responsible for seating workmanship and cannot assume responsibility or liability for the durability, tailoring appearance or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

Directional upholstery, such as stripes, patterns, and plaids may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return. If in doubt about an upholstery application, please contact Customer Service prior to placing the order.

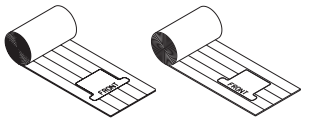
Kimball Office will apply the fabric as indicated on the Application Test Request Form, and cannot be held responsible after the upholstery is applied.

Decorative Patterns:

Yardage requirements are greatly affected by not only the size of repeats, but also by the print or pattern. Kimball Office cuts all seating patterns with aesthetic concerns in mind for high quality and consistency, unless directed otherwise on the Application Test Request Form

Directional Fabrics:

Some COM fabrics are considered directional that may not be considered directional by the fabric supplier due to the upholstering process used by Kimball Office.



Cut "Up the Roll" Railroaded

Application of COM fabrics—"up the roll" or "railroaded"—will be as depicted on the swatch card or website. If a different application is desired, the pattern must be custom quoted.
➤Please contact ***By Design***.

Flammability Compliance:

Kimball Office assumes no responsibility for the flame retardancy of any COM/COL. Customers are solely responsible for making sure that COM/COL complies with all applicable codes and regulations.

When COM/COL products must meet specific requirements, Kimball Office will require the customer to supply documentation that the material meets the code requirements.

Kimball strives to create upholstered products with no added fire retardant chemicals. Written confirmation is required from the fabric or leather manufacturer stating that the COM/COL provided does not contain any fire retardant chemicals. Without adequate confirmation from the manufacturer, Kimball Office will continue to apply these approved materials, but will consider the COM/COL as containing fire retardant chemicals, and will label as such.

Customer's Own Leather:

Kimball Office is pleased to cooperate with COL selections whenever possible.

Leather is a natural product and variation in texture is a pleasing quality belonging exclusively to high grade, full top grain leathers.

Size requirements are based on usable sq, footage. The shape of a hide and the usable, clean footage may make it necessary for us to request more leather after COL is received.

Calf hides must be at least 30 square feet of clean, usable, matching hides. When specifying calf hides, add 15% to COL requirements.

Storage:

Kimball Office will not store excess COM/COL after completion of order.

How to Order

① Request application testing.
➤See form and specific instructions on page 355.
② You will receive notification of approval or disapproval via e-mail.
③ Submit your purchase order.
Note: Order will be acknowledged with a tentative ship date and notification of the date COM/COL must be received. If not received by that date, your ship date will be reassigned.
④ After order acknowledgement is received, ship fabric or leather "DDP" (delivered duty paid) to:
Interstuhl Büromöbel GmbH & Co. KG
Brühlstrasse 21
Wareneingang Textil—Rampe 1
D-72469 Messstetten–Tieringen
Germany
Attn: COM/COL Application Test Department

Include:
- Dealer name
- Purchase order number
- Kimball Office seating model number(s)
- Quantity of chairs
- Kimball Office acknowledgement number

IMPORTANT: Due to specific international shipping requirements, it is recommended that COM/COL be shipped directly from the mill.

How to Apply for Testing

① Complete an Application Test Request Form for each unique COM/COL pattern and color.

② Prepare Purchase Order for application testing, listing test model **INTAPPLTEST** (one for each application test requested). Each chair model and unique fabric combination is considered a separate test and will be billed at $50 net per test.

③ Ship:

- 2 yards of fabric or 22 square feet of leather for each chair model to be tested
- Application Test Request Form(s)
- Purchase Order

to:
Kimball Office
Attn: COM Administration
1600 Royal Street
Jasper, IN 47546

Note: Dealer is responsible for accuracy of information. If the chair model you desire changes after testing/approval, a new test must be completed.

Ordering Procedures:

Purchase orders must be received with complete information, which includes the following:

- Complete/valid model numbers
- All textiles, finish, and material specifications for each line item.
- "Ship to" address and contact
- Special shipping instructions (tagging, requested dates, etc.)
- Billing address
- Net prices

Submit orders electronically via EDI or OrderXchange.

To order literature or check order status on-line, please visit us at **www.kimballoffice.com.**

The customer bears sole responsibility for order correctness. Orders are accepted only by issuance of Kimball Office's formal order confirmation and are subject to the terms and conditions set forth herein, notwithstanding any variance in terms and conditions set forth on buyer's order forms.

