Planning Guide + Price List

NUCRAFT

Volume 2 of 2 | January 2016

You design. Let us handle the details.

Nucraft offers a free, online product configuration and specification service that saves you time and allows you to be creative while leaving the nuts and bolts to someone else.

- No special software is required, nor is there any learning curve.
- The service applies to all Nucraft products including private office products, conference room products, reception stations, and training tables.
- You can generate quick and accurate answers for budget estimates and/or quick and exact specifications for final quotes.
- Revisions can be made any time you like, and total accuracy is guaranteed.

How it works.

Called iSpec, this service is as close as your phone and your Internet-connected computer. You can use it anytime you need to configure, specify, or price Nucraft furniture. Here is how it works :

1. Schedule an iSpec session by calling 1-877-NUCRAFT or by visiting www.nucraft.com/ispec. (You will be asked to provide some preliminary information on the project. We will respect the confidentiality of the information.)

2. At the scheduled time, a Nucraft project specialist will contact you at the telephone number you provide.

3. You will be directed to the online collaboration site. (All you need is an Internet connection and a Web browser.)

4. Once you are at the site, the Nucraft project specialist will work with you in real time to configure the required product based on your specific direction. (Watch the screen as your workstation appears.)

5. When the specification process is completed, you will receive 2-D or 3-D drawings, the specification itself with guaranteed accurate pricing, and the estimated lead time. (Follow-up sessions may be scheduled at your request to make any necessary modifications.)

iSpec—it's fast, it's flexible, it's a free service from Nucraft.

General Information

This price book supercedes all previous versions.

Before placing your order, confirm you have all required information necessary. Lead times for orders begin after all required information is included and correct.

Delivery Information
We know lead times are important and sticking to them even more so. We work to maintain a 6-8 week lead time on all standard products in this book from receipt of a clean order. All orders are acknowledged with an approximate shipping date and will be invoiced with the price in effect at the date the purchase order is received.

Shipping charges are prepaid (within the continental U.S.). Therefore, pricing is a delivered price based on normal ground transportation. If you have special instructions, need to ship by air, or are shipping to Alaska or Hawaii, contact Nucraft Customer Service. Nucraft can also help arrange to have products blanket wrapped for an additional charge. Contact the Nucraft Customer Service team or specify it on your purchase order.

Minimum Freight Charge: Any order below $2,000 net will be assessed a $260 net minimum freight charge (one per order).

Orders are subject to acquiring the materials required for manufacturing. Fulfillment can be affected by strikes, fires, embargoes and acts of government. These elements are beyond our control.

Nucraft offers a variety of services to accommodate a wide range of delivery requirements. Availability of these services is dependent on a number of factors and may not be offered with all shipments. Examples of delivery services that have additional fees include:

- Specific date within our standard 3-5 day delivery window (for orders under $50,000 net)
- Specific time of day, morning or afternoon (for orders under $50,000 net)
- Delivery to a warehouse before delivery to its final destination (unless product is picked up at the warehouse)

Contact the Nucraft Customer Service team for availability and pricing on these services.

Freight Terms
Shipping charges for Nucraft products are prepaid for standard delivery in the continental United States. Standard delivery is defined as follows: Product is delivered on a 53' trailer being pulled by a long-haul tractor (total length of 85'). Facility will receive delivery Monday through Friday between the hours of 8:00 AM and 4:00 PM. Facility has docks with levelers and a fork truck for unloading. Product will be loaded on load bars two levels high. Receiving facility is responsible to have personnel on hand to unload the truck upon arrival, drivers do not unload. Delivery sites or times that do not meet this criteria will be accommodated, but will typically incur a charge to cover additional shipping costs. Please notify Nucraft in advance of the shipment if this is the case and the additional charge (if any) will be determined by Nucraft.

Product ships FOB dock. The customer obtains title to their product and materials, and assumes the risk of loss for them, upon shipment from Nucraft's facilities.

Storage
Nucraft has no storage facilities for finished product. If a customer cannot accept an order when it is ready for shipment, the customer must designate an alternative shipping address. If no address is provided, Nucraft may, at its discretion, transfer the product to storage. If product is transferred to an off-site storage facility, the customer may be charged for transportation to the facility and for any associated storage fees. Nucraft considers transfer of the product to a storage facility the equivalent of shipment, including invoicing and payment. Customers assume the risk of damage or loss during storage.

Transportation Times and Delays
Third party carriers that Nucraft contracts with will make reasonable efforts to accommodate requested delivery times and dates. Scheduled delivery appointments may, however, be delayed for a variety of reasons, including inclement weather, traffic, transportation equipment problems, and delays encountered at other delivery locations along the delivery route. Nucraft does not recommend scheduling activities that depend on the delivery appointment (for example, scheduling furniture installers to install furniture the day of the delivery appointment). Nucraft shall not be liable for any costs incurred as a result of a missed delivery appointment.

Shipment Damage Claims
Legal title to merchandise passes to the buyer upon acceptance by the carrier. **Inspect all cartons upon delivery.** Details of visible damage should be noted on the delivery receipt. Do not install product if damage is found upon inspection. The carrier should be notified by the buyer to inspect the merchandise, and file a claim immediately. If visible damage is not apparent, sign the delivery receipt "No visible damage." This will allow recourse for a concealed damage claim. Although most claims for transportation damages must be filed against the carrier within nine months of the date of delivery, concealed damage claims must be filed within 15 days of receipt.

Do not destroy packing materials until shipment has been inspected. Then proceed to file a claim with the carrier.

Failure to make any claims against Nucraft within 10 days shall constitute acceptance of the merchandise and a waiver of any defects, errors or shortages discovered upon inspection.

Cancellations
Cancellations must be reviewed by our Customer Service team. Because we build your products to order, orders cannot be cancelled once processing has begun. Processing includes but is not limited to development of shop drawings and other engineering drawings. If cancellation is approved, a processing fee of 20-100% will be assessed based on the status of the order.

Change Order Policy
Nucraft will make every attempt to honor any reasonable change request to product provided that the request is received prior to start of production. Change orders will be accepted only if the request is made in writing and received in time to make the change. Nucraft reserves the right to increase our acknowledged price and ship date if necessary to make the requested changes. Please submit any change order request to our Customer Service team. Nucraft will assess charges to the customer as stipulated in the following:

- Standard Orders: Change orders received prior to production will be charged $200 net to cover print and administrative costs.
- Special Orders: Change orders received prior to production will be charged $200 net to cover print and administrative costs. There may be additional costs associated with engineering labor required for the change order.
- Change orders received after production must be evaluated by Nucraft. If approved, the charge will be $200 net plus any restocking charges accumulated. There may be additional costs associated with engineering labor required for the change order.

General Information

Repair Authorization
Prior written approval is required for repairs of merchandise charged to Nucraft. Failure to do so will result in customer funded repairs.

Payment Terms
Terms consist of a 1% cash discount for payment within 10 days of invoice date, or payment of the net amount within 30 days of the invoice date (1% 10 days, net 30 days). Discount is not allowed on credit card payments.

Credit Card Payments
When paying by credit card (Visa, Mastercard or American Express), include the card number, expiration date, card holder name (printed) and card holder signature on the purchase order. A credit card payment form is available upon request. No cash discount allowed on credit card payments.

Warranty
Nucraft warrants that each piece of furniture it manufactures will be free from defects in materials and workmanship for a period of ten years of single-shift use. Textiles, decorative trim, electrical components, lamps, mechanical devices, casters and custom-made products not described in Nucraft's catalog are warranted for one year from the date of original delivery. Height adjustable desk mechanisms are warranted for two years. This warranty is applicable only if the furniture is given normal and proper care and is properly installed and maintained in an office environment. This warranty extends only to products manufactured and sold in North America and only to original purchasers acquiring new Nucraft products through authorized dealers, or from others specifically authorized by Nucraft to sell its products.

Nucraft's sole obligation under this warranty is to repair or replace, at Nucraft's discretion, products which prove to be defective during the warranty period. Purchasers may be required to establish that a claim is within the warranty period. To initiate a warranty claim, the purchaser should contact an authorized Nucraft dealer.

This warranty does not cover: 1) Damage caused by a carrier 2) COM (Customer's Own Material) specified by the customer that is not a standard product offering 3) Color, grain or texture of wood and other covering materials (due to the natural variations over which Nucraft has no control) 4) Damages resulting from user modification, attachments to a product, misuse, abuse, alteration or negligent use.

Nucraft extends no other warranties, expressed or implied, including warranty of merchantability or fitness for a particular purpose. Nucraft shall not be liable for loss of time, inconvenience, commercial loss, incidental or consequential damages.

Environmental Statement
Nucraft is committed to supporting responsible environmental policies and practices in all that we do. We strive for sustainability, weighing our business decisions against the costs to the ecological, social and economic systems they affect.

Our products are manufactured to meet the credit requirements of the U.S. Green Building Council's LEED rating systems in one or more of the following categories:

- Recycled Content
- Certified Wood
- Low-Emitting Materials

Computer Aided Planning
Nucraft products and pricing are available on CD via 2020 Cap, an AutoCAD®-based space planning tool.

2020 Cap is an integrated software system developed specifically for interior designers and facility planners to enhance workplace performance. This modern suite of applications works together seamlessly, in concert. Navigate catalogs, select products, design in plan view and 3D, assign options, create worksheets and build a project where you want, when you want. Take your pick. It's dynamic and interactive. Design projects are a work in progress. And now you can perform any of the many discrete tasks that go into a project any time, any place.

For additional information, you may contact 2020 Cap direct at 800-227-0038.

iSpec®
Nucraft offers a free online product configuration and specification service that saves you time and allows you to be creative while leaving the nuts and bolts to someone else. No specific software is required, nor is there any learning curve. This service applies to all Nucraft products. For additional information, call 1-877-NUCRAFT and ask for the iSpec Team or log on to www.nucraft.com/ispec.

Finish Information

Surface Materials Palette
We crafted our materials palette using the same demanding standards that distinguish our furniture. Thoughtful design and attention to every detail elevate your possibilities.

Anchored by Nucraft veneers, unrivaled for clarity, quality, and depth of finish, our collection of surface materails comprises a sophisticated set of balanced elements that supports your design vision.

Some elements have their roots in Nucraft's rich heritage. Other's are new materials and refelct current trends and taste. Together, they ensure that you're ready for today and positioned well for the future. Beautifully.

Custom Finishes
Nucraft specializes in expert custom finish matching. For a nominal upcharge we can provide custom finishes, and we are frequently asked to match the finishes of other furniture manufacturers. For orders over $5000 list, a finish sample will automatically be sent for approval prior to entering the order. Additionally, for finishes that appear unusual to match or for customers directly requesting a sample, a finish sample will also be sent for approval prior to entering the order.

Custom finishes requiring colored varnishes to create a painted look can only be applied to Maple veneer and require one extra week in addition to the standard leadtime. Nucraft's standard black finish (G82) can be applied to all Nucraft standard veneers. Walnut is the standard black veneer. Other species must be specified when ordering.

Custom finishes carry a 10% upcharge per item, per finish.

Do not add the finish upcharge to any item that is not wood. Example: casters, ganging connectors.

Treatments
Note: Default veneer sheen will vary per finish and were determined by a team of experts who reviewed the colorways to determine if gloss or matte best highlighted the natural characteristics of the species of wood and the color of the stain. Default finish is bolded on Page 8. If no direction is provided on incoming orders, default sheen will be selected.

Gloss: Gloss is a durable finish that tends to nicely mask normal wear and leaves wood grain visible to the eye. It achieves a medium gloss open pore appearance (40 – 50 sheen range). Finish numbers preceded by the letter "G" indicate a Gloss finish.

Matte: Like Gloss, Matte is durable, tends to nicely mask normal wear and leaves wood grain visible to the eye. It achieves a low luster, open pore appearance (10 – 20 sheen range). Finish numbers preceded by the letter "M" indicate a Matte finish.

Since each veneer type responds differently to both types of treatment, all will have a distinctive look and feel when finished. For example, a Walnut veneer with a Gloss treatment will remain much more textured than a Cherry veneer with the same treatment.

About the Wood
All Nucraft veneers are carefully selected for uniformity of color and grain. Still, wood is a natural substance and minor variations may occur due to its own uniqueness. Because of this, the furniture you receive may not be an exact match to our samples.

Nucraft takes great pride in our finish color consistency. However, wood is a natural product that will have color variation within a single piece of furniture, as well as from one piece to the next. Other factors also affect color over time, such as exposure to light (both intensity and duration). For example, lighter finishes cause more variation in colors over time.

In cases where a returning customer wants a precise match with existing furniture, we recommend sending a sample of the existing furniture finish. Please contact Nucraft Customer Service to determine an appropriate sample. This will ensure a finish match between old and new orders. This type of order is considered a control sample. There will be a 10% upcharge on an order of this type. Due to natural aging of veneers, natural finishes may vary.

Care and Maintenance of Wood Finishes
Our finish material is a crystal clear, urethane acrylic blend. This type of finish may be repaired in the field by a qualified refinisher.

Nucraft recommends using a damp cloth to clean your fine wood furniture. Always wipe with the grain of the wood. Should your wood furniture require a more thorough cleaning, we recommend using a mild cleaner such as Joy dish soap or Murphy's oil soap, thoroughly diluted in water (one part soap to thirty parts water). Water will not damage Nucraft's finish, but will leave surface spots when it dries. To avoid this, dry the surface with a soft cloth after it is cleaned. Marks that cannot be removed with the cleaning methods above may be able to be removed using naptha, a mild degreasing solvent.

Caution: while the use of polishes that contain wax, petroleum solvents or silicones may immediately enhance the "shine" of a product, it may also eventually remove the fine original finish applied in our factory. Silicone on the surface of wood may also make it very difficult to respray or refinish.

All Nucraft furniture is inspected and polished before it leaves our factory. In some instances, the packing materials may imprint on the factory polish. Cleaning and polishing the furniture once it is unpacked will normally restore the furniture to its original beauty.

In some cases, the rubber support feet used on the bottom of common office equipment (teleconferencing phones, laptops, microphones, copiers, etc.) can create unsightly marks in the surface of wood tops, due to oxidation of the lacquer finish. We suggest these machines be placed on a protective type of padding, such as felt.

Finish Information

Laminates
Selected Formica® and Nevamar® laminates are available on Training Tables, Conference Tables, Conference Room Furniture and select Occasional Tables. For standard laminate and wood pricing, refer to individual item pricing columns.

Non-Standard Laminates
To order a color other than those on our list (see Page 7), refer to Nevamar or Formica standard grade, matte texture laminate offerings (excluding manufacturers' non-standard matte offering). **Add $90 list per item for a non-standard solid, matrix or pattern.** Add 20% per color for woodgrain laminates (includes stained-to-match for remainder of unit to match laminate color). Add one week to the lead-time for all non-standard laminate orders. Call the Nucraft Customer Service team for quotes on premium grades and laminates. Mirror and metal laminates are not available.

Care and Maintenance of Laminate
Laminate surfaces may be cleaned with a damp cloth and ordinary soap or non-abrasive household liquid detergent. Dry the surface with a clean cloth or soft paper towel to prevent streaks from appearing.

Care and Maintenance of Metal
Metal surfaces can be wiped with a damp cloth and rubbed dry. A mild non-abrasive household liquid detergent can be used if necessary. Regular maintenance of metal components, including tightening of fasteners and light lubrication of moving parts, will extend the life of your furniture.

Care and Maintenance of Glass
Clear or frosted glass may be cleaned with commercial glass cleaner. Be sure to use a lint-free cloth if cleaning the frosted side of the glass.

Stone and Solid Surface Material
Despite its reputation for durability, natural stone can easily be broken during handling and/or installation if proper techniques are not followed. In addition, Nucraft is not responsible for the installation of natural stone or solid surface materials on its products. Therefore, installers specifically trained in the installation of these materials must be utilized to ensure a quality installation. Nucraft shall not be liable for any damages incurred during the handling and/or installation of natural stone or solid surface materials on its products.

Care and Maintenance of Granite
Granite surfaces may be cleaned with a damp cloth and ordinary soap or non-abrasive household liquid detergent. Dry the surface with a clean cloth or soft paper towel to prevent streaks from appearing.

Care and Maintenance of Leather
Genuine leather requires very little care. Nucraft recommends that leather be dusted regularly. If a more thorough cleaning is needed, use lukewarm water and a mild, non-abbrasive soap. Generate some lather and lightly rub the surface with cheesecloth. Rinse off any soap film with clean water and towel dry. The leather may dry dull. To restore the leather to a normal gloss, rub it with a clean towel. Never use furniture polish, oil, varnish or ammonia. Saddle soap may be used to prevent the leather from becoming brittle or cracked and to maintain the original supple finish.

Touch Up Finish Kits

Model #	Description	Price
KIT-M	Metal Kit	80
KIT-P	Paint Kit	80
KIT-S	Stain Kit	80

REQUIRED INFORMATION:
(ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)
- Kit model number
- Quantity of kits
- Specify finish (See Pages 6-7)

General Information:
- Touch-up kits must be ordered on a purchase order separate from Nucraft product due to Hazmat shipping

COM Specification

For COM orders please include the following:

- Name of customer
- Customer's purchase order number
- Model number and quantity of piece(s) to be covered
- Specify right-way or railroad application (railroad is the default if no selection is made)
- If fabric is a stripe or pattern, specify vertical or horizontal application
- Supplier's name, material number and description

YARDAGE ESTIMATING

All yardages in the price list are based on 54" wide plain (no match) fabric. The following is a guide for fabrics that are less than 54" wide or have a pattern match.

Fabric Less Than 54" Wide

For 50" wide fabrics allow 10% additional fabric
For 48" wide fabrics allow 15% additional fabric
For 45" wide fabrics allow 20% additional fabric
For 36" wide fabrics allow 50% additional fabric

For Pattern Match Fabrics

3" to 14" repeat allow 15% additional fabric
15" to 19" repeat allow 20% additional fabric
20" to 27" repeat allow 25% additional fabric
28" to 36" repeat allow 30% additional fabric

Nucraft may add a charge for sewing, cutting and matching unusual COM or COL materials to cover additional costs. Call customer service for pricing.

It is the sole responsibility of the customer to determine that the fabric is appropriate for the application in which it will be used. Once COM/COL is accepted, Nucraft assumes no responsibility for its overall appearance, flammability, normal durability, color fastness or any other quality after upholstered on a Nucraft product beyond our normal quality standards.

FIRE RESISTANCE

All Nucraft benches incorporating upholstery fabrics meet California Technical Bulletin 116/117 and BIFMA X5.7 - Voluntary Upholstered Furniture Flammability Standard for Non-Residential, Non-Live-In Occupancies.

COM LEATHER SPECIFICS

The following is a guide for specifying leather requirements. The guide is based on the following general information.

A full "domestic" hide is approximately 50-60 square feet. A specialty or calf hide is approximately 35 square feet. Of this footage there are various non-usable areas included in the hide's size. Conversion of fabric yardage to leather is approximately 1 yard = 18 square feet.

Bench Requirements

48" benches will require 1/2 domestic hide or 1 full calf hide.

60" benches will require 1 domestic hide or 2 calf hides.

72" benches will require approximately 1 full domestic hide or 3 calf hides.

The boxing around the seat, if required, will have 4-6 seams that will be placed aesthetically based on the yield and usable remains of the hides.

Aerial® Refreshed Planning Guide

Stanchion-Mounted Overheads. Aerial's concealed stanchion construction for its overheads eliminates the need for overhead end panels, giving overheads a light, open-ended appearance without any worksurface obstruction. The result is the clean look of wall-mounted overheads with the flexibility of freestanding casegoods.

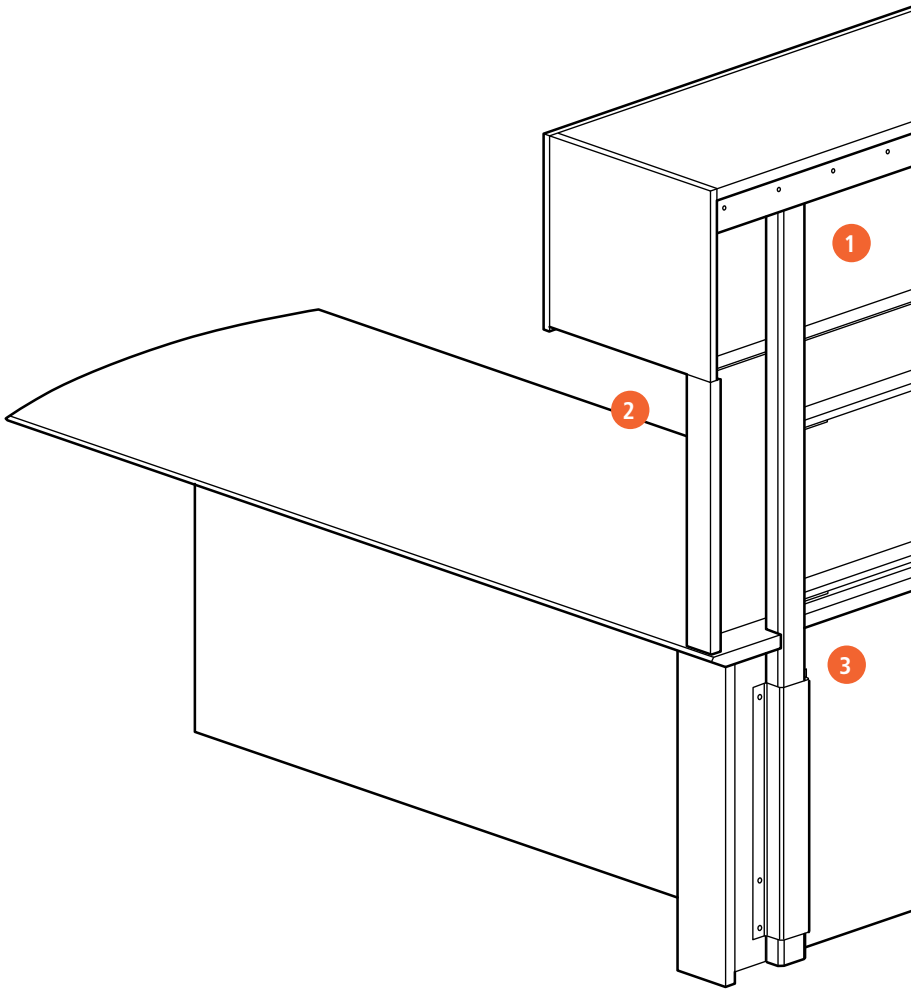
1 **Construction.**
Concealed stanchions support overheads.

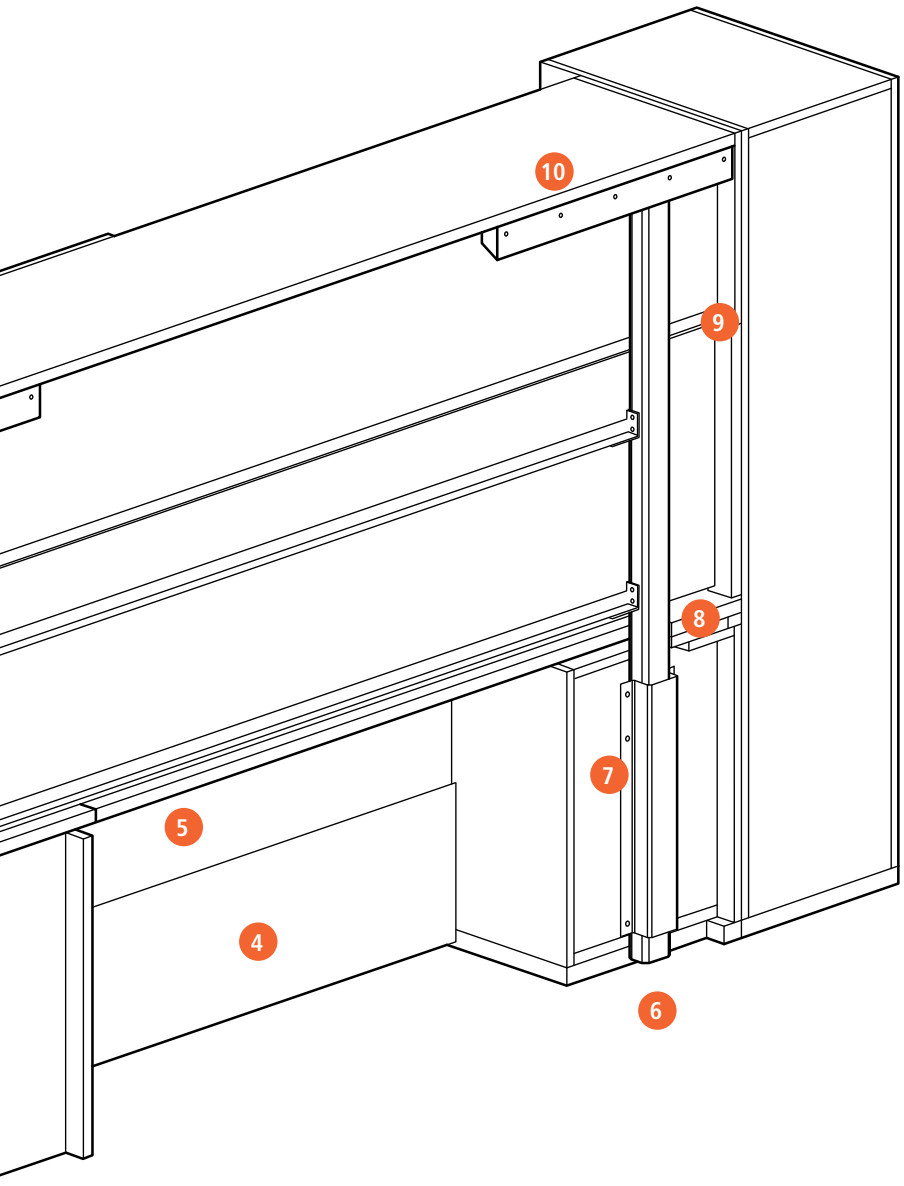
2 **Open Ends.**
Stanchion construction allows open-ended worksurfaces below overheads.

3 **Wire Management.**
Half-moon openings on Aerial corner supports offer additional wire-management flexibility.

4 **J-Channel Wire Management Trough.**
J-Channel wire management trough is attached to the bottom of the back panel and acts as wire catcher, preventing wires from being exposed underneath the back panel.

5 **Interior Cavity.**
Interior cavity provides ample room for routing power and data cables.





6 **Stanchion Leveling.**
Glide allows stanchions to be leveled.

7 **Mounting Bracket.**
Stanchion mounting bracket secures stanchion to case.

8 **Leveling Score Marks.**
Score marks are provided on stanchions for easy leveling to the worksurface during installation.

9 **End Caps.**
End caps conceal stanchions while maintaining a clean, flush-to-the-wall appearance.

10 **Overhead Mounting.**
Overheads are simply mounted to stanchions with wooden cleats.

Technology Accommodation

Aerial provides well-planned wire-management for each component. Its standard technology accommodation offering meets most needs, and additional, scalable options are available to support even the most technology-intensive environments.

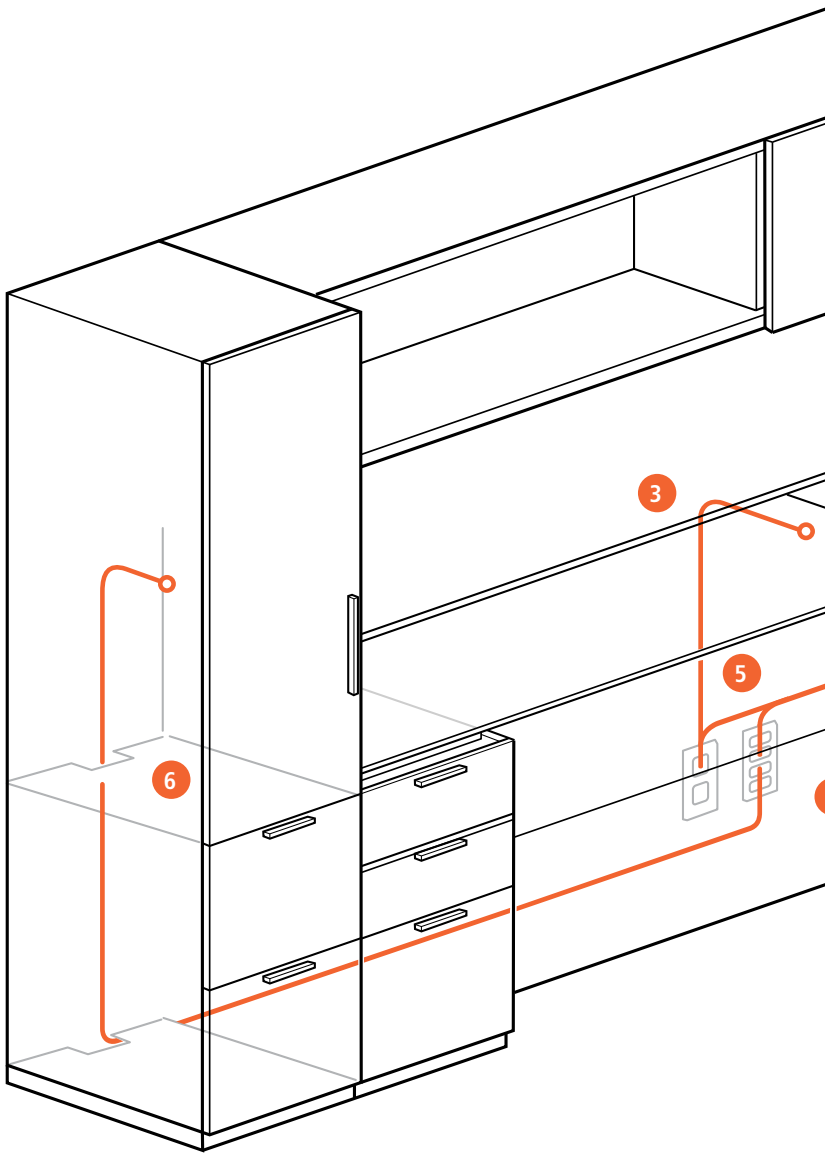
1 **Worksurface Grommets.**
Grommets can be specified on the worksurfaces of desks, credenzas, bridges, and returns. Grommets can be specified in right, left, or center positions of desks, credenzas and returns, and in center position on bridges.

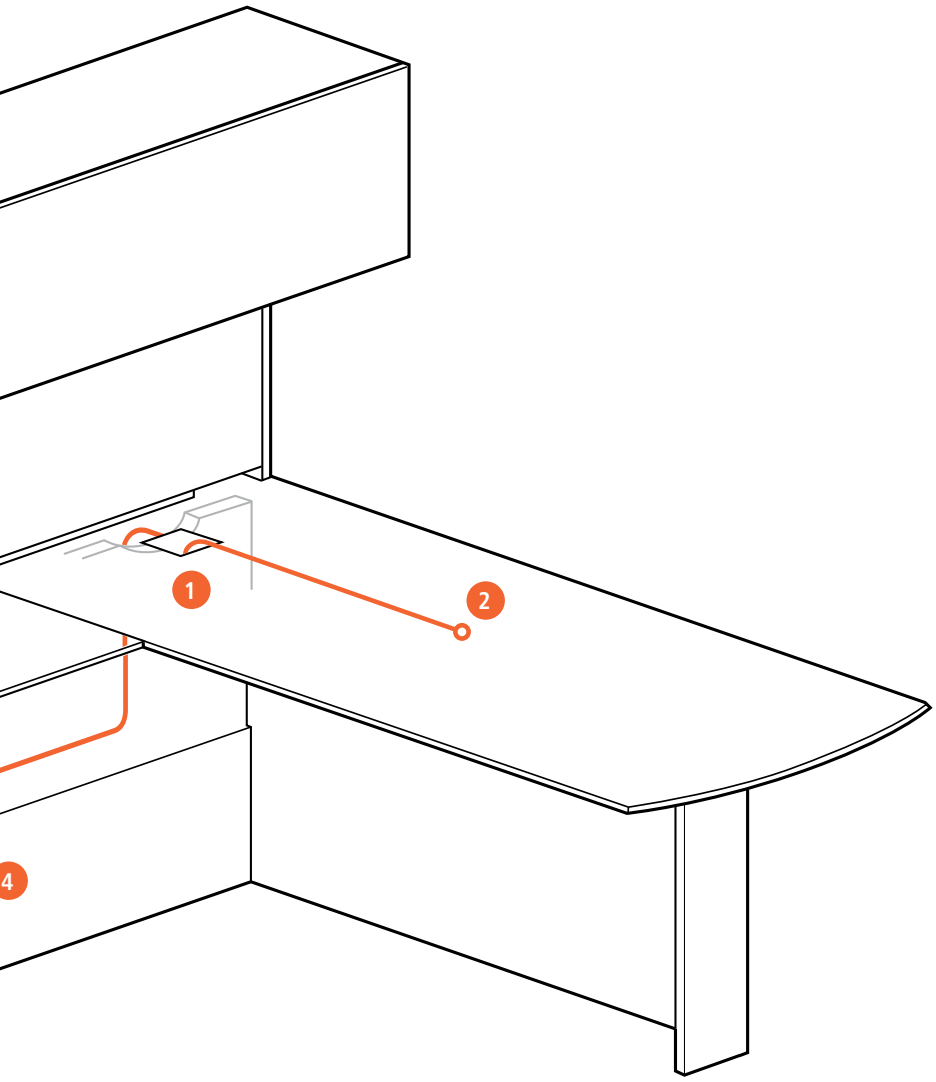
2 **J-Channel.**
J-Channel provides wire management beneath Aerial worksurfaces.

Optional Technology Accommodations

Tech Node.
The Tech Node offers worksurface-height power and voice/data connections. A flip-open door conceals two electrical outlets and two voice/data cutouts. Mini-ports can be specified in right, left, or center positions on desks, credenzas, returns, and in center position on bridges.

Technology Pedestal with Power Drawer and Door
Wire management openings are located in the bottom of all pedestals. Opening on back of pedestal on credenzas and returns provides proper ventilation. Tech Pedestals on desks have oversized opening on user's side that allows wire management in addition to ventilation.





3 Wire Pass Through.
A 2" high Wire Pass-Through is located between the veneer panel/tackboard and the worksurface. The Wire Pass-Through extends nearly the entire length of the worksurface, allowing wire management anywhere the user requires it.

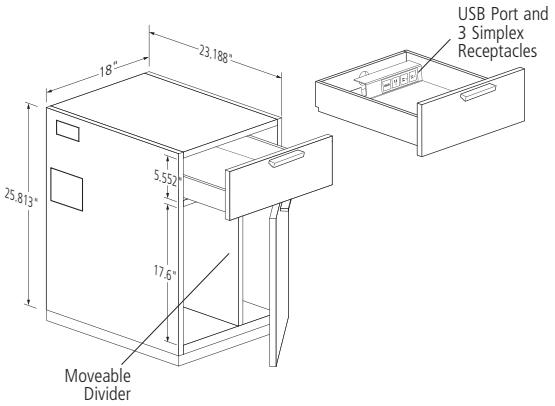
4 Wire Management Cavity.
The cavity behind Aerial Overheads and corresponding credenzas, returns and bridges allows simple wire management.

5 Access Panels.
Optional flip-down wire management Access Panel is available on back credenzas, returns, and bridges. A J-Channel wire management trough - attached to the bottom of the back panel - acts as a wire catcher, preventing wires from being exposed underneath the back panel.

6 Towers.
Openings located in the rear of shelves and in the bottom of the tower allow vertical wire management.

Tech Pedestal with Power Drawer and Door

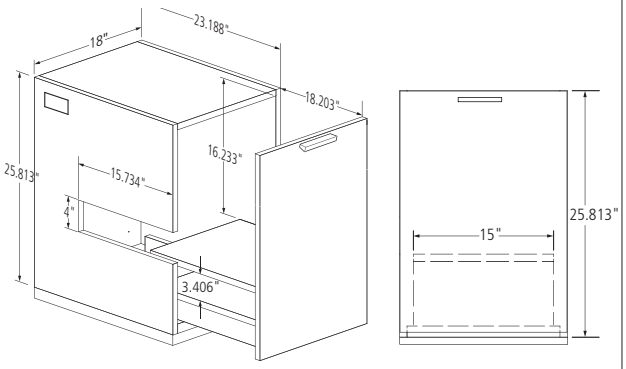
The Tech Pedestal provides CPU storage on one side of a moveable dividing panel, and an open section on the other side for cord/cable storage. Thermostatically controlled fan provides temperature regulation. The top drawer includes three simplex receptacles and one USB port. Grommet at the base allows easy wire management. Opening on the side of pedestal provides proper ventilation. Tech Pedestals on desks have oversized opening on user's side that allows wire management in addition to ventilation.



Printer Pedestal

The Printer Pedestal accommodates most inkjet printers. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. Grommet in bottom and side of pedestal provides easy wire management.

Consult Printer Pedestal dimension information to ensure that the pedestal will accommodate your printer.

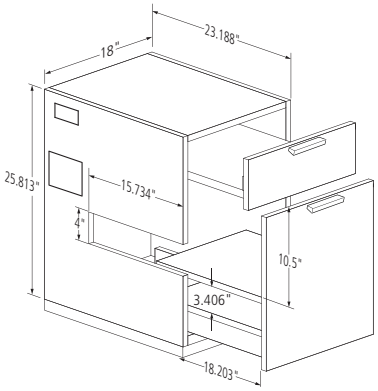


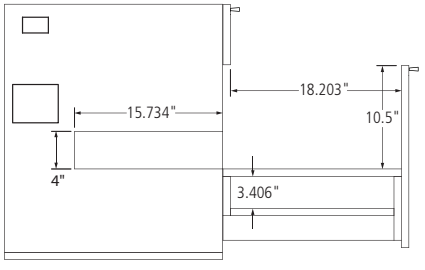
Front Elevation

Laptop/Printer Pedestal

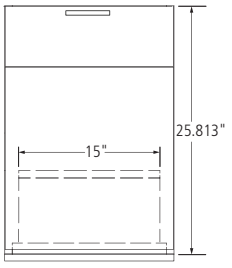
The Laptop/Printer Pedestal provides laptop storage in the top drawer and accommodates most inkjet printers in the lower drawer. The laptop drawer provides convenient storage and concealment of your laptop, freeing up valuable worksurface space. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. Grommet in bottom and side of pedestal provides easy wire management. Thermostatically controlled fan provides temperature regulation.

Consult Laptop/Printer Pedestal dimension information to ensure that the pedestal will accommodate your printer.





Side Elevation



Front Elevation

Laminate Worksurfaces Hardwood Edge

Please be aware that the hardwood edge on laminate worksurface will appear different based on configuration. Please consult the drawings below which illustrate the appearance of visible hardwood edges with a double-line.

T-shaped

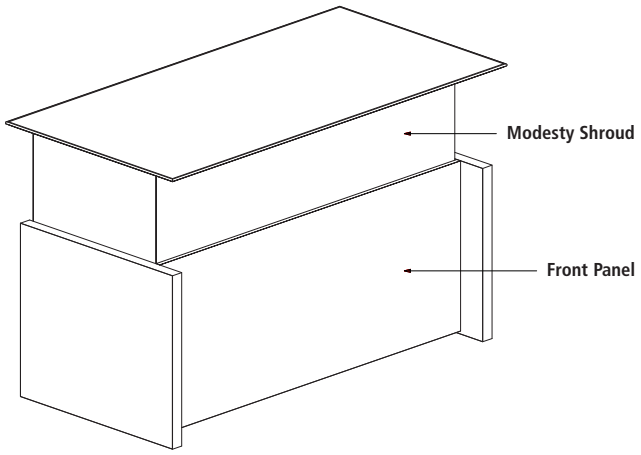
Adjustable Height Desks.

The electronic Adjustable Height Aerial Refreshed desk is available in two standard base styles; a desk shell and a metal leg version. Both versions are Freestanding desks and can be integrated into other product configurations through the Nucraft iSpec service. The Metal Leg version is also available as a Run-Off desk for T-Shaped applications.

Freestanding Adjustable Height Desk Shell

This rectangular desk shell features two panel legs and an inset full-height front modesty panel. The lift columns attach to the desk shell and are shrouded on the interior with veneer panels. When in the raised position, a 3-sided modesty shroud maintains the clean, integrated aesthetic.

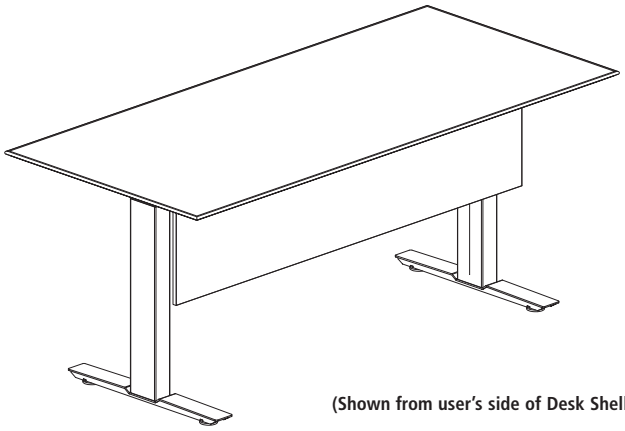
- Adjustment range is from 29-1/2" to 45"
- Controller features digital height readout and four programmable stops.
- See page 22 for available sizes and specification requirements.
- Lift mechanisms are designed to support all desk components, plus a maximum of 50lbs of additional weight.



Freestanding Adjustable Height Desk

This rectangular worksurface features a T-leg metal base and an optional half-height modesty.

- Adjustment range is from 27-1/2" to 46"
- Controller features digital height readout and four programmable stops.
- See page 23 for available sizes and specification requirements.
- Lift mechanisms are designed to support all desk components, plus a maximum of 50lbs of additional weight.



(Shown from user's side of Desk Shell)

Programmable Controller

The programmable controller features up/down buttons, four programmable preset stops, and a digital readout that displays the worksurface height.

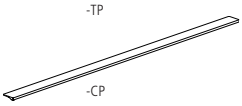
-WP

-TP



-CP

Options:

Modesty Panel		
- Painted Modesty Panel - Half High	-MPPH	$580
- Wood Modesty Panel - Half High	-MPWH	$580
- Painted Modesty Panel - Full High	-MPPF	$695 (Only available with Inset Panel Leg)
- Wood Modesty Panel - Full High	-MPWF	$695 (Only available with Inset Panel Leg)
Rectangle Grommet (Worksurface)		
- Left	-GL	$130
- Right	-GR	$130
- Center	-GC	$130
- Left & Right	-G2	$260
No Locks (Pedestals)	-NL	$0
Polished Chrome Pedestal Pulls		
- Wedge and Tab Pulls	-PCP	$120 (per Pedestal)
- Continuous Pulls	-PCP-CP	$340 (per Pedestal)
Polished Chrome Rectangular Metal Leg	-PCL	$283

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)
See pages 6-7 for surface material options.
- Choose Paint Color selection, if applicable
- Choose Metal Finish, if applicable
- Choose Wood Species & Finish
- Choose Laminate, if applicable
- Choose Pull option for Pedestals: Wedge Pull (-WP), Tab Pull (-TP) or Continuous Pull (-CP)

General Information:
- Two worksurface supports must be specified; One Support MUST be a Corner Support
- When specifying left and right, handedness is oriented to the user
- Full height modesty panel option only available with Inset Panel Leg (PL-2); MUST specify a Corner Support on one side
- Inset Panel Leg finish must match Full height modesty panel finish
- Meeting End Extended Corner Desks may only be specified with Metal Leg base
- D-Top Extended Corner Desks may be specified with any support except the full depth panel leg
- Worksurface Height: 29-1/2"
- Edge Profile: Radius Knife
- Face locking standard on all desk pedestals
- Tech Pedestal w/ Power Drawer and Door includes one USB port and three simplex outlets in top drawer
- Printer Pedestals, Laptop/Box/File and Laptop/Printer Pedestals must be located adjacent to knee space
- 18"-wide pedestals accommodate side-to-side and front-to-back letter filing and side-to-side legal filing
- Modesty Panels are 12" high and are mounted beneath worksurfaces with a 1" gap between the bottom of the worksurface and the top of the modesty panel
- Grommets are 4x4 square with a clear anodized finish and wire gap brush
- Work surface tops and storage fronts will be grain-matched sets based on configuration

Options:

Rectangle Grommet (Worksurface)		
- Left	-GL	$130
- Right	-GR	$130
- Center	-GC	$130
No Locks (Pedestals)	-NL	$0
Polished Chrome Pedestal Pulls		
- Wedge and Tab Pulls	-PCP	$120 (per Pedestal)
- Continuous Pulls	-PCP-CP	$340 (per Pedestal)

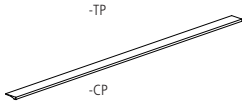
-WP

-TP



-CP

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)
See pages 6-7 for surface material options.
- Choose Paint Color selection, if applicable
- Choose Metal Finish, if applicable
- Choose Wood Species & Finish
- Choose Laminate, if applicable
- Choose Pull option for Pedestals: Wedge Pull (-WP), Tab Pull (-TP) or Continuous Pull (-CP)

General Information:
- Must specify a minimum of one support at the end of the desk
- When specifying left to right, handedness is oriented to the user
- Worksurface Height: 29-1/2"
- Edge Profile: Radius Knife
- Face locking standard on all desk pedestals
- Tech Pedestal w/ Power Drawer and Door includes one USB port and three simplex outlets in top drawer
- Printer Pedestals, Laptop/Box/File and Laptop/Printer Pedestals must be located adjacent to knee space
- 18"-wide pedestals accommodate side-to-side and front-to-back letter filing and side-to-side legal filing
- Run-Off Returns over 54" may not be available in wood grain laminate (call customer service for availability of cross grain laminate)
- Grommets are 4x4 square with a clear anodized finish and wire gap brush
- Work surface tops and storage fronts will be grain-matched sets based on configuration

General Information & Options

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

See pages 6-7 for surface material options.

