Model Number Index	65

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

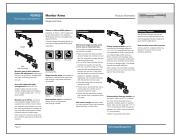

We suggest that you become familiar with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.

**Statement of Line** provides a snapshot of the entire product line. We've included an illustration and page cross references to the applicable pricing and how to specify pages.

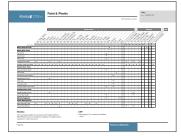

**Overviews** offer a quick look at the distinguishing features of the product line.

Product Information and Application Guidelines pages provide detailed information about the product, connections that can be made with other models, and planning factors.

**Pricing pages** list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.

Look in the Finishes and Materials appendix to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

Only Underwriters' Laboratory (U.L.) or Canadian Standards Association (C.S.A.) listed electrical components are used in electrical devices and are so labeled.

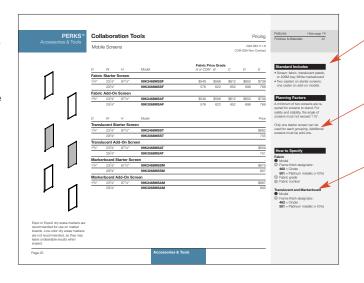

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., 1), 2, or 3) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Refer to the "standard includes" list to see what ships standard as part of the base model.

**Follow these steps** to build a complete model specification.

Options that incur an upcharge or decrease the base price are noted within the "How to Specify" steps.

# **Pricing Table Abbreviations:**

D = Depth

W = Width

H = Height

T = Thickness

AO = Approach Overhang

ED = End Depth

*KW* = Kneespace Width

KH = Kneespace Height

WC = Worksurface Clearance

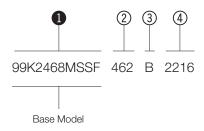

# Electronic Catalog and Specification Software:

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS collaborator™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

# Sample Specification:

The example below shows a complete model number for a Fabric Mobile Screen.

# **Ordering Procedures:**

Purchase orders must be received with complete information, which includes the following:

- Complete/valid model numbers
- All textiles, finish, and material specifications for each line item.
- "Ship to" address and contact
- Special shipping instructions (tagging, requested dates, etc.)
- Billing address
- Net prices

Submit orders electronically via EDI or OrderXchange.

To order literature or check order status on-line, please visit us at www.kimballoffice.com.

The customer bears sole responsibility for order correctness. Orders are accepted only by issuance of Kimball Office's formal order confirmation and are subject to the terms and conditions set forth herein, notwithstanding any variance in terms and conditions set forth on buyer's order forms.

The order confirmation is the final agreement between the customer and Kimball Office and supersedes all prior oral, written or electronically transmitted statements regarding the order. Kimball Office will attempt to meet all requested ship or delivery dates. If no specific date is requested, we will assign the best possible ship date available.

# **Changes and Cancellations:**

A confirmed order may not be changed or cancelled, in whole or in part, without prior written consent of Kimball Office. Expenses incurred because of the changes shall be charged to the Purchaser. In the event of cancellations, Purchaser will be liable for reasonable cancellation charges established by Kimball Office. Changes may affect delivery dates.

No changes or cancellations will be accepted after order entry for nonstandard lead time products including:

- Kwik Office offerings
- Engineer-to-Order (modified or non-standard products)
- Alliance program upholstery
- Customer's Own Material (COM)
- Customer's Own Leather (COL)
- Customer Specified Laminate (CSL)
- Customer Specified Paint (CSP)
- Mock Ups
- Service Parts/Replacements

#### **Modified Product:**

Our manufacturing flexibility allows us to accommodate requests for non-cataloged product. We are happy to discuss your unique product requirements and determine feasibility and pricing.

➤ Contact **By Design** for assistance at 800.482.1616 extension 6002.

## **Finishes and Materials:**

#### **Wood Finish Color Matching**

Each piece of natural veneer offers unique texture and grain. Minor variations in finish color and value may occur due to the natural characteristics of wood. Kimball Office carefully selects all materials used in every product ensuring a commercially acceptable color and finish. Factors such as aging and exposure to light alter finishes.

#### **Fabric Color Matching**

Kimball Office will always ship a satisfactory commercial match on fabric. Because of industry dye-lot variation, colors may not match exactly.

# **Terms and Pricing:**

Net 30 days. If the invoice amount is not paid in full within the terms of the invoice, the invoice may be subject to a monthly finance charge equal to the lesser of 1.5% or the highest amount permitted by law. List prices include freight charges; however, they do not include:

- Storage and insurance charges
- Sales and other taxes
- Local delivery, unloading, or installation

These items will be invoiced as separate line items.

All prices herein are delivered list price, unless noted, effective August 24, 2015, and supersede all other published prices. Prices shown cover standard product only, additional charges will be applied for changes to standard product. Kimball Office reserves the right to change prices without prior notice. Prices herein are only for shipment within the continental United States or Canada.

#### Selling Information

Distribution of this price list does not in itself constitute an offer to sell. Orders can be received only from authorized Kimball Office customers. Kimball Office price lists and catalogs are not available to the general public.

# **Product Design:**

Kimball Office reserves the right to make changes in design, specifications, and construction or discontinue products without prior notice.

# Shipping/Freight:

Products are priced and will be delivered C.P.T. one contiguous U.S. destination, one Canadian destination or one port of exit, freight prepaid (Incoterms 2010). Title shall transfer with risk of loss.

Kimball Office reserves the right to select the most appropriate shipping terms

# **Terms and Conditions**

continued

# Product Warranty See page 6 Sustainability 7 ANSI/BIFMA 8 Model Number Index 65

# Delivery:

Normal delivery hours are 8:00 a.m. to 5:00 p.m. Monday through Thursday and 8:00 a.m. to 3:00 p.m. on Friday. Any delivery arrangements made outside of normal delivery times are subject to additional charges.

Any charges incurred because of failure to receive a shipment or offload a shipment in a timely manner (maximum time allowed to offload trailer: 3 hours), will be billed to the sold-to customer.

Any charges as a result of rerouting a shipment while in transit will be billed to the sold-to customer.

Any order requiring **Special Delivery Service** will incur additional charges. All such requirements must be noted on the purchase order. These are services that are not included in the standard price of the product or require the usage of specialized carriers. These services include:

- Weekend delivery (after 3:00 p.m. Friday through Sunday evening) minimum \$500 charge.
- Inside delivery—minimum \$50 charge.
   Note: Must be approved and coordinated 10 days prior to shipment.
- Non-dock delivery—minimum \$50 charge.
- JIT delivery (specific day and/or time)—Orders under \$25,000 list will incur a \$125 charge.

 Rush delivery (1-3 days from ship date)—Contact Customer Service for charges.

#### **Carrier Selection**

Kimball Office reserves the right to select the most appropriate mode of shipment. Kimball Office relinquishes all responsibility for goods shipped upon a clean receipt from the carrier. Customer bears the risk of loss or damage during shipment.

#### **Packaging**

Kimball Office's standard method of shipping is to carton all items. Certain full truck load shipments may qualify for special consideration. Contact Kimball Office for guidelines. International shipments can be crated at the customer's request. The expense of crating will be the responsibility of the customer.