The order confirmation is the final agreement between the customer and Kimball Office and supersedes all prior oral, written or electronically transmitted statements regarding the order. Kimball Office will attempt to meet all requested ship or delivery dates. If no specific date is requested, we will assign the best possible ship date available.

Changes and Cancellations:

A confirmed order may not be changed or cancelled, in whole or in part, without prior written consent of Kimball Office. Expenses incurred because of the changes shall be charged to the Purchaser. In the event of cancellations, Purchaser will be
liable for reasonable cancellation charges established by Kimball Office. Changes may affect delivery dates.

No changes or cancellations will be accepted after order entry for non-standard lead time products including:

- Kwik Office offerings
- Engineer-to-Order (modified or non-standard products)
- Alliance program upholstery
- Customer's Own Material (COM)
- Customer's Own Leather (COL)
- Customer Specified Laminate (CSL)
- Customer Specified Paint (CSP)
- Mock Ups
- Service Parts/Replacements

Modified Product:

Our manufacturing flexibility allows us to accommodate requests for non-cataloged product. We are happy to discuss your unique product requirements and determine feasibility and pricing.
➤Contact ***By Design*** for assistance at 800.482.1616 extension 6002.

Finishes and Materials:

Wood Finish Color Matching
Each piece of natural veneer offers unique texture and grain. Minor variations in finish color and value may occur due to the natural characteristics of wood. Kimball Office carefully selects all materials used in every product ensuring a commercially acceptable color and finish. Factors such as aging and exposure to light alter finishes.

Fabric Color Matching
Kimball Office will always ship a satisfactory commercial match on fabric. Because of industry dye-lot variation, colors may not match exactly.

Terms and Pricing:

Net 30 days. If the invoice amount is not paid in full within the terms of the invoice, the invoice may be subject to a monthly finance charge equal to the lesser of 1.5% or the highest amount permitted by law. List prices include freight charges; however, they do not include:

- Storage and insurance charges
- Sales and other taxes
- Local delivery, unloading, or installation

These items will be invoiced as separate line items.

All prices herein are delivered list price, unless noted, effective December 2, 2013, and supersede all other published prices. Prices shown cover standard product only, additional charges will be applied for changes to standard product. Kimball Office reserves the right to change prices without prior notice. Prices herein are only for shipment within the continental United States or Canada.

Selling Information
Distribution of this price list does not in itself constitute an offer to sell. Orders can be received only from authorized Kimball Office customers. Kimball Office price lists and catalogs are not available to the general public.

Product Design:

Kimball Office reserves the right to make changes in design, specifications, and construction or discontinue products without prior notice.

Shipping/Freight:

Products are priced and will be delivered C.P.T. one contiguous U.S. destination, one Canadian destination or one port of exit, freight prepaid (Incoterms 2010). Title shall transfer with risk of loss.

Kimball Office reserves the right to select the most appropriate shipping terms.

Asset Tag Locations:

Bar code labels have been placed on all Kimball Office products.

Seating
Underside of seat pan

Delano Tables
Under each table, there is a cut out in the bottom panel which creates a ledge. The tag is located on the top side of the ledge so it is not visible when looking at the bottom of the table.

Product Warranty ➤See page 360
Warranty for Bingo 361
BIFMA and ANSI Testing 362

Delivery:

Normal delivery hours are 8:00 a.m. to 5:00 p.m. Monday through Thursday and 8:00 a.m. to 3:00 p.m. on Friday. Any delivery arrangements made outside of normal delivery times are subject to additional charges. ➤See at right.

Any charges incurred because of failure to receive a shipment or offload a shipment in a timely manner (maximum time allowed to offload trailer: 3 hours), will be billed to the sold-to customer.

Any charges as a result of rerouting a shipment while in transit will be billed to the sold-to customer.

Any order requiring **Special Delivery Service** will incur additional charges. All such requirements must be noted on the purchase order. These are services that are not included in the standard price of the product or require the usage of specialized carriers. These services include:

- Weekend delivery (after 3:00 p.m. Friday through Sunday evening)—minimum $500 charge.
- Inside delivery—minimum $50 charge.
  Note: Must be approved and coordinated 10 days prior to shipment.
- Non-dock delivery—minimum $50 charge.
- JIT delivery (specific day and/or time)—Orders under $25,000 list will incur a $125 charge.
- Rush delivery (1-3 days from ship date)—Contact Customer Service for charges.