- Choose Glass Finish, if applicable
- Choose Metal Finish, if applicable
- Choose Wood Species & Finish

General Information:

- Markerboards, Tackboard, Veneer Magnetic Board, Glass Magnetic Board, Tackboard/Veneer or Tackboard/Marker combinations must be specified with stanchion-mounted overheads
- No upcharge for Veneer Magnetic Boards, Tackboard/Veneer, Marker/Veneer combinations
- Markerboard, Tackboard, Veneer Magnetic Boards, Tackboard/Veneer, Markerboard/Veneer, or Markerboard/Tackboard combinations must equal the length of the corresponding overhead
- Glass Magnetic Board must equal the length of the corresponding overhead
- Glass Magnetic Boards greater than 96" will have an even split two piece construction
- Glass Magnetic Boards are only available in gloss finish options
- Tackboards greater than 96" will have an even split two piece construction
- Veneer Magnetic Board assumed unless Tackboard, Markerboard, or Glass Magnetic Board is specified
- Magnets are included with Veneer Magnetic Boards and Glass Magnetic Boards
- See Page 8 for fabric restrictions

General Information & Options

Options:

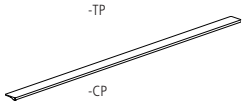
Tower Locks	-LO	$142
Polished Chrome Pedestal Pulls		
- Wedge and Tab Pulls	-PCP	$120 (per Tower)
- Continuous Pulls	-PCP-CP	$340 (per Tower)

-WP

-TP



-CP

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

See pages 6-7 for surface material options.

- Choose Paint Color selection, if applicable
- Choose Metal Finish, if applicable
- Choose Wood Species & Finish
- Choose Pull option for Pedestals: Wedge Pull (-WP), Tab Pull (-TP) or Continuous Pull (-CP)

General Information:

- When ordered with optional locks, both drawers and doors will be locking
- Towers feature integrated vertical wire management
- For Two Lateral Files with Upper Shelf/Closed Door combo units, specify (L) for door on left with left door swing; specify (R) for door on right with right door swing.
- 84" Towers standard with a hat shelf
- Freestanding 12"-wide (or smaller) towers must be fastened to the adjacent case

Cavara® Planning Guide

Cantilever Stanchion-Mounted Overheads.

Cavara's concealed stanchion construction for its overheads eliminates the need for overhead end panels, giving overheads a light, open-ended appearance without any worksurface obstruction. The cantilever overhangs half the unit giving the illusion of a floating overhead. The result is the clean look of wall-mounted overheads with the flexibility of freestanding casegoods.

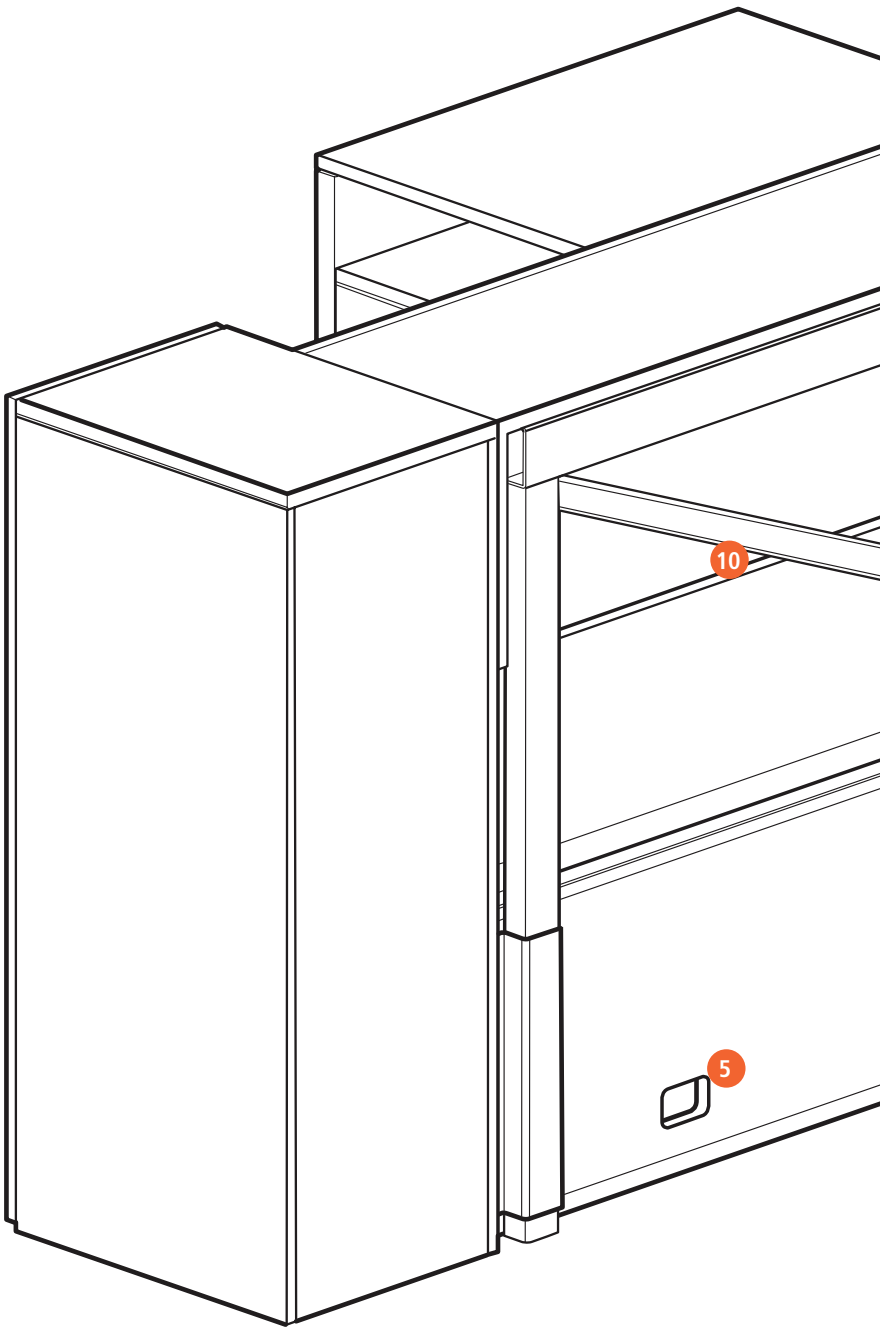
1 **Construction.**
Concealed stanchions support cantilever overheads.

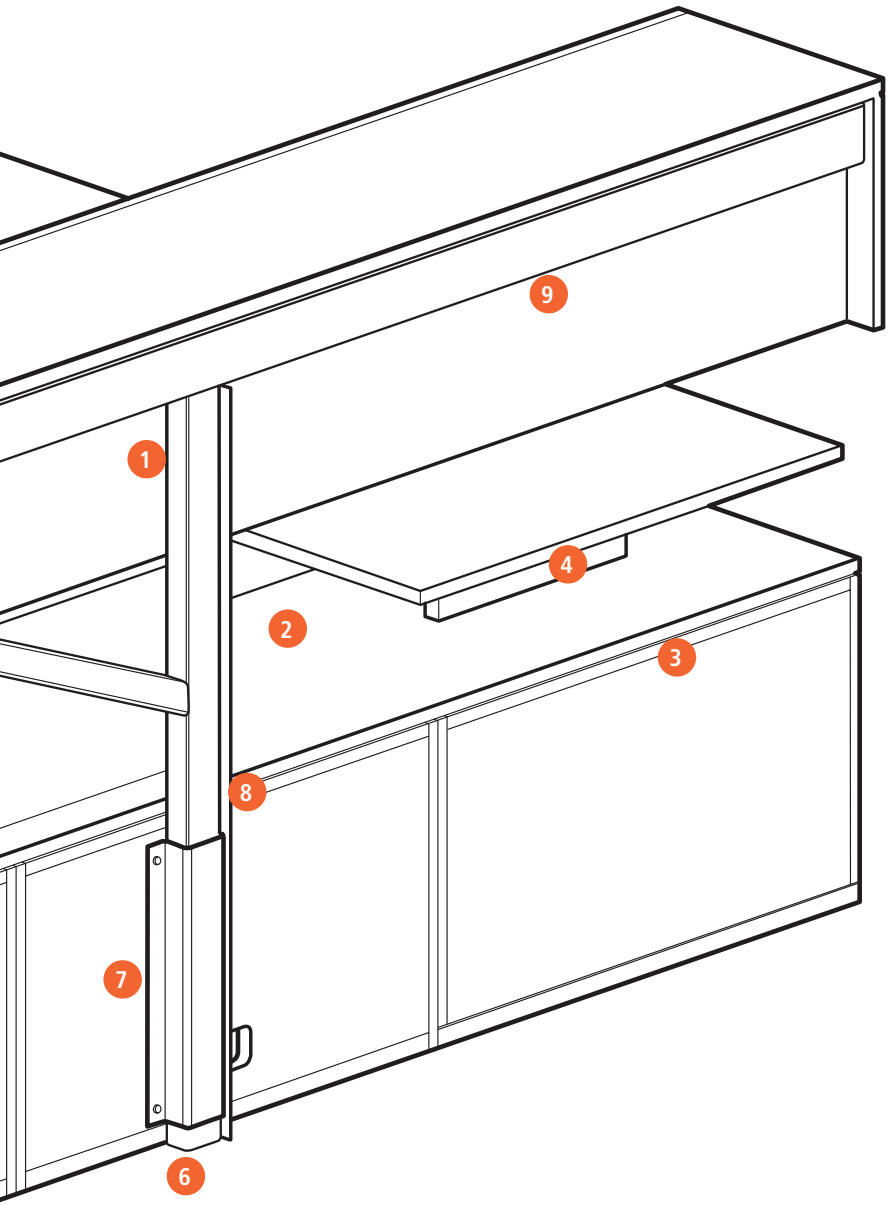
2 **Open Ends.**
Stanchion construction allows open-ended overheads and worksurfaces below overheads.

3 **Wire Management.**
2" opening on cantilever portion offer additional wire-management flexibility.

4 **Wire Management Cutout in Desk.**
Wire management cutout on desk stand-off allows cords and cables to route through the desk to the back opening of the lower storage cases.

5 **Interior Cavity in Low Credenza.**
Cutout opening provides ample room for routing power and data cables through lower storage cases.





6 **Stanchion Leveling.**
Glide allows stanchions to be leveled.

7 **Mounting Bracket.**
Stanchion mounting bracket secures stanchion to case.

8 **Leveling Score Marks.**
Score marks are provided on stanchions for easy leveling to the worksurface during installation.

9 **Overhead Mounting.**
Overheads are simply mounted to stanchions with French cleats.

10 **Structural Integrity.**
Cantilever support is engineered to achieve a beautiful aesthetic while maintaining structural integrity.

Technology Accommodation.

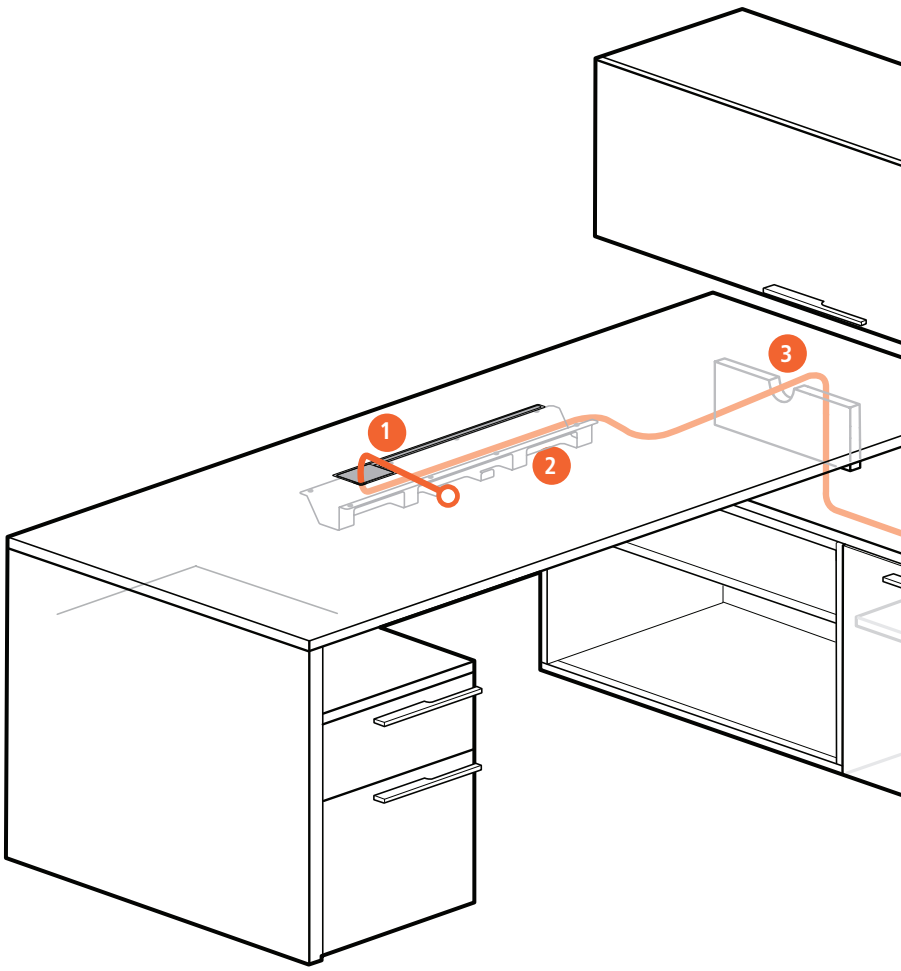
Cavara provides well-planned wire-management for each component. Its standard technology accommodation offering meets most needs, and additional, scalable options are available to support even the most technology-intensive environments.

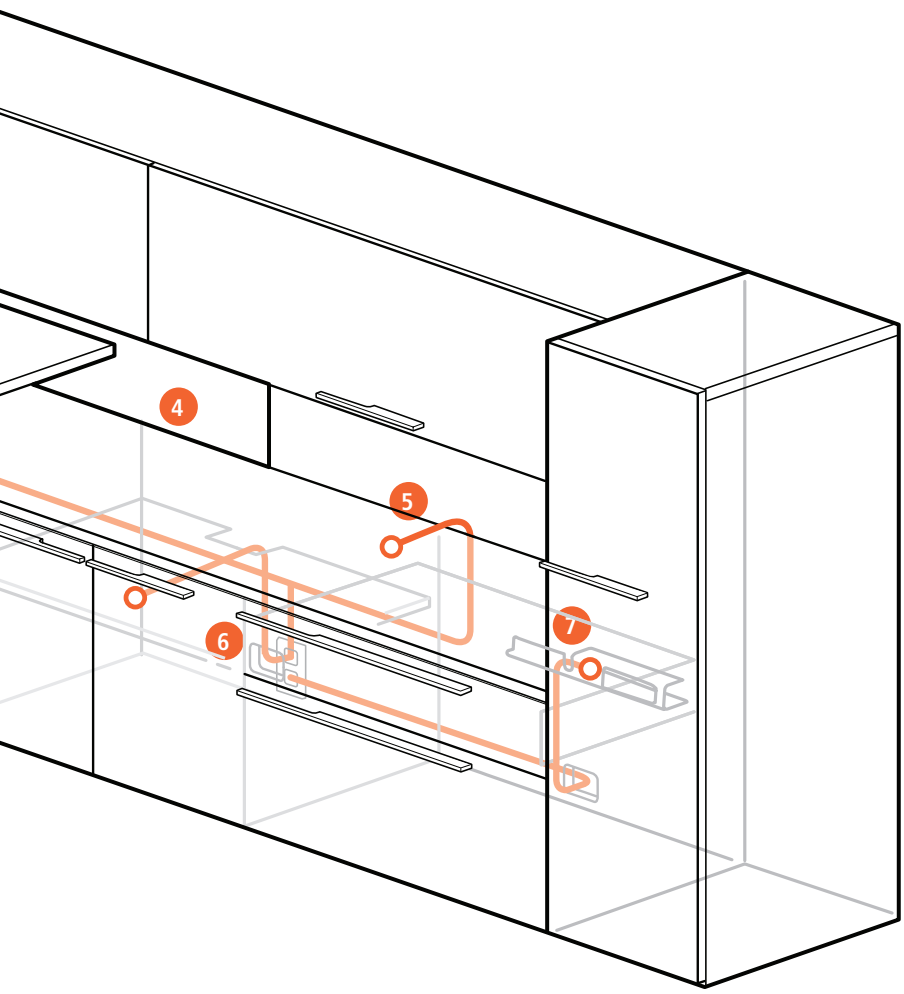
1 **Slim Grommet.**
Power and data cables can be routed through the worksurface grommet to the wire management trough below the surface. The slim grommet has a 3" x 4" opening at one end to allow for cord plugs to easily route through the grommet. The same 3" x 4" square grommet is available on all credenzas and meeting end tops.

2 **Wire Management Trough.**
The wire management trough houses and routes cords and cables to the cutout location in the stand-off. Several openings are cutout of the trough to allow for easy access to power and data cords.

3 **Wire Management Cutout in Desk.**
Wire management cutout on desk stand-off allows cords and cables to route through the desk to the back opening behind the lower storage case.

4 **Wire Management Behind Storage.**
2" opening on cantilever portion offers additional wire-management flexibility behind the Low Credenza storage.





5 **Continuous Wire Pass Through.**
Power and data cables can drop off the back surface at any location for continuous wire management below the tack zone.

6 **Wire Management Cutout in Storage.**
Cutout opening provides ample room for routing power and data cables through lower storage cases.

7 **Power Option in Box Drawers.**
Optional power access utilizes USB and simplex receptacles in the box drawer to allow for concealed storage of equipment while they are charging within the drawer case.

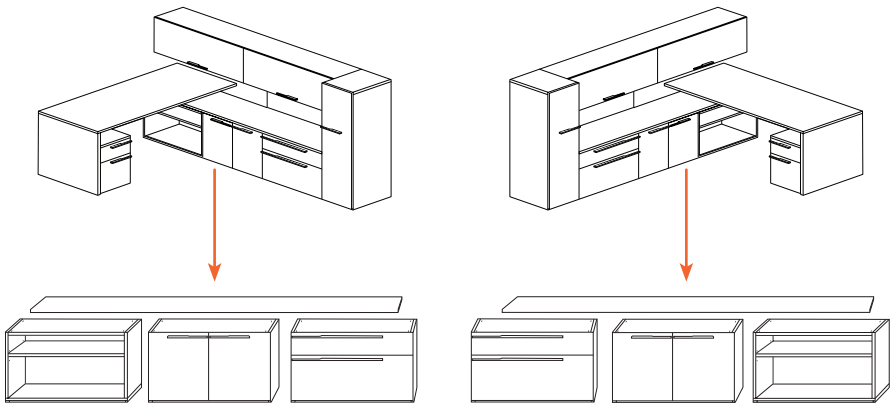
Simple Reconfiguration. The reconfigurable nature of Cavara allows end user flexibility, streamlines the design and specification process, and allows for future growth as needs change within an environment.

Non-Handed and Modular Components

Cavara has non-handed and modular components that allow for easy reconfiguration from a left-handed station to a right-handed station.

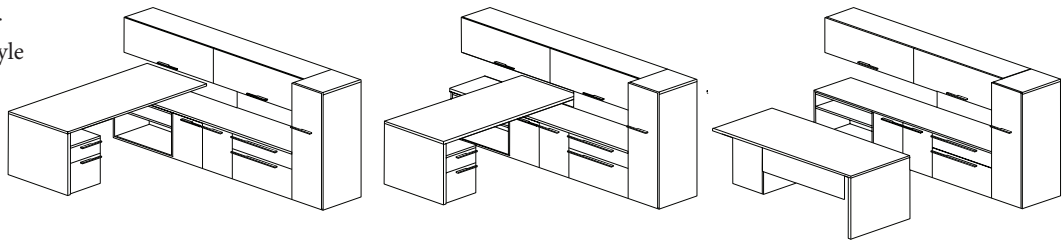
Low Credenza storage units can be rearranged in any configuration after the initial installation.

Pulls can rotate from right to left.



End User Reconfiguration

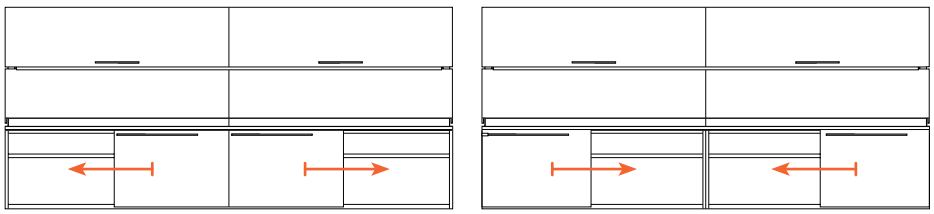
The end user can rearrange their workstation to suit their work style best; L-shape to a T-shape to a Freestanding application with the same kit of parts



Ultimate Flexibility

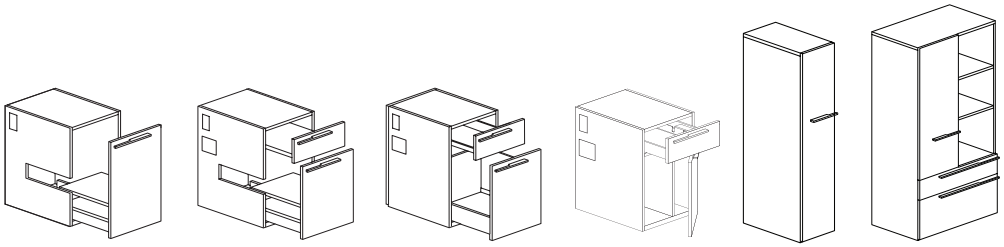
Utilize Sliding Door Low Credenza units for ultimate flexibility

Simply slide the door from right to left for inbound or outbound orientation



Handed Exceptions

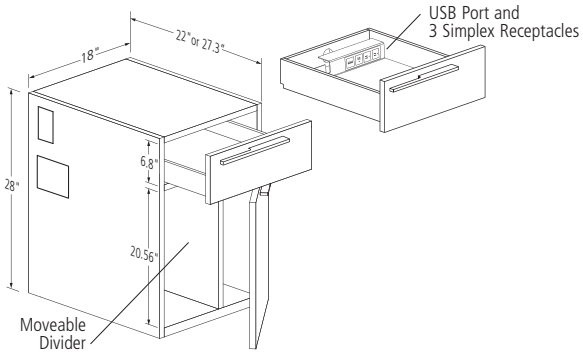
**Note: Due to their unique function, some components are handed*



Printer Pedestal | Laptop/Printer Pedestal | Laptop/Utility Pedestal | Tech Pedestal | Towers with Single Doors

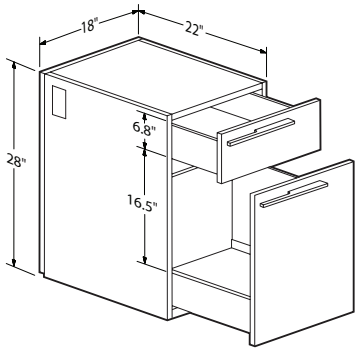
Tech Pedestal with Power Drawer and Door

The Tech Pedestal provides CPU storage on one side of a moveable dividing panel, and an open section on the other side for cord/cable storage. The top drawer includes three simplex receptacles and one USB port. Grommet at the top allows easy wire management. Thermostatically controlled fan provides temperature regulation. Tech Pedestals on desks have oversized opening on user's side that allows wire management in addition to ventilation.



Tech Pedestal with Power Drawer and Utility Drawer

The Tech Pedestal provides tote storage or laptop bag storage in the Utility Drawer. The top drawer includes three simplex receptacles and one USB port. Grommet at the top allows easy wire management. Tech Pedestals on desks have oversized opening on user's side that allows wire management in addition to ventilation.

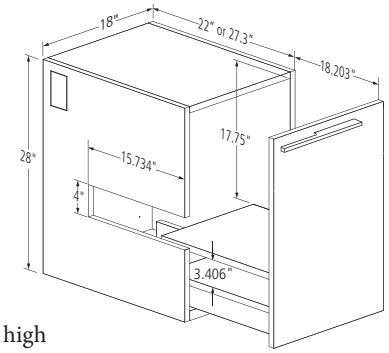


Printer Pedestal

The Printer Pedestal accommodates most inkjet printers. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. Grommet in top and side of pedestal provides easy wire management.

Consult Printer Pedestal dimension information to ensure that the pedestal will accommodate your printer.

Printer Tray Dimensions: 15" wide x 19" deep x 16.1875" high

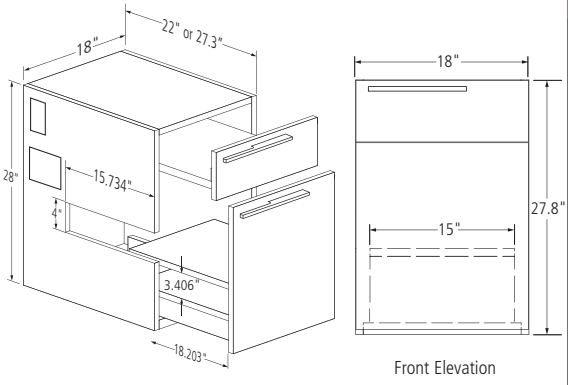


Laptop/Printer Pedestal

The Laptop/Printer Pedestal provides laptop storage in the top drawer and accommodates most inkjet printers in the lower drawer. The laptop drawer provides convenient storage and concealment of your laptop, freeing up valuable worksurface space. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. Grommet in top and side of pedestal provides easy wire management. Thermostatically controlled fan provides temperature regulation.

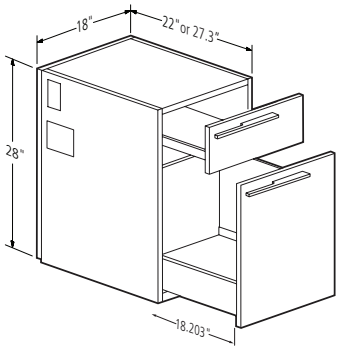
Consult Printer Pedestal dimension information to ensure that the pedestal will accommodate your printer.

Printer Tray Dimensions: 15" wide x 19" deep x 12.125" high



Laptop Utility Pedestal

The Laptop/Utility Pedestal provides laptop storage in the top drawer and accommodates laptop bag storage in the lower drawer. The laptop drawer provides convenient storage and concealment of your laptop, freeing up valuable worksurface space. Grommet in top and side of pedestal provides easy wire management. Thermostatically controlled fan provides temperature regulation.



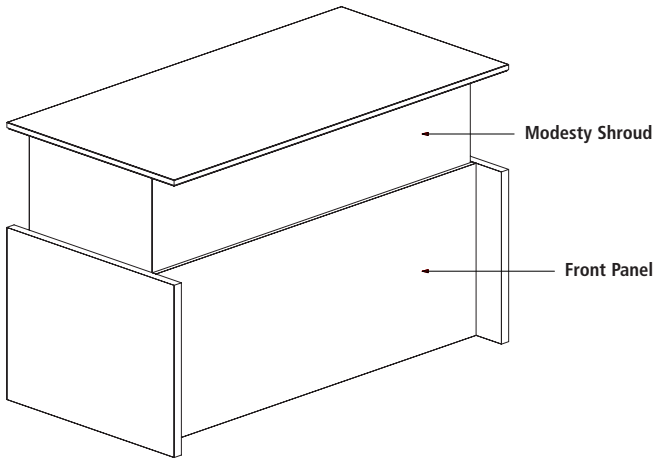
Adjustable Height Desks.

The electronic Adjustable Height Aerial Refreshed desk is available in two standard base styles; a desk shell and a metal leg version. Both versions are Freestanding desks and can be integrated into other product configurations through the Nucraft iSpec service. The Metal Leg version is also available as a Run-Off desk for T-Shaped applications.

Freestanding Adjustable Height Desk Shell

This rectangular desk shell features two panel legs and an inset full-height front modesty panel. The lift columns attach to the desk shell and are shrouded on the interior with veneer panels. When in the raised position, a 3-sided modesty shroud maintains the clean, integrated aesthetic.

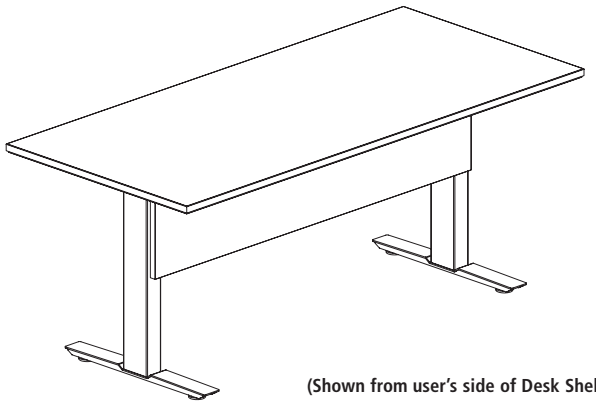
- Adjustment range is from 29-1/2" to 45"
- Controller features digital height readout and four programmable stops.
- See page 87 for available sizes and specification requirements.
- Lift mechanisms are designed to support all desk components, plus a maximum of 50lbs of additional weight.



Freestanding Adjustable Height Desk

This rectangular worksurface features a T-leg metal base and an optional half-height modesty.

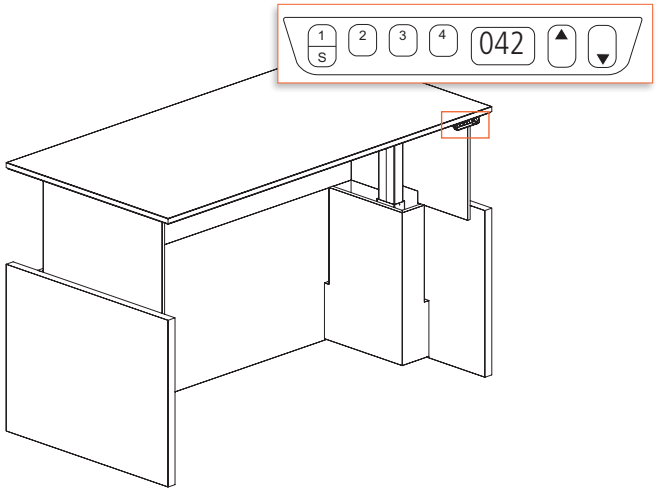
- Adjustment range is from 27-1/2" to 46"
- Controller features digital height readout and four programmable stops.
- See page 89 for available sizes and specification requirements.
- Lift mechanisms are designed to support all desk components, plus a maximum of 50lbs of additional weight.



(Shown from user's side of Desk Shell)

Programmable Controller

The programmable controller features up/down buttons, four programmable preset stops, and a digital readout that displays the worksurface height.



Low Height Applications.

Cavara is available in two application planes: Low Height and Standard Height. Low Height applications are layered over a Low Credenza.

Create a Layout.

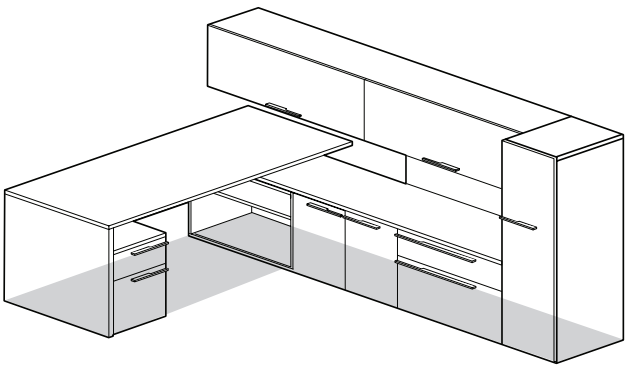
There are five primary types of Cavara workstation configurations: L-Shape, T-Shape, U-Shape, F-Shape and Freestanding. Two application planes are also available in these application shapes: Low Height and Standard Height Applications. The specification process is outlined in the following pages with additional detail devoted to components.

L-Shape Configuration – Low Height & Standard Height

Step 1. Select a Configuration

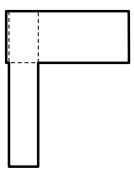
It's important to first choose whether a Low Height or a Standard Height application will best suit the end user's aesthetic preference, work styles, space, storage and furniture requirements. Low Height applications are layered over a Low Credenza and Standard Height applications are on the same plane.

Low Height

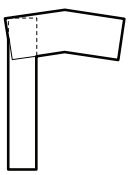


The L-Shape Low Height consists of a Run-Off Desk with a panel leg as the end support and a Low Credenza supporting the other side.

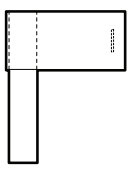
**Note: Additional shape Run-Off Desks are available: Rectangle, Angle, or Meeting End Top*



Low L-Shape Rectangle

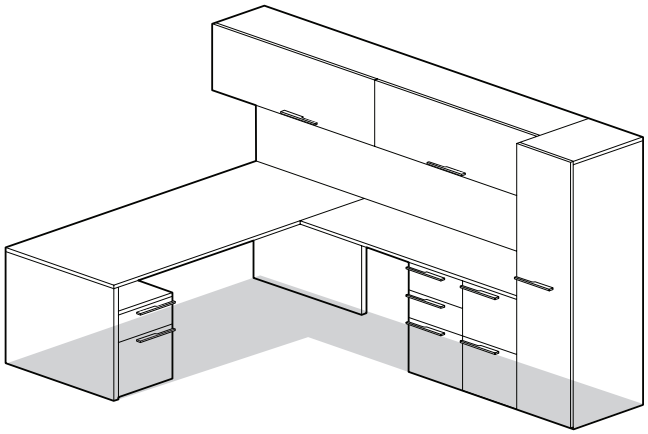


Low L-Shape Angle



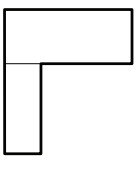
Low L-Shape Meeting End

Standard Height

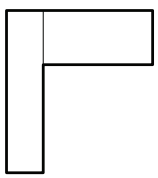


The L-Shape Standard Height consists of a Single Pedestal Desk or Desk Shell with a Return (shown above) or a Side Credenza with a Run-Off Desk or an Extended Corner Desk with a Return.

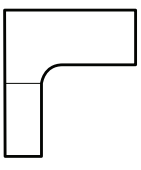
**Note: Additional shape Run-Off Desks are available: Rectangle, Angle, or Meeting End Top*



Standard Single Ped L-Shape



Standard Run-Off L-Shape

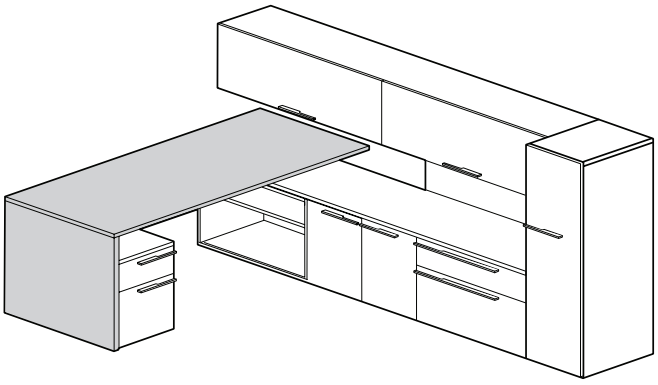


Standard Ext Corner L-Shape

Step 2. Select a Desk

Once you've determined which type of L-Shape configuration will serve as the basis of your Cavara workstation, you're ready to specify your first individual component: The Desk.

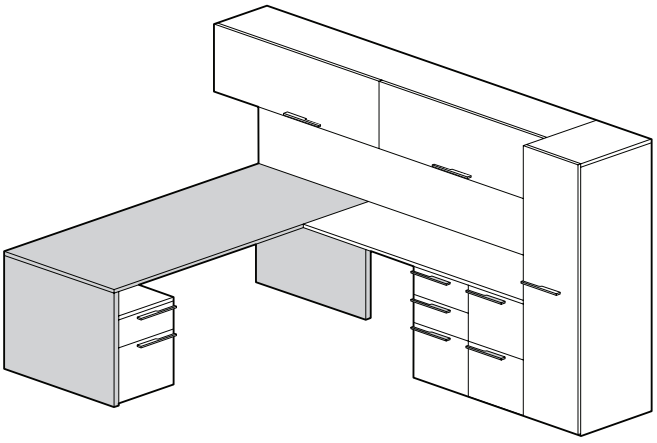
Low Height



The L-Shape with Low Height configuration features a Run-Off Desk for use with Low Credenza (shown on left).

The Run-Off Desk (for use with Low Credenzas) includes the worksurface, stand-off, and metal modesty/privacy panel. Select desired support to complete the desk (see page 101 for supports).

Standard Height



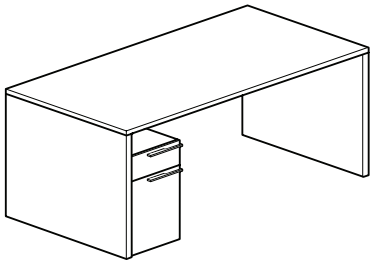
The L-Shape with Standard Height configuration features a Single Pedestal Desk, Extended Corner Desk, or Desk Shell (shown on right).

The Single Pedestal Desk or Extended Corner Desk includes the worksurface, 1.5" panel end support, and metal modesty panel. Select desired support to complete the desk (see page 92 or 94 for supports).

The Desk Shell (shown above) includes two 1.5" Panel Legs and half wood modesty panel spanning the length of the desk.

**Note: Additional shape Run-Off Desks and Single Pedestal Desks are available for Low or Standard Height configurations: Rectangle, Angle, or Meeting End Top*

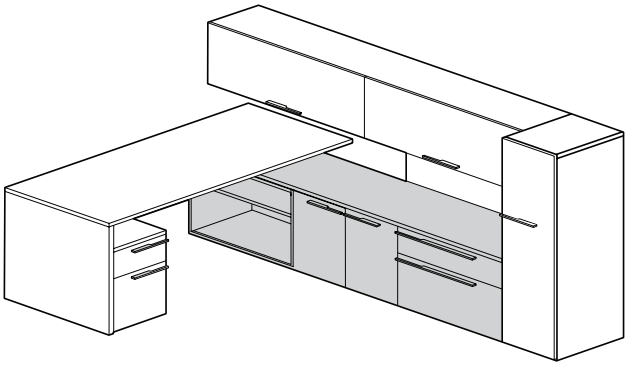
**Note: For ultimate flexibility, use a Desk Shell with Freestanding Pedestals. Available in two heights, 22" and 27."*



Step 3. Select a Credenza or Return

Your Credenza or Return selection will depend upon whether you choose a Low Height or Standard Height application.

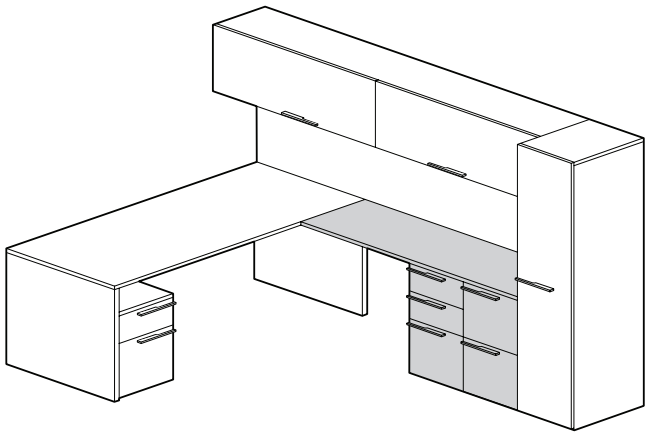
Low Height



For Low Height applications, you'll next choose a Low Credenza. Low Credenza must be filled from left to right with storage supports. First select the top, then the storage below based on your top width.

The L-Shape configuration at the left features a Low Credenza with Box/File Pedestal, Door Pedestal, and Open Pedestal.

Standard Height



For Standard Height applications with Single Pedestal Desks, Desk Shell or Extended Corner Desks, you'll next choose a Return.

The Return connects to the Single Pedestal, Desk Shell, or Extended Corner Desks and has a support at the opposite end. Select desired support to complete the desk (see page 98 for supports).

For Standard Height applications with Run-Off Desks, your next step is to select a Side Credenza. The Standard Height L-Shape configuration features a Side Credenza which supports one end of the Run-Off Desk. You'll select desired supports at both ends to support the Side Credenza. The 1.5" Panel Leg must be selected to support the end of the Run-Off Desk that is coming off to create the L-Shape.

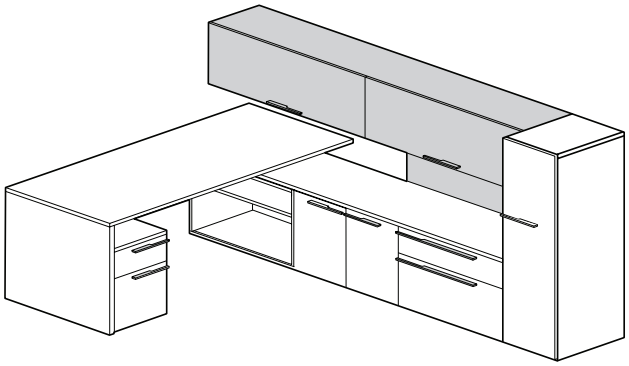
Step 4. Select the Overhead Unit (Optional)

Cavara offers three types of Overheads: Cantilever Stanchion-Mounted, Full Stanchion-Mounted, and Wall-Mounted.

The Wall-Mounted Overhead unit can be mounted on any load-bearing wall.

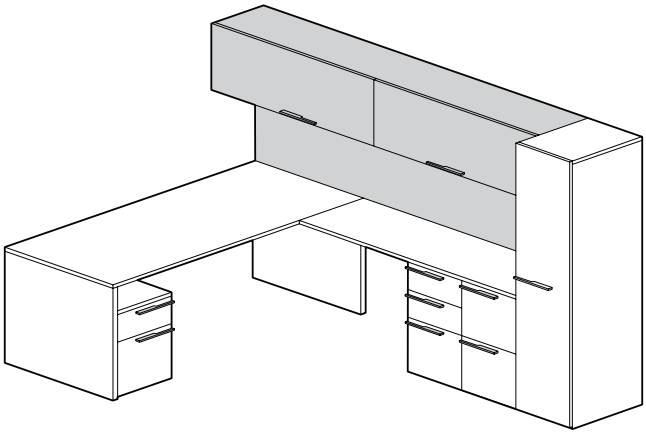
Cavara offers Full Lift-Up Doors, Full Hinged Doors, Open Box, Lift-Up Door/Open Box combinations, Hinged Doors/Open Box combinations, and Center Open Box Overhead units in single and double heights.

Low Height



The Cantilever Stanchion-Mounted Overheads mount above a Low Credenza of equal length, and it is supported on one end and cantilevers over the other end.

Standard Height



The Full Stanchion-Mounted Overheads mount above a Low, Side or Back Credenza or a Single Pedestal Desk or Desk Shell and return combination (shown above). The length must be equal-length to the surface combination below.

**Note:*

- *Lift-Up Doors are only offered in Single Height*
- *Standard depth and legal depth units are also available*
- *Specify Stanchion-Mounted or Wall-Mounted Back Panels separately. Stanchion-Mounted Back Panels are available in Glass Magnetic, Paint Magnetic, Veneer Magnetic, Fabric Tackboard, or combinations of Fabric, Paint or Veneer. Wall-Mounted Back Panels are available in Fabric Tackboard*

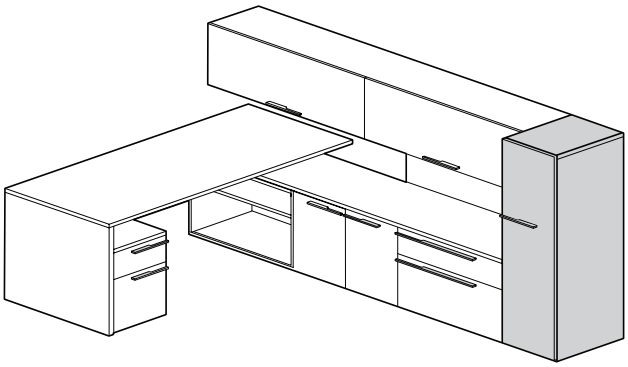
Step 5. Select Towers (Optional)

Available in three heights and three widths, Cavara Towers offer additional storage options.

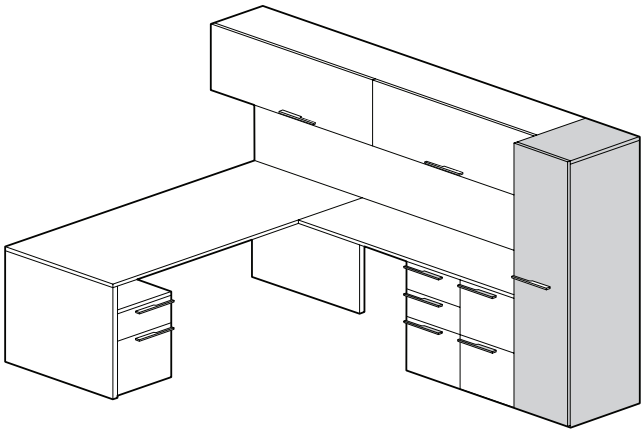
Slide-Out Shelves and Slide-Out Wardrobes offer ultimate reconfiguration flexibility and are non-handed.

18”w Tower with Slide-Out Shelves is shown on left.

Low Height



Standard Height



Step 6. Select Accessories and Additional Storage

Additional Pencil Trays, Dividers, Keyboards, Seat Cushions, and Monitor Stands are available to customize your work style.

Top-Loading Mobile Pedestals, Mobile Pedestals, Bookcases, Freestanding Pedestals and Lateral Files offer additional storage options.

