The customer has the freedom of choice, which creates a custom, scalable price point.

As one of our most popular casegoods platforms, Priority supports every type of work environment, while giving you the choice to select only the specific features you need. Priority—from its most basic form to its most option enhanced models—truly offers functionality.

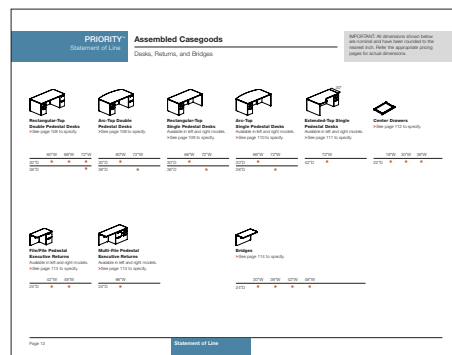

How to Use this Price List

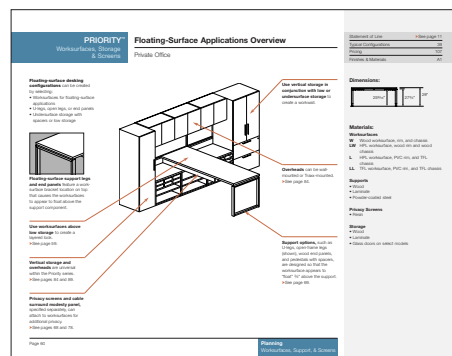

We suggest that you familiarize yourself with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.

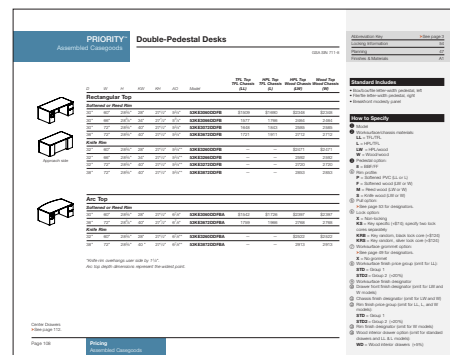

Refer to the General Information section for Terms and Conditions and Warranty information.

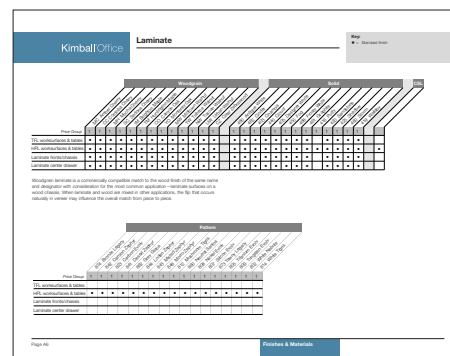

Statement of Line provides a snapshot of the entire product line. We've included an illustration, a table showing available sizes, and page cross references to the applicable pricing and how to specify pages.

Planning pages offer a quick look at the distinguishing features of the product line, as well as provide detailed information about the product, connections that can be made with other models, planning factors, and applications guidelines.

Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.
➔ See page 3 for detailed information about how to specify Kimball Office products.

Look in the Finishes and Materials appendix to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product for the entire Kimball Office product offering.

Statement of Line	➔ See page 11
Planning	47
Pricing	107
Finishes & Materials	A1

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Standard product modifications are available on select products.

➔ See the Product Modifications Price List at www.kimballoffice.com

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

Only Underwriters' Laboratory (U.L.) or Canadian Standards Association (C.S.A.) listed electrical components are used in electrical devices and are so labeled.

Priority floating-surface products (excluding electric height-adjustable tables) are U.L. 962 listed. Electric height-adjustable tables are U.L. recognized components.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

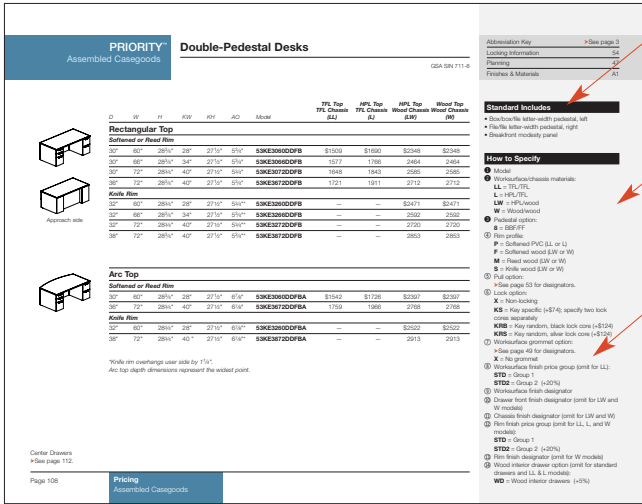

How to Specify Our Products

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ①, ②, or ③) make up the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

“Standard Includes”
lists what is included as part
of the base model.

Follow these steps to build a complete model number.

Selections that will incur an upcharge or decrease to the base price are noted within the “How to Specify” steps.

Statement of Line	➤ See page 11
Planning	47
Pricing	107
Finishes & Materials	A1

Pricing Table Abbreviations:

 $D = \text{Depth}$

W = Width

H = Height

T = Thickness

AO = Approach Overhang

ED = End Depth

KW = Kneespace Width

KH = Kneespace Height

WC = Worksurface Clearance

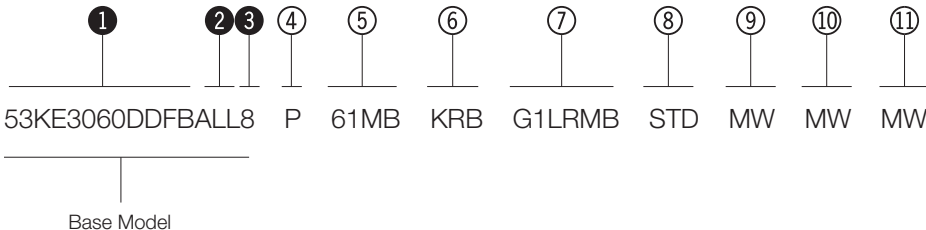

Electronic Catalog and Specification Software:

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

Sample Specification:

The example below shows a complete model number for an **arc-top double pedestal desk**.

➤ See page 108 for the corresponding pricing table and How to Specify steps.

Note: Steps 10 and 11 were not applicable for the laminate with wood rim model and were omitted for the specification as indicated in the How to Specify steps.

Terms and Conditions

Ordering Procedures:

Purchase orders must be received with complete information, which includes the following:

- Complete/valid model numbers
- All textiles, finish, and material specifications for each line item.
- "Ship to" address and contact
- Special shipping instructions (tagging, requested dates, etc.)
- Billing address
- Net prices

Submit orders electronically via EDI or OrderXchange.

To order literature or check order status on-line, please visit us at www.kimballoffice.com.

The customer bears sole responsibility for order correctness. Orders are accepted only by issuance of Kimball Office's formal order confirmation and are subject to the terms and conditions set forth herein, notwithstanding any variance in terms and conditions set forth on buyer's order forms.

The order confirmation is the final agreement between the customer and Kimball Office and supersedes all prior oral, written or electronically transmitted statements regarding the order. Kimball Office will attempt to meet all requested ship or delivery dates. If no specific date is requested, we will assign the best possible ship date available.

Changes and Cancellations:

A confirmed order may not be changed or cancelled, in whole or in part, without prior written consent of Kimball Office. Expenses incurred because of the changes shall be charged to the Purchaser. In the event of cancellations, Purchaser will be liable for reasonable cancellation charges established by Kimball Office. Changes may affect delivery dates.

No changes or cancellations will be accepted after order entry for non-standard lead time products including:

- Kwik Office offerings
- Engineer-to-Order (modified or non-standard products)
- Alliance program upholstery
- Customer's Own Material (COM)
- Customer's Own Leather (COL)
- Customer Specified Laminate (CSL)
- Customer Specified Paint (CSP)
- Mock Ups
- Service Parts/Replacements

Modified Product:

Our manufacturing flexibility allows us to accommodate requests for non-cataloged product. We are happy to discuss your unique product requirements and determine feasibility and pricing.

►Contact **By Design** for assistance at 800.482.1616 extension 6002.

Finishes and Materials:

Wood Finish Color Matching

Each piece of natural veneer offers unique texture and grain. Minor variations in finish color and value may occur due to the natural characteristics of wood. Kimball Office carefully selects all materials used in every product ensuring a commercially acceptable color and finish. Factors such as aging and exposure to light alter finishes.

Fabric Color Matching

Kimball Office will always ship a satisfactory commercial match on fabric. Because of industry dye-lot variation, colors may not match exactly.

Terms and Pricing:

Net 30 days. If the invoice amount is not paid in full within the terms of the invoice, the invoice may be subject to a monthly finance charge equal to the lesser of 1.5% or the highest amount permitted by law. List prices include freight charges; however, they do not include:

- Storage and insurance charges
 - Sales and other taxes
 - Local delivery, unloading, or installation
- These items will be invoiced as separate line items.

All prices herein are delivered list price, unless noted, effective August 24, 2015, and supersede all other published prices. Prices shown cover standard product only, additional charges will be applied for changes to standard product. Kimball Office reserves the right to change prices without prior notice. Prices herein are only for shipment within the continental United States or Canada.

Selling Information

Distribution of this price list does not in itself constitute an offer to sell. Orders can be received only from authorized Kimball Office customers. Kimball Office price lists and catalogs are not available to the general public.

Product Design:

Kimball Office reserves the right to make changes in design, specifications, and construction or discontinue products without prior notice.

Shipping/Freight:

Products are priced and will be delivered C.P.T. one contiguous U.S. destination, one Canadian destination or one port of exit, freight prepaid (Incoterms 2010). Title shall transfer with risk of loss.

Kimball Office reserves the right to select the most appropriate shipping terms.

Terms & Conditions

continued

Delivery:

Normal delivery hours are 8:00 a.m. to 5:00 p.m. Monday through Thursday and 8:00 a.m. to 3:00 p.m. on Friday. Any delivery arrangements made outside of normal delivery times are subject to additional charges.

► See at right.

Any charges incurred because of failure to receive a shipment or offload a shipment in a timely manner (maximum time allowed to offload trailer: 3 hours), will be billed to the sold-to customer.

Any charges as a result of rerouting a shipment while in transit will be billed to the sold-to customer.

Any order requiring **Special Delivery Service** will incur additional charges. All such requirements must be noted on the purchase order. These are services that are not included in the standard price of the product or require the usage of specialized carriers. These services include:

- Weekend delivery (after 3:00 p.m. Friday through Sunday evening)—minimum \$500 charge.
- Inside delivery—minimum \$50 charge.
Note: Must be approved and coordinated 10 days prior to shipment.
- Non-dock delivery—minimum \$50 charge.
- JIT delivery (specific day and/or time)—Orders under \$25,000 list will incur a \$125 charge.
- Rush delivery (1-3 days from ship date)—Contact Customer Service for charges.

Carrier Selection

Kimball Office reserves the right to select the most appropriate mode of shipment. Kimball Office relinquishes all responsibility for goods shipped upon a clean receipt from the carrier. Customer bears the risk of loss or damage during shipment.

Packaging

Kimball Office's standard method of shipping is to carton all items. Certain full truck load shipments may qualify for special consideration. Contact Kimball Office for guidelines. International shipments can be crated at the customer's request. The expense of crating will be the responsibility of the customer.

Palletizing

Kimball Office may elect to palletize key products on projects when it effectively reduces carton waste and improves stability within the shipment.

Loss, Damage, or Delay

Kimball Office shall not be liable for loss, damage, detention or delay resulting from causes beyond its reasonable control including but not limited to fire, strike, weather, wreck or delay in transportation. In the event of delay due to any such cause, the delivery date will be postponed by such length of time as may be reasonably necessary to compensate for the delay.

Storage

If the customer requests a change of ship date and the product is in production, Kimball Office reserves the right to transfer the product to storage at the customer's risk and expense. All requests to store product must be approved by Kimball Office Customer Service and may be subject to storage fees. Such transfer to storage will be deemed delivery to the customer for all purposes including insurance, liabilities, invoicing, and payment.

Returned Merchandise

Merchandise will only be accepted for return under the following conditions:

- ① The product is a "made to stock" item; and
- ② Return Goods Authorization (RGA) is given to you by your Customer Service Team.

All returns are subject to a 50% restocking fee. All freight charges for returned product are the responsibility of the customer. Unauthorized returns will not be accepted and will be returned freight collect. All merchandise being returned must be properly packed and protected in the original cartons. Upon receipt, all returned merchandise will be thoroughly inspected. Any discrepancies, such as additional damage, signs of usage, missing parts, etc., will result in an adjustment to the amount of credit issued.

Claim Process:

All products produced by Kimball Office are carefully inspected and properly cartoned prior to shipment. All shipments are delivered to the transportation company in good condition. If you receive a shipment that has damage, product shortages, or delivery has been delayed by the transportation carrier, **the following steps must be taken:**

- ① Before signing for the merchandise, make notation of all visible damage, shortages and/or time of truck arrival on the bill of lading.
- ② Contact Customer Service within 15 calendar days of delivery receipt to report issue. We will advise whether a freight claim will need to be filed based on mode of transportation.
- ③ If claim must be filed, carrier must be contacted within 15 calendar days of delivery. Retain all shipping cartons for inspection by the carrier agent.
- ④ A copy of the Carrier Disposition Letter must be sent to Customer Service to receive additional credit on concealed damage issues via Redistribution/ LTL carrier shipments.

For Concealed Damage, follow steps 2 through 4.

Finishes & Materials	A1

Asset Tag Locations:

Bar code labels have been placed on most Kimball Office products.

Products with pedestals or lateral files

Underside of top drawer near front edge in right pedestal (if no right pedestal, left pedestal).