Carrier Selection
Kimball Office reserves the right to select the most appropriate mode of shipment. Kimball Office relinquishes all responsibility for goods shipped upon a clean receipt from the carrier. Customer bears the risk of loss or damage during shipment.

Packaging
Kimball Office's standard method of shipping is to carton all items. Certain full truck load shipments may qualify for special consideration. Contact Kimball Office for guidelines. International shipments can be crated at the customer's request. The expense of crating will be the responsibility of the customer.

Palletizing
Kimball Office may elect to palletize key products on projects when it effectively reduces carton waste and improves stability within the shipment.

Loss, Damage, or Delay
Kimball Office shall not be liable for loss, damage, detention or delay resulting from causes beyond its reasonable control including but not limited to fire, strike, weather, wreck or delay in transportation. In the event of delay due to any such cause, the delivery date will be postponed by such length of time as may be reasonably necessary to compensate for the delay.

Storage
If the customer requests a change of ship date and the product is in production, Kimball Office reserves the right to transfer the product to storage at the customer's risk and expense. All requests to store product must be approved by Kimball Office Customer Service and may be subject to storage fees. Such transfer to storage will be deemed delivery to the customer for all purposes including insurance, liabilities, invoicing, and payment.

Returned Merchandise
Merchandise will only be accepted for return under the following conditions:

① The product is a "made to stock" item; *and*
② Return Goods Authorization (RGA) is given to you by your Customer Service Team.

All returns are subject to a 50% restocking fee. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect. All merchandise being returned must be properly packed and protected in the original cartons. Upon receipt, all returned merchandise will be thoroughly inspected. Any discrepancies, such as additional damage, signs of usage, missing parts, etc., will result in an adjustment to the amount of credit issued.

Claim Process:

All products produced by Kimball Office are carefully inspected and properly cartoned prior to shipment. All shipments are delivered to the transportation company in good condition. If you receive a shipment that has damage, product shortages, or delivery has been delayed by the transportation carrier, **the following steps must be taken:**

① Before signing for the merchandise, make notation of all visible damage, shortages and/or time of truck arrival on the bill of lading.
② Contact Customer Service within 15 calendar days of delivery receipt to report issue. We will advise whether a freight claim will need to be filed based on mode of transportation.
③ If claim must be filed, carrier must be contacted within 15 calendar days of delivery. Retain all shipping cartons for inspection by the carrier agent.
④ A copy of the Carrier Disposition Letter must be sent to Customer Service to receive additional credit on concealed damage issues via Redistribution/ LTL carrier shipments.

For Concealed Damage, follow steps 2 through 4.

Electronic Catalog and Specification Software:

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™.
As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

Product Warranty

Lifetime Assurance of Quality

Terms & Conditions ➤See page 358
Warranty for Bingo 361
BIFMA and ANSI Testing 362

Our Pledge:

Kimball Office stands behind the craftsmanship of our products. When brought to our attention, we will address warranty issues quickly and effectively.

Recommendations:

Facilities managers and users are urged to make periodic inspections to look for signs of structural fatigue, damage or potential failure that may occur as a result of daily handling and use. Inspections should include the structural joints, corner blocks, screws or fasteners, welds, and any other points of stress. If any problems are found, the product should be taken out of service and Kimball Office Customer Service should be contacted promptly at 800-482-1818.

Limited Product Warranty:

Kimball Office warrants that its products are free from defects in materials and workmanship given normal use and care for a lifetime of single-shift service. Normal use is defined as the equivalent of a single shift, 40-hour work week.
Exception: Itsa and Campos seating models are warranted for three-shift (24/7) service.
Exception: Some products and parts have limited warranty periods.
➤See lists at right.

At its option, Kimball Office will repair or replace with comparable product, free of charge to the customer, any product, part or component manufactured and/or sold by Kimball Office in North America after November 6, 2000, which fails under normal use as a result of such defect.

In the event that use of a product exceeds normal use as defined above, the warranty period for such product will be reduced to 12 years from date of manufacture, and the warranty for the product's components that fall under different warranty limitations, as listed at right, will be reduced to one-third of the original warranty.

This warranty is made by Kimball Office to the original customer for as long as the original customer owns and uses the product.