#### **Palletizing**

Kimball Office may elect to palletize key products on projects when it effectively reduces carton waste and improves stability within the shipment.

#### Loss, Damage, or Delay

Kimball Office shall not be liable for loss, damage, detention or delay resulting from causes beyond its reasonable control including but not limited to fire, strike, weather, wreck or delay in transportation. In the event of delay due to any such cause, the delivery date will be postponed by such length of time as may be reasonably necessary to compensate for the delay.

#### Storage

If the customer requests a change of ship date and the product is in production, Kimball Office reserves the right to transfer the product to storage at the customer's risk and expense. All requests to store product must be approved by Kimball Office Customer Service and may be subject to storage fees. Such transfer to storage will be deemed delivery to the customer for all purposes including insurance, liabilities, invoicing, and payment.

#### **Returned Merchandise**

Merchandise will only be accepted for return under the following conditions:

- ① The product is a "made to stock" item; and
- ② Return Goods Authorization (RGA) is given to you by your Customer Service Team.

All returns are subject to a 50% restocking fee. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect. All merchandise being returned must be properly packed and protected in the original cartons. Upon receipt, all returned merchandise will be thoroughly inspected. Any discrepancies, such as additional damage, signs of usage, missing parts, etc., will result in an adjustment to the amount of credit issued.

#### Claim Process:

All products produced by Kimball Office are carefully inspected and properly cartoned prior to shipment. All shipments are delivered to the transportation company in good condition. If you receive a shipment that has damage, product shortages, or delivery has been delayed by the transportation carrier, **the following** 

#### steps must be taken:

- ① Before signing for the merchandise, make notation of all visible damage, shortages and/or time of truck arrival on the bill of lading.
- ② Contact Customer Service within 15 calendar days of delivery receipt to report issue. We will advise whether a freight claim will need to be filed based on mode of transportation.
- ③ If claim must be filed, carrier must be contacted within 15 calendar days of delivery. Retain all shipping cartons for inspection by the carrier agent.
- A copy of the Carrier Disposition Letter must be sent to Customer Service to receive additional credit on concealed damage issues via Redistribution/ LTL carrier shipments.

For Concealed Damage, follow steps 2 through 4.

# **Asset Tag Locations:**

Bar code labels have been placed on most Kimball Office products.

# Products with pedestals or lateral files

Underside of top drawer near front edge in right pedestal (if no right pedestal).

# Highback organizers and overhead cabinets

Back left of task light facade.

#### **Bookcases**

Underside of lowest shelf (not bottom panel) on the left front edge. If glass shelves, top panel in cornice area.

## Vertical storage cabinets

Underside of top drawer near front edge. If no drawers, underside of lowest shelf on left front edge.

# Bridges, corner units, worksurfaces, computer support furniture, P-, U-, and keyhole-shaped desks

Underside of the top surface (user's side) on the front edge.

#### Component modesty panels

Center top of the panel on the inside (kneespace area).

#### **Tables**

Underside of table top near the outside edge.

# Kimball Office

# **Product Warranty**

Lifetime Assurance of Quality

# Terms & Conditions See page 4 Sustainability 7 ANSI/BIFMA 8 Model Number Index 65

# Our Pledge:

Kimball Office stands behind the craftsmanship of our products. When brought to our attention, we will address warranty issues quickly and effectively.

#### Recommendations:

Facilities managers and users are urged to make periodic inspections to look for signs of structural fatigue, damage or potential failure that may occur as a result of daily handling and use. Inspections should include the structural joints, corner blocks, screws or fasteners, welds, and any other points of stress. If any problems are found, the product should be taken out of service and Kimball Office Customer Service should be contacted promptly at 800-482-1818.

# **Limited Product Warranty:**

Kimball Office warrants that its products are free from defects in materials and workmanship given normal use and care for a lifetime of single-shift service. Normal use is defined as the equivalent of a single shift, 40-hour work week.

Exception: Itsa and Campos seating models are warranted for three-shift (24/7) service. Wish seating, excluding Wish Classic, is warranted for three-shift (24/7) service and up to 400 lb. user weight.

Exception: Some products and parts have limited warranty periods.

See lists at right.

At its option, Kimball Office will repair or replace with comparable product, free of charge to the customer, any product, part or component manufactured and/or sold by Kimball Office in North America after November 6, 2000, which fails under normal use as a result of such defect.

In the event that use of a product exceeds normal use as defined above, the warranty period for such product will be reduced to 12 years from date of manufacture, and the warranty for the product's components that fall under different warranty limitations, as listed at right, will be reduced to one-third of the original warranty.

This warranty is made by Kimball Office to the original customer for as long as the original customer owns and uses the product.

This warranty is only valid if the products are given normal and proper use, and installed or used in accordance with Kimball Office installation and/or application guidelines, and installed by an authorized Kimball Office dealer or agent. Kimball Office assumes no responsibility for repairs to products sustaining damages resulting from user modification, attachments to a product, misuse, abuse, alteration, or negligent use of our products.

EXCEPT AS EXPRESSLY SET FORTH
ABOVE, THERE ARE NO OTHER
WARRANTIES EITHER EXPRESS OR
IMPLIED, INCLUDING BUT NOT
LIMITED TO ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY

# PARTICULAR PURPOSE. WE EXCLUDE AND WILL NOT PAY CONSEQUENTIAL, PUNITIVE, OR INCIDENTAL DAMAGES UNDER THIS WARRANTY.

All warranties run from date of manufacture.

## **Warranty Periods:**

Warranty periods are limited for certain products and/or component parts as follows:

### 10-Year Warranty

- Seating mechanisms
- Veneers
- Laminate
- Pneumatic lifts (cylinder assembly)

#### 5-Year Warranty

- High-wear parts (such as casters, glides, drawer slides, moving chair arms)
- Electrical/power products
- Inflatable lumbar supports
- Lighting
- Desk sets
- Monitor arms
- Keyboard kits
- Covering materials (such as foam, most textiles, 3D laminate, and decorative trim)
- Marker Boards

#### 3-Year Warranty

- Wool felt
- Custom products
- Carnegie fabrics
- Itsa mesh
- Campos mesh
- Wish mesh

## **Warranty Exclusions:**

This warranty does not cover:

- The substitution of non-Kimball Office components for use in place of Kimball Office components
- Naturally occurring variations and differences in grain character and color between and within wood species
- Natural variations in marble and leather
- Damage caused by a freight carrier
- Normal wear and tear arising from product use
- Damage resulting from improper use or storage of the product
- C.O.M. (Customer's Own Material) or any other non-standard material specified by the customer, including attributes such as appearance, durability, quality, performance, colorfastness. etc.
- Alliance program fabrics
- Fabric, leather, and felt fading and wear, discoloration from contact with liquids or change in color or texture caused by application of finishes (flame proofing, stain resistance)
- Alterations to the product not expressly authorized by Kimball Office
- Products considered to be of consumable nature (such as bulbs, light ballast, and certain electronic products)

# **Process for Warranty Issues:**

- ① A customer should contact his or her dealer, who will contact Customer Service at 800-482-1818. The purchase order or acknowledgement number, model number, and a detailed description of the warranty issue should be provided. Serial numbers may be required before the claim can be processed.
- ② Customer Service will determine and pre-approve all resolutions to the claim, such as replacement units, service parts, and labor charges related to repair or redelivery of damaged or defective product.
- 3 Upon approval, a Case Number and resolution will be assigned to an authorized dealer, and all parts and components necessary for the repair/replace will be sent to the authorized dealer, which will carry out the resolution. The dealer should include the Case Number on all invoices for reimbursement once the warranty repair/replace has been completed. Kimball Office shall not be responsible for any unauthorized expenses. Kimball Office will only accept dealer invoices submitted within 90 days of the final approval by Customer Service: invoices received after 90 days will not be approved for dealer credit or payment. All warranty information should be sent

Terms & Conditions	➤See page 4
Product Warranty	6
ANSI/BIFMA	8
Model Number Index	65

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to stake initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example.