Highback organizers and overhead cabinets

Back left of task light facade.

Bookcases

Underside of lowest shelf (not bottom panel) on the left front edge. If glass shelves, top panel in cornice area.

Vertical storage cabinets

Underside of top drawer near front edge. If no drawers, underside of lowest shelf on left front edge.

Bridges, corner units, worksurfaces, computer support furniture, P-, U-, and keyhole-shaped desks

Underside of the top surface (user's side) on the front edge.

Component modesty panels

Center top of the panel on the inside (kneespace area).

Tables

Underside of table top near the outside edge.

Product Warranty

Lifetime Assurance of Quality

Our Pledge:

Kimball Office stands behind the craftsmanship of our products. When brought to our attention, we will address warranty issues quickly and effectively.

Recommendations:

Facilities managers and users are urged to make periodic inspections to look for signs of structural fatigue, damage or potential failure that may occur as a result of daily handling and use. Inspections should include the structural joints, corner blocks, screws or fasteners, welds, and any other points of stress. If any problems are found, the product should be taken out of service and Kimball Office Customer Service should be contacted promptly at 800-482-1818.

Limited Product Warranty:

Kimball Office warrants that its products are free from defects in materials and workmanship given normal use and care for a lifetime of single-shift service. Normal use is defined as the equivalent of a single shift, 40-hour work week.

Exception: Ita and Campos seating models are warranted for three-shift (24/7) service. Wish seating, excluding Wish Classic, is warranted for three-shift (24/7) service and up to 400 lb. user weight.

Exception: Some products and parts have limited warranty periods.

➤ See lists at right.

At its option, Kimball Office will repair or replace with comparable product, free of charge to the customer, any product, part or component manufactured and/or sold by Kimball Office in North America after November 6, 2000, which fails under normal use as a result of such defect.

In the event that use of a product exceeds normal use as defined above, the warranty period for such product will be reduced to 12 years from date of manufacture, and the warranty for the product's

components that fall under different warranty limitations, as listed at right, will be reduced to one-third of the original warranty.

This warranty is made by Kimball Office to the original customer for as long as the original customer owns and uses the product.

This warranty is only valid if the products are given normal and proper use, and installed or used in accordance with Kimball Office installation and/or application guidelines, and installed by an authorized Kimball Office dealer or agent. Kimball Office assumes no responsibility for repairs to products sustaining damages resulting from user modification, attachments to a product, misuse, abuse, alteration, or negligent use of our products.

EXCEPT AS EXPRESSLY SET FORTH ABOVE, THERE ARE NO OTHER WARRANTIES EITHER EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. WE EXCLUDE AND WILL NOT PAY CONSEQUENTIAL, PUNITIVE, OR INCIDENTAL DAMAGES UNDER THIS WARRANTY.

All warranties run from date of manufacture.

Warranty Periods:

Warranty periods are limited for certain products and/or component parts as follows:

10-Year Warranty

- Seating mechanisms
- Veneers
- Laminate
- Pneumatic lifts (cylinder assembly)

5-Year Warranty

- High-wear parts (such as casters, glides, drawer slides, moving chair arms)
- Electrical/power products

- Inflatable lumbar supports
- Lighting
- Desk sets
- Monitor arms
- Keyboard kits
- Covering materials (such as foam, most textiles, 3D laminate, and decorative trim)
- Marker Boards

3-Year Warranty

- Wool felt
- Custom products
- Carnegie fabrics
- Ita mesh
- Campos mesh
- Wish mesh

Warranty Exclusions:

This warranty does not cover:

- The substitution of non-Kimball Office components for use in place of Kimball Office components
- Naturally occurring variations and differences in grain character and color between and within wood species
- Natural variations in marble and leather
- Damage caused by a freight carrier
- Normal wear and tear arising from product use
- Damage resulting from improper use or storage of the product
- C.O.M. (Customer's Own Material) or any other non-standard material specified by the customer, including attributes such as appearance, durability, quality, performance, colorfastness, etc.
- Alliance program fabrics
- Fabric, leather, and felt fading and wear, discoloration from contact with liquids or change in color or texture caused by application of finishes (flame proofing, stain resistance)
- Alterations to the product not expressly authorized by Kimball Office
- Products considered to be of consumable nature (such as bulbs, light ballast, and certain electronic products)

Statement of Line	➤ See page 11
Planning	47
Pricing	107
Finishes & Materials	A1

Process for Warranty Issues:

- ① A customer should contact his or her dealer, who will contact Customer Service at 800-482-1818. The purchase order or acknowledgement number, model number, and a detailed description of the warranty issue should be provided. **Serial numbers may be required** before the claim can be processed.
- ② Customer Service will determine and pre-approve all resolutions to the claim, such as replacement units, service parts, and labor charges related to repair or redelivery of damaged or defective product.
- ③ Upon approval, a Case Number and resolution will be assigned to an authorized dealer, and all parts and components necessary for repair/replace will be sent to the authorized dealer, which will carry out the resolution. The dealer should include the Case Number on all invoices for reimbursement once the warranty repair/replace has been completed. Kimball Office shall not be the responsible for any unauthorized expenses. Kimball Office will only accept dealer invoices submitted within 90 days of the final approval by Customer Service; invoices received after 90 days will not be approved for dealer credit or payment. All warranty information should be sent to:

Sustainability

Enhancing the Home We All Share

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to stake initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example.

Throughout our more than 40 years of documented environmental actions, we have been a responsible steward of resources and have acted as an agent of sustainable change in our industry.

Design for the Environment is our approach to product development to ensure the inherent sustainability of our offerings. By considering a full continuum of environmental factors, we have greatly improved the life cycle performance of our furniture.

Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

ANSI/BIFMA level™

We offer one of the most sustainable portfolios in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet or exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

Through this free online tool, you have 24/7 access to the environmental attributes of our products. EcoScorecard enables speed and accuracy in the calculation of environmental credits for LEED®, saving you time and ultimately, money.
➤ See how easy it is at kimballoffice.ecoscorecard.com.

LEED® Certification

Kimball Office offers furniture solutions which may contribute toward LEED® certification. The LEED Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:

- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:

- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:

- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

INDOOR AIR QUALITY Indoor Advantage | Furniture

Indoor Air Quality

One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS).

Statement of Line	➤ See page 11
Planning	47
Pricing	107
Finishes & Materials	A1

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

The mark of responsible forestry

FSC-Certified Wood

Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood.

➤ Contact **By Design** at 800.482.1616 for pricing and lead time information.

Asset Network for Education

Worldwide, Inc. (ANEW) is an effective way to responsibly disposition surplus furniture, fixtures and equipment. ANEW can repurpose your equipment to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

➤ Find more specific details regarding the environmental aspects of our product offerings at: www.kimballoffice.com

ANSI/BIFMA

Operating Load Capacities

Statement of Line	➤ See page 11
Planning	47
Pricing	107
Finishes & Materials	A1

The operating load capacities for various Kimball Office products shown in the table at right represent the BIFMA functional loads which are equivalent to loads that can be expected in normal use of the component.

All components meet or exceed the following ANSI/BIFMA Functional and Proof Loading requirement tests:

- X5.5 2014 Desk/Table Products Test
- X5.9 2012 Storage Units Test

Component	Operating Load Capacity (Functional Loads)	Example
Desk/table <45"W	200 lbs. over 12" diameter area, concentrated loading	
Desk/table 45"W–72"W	200 lbs. over 12" diameter area, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 72"W = 288 lbs.
Desk/table >72"W	Two 200 lb. loads over two 12" diameter areas, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 84"W = 324 lbs.
Pedestal drawer	.017 lb. per cubic inch of drawer interior filing space <i>Note: File drawers are to support hanging files only; they are not intended for bottom loading.</i>	24"D x 18"W x 12"H = 88 lbs.
Transaction counter, secondary surface <16"D, or shelf	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	12"D x 60"W = 147 lbs. t.w.
Adjustable keyboard support <36"W	66 lbs., distributive loading	
Writing shelf	25 lbs., distributive loading	
Extendible elements (drawer, shelves, etc.)	.017 lb. per cubic inch of drawer interior filing space, distributive loading	24"D x 15"W x 12"H = 73 lbs.
Center/pencil drawers	5 lbs., distributive loading	
Storage or bookcase top <38"H	200 lbs. concentrated loading .20 lb. per square inch of surface area, distributive loading	24"D x 36"W = 173 lbs.
Storage or bookcase top 38"H–60"H	.20 lb. per square inch of surface area, distributive loading	24"D x 36"W = 173 lbs.
Storage or bookcase top >60"H	.09 lb. per square inch of surface area, distributive loading	24"D x 36"W = 78 lbs.
Storage or bookcase bottom	.017 lb. per cubic inch above surface, distributive loading (not more than 18" in height)	24"D x 36"W x 18"H = 264 lbs.

Square inches should be calculated using this formula: Surface depth x surface width of available storage

Cubic inches should be calculated using this formula: Surface length x surface depth x height of available storage above the surface (limited to 18 inches above the surface)

Flush-Surface and Floating-Surface Applications

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Priority offers you two distinctive styles and aesthetics to select from when planning with Priority:

Flush-surface applications are the foundational elements of Priority. This style is reflected in assembled casegoods, as well as modular components, which feature a more transitional style with worksurfaces attaching directly to storage element. Flush-surface applications were previously categorized as “Classic” Priority.
Note: Illustration shows knife-rim worksurface.

Floating-surface applications are created with pedestals featuring spacers and open leg supports. The top will appear to be “floating” above undersurface storage and support. Floating-surface applications were previously categorized as “Progressive” Priority.
Note: Illustration shows knife-rim worksurface.

Similarities:

- Storage is available in the same heights, widths and depths.
- Overall storage depth, width, and height are the same in both flush-surface and floating-surface components.
- Softened- and reed-rim worksurfaces feature the rim on all four sides of the surface and do not overhang the storage.

Differences:

Knife-rim worksurfaces—

- Knife-rim worksurfaces for **flush-surface applications** have the mitred rim on the user edge only and it overhangs the storage by 1¼". Knife-rim surfaces on returns and bridges feature a reverse knife edge for a flush fit with the adjoining surface.
- Knife-rim worksurfaces for **floating-surface applications** have the mitred rim on all four sides of the surface; the edges align with the storage unit or support. Knife-rim surfaces join together without a coped rim.

Worksurfaces—

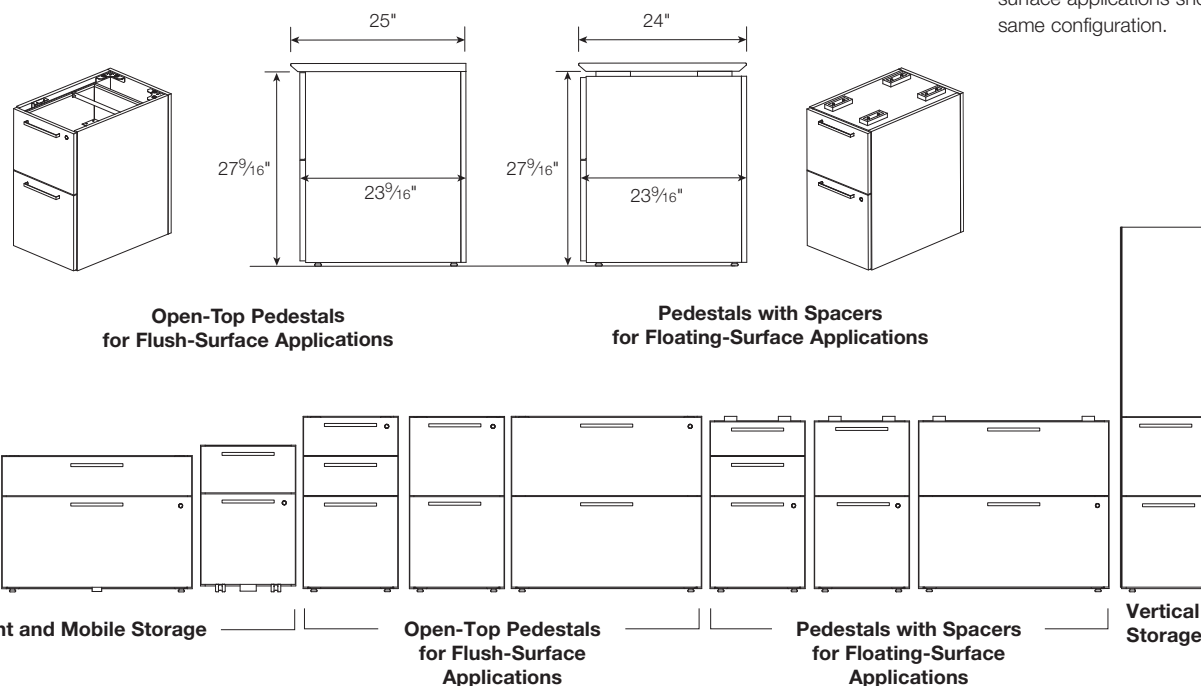

- Worksurfaces for **flush-surface applications** are designed for use with assembled casegoods and feature bracket options such as main, extension, and filler.
- Worksurfaces for **floating-surface applications** are sized to align with open-frame legs and U-legs.

Storage—

- Undersurface storage for **flush-surface applications** features unfinished, open tops and optional locking in the top drawer.
- **Floating-surface applications** utilize finished-top storage with ¾" spacers that mount to worksurfaces and undersurface support rails. These units feature optional locking in the bottom drawer.

