LITERATURE

828-495-1930 literature@cabotwrenn.com

We, at Cabot Wrenn, pride ourselves in exploring, developing and processing products that are environmentally friendly.

Our recycling program protects our environment by conserving energy and natural resources. The following activities take place on a daily basis to ensure that our operation has no negative impact on our environment.

We utilize non-toxic paints that are virtually free of all Volatile Organic compound emissions as well as Ozone Depleting Substances (ODS). We are strictly regulated on state and federal levels. State and Federal agencies monitor us closely and we continue to stay in compliance with all laws. The glue that we use is a water-based contact adhesive and is environmentally friendly. All aluminum bases and metal components contain 10-15% recycled material and are 100% recyclable. We eliminate waste by recycling all fabric remnants and leather off-fall. We have joined with several fabric distributors whose main goal is to offer top quality upholstery, which is also environmentally friendly.

Our maple wood comes from sustainable forests where there are 2.29 trees growing for every tree that is being harvested.

All of our corrugated paper is recycled. We work directly with a local paper recycler who shares our environmental concerns. In a combined effort, we have diverted tons of corrugated paper from our landfills.

The foam that is used in our furniture is produced using no fluorocarbons that are harmful to the ozone layer and all foams used are PBDE, TCDPP, TCEP and formaldehyde free. Every scrap of foam that we generate is sent back to the supplier who in turn recycles it into packaging and floor underlayment products.

In the cold months, all wood scraps are burned in our high efficiency boiler to heat our plant while not exceeding EPA's clean air emissions. In warmer months, our wood scraps are sent to a recycler to grind up for landscaping mulch.

All wood pallets that we use for shipping our furniture are recycled. We return pallets to many suppliers for reuse. Others are accumulated and we reuse them time after time. We also share pallets with other local manufacturers.

Even our lighting is state of the art with electronic ballast. The light output is much higher and also uses less energy.

Environmentally friendly paper is used for our literature and price list. Cabot Wrenn also has a wide variety of photography available on digital imagery, minimizing the excessive need for printed literature.

Cabot Wrenn is pleased to be a good steward of our resources and we will strive to improve our products and our production processes to minimize the impact on our environment.

All warranty claims must be made in writing by the original purchaser. Purchasers may be required to produce the invoice or other evidence to establish that a claim is within the warranty period. No person, firm, or corporation is authorized to assume for Cabot Wrenn any liability in connection with the sale or installation of Cabot Wrenn product except as stated above.

Shipping

All product is shipped FOB Factory.

An anticipated shipping date is indicated on the order acknowledgement. Cabot Wrenn cannot accept responsibility for shipping delays caused by outside sources or unforeseen problems. Delay of shipments requested by customers must be approved by Cabot Wrenn. Any resultant storage charges will be charged to the customer. If possible, Cabot Wrenn will ship in accordance with customer instructions. Cabot Wrenn may await completion of the entire order and ship all at once or may make partial shipments from time to time at its sole discretion unless the customer requests in writing that partial shipments are needed and Cabot Wrenn approves the specific shipping schedule.

Cabot Wrenn is not liable for any delay or failure to deliver or perform due to strikes, lock-outs, or other labor difficulties, delay of sources or supply, transportation difficulties, accidents, fires, acts of God, or any other causes of like or unlike nature beyond Cabot Wrenn's control.

Liability

Cabot Wrenn products and their packaging are tendered to a transportation company only after passing rigid quality control inspection. At that time, title to the product is passed to the purchaser. However, the transportation company assumes all liability from acceptance of shipment through its delivery. That is, Cabot Wrenn's liability ceases at the time of shipment.

Damage or Shortage

If there is damage or shortage, note it on the freight bill at the time of delivery. If damage is concealed, notify the carrier immediately, request an inspection, and file a claim for damage. The refusal of damaged merchandise in no way relieves the purchaser of responsibility for payment of goods.

Filing of Claims

The utmost care is used in packaging and shipping. Cabot Wrenn liability ceases when the carrier issues a clear receipt to Cabot Wrenn, which is an acknowledgement by the transportation company that the shipment has been received by them in good condition. It is the obligation of the consignee to count and examine the condition of the shipper's containers at the time of delivery. It is the consignee's responsibility to file claims for damage or loss with the transportation company as soon as possible after receipt of merchandise. Do not return freight damaged merchandise to Cabot Wrenn. Proceed with the following steps to expedite payment of claims with transportation companies. Cabot Wrenn is not responsible for pick up and delivery charges for local repairs or inspections OR returns to the factory. Cabot Wrenn is not responsible for the cost of rental furniture while repairs are made.

For Visible Damage

1. Make damage notation on delivery receipt and have driver sign. **Do not reject or refuse the shipment.**
2. Immediately request that the carrier make an inspection.
3. Hold damaged carton and all interior packing for carrier's inspection. These materials will be needed to substantiate the claim.
4. After inspection, file claim. If no inspection is made, file claim within five days of request for inspection.

For Concealed Damage

1. Open cartons as soon as possible after receipt and inspect.
2. Follow steps 2,3, and 4 as listed under **Visible Damage.**
3. If there is possible damage (crushed corners, sound of broken parts, etc.), and receiver cannot take time to open, write "**possible concealed damage**" on bill before signing.