This warranty is only valid if the products are given normal and proper use, and installed or used in accordance with Kimball Office installation and/or application guidelines, and installed by an authorized Kimball Office dealer or agent. Kimball Office assumes no responsibility for repairs to products sustaining damages resulting from user modification, attachments to a product, misuse, abuse, alteration, or negligent use of our products.

EXCEPT AS EXPRESSLY SET FORTH ABOVE, THERE ARE NO OTHER WARRANTIES EITHER EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. WE EXCLUDE AND WILL NOT PAY CONSEQUENTIAL, PUNITIVE, OR INCIDENTAL DAMAGES UNDER THIS WARRANTY.

All warranties run from date of manufacture.

Warranty Periods:

Warranty periods are limited for certain products and/or component parts as follows:

10-Year Warranty
- Seating mechanisms
- Veneers
- Laminate
- Pneumatic lifts (cylinder assembly)

5-Year Warranty
- High-wear parts (such as casters, glides, drawer slides, moving chair arms)
- Electrical/power products
- Inflatable lumbar supports
- Lighting
- Desk sets
- Monitor arms
- Keyboard kits
- Covering materials (such as foam, mesh , most textiles, 3D laminate, and decorative trim)
- Marker Boards

3-Year Warranty
- Wool felt
- Custom products
- Carnegie Fabrics
- Itsa Mesh
- Campos Mesh

1-Year Warranty
- Fit lounge and headrest

Warranty Exclusions:

This warranty does not cover:
- The substitution of non-Kimball Office components for use in place of Kimball Office components
- Naturally occurring variations and differences in grain character and color between and within wood species
- Natural variations in marble and leather
- Damage caused by a freight carrier
- Normal wear and tear arising from product use
- Damage resulting from improper use or storage of the product
- C.O.M. (Customer's Own Material) or any other non-standard material specified by the customer, including attributes such as appearance, durability, quality, performance, colorfastness, etc.
- Alliance program fabrics
- Fabric, leather, and felt fading and wear, discoloration from contact with liquids or change in color or texture caused by application of finishes (flame proofing, stain resistance)
- Alterations to the product not expressly authorized by Kimball Office
- Products considered to be of consumable nature (such as bulbs, light ballast, and certain electronic products)

Process for Warranty Issues:

① A customer should contact his or her dealer, who will contact Customer Service at 800-482-1818. The purchase order or acknowledgement number, model number, and a detailed description of the warranty issue should be provided. **Serial numbers may be required** before the claim can be processed.

② Customer Service will determine and pre-approve all resolutions to the claim, such as replacement units, service parts, and labor charges related to repair or redelivery of damaged or defective product.

③ Upon approval, a Case Number and resolution will be assigned to an authorized dealer, and all parts and components necessary for the repair/replace will be sent to the authorized dealer, which will carry out the resolution. The dealer should include the Case Number on all invoices for reimbursement once the warranty repair/replace has been completed. Kimball Office shall not be responsible for any unauthorized expenses. Kimball Office will only accept dealer invoices submitted within 90 days of the final approval by Customer Service; invoices received after 90 days will not be approved for dealer credit or payment. All warranty information should be sent to:

Product Warranty for Bingo®

Terms & Conditions ➤See page 358
Product Warranty 360
BIFMA and ANSI Testing 362

Our Pledge:

Kimball Office stands behind the craftsmanship of our products. When brought to our attention, we will address warranty issues quickly and effectively.

Recommendations:

Facilities managers and users are urged to make periodic inspections to look for signs of structural fatigue, damage or potential failure that may occur as a result of daily handling and use. Inspections should include the structural joints, corner blocks, screws or fasteners, welds, and any other points of stress. If any problems are found, the product should be taken out of service and Kimball Office Customer Service should be contacted promptly at 800-482-1818.

Limited Product Warranty:

Kimball Office warrants that its Bingo products are free from defects in materials and workmanship given normal use and care for **five years** of single shift service. Normal use is defined as the equivalent of a single-shift, 40-hour work week.
Exceptions: Some products and parts have limited warranty periods.
➤See lists at right.

At its option, Kimball Office will repair or replace with comparable product, free of charge to the customer, any product, part or component manufactured and/or sold in North America after June 18, 2001, which fails under normal use as a result of such defect.

This warranty is made by Kimball Office to the original customer for as long as the original customer owns and uses the product.