Mixing Flush-Surface and Floating-Surface Components:

- As a general guideline, flush-surface undersurface storage units, modesty panels, and support panels should not be used with floating knife-rim worksurfaces.
- Floating worksurfaces are designed to align with open-frame legs or U-legs.
- Floating-surface pedestals can be used with worksurfaces for flush-surface applications.
- Mixing softened- or reed-rim worksurfaces will work in either flush-surface or floating-surface applications.
- Floating knife-rim worksurfaces cannot be mixed with assembled casegoods, nor with flush-surface bridges or return worksurfaces with knife rim.
- End panels for use in floating-surface applications and modesty panels and end supports for flush-surface applications should not be mixed in the same configuration.

Worksurface grommets are located 3 $\frac{3}{8}$ " from the side edge. Location relative to the approach or back edge is 13 $\frac{1}{2}$ " on arc worksurfaces (to top of arc), 7 $\frac{1}{2}$ " on all rectangular and extended desk worksurfaces, and 3 $\frac{3}{8}$ " for all other surface shapes.

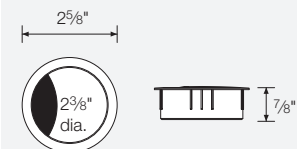

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Standard Includes/Available Finishes

G1 plastic grommet is a two-piece unit with snap-in lid. Lid cutout slides open to route cables or can be closed when not in use. Available finish:
MB Matte Black

G19 metal grommet is a two-piece unit with black brush access. Available powdercoat finishes:
405 Designer White
487 Brushed Nickel
490 Polished Chrome
501 Platinum Metallic
514 Carbon Metallic
544 Silver Pearl

How to Specify

- ① Insert the location *and* finish designator into model number sequence as indicated on the corresponding pricing page.

Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.

For example:

G1LMB = G1 grommet, left, matte black

G19R501 = G19 grommet, right, platinum metallic

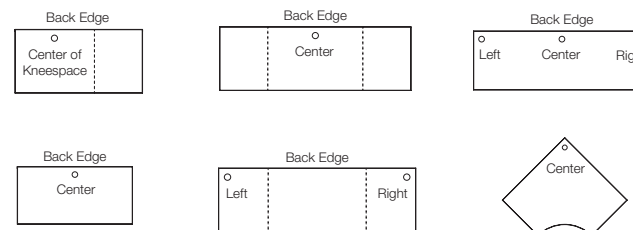

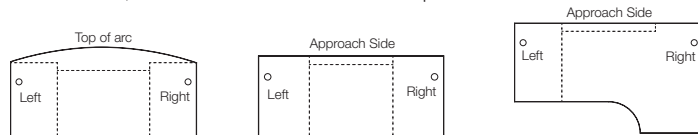

IMPORTANT: Only the grommet locations shown in the matrix with a designator and price are available. Note: P-shaped and U-shaped worksurfaces do not offer factory-installed grommet options.

24"/25"D rectangular	G19L +\$59	G19R +\$59	G19LR +\$118	G19C +\$59	G19A +\$177
Arc & rectangular desk worksurfaces	G19L +\$59	G19R +\$59	G19LR +\$118	—	—
Corner worksurfaces	—	—	—	G19C +\$59	—

Worksurface grommets are located 3 $\frac{3}{8}$ " from the side edge. Location relative to the approach or back edge is 13 $\frac{1}{2}$ " on arc worksurfaces (to top of arc), 7 $\frac{1}{2}$ " on all rectangular and extended desk worksurfaces, and 3 $\frac{3}{8}$ " for all other surface shapes.

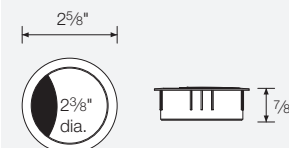

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Standard Includes/Available Finishes

G1 plastic grommet (99KG60) is a two-piece unit with snap-in lid. Lid cutout slides open to route cables or can be closed when not in use. Available finish:

MB Matte Black

G19 metal grommet is a two-piece unit with black brush access. Available powdercoat finishes:

405 Designer White
487 Brushed Nickel
490 Polished Chrome
501 Platinum Metallic
514 Carbon Metallic
544 Silver Pearl

How to Specify

- Insert the location *and* finish designator into model number sequence as indicated on the corresponding pricing page.

Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.

For example:

G1LMB = G1 grommet, left, matte black
G19R501 = G19 grommet, right, platinum metallic

IMPORTANT: Only the grommet locations shown in the matrix with a designator and price are available. Note: P-shaped and U-shaped worksurfaces do not offer factory-installed grommet options.

How to Specify

Specify pull option and finish together in one step. If pull finish designator is a number, insert an underscore between the pull designator and the finish designator. For finish designators that are letters, put the pull and finish together without a space or underscore.

Example:

89_514 = Studio pull, carbon metallic

Locking Information

GSA SIN 711-8

Locking is optional on all storage units. When locking is selected, locks can be specified as:

- Key random with a black lock core and hinged key (KRB);
- Key random with a silver (matte nickel) lock core and round-head key (KRS); or
- Key specific (KS)

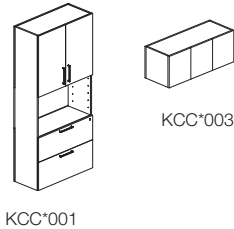

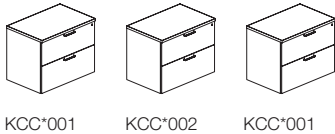

Black lock cores and hinged keys are identical to the ones used with other casegoods and systems products.

Silver lock cores and round keys are matte nickel. These lock cores and keys are identical to the ones used with Definition, Fluent and Hum. Minds at Work. series.

Key Random:

When key random option is selected, key numbers will be assigned arbitrarily at the factory with key numbers ranging from KCCB001 to KCCB300 (black) or KCCG001 to KCCG100 (silver).

Randomly numbered lock core(s) will ship standard along with your order for field installation.

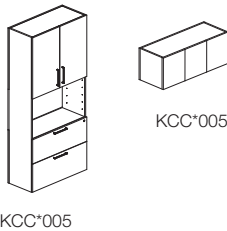

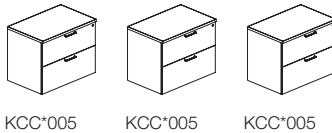

With random keying, different furniture units may or may not have the same key number. If you must have all locks keyed differently or all locks keyed the same, choose the key specific option.

Key Specific:

When key specific option is selected, the storage unit will be pre-drilled to accept a lock core; however, no lock cores will be shipped standard with the unit. If lock cores are standard on the unit, the price of the unit is reduced by the price of the lock core or cores.

You must specify lock core(s) separately for key specific option; specify any key number from KCCB001 to KCCB300 (black) or KCCG001 to KCCG100 (silver).

To key all the furniture units in a workstation or department alike, choose the key specific option and order the quantity of locks needed for your installation.

Installing Locks:

Standard key that ships with the lock core can be used for the initial installation of the lock core in the field.

Changing Locks:

IMPORTANT: A change key, specified separately, is required to remove lock cores in the field.

Change key model KCCB1CK allows removal of lock cores within these ranges:
KCCB001–KCCB300
KCCG001–KCCG100

Master Keys:

Master key model KC2GMK will unlock any lock within these key ranges:
KCCB001–KCCB300
KCCG001–KCCG100

Statement of Line	➤ See page 11

	22"	30"	17"	26⅜"	1½"	—	—
	22"	36"	17"	32⅜"	1½"	—	—

*Refer to the applicable pricing page for width (letter or legal) of the pedestal.

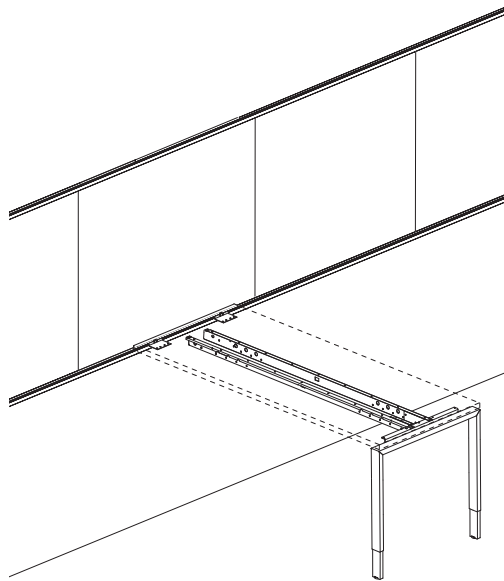

Filing Reference:

- Legal size paper is 8½" x 14".
- Letter size paper is 8½" x 11".
- EDP size paper is 8½" x 14⅞".

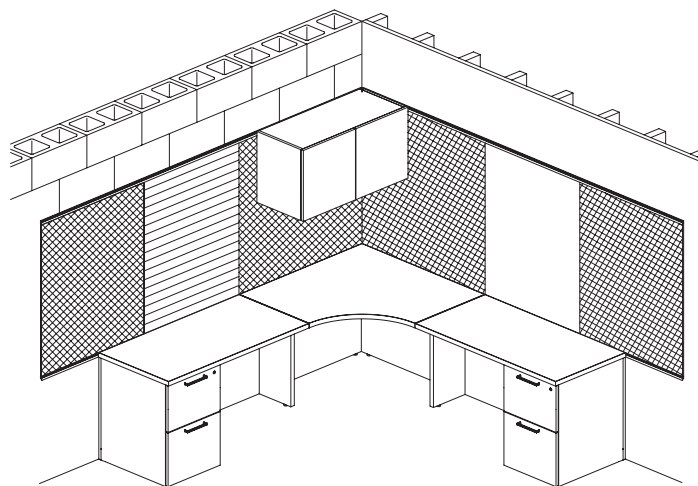

IMPORTANT: For all pedestals where legal front-to-back filing is standard, letter front-to-back filing is possible by specifying universal file bars separately.

➤ See the Perks Price List.

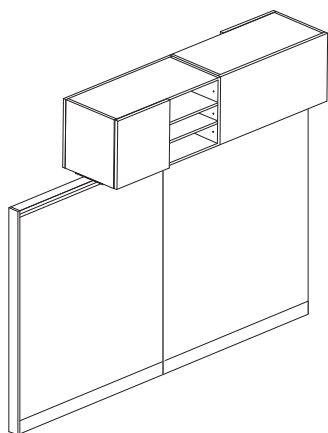

Integrating with Traxx® & Xsite® and Fixed Wall Applications

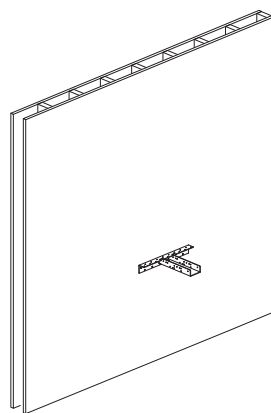

Floating-Surface, Wall-Mounted Traxx Application

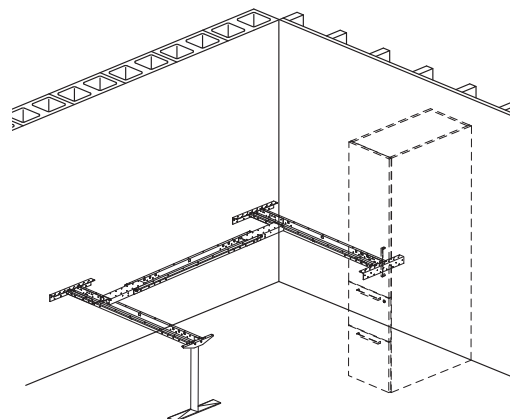

**Wall-Mounted Traxx
with Undersurface Storage and Workspaces
for Flush-Surface Applications**

**Xsite-Mounted Center-Mount
Overhead Cabinets**

Structural Wall-Mounted Application

**Structural Wall-Mounted Application
with Bridge Kit**

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Guidelines:

- Worksurfaces and overhead storage can also be attached to Traxx using standard Traxx brackets. Traxx should be installed at heights that correspond with Cetra or Xsite panels.
➤ See the Systems Price List.
- For 48"W and wider floating worksurfaces, undersurface support rails must be specified. When using U- or open-frame legs, undersurface support rails must be used regardless of workspace width.
- Additional support is required for 48"W or wider worksurfaces for flush-surface applications. If spanning 48"W or less, pedestals can be used for end support.
- All worksurfaces, excluding floating surfaces with knife rim on all four sides, can also be attached to Xsite Traxx.
➤ See the Xsite chapter in the Systems Price List.
- Center-mount overheads can also be mounted on top of Xsite panels using two Xsite transaction counter support brackets. Overheads must be the same length or longer than the frame it will be placed over. For example, a 48"W center-mount overhead can be mounted above a 30"W Xsite frame; however, a 30"W center-mount overhead cannot be mounted onto a 48"W Xsite frame. Not for use on Xsite stackable panels.
- Footprint center-mount overheads can be mounted on top of Priority stanchion U-legs.
➤ See the Systems Price List.
- Follow the standard overhead/panel guidelines in the Xsite Price List for further Xsite integration.
- Starter brackets can also be mounted directly to most interior walls, including steel or wood stud walls, masonry block, or solid masonry walls. **IMPORTANT:** It is the responsibility of the installer to ensure that the connection to the studs is adequate to support the workspace load.
- When using pedestal starter brackets in a fixed wall application, you can connect a bridge kit to create a U-unit configuration. Connect the undersurface rails to U-legs, open-frame legs, fixed T-legs, or any style of storage.

Assembled Casegoods Overview

Assembled casegoods fit an extensive range of design, application, space, and budget challenges.