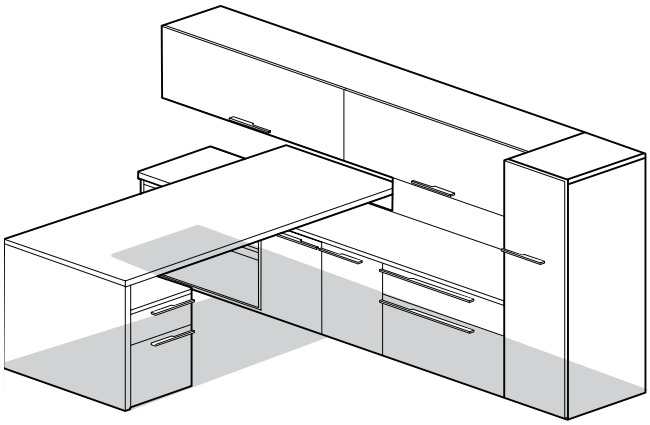
Create a Layout.

T-Shape Configuration – Low Height & Standard Height

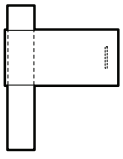
Step 1. Select a Configuration

It's important to first choose whether a Low Height or a Standard Height application will best suit the end user's aesthetic preference, work styles, space, storage and furniture requirements. Low Height applications are layered over a Low Credenza and Standard Height applications are on the same plane.

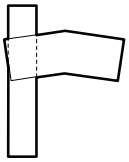
Low Height



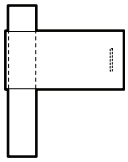
The T-Shape Low Height consists of a Run-Off Desk with a panel leg as the end support and a Low Credenza supporting the other side.



Low T-Shape Rectangle

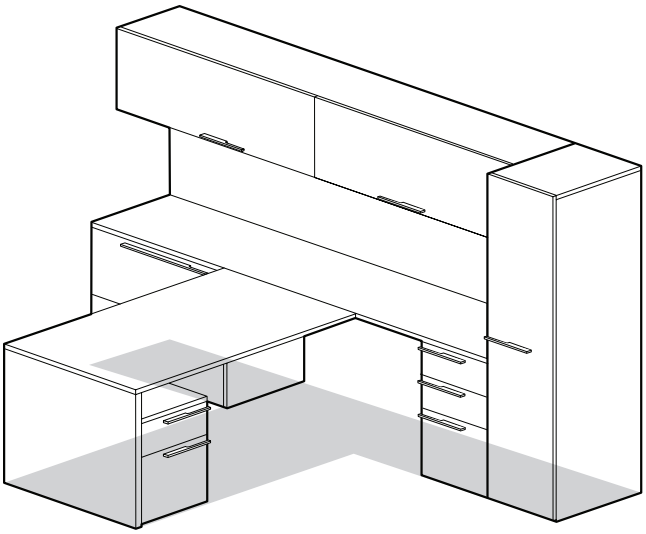


Low T-Shape Angle

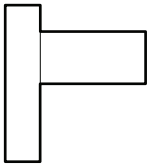


Low T-Shape Meeting End

Standard Height



The T-Shape Standard Height consists of a Side Credenza with a Run-Off Desk.

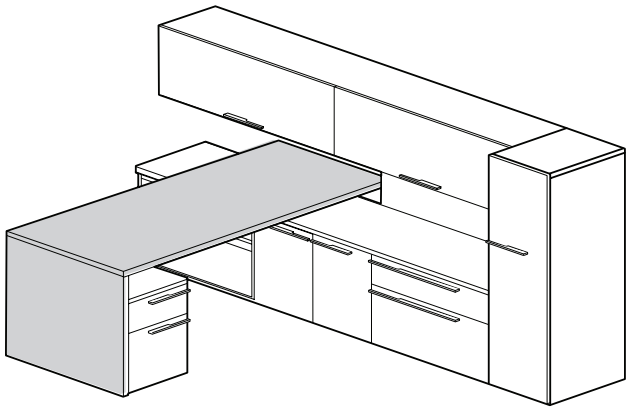


Standard Side Credenza w/ Run-Off T-Shape

Step 2. Select a Desk

Once you've determined which type of T-Shape configuration will serve as the basis of your Cavara workstation, you're ready to specify your first individual component: The Desk.

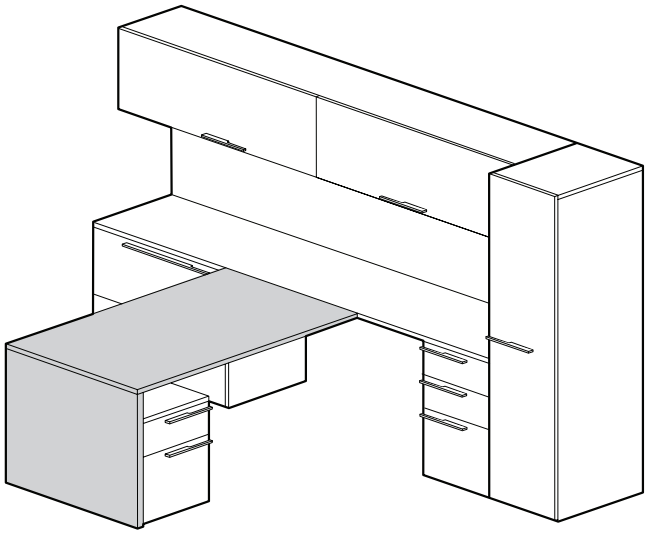
Low Height



The T-Shape with Low Height configuration features a Run-Off Desk for use with Low Credenza.

The Run-Off Desk (for use with Low Credenzas) includes the worksurface, stand-off, and metal modesty/privacy panel. Select desired support to complete the desk (see page 101 for supports).

Standard Height



The T-Shape with Standard Height configuration features a Run-Off Desk for use with Standard Height Credenza.

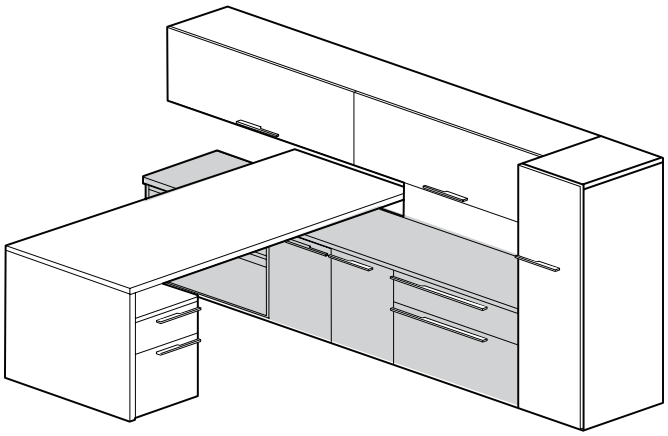
The Run-Off Desk (for use with Standard Height Credenza) includes the worksurface, attachment plates, and metal modesty/privacy panel. Select desired support to complete the desk (see page 101 for supports).

**Note: Additional shape Run-Off Desks and Single Pedestal Desks are available for Low or Standard Height configurations: Rectangle, Angle, or Meeting End Top*

Step 3. Select the Credenza

Your Credenza selection will depend upon whether you choose a Low Height or Standard Height application.

Low Height

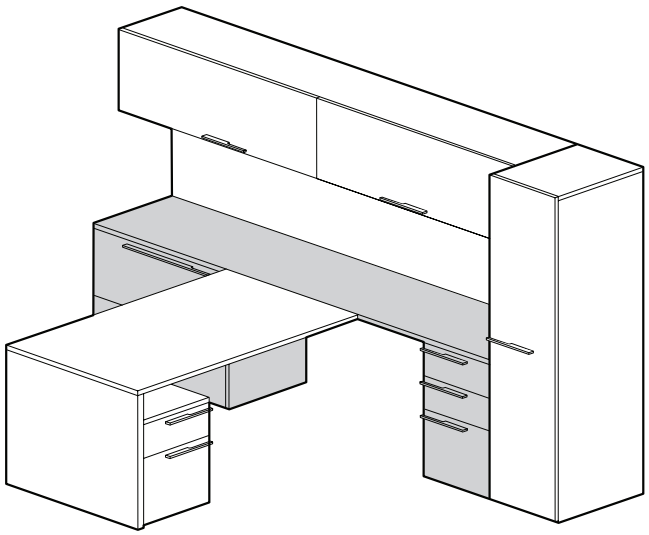


For Low Height applications, you'll next choose a **Low Credenza**.

Low Credenza must be filled from left to right with storage supports. First select the top, then the storage below based on your top width. The T-Shape configuration at the left features a Low Credenza with two sliding door units.

**Note: Low Credenzas with sliding door units offer ultimate reconfiguration flexibility.*

Standard Height



For Standard Height configurations with Run-Off Desks, you'll next choose a **Side Credenza.**

The Side Credenza T-Shape configuration features a Side Credenza, which supports one end of the Run-Off Desk. Select desired supports at both ends to support the Credenza. A minimum of 36" knee space is required for attaching the Run-Off Desk in a T-Shape orientation.

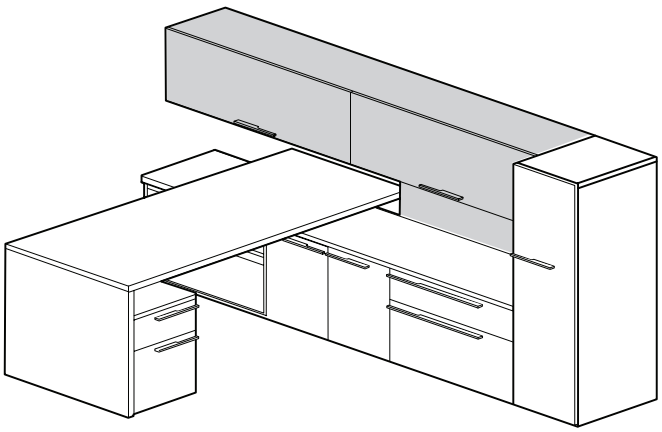
Step 4. Select the Overhead Unit (Optional)

Cavara offers three types of Overheads: Cantilever Stanchion-Mounted, Full Stanchion-Mounted, and Wall-Mounted.

The Wall-Mounted Overhead unit can be mounted on any load-bearing wall.

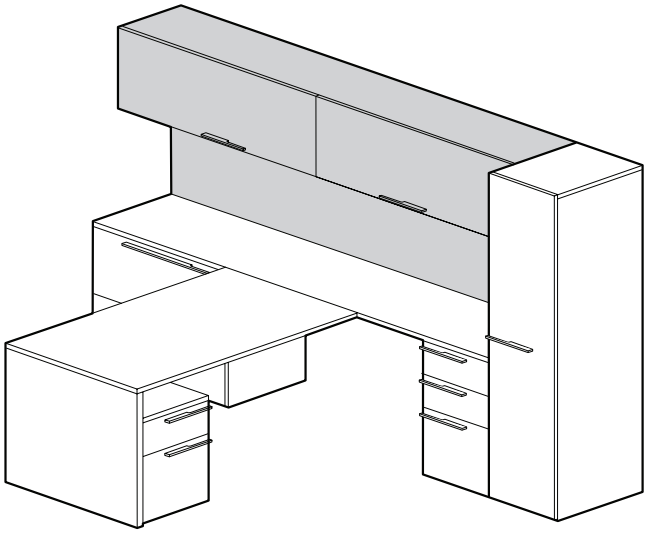
Cavara offers Full Lift-Up Doors, Full Hinged Doors, Open Box, Lift-Up Door/Open Box combinations, Hinged Doors/Open Box combinations, and Center Open Box Overhead units in single and double heights.

Low Height



The Cantilever Stanchion-Mounted Overheads mount above a Low Credenza of equal length, and it is supported on one end and cantilevers over the other end.

Standard Height



The Full Stanchion-Mounted Overheads mount above a Low or Side Credenza of equal length, and it is supported on both ends of the credenza below.

**Note:*

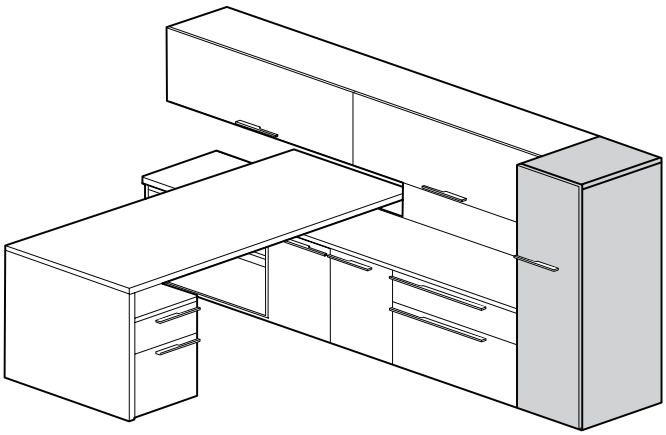
- *Lift-Up Doors are only offered in Single Height*
- *Standard depth and legal depth units are also available*
- *Specify Stanchion-Mounted or Wall-Mounted Back Panels separately. Stanchion-Mounted Back Panels are available in Glass Magnetic, Paint Magnetic, Veneer Magnetic, Fabric Tackboard, or combinations of Fabric, Paint or Veneer. Wall-Mounted Back Panels are available in Fabric Tackboard or Glass Magnetic Board.*

Step 5. Select the Towers (Optional)

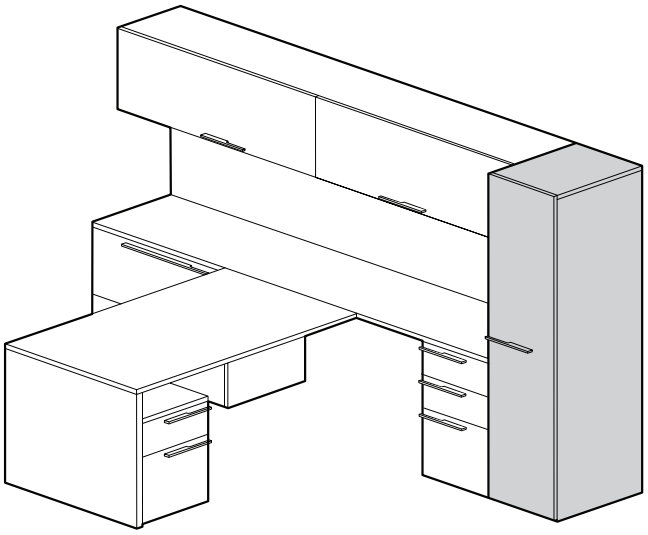
Available in three heights and three widths, Cavara Towers offer additional storage options.

Slide-Out Shelves and Slide-Out Wardrobes offer ultimate reconfiguration flexibility.

Low Height



Standard Height



Step 6. Select Accessories and Additional Storage

Additional Pencil Trays, Dividers, Keyboards, Seat Cushions, and Monitor Stands are available to customize your work style.

Top-Loading Mobile Pedestals, Mobile Pedestals, Bookcases, Freestanding Pedestals and Lateral Files offer additional storage options.

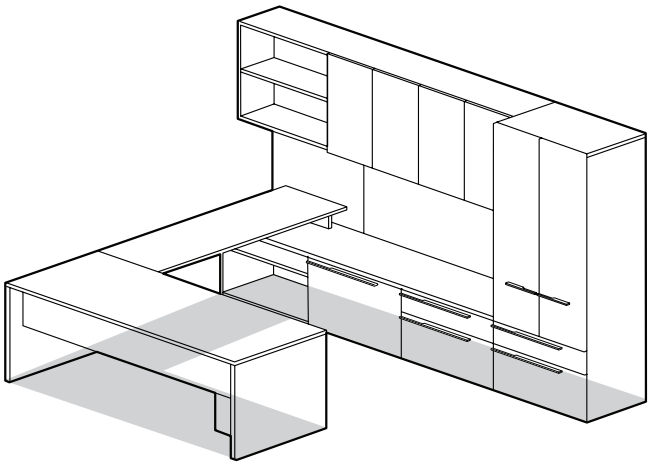
Create a Layout.

U-Shape Configuration – Low Height & Standard Height

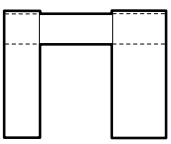
Step 1. Select a Configuration

It's important to first select which of the three U-Shape configurations will best suit the end user's work style, space, storage, and furniture requirements: Side U-Shape, Back U-Shape, or Extended Corner U-Shape

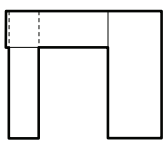
Low Height



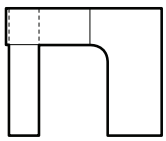
Low Height Side U-Shape configuration features a Low Credenza, Run- Off Desk, and Run-Off Back Credenza



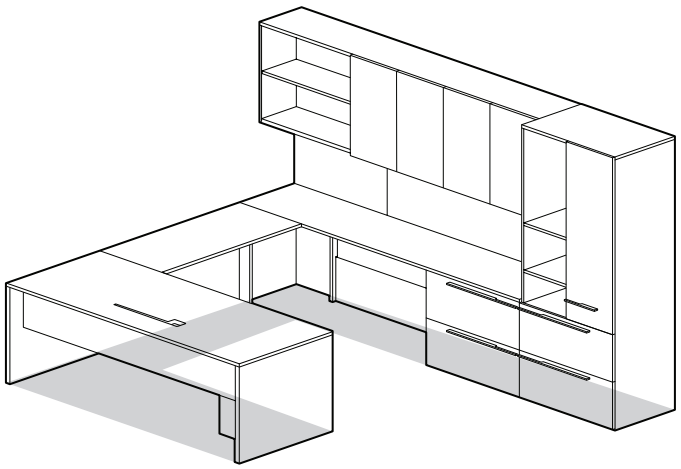
Low Height Back U-Shape configuration consists of a Single Pedestal Desk, Bridge, and Low Credenza (shown above)



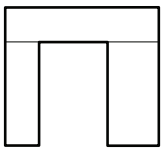
Low Height Extended Corner U-Shape configuration includes an Extended Corner Desk, Bridge, and Low Credenza



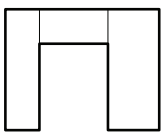
Standard Height



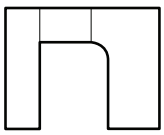
Standard Height Side U-Shape configuration features a Side Credenza, Run- Off Desk, and Run-Off Back Credenza



Standard Height Back U-Shape configuration consists of a Single Pedestal Desk, Bridge, and Back Credenza (shown above)



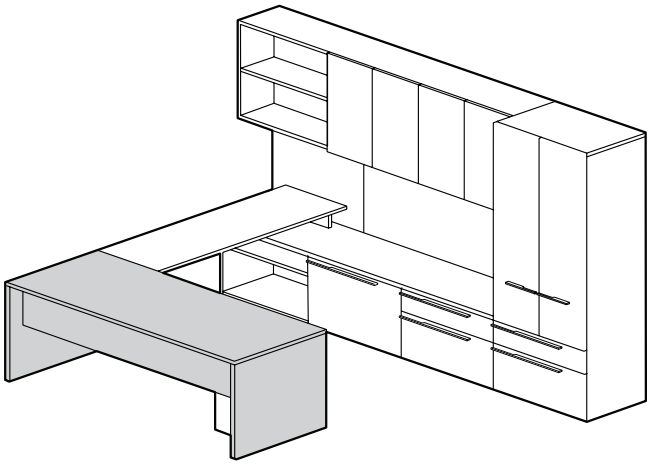
Standard Height Extended Corner U-Shape configuration includes an Extended Corner Desk, Bridge, and Back Credenza



Step 2. Select a Desk

Once you've determined which type of U-Shape configuration will serve as the basis of your Cavara workstation, you're ready to specify your first individual component: The Desk

Low Height

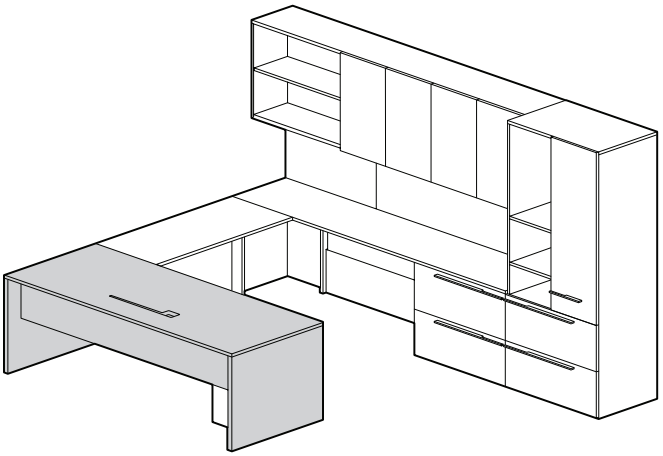


The Low Height Side U-Shape configuration features a **Run-Off Desk for use with Low Credenza.**

The Low Height Back U-Shape configuration features a **Single Pedestal Desk** (shown above).

The Low Height Extended Corner U-Shape configuration features an **Extended Corner Desk.**

Standard Height



The Standard Height Side U-Shape configuration features a **Run-Off Desk for use with Standard Height Credenza.**

The Standard Height Back U-Shape configuration features a **Single Pedestal Desk** (shown above).

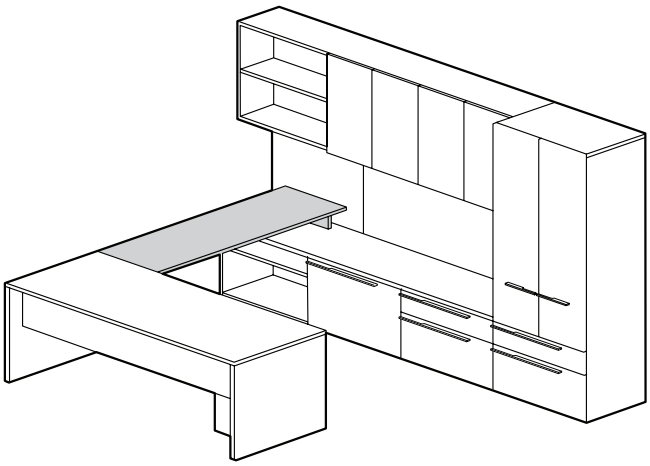
The Standard Height Extended Corner U-Shape configuration features an **Extended Corner Desk.**

**Note: Additional shape Run-Off Desks and Single Pedestal Desks are available for Low or Standard Height configurations: Rectangle, Angle, or Meeting End Top*

Step 3. Select the Bridge, Side Credenza, or Low Credenza

You'll next choose a Bridge, Side Credenza or Low Credenza, depending on which type of U-Shape configuration you've selected.

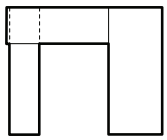
Low Height



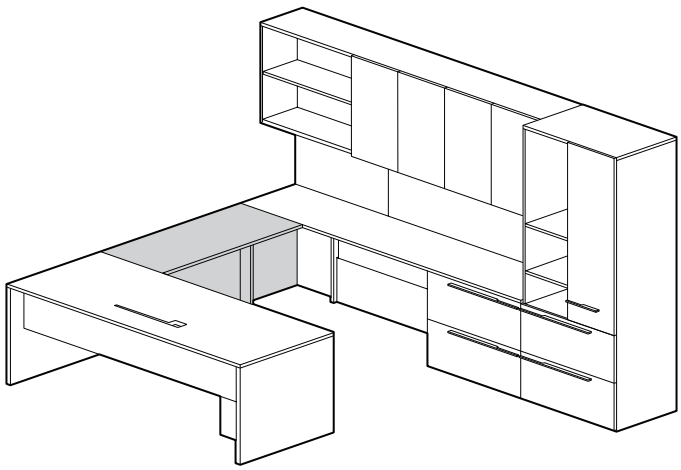
The Low Height Side U-Shape configuration features a **Low Credenza**, which supports one end of the Run-Off Desk and Run-Off Back Credenza.

The Low Height Back U-Shape and Low Height Extended Corner U-Shape configuration incorporates a **Bridge for use with Low Credenza** (shown above). The Bridge is connected to the Single Pedestal Desk or Extended Corner Desk and rests on top of the Low Credenza.

**Note: Bridge surface dimensions incorporate the depth of the Low Credenza for layering of Bridge over Low Credenza.*



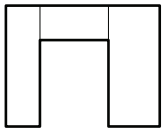
Standard Height



The Standard Height Side U-Shape configuration uses a **Run-Off Back Credenza for use with Standard Height Credenza**, which is supported on one end of the Side Credenza.

The Standard Height Back U-Shape and Standard Height Extended Corner U-Shape configuration incorporates a **Bridge for use with Standard Height Credenza** (shown above). The Bridge is positioned between the Single Pedestal Desk and Back Credenza.

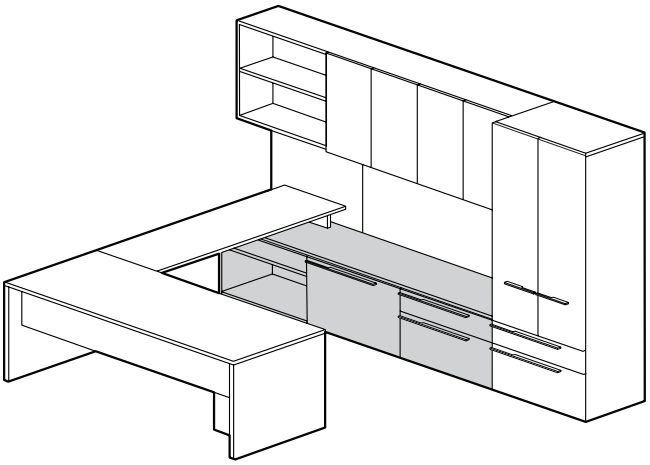
**Note: Bridge surface dimension adds 2" for 22" credenza depth on a side U-shape configuration.*



Step 4. Select the Final Credenza

The Credenza is the final worksurface-related component in a U-Shape configuration. You'll specify one of three Credenza styles, depending on the type of U-Shape configuration you've selected.

Low Height

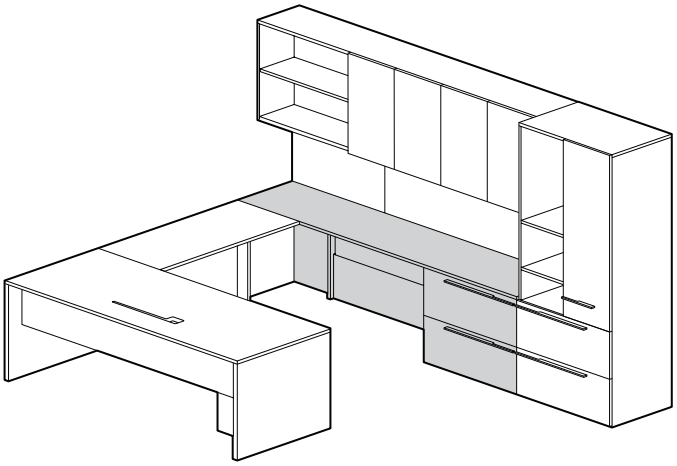


The Low Height Side U-Shape configuration uses a **Run-Off Back Credenza for use with Low Credenza**, which is supported on one end of the Side Credenza.

The Low Height Back U-Shape and Low Height Extended Corner U-Shape configuration incorporates a **Low Credenza.** This style of credenza is designed to support one end of the Bridge (shown above).

**Note: The Low Credenza must be filled from left to right with storage supports. First select the top, then the storage below based on your top width. The U-Shape configuration above features a Low Credenza with Sliding Door and Box/File Pedestal.*

Standard Height



The Standard Height Side U-Shape configuration features a **Side Credenza**, which supports one end of the Run-Off Desk and Run-Off Back Credenza.

The Standard Height Back U-Shape and Standard Height Extended Corner U-Shape configuration incorporates a **Back Credenza.** This style of credenza is designed to support one end of the Bridge (shown above).

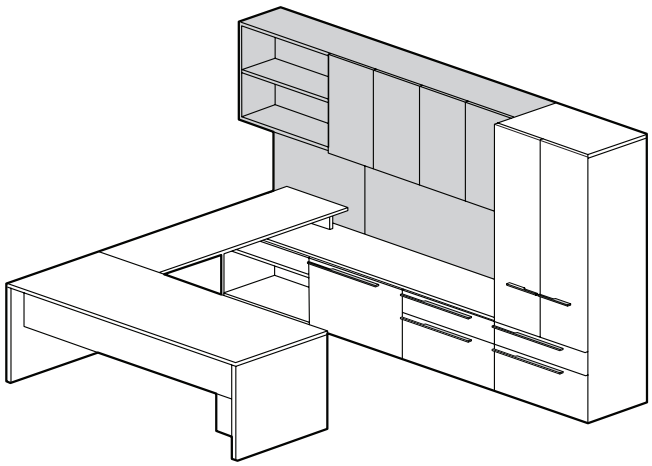
Step 5. Select the Overhead Unit (Optional)

Cavara offers three types of Overheads: Cantilever Stanchion-Mounted, Full Stanchion-Mounted, and Wall-Mounted.

The Wall-Mounted Overhead Unit can be mounted on any load-bearing wall.

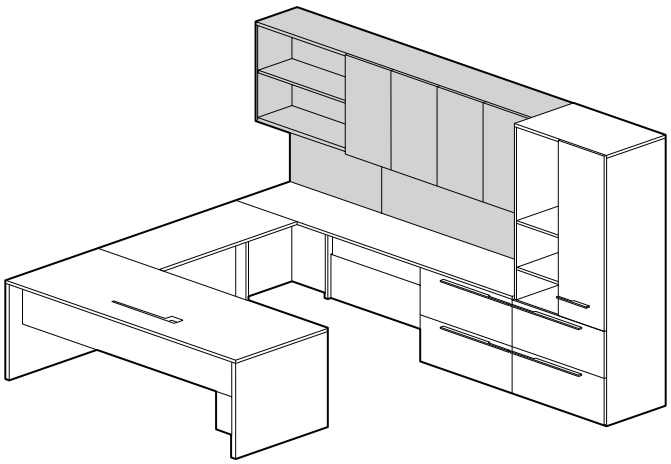
Cavara offers Full Lift-Up Doors, Full Hinged Doors, Open Box, Lift-Up Door/Open Box combinations, Hinged Doors/Open Box combinations, and Center Open Box Overhead units in single and double heights.

Low Height



The Cantilever Stanchion-Mounted Overheads mount above a Low Credenza of equal length, and it is supported on one end and cantilevers over the other end.

Standard Height



The Full Stanchion-Mounted Overheads mount above a Low or Side Credenza of equal length, and it is supported on both ends of the credenza below.

**Note:*

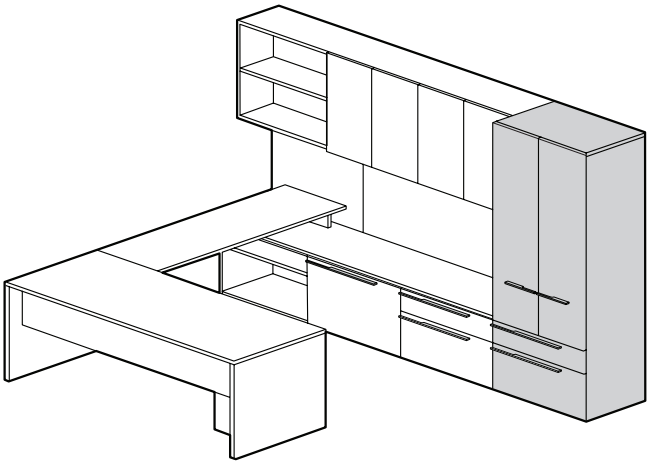
- *Lift-Up Doors are only offered in Single Height*
- *Standard depth and legal depth units are also available*
- *Specify Stanchion-Mounted or Wall-Mounted Back Panels separately. Stanchion-Mounted Back Panels are available in Glass Magnetic, Paint Magnetic, Veneer Magnetic, Fabric Tackboard, or combinations of Fabric, Paint or Veneer. Wall-Mounted Back Panels are available in Fabric Tackboard.*

Step 6. Select the Towers (Optional)

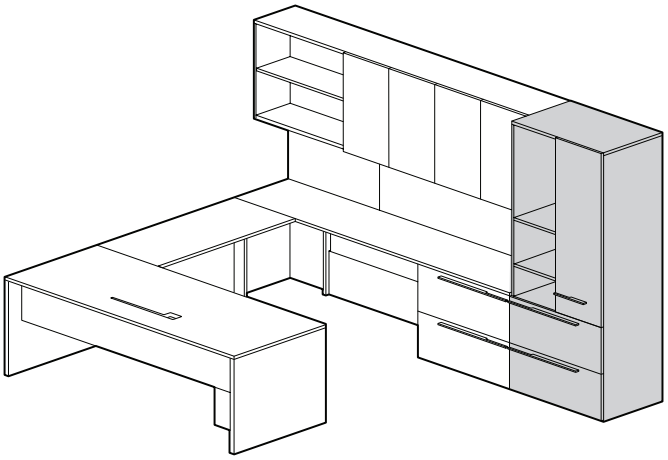
Available in three heights and three widths, Cavara Towers offer additional storage options.

36”w Tower with Doors and Drawers is shown on left and right.

Low Height



Standard Height



Step 7. Select Accessories and Additional Storage

Additional Pencil Trays, Dividers, Keyboards, Seat Cushions, and Monitor Stands are available to customize your work style.

Top-Loading Mobile Pedestals, Mobile Pedestals, Bookcases, Freestanding Pedestals and Lateral Files offer additional storage options.

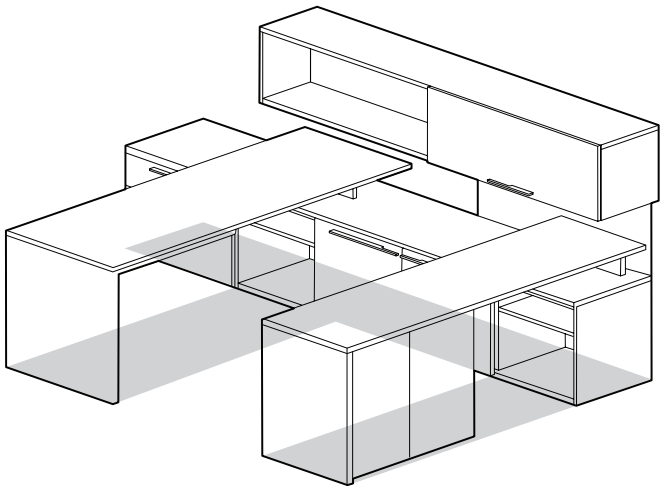
Create a Layout.

F-Shape Configuration – Low Height & Standard Height

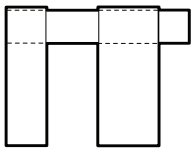
Step 1. Select a Configuration

It's important to first choose whether a Low Height or a Standard Height application will best suit the end user's aesthetic preference, work styles, space, storage and furniture requirements. Low Height applications are layered over a Low Credenza and Standard Height applications are on the same plane.

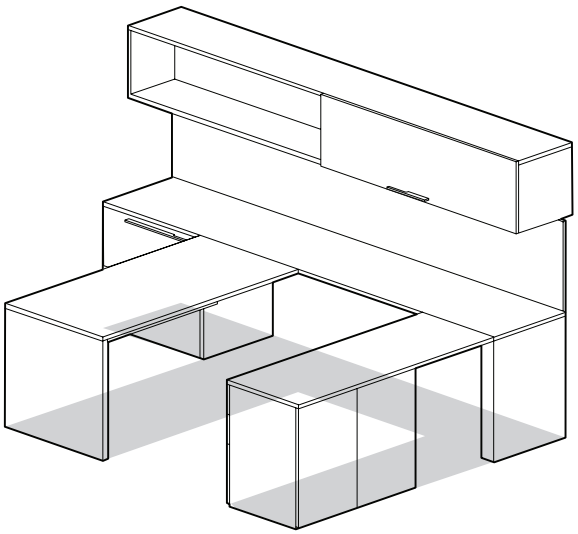
Low Height



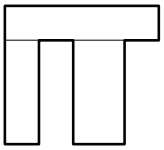
The Low Height F-Shape configuration features a Low Credenza, Run- Off Desk, and Run-Off Back Credenza.



Standard Height



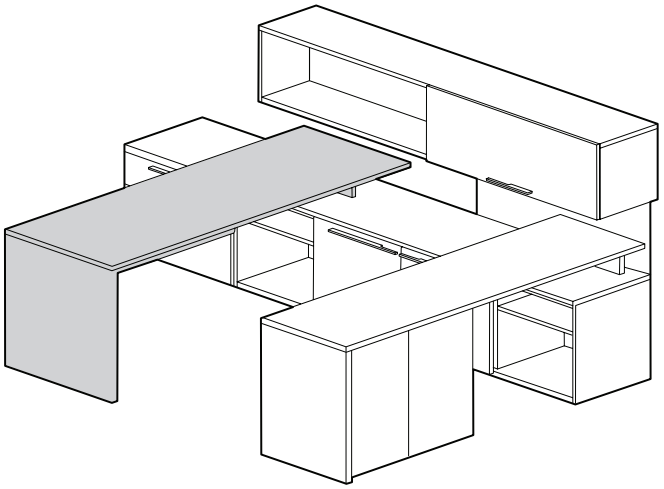
The Standard Height F-Shape consists of a Side Credenza with a Run-Off Desk, and Run-Off Back Credenza



Step 2. Select a Desk

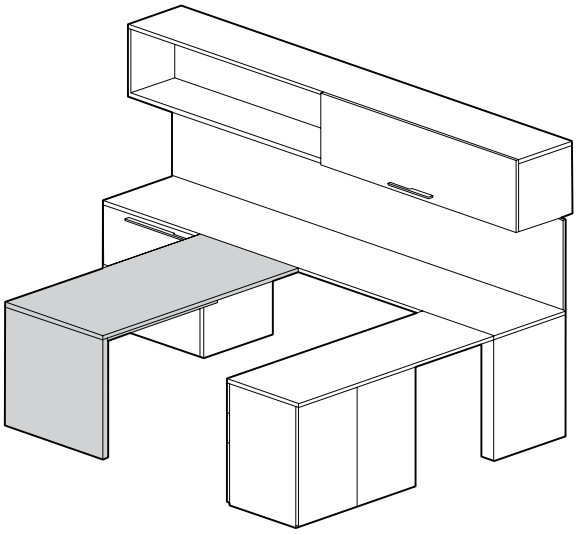
Once you've determined which type of F-Shape configuration will serve as the basis of your Cavara workstation, you're ready to specify your first individual component: The Desk.

Low Height



The Low Height F-Shape configuration features a **Run-Off Desk for use with Low Credenza.**

Standard Height



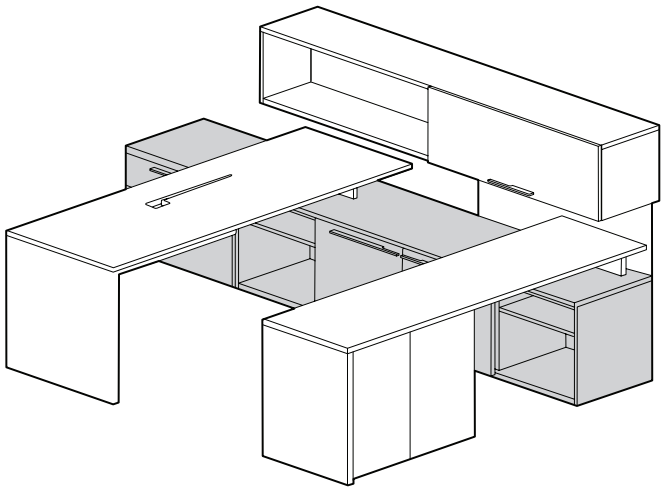
The Standard Height F-Shape configuration features a **Run-Off Desk for use with Standard Height Credenza.**

**Note: Additional shape Run-Off Desks are available: Rectangle, Angle, or Meeting End Top*

Step 3. Select the Side or Low Credenza

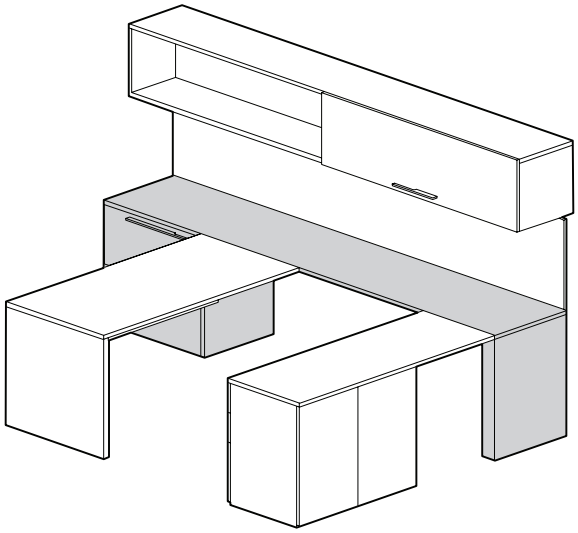
Your Credenza election will depend upon whether you choose a Low Height or Standard Height application.

Low Height



The Low Height F-Shape configuration features a **Low Credenza**, which supports one end of the Run-Off Desk and Run-Off Back Credenza.

Standard Height

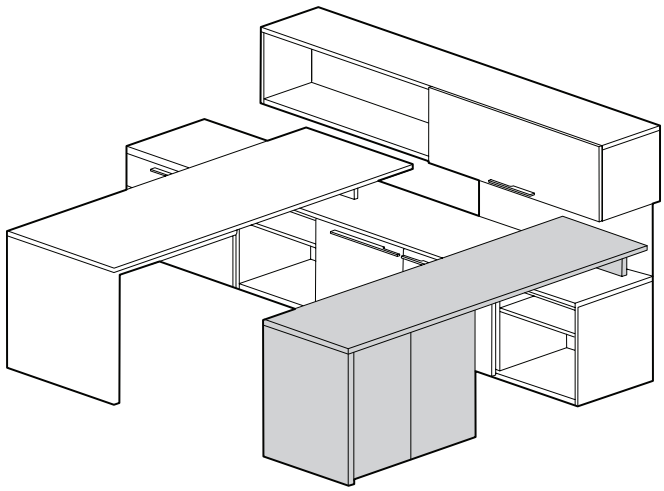


The Standard Height F-Shape configuration features a **Side Credenza**, which supports one end of the Run-Off Desk and Run-Off Back Credenza.

Step 4. Select the Run-Off Back Credenza

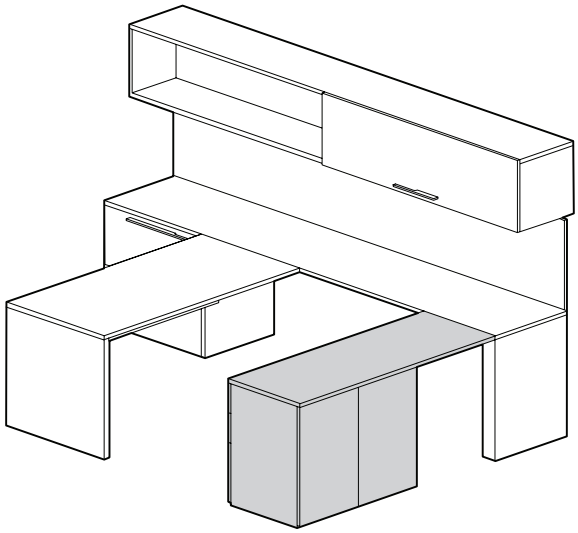
The Run-Off Back Credenza is the final worksurface-related component in a F-Shape configuration.

Low Height



The Low Height F-Shape configuration uses a **Run-Off Back Credenza for use with Low Credenza**, which is supported on one end of the Low Credenza.

Standard Height



The Standard Height F-Shape configuration uses a **Run-Off Back Credenza for use with Standard Height Credenza**, which is supported on one end of the Side Credenza.

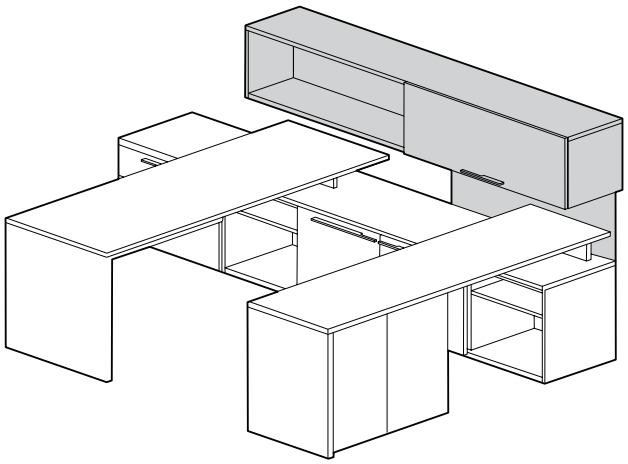
Step 5. Select the Overhead Unit (Optional)

Cavara offers three types of Overheads: Cantilever Stanchion-Mounted, Full Stanchion-Mounted, and Wall-Mounted.

The Wall-Mounted Overhead unit can be mounted on any load-bearing wall.

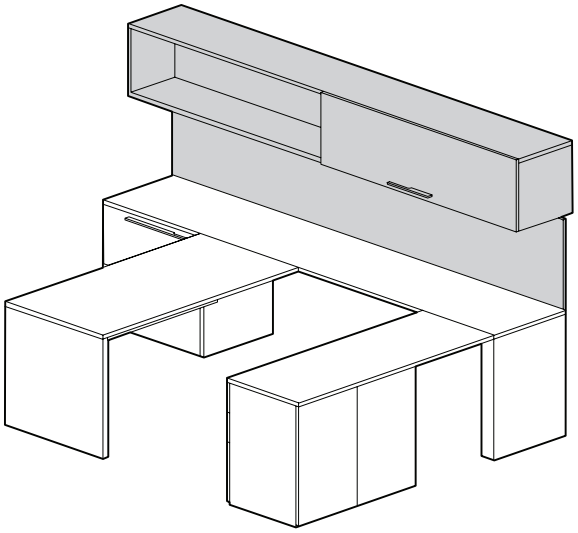
Cavara offers Full Lift-Up Doors, Full Hinged Doors, Open Box, Lift-Up Door/Open Box combinations, Hinged Doors/Open Box combinations, and Center Open Box Overhead units in single and double heights.