Throughout our more than 40 years of documented environmental actions. we have been a responsible steward of resources and have acted as an agent of sustainable change in our industry.

**Design for the Environment** is our approach to product development to ensure the inherent sustainability of our offerings. By considering a full continuum of environmental factors, we have greatly improved the life cycle performance of our furniture.

Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

#### ANSI/BIFMA level™

We offer one of the most sustainable portfolios in the industry, which includes systems, casegoods, tables, and seating.

Enhancing the Home We All Share

# ecoScorecard®

Through this free online tool, you have 24/7 access to the environmental attributes of our products. EcoScorecard enables speed and accuracy in the calculation of environmental credits for LEED®, saving you time and ultimately, money.

➤See how easy it is at kimballoffice.ecoscorecard.com.

#### **LEED®** Certification

Kimball Office offers furniture solutions which may contribute toward LEED® certification. The LEED Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

#### LEED-CI Gold:

- Jasper, IN showroom
- San Francisco, CA showroom

#### LEED-CI Silver:

- Atlanta, GA showroom
- Chicago, IL showroom

#### LEED-CI:

- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

# Indoor Air Quality

One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. Kimball Office tests and certifies many of our products to the ANSI/BIFMA e3 2014 standard credits (7.6.1, 7.6.2, 7.6.3).

# pura

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broad range of products to exceed indoor air quality standards and help our customers achieve LEED credits.

The mark of

#### **FSC-Certified Wood**

Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood.

➤Contact By Design at 800.482.1616 for pricing and lead time information.

Asset Network for Education Worldwide. Inc. (ANEW) is an effective way to responsibly disposition surplus furniture, fixtures and equipment. ANEW can repurpose your equipment to benefit those in need, while diverting materials from landfills.

ANEW calls it "Doing what's right with what's left." We call it smart.

Find more specific details regarding the environmental aspects of our product offerings at: www.kimballoffice.com

**Wall-Mount Markerboards** 

➤See page 26 to specify.

**Hanging Markerboard Tile** 

➤ See page 26 to specify.

# Name/Sign Holder

See page 26 to specify.

**Features** Overview

Statement of Line See page 9
Finishes & Materials A1

**Name/sign holders** are available for an aesthetically pleasing method of identifying and personalizing your workspace.

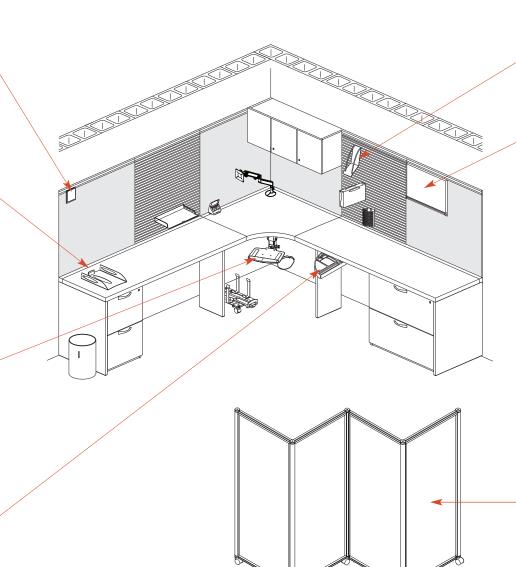

**Coat hook** helps keep your workspace clear for more usable space.

Classic and metro desk set accessories help organize the workplace. Classic accessories provide a traditional feel with black faux leather and contrasting accent stitching. Metro accessories are available for more contemporary workspaces and is available in both silver and anthracite.

**Technology management accessories** are available to help manage computer needs.

See the Technology Management chapter.

**Carousel trays and center drawers** provide convenient undersurface storage. Carousel trays rotate 360°.

**Work tools,** available in metal or plastic, provide storage up off of the worksurface.

Hanging markerboard tile hangs from Xsite Traxx, metal slat tiles, or lower mobile table screens. It can be moved easily around the workspace to keep the creativity flowing.

**Organizational tools,** such as pencil trays and drawer organizers, provide more functionality to storage units.

**Mobile screens** provide visual privacy and divide space.

Expo or Expo2 dry erase markers are recommended for use on marker boards. Low-odor dry erase markers are not recommended, as they may leave undesirable results when erased.

# Standard Includes

- Screen: fabric, translucent plastic, or 409M Icey White markerboard
- Two casters on starter screens; one caster on add-on models

# **Planning Factors**

A minimum of two screens are required for screens to stand. For safety and stability, the angle of screens must not exceed 115°.

Only one starter screen can be used for each grouping. Additional screens must be add-ons.

Finishes & Materials A1

#### Power and voice/data modules

provide convenient access to power and data on the worksurface. Modules slip securely into worksurface wire manager; no field scribing is necessary and they may be relocated as needed.

**Keyboard kits, adjusters, or trays** attach below the surface to provide adjustability and storage for computer keyboards.

**Wire manager fillers** provide a finished end to wire manager at the end of a worksurface.

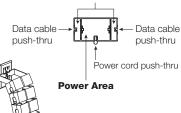

**Monitor arms** can be positioned at optimum height and distance to minimize strain and fatigue, preventing discomfort and injury.

**Grommets** are available for field installation to allow cords and cables to pass through the worksurface.

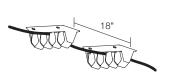

See the applicable price list for factory-installed grommets.

**Mobile CPU cart** provides easy access to the back of your unit. It automatically adjusts to support CPUs up to 9"W. It adds 3¾" to the height of the installed CPU.

#### Flexchain Data Area

Flexchain manages cables and power-in feeds from under the surface to the floor. Flexchain U-bracket, specified separately, mounts to a standard wall outlet to manage cords from the outlet to under the surface. Flexchain has a center area for electrical cords and power in-feeds, and two side areas for data cables.

**Undersurface cable manager** is available to manage cords and cables under the worksurface. Cables pressure fit between loops.

Single-sided pneumatic pop-up power/data centers provide convenient access to power and USB ports at worksurface height. Field scribing of surface is required.

Wireless presentation systems are available.

for use with height-adjustable tables.

➤ See the Meeting & Collaboration Price List.

# Adjustable Keyboard Kits:

Keyboard kits cannot be used with President and Senator kneespace credenzas due to the central locking mechanism; nor can they be used with Scenario tables and Fluent worksurfaces as they interfere with the support channels.