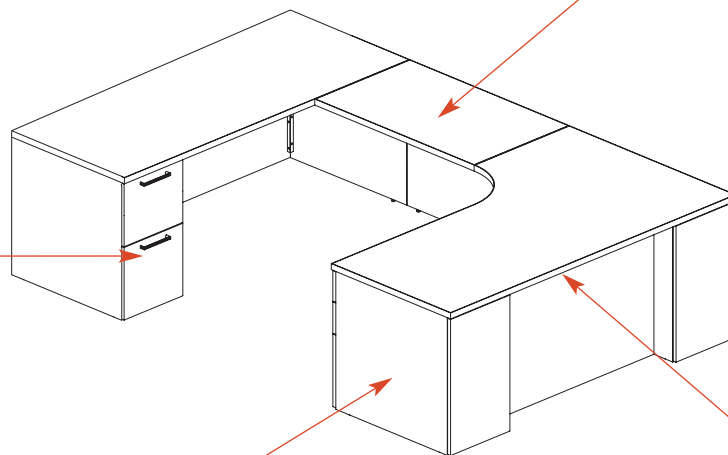

Wood veneers on wood and laminate with wood rim models are carefully selected and matched to assure proper balance and consistency.

Chassis and drawer/door fronts on laminate models feature thermally fused laminate (TFL). Grain direction runs top to bottom.

Laminate models offer great flexibility in finish selections. The worksurface, rim, drawer/door fronts, and chassis may be specified in different colors.

Pedestals are full height and letter width on assembled units. They connect directly to surfaces. Locks are optional.

Drawer fronts are 3/4"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.

Worksurfaces are 13/16"-thick, 3-ply, balanced construction and available in wood, high-pressure laminate (HPL), or thermally fused laminate (TFL).

Worksurface rims are 1/8" thick. Rims are available in four profiles options.

Softened and reed rim profiles appear on all four edges of the worksurface.

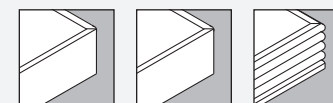

Knife rim profile appears on the user edge and overhangs by 1 1/4"; side and back edges are flat on all units except desks. On desks, the knife rim appears on the approach and user sides.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

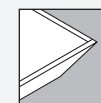

Materials:

- W** Wood worksurface, rim, and chassis
- LW** HPL worksurface, wood rim and wood chassis
- L** HPL worksurface, PVC rim, and TFL chassis
- LL** TFL worksurface, PVC rim, and TFL chassis

Worksurface Rim Profiles:

- P** Softened PVC rim
- F** Softened wood rim
- M** Reed wood rim

- S** Knife wood rim

Laminate models are available with a softened PVC (P) rim profile. Wood and laminate/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

Pull Options:

➤ See page 81.

Assembled Casegoods Product Information

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Details

Exterior wood surfaces are available in the following veneers:

- Cherry (plain-sliced, slip-matched)
- Maple (plain-sliced, slip-matched)
- Quarter-cut oak
- Walnut (plain-sliced, book-matched)
- Quarter-cut walnut
- Sapele (quarter-sliced, slip-matched); premium veneer, upcharge applies
- Zebrawood; premium veneer, upcharge applies

Joints are securely fastened with dowels and mechanical fasteners to ensure maximum strength.

Drawer fronts are 3/4"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.

Drawer sides and back are 1/2" thick and wrapped in natural woodgrain vinyl. Bottoms are 3/16" thick.

Optional wood drawers are available on wood and laminate with wood rim/chassis units. Drawer sides and back are 1/2" thick with veneer faces. Bottoms are 1/4" thick with veneer faces. Interiors are sealed, sanded, and finished with a clear durable topcoat.

Drawer suspensions feature black slides with precision steel ball bearings to ensure long-lasting, quiet, smooth operation. Box, file, and lateral file drawers feature full extension slides.

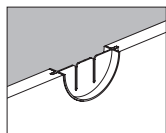

Black filing rods are standard in all file drawers to accommodate various filing requirements.
➤ See page 55 for filing capacities.

Face-mounted locks are optional on all desks, returns, and credenzas. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.

➤ See page 54 for lock information.

Fixed modesty panels are featured on all assembled casegoods.

Optional hinged modesty panel is available on assembled bridges, returns, kneespace, and single-pedestal credenzas. Hinged modesty panel swings inward to allow access to wall outlets. It lifts from the floor and is held in place by leveling feet.

Black half-round grommet is available factory installed at the top center of hinged modesty panels; upcharge applies.

A variety of factory-installed workspace grommet options are available.

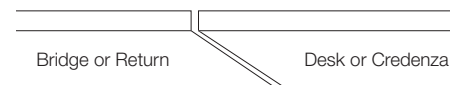

➤ See page 49.

Connections

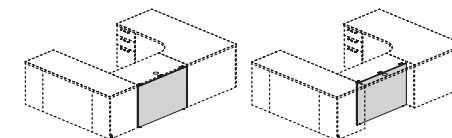

Assembled desks with knife rim profile feature the rim on both the user and approach sides.

Assembled returns, bridges, and credenzas with knife-rim profile feature the rim on the user side only.

Knife rim overhangs the user side by 1 1/4".

Returns and bridges with knife rim profile have a reverse knife edge on abutting edges to provide a flush fit with the adjoining surface.

Flush installation

Recessed installation

Hinged modesty panels can be installed in a flush or recessed location. Flush installation visually lines up modesty panel with the adjoining side panels for an exposed orientation. Recessed installation insets modesty panel 6" from the back edge of the work-surfaces to create an area to store cords and cables. Recessed modesty panel allows the whole unit to be placed flush against the wall.

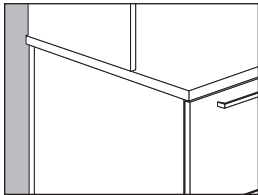

Single-pedestal desks and single-pedestal credenzas may be used as stand-alone units.

Flush-Surface Applications Overview

Flush-surface applications can be created by selecting:

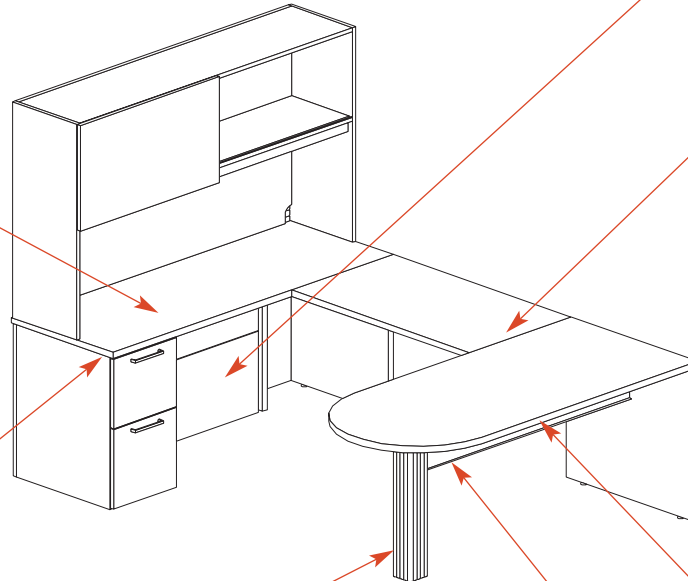

- Worksurfaces for flush-surface applications
- Support panels and mid-support panels
- Undersurface storage or low storage for flush-surface applications.

Worksurfaces are 1 $\frac{3}{16}$ " thick and available in thermally fused laminate (TFL), high-pressure laminate (HPL), HPL with wood rim, and wood.

Flush-surface appearance is created by the undersurface storage being attached directly to the work surface. This provides a clean, transitional aesthetic.

Support options, such as end-support panels, T-leg end panels, column legs, modesty panels, and undersurface storage are designed to sit "flush" with the work surface.

Technology modesty panels provide wall access.

Flat brackets ship standard with worksurfaces when specified as a filler or extension.

Softened, reed, and knife rims are available on work-surfaces.

Glass modesty panel can be used with U- or P-shaped work surface, column leg, and panel support.

Statement of Line	➤ See page 11

Floating-Surface Applications Overview

Private Office

Floating-surface desk configurations

can be created by selecting:

- Worksurfaces for floating-surface applications
- U-legs, open legs, or end panels
- Undersurface storage with spacers or low storage

Floating-surface support legs and end panels feature a work-surface bracket location on top that causes the worksurfaces to appear to float above the support component.

Use worksurfaces above low storage to create a layered look.

➤ See page 59.

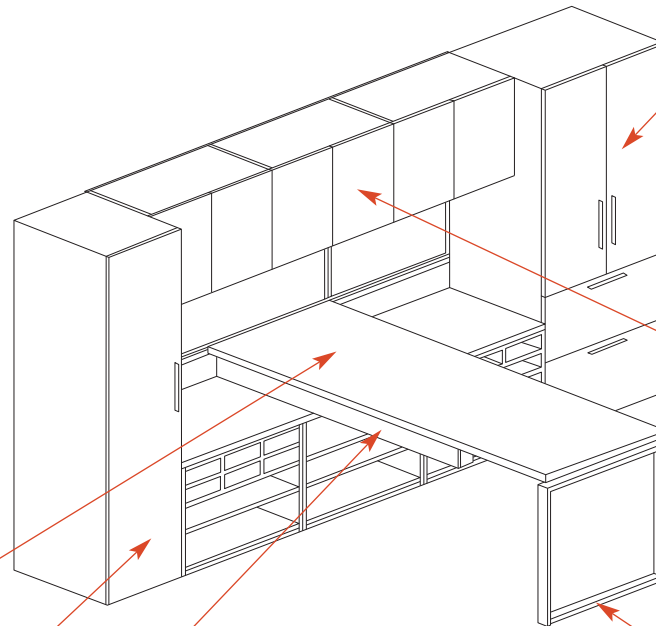

Vertical storage and overheads are universal within the Priority series.

➤ See pages 84 and 89.

Privacy screens and cable surround modesty panel,

specified separately, can attach to worksurfaces for additional privacy.

➤ See pages 68 and 78.

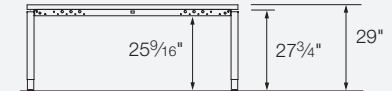

Use vertical storage in conjunction with low or undersurface storage to create a workwall.

Overheads can be wall-mounted or Traxx-mounted.
➤ See page 84.

Support options, such as U-legs, open-frame legs (shown), wood end panels, and pedestals with spacers, are designed so that the worksurface appears to "float" 3/4" above the support.
➤ See page 69.

Statement of Line	➤ See page 11

Floating-Surface Applications Overview

Benching

Benching tables are created by selecting:

- Worksurfaces for floating-surface applications
- Undersurface support rails
- U-legs, open legs, end panels, and/or undersurface storage with spacers.

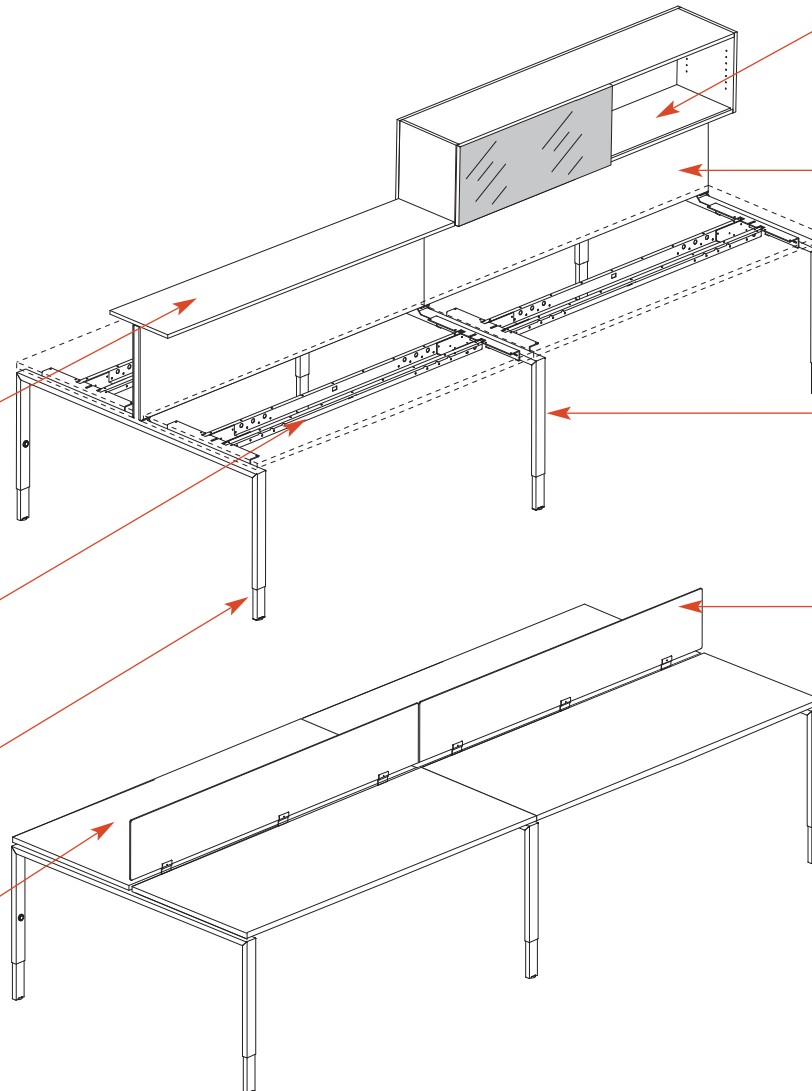

Floating-surface support legs and end panels feature a work-surface bracket location on top that causes the work-surfaces to appear to float above the support component.

Center-mount shelves and storage connect to U-legs with stanchions using a center-mount overhead shelf bracket. Shelves keep shared materials visible and within easy reach.

Undersurface support rails provide strength for the worksurface, connecting between support models.

U-legs are used to create benching tables. Available in fixed and adjustable-height models.