Low Height



The Cantilever Stanchion-Mounted Overheads mount above a Low Credenza of equal length, and it is supported on one end and cantilevers over the other end.

Standard Height



The Full Stanchion-Mounted Overheads mount above a Low or Side Credenza of equal length, and it is supported on both ends of the credenza below.

**Note:*

- *Lift-Up Doors are only offered in Single Height*
- *Standard depth and legal depth units are also available*
- *Specify Stanchion-Mounted or Wall-Mounted Back Panels separately. Stanchion-Mounted Back Panels are available in Glass Magnetic, Paint Magnetic, Veneer Magnetic, Fabric Tackboard, or combinations of Fabric, Paint or Veneer. Wall-Mounted Back Panels are available in Fabric Tackboard.*

Step 7. Select Accessories and Additional Storage

Additional Pencil Trays, Dividers, Keyboards, Seat Cushions, and Monitor Stands are available to customize your work style.

Top-Loading Mobile Pedestals, Mobile Pedestals, Bookcases, Freestanding Pedestals and Lateral Files offer additional storage options.

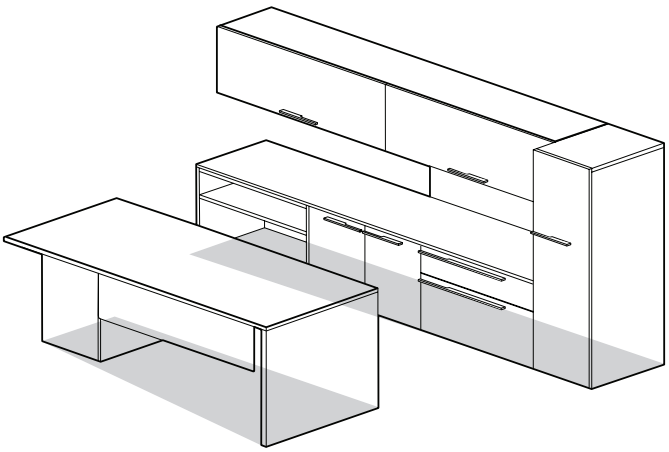
Create a Layout.

Freestanding Configuration – Low Height & Standard Height

Step 1. Select a Configuration

It's important to first choose whether a Low Height or a Standard Height Freestanding configuration will best suit the end user's aesthetic preference, work styles, space, storage and furniture requirements.

Low Height

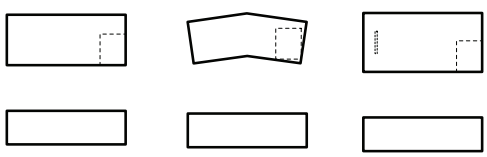


Low Height Freestanding configurations can be specified in two ways: Using a Freestanding Desk or Desk Shell as the primary desk, or using the same components from an L-Shape or T-Shape Low Height application and resting the Run-Off Desk on a Freestanding Pedestal (22" high).

A Low Height Freestanding configuration with a Desk Shell or Freestanding Desk consists of a Desk Shell or Freestanding Desk, Low Credenza, and an optional Overhead Unit and Tower.

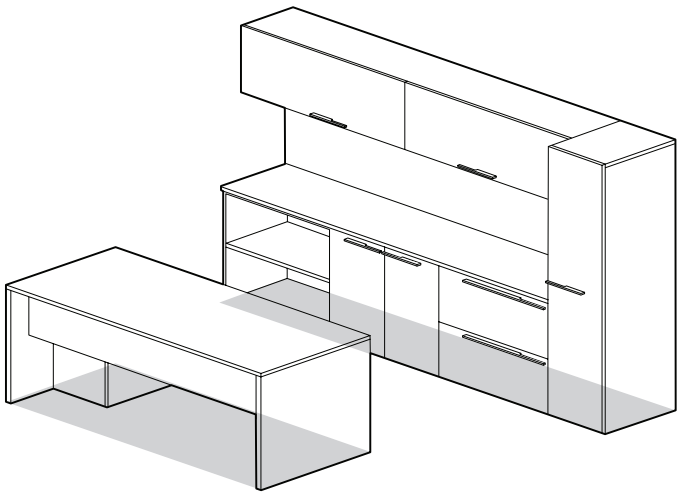
A Low Height Freestanding configuration with a Freestanding Pedestal consists of a Run-Off Desk, Freestanding Pedestal, Low Credenza, and an optional Overhead Unit and Tower (shown above.)

**Note: Additional shape Run-Off Desks are available: Rectangle, Angle, or Meeting End Top*



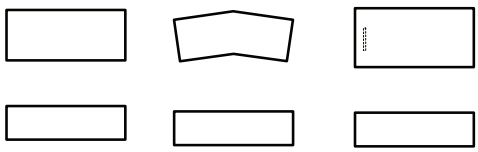
Low Freestanding Rectangle | Low Freestanding Angle | Low Freestanding Meeting End

Standard Height



A Standard Height Freestanding configuration consists of a Desk Shell or Freestanding Desk, Freestanding Credenza, and an optional Overhead Unit and Tower.

**Note: Additional shape Run-Off Desks are available: Rectangle, Angle, or Meeting End Top*

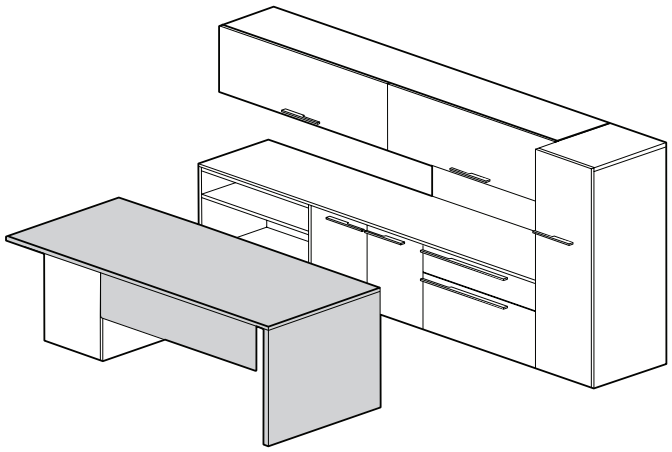


Low Freestanding Rectangle | Low Freestanding Angle | Low Freestanding Meeting End

Step 2. Select a Desk

Once you've determined which type of Freestanding configuration will serve as the basis of your Cavara workstation, you're ready to specify your first individual component: The Desk

Low Height

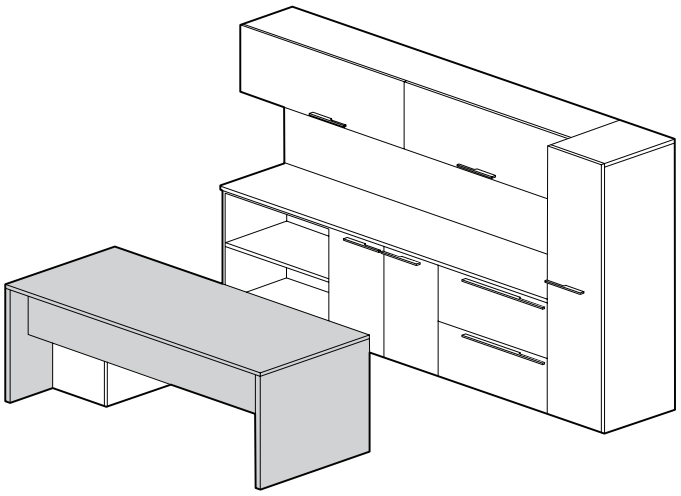


A Low Height Freestanding configuration features a **Desk Shell, Freestanding Desk or Run-Off Desk for use with Low Credenza.**

The Run-Off Desk (for use with Low Credenza) is shown on the left and includes the worksurface, stand-off, and metal modesty/privacy panel. Select desired support to complete the desk (see page 101 for supports).

Specify a Freestanding Pedestal (22" high) to allow the stand-off to perch on the Run-Off Desk support.

Standard Height



A Standard Height Freestanding configuration features a **Desk Shell** or **Freestanding Desk.**

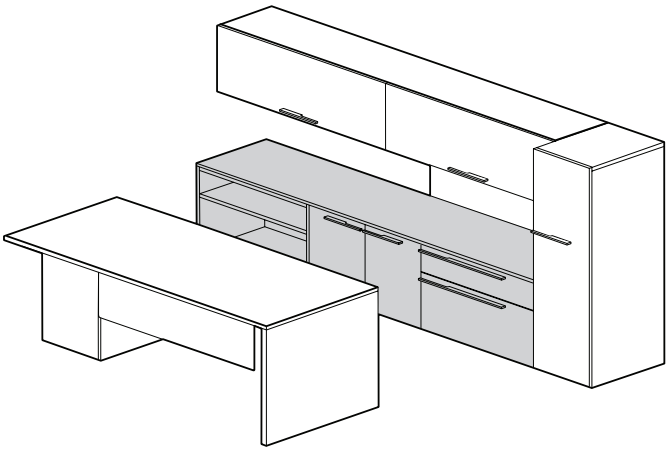
The Freestanding Desk includes the worksurface and modesty panel. Select desired supports one each end to complete the desk (see page 88 for supports).

The Desk Shell includes the worksurface, 2 – 1.5" Panel Legs, and half modesty that spans the length of the worksurface top.

Step 3. Select the Credenza

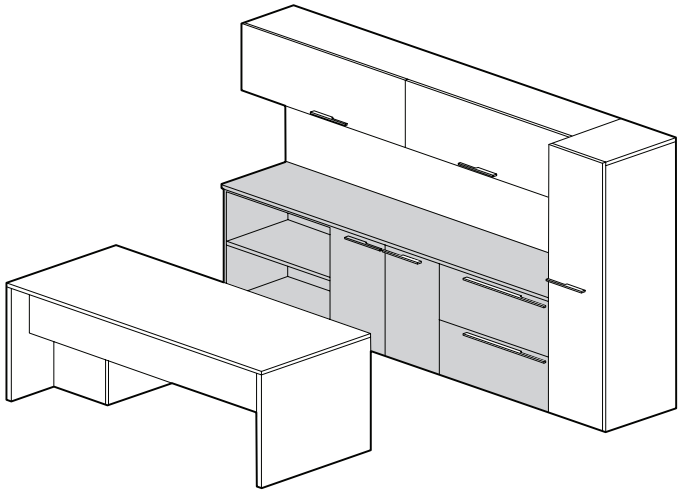
Your Credenza selection will depend upon whether you choose a Low Height or Standard Height application.

Low Height



For Low Height applications, you'll next choose a **Low Credenza**. Low Credenza must be filled from left to right with storage supports. First select the top, then the storage below based on your top width. The L-Shape configuration at the left features a Low Credenza with Open Pedestal, Door Pedestal, and Box/File Pedestal.

Standard Height



For Standard Height applications, you'll next choose a **Freestanding Credenza**.

The Freestanding Credenza includes the top, individual storage components and a back panel or access panel (see page 90 for supports and back panel options).

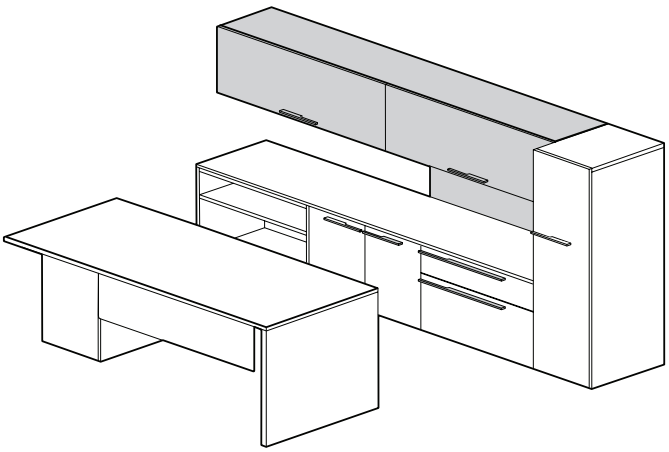
Step 4. Select the Overhead Unit (Optional)

Cavara offers three types of Overheads: Cantilever Stanchion-Mounted, Full Stanchion-Mounted, and Wall-Mounted.

The Wall-Mounted Overhead Unit can be mounted on any load-bearing wall.

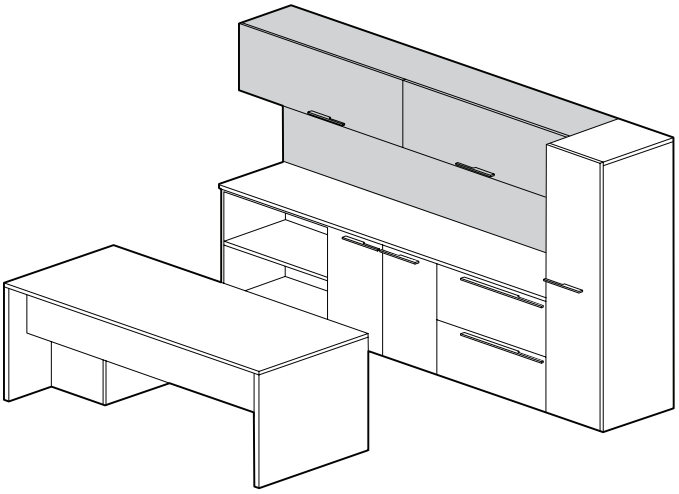
Cavara offers Full Lift-Up Doors, Full Hinged Doors, Open Box, Lift-Up Door/Open Box combinations, Hinged Doors/Open Box combinations, and Center Open Box Overhead units in single and double heights.

Low Height



The Cantilever Stanchion-Mounted Overheads mount above a Low Credenza of equal length, and it is supported on one end and cantilevers over the other end.

Standard Height



The Full Stanchion-Mounted Overheads mount above a Low or Side Credenza of equal length, and it is supported on both ends of the credenza below.

**Note:*

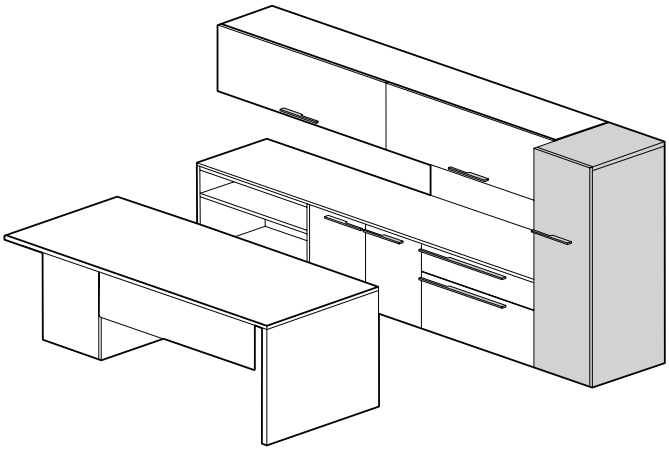
- *Lift-Up Doors are only offered in Single Height*
- *Standard depth and legal depth units are also available*
- *Specify Stanchion-Mounted or Wall-Mounted Back Panels separately. Stanchion-Mounted Back Panels are available in Glass Magnetic, Paint Magnetic, Veneer Magnetic, Fabric Tackboard, or combinations of Fabric, Paint or Veneer. Wall-Mounted Back Panels are available in Fabric Tackboard.*

Step 5. Select the Towers (Optional)

Available in three heights and three widths, Cavara Towers offer additional storage options.

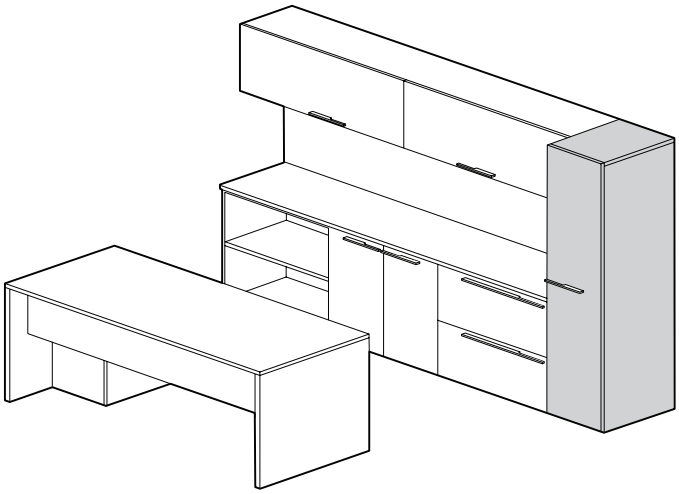
Slide-Out Shelves and Slide-Out Wardrobes offer ultimate reconfiguration flexibility and non-handedness.

Low Height



18”w Tower with Slide-Out Shelves is shown above.

Standard Height



Step 6. Select Accessories and Additional Storage

Additional Pencil Trays, Dividers, Keyboards, Seat Cushions, and Monitor Stands are available to customize your work style.

Top-Loading Mobile Pedestals, Mobile Pedestals, Bookcases, Freestanding Pedestals and Lateral Files offer additional storage options.

General Information & Options

Pulls/Valance (Polished Chrome) -PCV $228

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

See pages 6-7 for surface material options.

- Choose Wood Species & Finish. Grain runs horizontal.
- Choose Paint Color, if applicable
- Choose Glass Finish, if applicable
- Choose Metal Finish, if applicable

General Information

- The cantilever portion of the overhead is half the overall width
- Cantilever Stanchion-Mounted Overhead is available over Low Credenza only
- Overall width must match Low Credenza width
- Stanchion-Mounted Overheads add 2" of depth to the overall footprint
- Tasklight included
- Overhead interior depth is 13.5" and 16"
- Glass overhead doors are tempered
- Back-painted glass is low-iron glass
- A Right cantilever overhead has stanchions on the right and has a cantilever on the left. A Left cantilever overhead has stanchion on the left and has a cantilever on the right.

General Information & Options

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)
See pages 6-7 for surface material options.
- Choose Wood Species & Finish. Grain runs horizontal.
- Choose Metal Finish, if applicable

General Information

- Tackboard, Veneer Panel, or Tackboard/Veneer Panel combinations must be specified with stanchion-mounted overheads
- Tackboard, Veneer Panel, or Tackboard/Veneer Panel combinations must equal the length of the corresponding overhead
- Magnets are included
- See page 9 for fabric restrictions

General Information & Options

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)
See pages 6-7 for surface material options.
- Choose Metal Finish, if applicable
  (Note: High Polished finish is not applicable on the thin metal frame around the Glass Magnetic Board. Clear Anodized or Powdercoat options available only)
- Choose Glass Finish

General Information

- Glass Magnetic Board must be specified with stanchion-mounted overheads
- Glass Magnetic Board must equal the length of the corresponding overhead
- Glass Magnetic Boards 78" and greater will have an even split two piece construction
- Magnets are included
- Veneer Back Panel assumed unless Glass Magnetic Board specified

General Information & Options

Polished Chrome Pulls/Valance -PCV $228

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)
See pages 6-7 for surface material options.
- Choose Wood Species & Finish. Grain runs horizontal.
- Choose Paint Color, if applicable
- Choose Glass Finish, if applicable
- Choose Metal Finish, if applicable

General Information

- Tasklight included
- Overhead interior depth is 13.5" and 16"
- Tackboard option available. See Page 127.
- Wall-Mounted Overheads are shipped with the necessary cleats for wall mounting. The hardware that attaches the cleats to the wall is not included.
- Customers are responsible for ensuring that the structural wall has adequate strength to support the overhead and its components
- The recommended installation height for wall-mounted oveheads is 20 1/4" from the top of the worksurface to the bottom of the overhead unit
- Glass overhead doors are tempered
- Back-painted glass is low-iron glass

General Information & Options

Polished Chrome Pulls/Valance -PCV $228

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

See pages 6-7 for surface material options.

- Choose Wood Species & Finish. Grain runs horizontal.
- Choose Paint Color, if applicable
- Choose Glass Finish, if applicable
- Choose Metal Finish, if applicable

General Information

- Tasklight included
- Overhead interior depth is 13.5" and 16"
- Tackboard option available. See Page 127.
- Wall-Mounted Overheads are shipped with the necessary cleats for wall mounting. The hardware that attaches the cleats to the wall is not included.
- Customers are responsible for ensuring that the structural wall has adequate strength to support the overhead and its components
- The recommended installation height for wall-mounted oveheads is 20 1/4" from the top of the worksurface to the bottom of the overhead unit
- Glass overhead doors are tempered
- Back-painted glass is low-iron glass

- Modesty/Privacy panels are reconfigurable and can be in the modesty position, privacy position, or used in combination with each other for modesty/privacy.

Equate Planning Guide

Casegoods Components

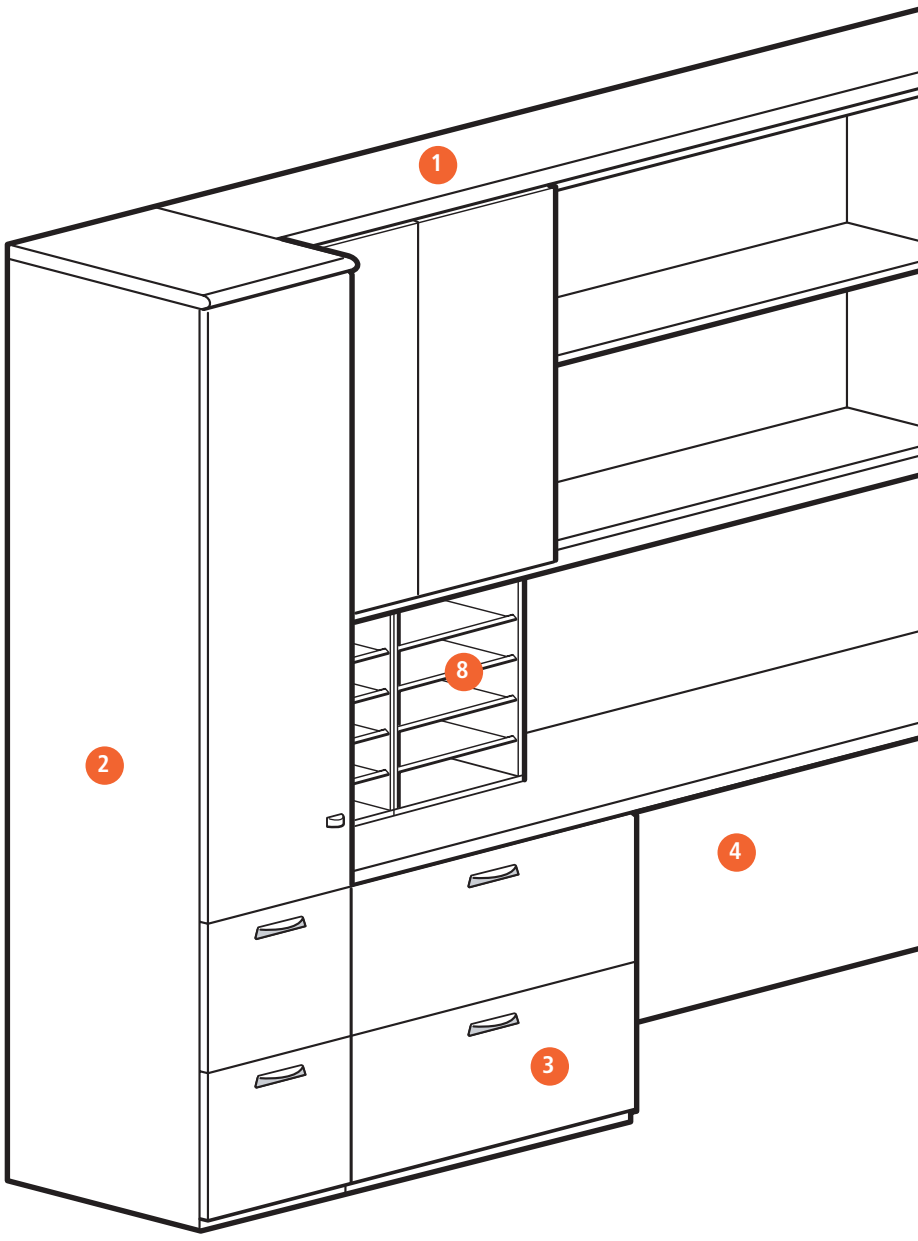
1 **Cornice Tops**
Available on all Overheads, Freestanding Towers, Bookcases and Lateral Files.

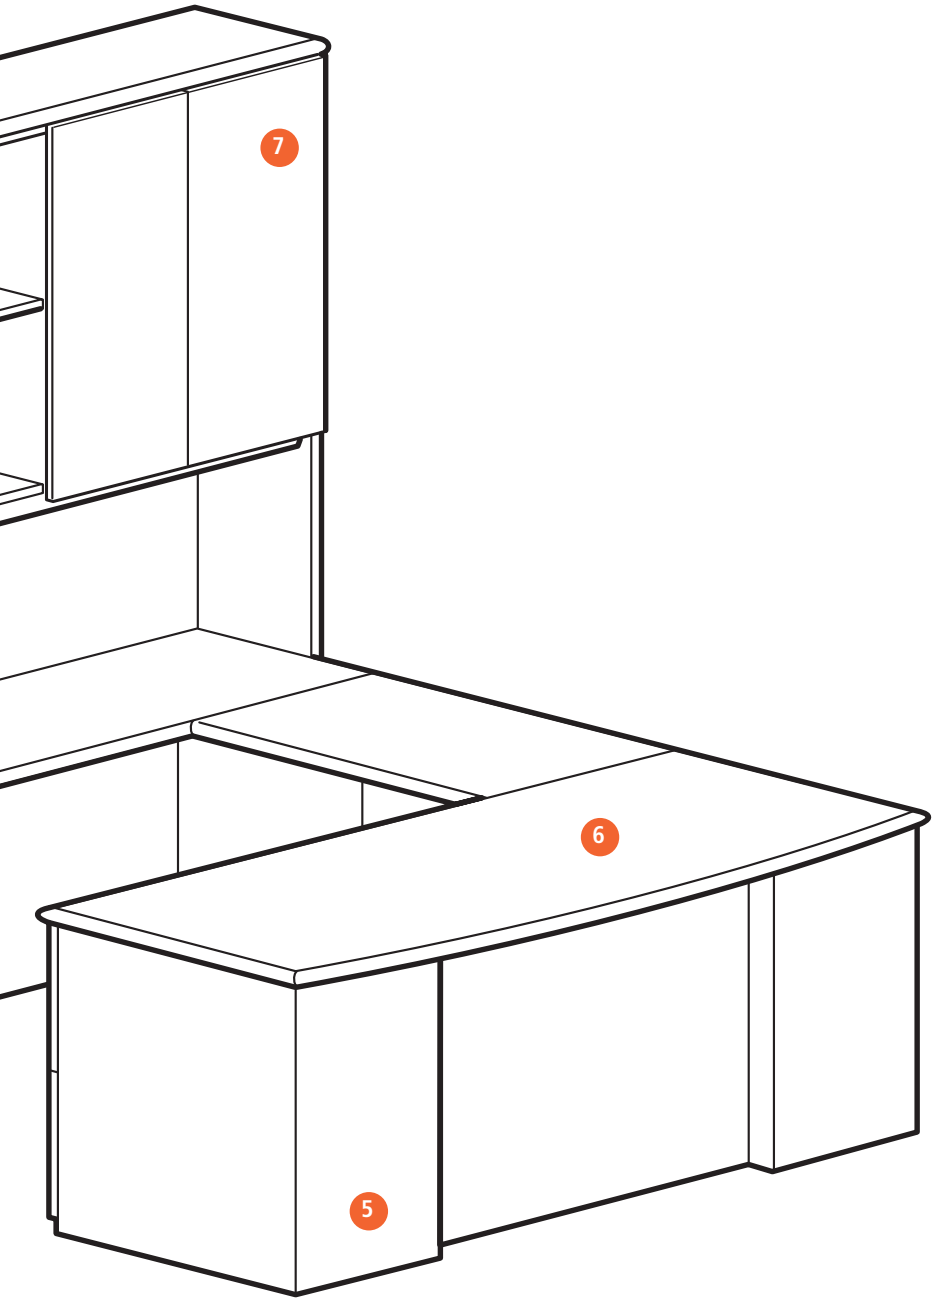
2 **Freestanding Components**
Freestanding Towers, Bookcases and Lateral Files are available in a variety of complementary heights, widths and configurations.

3 **Credenza and Return Pedestals**
Available in Box/Box/File, File/File, Lateral File, Single and Double door storage version, as well as Printer, Laptop/Printer, and Tech Pedestals.

4 **Credenza and Return Modesty Panels**
Available in 3/4-height and Full-height versions with optional access panels.

5 **Desk Pedestals**
Multiple options include: Box/Box/File, File/File, Printer, Laptop/Printer, and Tech Pedestals.





6 Desks
Rectangle, Bow Front, Taper or P-shape tops are available on Single Pedestal, Extended Corner, Run-Off and Freestanding Desks to address a wide range of workstyles.

7 Overheads
Available in Hutch or Wall-Mounted configurations, Full Door, Center Shelf or Open Shelf options.

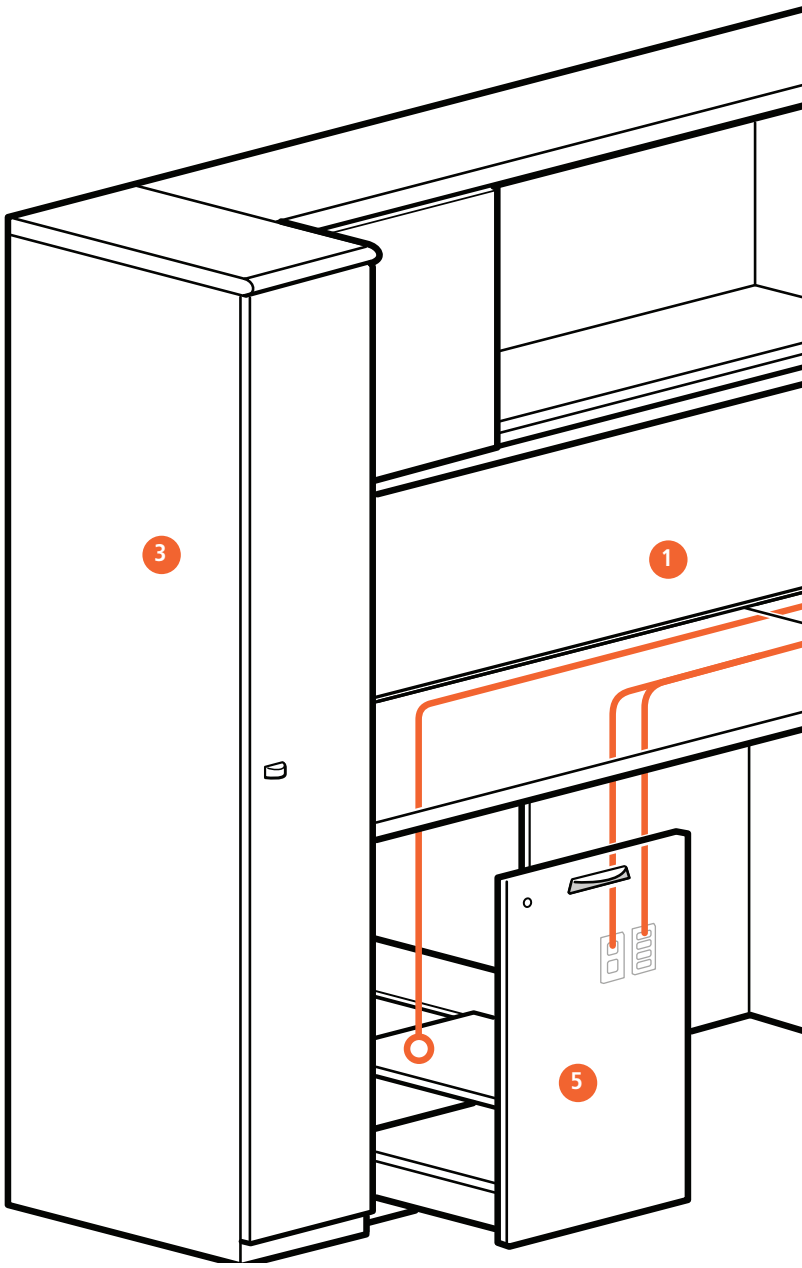
8 Accessories
Optional Tackboards, Keyboard Trays, Monitor Stands, Mobile Pedestals and Organizer Boxes are available to personalize your office configuration.

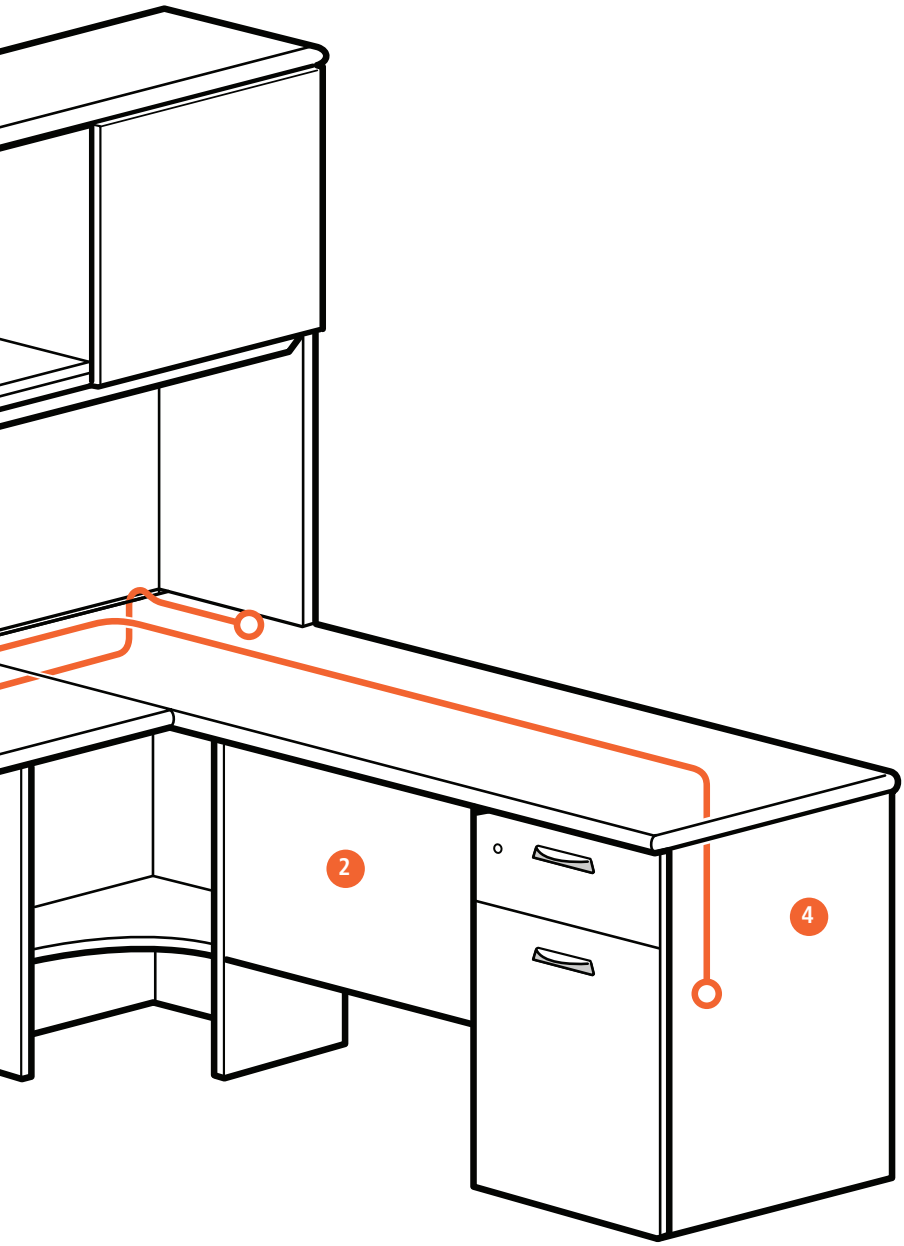
Technology Accommodation

1 **Wire Pass Through.**
A 1-1/4" high Wire Pass-Through is located between the veneer panel and the worksurface. The Wire Pass-Through extends nearly the entire length of the worksurface, allowing wire management anywhere the user requires it.

J-Channel
J-Channel provides wire management beneath Equate worksurfaces.

Worksurface Grommets
Grommets can be specified on the worksurfaces of desks, credenzas, bridges, and returns. Grommets can be specified in right, left, or center positions of desks, credenzas and returns, and in center position on bridges.



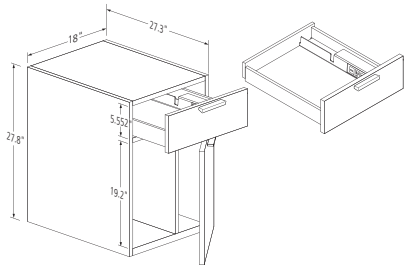


2 Access Panels
Optional flip-down wire management Access Panel is available on back credenzas, returns, and bridges. A J-Channel wire management trough - attached to the bottom of the back panel - acts as a wire catcher, preventing wires from being exposed underneath the back panel.

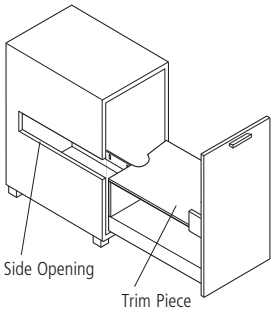
3 Towers
Openings located in the rear of shelves and in the bottom of the tower allow vertical wire management.

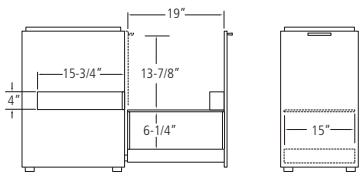
4 Tech Pedestal with Power Drawer and Door
Wire management openings are located in the bottom of all pedestals. Opening on back of pedestal on credenzas and returns provides proper ventilation. Tech Pedestals on desks have oversized opening on user's side that allows wire management in addition to ventilation.

The Tech Pedestal provides CPU storage on one side of a moveable dividing panel, and an open section on the other side for cord/cable storage. Grommet at the base allows easy wire management. Thermostatically controlled fan provides temperature regulation. Tech Pedestals on desks have oversized opening on user's side that allows wire management in addition to ventilation.



5 Printer Pedestal
The Printer Pedestal accommodates most inkjet printers. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. The movable trim piece attached to the pedestal door allows the door to be opened and closed without removing the printer output tray. Grommet in bottom and side of pedestal provides easy wire management.





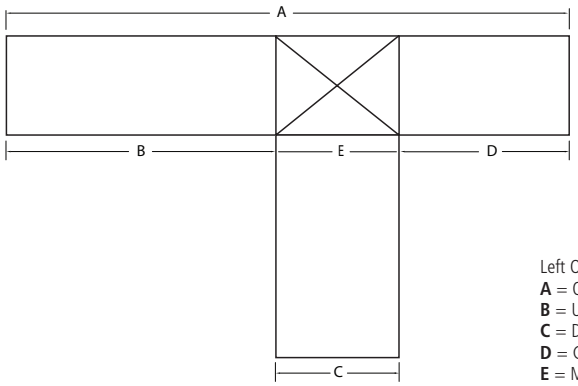
Specifying T-Shape Configurations. Equate freestanding,

L-shaped and U-shaped configurations are specified just as all other Nucraft casegoods.

Equate's T-shape configurations require a slightly different specification protocol.

Run-off Desk Specification Sequence

1. Determine the location of the run-off desk on your credenza.
Consult the charts below to determine how much space will be accorded the user and guest using different credenza/desk sizes and positions.



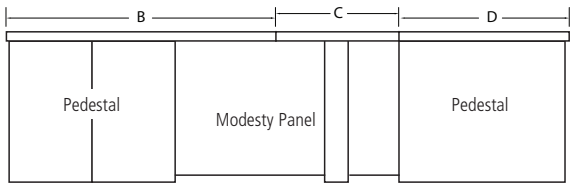
Left Orientation Shown
A = Overall Length of Credenza
B = User's Side - Distance between edge of credenza and Run-off Desk
C = Depth of Run-off Desk
D = Guest Side - Remaining distance
E = Minimum of 36" Opening Required

2. Determine your model number.
Always specify from the outside in. In this example, doing so designates the user orientation as left. (The run-off desk orientation is right.)

Example Model Number: EQSC-120-36-54L

- EQSC-120 — Base Model Number
- 36 — Depth of Run-off Desk
- 54L — Depth and Orientation of User's side

3. A run-off desk must be specified within the location of the modesty panel. (It cannot be placed in front of a pedestal.)



*Minimum of 36" Opening Required

30" Depth Desk (C)

Credenza Length (A)	Distance Between edge of credenza and Run-off Desk (USER'S SIDE) (B)								
	30	36	42	48	54	60	66	72	Center

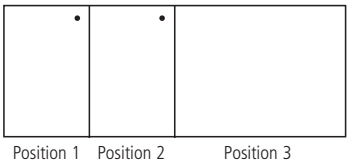
Pedestal Location/ Specifying Sequence

1. Credenza – L, U or T-shaped configuration
Specify from the outside in, based on the user's orientation.

Credenzas – Run-off and Back

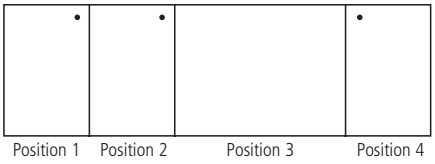
Left Orientation



Right Orientation

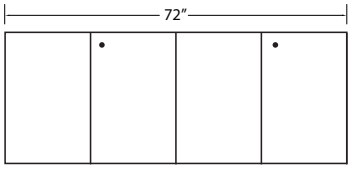
2. Credenza with Run-off Desk (T-shaped) or Kneespace
Specify from the outside in, based on the user's orientation.

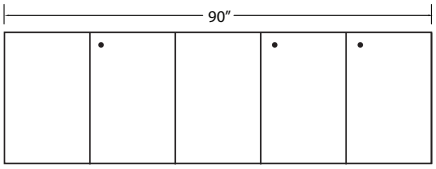
Credenzas – Kneespace

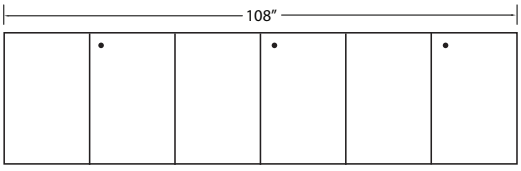


3. Credenza – Freestanding
Specify from left to right.

Credenzas – Freestanding







Circles represent lock locations.

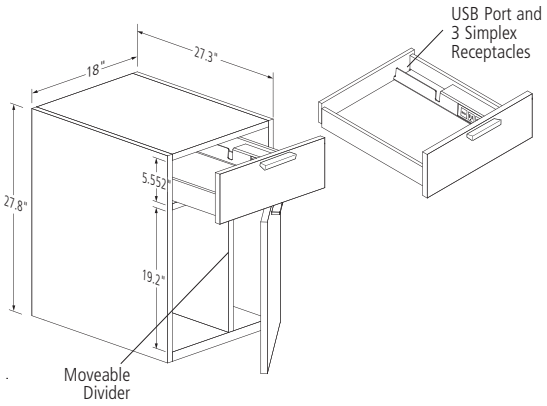
As always, you can receive configuration assistance through iSpec. Call 1-877-NUCRAFT or visit www.nucraft.com/ispec.

Locks on Double Door units are located on the right door.

Locks on 2-Drawer Lateral File units are located toward the center of the credenza

Tech Pedestal with Power Drawer and Door

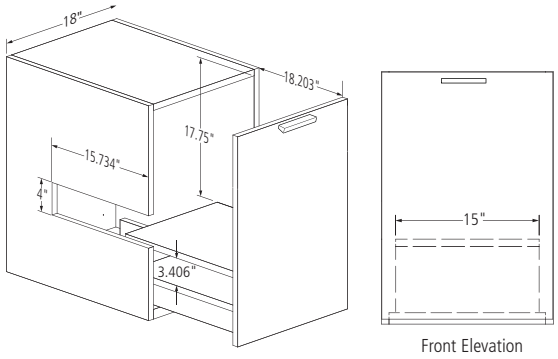
The Tech Pedestal provides CPU storage on one side of a moveable dividing panel, and an open section on the other side for cord/cable storage. The top drawer includes three simplex receptacles and one USB port. Grommet at the base allows easy wire management. Thermostatically controlled fan provides temperature regulation. Tech Pedestals on desks have oversized opening on user's side that allows wire management in addition to ventilation.



Printer Pedestal

The Printer Pedestal accommodates most inkjet printers. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. Grommet in bottom and side of pedestal provides easy wire management.

Consult Printer Pedestal dimension information to ensure that the pedestal will accommodate your printer.



Front Elevation

Laptop/Printer Pedestal

The Laptop/Printer Pedestal provides laptop storage in the top drawer and accommodates most inkjet printers in the lower drawer. The laptop drawer provides convenient storage and concealment of your laptop, freeing up valuable worksurface space. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. Grommet in bottom and side of pedestal provides easy wire management. Thermostatically controlled fan provides temperature regulation.

Consult Laptop/Printer Pedestal dimension information to ensure that the pedestal will accommodate your printer.

Wall-Mounted and Hutch - Overhead

Continued from Page 154 & 155

General Information

- Task light is included
- Tackboard options available. See below.
- Overhead depth is 15-1/2"
- Wall-Mounted Overheads are shipped with the necessary cleats for wall mounting. The hardware that attaches the cleats to the wall is not included.
- Customers are responsible for ensuring that the structural wall has adequate strength to support the overhead and its contents
- The recommended installation height for wall mounted overheads is 19-1/8" from the top of the worksurface to the bottom of the overhead unit.
- Cornice top adds an additional 1-1/8" to overall height

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

See pages 6-7 for surface material options.