This warranty is only valid if the products are given normal and proper use, and installed or used in accordance with Kimball Office installation and/or application guidelines, and installed by an authorized Kimball Office dealer or agent. Kimball Office assumes no responsibility for repairs to products sustaining damages resulting from user modification, attachments to a product, misuse, abuse, alteration, or negligent use of our products.

EXCEPT AS EXPRESSLY SET FORTH ABOVE, THERE ARE NO OTHER WARRANTIES EITHER EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. WE EXCLUDE AND WILL NOT PAY CONSEQUENTIAL, PUNITIVE, OR INCIDENTAL DAMAGES UNDER THIS WARRANTY.

Warranty Periods:

Warranty periods are limited for certain products and/or component parts as follows:

3-Year Warranty
(from the date of manufacture)
- Custom products

Warranty Exclusions:

This warranty does not cover:
- The substitution of non-Kimball Office components for use in place of Kimball Office components
- Naturally occurring variations and differences in grain character and color between and within wood species
- Damage caused by a freight carrier
- Normal wear and tear arising from product use
- Damage resulting from improper use or storage of the product
- Alterations to the product not expressly authorized by Kimball Office

Process for Warranty Issues:

① A customer should contact his or her dealer, who will contact Customer Service at 800-482-1818. The purchase order or acknowledgement number, model number, and a detailed description of the warranty issue should be provided. **Serial numbers may be required** before the claim can be processed.

② Customer Service will determine and pre-approve all resolutions to the claim, such as replacement units, service parts, and labor charges related to repair or redelivery of damaged or defective product.

③ Upon approval, a Case Number and resolution will be assigned to an authorized dealer, and all parts and components necessary for the repair/replace will be sent to the authorized dealer, which will carry out the resolution. The dealer should include the Case Number on all invoices for reimbursement once the warranty repair/replace has been completed. Kimball Office shall not be responsible for any unauthorized expenses. Kimball Office will only accept dealer invoices submitted within 90 days of the final approval by Customer Service; invoices received after 90 days will not be approved for dealer credit or payment. BIFMA and ANSI Chair Testing

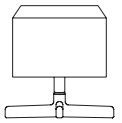
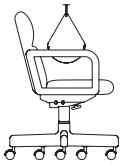
X5.1–2011 General Purpose Office Chair Tests
X5.4–2012 Lounge and Public Seating Tests

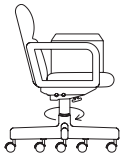
Backrest Strength Test: Type **I**—back tilt chair, 200 lb. force applied, 300 lb. proof load. Type **II** & **III**—back tilt chair, 150 lb. force applied, 250 lb. proof load.



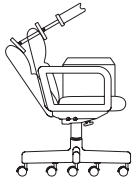
Base Test: Using 2500 lb. force for one minute, 2500 lb. proof load.



Drop Test: Using 225 lb. weight, 300 lb. proof load with 6" drop.

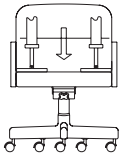


Swivel Cycle Test: 250 lb. on seat rotating base, 60,000 cycles at mid point and 60,000 lowest position.

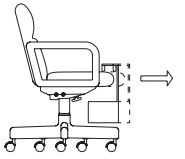


Tilt Mechanism Test: 300,000 tilts with 225 lb. in seat.

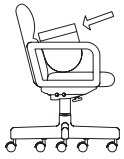
Seat Durability Test: 125 lb. weight dropped onto seat 100,000 cycles.



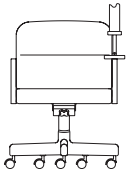
Front Load Ease: 165 lb. alternating for 40,000 cycles.



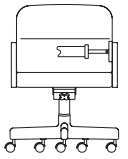
Front Stability Test: Apply 135 lb. on front edge of seat while applying horizontal 4.5 lb. force at top of seat.



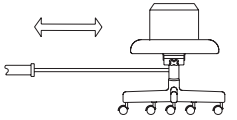
Rear Stability Test: 173 lb. on seat, no less than 20 lb. of pressure should be required to tip chair back.



Arm Strength Test—Downward Application: 169 lb. force applied downward at arm's weakest point, 253 lb. proof load.



Arm Strength Test—Outward Application: 100 lb. force applied outward at arm's weakest point, 150 lb. proof load.