Worksurfaces are available in 24", 30", 36", 48", and 60" widths. 24" or 30"D worksurfaces are used for dual-sided benching with stanchions; 36", 48", and 60"D models provide a continuous surface for U-legs without stanchions.

Overhead storage is available in 36"–72" widths with sliding door or hinged doors. ▶ See Systems Price List for metal center-mount overheads.

Tiles mount to stanchions to provide privacy above the worksurface. Top caps, shelves or overheads must be specified to complete the top of the tile run when using stanchion U-leg support.

Shared mid-support U-leg supports the ends of two adjoining worksurfaces. Available with or without stanchions.

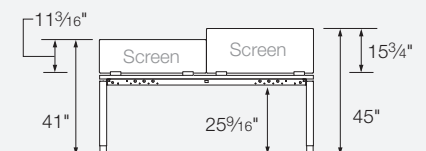

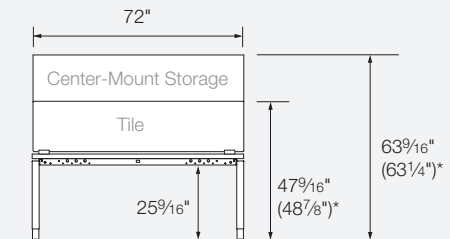

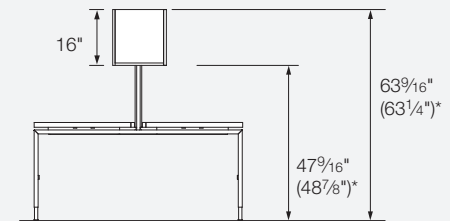

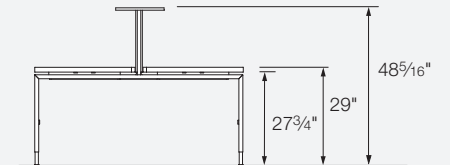

Privacy screens may be mounted to top or edge or a surface. Brackets for free-standing screen applications are also available.

End-support U-leg without stanchions provides support at the end of a run of surfaces. Available with or without stanchions.

Low storage and mobile cushion top pedestal can stow under the surface. Mobile BBF and FF units will not stow below the surface due to the location of the undersurface support rails.

Returns are created with 24", 30", and 36"D worksurfaces, undersurface support rails, return mounting brackets, flat brackets, and legs.

Bracket on top of support legs and end panels creates a floating-surface appearance.

There is no length limitation as to the number of tables that can be linked. There is no dimensional creep.

Privacy screens may be specified at the same height or width for consistent aesthetics or at different heights for function.

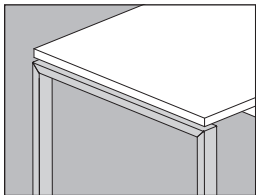

Floating-Surface Applications Overview

Collaboration and Conferencing

Collaboration work and

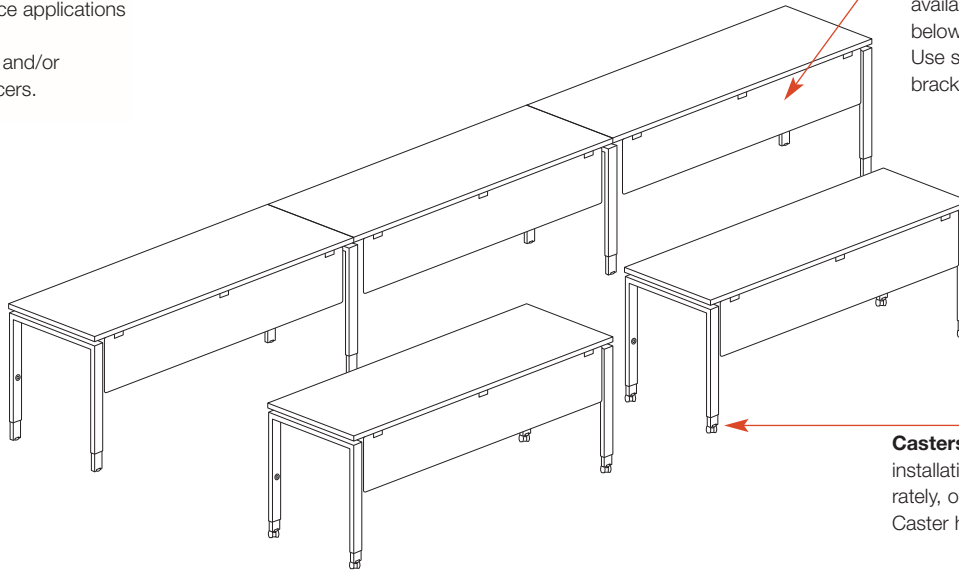

conference tables are created by selecting:

- Worksurfaces for floating-surface applications
- Undersurface support rails
- U-legs, open legs, end panels, and/or undersurface storage with spacers.

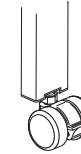

Floating-surface support legs and end panels

feature a worksurface bracket location on top that causes the worksurfaces to appear to float above the support component.

12"H privacy screens are available to provide privacy below the worksurface. Use surface-mount brackets for attachment.

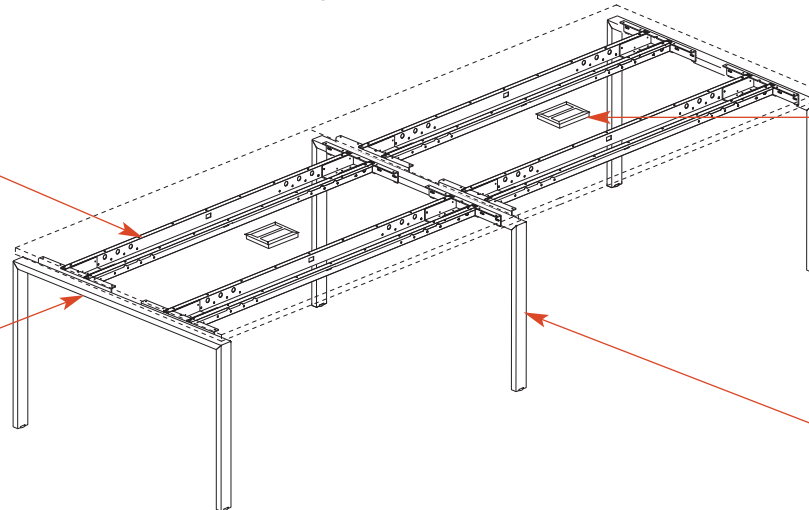

Casters are available for field installation, specified separately, on individual tables. Caster height is 17/8".

Two sets of undersurface support rails connect to U-legs to provide strength.

48" and 60" U-legs are used to create conference tables.

Worksurface depth matches the depth of the U-legs.

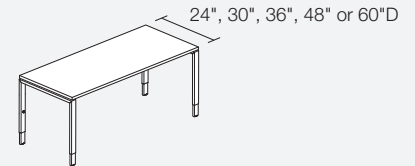

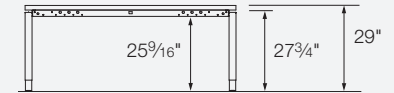

Factory-installed grommets and cutouts are available for power/data centers.

For field-installed grommets, note the location of support legs to eliminate interference with grommets.

Shared mid-support U-leg supports the ends of two adjoining worksurfaces.

Worksurfaces

For Flush-Surface Applications

Details

Worksurfaces are sized in 6" increments that correspond to Priority pedestals and storage. Appropriate bracketry is included. They are available in thermally fused laminate (TFL), high-pressure laminate (HPL), HPL with a wood rim, and wood.

IMPORTANT: Assembled casegoods may be used together in the same configuration with worksurfaces, storage and support components for flush-surface applications.

P Softened PVC rim **F** Softened wood rim **M** Reed wood rim **S** Knife wood rim

Laminate (HPL and TFL) models are available with a softened PVC (P) rim profile.

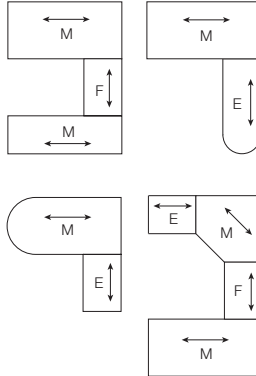

Wood and HPL/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

Attachment brackets based on the application specified are standard on all worksurface shapes.

A variety of factory-installed worksurface grommet options are available.

➤ See page 50.

Connections

Note: Arrows on illustration indicate grain direction.

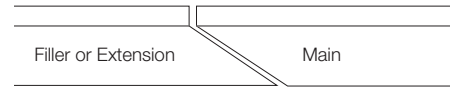

Worksurfaces for flush-surface applications are interchangeable; however, to receive the correct brackets, the application—main (M), extension (E), or filler (F)—must be specified. Main surfaces receive no attachment hardware; extension surfaces receive 2 flat brackets; and filler surfaces receive 4 flat brackets.

➤ See pricing pages for bracketry options by worksurface shape.

If the application or position of the worksurface needs to be changed, it can be accomplished by changing the bracketry. *Exception: All desk worksurfaces must be used as a "main" worksurface.*

24"D rectangular worksurfaces are for use with 24"D pedestals.

Worksurfaces can be scribed on site to conform with oblique angles, irregular column placement, and historical preservation guidelines. These are just a few instances where this capability becomes an asset.

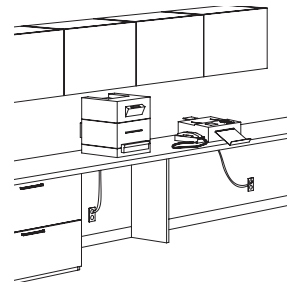

Filler and extension surfaces with knife rim profile have a reverse knife edge on abutting edges to provide a flush fit with the adjoining surface. Back and exposed side edge of extension worksurfaces are flat.

Main knife rim worksurfaces cannot be used adjacent to a corner worksurface.

IMPORTANT: Flush- and floating-surface knife rim models cannot be used together.

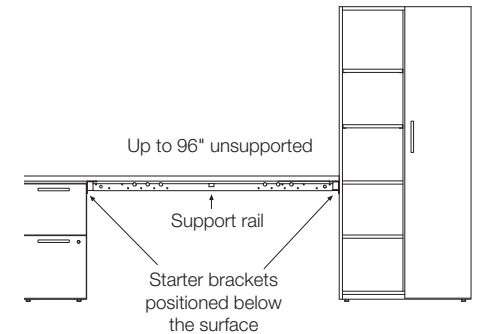

Planning Factors

The maximum recommended span of an unsupported worksurface is 48" using storage and support for flush-surface applications; longer distances require additional support.

➤ See the Xsede Price List for undersurface support rails that can be used as additional support for spans up to 72"W.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

The maximum span for an unsupported worksurface can be extended to 96" between flush-surface pedestals, end panels, or storage units by utilizing floating-surface starter brackets and appropriately sized undersurface support rails. Starter brackets would be placed at the side of the storage unit and/or end panels even with the top of the pedestal. Rails would connect to starter brackets at both ends. Storage units will be defaced. For example: To span 72" unsupported, specify a 72"W (nominal) undersurface support rail and a starter bracket for each storage unit/end panel.

➤ See the starter bracket planning information.

Consider the load a worksurface will carry when planning support. Additional support is recommended for surfaces where heavy equipment will be placed. Support can be placed where needed without the limitations of predrilled or predetermined locations.

Worksurfaces

For Floating-Surface Applications

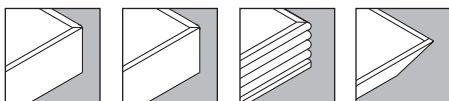

Details

IMPORTANT: Floating worksurfaces are intended for use with floating-surface supports:

- Undersurface support rails
- Open-frame or U-legs
- End panels
- Pedestals or low storage

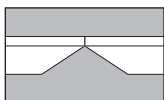

Note: Knife rim worksurfaces cannot be supported by flush-surface supports or undersurface storage, or used in Systems applications.

Worksurfaces are 1 $\frac{3}{16}$ " thick, 3-ply balanced construction.

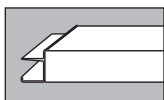

P Softened PVC rim **F** Softened wood rim **M** Reed wood rim **S** Knife wood rim

Rim profile is $\frac{1}{8}$ " thick and appears on all edges of the worksurface. Laminate models are available with a softened PVC rim. Wood and laminate with wood rim models are available with a softened, reed, or knife rim.

Knife rim on worksurfaces appears on all four sides and butts end to end.

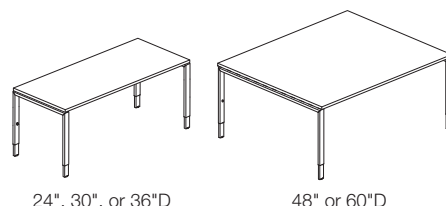

Wire manager option is available on 24", 30", and 36"W rectangular worksurfaces and corner worksurfaces. This flexible trough allows cords and cables to be routed along the back edge of the worksurface. Selected rim profile appears on the on the

front and side edges. Wire manager is recommended for back-to-back benching applications.

Rectangular worksurfaces are available in five depths: 24", 30", 36", 48", and 60" and in widths ranging from 36" up to 144" depending on the depth of the surface. 120" and 144"W worksurfaces consist of two pieces.

➤ See the Statement of Line for sizing combinations.