- Choose Wood Species & Finish
- Choose Edge Profile, if applicable:

Merino Collection Planning Guide

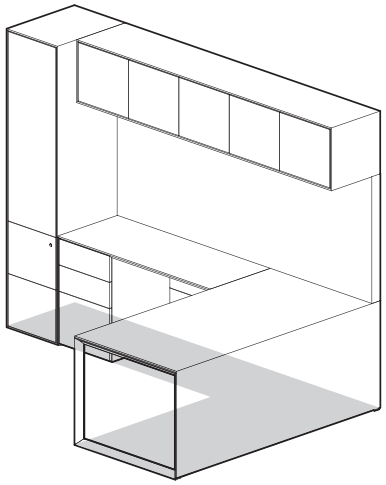
Create a Layout.

There are four primary types of Merino Collection workstation configurations: L-Shape, U-Shape, Freestanding, and T-Shape. The specification process is outlined in the following Pages with additional detail devoted to components.

L-Shape Configurations

Step 1. Select a Configuration

It's important to first choose the type of L-shape configuration. The L-shape configuration can consist of a Single Pedestal Desk with a Return (shown to the right) or a Side Credenza with a Run-Off Desk.

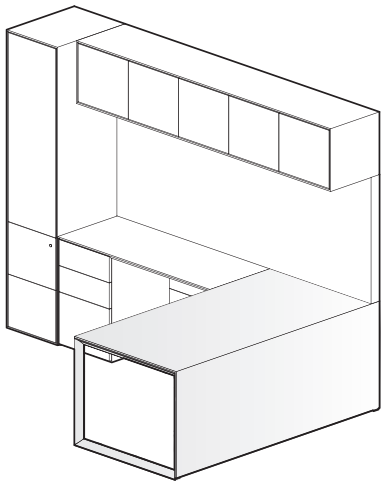


Step 2. Select the Desk

Once you've determined which type of L-Shape configuration will serve as the basis of your Merino Collection workstation, you're ready to specify your first individual component: The Desk.

For the L-Shape configuration with a Single Pedestal Desk (shown to the right) select the worksurface size, support options (a Corner Support MUST be specified as one of the options) and the modesty panel option.

For the L-Shape configuration with a Side Credenza and Run-Off Desk, specify the Run-Off Desk size, Support, and Modesty panel. (Standard Run-Off Desks are only available with the Metal Bevel Leg Support and Half-high Modesty Panel)

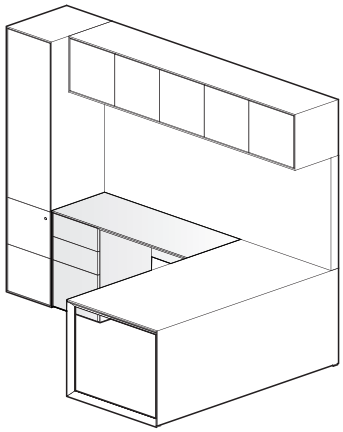


Step 3. Select a Credenza or Return

You'll next choose a Credenza or Return.

For Single Pedestal Desk applications (shown to the right) you'll next choose a return. The return connects to the Single Pedestal Desk. You'll need to specify the support(s) for the other side of the return and the appropriate size Access Panel. The support(s) and Access Panel should fill the space below the Return.

For Run-Off Desk applications you'll select a side credenza. Specify the desired size worksurface, the supports for each end of the Credenza and an Access Panel. The support(s) and Access Panel should fill the space below the Credenza worksurface. A corner support must be slected to support the end of the Credenza where the Run-Off Desk will be located.

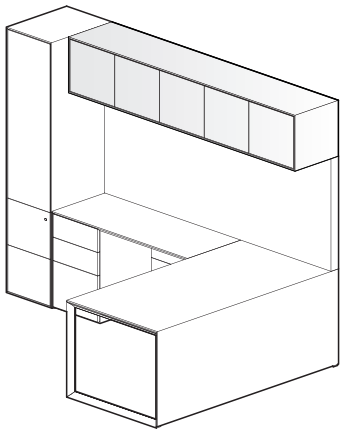


Step 4. Select the Overhead Unit (optional)

Merino Collectionoffers two types of Overheads: Stanchion-Mounted and Wall-Mounted. Stanchion-Mounted overheads create a freestanding application that does not rely on support from the wall when installed.

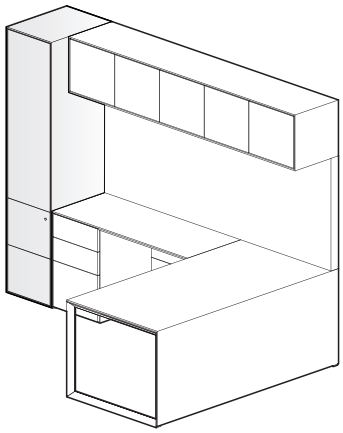
The Overhead mounts above the Side Credenza or Single Pedestal Desk and Return Combination (shown to the right). The length must be equal-length to the surface combination below.

Once the Overhead is selected, choose a Tackboard (Optional on Wall-Mounted Overheads). Tackboard length must be equal to overhead length.



Step 5. Select Towers (optional)

Available in two heights and multiple widths Merino Towers offer additional storage options.



Step 6. Select Tables, Additional Storage, and Accessories

Complete the office layout with X-base meeting tables, Mobile Pedestals, Bookcases, Freestanding Lateral Files, and other accessories.

Create a Layout.

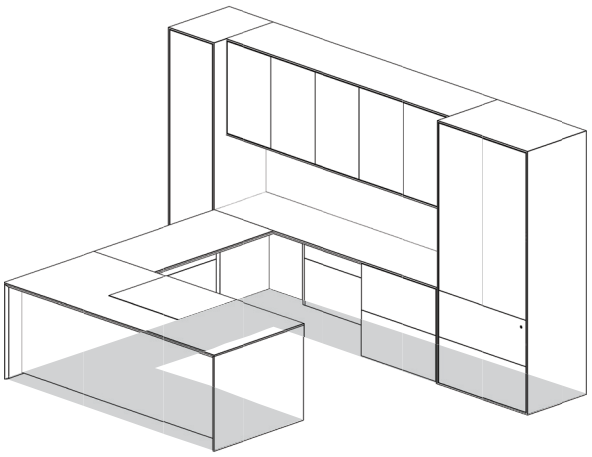
U-Shape Configurations

Step 1. Select a Configuration

It's important to first choose the type of U-shape configuration that will best suit the end user's requirements: Side U-shape or Back U-shape.

The Side U-shape configuration consists of a Side Credenza, Run-Off Desk, and Run-Off Back Credenza.

The Back U-shape configuration consists of a Single Pedestal Desk, Bridge, and Back Credenza (shown to the right).

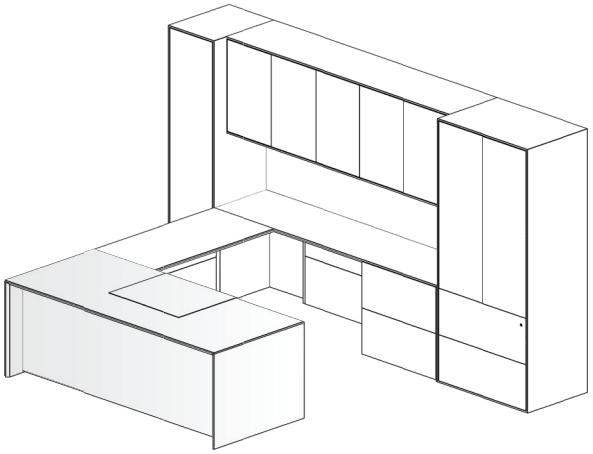


Step 2. Select the Desk

Once you've determined which type of U-Shape configuration will serve as the basis of your Merino Collection workstation, you're ready to specify your first individual component: The Desk.

For the Side U-shape configuration with a Side Credenza and Run-Off Desk, specify the Run-Off Desk size, Support, and Modesty panel. (Standard Run-Off Desks are only available with the Metal Bevel Leg Support and Half-high Modesty Panel)

For the Back U-shape configuration with a Single Pedestal Desk and Back Credenza (shown to the right) select the worksurface size, support options (a Corner Support MUST be spedified as one of the options) and the modesty panel option.

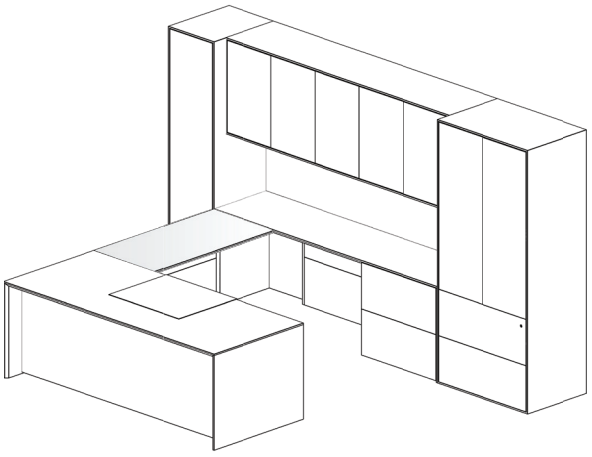


Step 3. Select the Bridge or Run-Off Credenza

Next you can specify a Bridge or Side Credenza, depending on which type of U-Shape configuration you've selected.

For the side U-shape configuration you'll specify the Run-Off Back credenza next, which is supported on one end by the side Credenza. Select the worksurface size, the support(s) for the unsupported end and an Access Panel. The support(s) and Access Panel should fill the space below the credenza work-surface.

For the back U-shape configuration (shown to the right) you'll next specify a Bridge. The Bridge is positioned between the Single Pedestal Desk and Back Credenza. Specify Bridge size and Access Panel for under the Bridge. The size of the Access Panel Must match the size of the Bridge.



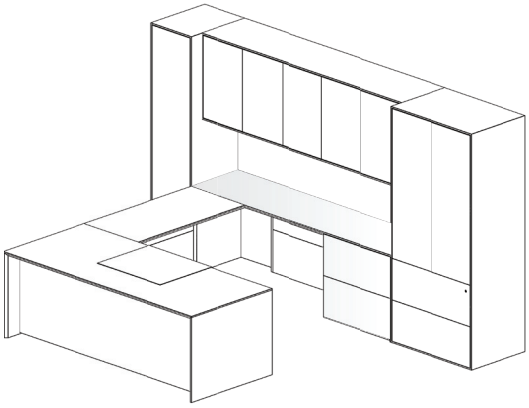
Step 4. Select the Final Credenza

Next you can specify a Side Credenza or Back Credenza, depending on which type of U-Shape configuration you've selected.

The side U-shape configuration features a Side Credenza, which supports one end of the Run-Off Desk and Run-Off Back Credenza.

The back U-shape configuration features a Back Credenza, which supports one end of the Bridge (shown above).

For both, choose the desired size worksurface, the supports for each end of the Credenza and an Access Panel. The support(s) and Access Panel should fill the space below the Credenza worksurface. A corner support must be slected to support the end(s) of the Credenza that will support the Run-Off Desk, Run-Off Back Credenza, or Bridge.

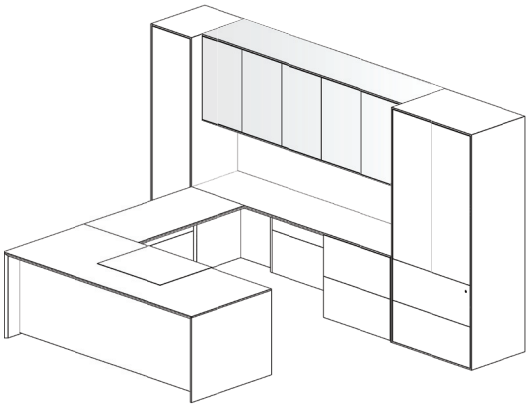


Step 5. Select the Overhead Unit

Merino offers two types of Overheads: Stanchion-Mounted and Wall-Mounted. Stanchion-Mounted overheads create a freestanding application that does not rely on support from the wall when installed.

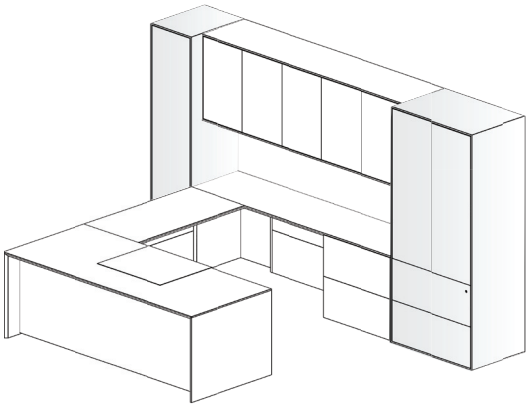
The Overhead mounts above the Side Credenza or Back Credenza. The length must be equal-length to the surface combination below.

Once the Overhead is selected, choose a Tackboard (Optional on Wall-Mounted Overheads). Tackboard length must be equal to overhead length.



Step 6. Select Towers (optional)

Available in two heights and multiple widths Merino Towers offer additional storage options.



Step 7. Select Tables, Additional Storage, and Accessories

Complete the office layout with X-base meeting tables, Mobile Pedestals, Bookcases, Freestanding Lateral Files, and other accessories.

Create a Layout.

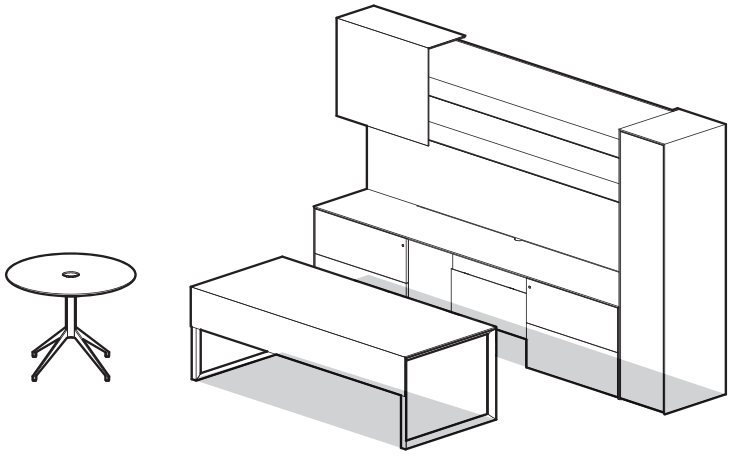
Freestanding Configurations

Step 1. Select a Configuration

It's important to first choose the type of Freestanding configuration that will best suit the end user's requirements.

A Freestanding configuration consists of a Freestanding Desk, Freestanding Credenza, and an optional Overhead Unit and Tower.

Merino offers both a Freestanding and an Ellipse Table Desk option.

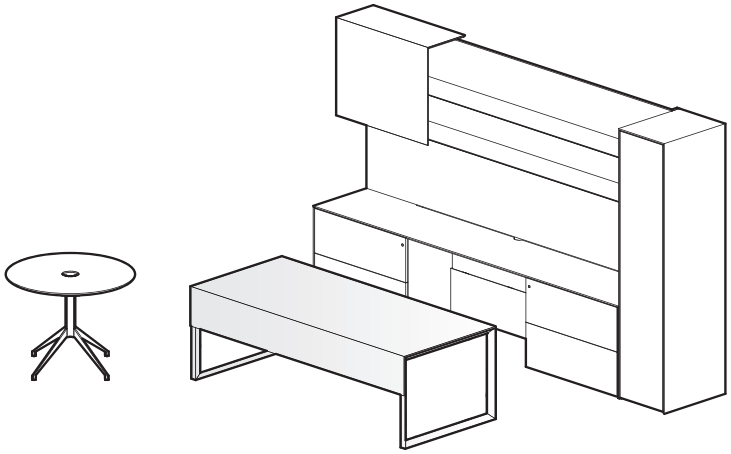


Step 2. Select the Desk

One you've determined which type of Freestanding configuration will serve as the basis of your Merino Collection workstation, you're ready to specify your first individual component: The Desk.

Freestanding Desks provide a range of sizes and options and allow features to be optioned on to the base model, including a Leather Power Blotter, Mitered Signature Organizer Drawer and Polished Chrome legs.

The Ellipse x-base table desk (specified in the Table Section) provides an elegant alternative to the rectangular freestanding desk.

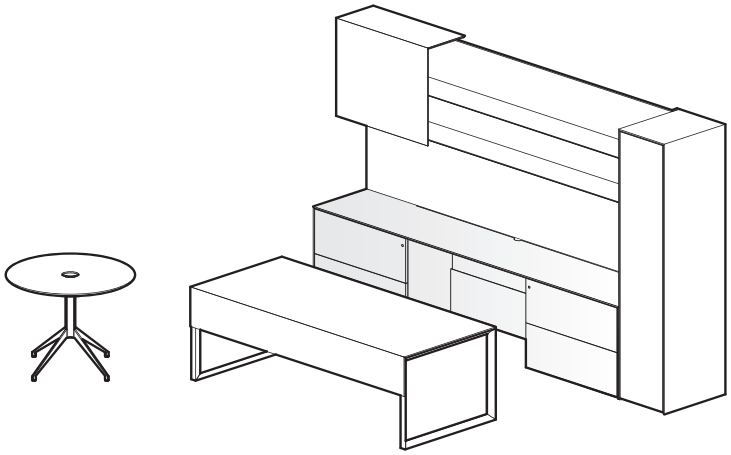


Step 3. Select the Credenza

Next you can specify a Freestanding Credenza.

The Freestanding Credenza includes the top, individual storage components and an Access Panel.

Choose the desired size worksurface, the supports for each end of the Credenza and an Access Panel. The support(s) and Access Panel should fill the space below the Credenza worksurface.

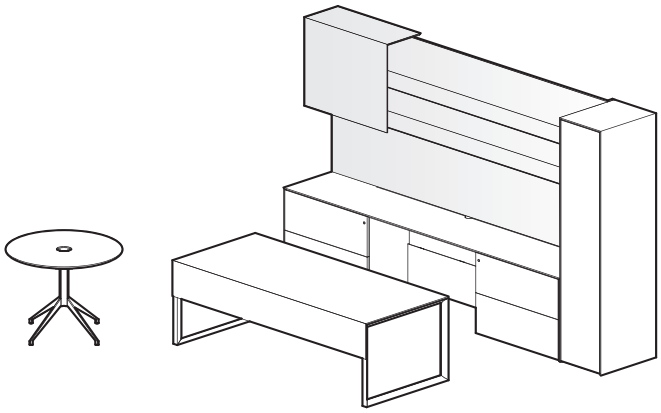


Step 4. Select the Overhead units (optional)

Merino offers two types of Overheads: Stanchion-Mounted and Wall-Mounted. Stanchion-Mounted overheads create a freestanding application that does not rely on support from the wall when installed.

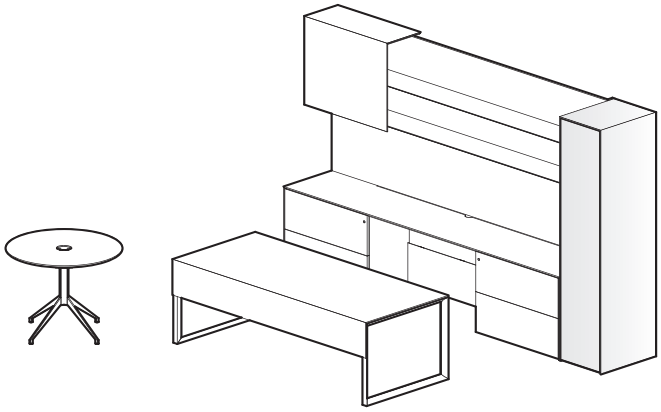
The Overhead mounts above the Freestanding Credenza. The length must be equal-length to the Credenza surface below.

Once the Overhead is selected, choose a Tackboard (Optional on Wall-Mounted Overheads). Tackboard length must be equal to overhead length.



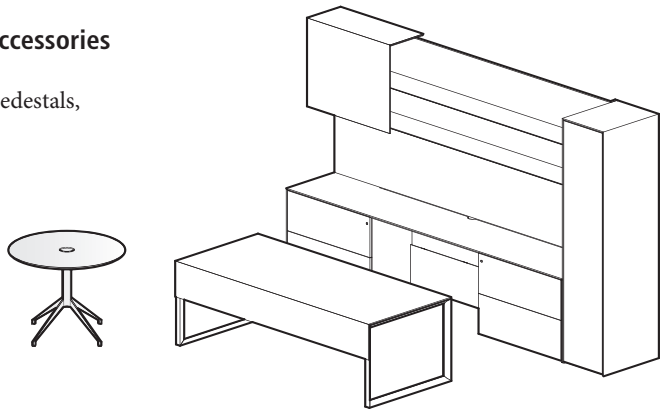
Step 5. Select Towers (optional)

Available in two heights and multiple widths Merino Towers offer additional storage options.



Step 6. Specify Tables, Additional Storage, and Accessories

Complete the office layout with X-base meeting tables, Mobile Pedestals, Bookcases, Freestanding Lateral Files, and other accessories.



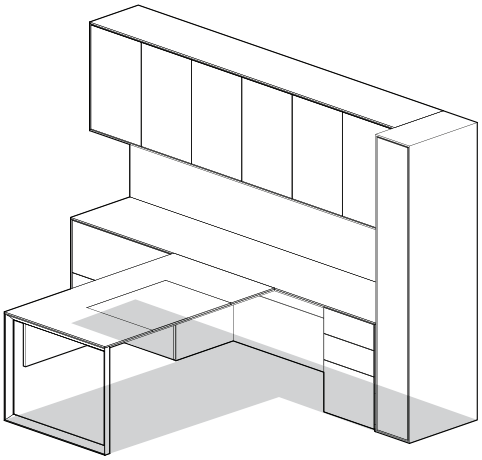
Create a Layout.

T-Shape Configurations

Step 1. Select a Configuration

It's important to first choose the type of T-Shape configuration that will best suit the end user's requirements. Consider where the run-off worksurface should be placed and orientation of the user, this will be required to determine credenza support components in step 3.

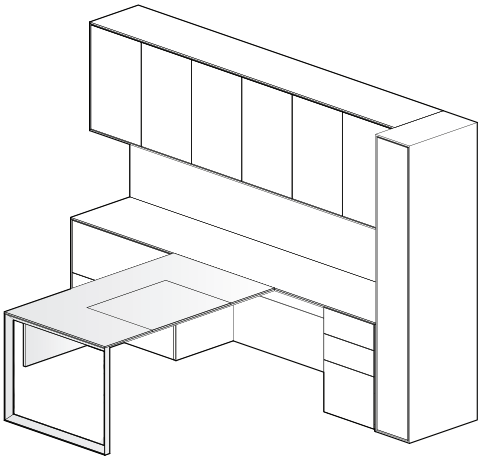
A T-Shape configuration consists of a Side Credenza with a Run-Off Desk.



Step 2. Select the Desk

Once you've determined the general orientation of your T-Shape Configuration you're ready to select the desk.

The T-Shape application utilizes a Run-Off Desk, specify the Run-Off Desk size, Support, and Modesty panel. (Standard Run-Off Desks are only available with the Metal Bevel Leg Support and Half-high Modesty Panel).

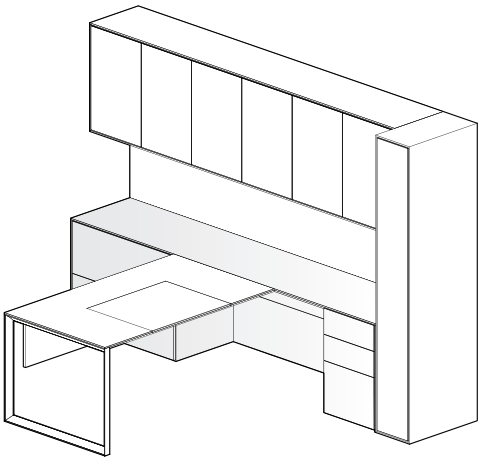


Step 3. Select the Credenza Shelf

Next you can specify a Side Credenza.

The Side Credenza includes the top, individual storage components and an Access Panel.

Choose the desired size worksurface, the supports for each end of the Credenza and an Access Panel. The support(s) and Access Panel should fill the space below the Credenza worksurface. A minimum of 36" knee space is required for attaching the Run-Off Desk in a T-Shape orientation.

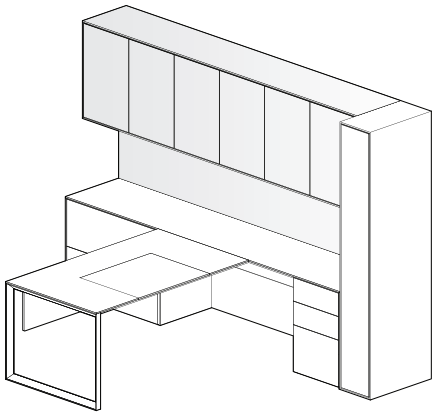


Step 4. Select the Overhead units (optional)

Merino offers two types of Overheads: Stanchion-Mounted and Wall-Mounted. Stanchion-Mounted overheads create a freestanding application that does not rely on support from the wall when installed.

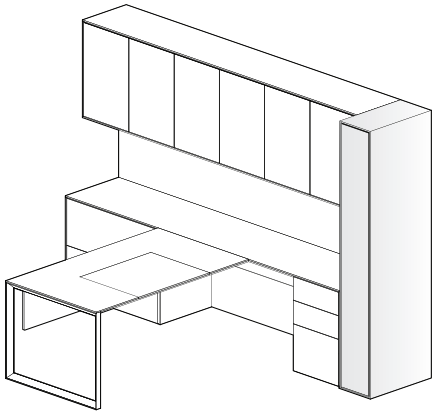
The Overhead mounts above the Side Credenza. The length must be equal-length to the surface below.

Once the Overhead is selected, choose a Tackboard (Optional on Wall-Mounted Overheads). Tackboard length must be equal to overhead length.



Step 5. Select Towers (optional)

Available in two heights and multiple widths Merino Towers offer additional storage options.



Step 6. Select Tables, Additional Storage, and Accessories

Complete the office layout with X-base meeting tables, Mobile Pedestals, Bookcases, Freestanding Lateral Files, and other accessories.

Stanchion-Mounted Overheads. Merino's concealed stanchion construction for its overheads eliminates the need for overhead end panels, giving overheads a light, open-ended appearance without any worksurface obstruction. The result is the clean look of wall-mounted overheads with the flexibility of freestanding casegoods.

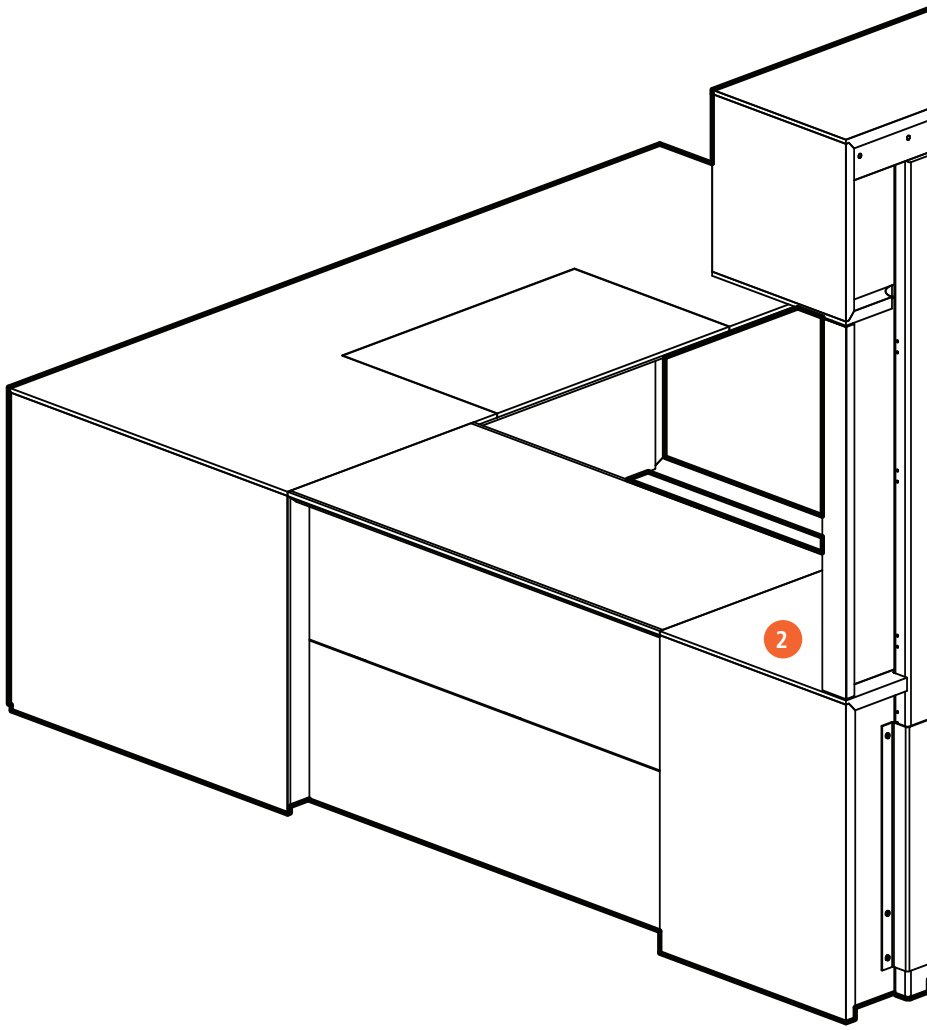
1 **Construction.**
Concealed stanchions support overheads.

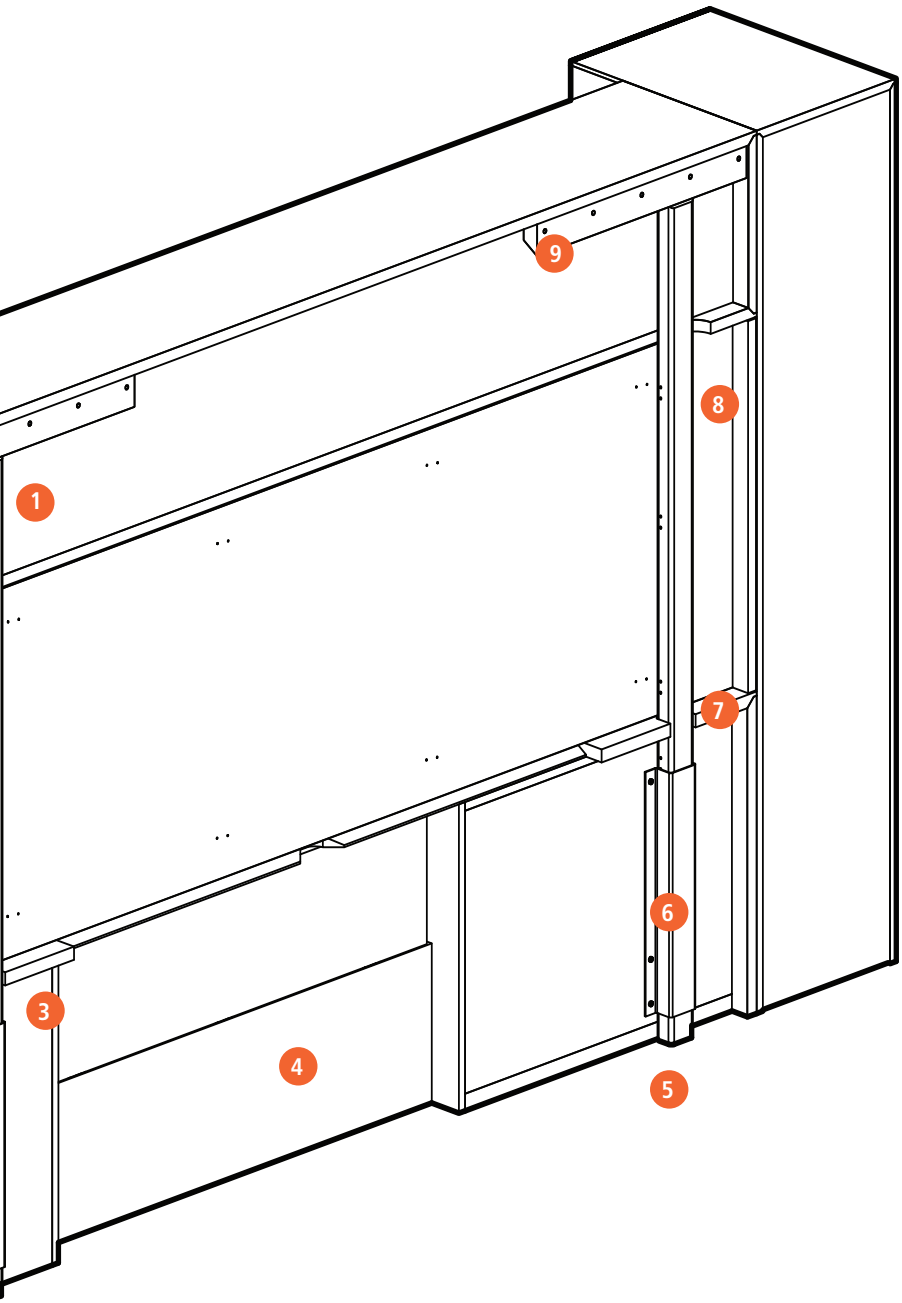
2 **Open Ends.**
Stanchion construction allows open-ended worksurfaces below overheads.

3 **Wire Management.**
Half-moon openings on Merino corner supports offer additional wire-management flexibility.

4 **Interior Cavity.**
Interior cavity provides ample room for routing power and data cables.

5 **Stanchion Leveling.**
Glide allows stanchions to be leveled.





6 **Mounting Bracket.**
Stanchion mounting bracket secures stanchion to case.

7 **Leveling Score Marks.**
Score marks are provided on stanchions for easy leveling to the worksurface during installation.

8 **Concealed Stanchions**
Back Panel conceals stanchions and provides a clean, flush-to-the-wall appearance

9 **Overhead Mounting.**
Overheads are simply mounted to stanchions with wooden cleats.

Technology Accommodation

Merino provides well-planned wire-management for each component. Its standard technology accommodation offering meets most needs, and additional, scalable options are available to support even the most technology-intensive environments.

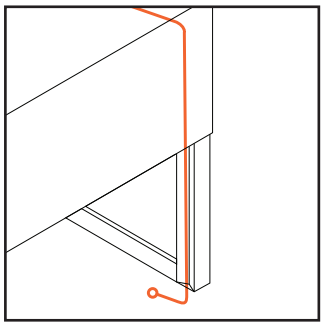
1 **Worksurface Grommets.**
Grommets can be specified on the worksurfaces of desks, credenzas, bridges, and returns. Grommets can be specified in right, left, or center positions of desks, credenzas and returns, and in center position on bridges.

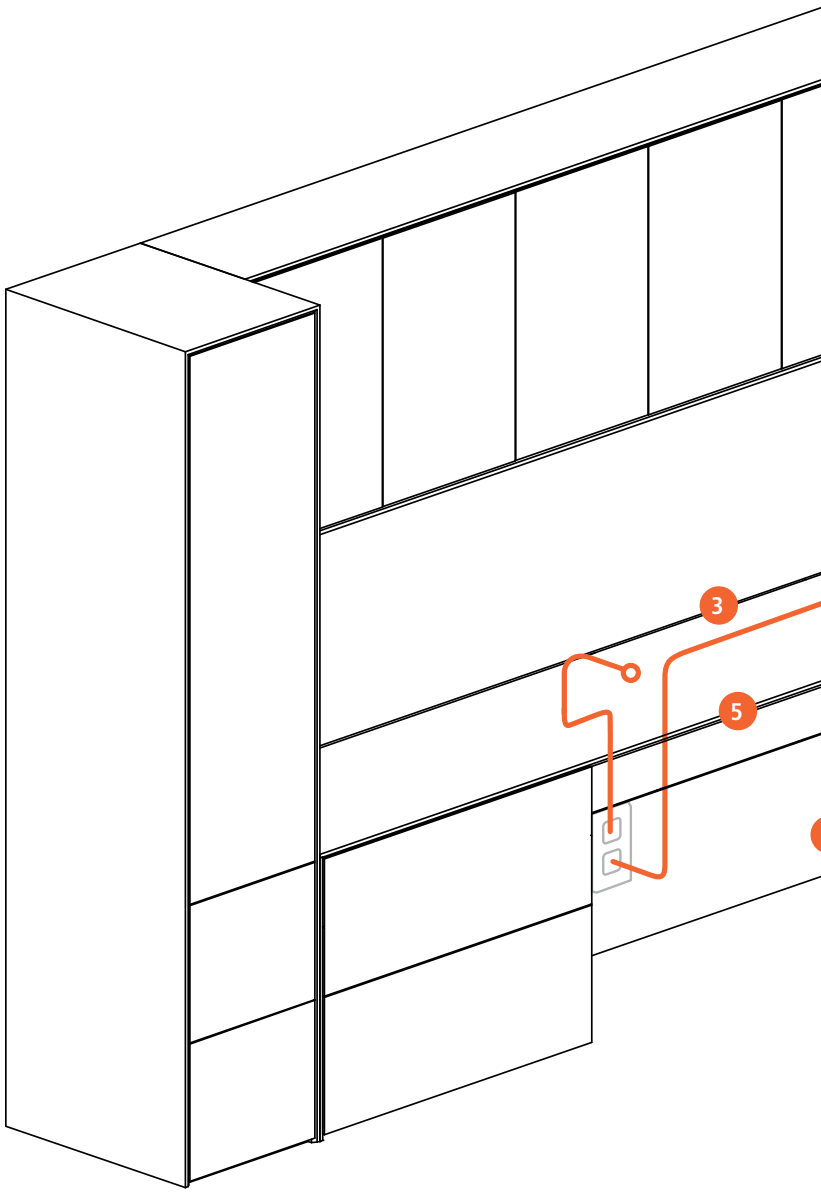
2 **J-Channel.**
J-Channel provides wire management beneath Merino worksurfaces.

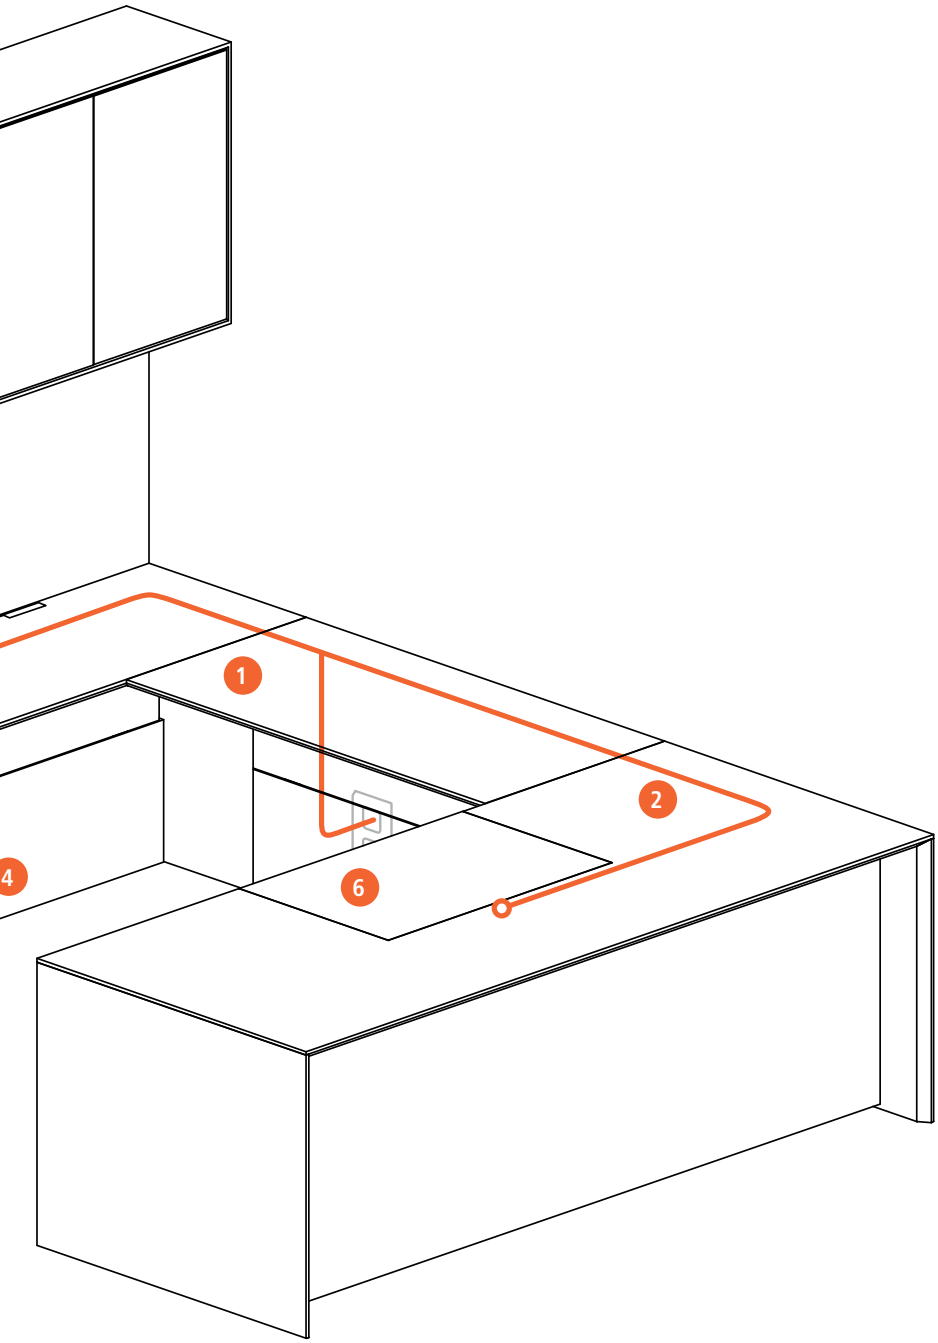
Optional Technology Accommodations

Technology Pedestal with Power Drawer and Door
Wire management openings are located in the bottom of all pedestals. Opening on back of pedestal on credenzas and returns provides proper ventilation. Tech Pedestals on desks have oversized opening on user's side that allows wire management in addition to ventilation.

Wire Management Shroud.
Metal Bevel Legs with half-high modesty include a wire management shroud that attaches to the inside of the leg to manage cables down the leg to the floor. Finish of the shroud will match the finish of the leg.







3 **Continuous Wire Pass Through.**
Credenzas with Stanchion-Mounted Overheads include a continuous wire pass through in the worksurface in front of the veneer panel/ tackboard. The pass-through has a larger opening on one end and extends nearly the entire length of the worksurface, allowing wire management anywhere the user requries it. Wire pass-through requires knee space and is not included when credenza is filled with storage components.

4 **Wire Management Cavity.**
The cavity behind Merino Overheads and corresponding credenzas, returns and bridges allows simple wire management.

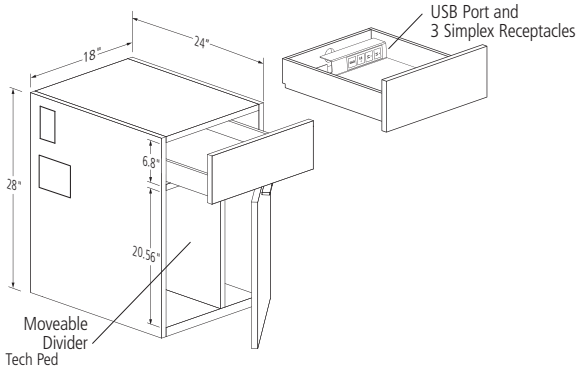
5 **Access Panels.**
Optional flip-down wire management Access Panel is available on back credenzas, returns, and bridges.

6 **Leather Power Blotter.**
Optional on Veneer Tops, the Leather Power Blotter slides back to reveal a Power Access trough that includes 3 simplex receptacles and 1 USB.

Tech Pedestal with Power Drawer and Door

The Tech Pedestal provides CPU storage on one side of a moveable dividing panel, and an open section on the other side for cord/cable storage. The top drawer includes three simplex receptacles and one USB port. Grommet at the top allows easy wire management. Thermostatically controlled fan provides temperature regulation. Tech Pedestals on desks have oversized opening on user's side that allows wire management in addition to ventilation.

Note: Image to the right is for reference only, overall Pedestal dimensions are for Credenza Pedestal.



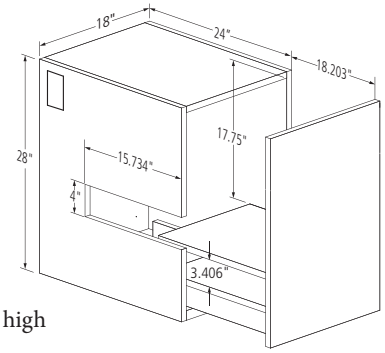
Printer Pedestal

The Printer Pedestal accommodates most inkjet printers. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. Grommet in top and side of pedestal provides easy wire management.

Consult Printer Pedestal dimension information to ensure that the pedestal will accommodate your printer.

Printer Tray Dimensions: 15" wide x 19" deep x 16.1875" high

Note: Image to the right is for reference only, overall Pedestal dimensions are for Credenza Pedestal.



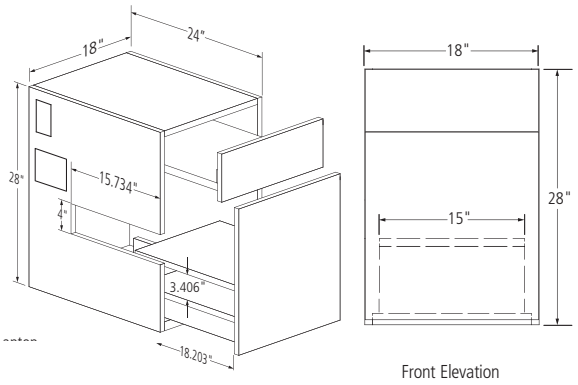
Laptop/Printer Pedestal

The Laptop/Printer Pedestal provides laptop storage in the top drawer and accommodates most inkjet printers in the lower drawer. The laptop drawer provides convenient storage and concealment of your laptop, freeing up valuable worksurface space. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. Grommet in top and side of pedestal provides easy wire management. Thermostatically controlled fan provides temperature regulation.