Keyboard kits can be used with Xsede when undersurface support rails are not used.

Only keyboard kit models 99K1706KK2 and 99K1706KK1 work with Priority support rails and height-adjustable tables. Keyboard mount slide will need to be oriented parallel with the front edge of the worksurface. To store, lower the keyboard and swing under the surface.

The following adjustable keyboard kit models comply with ANSI/HFES method 2

Series	Keyboard Arm Model
Priority™	99K2208KK1 99K2319KKS1
Definition®	99K2208KK1 99K2319KKS1
Transcend®	99K2208KK1 99K2319KKS1
Footprint®	99K2319KKS1

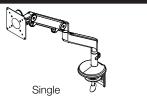

For use in corner applications.

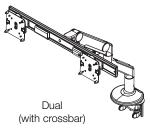

Page 30 Technology Management

Finishes & Materials

# Single and Dual

# **Details**

Monitor arms in this collection feature 4D adjustment, adjusting in and out, up and down, swiveling left and right, and tilting back and forward.

Arm with integrated cable management reach is 20" on single models and 22" on dual models. Height adjustment range is 10" on single models and 11½" on dual models.

Monitors up to 20 lbs. can be accommodated. Single-monitor arm supports one monitor. Dual-monitor arm supports two monitors up to 20 lbs. each and features a crossbar design with Allen head screws to keep monitors secure in public areas. Note: Dual-arm monitors must have two monitors attached at all times for balance.

# 100mm x 100mm VESA plates are standard. A 75mm x 75mm plate can be accommodated. The standard VESA plates are not compatible with

➤ Contact Apple Computer directly to purchase an appropriate VESA plate separately.

Apple monitors.

Slat

Clamp

Grommet

Accessory Rail

Single-monitor arms are available in slat-mount, clamp-mount, grommet/ bolt-through, and Xsede accessory rail models.

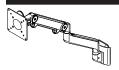

Clamp

Grommet

**Dual-monitor arms** are available in clamp-mount and grommet/ bolt-through models.

#### **Connections**

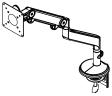

# Slat-mount single-monitor arms are for use on metal slat tiles.

The number of single-monitor arms per slat tile is limited:

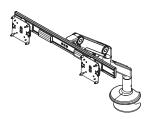

- Wall-mounted, full, metal slat tiles accommodate one monitor arm per tile. Trim channels included with the slat tile must be used.
- 24" or 30"W Cetra slat tiles accommodate one monitor arm per tile.
- 18", 24", or 30"W 1-high or 2-high Xsite slat tiles accommodate one monitor arm per tile. 2-high Xsite slat tiles require an extra mid-frame support for stability, specified separately. Trim channels included with the slat tile must be used.
- Xsite technology tile can hold two monitors per tile.
- Priority slat or fabric/slat tiles will accommodate two monitor arms if spaced at least 24" apart.
- Xsede slat tiles will accommodate two monitor arms if spaced at least 24" apart.

Slat-mount model cannot be used on wall-mounted Traxx, wall-mounted fabric/slat tiles, or Xsite Traxx.

Clamp-mount models must be mounted on the straight edge of a 13/16" or 19/16" worksurface; they are not applicable for knife, reverse knife, and sloped edge profile surfaces. When using on wire manager worksurfaces, the hard plastic underneath will have to be notched so the clamp is flush to a straight edge. The flexible topside durometer will bend.

Note: Clamp-mount models compatible with Xsede can be mounted to the back of the worksurface.

# Grommet/bolt-through models can

be used in holes up to 2.3" in diameter. They cannot be placed over a pedestal, modesty panel, or support panel. They can be used with 13/16" or 19/16" worksurfaces. Bolt-through application can utilize a hole as small as 1/2" in the surface.

▶ Refer to assembly instructions.

# Planning Factors

IMPORTANT: Monitor mounts are specific to arm style and are not are interchangeable between single and dual monitor applications.

Dual-monitor arms with cross bar can be used for a single-monitor application: however, the cross bar would be exposed.

# Planning Factors

17"D adjustable keyboard kits are recommended for bridge applications; 22" and 23"D adjustable keyboard kits can be used in cornermount applications.

Width of keyboard kits includes mouse tray. Keyboard tray is 2011/16"W; mouse tray is 9" in diameter and is non-handed for mounting on the left or right.

Manual and intuitive adjustable keyboard kits slide in and out under the surface.

Keyboard kits will not be flush with the worksurface edge (in the stored, recessed position) when mounted in accordance with the manufacturer's directions.

Keyboard kits can be used with Xsede when undersurface support rails are not used.

See page 30 for a cross reference chart by furniture series of keyboard kits that comply to ANSI/HFES Method 2.

# Standard Includes

## Adjustable Keyboard Kit

- Keyboard arm: black
- Foam gel wrist rest: black
- High-density polyethylene tray and ABS mouse tray: black

Finishes & Materials

Λ1

Power/data drawers and electrical components are for use in open planning and freestanding applications. They are recommended for use with Priority™, Definition®, Fluent® (where modesty panel is not used), and Footprint®.

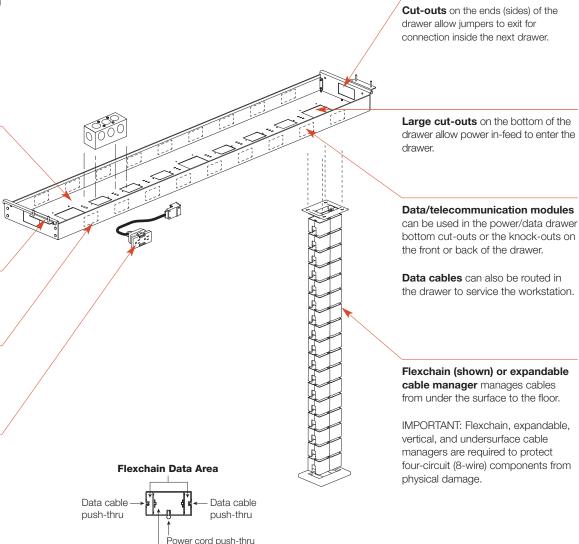

#### Perks power/data sliding drawer

brings both power and data to the underside of the worksurface. Unlike fixed troughs or baskets, the drawer pulls out to allow routing of excess cabling once the initial connection has been made.

Mounting hardware is field installed.

**Metal knock-outs** in the front face and back of the drawer can be removed as needed for data or electrical outlets.

Single-circuit, four-circuit, and hardwire electrical components are for use in power/data drawers.

#### **Circuitry Options:**

Power/data drawers accept singlecircuit or four-circuit electrical components. Components are specific to either single or multicircuit; they cannot be used interchangeably. Power/data drawers are U.L. listed.

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.

➤ See page 55 for application guidelines.

Four-circuit components combine to form an 8-wire, 4-circuit, power system.

➤ See page 56 for application guidelines.

Hardwire components are also available to allow field hardwiring of power within the power/data drawer where required by local codes.

➤ See page 59 for application quidelines.