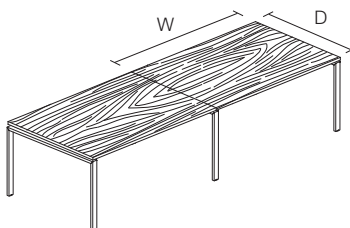

24"-36"D rectangular surfaces can be used to build:

- Private office configurations
- Freestanding open-plan applications
- Single-sided benching applications
- Double-sided benching (24" and 30"D only)
- Height-adjustable tables

48" and 60"D rectangular surfaces can be used to build:

- Double-sided benching applications
- Large conference or work tables

Grain direction runs with the width on wood veneer and woodgrain laminate worksurfaces. *Exception: Grain runs with the depth on two-piece (120" and 144"W) worksurfaces with quarter-cut*

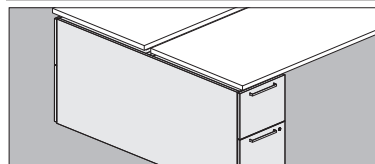

veneers (Monterey Oak, Canyon Oak, Tuscan Walnut, and Clear Zebrawood).

Other worksurface shapes include: U-shape, arc-end, extended, wedge, oval, 90° corner, and 120° corner.

A variety of factory-installed grommet and cut-out options are available.

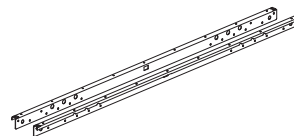

➤ See pages 51–52.

Connections

Pedestals, U-legs, and open legs for floating-surface applications, specified separately, are designed to be support so that the worksurface appears to "float" $\frac{3}{4}$ " above support and storage. Undersurface storage satisfies both support and storage needs. Pedestal must match worksurface depth.

IMPORTANT: Supports and brackets must be specified separately for all worksurfaces.

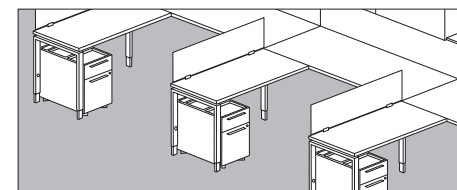

Undersurface support rails, specified separately, are required for all surfaces.

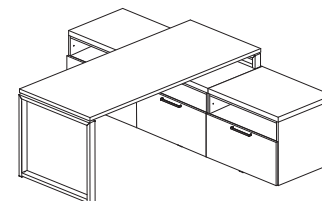

Note: Rails are standard with height-adjustable bases.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Ganging units together result in no "dimensional creep." There is no limitation as to number and width of tables that can be joined. Varying widths of worksurfaces are not intended for use together in a straight, linear application (side by side).

Return worksurfaces can be created by adding a 24", 30", or 36"D worksurface and appropriate support legs perpendicular to the main worksurface. Use a return mounting bracket and two flat brackets, specified separately. Rail will be 6" longer than the return surface for connection to main surface.

Low storage models can be used when the worksurface is placed at 29"H or higher. Clearance from the undersurface support rail to the floor is 25 $\frac{9}{16}$ ".

Table Tops

For Flush-Surface, Floating-Surface, and Height-Adjustable Applications

Details

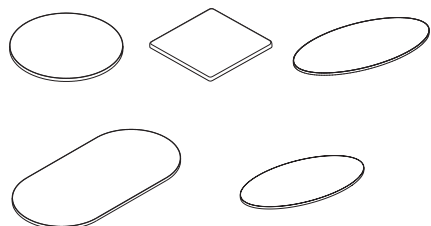

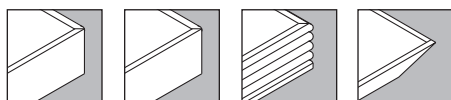

Table tops are available in wood, high-pressure laminate (HPL) with wood rim, and HPL with a PVC rim, or thermally fused laminate (TFL) with a PVC rim. Select from round, square, oval, racetrack, and elliptical shapes.

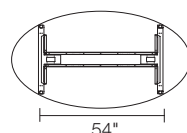

Table tops are 1 $\frac{3}{16}$ " thick, 3-ply, balanced construction. Rims are $\frac{1}{8}$ " thick.

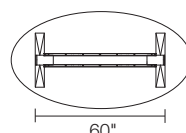

P Softened PVC rim **F** Softened wood rim **M** Reed wood rim **S** Knife wood rim

Laminate models are available with a softened PVC (P) rim profile.

Wood and laminate/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

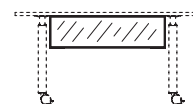

U-Legs or
Open-Frame Legs

Height-Adjustable T-Legs
or Fixed-Height T-Legs

78"W oval worksurface can be supported by several different support-U-legs, open-frame legs, height-adjustable, or fixed-height T-legs. Specify components to create a 30"D x 54"W frame for U-legs and open-frame legs. Specify components to create a 30"D x 60"W frame for height-adjustable or fixed-height T-legs.

Modesty panels are available to attach to the underside of 36" x 72" racetrack or 40" x 72" elliptical table tops. They feature a metal frame with silver frost finish and an opaque frost glass insert.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Planning Factors

Base requirements differ based on the table top shape and size.

➤ See page 92 for base requirements.

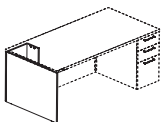

Support

For Flush-Surface Applications

Details

IMPORTANT: Assembled casegoods and modular support for flush-surface applications may be used together in the same configuration.

Modular support components are designed to support flush-surface applications.

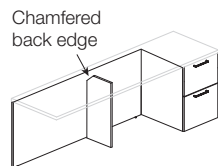

End support panels can support the non-pedestal end of a worksurface to create a single-pedestal desk or credenza in freestanding, L-, or U-configurations. End support panels consist of an end panel, back/modesty panel, and one support panel creating a false pedestal.

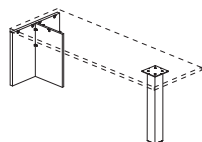

Undersurface pedestals, low storage with support drawers or shelves, and cable surround modesty panel can also support the end of worksurfaces.

➤ See page 81 for flush-surface storage components.

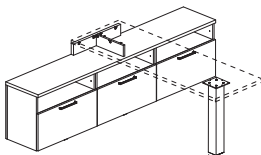

➤ See page 83 for low storage components.

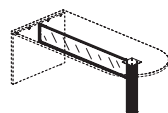

12"D work surface mid-support panel (model 53K1128SSW) can be used for additional support. Worksurface support panel does not allow modesty panel to hinge forward. Back edge is chamfered for cable management.

T-leg end panels can also be used to support the end of a worksurface when there is no pedestal. Modesty panel cannot be used in conjunction with T-leg end panels.

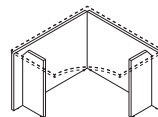

5" and 11" T-leg end panels are for use on top of low storage to support worksurfaces. 5"H model sits atop 22"H storage; 11"H model is for use with 15"H storage. Component top is required.

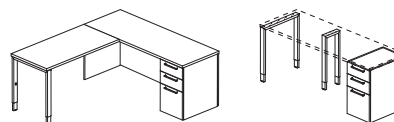

Support columns for extension worksurfaces, such as rectangular, U-shaped, and P-shaped worksurfaces that extend out from an adjacent worksurfaces, include:

- Round metal and wood column
- Wood half cylinder
- Square fluted-metal column

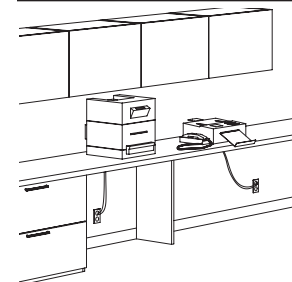

Corner support panels are used with corner worksurface. Assembly includes modesty and wing support panels. Corner worksurface is specified separately.

Height-adjustable U-leg is 27 $\frac{3}{4}$ "H and adjusts from 24 $\frac{3}{4}$ "–32 $\frac{1}{4}$ " in $\frac{3}{8}$ " increments. U-legs can be used to displace wood end panels on desks, returns or modular return and extension worksurfaces; not intended for use to create a freestanding table. End U-legs are available in 24", 30", and 36"D. Mid-support U-leg is 10"D and is for use on 24"D, 30"D, and 36"D surfaces only. All adjustable U-legs feature a button that indexes into notches in the inner leg member. By depressing the button, the leg releases the lower leg assembly. This gives the user the ability to change the height as needed throughout the day. Legs can be used with Priority, Definition or Footprint worksurfaces. For 1 $\frac{3}{16}$ " worksurfaces, support is required every 48"; for 1 $\frac{9}{16}$ " worksurfaces, support is required every 60".

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Planning Factors

The maximum recommended span of an unsupported worksurface is 48"; longer distances require additional support.

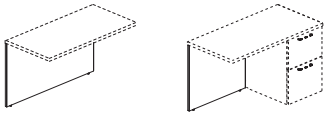

Consider the load a worksurface will carry when planning support. Additional support is recommended for surfaces where heavy equipment will be placed. Support can be placed where needed without the limitations of predrilled or predetermined locations.

Modesty Panels

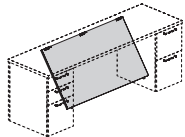

For Flush-Surface Applications

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

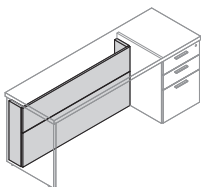

Details

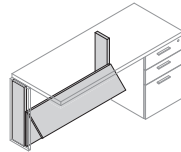

Hinged modesty panels are optional. They are for use in conjunction with undersurface pedestals and worksurfaces to create an enclosed kneewell on desks, credenzas, bridges, and returns. A black half-round grommet is available factory-installed at the top center on hinged modesty panels; upcharge applies.

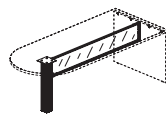

Hinged modesty panel always spans between two pedestals or between a pedestal and an end-support panel. It cannot extend behind the back of a pedestal.

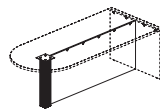

Technology modesty panels are available to provide wall access for units built from modular components. Assembled bridges and returns without a modesty panel will not accept the technology modesty panel. Widths are available up to 46".

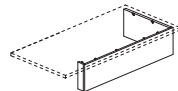

Face of unit is hinged at the center to fold down to access wall.

Partial-height glass modesty panels are for use in with P- or U-shaped worksurfaces, an end panel, and a square metal column base or wood half-cylinder base.

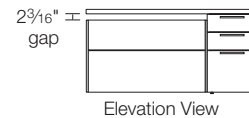

Full-height modesty panels are for use in conjunction with rectangular, P-shaped, or U-shaped worksurfaces, an end panel, and a square metal column base or wood half-cylinder base. Grain runs horizontal on laminate model. Field installation of grommets is recommended to ensure placement of the grommet on the user's side of the modesty panel.

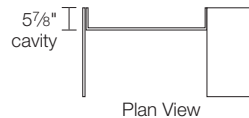

Cable surround modesty panel can be attached underneath the worksurface to conceal cabling.

Connections

Technology modesty panel is not freestanding and must be secured between storage, end panels, or support panels.

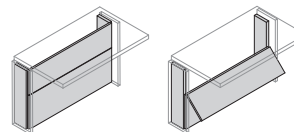

Gap between the top of the technology modesty and underside of the worksurface of 2 3/16" allows cords from adjoining extensions or main worksurfaces to exit into the cavity.

When mounted flush with the back of storage or end panel, the technology modesty panel creates a 5 7/8" cavity to store cords. The unit can be mounted forward to create a larger cavity to the wall.

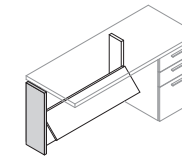

Planning Factors

Specify the same size modesty panel as the kneespace width into which it will fit.

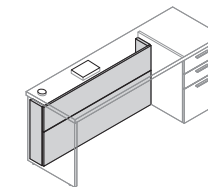

Bridge worksurfaces can be placed above a technology modesty panel. Two 12"D worksurface support panels are required to which the technology

modesty panel will attach. The technology panel and the support panels do not attach to or provide support for the bridge; bridge is supported by adjacent worksurfaces with flat brackets.

Returns and credenzas created from modular components can accommodate a technology panel. One 12"D worksurface support panels is required to mount on the open end. Order the modesty to correspond with the kneespace width for assembled returns without modesty. For modular returns, calculate the kneespace opening to determine the modesty panel width. For example: 72"W worksurface – 15"W pedestal = 57"W technology modesty panel.

Related Products

Factory-installed worksurface grommet options (G1 and G19) are designed to allow cords to fall directly into the technology modesty panel's cavity.

➤ See the Perks Price List for power/data center and field-installed grommets.

Support drawers and shelves

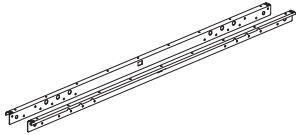

➤ See page 143.

Undersurface Support Rails

For Floating-Surface Applications

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

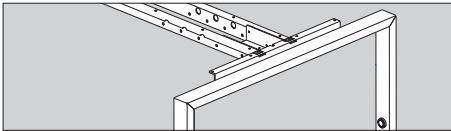

Details

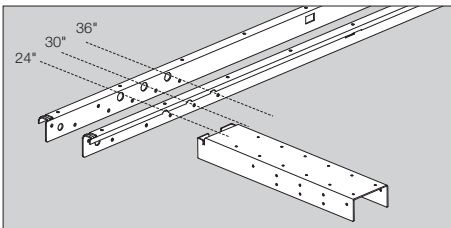

Undersurface support rails are required for all floating worksurfaces to provide strength and allow connection of U-legs, open-frame legs, and storage. Rails are powder-coated steel, non-handed, and come in a set of 2; they are 2¼"H and are installed 4½" apart.

Available in 9 lengths from 36"–96" in 6" increments to correspond to worksurface widths.

Connections

Undersurface support rails attach to starter brackets. Starter brackets are welded to all U-legs and open-frame legs. Specify starter brackets separately for attaching rails to undersurface pedestals or end panels.