Chair/Chair Base Durability Test: 2,000 cycles over obstruction, 98,000 over smooth along a 30" distance with a 250 lb. load.

Terms & Conditions ➤See page 358
Product Warranty 360
Warranty for Bingo 361

Chair Testing:

The X5.1–2011 General Purpose Office Chair Tests were developed by the Business and Institutional Furniture Manufacturer's Association (BIFMA) and approved by the American National Standards Institute (ANSI). These performance tests determine the stamina of seating in its day to day use.

Kimball Office is a member of the Business and Institutional Furniture Manufacturer's Association.

Note: This testing does not serve as a warranty or guarantee. Generally, products within this price list meet or exceed the applicable BIFMA/ANSI standards.

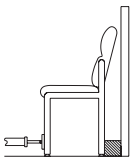
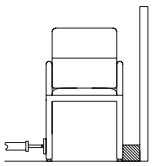
Product Warranty 360
Warranty for Bingo 361

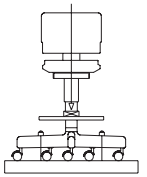
Backrest Durability Test: Type **I**—with 225 lb. on seat with chair fully reclined with 100 lb. force, 80,000 cycles. Type **II** & **III**—with 225 lb. on seat and tilting with 75 lbs. force, 80,000 cycles. After 80,000 are complete, 40,000 will be off center testing.



Leg Strength Test—Front Application: 75 lb. force applied, 113 lb. proof load.

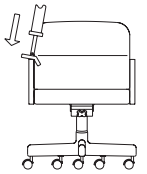


Leg Strength Test—Side Application: 75 lb. force applied, 113 lb. proof load.

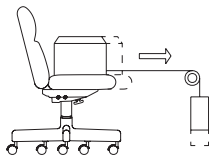


Footrest Durability Test: 200 lb. weight applied along a 4" length of the footrest, 50,000 cycles.

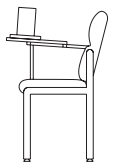
Footrest Static Test:
200 lb.
300 lb.



Arm Durability Test: Apply 90 lb. force at 10° angle for 60,000 cycles.



Out Stop Test for Chairs with Manually Adjustable Seat Depth: 163 lb. forward force with 55 lb. downward force for 25 cycles.



Tablet Arm Test—Static: 150 lb. load level for 1 minute.

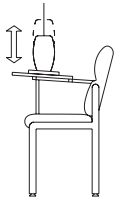


Table Arm Load Ease Test—Cyclic: 77 lb. dropped onto tablet center surface for 100,000 cycles.

Kimball® Office

SEATING PRICE LIST

April 2014

Revision Summary

This document provides a summary of revisions made to the Seating Price List since December 2, 2013.
These revisions are effective April 15, 2014.

Additions

New Maharam upholstery fabrics are now available.
➤See page 235.

New Momentum upholstery fabrics are now available.
➤See page 239.

Changes

Independence Suffolk desk chairs are now available standard with pneumatic height adjustment.
➤See page 104.

Maharam Medium and Messenger fabrics have been moved from price grade D to B.
➤See page 235.

Fit lounge chair and headrest are available for quick shipment as standard. The model numbers are now the same as the Kwik Office models beginning with a "Q." TB133 model numbers remain unchanged.
➤See page 263.

Clarifications

Itsa seating is warranted for three-shift (24/7) service.
➤See pages 124 and 290.

Corrections

Disperse seating upholstery abrasion test rating has been corrected to 100,000 double rubs.
➤See page 228.

Phone number for Maharam has been corrected.
➤See page 233.

Corrections to Maharam and Momentum colorways and specifications have been made to conform to current information from the alliance partner.
➤See pages 235–241.

Silver is not available in Nappa Leather.
➤See page 273.

Deletions

Maharam Milestone fabric is no longer available.

Kimball® Office

SEATING PRICE LIST

Revision Summary

June 2014

This document provides a summary of revisions made to the Seating Price List since April 15 2014.
These revisions are effective June 23, 2014.

Additions

Enjoy lounge seating is now available in TB133 models.
➤See page 93.

Pose lounge seating, benches and ottomans are now available in TB133 models.
➤See pages 143–145.

Villa lounge privacy-back models are now available in TB133 models.
➤See pages 182 and 184.

Changes

Updates to the Finishes and Materials chapter have been made to reflect the current offering, including the addition of three new wood finishes and laminates.
➤See page 219.