**Power Area** 

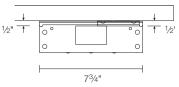

Α1

Finishes & Materials

#### Product Inforn

# Details

**Power/data drawer** is a powdercoated metal tray that mounts to the underside of a worksurface using two bent sheet metal drawer slides.

1/2" gap between the worksurface and the front and back edges of the drawer allows cords to exit. Cut-outs in the sides allow cables to pass to adjacent drawers.

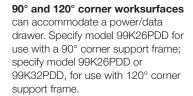

See next page for knock-out and cut-out details.

Holes centered in the floor of the power/data drawer are provided to attach Perks laptop/equipment lock (model 99KLTCK).

#### Planning Factors

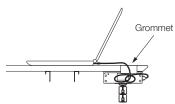

Power/data drawers are for use in open plan and freestanding applications. Recommended for use with Priority, Definition, Fluent, and Footprint. They are designed to work with 24", 30" and 36"W worksurfaces in single or back-to-back configurations.

Specify drawer size based on the width of the surface to which it will attach. Specify the drawer to be 10" shorter than the worksurface width to allow for it to mount inboard of the surface support. For example, specify a 62"W drawer for a 72"W worksurface. If using a surface with storage, base your calculation on the unsupported surface dimension to determine drawer size.

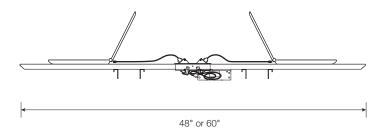

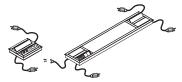

**Power/data drawers** are not intended for use against a wall or in conjunction with Systems panels.

In single worksurface applications, the power/data drawer should be inset 1" from the back of the worksurface.

**Factory-installed grommets** in worksurfaces are located so excess cabling will fall directly into the drawer.

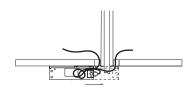

#### On 48" and 60"D worksurfaces

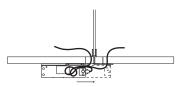

(depicted above), power/data drawer can be located so that when the drawer is extended, it is located on the centerline of the surfaces. Both the 10" rectangular power/data center (KCU0810ELPDC) and the 40" rectangular power/data center (KCU0840ELPDC) will work in conjunction with the power/data drawer in this application.

Note: Not applicable for all surface widths due to interference with

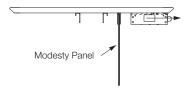

support legs.

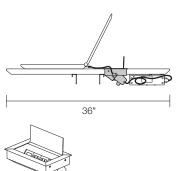

Depending on user electrical needs, one drawer can be shared in back-to-back configurations. Some users may require an individual drawer.

When using wire manager worksurfaces in back-to-back configurations, the power/data drawer can be shared between the users depending on user electrical needs. It should align with the wire manager. The drawer can extend forward to store the excess cabling under the wire manager.

Modesty panel must be located behind the power/data drawer to allow the drawer to extend forward toward the approach side of the worksurface for cable access.

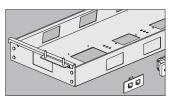

**Power/data center** (99KPDCAM) may be mounted (recessed) on 36"D worksurfaces with a power/data drawer.

Use of a power/data center on a 24" or 30"D surface in conjunction with single power/data drawer is not possible due to clearance.

Note: Use two smaller power/data drawers on a single worksurface to allow power/data center, clampmounted accessories, or throughgrommet accessories to extend below the surface between the power/data drawers.

#### Knock-Out and Cut-Out Locations

**Knock-outs** in the front and back of the drawer are compatible with industry-standard data faceplates, such as Tyco/Amp, Panduit, ECA and Hubbell. Individual knockouts are 13%" x 2<sup>11</sup>/16". Data and telecommunication modules are the responsibility of the user. Knock-outs are located 6" on center. Distance between knockouts is 31/4".

Pre-punched cut-outs are located in the floor of the drawer and are sized similarly to knock-outs as described above. Use these cut-outs for hardwire applications. Receptacles placed in the drawer bottom cut-outs must be installed facing the floor.

Surface Width	Drawer Width	Model Number	Front & Back Knock-Outs	Small Bottom Cut-Outs	Flexchain Cut-Outs
36"	26"	99K26PDD	3	2	1
42"	32"	99K32PDD	5	2	3
48"	38"	99K38PDD	5	2	3
54"	44"	99K44PDD	7	4	3
60"	50"	99K50PDD	7	4	3
66"	56"	99K56PDD	9	6	3
72"	62"	99K62PDD	9	6	3
78"	68"	99K68PDD	11	8	3
84"	74"	99K74PDD	11	8	3
90"	80"	99K80PDD	13	10	3
96"	86"	99K86PDD	13	10	3

#### **Details**

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.

#### The following components comprise the single-circuit system:

- Power in-feed
- Duplex receptacles with an attached 12" modular feed
- 12", 24", 48", 74", 96" and 120" iumper cables

**Power in-feed** is a 10' cord with a "smart box" that monitors the number of receptacles connected. The system will automatically shut off if more than eight receptacles are plugged into the power in-feed. One end of the cord features a three-prong plug that plugs into a standard 110 volt, 15 amp wall or floor outlet.

For ease in installation, jumper cables feature a squeeze-latch connector and will only plug in one

**Duplex receptacles** snap into the power/data drawer. Receptacles feature a 12" modular feed with a double-out interface. Power is brought to the receptacle by a power in-feed or jumper cable. Power is passed to adjacent components by a jumper cable, forming a daisychain.

#### **Planning Factors**

When planning jumper cable lengths to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

For jumping between receptacles inside a power/data drawer. 12" jumpers are recommended for drawers that are 50"W or smaller; 24" jumpers are for 56"W and wider drawers.

In 120° applications, 24" jumper cables can be used to jump from one power/data drawer to another.

Jumpers must be secured every 24" when spanning under the worksurfaces.

This system should not be plugged into a GFCI outlet receptacle. The single-circuit system contains an overload breaker, and the sensing circuit in the "smart box" can affect the sensitivity of a GFCI power feed, causing the GFCI duplex receptacle to trip.

#### **Related Products**

Single-circuit mini-adapt power module features an 18" modular feed with a double-over interface. The unit contains two receptacles for power access at the worksurface. A hand-tightened clamp on the back of the unit allows flexibility for positioning it at the back of the worksurface.

12" and 24" jumper cables

inside the power/data drawer.

connect duplex receptacles

**Duplex receptacle** 

#### Power/Data Drawers:

Power/data drawers accept singlecircuit or four-circuit electrical components. Components are specific to either single or multicircuit; they cannot be used interchangeably. ➤See page 60.

#### Approval/Compliance:

All Perks single-circuit components are U.L. 962 Listed and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Note: Any field modification of the electrical components voids the UL listina.

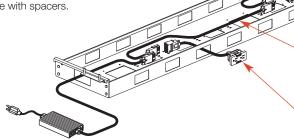

#### Recommended Receptacles:

Drawer Model 99K**PDD	Recommended No. of Receptacles

56	8*
62	8*
68	8*
74	8*
80	8*
86	8*

\*Limited by circuit availability.

48" jumper cables can be used to connect one power/data drawer to another. They can span over one 15"W pedestal with spacers.

