Ergonomic Task Chair

Track

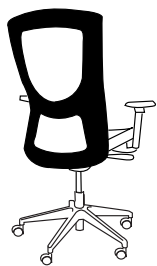

Office Seating

Ergonomic Task Seating

Track has a boldly designed back where distinctive lumbar angles silhouette a graceful racetrack-shaped outer shell. Intelligent design-details, integrated ergonomic support, and green focus provide an excellent blend of charm, comfort, and environmental responsibility. Track features a clean, thin profile with an enhanced lumbar region that encourages a healthy posture while seated.

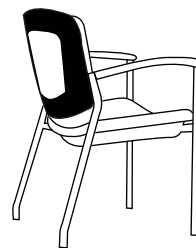

Track is also very environmentally responsible. Over 90% of the component materials are composed of ReTek®, a post-consumer and post-industrial recycled plastic from Innovative Resin Technologies™. ReTek is the result of a patented process using 100% industrial waste recycled polyolefin and #1 through #7 post-consumer plastics. By utilizing ReTek, Track can easily meet recycled content requirements to contribute LEED project points.