Clarifications

BIFMA/ANSI: 100% of the products manufactured by Kimball Office are level® certified.
➤See page 5.

Product warranty has been updated to reflect that Itsa and Campos seating lines have a "normal" use classification and warranted for 3-shift, 24/7 service. Itsa Mesh and Campos Mesh models have a warranty period of 3 years.
➤See page 290.

Corrections

Beo one-seaters and tandem two-seaters with clean-out option must be specified with the plus-3"-width option if you also want to specify a table arm.
➤See pages 40 and 42.

Ebony finish on Bingo is a paint finish.
➤See pages 49 and 50.

Tablet arm on Villa lounge shown on the overview page illustrates a right-handed tablet arm. Text corrected.
➤See page 168.

Deletions

Axos seating is no longer available.

Kimball® Office

SEATING PRICE LIST

Revision Summary

July 2014

This document provides a summary of revisions made to the Seating Price List since June 23, 2014.
These revisions are effective July 15, 2014.

Additions

Boyd lounge seating is now available.
➤See page 51.

Wish seating has been redesigned and now includes new mesh-back and mesh-upholstered seat models, as well as upholstered seat and back models.
➤See page 205.

Changes

Exisiting Wish models are still available under the name Wish Classic.
➤See page 249.

SEATING PRICE LIST

Revision Summary

October 2014

This document provides a summary of revisions made to the Seating Price List since August 18, 2014.
These revisions are effective October 1, 2014.

Additions

Accent pillows have been added to the product offering. Take order date is October 15, 2014.
➤See page 13.

Flip nesting chairs have been added to the product offering. Take order date is October 15, 2014.
➤See page 121.

Changes

Pricing has been updated for all products, except Alumma, Boyd, and new Villa models introduced in August 2014, to reflect the price adjustment effective October 1, 2014.

Alumma conference and side chairs have been added to the Kwik Office program.
➤See page 25.

Shipping/freight terms have been changed.
➤See page 362.

Laminate is warranted for a period of 10 years.
➤See page 364.

Clarifications

None.

Corrections

➤See page 335.

Deletions

Wish Classic with 3-D adjustable arm caps (model K20CT) is no longer available.
➤See page 272.

Maharam has deleted several colors from their pattern offering.
➤See page 305 for the updated list.

Skye chairs are no longer available.

Kimball® Office

SEATING PRICE LIST

December 2014

Revision Summary

This document provides a summary of revisions made to the price list since October 1, 2014.
These revisions are effective December 15, 2014.

Additions

None.

Changes

Alliance partner fabric listings have been updated to show only carded fabrics.
➤See page 305.
➤See Surface Materials at www.kimballoffice.com for a wide variety of additional non-carded, graded-in fabrics.

Terms and Conditions have been revised to include an updated list of alliance partner names in the "no cancellations or changes" paragraph as follows:
- Alliance program upholstery (Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, Ultrafabrics)

➤See page 350.

Product Warranty has been revised. Thermofoil is now called 3D laminate in the 5-year warranty section. The Alliance partner list has been updated in the warranty exclusions section as follows:
- Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, Ultrafabrics alliance programs

➤See page 352.

Clarifications

Plastic rim is now referred to as PVC rim throughout the price list.

Kwik Office progrm includes Alumma chairs.
➤See page 4.

Alumma chairs ship knocked down. They are recommended for users weighing 253 lbs. or less.
➤See page 24.

Dwell power/USB grommets feature a 6"L cord and cannot be daisy-chained.
➤See page 102.

Beo guest seating and tables go through a different wood drying process than the side seating counterparts, resulting an differential in base color that prevents offering Brighton and Monterey finishes on these models. These lighter finishes will not cover the base color of the wood.
➤See page 291.

Villa freestanding round tables with glass top features 202 Ice glass.
➤See page 216.

Wish high-performance, sit-to-stand, and stools meet 300 lb. weight and three-shift work requirements. Model number for high performance task chairs height- and width-adjustable arms and 4D armcaps with TB133 has been corrected.
➤See pages 229, and 240.

COM and COL flammability compliance section has been revised for clarity.
➤See pages 316 and 358.

Corrections

Height and depth dimensions for Delano have been corrected.
➤See page 85.

Flip chairs with or without casters may be ganged together.
➤See page 122.

All Boyd seating models are available in Lifesaver fabric, but not in TB133. Fabric matrix updated.
➤See page 296.