Power in-feed sits on the bottom of a power/data drawer.

Power/Data Systems

#### **Details**

#### The following components combine to form an 8-wire, four-circuit system:

- Hardwire power in-feeds (two options) or ceiling power entry
- Power distribution assemblies
- Duplex receptacles
- Jumper cables

For ease in installation, the connectors will only plug in one way.

#### There are three ways to bring power to the system:

- 10' floor/wall power in-feed;
- Modular wall starter and modular 10' power in-feed; or
- 12' ceiling power in-feed

IMPORTANT: Power in-feeds entering the power/data drawer from the floor or wall must be secured/ protected by a flexchain, expandable cable manager, vertical cable manager, or secured to the legs.

Floor/wall power in-feed features a 10' liquid tight conduit with a pigtail on one end that must be wired by a licensed electrician to a wall or floormounted junction box. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

#### Modular wall power in-feed

features a 10' modular conduit with a squeeze-latch connector on each end. One end must connect to modular wall starter, specified separately, the other end connects to a power distribution assembly. Modular wall starter must be wired to building power by licensed electrician. Note: This modular power in-feed option allows you to unplug the cable from the wall and store away when not in use.

Ceiling power in-feed features a 12' flexible, galvanized metal conduit with a pigtail on one end that must be wired by a licensed electrician to a junction box in the ceiling. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

Power/data flexible ceiling pole is available to conceal ceiling power infeed and other data cables. Pole is a flexible, metal conduit. Outer diameter of pole is 21/8"; inner diameter is 2".

Ceiling power pole can be field installed on Priority center-mount shelf on stanchions. Power can be routed between tiles to the bottom of the worksurface.

Power/data drawers accept singlecircuit or four-circuit electrical components. Components are specific to either single or multicircuit; they cannot be used interchangeably.

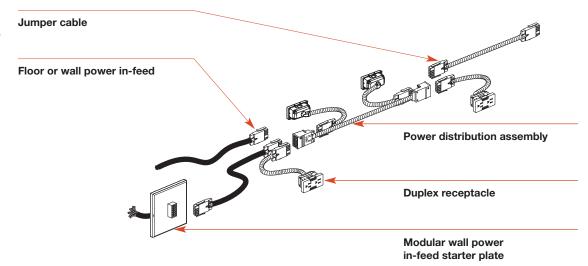

➤See page 60.

#### Approval/Compliance:

All Perks four-circuit components are U.L. 1286 Listed and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Note: Any field modification of the electrical components voids the UL listina.

Finishes & Materials

continued

**Trim plates** can be specified for field installation to conceal the intersection of the flexible ceiling pole at the ceiling and worksurface.

#### Power distribution assembly

supplies power for four duplex receptacles within a power/data drawer. Power distribution assemblies are 36" long.

**Duplex receptacles** feature a 12" flexible, metal conduit and a single squeeze-latch connector to attach it to the power distribution assembly.

Receptacles models are numbered 1, 2, 3, 4, or 5 to correspond to the circuit to which they will provide access.

**Jumper cables** feature a squeezelatch connector on each end and are available in 24", 36", 48", 74", 96" and 120" widths. Jumpers are encased in a flexible, galvanized metal conduit.

#### Use 24" and 36" jumper cables

inside the power/data drawer to connect power distribution assemblies and duplex receptacles.

#### When planning jumper cable

lengths to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

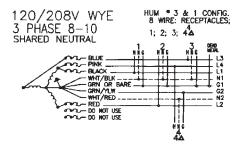

**Use 48" jumper cables** to connect a two power/data drawers on adjacent surfaces. 48" jumpers may also be used to span over one Priority 15"W pedestal with spacers.

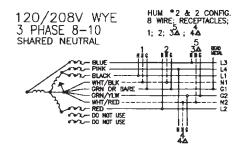

**78"**, **96"**, **and 120" jumpers** are for use when spanning over Priority storage with spacers.

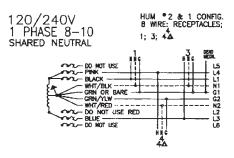

Jumpers must be secured every 24" when spanning under the worksurfaces.

#### Wiring Schematics:

The 8-wire, multi-circuit configuration provides up to four circuits. Ideally a 4-wire, WYE, 208 volt service provides the best utilization.

#### Planning & Installation:

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Hardware necessary for installation is shipped with all components.

## Four-Circuit (8-Wire) Power System

Product Information

Features ►See page 52
Finishes & Materials A1

continued

#### Planning Factors

**Two wiring configurations** are possible—3 and 1 or 2 and 2— utilizing the same components.

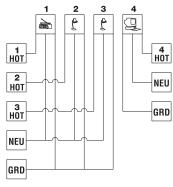

➤ See wiring configurations at right.

**Duplex receptacles** used for both types of wiring configurations are the same. This simplifies specifications and allows a faster understanding of the system.

- See page 55 for receptacle recommendations for single-circuit applications.
- See page 56 for receptacle recommendations for four-circuit applications.

A maximum of 13 duplex receptacles can be accommodated per circuit.

#### 3 and 1 (8-wire):

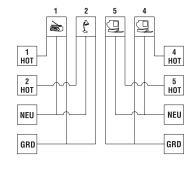

- Three utility circuits share a neutral and common ground.
- One circuit with a DEDICATED hot, neutral and ground.
- Utilize receptacles #1, 2, 3 for utility and #4 for the DEDICATED ground circuit.

Circuits 1, 2, and 3 can be used for general electrical needs. Customarily, one or more of the circuits is reserved for lighting or other everyday uses, which allows control by central or master switching.

Circuit 4 consists of three separate conductors (hot, neutral, and ground) and meets the BIFMA/ANSI definition for a dedicated circuit.

#### 2 and 2 (8-wire):

- Two DESIGNATED utility circuits and two DESIGNATED computer circuits.
- Utilize receptacles #1 and #2 for the designated utility circuits and receptacles #4 and #5 for the designated computer circuits.

  Note: Receptacle #3 cannot be used in the 2 and 2 configuration. If receptacle #3 is used, possible cross feed or interference from utility circuits one and two can be introduced to computer circuits.

Circuits 1 and 2 provide a pair of designated circuits for general electrical needs, as described for the 3 & 1.

Circuits 4 and 5 provide a pair of designated circuits for computer applications.

#### **Related Products**

➤ See page 53 for power/data drawer details.