Consult Printer Pedestal dimension information to ensure that the pedestal will accommodate your printer.

Printer Tray Dimensions: 15" wide x 19" deep x 12.125" high

Note: Image to the right is for reference only, overall Pedestal dimensions are for Credenza Pedestal.

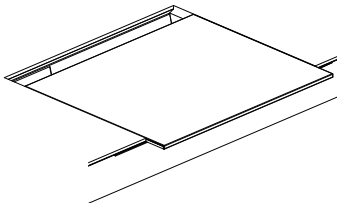


Personalized Features

The Merino Collection offers elements of personalization and refined details that elevate the warmth and performance of an executive casegood.

Leather Power Blotter

The Merino Leather Power Blotter is integrated directly into the worksurface and slides back to reveal power and data access and cable management. The Leather Power Blotter is only available on wood worksurfaces. Power Access trough includes 3 simplex recptacles and 1 USB. The blotter is 28" w x 21" d on a 30" deep worksurface and 28" w x 23" d on a 36" deep worksurface.

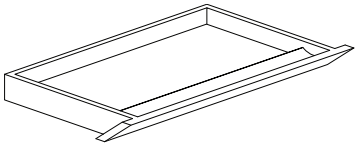


Signature Organizer Drawer

The Merino Signature Organizer Drawer features a mitered edge construction and is leather-lined with polished chrome dividers. The organizer drawer provides an elegant place for neatly organizing personal items and technology devices. Overall dimenions are 36" w x 15" d x 1 7/8" h

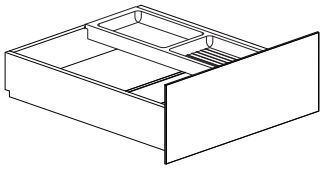
Organizer Drawer

The Merino Organizer Drawer is leather-lined. The Organizer Drawer provides an elegant place for neatly organizing personal items and technology devices. The Organizer Drawer is suitable for all Merino worksurfaces and can be added to Merino worksurfaces in the field. Overall dimenions are 18" w x 15" d x 1 7/8" h.



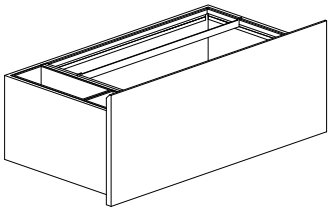
Leather-Lined Box Drawers

Merino Box Drawers are leather lined and provide a neat way to organize and protect personal items and technology devices. All Merino Series Box Drawers include the leather liner (leather can be optioned off). The Top Box Drawer will also include a polished chrome divider and painted pencil tray.



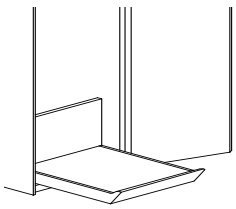
Lateral File with Organizer Boxes

A Lateral File with Organizer Boxes provides a space to organize and store personal accessories.



Slide-Out Shoe Tray

Merino 18" and 36" Wardrobe towers include a slide out shoe tray and amenities like bag hooks, personal mirror, and hanger bar to provide a home for personal bags or a change of wardrobe.



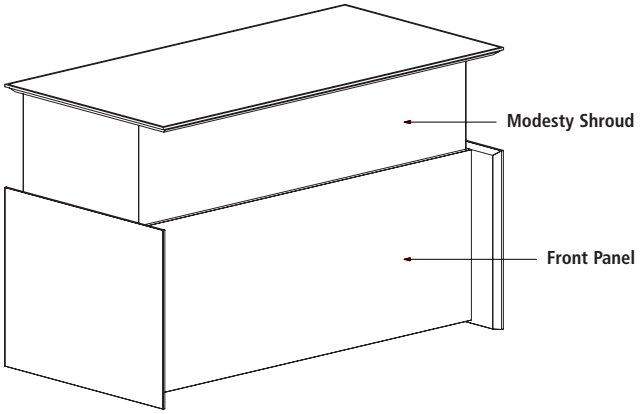
Adjustable Height Desks.

The electronic Adjustable Height Aerial Refreshed desk is available in two standard base styles; a desk shell and a metal leg version. Both versions are Freestanding desks and can be integrated into other product configurations through the Nucraft iSpec service. The Metal Leg version is also available as a Run-Off desk for T-Shaped applications.

Freestanding Adjustable Height Desk Shell

This rectangular desk shell features two panel legs and an inset full-height front modesty panel. The lift columns attach to the desk shell and are shrouded on the interior with veneer panels. When in the raised position, a 3-sided modesty shroud maintains the clean, integrated aesthetic.

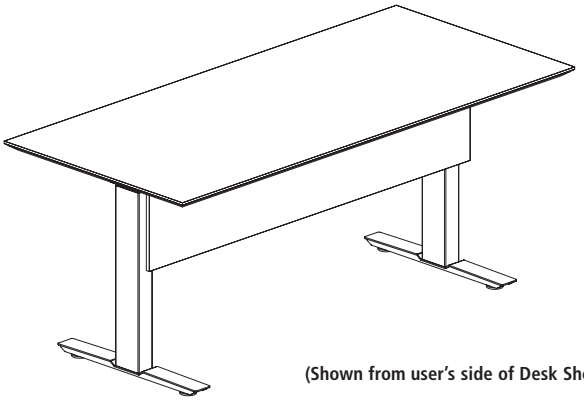
- Adjustment range is from 29-1/2" to 45"
- Controller features digital height readout and four programmable stops.
- See page 182 for available sizes and specification requirements.
- Lift mechanisms are designed to support all desk components, plus a maximum of 50lbs of additional weight.



Freestanding Adjustable Height Desk

This rectangular worksurface features a T-leg metal base and an optional half-height modesty.

- Adjustment range is from 27-1/2" to 46"
- Controller features digital height readout and four programmable stops.
- See page 183 for available sizes and specification requirements.
- Lift mechanisms are designed to support all desk components, plus a maximum of 50lbs of additional weight.



(Shown from user's side of Desk Shell)

Programmable Controller

The programmable controller features up/down buttons, four programmable preset stops, and a digital readout that displays the worksurface height.

No Locks (Pedestals)	-NL	$0	
Power in Box Drawer	-PD	$284	
No Leather in Box Drawer	-NLBD	DEDUCT $208 (per Pedestal)	
Pulls			
- Applied Pull	-AP	No upcharge	
- Integrated Pull	-IP	No upcharge	
- Push-to-open (pedestal)	-P2P	$1,169	
- Push-to-open (lateral file)	-P2L	$1,169	

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)
See pages 6-7 for surface material options.
- Choose Wood Species & Finish
- Choose Metal Finish, if applicable
- Choose Paint Color, if applicable
- Choose Leather Finish, if applicable. Choose Spinneybeck Vincenza or Spinneybeck Volo colors from page 8. (If not specified, default is Spinneybeck Vincenza 2122 Cinque Terre)
- Choose Pull option for Pedestals and Lateral Files

General Information:
- Grain direction runs horizontal
- Specify left to right support and outfit every inch of space with either pedestals or a combination of pedestals, corner support, back panels, or no back panels
- Pedestals and lateral files are standard with a lock
- Merino Series Box/Box/File pedestals include a pencil tray in upper box drawers
- Merino Series Pedestals have painted drawer boxes, undermount slides, low-profile hanger rails, and soft-close feature.
- Merino Series Box Drawers are leather lined and include polished dividers. Leather finish MUST be specified. Leather can be optioned off by specifying -NLB option.
- Conventional Series pedestals have maple drawer boxes and side mount slides; Conventional Series Pedestals can ONLY be specified with Applied or Integral Pulls
- Technology Pedestal includes 3 simplex receptacles and 1USB port
- Printer Pedestal and Laptop/Printer Pedestal must be located adjacent to knee space
- Power in Box Drawer option is only available on Merino Series upper box drawers on 18" wide pedestals only; Power option has 3 simplex receptacles and 1USB port
- Credenzas with Stanchion-Mounted Overheads include a continuous wire pass-through in the worksurface in front of the tackboard. Wire pass-through requires knee space and is not included when credenza is filled with storage components. A 5.5"w x 1.5"d access point for cords is centered on the wire-pass-through.
- Wire Management is included
- Push-to-open pull option on pedestals requires access to an electrical outlet
- Doors are standard with a Touch Latch Mechanism and cannot be specified with other pull options. Pulls must be specified for Box and File drawers.

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

See pages 6-7 for surface material options.

- Choose Wood Species & Finish
- Choose Metal Finish, if applicable
- Choose Paint Color, if applicable
- Choose Leather Finish, if applicable. Choose Spinneybeck Vincenza or Spinneybeck Volo colors from page 8. (If not specified, default is Spinneybeck Vincenza 2122 Cinque Terre)
- Choose Pull option for Pedestals and Lateral Files

Specify both Left and Right support by adding L or R to the end of the support model number.

General Information:

- Grain direction runs horizontal
- Specify left to right support and outfit every inch of space with either pedestals or a combination of pedestals, corner support, back panels, or no back panels
- Pedestals and lateral files are standard with a lock
- Merino Series Box/Box/File pedestals include a pencil tray in upper box drawers
- Merino Series Pedestals have painted drawer boxes, undermount slides, low-profile hanger rails, and soft-close feature
- Merino Series Box Drawers are leather lined and include polished dividers. Leather finish MUST be specified. Leather can be optioned off by specifying -NLB option.
- Conventional Series pedestals have maple drawer boxes and side mount slides; Conventional Series Pedestals can ONLY be specified with Applied or Integral Pulls
- Technology Pedestal includes 3 simplex receptacles and 1USB port
- Printer Pedestal and Laptop/Printer Pedestal must be located adjacent to knee space
- Power in Box Drawer option is only available on Merino Series upper box drawers on 18" wide pedestals only; Power option has 3 simplex receptacles and 1USB port
- Wire Management is included
- Push-to-open pull option on pedestals requires access to an electrical outlet
- Doors are standard with a Touch Latch Mechanism and cannot be specified with other pull options. Pulls must be specified for Box and File drawers.

General Information & Options

Options:

No Task Light	NT	deduct -$416 (Only allowed with Full Door Overheads)

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)
See pages 6-7 for surface material options.
- Choose Wood Species & Finish
- Choose Glass Finish, if applicable
- Choose Paint Color, if applicable

General Information:
- Grain direction is Horizontal
- Only overheads with Full Doors include recessed LED task light; can be removed as an option as other overheads do not include them
- Aluminum Shelf depth is 12-11/16"; Aluminum Shelf is Clear Anodized (CA)
- Overhead depth is 17-1/4" or 19-1/4"; interior depth is 13-1/2" or 15-1/2"
- Overhead full height doors - single high = 16 - 3/4"; double high = 26 1/4"
- Glass overhead doors are frameless back-painted glass; glass is tempered
- Back-painted glass is low-iron glass
- Stanchion-Mounted overheads add 2" of depth to the overall footprint
- Single Height - 80" High Overhead option provides a larger tack-zone for accommodating monitors on the workwall
- Doors are standard with a Touch Latch Mechanism and cannot be specified with other pull options
- Door handing on full door overheads is optimized for ease of access to contents.
  On 72" the two left doors open to the left and the two right doors open to the right.
  On 96" overheads the three doors on the left open to the left and the two doors on the right open to the right.
  On 108" overheads the first two doors on the left open left, the middle left door opens right, the middle right door opens left, and the two right doors open right.
- Double Height Stanchion-Mounted overheads over 96" wide must be supported by at least one pedestal

General Information & Options

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)
See pages 6-7 for surface material options.
- Choose Wood Species & Finish
- Choose Glass Finish, if applicable

General Information:
- Grain direction is horizontal
- Fabric Tackboard, Veneer Magnetic Board, or Glass Magnetic Board must be specified with stanchion-mounted overheads
- Fabric Tackboard, Veneer Magnetic Board, or Glass Magnetic Board must equal the length of the corresponding overhead.
- Fabric Tackboards 96" and greater will have an even split two piece construction
- Glass Magnetic Boards 96" and greater will have an even split two piece construction
- Glass Magnetic Boards are only avaiable in gloss finish options.
- Magnets are included with Veneer Magnetic Boards and Glass Magnetic Boards
- 21" High Tackboard, Veneer Magnetic Board, or Glass Magnetic Board can only be specified with a Double Height -80" Overheads.
- 23" High Tackboard, Veneer Magnetic Board, or Glass Magnetic Board can only be specified with a Single Height -70" Overhead.
- 33" High Tackboard, Veneer Magnetic Board, or Glass Magnetic Board can only be specified with a Single Height -80" Overhead.
- Back-painted glass is low-iron glass
- See page 9 for fabric restrictions

General Information & Options

Options:

No Task Light	NT	deduct -$416 (Only allowed with Full Door Overheads)

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)
See pages 6-7 for surface material options.
- Choose Wood Species & Finish
- Choose Glass Finish, if applicable
- Choose Paint Color, if applicable

General Information:
- Grain Direction is Horizontal
- Overheads with Full Doors include recessed LED task light; can be removed as an option
- Aluminum Shelf depth is 12-11/16"; Aluminum Shelf is Clear Anodized (CA)
- Overhead depth is 17-1/4" or 19-1/4"; interior depth is 13-1/2" or 15-1/2"
- Overhead full height doors - single high = 16 - 3/4"; double high = 26 1/4"
- Glass overhead doors are frameless back-painted glass; glass is tempered
- Back-painted glass is low-iron glass
- Tackboard and Glass Magnetic Board option available. See page 205.
- Wall-Mounted Overheads are shipped with the necessary cleats for wall mounting. The hardware that attaches the cleats to the wall is not included.
- Customers are responsible for ensuring that the structural wall has adequate strength to support the overhead and its components.
- The recommended installation height for wall-mounted Single Height-70" High Overheads is 23 - 3/4" from the top of the worksurface to the bottom of the overhead unit
- The recommended installation height for wall-mounted Double Height - 80" High overheads is 21-1/2' from the top of the worksurface to the bottom of the overhead unit
- Single height wall-mounted overheads can also be mounted at the 80" height to create a large tack area for monitors; for this application recommended installation height is 33-3/4" from the top of the worksurface to the bottom of the overhead unit
- Doors are standard with a Touch Latch Mechanism and cannot be specified with other pull options
- Door handing on full door overheads is optimized for ease of access to contents.
  On 72" the two left doors open to the left and the two right doors open to the right.
  On 96" overheads the three doors on the left open to the left and the two doors on the right open to the right.
  On 108" overheads the first two doors on the left open left, the middle left door opens right, the middle right door opens left, and the two right doors open right.

General Information & Options

Options:

Tower Locks	-L	$142	
No Lateral File Lock	-NL	$0	
Power in Box Drawer	-PD	$284	
No Leather in Box Drawer	-NLBD	DEDUCT $208 (per Tower)	
Pulls			
- Applied Pull	-AP	No upcharge	
- Integrated Pull	-IP	No upcharge	
- Push-to-open (pedestal)	-P2P	$1,169	
- Push-to-open (lateral file)	-P2L	$1,169	
Polished Chrome Pull	-PCAP	$302	(Upcharge per Tower)

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

See pages 6-7 for surface material options.

- Choose Wood Species & Finish
- Choose Metal Finish, if applicable
- Choose Paint Color, if applicable
- Choose Leather Finish, if applicable. Choose Spinneybeck Vincenza or Spinneybeck Volo colors from page 8. (If not specified, default is Spinneybeck Vincenza 2122 Cinque Terre)
- Choose Pull option for Drawers

General Information:

- Grain direction runs horizontal
- Specify left to right support and outfit every inch of space with either pedestals or a combination of pedestals, corner support, back panels, or no back panels
- Towers are standard without a lock
- 36" wide 2 Lateral Files are standard with a lock on the drawers and upper door
- Merino Series Box/Box/File pedestals include a pencil tray in upper box drawers
- Merino Series Towers have painted drawer boxes, undermount slides, low-profile hanger rails, and soft-close feature
- Merino Series Box Drawers are leather lined and include polished dividers. Leather finish MUST be specified. Leather can be optioned off by specifying -NLB option.
- Conventional Series Towers have maple drawer boxes and side mount slides; Conventional Series Pedestals can ONLY be specified with Applied or Integral Pulls
- Hanger bar, coat hanger, and a mirror (13.5"w x 21"h) is included in all Merino Series Towers with a Wardrobe; 18" wide Wardrobe only Towers also include a pull out Shoe Tray at the bottom of the Wardrobe. Conventional Series towers with wardrobe include a Hanger Bar.
- Full-Height Doors and Upper Doors on Towers are standard with Touch Latch mechanism, specify pull option for Box and File drawers
- Push-to-open pull option on pedestals requires access to an electrical outlet
- Freestanding 12"-wide (or smaller) towers must be fastened to the adjacent case

PD-36	1 Power dot centrally located for table desk applications
PD-43	2 Power dots, 1 at each end for conference applications

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

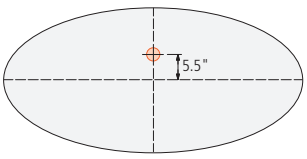
See pages 6-7 for surface material options.

- Choose Wood Species & Finish, if -VP, -VV, -GV or -SV base is selected
- Choose Glass Finish, if -GP or -GV base is selected
- Choose Metal Finish, if grommet (-MCGC) is selected
- Choose Paint Color, if if -VP, -GP or -SP base is selected

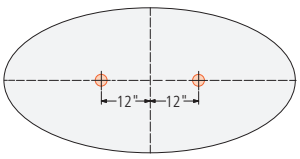
General Information:

- Base is Polished Stainless Steel
- When Grommet is selected the grommet is located in the middle of the table.
- Power dot option includes 72" power cord. Finish is Satin NIckel. The Pdot2 includes one open data port. Voice / data modules must be ordered separately, contact your local AV integrator. Power dot is centered on round and square tables. For ellipse table specify location code, reference drawing below for locations.

PD-36 power dot location (ellipse only)



PD-43 power dot location (ellipse only)



Neos Planning Guide

U.S. Patent No. 8,205,950 B1 (Workstation Unit with Vertically Movable Panel)

Create a Layout.

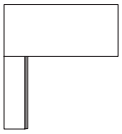
There are three primary types of Neos workstation configurations: L-Shape, U-Shape, and Freestanding. The specification process is outlined in the following Pages with additional detail devoted to components.

L-Shape Configurations

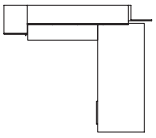
Step 1. Select a Configuration

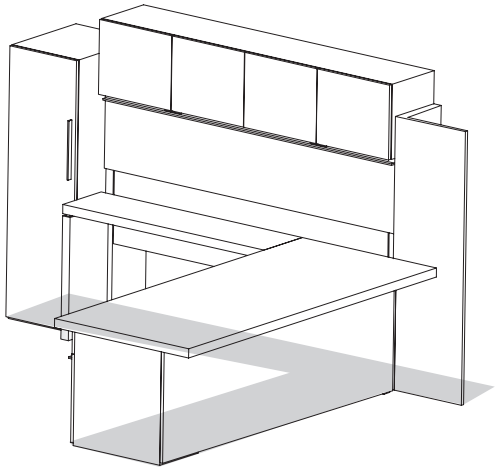
It's important to first choose whether a Tall or Low Wall will best suit the end user's work style, space, storage and furniture requirements.

The L-Shape with Low Wall as support consists of a Single Pedestal Desk with the Low Wall chosen for support and an optional Return Shelf.



The L-Shape with Tall Wall consists of a Single Pedestal Desk with Tall Wall and optional Return Shelf (Shown at right).





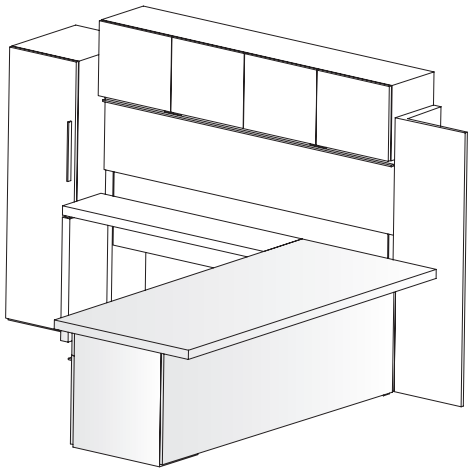
Step 2. Select the Desk

Once you've determined which type of L-Shape configuration will serve as the basis of your Neos workstation, you're ready to specify your first individual component: The Desk.

The L-Shape with Tall Wall configuration features a Single Pedestal Desk (shown at right).

The Single Pedestal Desk includes the worksurface, corner support and full height modesty panel. Select desired support to complete the desk (see Page 224 for supports).

Neos Single Pedestal Desks are standard with a 6" overhang on pedestal end. The overhang can be changed to 12" or flush on each end by choosing the appropriate option.

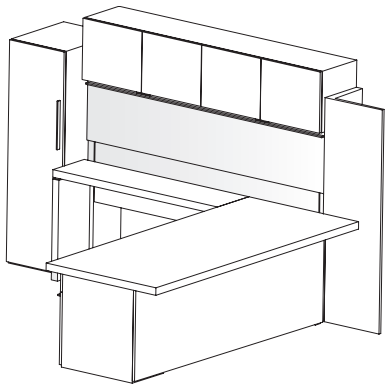


Step 3. Select a Storage Wall

You'll next choose a Tall Wall or Low Wall, depending on which type of L-Shape configuration you've selected. Both storage walls are available with and without doors and come with a standard work tool package.

Specify appropriate supporting Low Wall for the L-Shape with Low Wall as support configuration.

The L-Shape configuration at the right features a Tall Wall.

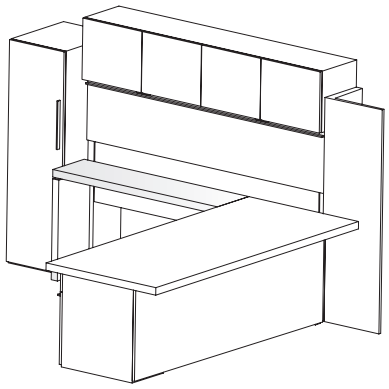


Step 4. Select the Return Shelf (optional)

Neos offers an optional Return Shelf to serve as a piling surface.

In Low Wall configurations, the Return Shelf sits on top of the wall to create an aligned look.

In Tall Wall configurations, the Return Shelf sits in front of the wall (shown at right).

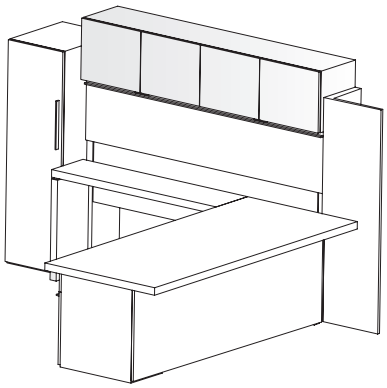


Step 5. Select the Overhead Units (optional)

Neos offers full door Overhead units in single and double heights.

In Low Wall configurations, the Wall-Mount Overhead must be selected. This unit can be mounted on any load-bearing wall.

In Tall Wall configurations, the Overhead sits on top of the Tall Wall. Overheads can be any length (up to the length of the wall) and can be mounted in any location on top of the wall.

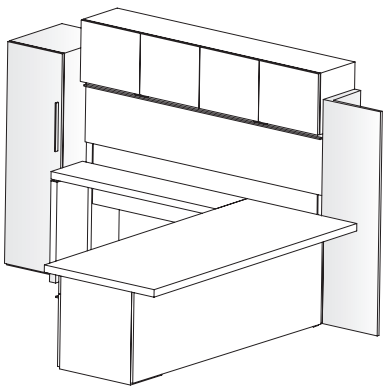


Step 6. Select Towers and Wardrobe Panels (optional)

Available in two heights and two widths, Neos Towers offer additional storage options.

Wardrobe Panels provide a cost effective, minimalist approach to concealment of outerwear.

18"w Tower with Shelves and 18" Wardrobe Panel is shown at right.



Step 7. Specify Accessories and Additional Storage

Additional work tools are available to customize your wall to fit your work style. Mobile Pedestals, Bookcases and Freestanding Lateral Files offer additional storage options.

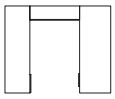
Create a Layout.

U-Shape Configurations

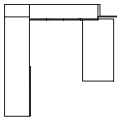
Step 1. Select a Configuration

It's important to first choose whether a Tall or Low Wall will best suit the end user's work style, space, storage and furniture requirements.

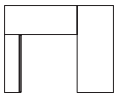
The side U-Shape with Low Wall as support consists of a Single Pedestal Desk with the Low Wall chosen for support, an optional Bridge Shelf and a Credenza.



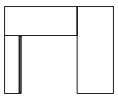
The side U-Shape with Tall Wall consists of a Single Pedestal Desk with Tall Wall, optional Bridge Shelf and Credenza.

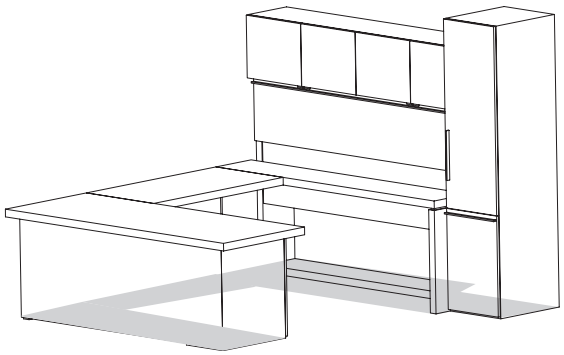


The back U-Shape with Low Wall consists of a Single Pedestal Desk, Bridge, Low Wall and Credenza Shelf.



The back U-Shape with Tall Wall consists of a Single Pedestal Desk, Bridge, Tall Wall, and optional Credenza Shelf (Shown at right).





Step 2. Select the Desk

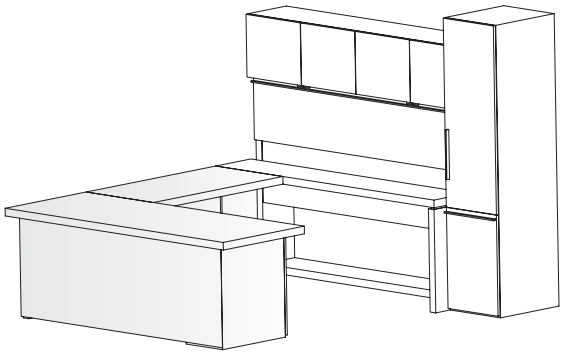
Once you've determined which type of U-Shape configuration will serve as the basis of your Neos workstation, you're ready to specify your first individual component: The Desk.

The side U-Shape with Low Wall as support configuration features a Single Pedestal Desk with the Low Wall support option.

The remaining three U-Shape configurations feature a Single Pedestal Desk (shown at right).

The Single Pedestal Desk includes the worksurface, corner support and full height modesty panel. Select desired support to complete the desk (see Page 224 for supports).

Neos Single Pedestal Desks are standard with a 6" overhang on pedestal end. The overhang can be changed to 12" or flush on each end by choosing the appropriate option.

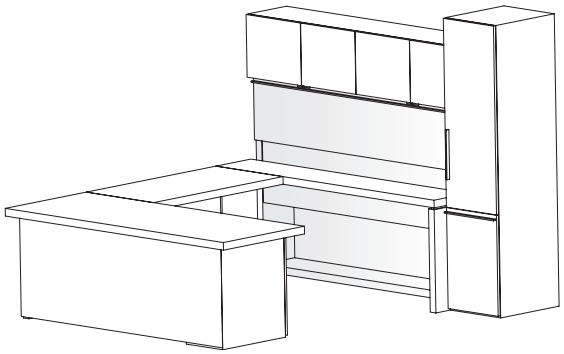


Step 3. Select a Storage Wall

You'll next choose a Tall Wall or Low Wall, depending on which type of U-Shape configuration you've selected. Both storage walls are available with and without doors and come with a standard work tool package.

Specify appropriate supporting Low Wall for the side U-Shape with Low Wall as support configuration.

The U-Shape configuration at the right features a Tall Wall.



Step 4. Select the Bridge or Bridge Shelf

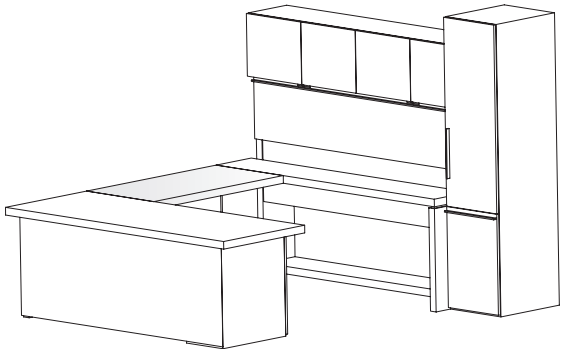
Next you can specify a Bridge or Bridge Shelf, depending on which type of U-Shape configuration you've selected.

In the side U-Shape with Low Wall as support configuration, a Bridge Shelf is optional to align the worksurface heights.

In the side U-Shape with Tall Wall configuration, the optional Bridge Shelf sits in front of the Tall Wall and connects the Single Pedestal Desk to the Back Credenza.

In the back U-Shape with Low Wall configuration, the Bridge connects the Single Pedestal Desk with the Credenza Shelf.

In the back U-Shape with Tall Wall configuration, the Bridge connects the Single Pedestal Desk to the Credenza Shelf (shown at right).



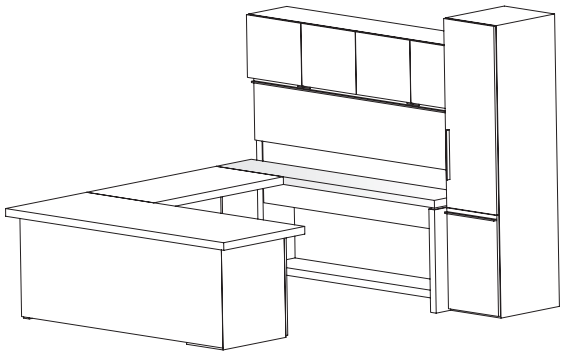
Step 5. Select the Credenza or Credenza Shelf

Next you can specify a Back Credenza or Credenza Shelf depending on which type of U-Shape configuration you've selected.

In the side U-Shape configurations, a Back Credenza is used when a Bridge Shelf was previously selected. If the station does not include a Bridge Shelf, then a Freestanding Credenza would be selected.

In the back U-Shape configuration with Low Wall, a Credenza Shelf with Low Wall option is to attach to the Bridge. Credenza Shelves may be the same size or longer than the Low Wall.

In the back U-Shape configuration with Tall Wall, an optional Credenza Shelf is used when additional pilling surface is desired (shown at right).

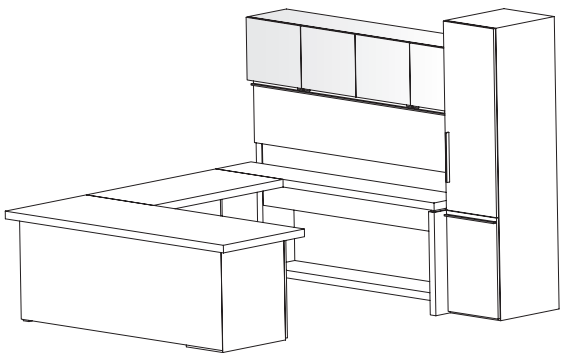


Step 6. Select the Overhead units (optional)

Neos offers full door Overhead units in single and double heights.

In Low Wall configurations, the Wall-Mount Overhead must be selected. This unit can be mounted on any load-bearing wall.

In Tall Wall configurations, the Overhead sits on top of the Tall Wall. Overheads can be any length (up to the length of the wall) and can be mounted in any location on top of the wall.

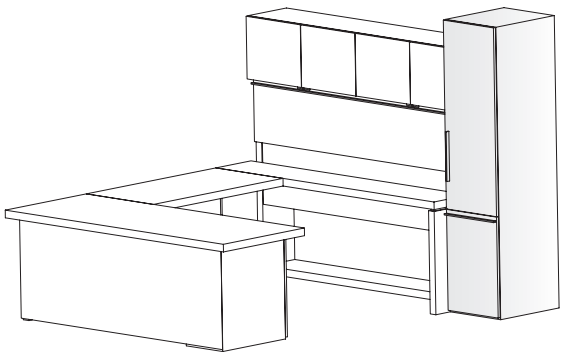


Step 7. Select Towers and Wardrobe Panels (optional)

Available in two heights and two widths, Neos Towers offer additional storage options.

Wardrobe Panels provide a cost effective, minimalist approach to concealment of outerwear.

18"w box/box/file Tower is shown at right.



Step 8. Specify Accessories and Additional Storage

Additional work tools are available to customize your wall to fit your work style. Mobile Pedestals, Bookcases and Freestanding Lateral Files offer additional storage options.

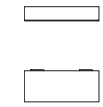
Create a Layout.

Freestanding Configurations

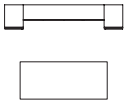
Step 1. Select a Configuration

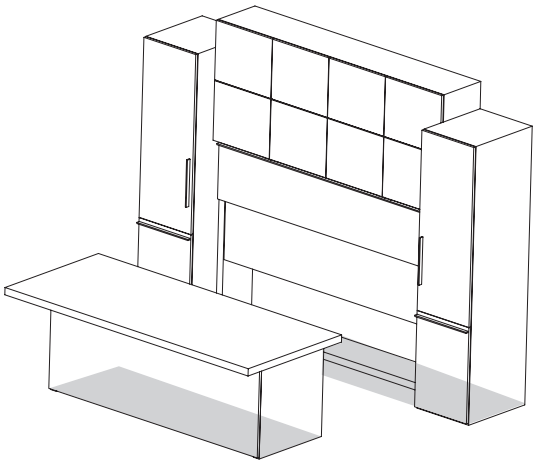
It's important to first choose whether a Tall or Low Wall will best suit the end user's work style, space, storage and furniture requirements.

A Freestanding configuration using a Low Wall consists of a Freestanding Desk, a Low Wall and an optional Credenza Shelf, Overhead unit and Towers.



A Freestanding configuration using a Tall Wall consists of a Freestanding Desk, a Tall Wall and an optional Credenza Shelf, Overhead unit and Towers (shown at right).





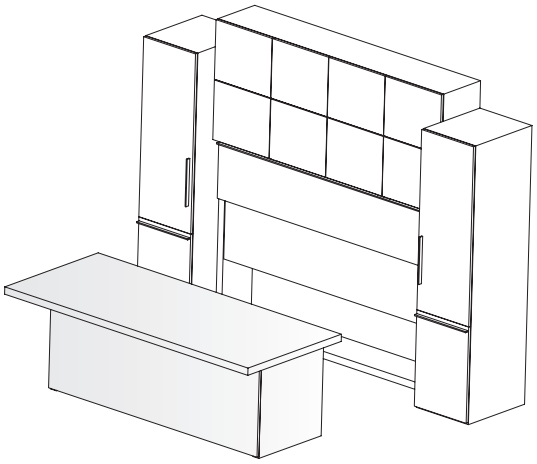
Step 2. Select the Desk

One you've determined which type of Freestanding configuration will serve as the basis of your Neos workstation, you're ready to specify your first individual component: The Desk.

The Freestanding Desk includes the worksurface and full height modesty panel. Select desired supports to complete the desk (see Page 222 for supports).

Neos Freestanding Desks are standard with a 6" overhang on each end. The overhang can be changed to 3" or flush on each end by choosing the appropriate option.

Neos Freestanding Conference End Desks are also available. The standard overhang in 6" on one end and 24" on the other end.

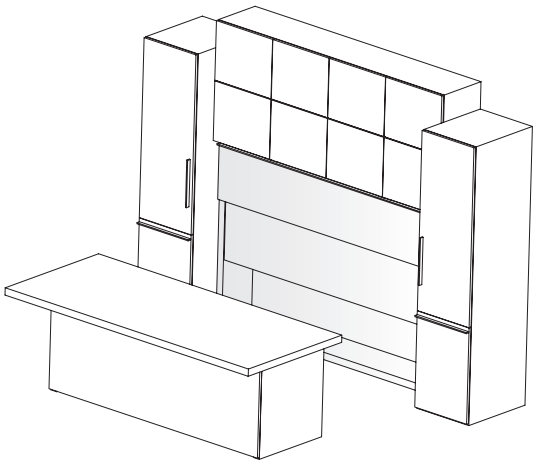


Step 3. Select a Storage Wall

You'll next choose a Tall Wall or Low Wall, depending on which type of U-Shape configuration you've selected. Both storage walls are available with and without doors and come with a standard work tool package.

Specify appropriate freestanding Low Wall for the Freestanding configuration.

The Freestanding configuration at the right features a Tall Wall.

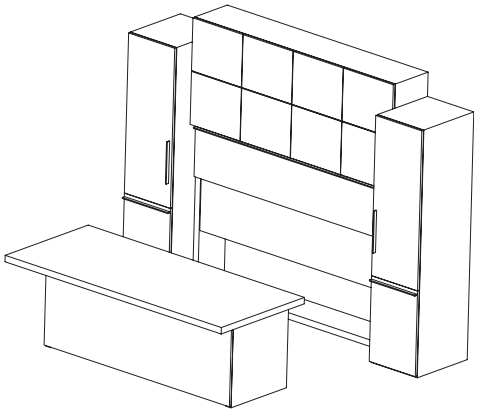


Step 4. Select the Credenza Shelf

Next you can specify an optional Credenza Shelf.

In the Freestanding configuration with Low Wall, a Credenza Shelf is optional to align the worksurface heights. Credenza Shelves may be the same size or longer than the Low Wall.

In the Freestanding configuration with Tall Wall, the optional Credenza Shelf sits in front of the Tall Wall and provides an additional pilling surface.

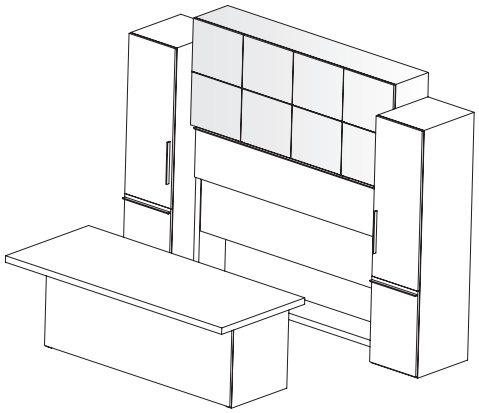


Step 5. Select the Overhead units (optional)

Neos offers full door Overhead units in single and double heights.

In Low Wall configurations, the Wall-Mount Overhead must be selected. This unit can be mounted on any load-bearing wall.

In Tall Wall configurations, the Overhead sits on top of the Tall Wall. Overheads can be any length (up to the length of the wall) and can be mounted in any location on top of the wall.

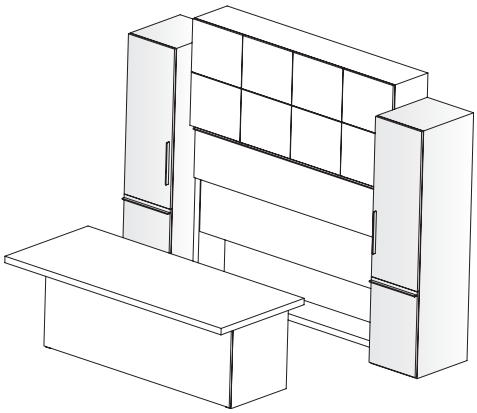


Step 6. Select Towers and Wardrobe Panels (optional)

Available in two heights and two widths, Neos Towers offer additional storage options.

Wardrobe Panels provide a cost effective, minimalist approach to concealment of outerwear.

Two 18"w box/box/file Towers are shown at right.



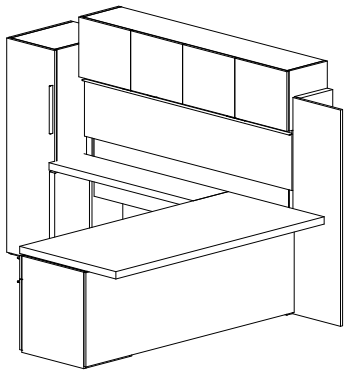
Step 7. Specify Accessories and Additional Storage

Additional work tools are available to customize your wall to fit your work style. Mobile Pedestals, Bookcases and Freestanding Lateral Files offer additional storage options.

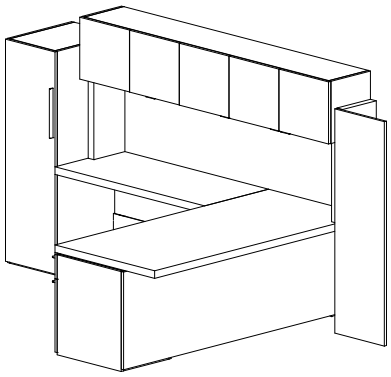
Create a Layout with the Hutch. L-Shape,

U-Shape, and Freestanding applications can also be created without the Tall or Low Wall. The specification process is similar, just select a 24” deep return, and replace the Wall with a Hutch Shelf, Hutch Shelf and Overhead or a Hutch Overhead.

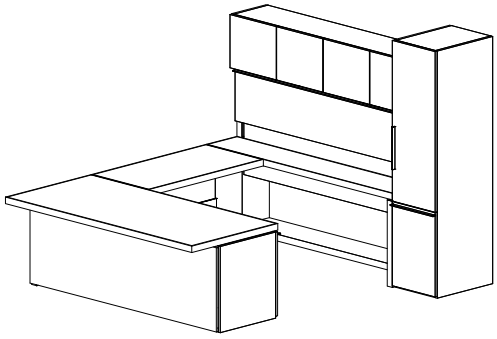
L-Shape Configuration with Wall



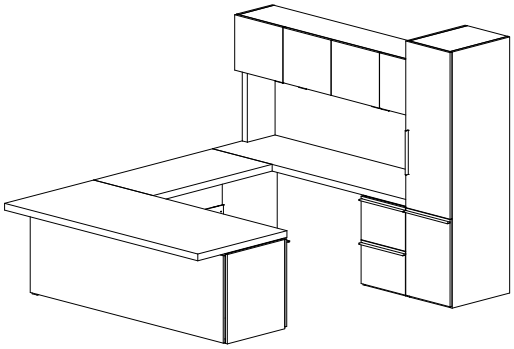
L-Shape Configuration with Hutch



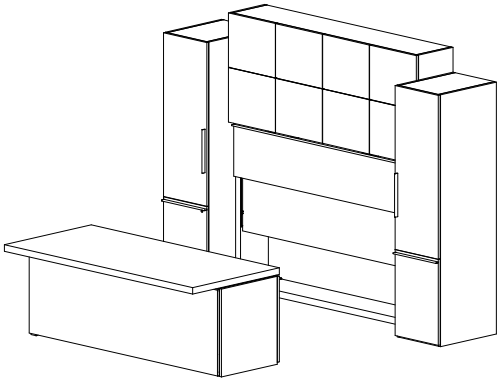
U-Shape Configuration with Wall



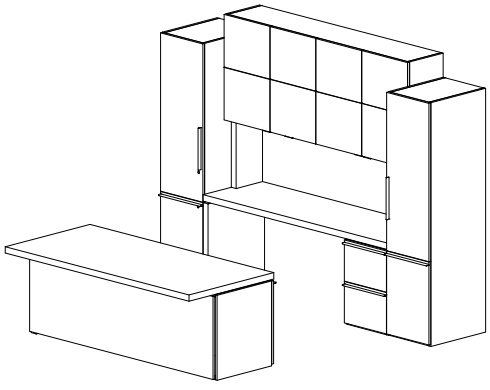
U-Shape Configuration with Hutch



Freestanding Configuration with Wall

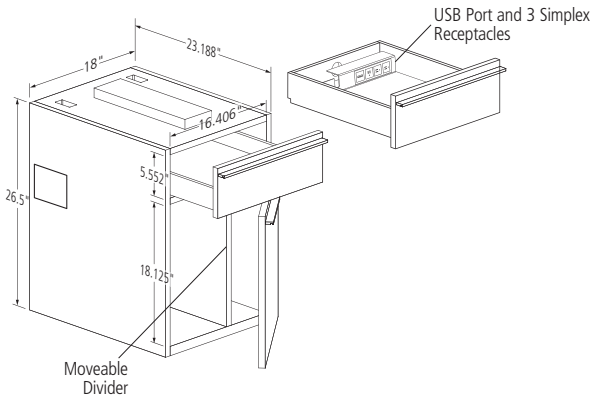


Freestanding Configuration with Hutch



Tech Pedestal with Power Drawer and Door

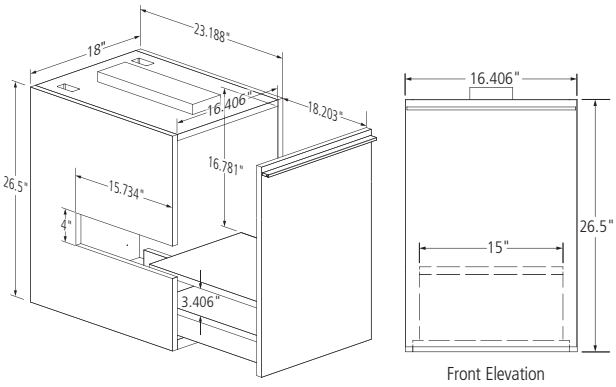
The Tech Pedestal provides CPU storage on one side of a moveable dividing panel, and an open section on the other side for cord/cable storage. The top drawer includes three simplex receptacles and one USB port. Grommet at the top allows easy wire management. Thermostatically controlled fan provides temperature regulation. Tech Pedestals on desks have oversized opening on user's side that allows wire management in addition to ventilation.



Printer Pedestal

The Printer Pedestal accommodates most inkjet printers. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. Grommet in top and side of pedestal provides easy wire management.

Consult Printer Pedestal dimension information to ensure that the pedestal will accommodate your printer.



Laptop/Printer Pedestal

The Laptop/Printer Pedestal provides laptop storage in the top drawer and accommodates most inkjet printers in the lower drawer. The laptop drawer provides convenient storage and concealment of your laptop, freeing up valuable worksurface space. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. Grommet in top and side of pedestal provides easy wire management. Thermostatically controlled fan provides temperature regulation.