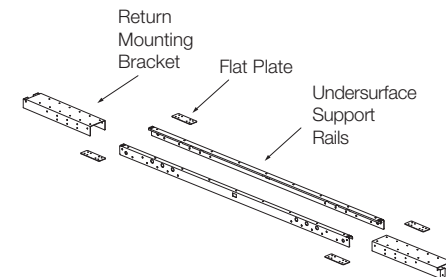

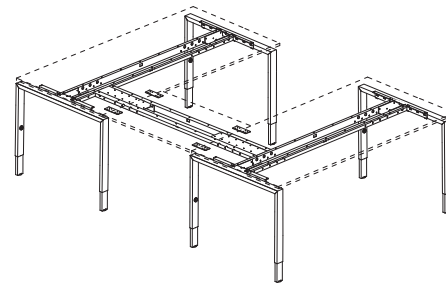

Return mounting bracket is non-handed and can be attached to either end of an undersurface support rail to attach a 24", 30", or 36"D worksurfaces to the main worksurface as a return. Two flat

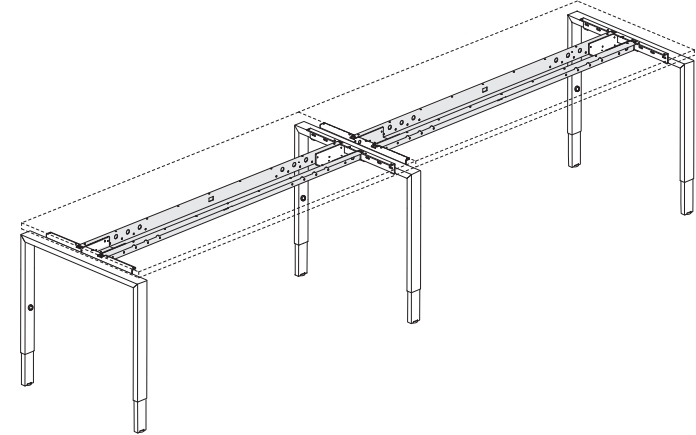

plates (model ACAWBP1), specified separately, are also required when mounting each return.

Mounting holes are located on the undersurface support rail in several locations to accommodate various return depths. For a 24"D main worksurface, bolt to the first set of holes; for a 30"D main worksurface, bolt to the middle set of holes; for a 36"D main worksurface, bolt to the nearest set of holes.

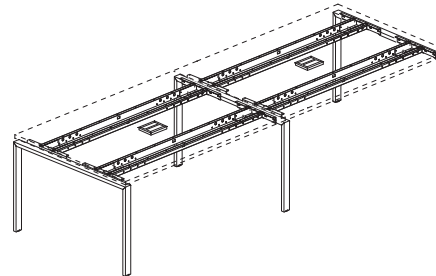

Data cabling can be secured to undersurface support rails utilizing cable ties and holes in the rails.

Bridge mounting kits consist of two return mounting brackets and set of undersurface support rails. Undersurface support rails in each kit are 12" longer than the bridge length. For example, 48"W bridge kits ships with 60" undersurface support rails to allow for 6" of connection to the brackets on either side. Four flat plates (model ACAWBP1), specified separately, are required to link surfaces.

Planning Factors

48" and 60"D applications require two sets of undersurface support rails.

For linear applications, specify support rail length to match the width of the worksurface.

IMPORTANT: For returns, specify support rail length that is 6" longer than the width of the return surface. Rail will extend under the main surface and connect to a return mounting bracket.

If the length of rail required is not a size offered, specify the next smaller size. The starter bracket will compensate for the dimensional difference.

When using storage as support, calculate the length of the rail required by deducting the width of the storage from the width of the corresponding worksurface. For example, a 72"W surface with two 15"W pedestals would require a 42"W rail, the length of the unsupported span. A 72"W surface with one 15"W pedestal has an unsupported span of 57" and would require a 54"W rail, the next available smaller size.

Clearance from the rail to the worksurface edge:

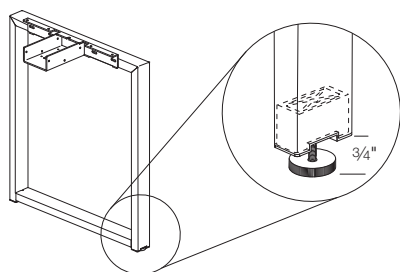

Surface Size	Softened or Reed Rim	Knife Rim
24" or 48"D	8¾"	7¾"
30" or 60"D	11¾"	10¾"
36"D	14¾"	13¾"
24"x48" 90° corner	23⅞"	22⅞"
30"x48" 90° corner	19⅝"	18⅝"
24"x48" 120° corner	15"	14"
30"x48" 120° corner	20¼"	19¼"

Open-Frame Legs

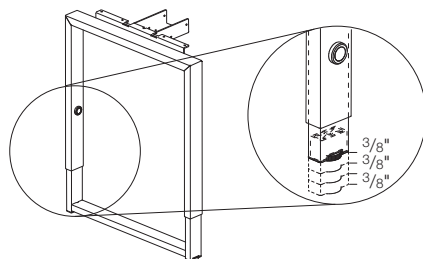

For Floating-Surface Applications

Details

IMPORTANT: Only floating worksurfaces are for use with open-frame legs. Priority worksurfaces for flush-surface applications and Systems worksurfaces are not applicable.

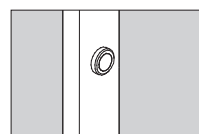

Fixed-height open-frame legs are 27³/₄"H from undersurface to the floor. Available in 24", 30", 36", 48", and 60" depths. Plastic leveler insert is located at the bottom of each leg. The glide stem is 1" long and provides ³/₄" of adjustment.

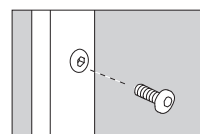

Adjustable-height open-frame legs are 25⁷/₁₆"H from undersurface to the floor, at the lowest position. Available in 24", 30", 36", 48", and 60" depths.

Open-frame legs are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. They connect directly to undersurface support rails and aligns to

solid end panels for floating-surface applications or pedestals with spacers. Open-frame leg models are for use in benching, work table, open plan, conferencing or private office applications.

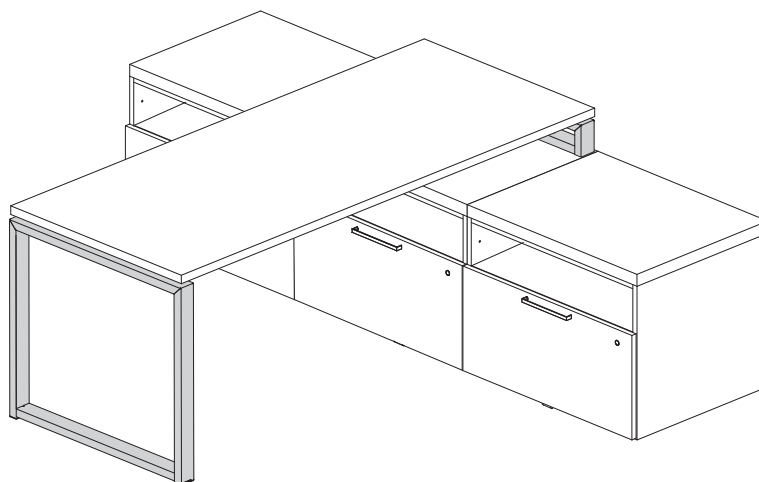

Push Button

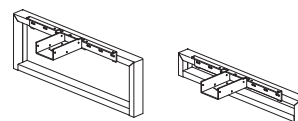

Screw-Adjust

24", 30", and 36"D adjustable-height open-frame legs feature a push button that indexes into notches in the inner leg member. By depressing the button, the leg releases the lower leg assembly. These models provide maximum height adjustment of 7⁷/₁₆" in ³/₈" increments from 25⁷/₁₆" to 32⁷/₈"H, plus an additional ³/₄" of adjustment utilizing the plastic leveling insert.

48" and 60"D adjustable-height open-frame legs feature a mechanical screw-adjust mechanism that indexes into notches in the inner

leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs are engineered to carry more load than the smaller width U-leg units. These models provide maximum height adjustment of 7⁷/₁₆" in ³/₈" increments from 25⁷/₁₆" to 32¹/₂"H, plus an additional ³/₄" of adjustment utilizing the plastic leveling insert. **IMPORTANT:** The intent of these adjustable U-legs is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.

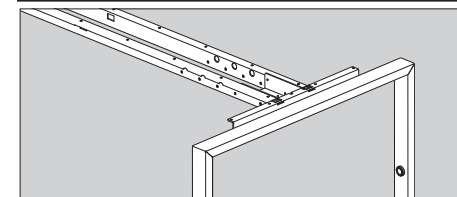

11"H and 5"H open-frame legs are for use on top of low storage. 5"H model sits atop 22"H storage; 11"H model is for use with 15"H storage. They are not intended for use with adjustable-height open-frame legs in the same configuration.

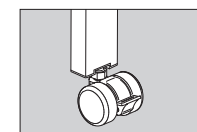

Statement of Line	➔ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

IMPORTANT: Component tops must be specified for low storage when open-frame legs will be placed on top for worksurface support.

Connections

Undersurface support rails attach to starter brackets. Starter brackets are welded to all open-frame legs.

Field installed caster kits are available for use on the individual tables up to 36"D x 96"W. They are not for use for bases that are linked together. Casters feature a tall neck with an M-10 thread; height is 1⁷/₈". Sold in a set of 4.

Planning Factors

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended. By extending some legs further than others, the table leg can compensate for the floors that are out of level.

Create a different visual by placing open-frame legs inboard from the end of the worksurfaces. The undersurface rails would need to be specified in a smaller width to connect the legs together. Legs may be placed inboard 12" on 24"D surfaces, 15" on 30"D surfaces, and 18" on 36"D surfaces.

U-Legs

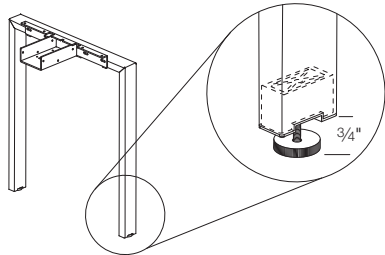

For Floating-Surface Applications

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

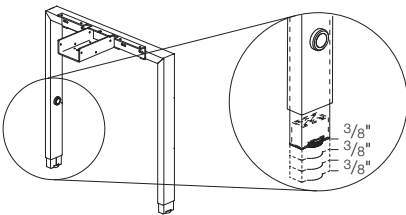

Details

IMPORTANT: Only floating $1\frac{3}{16}$ " worksurfaces are for use with U-legs for floating-surface applications. Priority worksurfaces for flush-surface applications and Systems worksurfaces are not applicable.

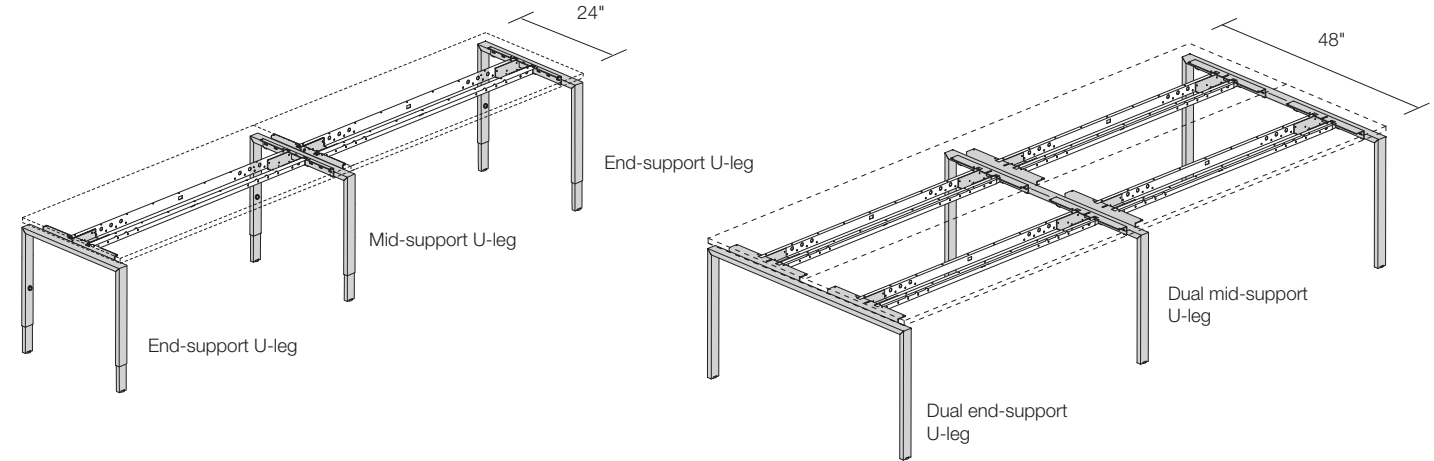

U-legs are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. They connect directly to undersurface support rails. U-leg models are for use in benching, work table, open plan, conferencing or private office applications.

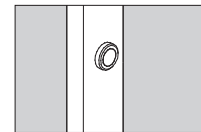

Fixed-height U-legs are $27\frac{3}{4}$ "H from undersurface to the floor. Available with or without a stanchion. Plastic leveler insert is located at the bottom of the leg. The glide stem is 1" long and provides $\frac{3}{4}$ " of adjustment. Available with or without a stanchion.

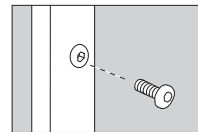

Adjustable-height U-legs are $25\frac{7}{16}$ "H from undersurface to the floor, at the lowest position. Adjustable-height U-legs provide the best aesthetic

appearance since both the inner and exterior legs are painted the same color. Available with or without a stanchion.