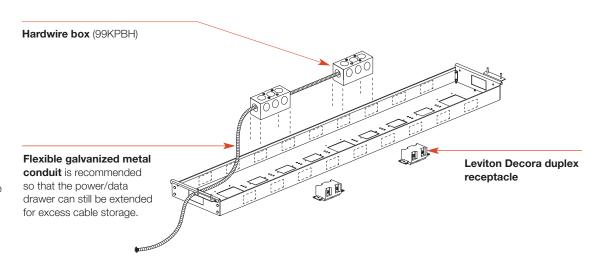

Finishes & Materials

ΑI

#### City of Chicago:

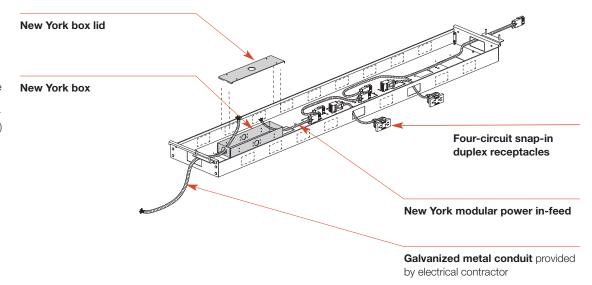

The City of Chicago requires that an electrician hardwire the electrical components to the furniture. The electrician can install hardwire boxes into the bottom of the power/data drawer utilizing the pre-punched rectangular cut-outs. Holes for attaching the duplex to the hardwire box are also provided.

Hardwired receptacles must be placed in the drawer bottom knockouts and be installed facing the floor.

#### City of New York:

The City of New York requires that an electrician to make the connection from the floor entry to the modular electrical system. The electrician can wire the floor/wall power in-feed hardwire boxes into the bottom of the power/data drawer using the prepunched rectangular cut-outs. Power entry for NYC (model 99KP4FPFNYC) includes a modular floor/wall power in-feed, hardwire box and lid, 2' galvanized metal conduit to encase the power in-feed (not shown), and cover plate.

#### Planning & Installation:

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Hardware necessary for installation is shipped with all components.

Hardwire components are also available to allow field hardwiring of power within the power/data drawer where required by local codes.

#### Samples:

Samples of Kimball Office materials are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur between samples and finished products. Kimball Office carefully selects all materials used in every product, ensuring a commercially acceptable color and finish.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

## **Program Overview**

Wood Finishes	➤See page A3
Paints & Plastic	A6
Fabrics	A9
COM	A12

#### **Fabric Collection:**

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The fabric collection will provide options for the discerning client for many years to come.

#### **Wood Collection:**

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

#### **Discontinuation Policy:**

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

#### Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Special Wood Finishes

GSA Non-Contract

Wood Finishes	➤See page A3
Paints & Plastic	A6
Fabrics	A9
COM	A12

Kimball Office offers the following options for special wood finishes:

- Standard finish color on alternate wood species
- Previously developed special finish
- Custom finish

Standard finish colors available on an alternate wood species include:

- Amber on Maple
- Amber on Walnut
- Mocha on Walnut

These finishes can be specified without going through the finish approval process described at right.

Previously developed special finishes can be selected from an extensive library developed by Kimball Office. Samples of previously developed special finishes are available from Customer Service upon request.

Custom finishes can be developed to meet specific needs, if an acceptable match is not available in our library.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a finish color.

#### Applicability:

Applicability of special finish colors depends on the wood species to which they are applied. The matrix below shows the types of woods used for each series.

	Cherry	Maple	Walnut	Sapele
Price Group	1	1	1	2

Transcend	•	•	•	•
Villa Tables	•	•	•	•

• = standard wood species

Note: Special finishes are not available on Zebrawood, Canyon Oak, Monterey Oak, or Tuscan Walnut.

#### **Upcharges:**

A one-time fee of \$300 (net) will be billed for the development of each new custom finish. This fee covers all Kimball Office product lines on which the finish may be used.

A 10% upcharge per line item (model number) will be applied for a standard finish on an alternative wood species, a previously developed special finish, or a custom finish. This upcharge is calculated on the base price, before other option upcharges are added.

For upholstered products, the upcharge is calculated on the Grade 1 upholstery price then added to the price for the selected fabric grade, to arrive at the list price.

## Custom Finish Approval Process:

- ① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the \$300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.
- ② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. If not, a custom finish will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.
- ③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

Note: The one-time fee of \$300 will not be charged unless a custom match finish is required.

#### How to Specify

① Model:

Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② Finish type:

For the "Finish type" step, insert a special code (in place of STD):

**ZCHY1** = Special cherry finish

**ZMAP1** = Special maple finish

**ZWAL1** = Special walnut finish **ZSAP1** = Special sapele finish

Note: Choose the special finish code based on the standard wood species used in the case-goods line (see matrix at left).

③ Finish designator:

For the "Finish designator" step, insert the designator below or the one provided to you by Customer Service:

**MA00174KOG** = Amber on Maple

**WA02905KOG** = Amber on Walnut

**WA02905KOG** = Mocha on Walnut

Page A4 Finishes & Materials

#### Wood

#### Characteristics, Care, and Maintenance Tips

Kimball Office's experience in wood finishing extends from past generations of craftsmen to present day state-of-the-art technology.

Our Pura® finish is a proprietary, water-based, ultraviolet (UV) wood finish that has virtually no volatile organic compounds (VOCs). It uses less energy than our conventional finishing process and meets or exceeds BIFMA Furniture Emission Standards (FES) and U.S. Green Building Council LEED requirements for indoor air quality. Pura is exceptionally clear and durable and allows the beauty of our wood to shine through. The durability, depth, clarity, and beauty of Pura meets the high expectations customers have of Kimball Office finishes.

Finish fill and sheen level for the top surfaces is appropriate for the design and wood species. If different specifications are required, contact Customer Service.

See the individual chapters for fill and sheen information by line.

All wood products are very susceptible to darkening from age and exposure to UV rays (sunlight and other sources), especially cherry and maple. Although a special UV inhibitor is added to finishes, care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change of the wood.

Fine scratches from everyday use may be more visible on furniture with dark finishes. Darker finishes absorb more light, while fine scratches reflect the light. Therefore, scratches can be more emphasized due to this contrast. The use of a desk pad is recommended to keep scratching to a minimum.

The beauty of wood is that, as a natural product, it will have differences in grain characteristics, color, and other features among wood species. The characteristics of our top grade veneers are appreciated and welcomed; it's the differences in characteristics that offer each office a unique look.

Maple veneers are plain sliced and slip matched. Brighton Maple is a clear finish for those who appreciate the inherent beauty of wood. Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

Walnut veneers are plain sliced, and applied book and center matched.

Cherry veneers are plain sliced and slip matched. Grain characteristics of cherry veneer such as gum streaks and gum pockets occur naturally and add to the authentic look and feel of natural veneer. These are inherent to this veneer and should not be considered defects.

Sapele veneers are quarter sliced and slip matched.

Canyon Oak, Monterey Oak, Tuscan Walnut, and Zebrawood are quartered (straight) grain finishes.

Specification of particular cuts, characteristics, or wood species can be accommodated. For example, a customer may ask for a limited amount of cathedrals or very limited variation in color from one veneer flitch to the next. Kimball Office systems products are able to satisfy those expectations, as long as we are notified prior to order placement. Depending on the request, the higher grade veneer may require an upcharge. Orders would also need to be handled through our custom quote process.

The wood species on seating may vary from the wood species on the casegood or system. Different wood species offer unique texture and grain which provide more variation in finish

color; however seating finishes are

compatible with casegoods and

systems finishes.

Wood Finishes	➤See page A3
Paints & Plastic	A6
Fabrics	A9
COM	A12

## To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth following direction of the grain.
- Dry with a separate cloth if needed.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.

#### Metallic:

10% upcharge applies for price group M metallic finishes.