COM/COL yardage requirements have been revised and corrected for:
- Accent pillows
- Collage
- Dwell
- Villa

➤See page 309.

Deletions

Carrington seating is no longered offered in cherry models.
➤See pages 68–71.

Hero. Just for You. mesh high-back and upholstered mid-back desk chairs are no longer available.
➤See page 329.

Xantos upholstered-back desk chairs are no longer available.
➤See page 337.

Chamois laminate is no longer available.
➤See page 293.

Kimball® Office

SEATING PRICE LIST

Revision Summary

January 2015

This document provides a summary of revisions made to the price list since December 15, 2014.
These revisions are effective January 21, 2015.

Additions

None.

Changes

None.

Clarifications

None.

Corrections

Villa power/USB grommet locations have been corrected as follows:

- The large illustration on the Villa overview shows a left grommet; callout has been revised.
  ➤See page 191.
- Illustration for inside wedge has been revised to show the grommets on the side kickrails instead of the front.
  ➤See page 192.
- Illustration for outside wedge has been revised to show the grommets as being more inset to the center of the front kickrail.
  ➤See page 192.

Seat width dimensions for Villa 30"W privacy back and two-seat privacy back models have been corrected to 30¼" and 48¼", respectively.
➤See page 197.

Model number callouts for Villa privacy-back 90° corners have been corrected on the fabric application diagrams.
➤See page 215.

Deletions

None.

Kimball® Office

SEATING PRICE LIST

April 2015

Revision Summary

This document provides a summary of revisions made to the price list since January 21, 2015.
These revisions are effective April 28, 2015.

Accent Pillows

Pillows are upholstered with the design/pattern running upward on both sides. Patterns will not necessarily align at the seams. Each pillow with the same upholstery on the same order will match.
➤See page 13.

Beo

Tablet arm options are now available on the standard-width one-seater with clean-out option.
➤See pages 46, 48, and 50.

Bloom

Bloom seating and tables are now available.
➤See page 57.

Boyd

Boyd seating is now on GSA contract under SIN 711-16.
➤See pages 65–68.

Delano

Ottoman depth has been corrected to 20 7/16".
➤See page 91.

Dwell

Depth dimension for modular ottoman has been corrected to 20 7/16".
➤See page 109.

Dwell seating is now available with TB133.
➤See pages 111–114.

Dwell seating is now on GSA contract under SIN 711-16.
➤See pages 111–114.

Event

Event chairs with tablet arm feature a black tablet arm.
➤See page 129.

Flip

Flip chairs feature a black mesh back and are available in black or chrome finished frame. Tablet top is available in off-white laminate only.
➤See page 128.

Flip chairs are now on GSA contract under SIN 711-19. Tablet top and ganging brackets are non-contract.
➤See page 129.

Itsa

Seat slider option is available on task chairs only. Text revised for clarity on the Itsa overview page.
➤See page 152.

Villa

Villa 30"W privacy-back models and privacy-back models with shade are now on GSA contract under SIN 711-16.
➤See pages 208–213.

Wish

Several Wish models are now available on Kwik Office and are marked with a K.
➤See the Kwik Office Price List to specify.

Wish seating is now on GSA contract under SIN 711-18.
➤See pages 242–272.

TB133 on upholstered back, upholstered seat Wish is now available. Pending designation removed.
➤See pages 248–272.

Wish sit-to-stand caster designators have been corrected to C40 and C41 65mm caster options.
➤See pages 258–264.

Xantos

Optional, adjustable lumbar support for desk chairs is not available. Paragraph referring to this option has been deleted from the overview page.
➤See page 346.

Finishes & Materials

Canyon Oak, Monterey Oak, and Tuscan Walnut wood finishes are now available on all seating lines with the exception of Delano and Delano Tables.
➤See page 297.

Alliance Program carded pattern price grades have been downgraded for several CF Stinson Momentum, and Ultrafabrics selections.
➤See page 313.

Minor updates have been made throughout the Kimball Office and Kimball Office/Interstuhl finishes and materials chapters to bring them up to date and make them more consistent with our other price lists.

Resources

Minor updates have been made throughout the Resources chapter to bring it up to date and make it more consistent with our other price lists.

BIFMA and ANSI chair testing now includes X5.4–2012 Lounge and Public Seating Tests.
➤See page 362.