For Loss

1. Be sure loss notation is made on delivery receipt and have driver sign.
2. File claim within the prescribed time.

Please do not assume that a style will always have the exact measurements shown. If a style you have chosen needs to fit in a limited space or has specific needs, please call the factory to insure a proper fit. We continually make modifications to the dimensions to improve the overall look and comfort. Seat cushions are measured from the crown of the cushion and will also vary in height due to the fill that has been selected.

Wood owes its inherent beauty to variations in color, grain and texture. As a result, there may be minor variations from one piece of furniture to the next even though they are finished at the same time. Exposure to light and the aging process will cause a darkening of natural wood products. For these reasons, Cabot Wrenn does not guarantee the exact matching of grain, pattern and color.

One-time Formulation Charge \$375 NET, **plus** an upcharge of 5% COM net per unit. For large quantities, contact Cabot Wrenn Customer Service. Care of Leather

Each piece of leather has unique marks and a personality all its own. These distinctive marks are barbed wire nicks, brands and nature's hallmarks. Only true leather can boast these marks, and pride of ownership is enhanced due to this individuality. Please note these marks are not defects but characteristics of full top grain leathers.

Protected Leather

No upholstery material is easier to care for than genuine top grain leather. Dust frequently with a clean dry cloth. Wipe occasionally with a mild Ivory soap and water solution on a clean damp cloth. Repeat with a clean damp cloth and dry with a clean cloth to restore the beautiful patina of the leather. DO NOT use saddle soap, polish, wax or any cleaning agents other than a mild Ivory soap and water solution. The use of any cleaning substance other than a mild Ivory soap and water solution will negate any warranties from the leather tannery.

Unprotected Leather

This is a natural leather that cannot be cleaned because it does not have a protective coating. This leather will fade if exposed to direct sunlight. Leather Solutions has products available that may help the performance of this leather.

You may contact Leather Solutions for assistance at (336) 629-4998.

Cleaning Instructions for Fabric

Code S

Instruct a professional cleaning service to clean these fabrics with pure solvents. Petroleum distillate-based products may be used. Caution: Use of water-based or detergent-based solvent cleaner may cause excessive shrinking. Water stains may become permanent and unable to be removed with solvent cleaning agents.

Code W

Instruct a professional cleaning service to clean these fabrics with water-based cleaning agents or water-based foam to remove overall soil. Many cleaning agents are harmful to the color and life of a fabric and testing on an inconspicuous area is recommended before overall cleaning. Cushion and pillow covers should not be removed for cleaning.

Code SW

Instruct a professional cleaning service to clean these fabrics with water-based cleaning agents. Petroleum distillate-based products may be used. Cushion and pillow covers should not be removed for cleaning.

Code X

Water-based foam or solvent-based cleaning agents of any kind may cause excessive shrinking or fading. For better wear, we suggest that you reverse the cushions each week. To prevent overall soiling, frequent vacuuming or light brushing to remove dust and grime is suggested.

Making The Right Leather Decision

A simple rating system referred to as the 4S's has been devised to indicate each leather's rating in four different areas - **softness, surface grain, special effect and serviceability**. Much like the 4C's of the diamond industry, which define clarity, cut, color and carat weight, the 4S's will assist you in making the right leather decision for your new furniture in conjunction with your lifestyle.

Softness - This is the essential and defining characteristic of leather. The overall comfort and cost of leather is directly linked to softness, which reflects its quality.

- 4 = Nature Soft Rarest and most expensive leathers.
- 3 = Techno Soft Suppleness created with technology.
- 2 = Flexi Soft Leathers enhanced through mechanical action.
- 1 = Firm Leathers boasting tremendous "value".

Surface Grain - This mirrors the Softness category. The less the surface grain is manipulated, the more natural and soft the leather is. As degrees of surface grain are removed, the cost is lowered.

- 4 = Full Grain or Full Top Grain Key word is "full" meaning 100% natural grain, typically the most expensive leathers.
- 3 = Top Grain Originally a full grain which has been altered through light sanding, barely noticeable to the naked eye.
- 2 = Corrected & Embossed Grain A top grain leather that has been thoroughly sanded, then embossed with a natural looking uniform grain pattern.
- 1 = Split & Embossed Grain The second layer split from a full grain hide which is heavily pigmented and embossed with a less natural uniform grain pattern.

Making The Right Leather Decision cont...

Special Effect - Countless varieties of leather are available, many achieved through Special Effects. The cost of these uniquely processed leathers is in direct relation to expertise, effort and difficulty.

4 = Multiple Effects Defined by more than two special effects such as handrubbing or metallics which create an upscale look and price.

3 = Active Effects Injection of oil or wax to create a color-burst when stretched during the upholstery process. Often called pull-up.

2 = Mechanical Effects Processed through automated techniques and includes such effects as two-tone sauvage and distressed.

1 = Uniform Color A spray of pigmentation creates a universally accepted uniform color throughout the hide.

Serviceability - Leathers range from easy care with high resistance to those focused on fashion and style. It is important to match your lifestyle with serviceability.

4 = Minimal Resistance Expensive and luxurious, typically a nubuck or suede, designed for fashion and style application.

3 = Natural Resistance The most expensive and elegant of all leathers, typically pure or naked, will gain a patina over time.

2 = Standard Resistance Impervious to most spills and stains, easy to clean, best for residential serviceability requirements.

1 = Maximum Resistance Impervious to spills and stains, very easily cleaned, best for heavy-duty or commercial requirements.