IMPORTANT: Due to the reflective qualities of metallic paints, variations in color may occur.

#### CSP:

➤ See page A7 for customer-specified paint.

## **Customer-Specified Paint**

GSA Non-Contract

Wood Finishes	➤See page A3
Paints & Plastic	A6
Fabrics	A9
COM	A12

Customer-specified paint (CSP) is available on select products.

See page A6.

#### Pricing:

A one-time fee of \$300 (net) will be billed for the development of each new custom (customer-specified) paint. This fee covers all Kimball Office product lines on which the paint may be used. Models receiving a custom paint will also be assessed an upcharge.

# A 10% upcharge per line item (model) for customer-specified non-metallic paint applies. Upcharge is calculated on the base price, before other option upcharges are added.

A 20% upcharge per line item (model) for customer-specified metallic paint applies. Upcharge is calculated on the base price, before other option upcharges are added.

#### The process:

- ① Send desired paint sample (no smaller than 3" x 5") to Customer Service along with a complete list of the products to which the custom paint is to be applied. **Include dealer name, contact, and project reference.**
- ② Custom paints will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.
- ③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a paint color.

#### How to Specify:

① Model:

Build the complete model specification (excluding finish type and finish designator) by following the "How to Specify" on the appropriate pricing page for the product that is to receive the custom paint.

② Finish type:

For the "Finish type" step, insert a special paint code (in place of STD):

**ZPNT1** = Special non-metallic paint

**ZPNTM1** = Special metallic paint

③ Finish designator:

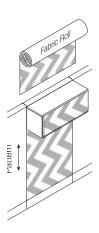

For the "Finish designator" step, insert the designator provided to you by Customer Service.

Page A7 Finishes & Materials

## **Fabric Application**

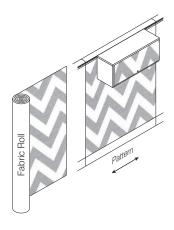

Wood Finishes	➤See page A3
Paints & Plastic	A6
Panel Fabrics	A9
COM	A12

#### **Standard Application:**

Directional fabrics are "cut up the roll" for standard application unless specified differently.

#### **Railroad Application:**

All fabrics will be applied in railroad (horizontal) fashion to:

- Xsite tiles
- Xsede tiles
- Priority tiles
- Stow wallpanels
- Tackboards greater than 48"W when using a seating fabric or greater than 60"W when using a panel fabric

When viewing swatch cards or memo samples, turn 90° to get an accurate indication of how the fabric will appear on when railroaded.

Railroad application of Kimball Office panel fabrics and COM for all products that are not listed above or do not have railroading listed as an option in the price list requires a custom quote.

▶Please contact *By Design*.

#### **Alliance Fabrics:**

Kimball Office has formed partnerships with top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Lead times for alliance fabrics are based on supplier availability. Preplanning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply. Contact Customer Service for availability before finalizing orders.

The information provided in this section is the most current information available at the time this price list was printed.

Application of Alliance Program upholstery will be as depicted on the swatch card unless otherwise instructed on the order.

For memo samples of Alliance fabrics, contact our alliance partners directly.

## Cleaning Codes:

#### Cleaning Code D

Dry clean only.

#### **Cleaning Code S**

- Use only mild, pure water-free cleaning solvents.
- Cleaning by a professional furniture service is recommended.

#### Cleaning Code W

• Use water-based cleaning agents or foam.

#### Cleaning Code WS

- Use water-based cleaning agents or foam. Mild water-free solvents may also be used.
- Cleaning by a professional furniture service is recommended.

#### **Directional Fabrics:**

Fabric alignment for directional fabrics may vary slightly from panel to panel or tile to tile.

Page A11 Finishes & Materials

## **Customer's Own Material (COM)**

GSA Non-Contract Paints & Plastic Fabrics

## Wood Finishes➤See page A3Paints & PlasticA6FabricsA9

#### **COM Policy:**

While Kimball Office inspects fabrics for mill imperfections, some are difficult to recognize. Kimball Office is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring, appearance, or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Customers are responsible for ordering COM fabrics and expediting delivery of the material to Kimball Office.

IMPORTANT: Kimball Office reserves the right to decline a fabric that may not be suitable for application to product.

#### **COM Application Testing:**

Application testing on systems product for non-preapproved fabrics is required.

Contact your Customer Service Team for the appropriate forms to initiate application testing.

The application test will render your fabric either:

- Approved
- Not recommended
- Restricted

A "not recommended" result is usually due to questionable construction of the material or pattern that is difficult to align. You will be required to sign a waiver to use any "not recommended" COM.

#### **U.L. Listing/Flammability:**

COM must be U.L. listed on Cetra, Xsite, and Interworks EQ panels, and Xsede and Priority tiles before Kimball Office accepts and enters an order which will have COM fabrics. All COM testing and processing costs are the responsibility of the customer. A minimum of 2 yards of production run yardage is required for U.L. testing and flammability testing. Approval of a COM fabric may result in extended lead times. For cost estimates, yardage requirements and project lead times, consult your Customer Service Team.

#### Yardage/Measurements

Directional and non-directional yardage requirements have been calculated based on 66"W panel fabrics for Tiles, Panels, Overheads, Highback Organizers, and Tackboards. Directional and non-directional yardage requirements have also been calculated based on 54"W seating fabric for Overheads, Highback Organizers, and Tackboards.

If your fabric is less than 66"W, some size restrictions may apply.

COM yardage listed in the Resource section of the price list reflects the amount of fabric required to upholster one panel. Additional yardage may be required if patterns require matching.

#### **Shipment of COM**

After the fabric has passed the approval process described, Kimball Office will enter the product order and send an acknowledgement of the tentative ship date. A notification will be sent giving the date the COM must be received. If it is not received by the specified date, your ship date will be reassigned.

#### Where to ship COM:

Kimball Office, Jasper COM Department—Kimball Office Dock 20 or 21 1037 East 15th Street Jasper, IN 47549

Applies to:

- Wall-mount tackboards
- Mobile screens

#### **Production of Order:**

When COM production yardage is received, COM is cut for the order and inspected for flaws. If flaws are found, you will be notified of the additional fabric required.

A return tag (e.g. COD shipment, UPS call tag) is required from the specifier within 45 days of the acknowledged ship date or all excess COM yardage will be discarded.

#### **Preapproved COM:**

Contact your Customer Service

Team to obtain information on preapproved COMs.

#### **Yardage Requirements:**

Directional and non-directional yardage requirements have been calculated based on 66"W panel fabrics and 54" seating fabrics for Mobile screens and tackboards.

Model	66"W Dir	54"W Dir	66"W Non	
Mobile Screens				
99K2468MSSF	1.9	1.9	1.5

0.9

0.9

0.9

99K4820TBW

Additional yardage may be required if patterns require matching.

#### **Checklist:**

When ordering COM for Kimball Office products, please make sure you have done the following:

- Supplied vendor name, fabric name, color name and number.
- Supplied arrival date of COM to Kimball Office.
- Received application testing approval before sending purchase order (or signed waiver if not approved for application).
- Received U.L. listing before sending purchase order.