Consult Laptop/Printer Pedestal dimension information to ensure that the pedestal will accommodate your printer.

General Information & Options

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)
See pages 6-7 for surface material options.
- Choose Wood Species & Finish

General Information

- Worksurface height: 29.5"
- 2" thick worksurface with 3/8" thick edge band
- Credenza Shelves are attached to the Bridge or can be freestanding
- When used with Tall Walls, Credenza Shelves are positioned in front of the Tall Wall
- When used with Low Walls, Credenza Shelves are positioned on top of the Low Wall
- Credenza Shelves can be the exact length or longer than the Low Wall. When the exact length of the Low Wall, the Credenza Shelf will include a worksurface (without legs). When longer than the Low Wall, the Credenza Shelf will include a worksurface and one leg.

- Neos Series Mobile Pedestals accommodate side-to-side letter and legal filing
- Conventional Series Mobile Pedestals accommodate side-to-side and front-to-back letter filing and side-to-side legal filing

Origin Planning Guide

Create a Layout.

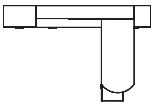
There are three primary types of Origin workstation configurations: L-Shape, U-Shape, and Freestanding. We've outlined the specification process on pages 244-249, devoting two pages to each type of configuration.

L-Shape Configurations.

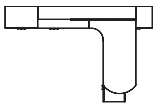
Step 1. Select a Configuration.

It's important to first select which one of three L-Shape configurations will best suit the end user's work style, space, storage, and furniture requirements.

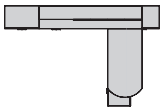
The L-Shape configuration consists of a Single Pedestal Desk and a Run-Off Return.

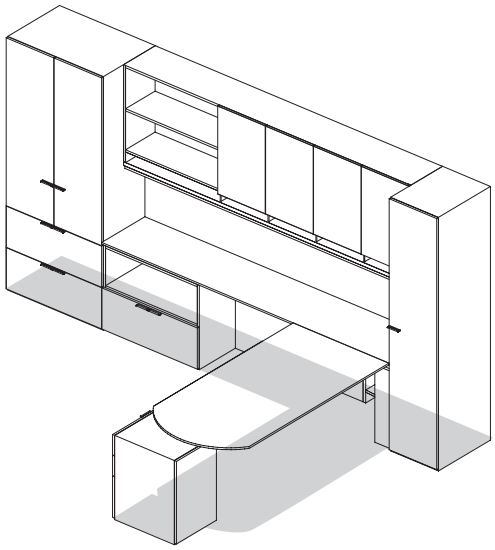


The extended corner L-Shape configuration includes an Extended Corner Single Pedestal Desk and a Run-Off Return.



The workcenter L-Shape configuration features a Workcenter Return and a Run-Off Single Pedestal Desk (shown at right).





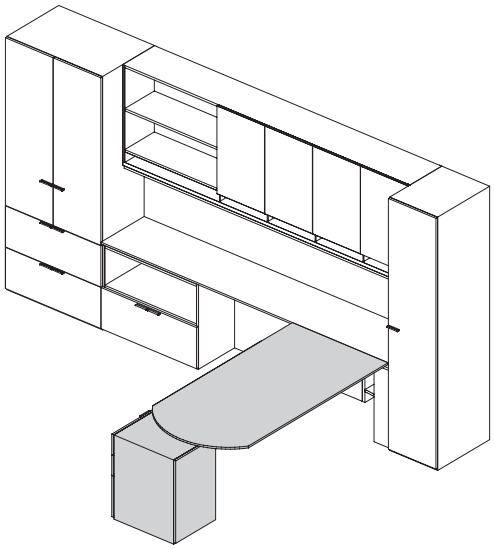
Step 2. Select the Desk.

Once you've determined which type of L-Shape configuration will serve as the basis of your Origin workstation, you're ready to specify your first individual component: The Desk.

The L-Shape configuration features a Single Pedestal Desk.

The *extended corner* L-Shape configuration features an Extended Corner Single Pedestal Desk.

The *workcenter* L-Shape configuration features a Run-Off Single Pedestal Desk (shown at right).

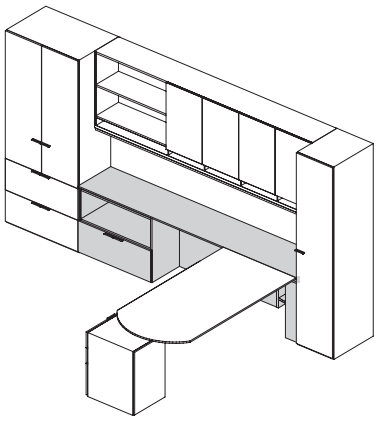


Step 3. Select the Return or Workcenter.

You'll next choose a Run-Off Return or Workcenter Return, depending on which type of L-Shape configuration you've selected.

The L-Shape and *extended corner* L-Shape configurations incorporate a Run-Off Return.

The *workcenter* L-Shape configuration features a Workcenter Return, which supports one end of the Run-Off Single Pedestal Desk (shown at right).



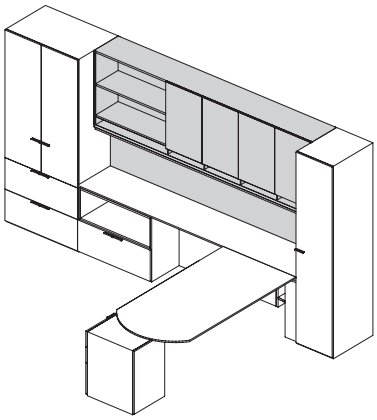
Step 4. Select the Overhead Unit.

Origin offers three types of *optional* Overhead Units: Spanning, Hutch, and Wall-Mount.

The Spanning Overhead Unit mounts above a worksurface of equal length, and it is supported on each side by a Structural Tower or End Panel (shown at right).

Symmetrical and Asymmetrical Hutch Overhead Units mount on top of an equal-length worksurface. Symmetrical models are self-supporting. Asymmetrical models must be supported on one side by a Structural Tower or End Panel.

The Wall-Mount Overhead Unit can be mounted on any load-bearing wall. It's available with an optional vertical veneer panel for routing cables between overhead and worksurfaces.

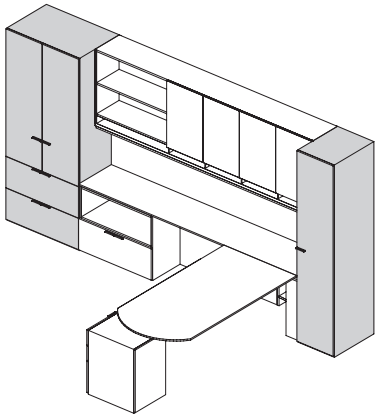


Step 5. Select Towers and End Panels.

Structural and Freestanding Towers offer numerous storage options. They also accommodate horizontal and vertical wire management.

Specify Structural Towers and/or End Panels if you select a Spanning or Asymmetrical Hutch Overhead Unit in Step 4 (shown at right).

Specify Freestanding Towers in conjunction with Symmetrical Hutch or Wall-Mount Overhead Units to provide additional storage capacity in any Origin workstation.



Step 6. Specify Accessories and Additional Storage.

Display Shelves, Tackboards, Keyboards, and Mobile Pedestals.

Bookcases and Lateral Files.

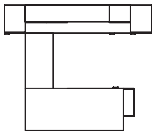
Create a Layout.

U-Shape Configurations.

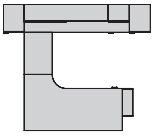
Step 1. Select a Configuration.

It's important to first select which one of three U-Shape configurations will best suit the end user's work style, space, storage, and furniture requirements.

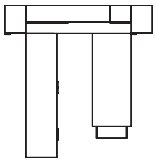
The U-Shape configuration consists of a Single Pedestal Desk, Bridge, and Back Credenza.

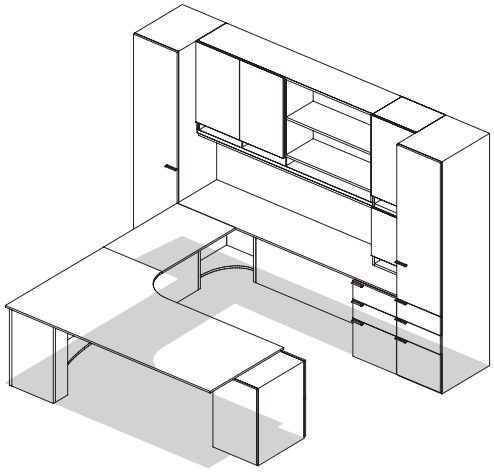


The extended corner U-Shape configuration includes an Extended Corner Single Pedestal Desk, Bridge, and Back Credenza (shown at right).



The workcenter U-Shape configuration features a Workcenter, Run-Off Desk, and Run-Off Credenza.





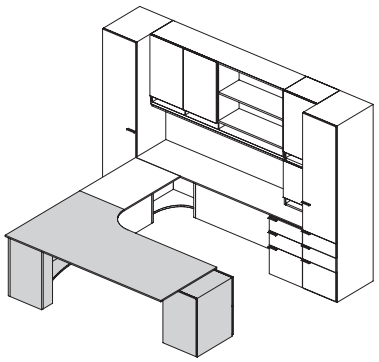
Step 2. Select the Desk.

Once you've determined which type of U-Shape configuration will serve as the basis of your Origin workstation, you're ready to specify your first individual component: The Desk.

The U-Shape configuration features a Single Pedestal Desk.

The *extended corner* U-Shape configuration features an Extended Corner Single Pedestal Desk (shown at right).

The *workcenter* U-Shape configuration features a Run-Off Single Pedestal Desk.

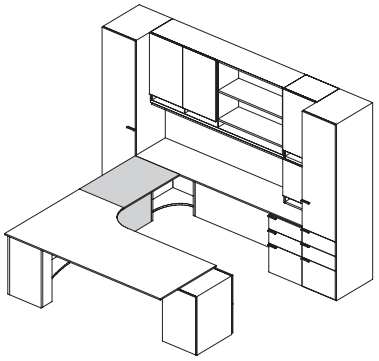


Step 3. Select the Bridge or Workcenter.

You'll next choose a Bridge or Workcenter, depending on which type of U-Shape configuration you've selected.

The U-Shape and *extended corner* U-Shape configurations incorporate a Bridge. The Bridge is positioned between the Single Pedestal Desk and Back Credenza (shown at right).

The *workcenter* U-Shape configuration features a Workcenter, which supports one end of the Run-Off Single Pedestal Desk and Run-Off Credenza.

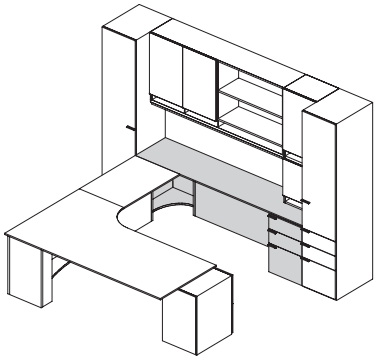


Step 4. Select the Credenza.

The Credenza is the final worksurface-related component in a U-Shape configuration. You'll specify one of two Credenza styles, depending on the type of U-Shape configuration you've selected.

The U-Shape and *extended corner* U-Shape configurations incorporate a Back Credenza. This style of Credenza is designed to support one end of the Bridge (shown at right).

The *workcenter* U-Shape configuration uses a Run-Off Credenza, which is supported on one end by the Workcenter.



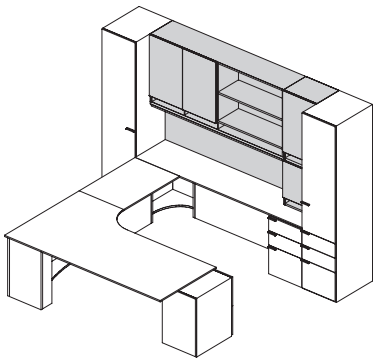
Step 5. Select the Overhead Unit.

Origin offers three types of *optional* Overhead Units: Spanning, Hutch, and Wall-Mount.

The Spanning Overhead Unit mounts above a worksurface of equal length, and it is supported on each side by a Structural Tower or End Panel.

Symmetrical and Asymmetrical Hutch Overhead Units mount on top of an equal-length worksurface. Symmetrical models are self-supporting. Asymmetrical models must be supported on one side by a Structural Tower or End Panel (shown at right).

The Wall-Mount Overhead Unit can be mounted on any load-bearing wall. It's available with an optional vertical veneer panel for routing cables between overhead and worksurfaces.

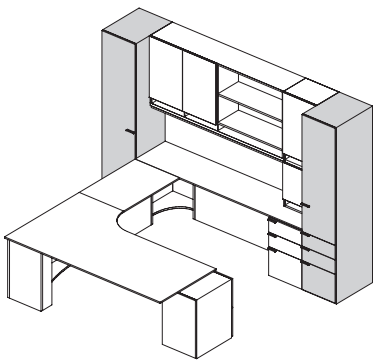


Step 6. Select Towers and End Panels.

Structural and Freestanding Towers offer numerous storage options. They also accommodate horizontal and vertical wire management.

Specify Structural Towers and/or End Panels if you select a Spanning or Asymmetrical Hutch Overhead Unit in Step 5 (shown at right).

Specify Freestanding Towers in conjunction with Symmetrical Hutch or Wall-Mount Overhead Units, or to provide additional storage capacity in any Origin workstation.



Step 7. Specify Accessories and Additional Storage.

Display Shelves, Tackboards, Keyboards, and Mobile Pedestals.

Bookcases and Lateral Files.

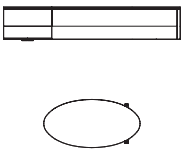
Create a Layout.

Freestanding Configurations.

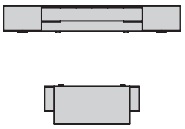
Step 1. Select a Configuration

An Origin Freestanding configuration is composed primarily of a Freestanding Desk and Freestanding Credenza. Other components, such as Overhead Units and Towers, are typically specified to provide additional storage capacity.

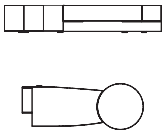
The configurations depicted below feature alternative desk/credenza layouts and incorporate different types of Overhead Units and Towers.



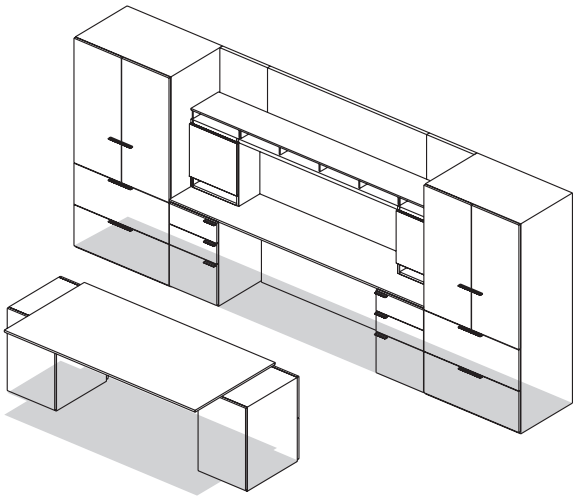
This freestanding configuration includes a Freestanding Desk, Credenza, Structural Tower and End Panel, and Spanning Overhead Unit.



This freestanding configuration includes a Freestanding Desk, Credenza, two Freestanding Towers, and a Hutch Overhead Unit. (shown at right).



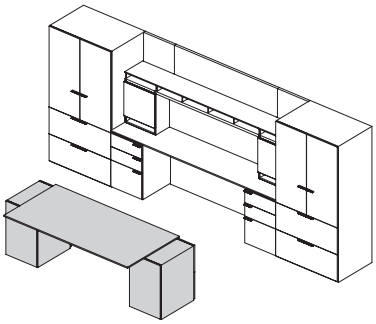
This freestanding configuration includes a Freestanding Desk, Credenza, two Freestanding Towers, and a Wall-Mount Overhead Unit.



Step 2. Select the Desk

Once you've determined which type of Freestanding configuration will serve as the basis of your Origin workstation, you're ready to specify your first individual component: The Desk.

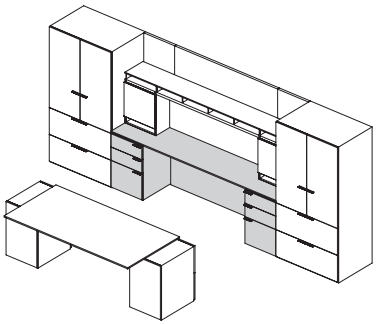
Origin Freestanding Desks are available in five top shapes: Rectangle, D-Top, Taper, Taper with Round End, and Elliptical. End support options are Pedestals or Trestle Bases.



Step 3. Select the Credenza.

You'll next choose a Credenza.

You can customize a credenza by selecting any of 15 worksurface widths, individual storage components, and a modesty panel.



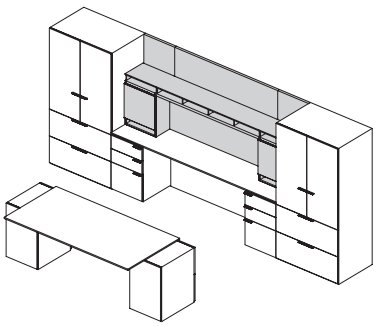
Step 4. Select the Overhead Unit.

Origin offers three types of optional Overhead Units: Spanning, Hutch, and Wall-Mount.

The Spanning Overhead Unit mounts above a worksurface of equal length, and it is supported on each side by a Structural Tower or End Panel.

Symmetrical and Asymmetrical Hutch Overhead Units mount on top of an equal-length worksurface. Asymmetrical models must be supported on one side by a Structural Tower or End Panel. Symmetrical models are self-supporting (shown at right).

The Wall-Mount Overhead Unit can be mounted on any load-bearing wall. It's available with an optional vertical veneer panel for routing cables between overhead and worksurfaces.

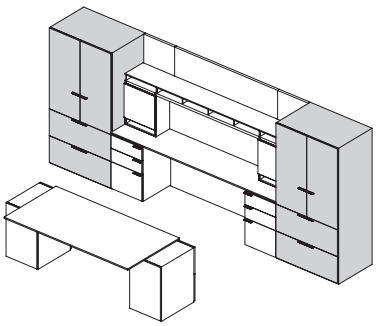


Step 5. Select Towers and End Panels.

Structural and Freestanding Towers offer numerous storage options. They also accommodate horizontal and vertical wire management.

Specify Structural Towers and/or End Panels if you select a Spanning or Asymmetrical Hutch Overhead Unit in Step 4.

Specify Freestanding Towers in conjunction with Symmetrical Hutch or Wall-Mount Overhead Units to provide additional storage capacity in any Origin workstation (shown at right).



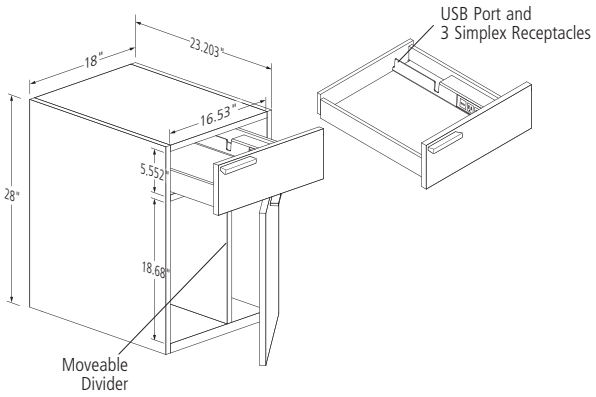
Step 6. Specify Accessories and Additional Storage.

Display Shelves, Tackboards, Keyboards, and Mobile Pedestals.

Bookcases and Lateral Files.

Tech Pedestal with Power Drawer and Door

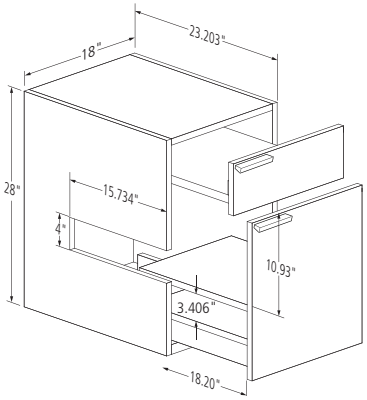
The Tech Pedestal provides CPU storage on one side of a moveable dividing panel, and an open section on the other side for cord/cable storage. The top drawer includes three simplex receptacles and one USB port. Thermostatically controlled fan provides temperature regulation.

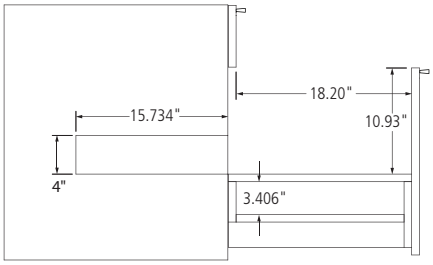


Laptop/Printer Pedestal

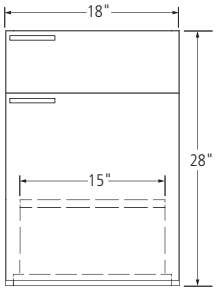
The Laptop/Printer Pedestal provides laptop storage in the top drawer and accommodates most inkjet printers in the lower drawer. The laptop drawer provides convenient storage and concealment of your laptop, freeing up valuable worksurface space. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. Grommet in bottom and side of pedestal provides easy wire management. Thermostatically controlled fan provies temperature regulation.

Consult Laptop/Printer Pedestal dimension information to ensure that the pedestal will accommodate your printer.





Side Elevation

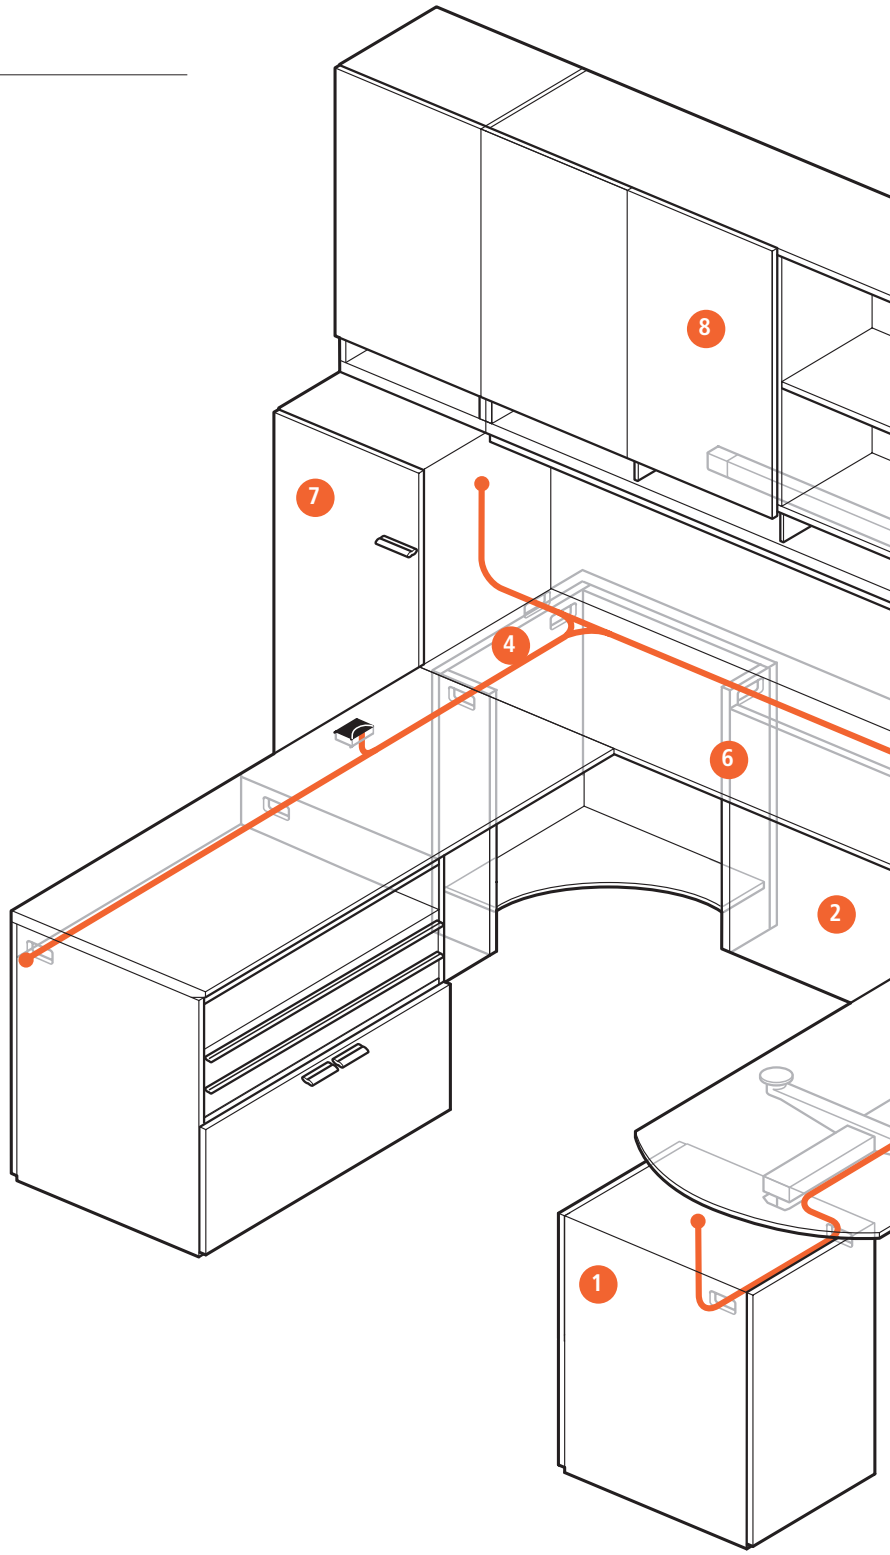


Front Elevation

Technology Accommodation. Origin supports existing and emerging technologies with conveniently accessible power and voice/data connections. Equipment cord and communication cable routing pathways are abundantly integrated within individual components.

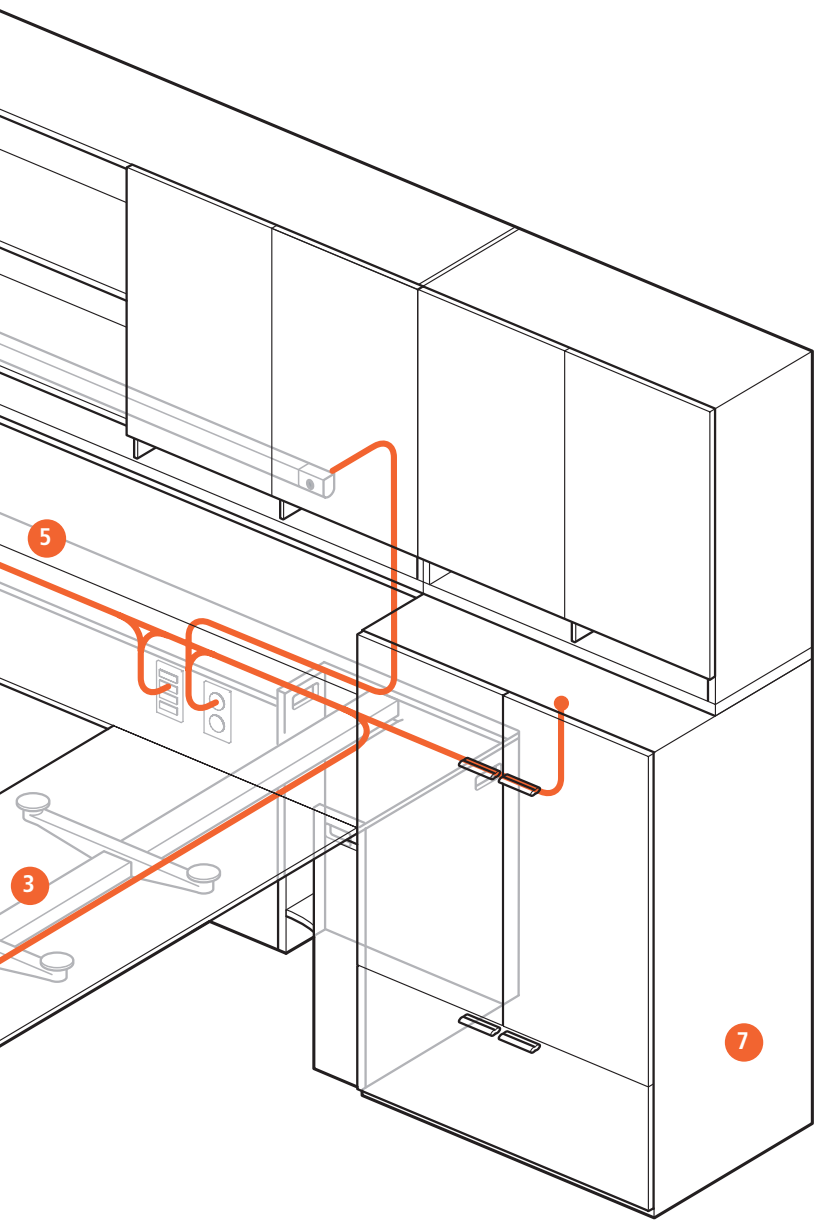
Power and Voice/Data Connectivity

1 **Power Drawer and CPU Storage.**
The Tech Pedestal with Power Drawer and Door desk end support option is equipped with a top drawer containing three simplex receptacles and one USB port. The lower portion provides CPU storage on one side of a moveable dividing panel, and an open section on the other side for cord/cable storage.



Integrated Wire Management

Equipment cords and voice/data cables can be routed horizontally and vertically throughout an Origin workstation. Wire management pathways are integrated in desks, bridges, returns, credenzas, workcenters, towers, and overheads.



2 Modesty Panels.
Origin credenzas, returns, and workcenters can be specified with a flip-down access panel. The access panel — an alternative to a full-height modesty panel — offers a convenient, easy means of accessing the building's power and communication sources. The panel can be installed flush with the component's back panel or inset 5-1/4" to accommodate power cord plug heads.

3 Worksurface Beam.
Horizontal wire management is integrated with a beam available on desks.

4 Worksurface Grommets.
Grommets can be specified on the worksurfaces of desks, credenzas, bridges, returns, and workcenters. Available grommet locations for each type of component are shown in the planning section.

5 Channel Grommet.
The channel grommet is a built-in feature on credenzas, bridges, returns, and workcenters. Overhead storage units must be specified in conjunction with channel grommets. The grommet opening extends along the back edge of these components. Power cords and cables from equipment can be routed downward through this opening to building power and communication sources.

6 Pedestal and Corner Support Pass-Through Openings.
All pedestals and corner supports feature side pass-through openings to allow equipment cords and voice/data cables to be routed to adjoining components.

7 Structural/Freestanding Towers.
A side grommet in Structural Towers enables cords and cables to be routed into the tower from adjoining components. Structural and Freestanding Towers both feature vertical wire management through openings located in the rear of shelves.

8 Spanning/Hutch Overhead Units.
On spanning and hutch overhead units, gripper grommets are located along the back edge of the shelf and shelf with back panel options. These grommets secure cords and cables, preventing them from falling when they're temporarily disconnected from equipment.

Desks.

There are four types of Origin desks: Single Pedestal, Extended Corner Single Pedestal, Run-Off Single Pedestal, and Freestanding. The desk type is dictated by the style of workstation configuration you select.

Desk Application

Single Pedestal Desks are used with L-Shape and U-Shape configurations. Desks are handed, based on the location of the end support — either trestle leg, pedestal, or column base — from the user's orientation.

Single Pedestal Desks with Extended Corners are specified for *Extended Corner* L-Shape and U-Shape configurations. Desks are handed, based on the location of the end support from the user's orientation.

Run-Off Single Pedestal Desks are designated for *Workcenter* L-Shape and Workcenter U-Shape configurations. Desks are handed, based on the location of the end support from the user's orientation.

Freestanding Desks work in conjunction with Freestanding configurations. These desks require specification of end supports on each side. End Supports for D-Top, Taper, and Taper with Round End worksurfaces are handed from the user's orientation.

30" worksurface supports are center on the 36" top. 36" worksurface supports are aligned to the users edge.

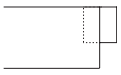
Freestanding Desk

30" Worksurface support



36" Worksurface support

Desk End Support

End support for Origin desks is specified separately. Select from a trestle leg, a pedestal with a box/box/file or file/file drawer configuration, a Tech Pedestal that accommodates power access and a CPU, a Laptop/ Printer Pedestal, or a column base.

The Column Base is available only on Rectangle, Taper, and D-Top worksurfaces; it is not available on freestanding desks. The column is not designed for use with the worksurface horizontal beam.

Filing Capability

Pedestals accommodate side-to-side and front-to-back letter filing and side-to-side legal filing.

Modesty Panel Option

An Origin desk can be specified with a 1/4- or 1/2-height modesty panel in a painted finish or veneer surface. The 1/4-height painted modesty panel is available with or without a decorative circle pattern.

Modesty Panels are available on desks with or without beam and gussets.

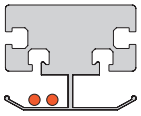
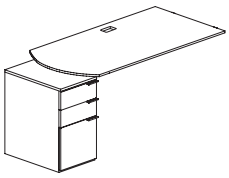
Technology Accommodation

All worksurfaces equipped with the horizontal beam and gusset feature a beam-mounted wire management channel. When the beam and gusset is not specified, worksurfaces have J-channel wire management. (NOTE: The horizontal beam cannot be used with the column or full-height Trestle Base end support option.)



End Elevation View
Beam Section

Worksurfaces can be specified with a centered grommet opening located near the end support.



Grommet

The Tech Pedestal with Power Drawer and Door provides CPU storage on one side of a moveable dividing panel, and an open section on the other side for cord/cable storage. The top drawer includes three simplex receptacles and one USB port. A hinged rear access door offers unimpeded access for wire management and equipment connections.

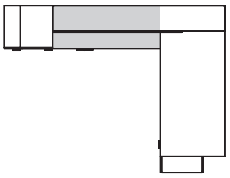
Run-Off Returns and Workcenter Returns.

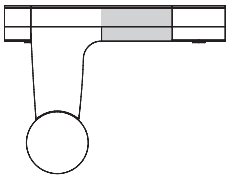
Run-Off Returns are used with Origin L-Shape and *extended corner* L-Shape workstation configurations. Workcenter Returns are used with the *workcenter* L-Shape workstation configuration.

Run-Off Return Application

Run-Off Returns are supported on one end by a Single Pedestal Desk and on the opposite end by a pedestal or corner support. Returns are handed, based on the pedestal or corner support location from the user's orientation.



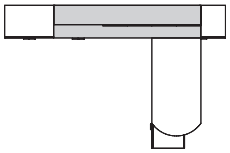
Run-Off Return, L-Shape
(Left-hand shown)



Run-Off Return, Extended Corner L-Shape
(Right-hand shown)

Workcenter Return Application

Workcenter Returns support one end of a Run-Off Single Pedestal Desk. They include one integrated corner support with shelf located on the end supporting the Run-Off Desk.

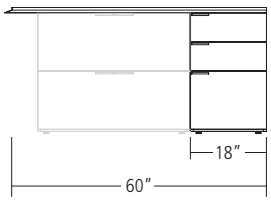


Workcenter Return, Workcenter L-Shape
(Left-hand shown)

Pedestal Specification

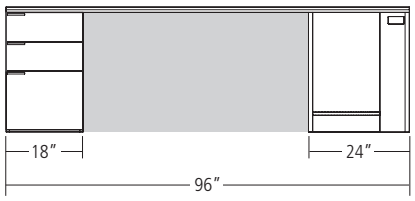
Run-Off Returns will accommodate an 18"-wide corner support, or 18"- or 36"-wide pedestals.

Run-Off Return



Workcenter Returns are shipped standard with one 24"-wide integrated corner support with shelf. A second corner support or combination of 18"- or 36"-wide pedestals can also be ordered.

Workcenter Return



Filing Capability

18"-wide pedestals accommodate side-to-side and front-to-back letter filing and side-to-side legal filing. 36"-wide pedestals accommodate side-to-side and front-to-back letter and legal filing.

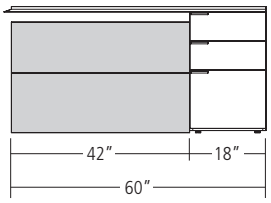
Access Panel Specification

Run-Off Returns and Workcenter Returns are available with an optional access panel.

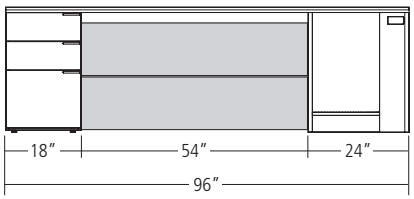
The panel's width is determined after you've specified corner supports and/or pedestals.

The panel can be field installed flush with the back panel or inset 5-1/4" to accommodate power cord plug heads.

Run-Off Return



Workcenter Return

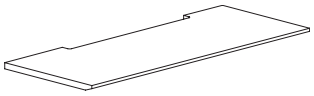


Technology Accommodation

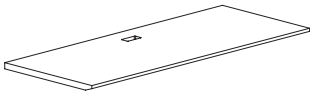
Run-Off Returns and Workcenter Returns can be specified with a channel grommet that extends along the back edge of each component. An overhead storage unit must be specified in conjunction with a channel grommet.

Individual grommets can also be specified for center, left- and right-hand positions.

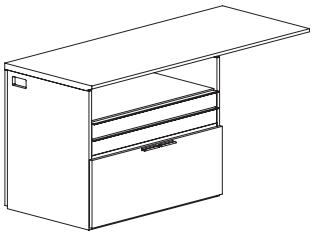
Pass-through openings are located on the sides of corner supports and pedestals to allow cord/cable routing between components.



Run-Off Return
Channel grommet option



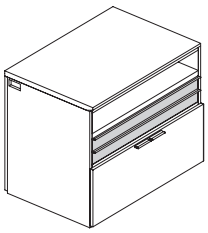
Workcenter Return
Centered grommet option



Pass-through opening

Surface Materials Application

Pedestals for Run-Off Returns and Workcenter Returns are specified with a veneer surface. Project drawer fronts are available in veneer or paint. These illustrations show the location of project drawers on 18"-, 30"- and 36"-wide pedestals. Shaded areas indicate optional painted surfaces.



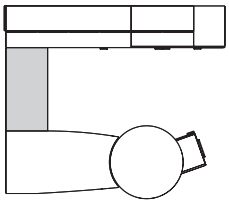
-VS
(veneer and paint)

-PVS
(premium veneer and paint)

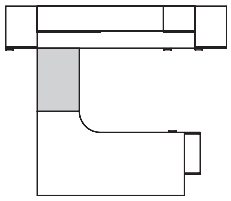
Bridges. Bridges are used with U-Shape and *extended corner* U-Shape configurations.

Bridge Application

Bridges are non-handed. They are supported on one end by a Single Pedestal Desk and on the other end by a Back Credenza.



Bridge, U-Shape

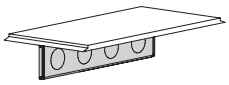


Bridge,
Extended Corner U-Shape

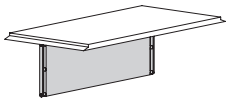
Modesty and Access Panel Specification

Bridges can be specified with optional 1/4-height or 1/2-height modesty panels, or with an optional niche with fins and specified with a full height modesty panel or with an access panel combination.

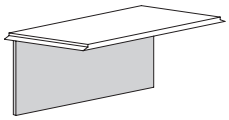
The 1/4-height painted modesty panel is available with or without a decorative circle pattern.



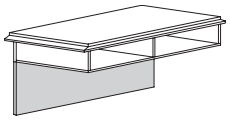
Bridge with 1/4-height modesty panel



Bridge with 1/2-height modesty panel



Bridge with full-height modesty/access panel

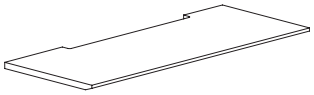


Bridge with niche and full-height modesty/access panel

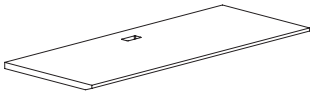
Technology Accommodation

Bridges can be specified with a channel grommet that extends along the back edge. An overhead storage unit must be specified in conjunction with a channel grommet.

A single grommet can also be specified for the center position only.



Channel grommet option

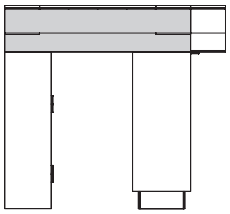


Centered grommet option

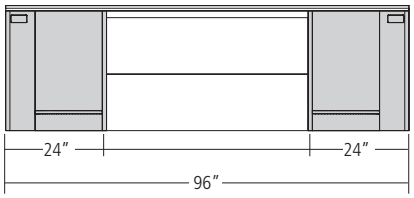
Workcenters. Workcenters are specified for *workcenter* U-Shape configurations.

Workcenter Application

Workcenters support one end of the Run-Off Single Pedestal Desk and Run-Off Credenza. They are non-handed and equipped standard with 24"-wide corner supports on each end.

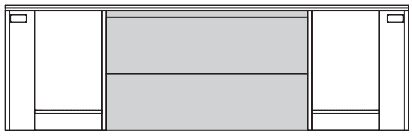


Workcenter,
Workcenter U-Shape



Access Panel Specification

Workcenters are available with an optional access panel. The panel's width covers the distance between the two integrated corner supports. The panel can be field installed flush with the back panel or inset 5-1/4" to accommodate power cord plug heads.



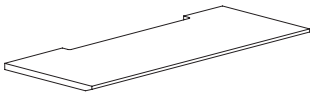
Workcenter

Technology Accommodation

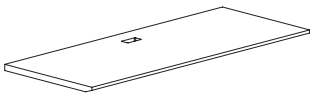
Workcenters can be specified with a channel grommet that extends along the back edge. An overhead storage unit must be specified in conjunction with a channel grommet.

Individual grommets can also be specified for center, left- and right-hand positions.

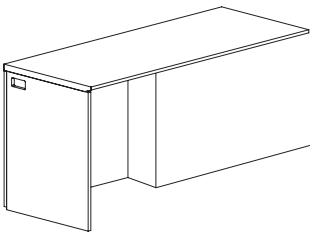
Pass-through openings are located on the sides of the corner supports to allow cord/cable routing between components.



Channel grommet option



Centered grommet option



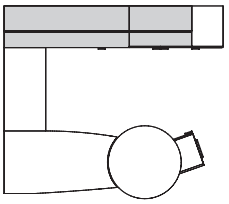
Pass-through opening

Credenzas.

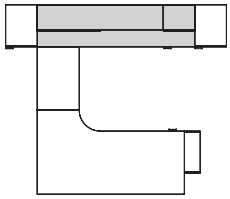
Origin offers a Back Credenza or Run-Off Credenza for use with U-Shape configurations. You can also create Freestanding Credenzas for use with Freestanding Desks. All credenza styles are available with a wide variety of pedestal and lateral file storage options.

Back Credenza Application — U-Shape and Extended Corner U-Shape Configurations

Back Credenzas specified for U-Shape and *Extended Corner* U-Shape configurations support one end of the Bridge. They include one integrated corner support with shelf located on the end supporting the Bridge.



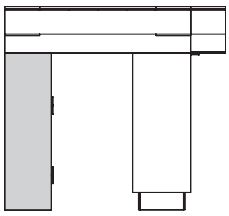
Back Credenza
U-Shape
(right-handed)



Back Credenza
Extended Corner U-Shape
(right-handed)

Run-Off Credenza Application — Workcenter U-Shape Configurations

The Run-Off Credenza is specified for *Workcenter* U-Shape configurations. It attaches to one end of the workcenter and will accommodate an 18"-wide corner support, or 18"- or 36"-wide pedestals.



Run-Off Credenza
Workcenter U-Shape
(left-handed)

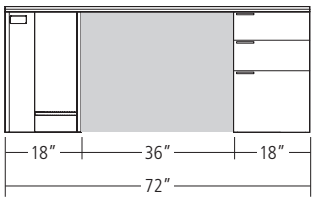
Freestanding Credenza Application

Freestanding Credenzas can be paired with Freestanding Desks — or positioned within a variety of different Origin configurations — to offer additional worksurface area and storage and filing capacity. These Credenzas are specified by choosing individual components for a customized unit.

Pedestal Specification

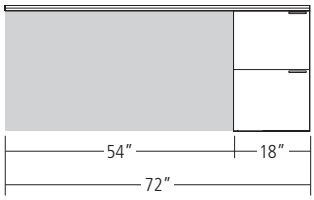
Back Credenzas used with U-Shape and Extended Corner U-Shape configurations are standard with one 18"-wide integrated corner support with shelf. A second corner support can be specified for the opposite end or any combinations of 18"- or 36"-wide storage components.

Back Credenza



Run-Off Credenzas can be specified with one corner support or any combination of 18"- or 36"-wide storage components.

Run-Off Credenza



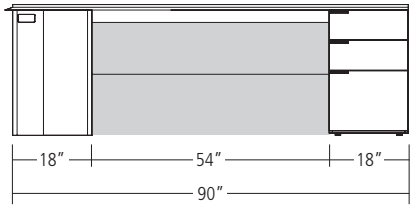
Create customized Freestanding Credenzas from a wide selection of 18"-, 30"-, and 36"-wide storage components.

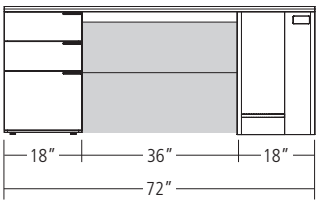
Filing Capability

18”-wide pedestals accommodate side-to-side and front-to-back letter filing and side-to-side legal filing. 30” - 36”-wide pedestals accommodate side-to-side and front-to-back letter and legal filing.

Access Panel Specification

All Credenzas designed for U-shape configurations are available with an optional access panel. The panel’s width is determined after you’ve specified corner supports and/or pedestals. The panel can be field installed flush with the back panel or inset 5-1/4” to accommodate power cord plug heads.



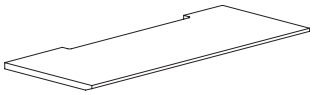


Technology Accommodation

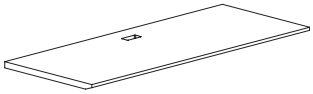
All Credenzas are available with an optional channel grommet that extends along the back edge. An overhead storage unit must be specified in conjunction with a channel grommet.

Back Credenzas can be specified with individual grommets located near the left- and right-hand end supports, as well as centered.

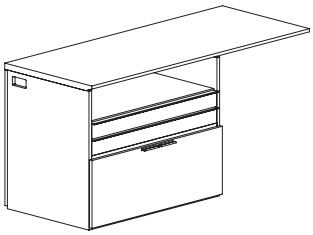
Pass-through openings are located on the sides of corner supports and pedestals to allow cord/cable routing between components.



Channel Grommet



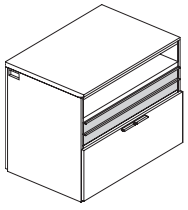
Individual Grommets



Pass-through opening

Surface Materials Application

Credenza pedestals are specified with a veneer surface. Project drawer fronts are available in veneer or paint. These illustrations show the location of project drawers on 18”-, 30”- and 36”-wide pedestals. Shaded areas indicate optional painted surfaces.



-VS
(veneer and paint)

-PVS
(premium veneer and paint)

Towers and End Panels. Structural and Freestanding

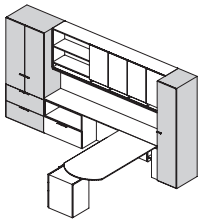
Towers offer several drawer and door storage configurations, ensuring maximum planning flexibility. Structural Towers and End Panels support Spanning Overhead Units and Asymmetrical Hutch Overhead Units.

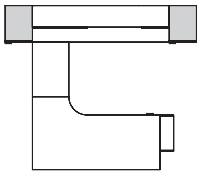
Structural Tower and End Panel Application

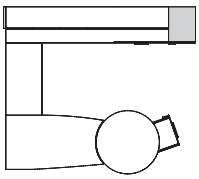
Structural Towers and End Panels are handed based on their orientation to the front of the Spanning Overhead or Asymmetrical Hutch Overhead Unit.

A Spanning Overhead Unit is supported by one of three methods:

- 9"-, 18"-, or 36"-wide Structural Tower on each end.
- Structural Tower and 14 1/4"-deep End Panel on opposite ends.
- End Panel on each end (not available in freestanding applications).

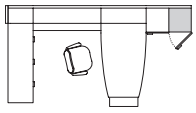




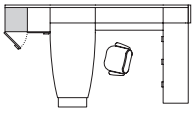


Freestanding Tower Application

18"-wide Freestanding Towers are handed based on door swing direction.



Freestanding Tower
Right Hand



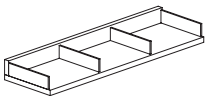
Freestanding Tower
Left hand

Tower-Mounted Overhead Storage

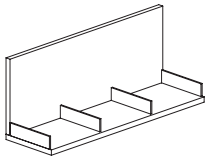
Tower-mounted Overhead Storage Components must be specified for 51"-high Structural and Freestanding Towers.

- 18"- and 36"-wide overheads mount on corresponding-width Structural or Freestanding Towers; an 18"-wide overhead cannot be specified for a 36"-wide tower.
- 54"-wide overheads are designed to span adjacent 18"- and 36"-wide Freestanding Towers.
- 72"-wide overheads are designed to span combinations of 18"- and 36"-wide Freestanding Towers.

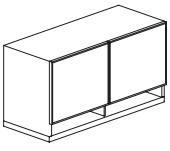
All overhead widths have options for Shelf, Shelf with Back Panel, and Single- and Double-Height Doors.



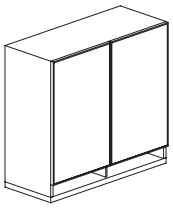
Shelf
4-3/4" Height



Shelf with Back Panel
19-1/4" Height



Single-Height Door
19-1/4" Height



Double-Height Door
33-1/2" Height

Tower Storage Options

Several storage options can be specified, including 3”-high project drawers, 6”-high box drawers, 12”-high file drawers, doors with fixed or roll-out shelves, and lateral file drawers on 36”-wide towers. Wardrobe units are available in 70”- and 85”-high towers.

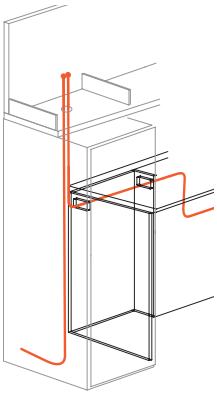
Filing Capability

12” file drawers accommodate side-to-side and front-to-back letter filing and side-to-side legal filing. Lateral files accommodate side-to-side and front-to-back letter and legal filing.

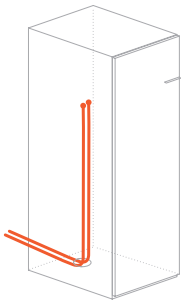
Technology Accommodation

Grommets located in the side of Structural Towers allow equipment cords and communication cables to be routed between the Tower and adjacent credenzas, pedestals, corner shelf supports, etc.

Pass-through grommets in the back of equipment shelves route cords and cables vertically.



Structural Tower



Freestanding Tower

Surface Materials Application

Structural and Freestanding Towers are specified with a veneer surface. Project drawer fronts are available in veneer or paint. These illustrations show the location of project drawers on Towers with veneer and glass door fronts. Shaded areas indicate optional painted surfaces.

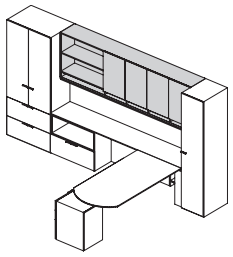
Spanning Overhead Units.

Spanning Overhead Units can be positioned above worksurfaces. They are supported by Structural Towers or End Panels at opposite ends. They feature an integrated back panel; the panel accepts a separately specified Tackboard and Display Shelf.

Spanning Overhead Unit Application

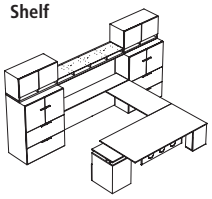
The width of a Spanning Overhead Unit must match the width of the worksurface beneath it.



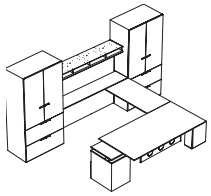
The Shelf can be specified with:

- 51"-High Structural Towers with Tower-Mounted Overheads (Shelf, Shelf with Back Panel or Single-Height Doors, or Double-Height Doors)
- 70"-High Structural Towers
- 84"-High Structural Towers

Shelf



51"-High Structural Tower (with Tower-Mounted Single-Height Doors)

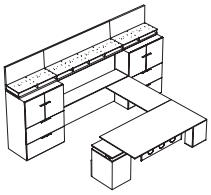


70"-High Structural Tower

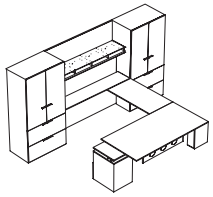
Shelf with Back Panel and Single-Height Door Units can be specified with:

- 51"-High Structural Towers with Tower-Mounted Overheads (Shelf with Back Panel or Single-Height Doors or Double-Height Doors only)
- 70"-High Structural Towers
- 84"-High Structural Towers

Back Panel Unit



51"-High Structural Tower (with Tower-Mounted Shelf with Back Panel)

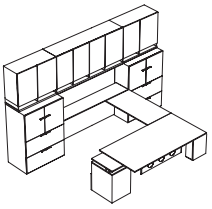


70"-High Structural Tower

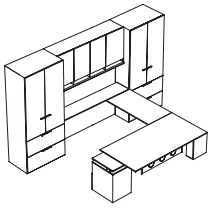
Double-Height Door Units can be specified with:

- 51"-High Structural Towers with Tower-Mounted Overheads (Double-Height Doors only)
- 84"-High Structural Towers

Double-Height Door Unit



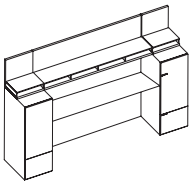
51"-High Structural Tower (with Tower-Mounted Double-Height Doors)



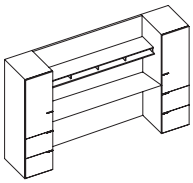
84"-High Structural Tower

Spanning Overhead Unit Planning Flexibility

Spanning Overhead Units can be specified with or without Tower-Mounted Overheads to create symmetrically arranged storage components. These examples show options using 51" and 70"-high Structural Towers and End Panels separately or in conjunction with each other.



Tower-Mounted and Spanning Overhead Units:
Shelf with Back Panel



Spanning Overhead Unit:
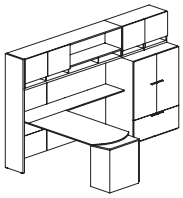
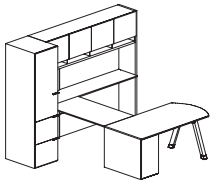
Door/Center Shelf/Door
Structural Tower with Upper Doors



Spanning Overhead Unit:
2 Doors/Center Shelf/Door
Tower-Mounted Overhead:
Double Height Door

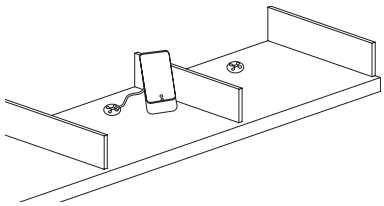


Spanning Overhead Unit:
Full Door
Structural Tower with Upper Door

Technology Accommodation

Gripper grommets are located in the bottom of the Shelf and Shelf with Back Panel of Spanning Overhead Units. There's also a single gripper grommet in the center shelf between left- and right-hand Single-Height and Double-Height Door Units.

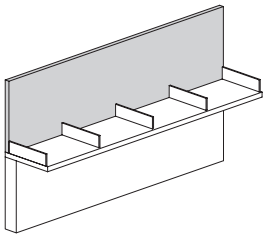
These grommets enable power cords and communication cables to be routed from the building power and voice/data sources to equipment displayed on shelves.



Surface Material Application

Single- and Double-Height Door Units can be specified in veneer or paint, with veneer or glass door fronts.

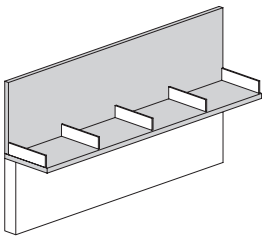
Shelf and Shelf with Back Panel Units can be specified in veneer or paint, or with a combination of painted and veneered surfaces. These illustrations show how paint and veneer apply in combination; shaded areas indicate painted surfaces.



Shelf with Back Panel

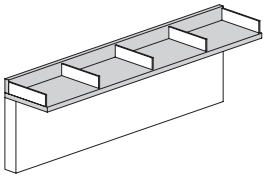
-VS
(veneer and paint)

-PVS
(premium veneer and paint)



Shelf with Back Panel

-S



Shelf with Fins

-S

Hutch and Wall-Mount Overhead Units.

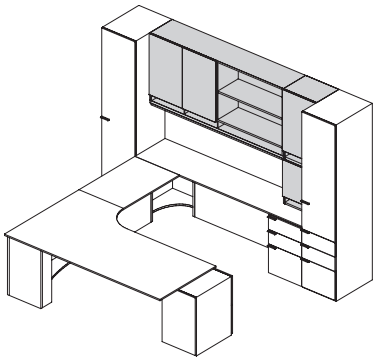
Hutch Overhead Units can be mounted on top of worksurfaces. Wall-Mount Overhead Units attach to structural walls. Both styles of overheads feature an integrated back panel; the panel accepts a separately specified Tackboard and Display Shelf.

Symmetrical and Asymmetrical Hutch Overhead Unit Application

The width of a Symmetrical or Asymmetrical Hutch Overhead Unit must match the width of the worksurface component.

The Symmetrical Hutch Overhead Unit attaches to the top of the supporting worksurface.

The Asymmetrical Hutch Overhead Unit attaches to the top of the supporting worksurface on one end; the opposite end is supported by a Structural Tower or End Panel (shown at right).

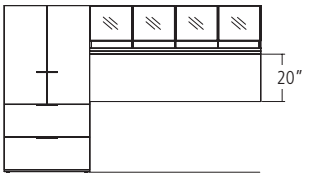


Double-Height Door Unit Application (Asymmetrical)

Wall-Mount Overhead Unit Application

Wall-Mount Overhead Units are shipped with metal "Z" brackets for attachment to structural walls. Customers are responsible for insuring the wall has adequate strength to support the overhead and its contents.

The recommended installation height is 20" from the top of the worksurface to the bottom of the overhead unit.



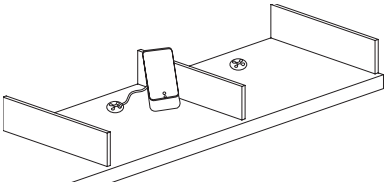
Wall-Mount Overhead Install Height

Technology Accommodation

Gripper grommets are located in the bottom of the Shelf and Shelf with Back Panel of Symmetrical and Asymmetrical Hutch Overhead Units.

There's also a single gripper grommet in the center shelf between left- and right-hand Single-Height and Double-Height Doors of Symmetrical and Asymmetrical Hutch Overhead Units and Wall-Mount Overhead Units.

These grommets enable power cords and communication cables to be routed from the building power and voice/data sources to equipment displayed on shelves.



Surface Material Application

On Symmetrical and Asymmetrical Hutch Overhead Units and Wall-Mount Overhead Units, Single- and Double-Height Door Units can be specified in veneer or paint, with veneer or glass door fronts.

On Symmetrical and Asymmetrical Hutch Overhead Units, Shelf and Shelf with Back Panel Units can be specified in veneer or paint, or with a combination of painted and veneered surfaces. These illustrations show how paint and veneer apply in combination; shaded areas indicate painted surfaces.

When specifying glass hutch overheads – only upper doors are glass, lower hutch doors are veneer.

General Information & Options

General Information

- One worksurface support must be specified
- Worksurface must be specified left- or right-handed, based on worksurface support from user's orientation
- Pedestal handedness will be determined by orientation of top and does not need to be specified
- OFT-1 and Column Base not for use with Tops with Beam and Gussets
- Tech Pedestal w/ Power Drawer and Door includes one USB port and three simplex outlets in top drawer
- Laptop/Printer Pedestal must be located adjacent to knee space
- Worksurface height: 29.5"
- Face locking standard on all desk pedestals

Options

Specify Painted Modesty Panel, add $1090, example MROR-3060-L-WC-MP
- -MP 1/4 Modesty Panel
- -MPC 1/4 Modesty Panel with Circle
- -MPF 1/2 Modesty Panel

Specify Veneer Modesty Panel, add $1256
- -MPV 1/4 Modesty Panel
- -MPFV 1/2 Modesty Panel

Specify Grommet Location (veneer surfaces only)
- - G (end only) Located above worksurface support, add $130

Specify Surface Materials
- See Page 6-7 for Veneer and Paint finish options
- Choose Metal Finish
- See Page 255 for Surface Material application options for use on worksurface support
- See Page 6-7 for Surface Material options on Modesty Panel
- Choose Glass Finish, if applicable

General Information & Options

General Information

- Column Base is not available on Freestanding Desks
- Each worksurface support must be specified separately
- When specifying Pedestals:
  Specify left position first (-L) (based on user's orientation)
  Specify right position second (-R) (based on user's orientation)
- Tech Pedestal w/ Power Drawer and Door includes one USB port and three simplex outlets in top drawer
- Laptop/Printer Pedestal must be located adjacent to knee space
- D, Taper and Taper with Round Ends are handed based on curved or round end
  -L Shaped end Left (based on user's orientation)
  -R Shaped end Right (based on user's orientation)
- Worksurface height: 29.5"
- Face locking standard on all desk pedestals

Options

Specify Painted Modesty Panel, add $1090
- -MP 1/4 Modesty Panel
- -MPC 1/4 Modesty Panel with Circle
- -MPF 1/2 Modesty Panel

Specify Veneer Modesty Panel, add $1256
- -MPV 1/4 Modesty Panel
- -MPFV 1/2 Modesty Panel

Specify Grommet location (based on user's orientation; veneer surfaces only)
- -GL Located above left worksurface support, add $130
- -GR Located above right worksurface support, add $130
- -G2 Located above both left and right worksurface support, add $260

Specify Surface Materials
- See Page 6-7 for Veneer and Paint finish options
- Choose Metal Finish
- See Page 255 for Surface Material application options for use on worksurface support
- See Page 6-7 for Surface Material options on Modesty Panel
- Choose Glass Finish, if applicable

General Information & Options

General Information

- Includes a Corner Shelf Support; additional Worksurface support must be specified.
- Single Pedestal Desks must be specified left- or right-handed, based on worksurface support location from user's orientation.
- Pedestals will be determined by orientation of worksurface and do not need to be specified left- or right-handed.
- Tech Pedestal w/ Power Drawer and Door includes one USB port and three simplex outlets in top drawer
- Laptop/Printer Pedestal must be located adjacent to knee space
- Worksurface height: 29.5"
- Face locking standard on all desk pedestals

Options

Specify Painted Modesty Panel, add $1090
- -MP 1/4 Modesty Panel
- -MPC 1/4 Modesty Panel with Circle (not available on 60" Single Pedestal Desks w/ pedestal supports)
- -MPF 1/2 Modesty Panel

Specify Veneer Modesty Panel, add $1256
- -MPV 1/4 Modesty Panel
- -MPFV 1/2 Modesty Panel

Specify Grommet location (based on user's orientation; veneer surfaces only)
- -GL Located above left worksurface support, add $130
- -GR Located above right worksurface support, add $130
- -G2 Located above both left and right worksurface support, add $260

Specify Surface Materials
- See Page 6-7 for Veneer and Paint finish options
- Choose Metal Finish
- See Page 255 for Surface Material application options for use on worksurface support
- See Page 6-7 for Surface Material options on Modesty Panel

General Information & Options

General Information

- Worksurface height: 29.5"

Options

For use with Bridge worksurface only

Specify Painted Modesty Panel, add $1090
-MP 1/4 Modesty Panel
-MPC 1/4 Modesty Panel with Circle
-MPF 1/2 Modesty Panel

Specify Veneer Modesty Panel, add $1256
-MPV 1/4 Modesty Panel
-MPFV 1/2 Modesty Panel

Specify Grommet location
-GC Located center, add $130

Specify Channel Grommet
-CNG Located at the back of worksurface, add $150

Specify Surface Materials
- See Page 6-7 for Veneer finish options
- Choose Metal Finish
- See Page 259 for Surface Material application options for use on worksurface support
- See Page 6-7 for Surface Material application options on Modesty Panel

Extended Corner Desks

 OC	**Metal Column Base**						
	For use with Worksurface only						
	OC	5 Dia. x 28.5		803			

General Information & Options

General Information

- Includes a Corner Shelf Support; additional worksurface support must be specified.
- Single Pedestal Desks must be specified left- or right-handed, based on worksurface support location from user's orientation.
- Pedestals will be determined by orientation of worksurface and do not need to be specified left- or right-handed.
- Tech Pedestal w/ Power Drawer and Door includes one USB port and three simplex outlets in top drawer
- Laptop/Printer Pedestal must be located adjacent to knee space
- Worksurface height: 29.5"
- Face locking standard on all desk pedestals

Options

Specify Painted Modesty Panel, add $1090
- -MP 1/4 Modesty Panel
- -MPC 1/4 Modesty Panel with Circle (not available on 60" Single Pedestal Desks w/ pedestal supports)
- -MPF 1/2 Modesty Panel

Specify Veneer Modesty Panel, add $1256
- -MPV 1/4 Modesty Panel
- -MPFV 1/2 Modesty Panel

Specify Grommet location (based on user's orientation; veneer surfaces only)
- -GL Located above left worksurface support, add $130
- -GR Located above right worksurface support, add $130
- -G2 Located above both left and right worksurface support, add $260

Specify Surface Materials
- See Page 6-7 for Veneer and Paint finish options
- Choose Metal Finish
- See Page 255 for Surface Material application options for use on worksurface support
- See Page 6-7 for Surface Material options on Modesty Panel

[ ] Specify Left (-L) or Right (-R)
• Specify -VS or -SG for painted chassis

General Information

- 51" Left Towers must be specified with Left Tower Mounted Overheads
- 51" Right Towers must be specified with Right Tower Mounted Overheads
- 36" wide 2 Lateral File Drawers with Upper Doors are standard with a lock on the drawers and upper door
- Glass Doors and Project Drawers are non-locking
- All Towers feature integrated horizontal and vertical wire management
- Structural Towers feature side grommets for wire management between Towers and Credenza
- Structural Towers and End Panels feature threaded inserts for attaching adjacent spanning overhead

Options

Locks on wood doors, box / file drawers; only specify –L, add $142
No Lateral File lock; specify –NL, add $0

Roll out equipment shelf; specify –ES, add $146, located on lowest fixed shelf

To Specify Left or Right 9" or 18" width Towers adjacent to the Credenza:
Left Tower; specify –L, hinge on left with pull on right
Right Tower; specify –R, hinge on right with pull on left

To Specify Left or Right 36" width Towers adjacent to the Credenza:
Left Tower, specify –L (pulls centered)
Right Tower specify –R (pulls centered)

Specify –GS for glass shelf
18" – 36" Shelf (OSN) and Shelf with Back Panel (OSB); add $419

Specify Surface Materials
- See Page 6-7 for Veneer and Paint finish options
- Choose Metal Finish
- See Page 259 for Surface Material application options
- Choose Glass Finish, if applicable

General Information & Options

General Information

- Vertical Veneer Back Panel included
- Tasklights included

- Overhead depth is 15"
- Must be supported by one Structural Tower or End Panel
- Non locking
- Lower Hutch Doors are always veneer

Options

Specify - GS for glass shelf
54" - 66" Shelf (HOSN) and Shelf with Back Panel (HOSB); add $844
72" - 96" Shelf (HOSN) and Shelf with Back Panel (HOSB); add $1179
102" - 108" Shelf (HOSN) and Shelf with Back Panel (HOSB); add $1442

Specify Tackboards
Symmetrical Hutches HOSS-**60**C-96, Tackboard Model Number TB-**60**
Asymmetrical Hutches HOSN-**54**-72, Tackboard Model Number TB-**54**

Specify Surface Materials
- See Page 6-7 for Veneer and Paint finish options
- Choose Metal Finish
- See Page 259 for Surface Material application options
- Choose Glass Finish, if applicable

- Specify -VS for painted chassis with veneer doors
- Specify -SG for painted chassis with glass doors

General Information & Options

General Information

- Vertical Veneer Back Panel included
- Tasklights included
- Overhead depth is 15"
- Must be supported by two Structural Towers and/or End Panels
- Non locking
- Glass overhead doors are tempered

Options

Specify - GS for glass shelf
60" - 66" Shelf (TOSN) and Shelf with Back Panel (TOSB); add $844
72" - 96" Shelf (TOSN) and Shelf with Back Panel (TOSB); add $1179
102" - 120" Shelf (TOSN) and Shelf with Back Panel (TOSB); add $1442

Specify Surface Materials
- See Page 6-7 for Veneer and Paint finish options
- Choose Metal Finish
- See Page 265 for Surface Material application options
- Choose Glass Finish, if applicable

- Specify -VS for painted chassis with veneer doors
- Specify -SG for painted chassis with glass doors

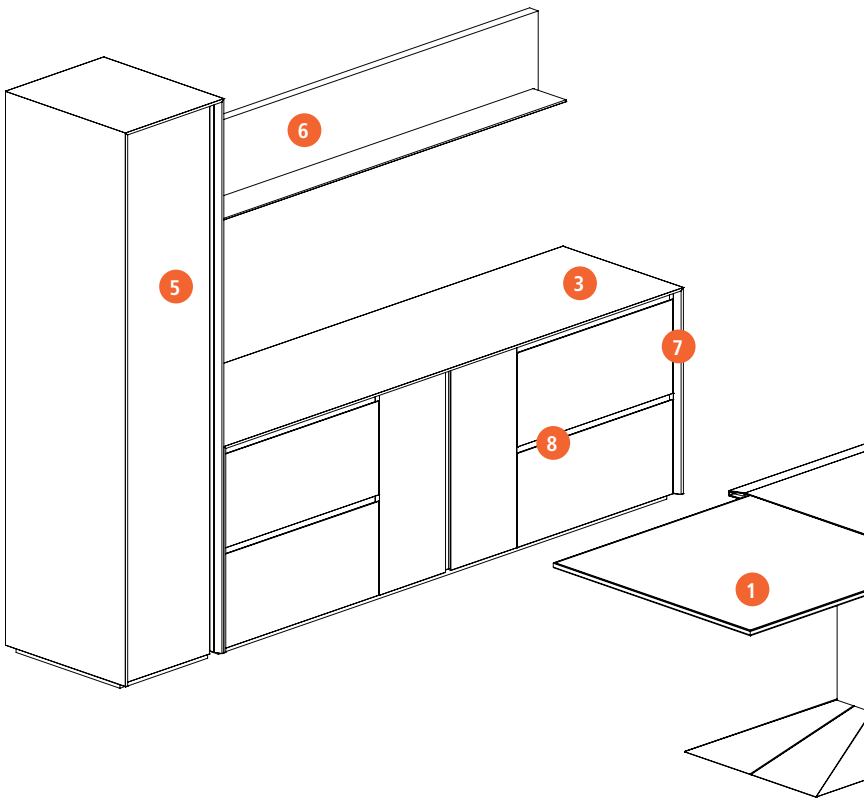
Two4Six Office

Two4Six Office

Designed and scaled to enhance collaboration in the private office, Two4Six eliminates the need to leave this space for collaboration between 2-4 people, especially when partnered with the proper technology. Two4Six components are freestanding and are intended to work together in any configuration, enhancing the flexibility of the product to be reconfigured. The result is the right furniture for tomorrow's office.

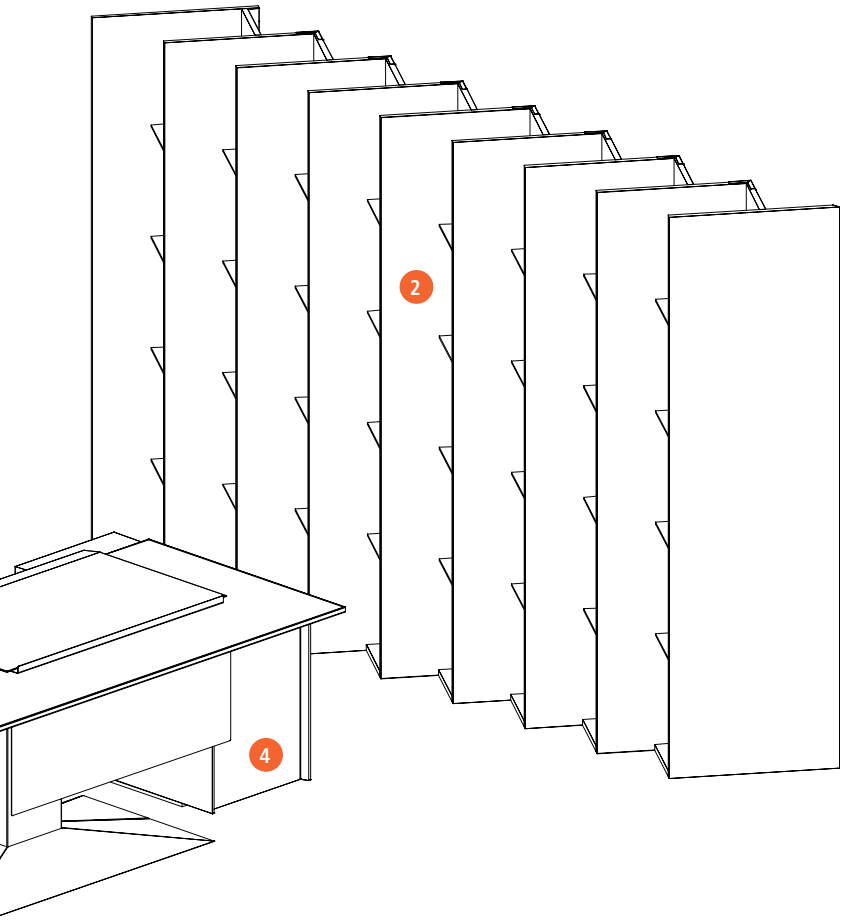


1 **Signature Desk.**
This desk is the ideal solution for both individual work as well as collaborating with others. Featuring a cut-back hardwood edge profile with 5/8" vertical edge, the desk is offered in three sizes; 42" x 84", 36" x 84" and 36" x 72". The column base features a durable powder coated surface and is available in both a static and height adjustable version.

2 **Louvered Wall.**
This innovative storage unit is 78"-tall and is offered in three widths (4 sections, 6 sections and 8 sections). It is designed for open storage of paper, books and personal artifacts, and features four adjustable glass shelves (1/4"-thick). Its louvered design allows the open display of its contents to only be visible by the occupant of the office, while maintaining a clean, crisp appearance from the hallway. The interior back panel is painted. It is not intended for use in an open environment, so the back side is not finished and includes a wall attachment bracket.

3 **Storage Credenzas.**
These units provide an option for additional storage and are 30"-tall and available in 60", 72" and 84" widths. The storage configurations vary based on the length of the unit.

4 **Pedestal.**
The pedestal is a very generously scaled 36" x 18" x 26" and features two drawers and a file drawer. The rear 4" is open for cable management, and can be accessed via a hinged door with a scallop at the top as well as an open bottom for cable access and egress. The top drawer of the pedestal can also be specified as an optional laptop drawer. When specified as such, the cable management section includes a thermostatically controlled fan. All drawers are painted white and feature soft-close undermount slides.



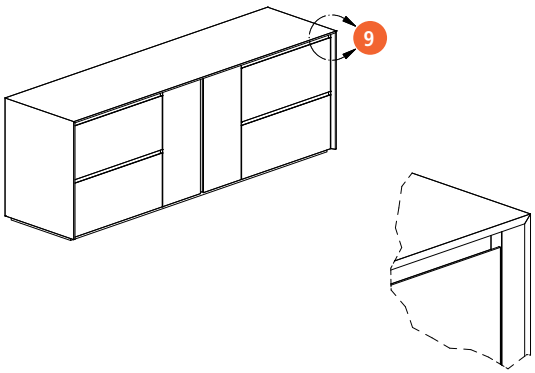
5 **Tower.**
This unit is 78" tall, 22" deep and 18" wide. It includes a fixed shelf near the bottom, and two adjustable wood shelves. The integrated pull runs the full length of the door on one side.

6 Shelf.
Offered in three widths, these simple yet effective glass shelves are ideal for showing off personal artifacts, awards and photos. They feature 1/4"-thick glass shelves, 6"-deep, piercing through wood mounting frames.

7 **Beveled Fronts.**
The design of the Two4Six cases features a beveled edge with recessed fronts that create a refined, framed appearance for all doors and drawers.

8 **Integrated Pulls.**
All doors and drawers feature integrated hardwood pulls, eliminating any metal hardware and maintaining the crisp, minimalist aesthetic.

9 **Mitered Edges.**
Wherever top and side panels are joined, a mitered joint is utilized for a clean, finely crafted appearance.



Technology Accommodation

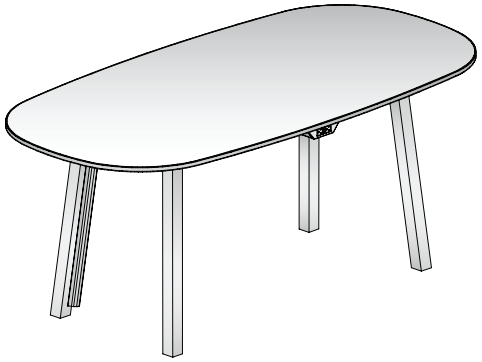
Ubiquitous technology, increasing demand for impromptu collaboration and shrinking real-estate footprints have challenged organizations to do more with less. This more with less paradigm places a high value on technology, embraces the mobile employee and requires smarter, flexible meeting spaces and multi-functional furniture.

Power Rail

This low-profile option addresses the need for power & AV connectivity just below the table top. This is an ideal choice for those who desire a visually uninterrupted table top and appreciate the inherent flexibility of the Power Rail to be removed at a later date as their technology capabilities evolve. Power Rails are available in three configurations:

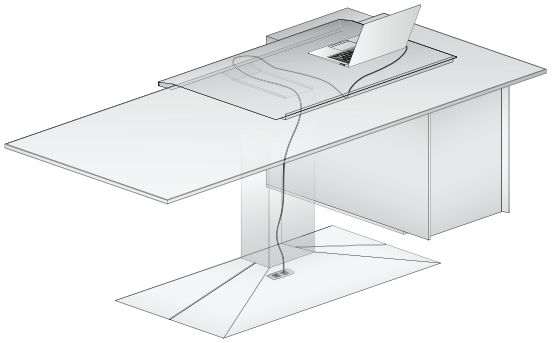
- *Two simplex receptacles (UL listed)*
- *One simplex receptacle and one dual powered USB connector*
- *Two AV faceplates designed for use with Extron Architectural Adaptor Plates (AAPs).*

Held in place with thumb screws, these units can be placed in multiple locations along the perimeter of the desk. This flexible mounting design allows for additional units to be added as necessary, or to be removed when no longer needed.



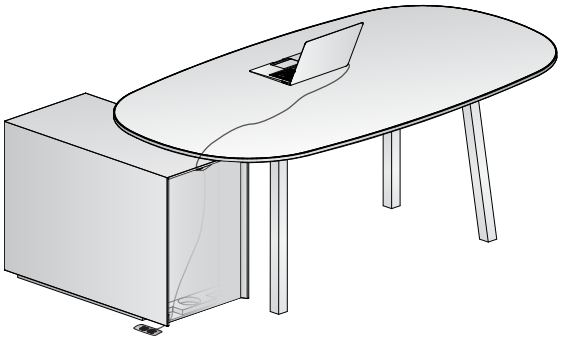
Blotter with Wire Management

This optional device serves to define the personal zone of the user and to discretely manage cables from laptops and monitors to the underside of the desk. It can be located anywhere along the user's side of the desk and is finished in a leather-like material (CF Stinson - Sundance with Sta-Kleen).



Pedestal with Wire Management

The pedestal includes 4" of open space for cable management, and can be accessed via a hinged door with a scallop at the top as well as an open bottom for cable access and egress. The top drawer of the pedestal can also be specified as an optional laptop drawer. When specified as such, the cable management section includes a thermostatically controlled fan.

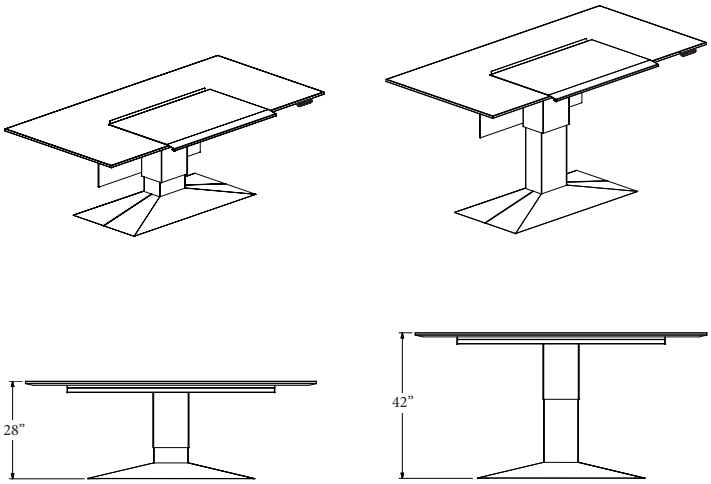


Adjustable Height Desks. The adjustable height desk promotes wellness and can be used to imply meeting duration or encourage impromptu collaboration. Offering a height adjustment range from 28” to 42”.

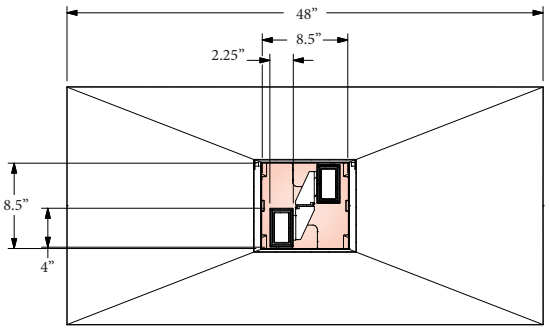
Signature Adjustable Height Desk

This rectangular desk features a metal column base and modesty panel.

- Adjustment range is from 28” to 42”
- Controller features digital height readout and four programmable stops
- See page 305 for available sizes and specification requirements

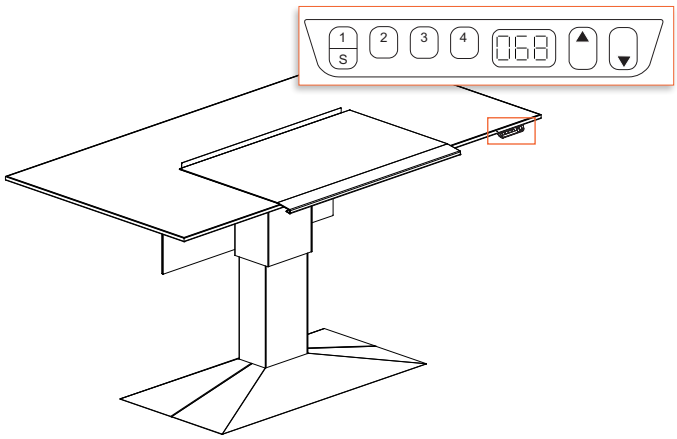


Wire Management for Adjustable Height Desk



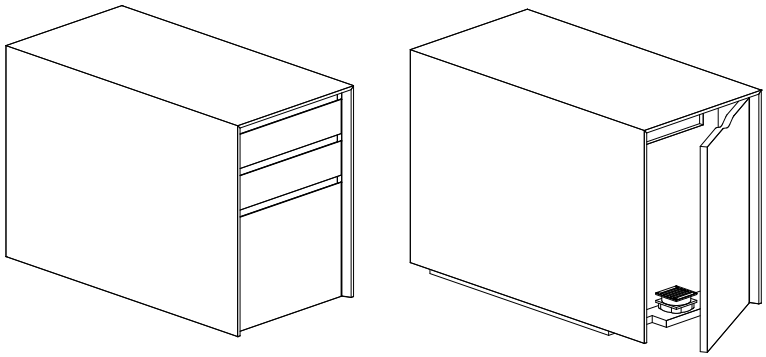
Programmable Controller

The programmable controller features up/down buttons, four programmable preset stops, and a digital readout that displays the worksurface height.

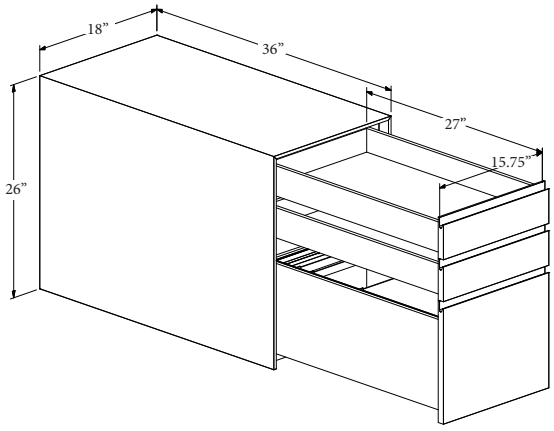


Pedestal

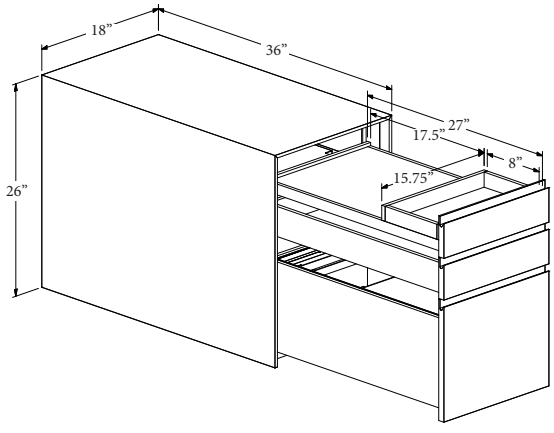
The pedestal is a very generously scaled 36” x 18” x 26” and features two drawers and a file drawer. The rear 4” is open for cable management, and can be accessed via a hinged door with a scallop at the top as well as an open bottom for cable access and egress. The top drawer of the pedestal can also be specified as an optional laptop drawer. When specified as such, the cable management section includes a thermostatically controlled fan. All drawers are painted white and feature soft-close slides.



Pedestal with Two Drawers and a File



Pedestal with Optional Laptop Drawer



Louvered Wall

This innovative storage unit is 78”-tall and is offered in three widths (4 sections, 6 sections and 8 sections). It is designed for open storage of paper, books and personal artifacts, and features three adjustable glass shelves (1/4”-thick). Its louvered design allows the open display of its contents to only be visible by the occupant of the office, while maintaining a clean, crisp appearance from the hallway. The interior back panel is painted, and available in Cloud, Burnished, Foil, Shadow or Galaxy. It is not intended for use in an open environment, so the back side is not finished and includes a wall attachment bracket.

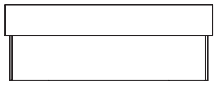
Envision Planning Guide

Configurations

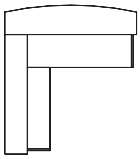
Envision is available in six footprint configurations, with each consisting of multiple components, to create a complete station. Use the illustrations below to select a configuration and to specify the appropriate components from the corresponding pages.

Freestanding Rectangle Desk



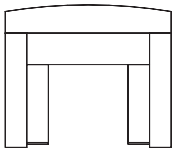
Consisting of:
- *Freestanding Rectangle Desk (page 329)*
- *One or Two Desk Pedestals (page 329)*

L-Shape



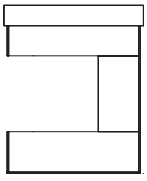
Consisting of:
- *Single Pedestal Desk (page 324)*
- *One Desk Pedestal (page 324)*
- *Return (page 325)*
- *One or more Return Pedestals (page 325)*

U-Shape with Left and Right Returns



Consisting of:
- *Desk (page 323)*
- *Two Returns (page 325)*
- *One or more Return Pedestals (page 325)*

U-Shape with Bridge and Back Credenza



Consisting of:
- *Single Pedestal Desk (page 324)*
- *Bridge (page 327)*
- *Back Credenza (page 328)*
- *One or more Credenza Pedestals (page 328)*

Freestanding Arc-Shape Desk

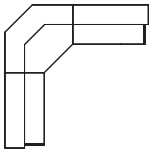
Consisting of:
- *72" Desk (page 330)*
- *36" opening*

Consisting of:
- *96"Desk (page 330)*
- *50" opening*
- *One Freestanding Pedestal (page 330)*

Consisting of:
- *120" Desk Shell (page 330)*
- *63" opening*
- *One or more Freestanding Pedestals (page 330)*

Freestanding pedestals are unattached and can be positioned based on user's preference.

Clipped Corner Desk

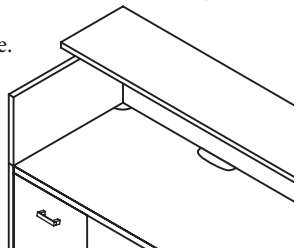


Consisting of:
- *Clipped Corner Desk (page 322)*
- *Two Returns (page 326)*
- *One or more Return Pedestals (page 326)*

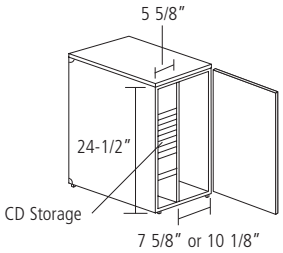
Technology Accommodation

Envision includes a number of standard features and options to enhance technology accommodation within the station.

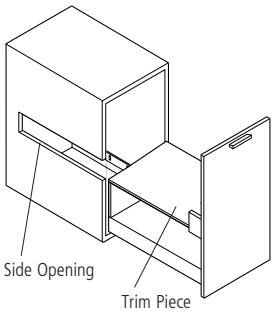
Work Surface Wire Management
Scallop-shaped grommets are standard in the left corner, right corner and center back edge of all Desk work surfaces to allow for easy routing of power and data cables below the work surface.

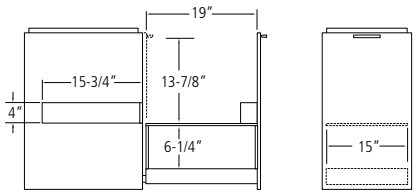


Power Pedestal
Power Pedestals feature a divided interior, with CPU Storage on one side and CD/DVD and cable storage on the other side. They also include cut-outs in the upper and lower back corners of the side panels to allow for wire management.



Printer Pedestal
Printer Pedestals are unique components that provide storage and concealment of printers while offering easy access to printed documents by exposing only the printer output tray. Printer Pedestals accommodate most inkjet printers and include a paper storage shelf below the printer shelf. The pedestal's side opening provides access to printed documents without the need to open the pedestal drawer. The trim piece attached to the single-face pedestal door allows the door to be opened and closed without removing the printer output tray. Grommets located in the bottom and side panels of the Printer Pedestal provide easy wire management.





Pedestal Wire Management
Pedestals feature a raised bottom panel to allow them to be placed over a floor monument, as well as a cut-out in the bottom panel to allow cables to be routed up into a hollow cavity behind the file and drawer boxes. This cavity also accommodates cables dropped through the work surface grommets above. Cut-outs in the upper and lower back corners of Pedestal side panels allow cables to be routed out of this cavity and into wire management channels mounted to the underside of work surfaces, providing maximum concealment and flexibility in cable management.

Recessed Monitor Shelf
This option enables flat-panel monitors to be mounted under the work surface and viewed through a glass panel installed flush with the work surface.