Push Button

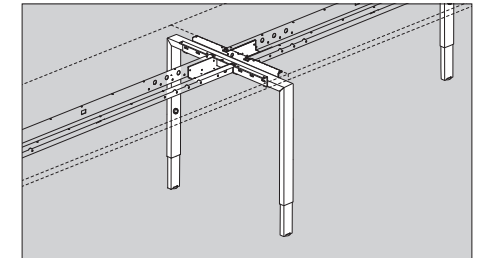

Screw-Adjust

24", 30", and 36"D adjustable-height U-legs feature a push button that indexes into notches in the inner leg member. By depressing the button, the leg releases the lower leg assembly. These models provide maximum height adjustment of $7\frac{7}{16}$ " in $\frac{3}{8}$ " increments from $25\frac{7}{16}$ " to $32\frac{7}{8}$ "H, plus an additional $\frac{3}{4}$ " of adjustment utilizing the plastic leveling insert.

48", 50", 60", and 62"D adjustable-height U-legs and 24", 30", and 36"D mid-support U-legs feature a mechanical screw-adjust mechanism that indexes into notches in the inner leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs are engineered to carry more load than the smaller width U-leg units. These models provide maximum height adjustment of $7\frac{1}{16}$ " in $\frac{3}{8}$ " increments from $25\frac{7}{16}$ " to $32\frac{1}{2}$ "H, plus an additional $\frac{3}{4}$ " of adjustment utilizing the plastic leveling insert.

IMPORTANT: The intent of these adjustable U-legs is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.

Mid-support U-legs link tables together using a single middle leg versus two independent legs.

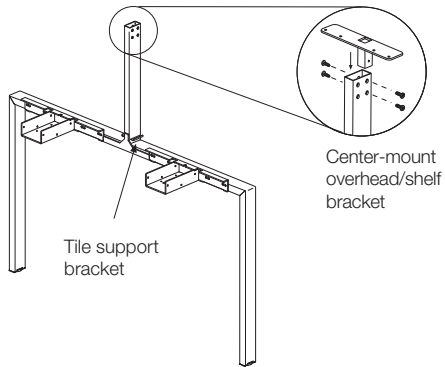

Single mid-support U-legs are available for use with 24", 30", and 36"D worksurfaces.

Dual mid-support U-legs for use with 48" or 60"D applications have two sets of brackets for mounting surfaces. Two surfaces can be used back to back or one surface can be used as long as the depth equals the U-leg depth. For example, one 48"D or two 24"D surfaces can be used on a 48"D dual mid-support leg. Dual U-leg applications require two sets of undersurface support rails.

U-Legs

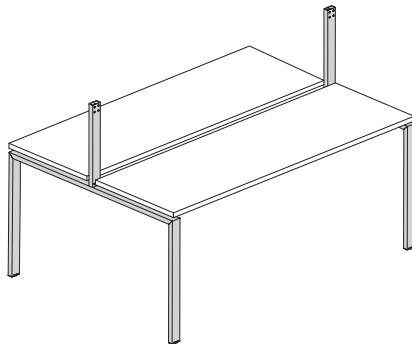

For Floating-Surface Applications, continued

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

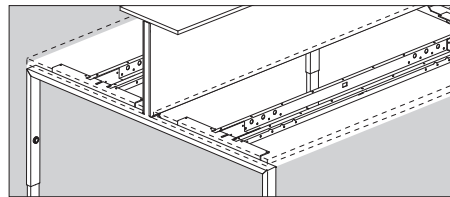

Stanchion support U-legs feature a vertical member that supports tiles and center-mount overhead shelves and cabinets. The overall leg is 2³/₈" deeper than the non-stanchion U-legs to accommodate two 24"D or two 30"D worksurfaces and two tiles.

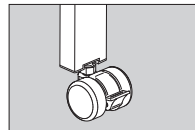

Center-mount overhead/shelf brackets, specified separately, connect directly to the stanchion. Stanchion U-legs connect directly to undersurface support rails. They are available in end- and mid-support models.

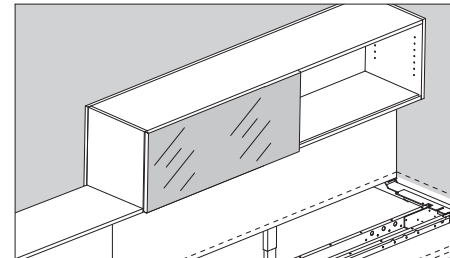

Connections

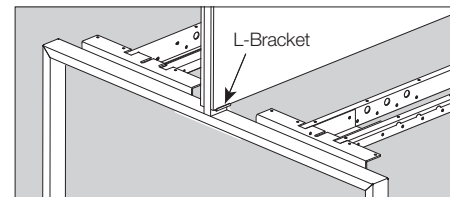

Undersurface support rails attach to starter brackets. Starter brackets are welded to all U-legs.

Field installed caster kits are available for use on the individual tables up to 36"D x 96"W. They are not for use for bases that are linked together or for stanchion models. Casters feature a tall neck with an M-10 thread; height is 1⁷/₈". Sold in a set of 4.

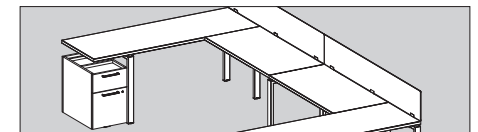

Center-mount overheads, shelves, or top caps are required to complete the top of the tile run.

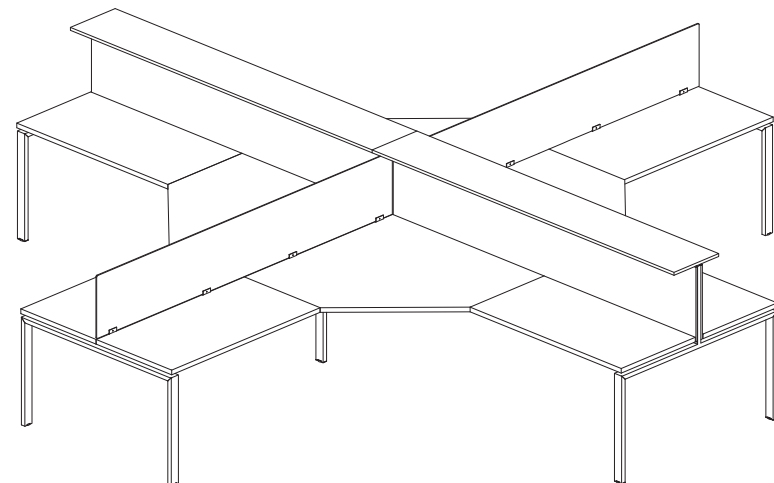

Tiles mount to the stanchions to provide visual privacy in two directions.

Planning Factors

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended. By extending some legs further than others, the table leg can compensate for the floors that are out of level.

Create a different visual by placing U-legs inboard from the end of the worksurfaces. The undersurface rails would need to be specified in the smaller width to connect the legs together. Legs may be placed inboard 12" on 24"D surfaces, 15" on 30"D surfaces, and 18" on 36"D surfaces.

90° Corner Support Frames

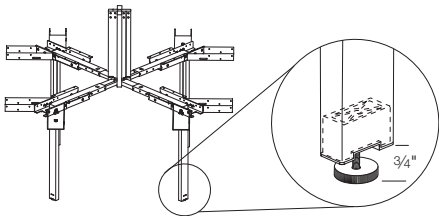

For Floating-Surface Applications

Details

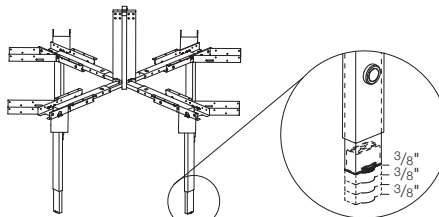

IMPORTANT: Only floating $1\frac{3}{16}$ " worksurfaces are for use with 90° corner supports. Priority worksurfaces for flush-surface applications and Systems worksurfaces are not applicable.

90° corner support frames with stanchion are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. Frames consist of:

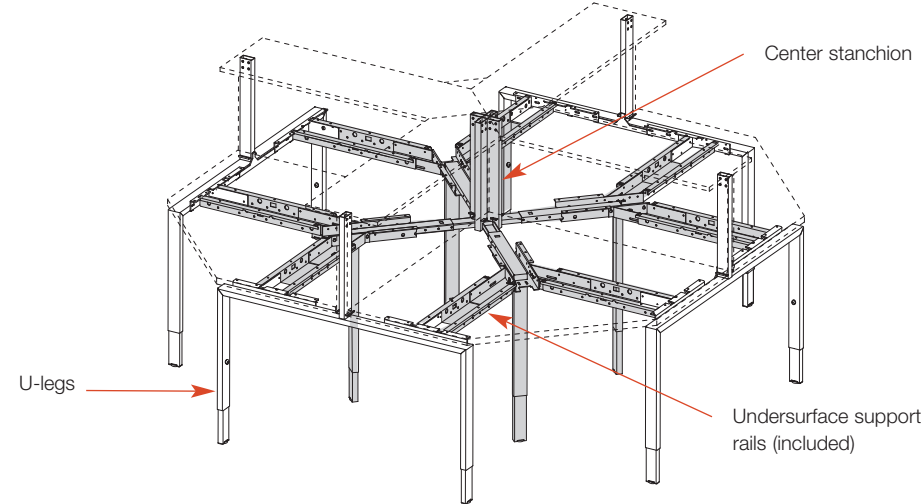

- Center four-way stanchion
- Four legs with adapter brackets
- Undersurface support rails to connect to U-legs

Fixed-height 90° corner support frames is $27\frac{3}{4}$ "H from undersurface to the floor. Plastic leveler insert is located at the bottom of the leg. The glide stem is 1" long and provides $\frac{3}{4}$ " of adjustment.

Adjustable-height 90° corner support frames is $25\frac{7}{16}$ "H from undersurface to the floor, at the lowest position. They provide maximum height adjustment of $7\frac{1}{16}$ " in $\frac{3}{8}$ " increments from $25\frac{7}{16}$ " to $32\frac{1}{2}$ "H, plus an additional $\frac{3}{4}$ " of adjustment utilizing the plastic leveling insert. Adjustable-height U-legs

provide the best aesthetic appearance since both the inner and exterior legs are painted the same color.

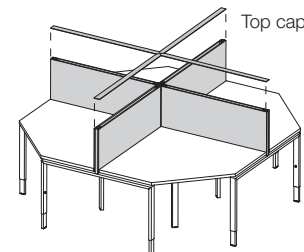

Incremental screw-adjust mechanism on adjustable-height model indexes into notches in the inner leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs are engineered to carry more load than the smaller width U-leg units.

IMPORTANT: The intent of these adjustable frames is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.

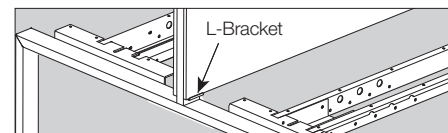

Connections

Four U-legs with stanchions, specified separately, are required. Specify end-support U-legs with stanchions to support the ends of the application or mid-support U-legs with stanchions to continue the run with additional worksurfaces.

Undersurface support rails to connect to U-legs are included with the frame.

Stanchions on 90° corner support frames accept top caps or shelves, but not both. They also can support overhead storage. Overhead/shelf brackets are required, specified separately.

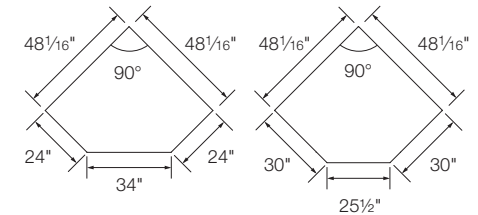

Tiles mount to the stanchions to provide visual privacy in two directions for all four users. Tiles are required.

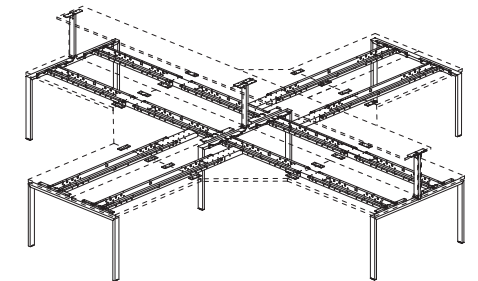

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Planning Factors

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended.

90° corner supports are available in two sizes that accept either 24"D x 48"W or 30"D x 48"W corner worksurfaces, with or without a wire manager. Larger worksurface spans are not recommended for this application.

90° corner workstations can also be created without the use of a 90° corner support by using end U-legs with stanchions and returns going in the opposite directions. Flat brackets must be specified for the returns for additional support. This application allows for visual privacy in one direction, with tiles down the spine of the station. Privacy screens can also be mounted on the returns for additional side-to-side privacy.

➤ See page 78 for privacy screens information.

120° Corner Support Frames

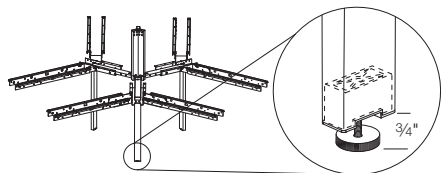

For Floating-Surface Applications

Details

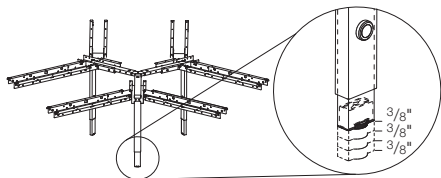

IMPORTANT: Only floating $1\frac{3}{16}$ " worksurfaces are for use with 120° corner supports. Priority worksurfaces for flush-surface applications and Systems worksurfaces are not applicable.

120° corner support frames are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. Frames consist of:

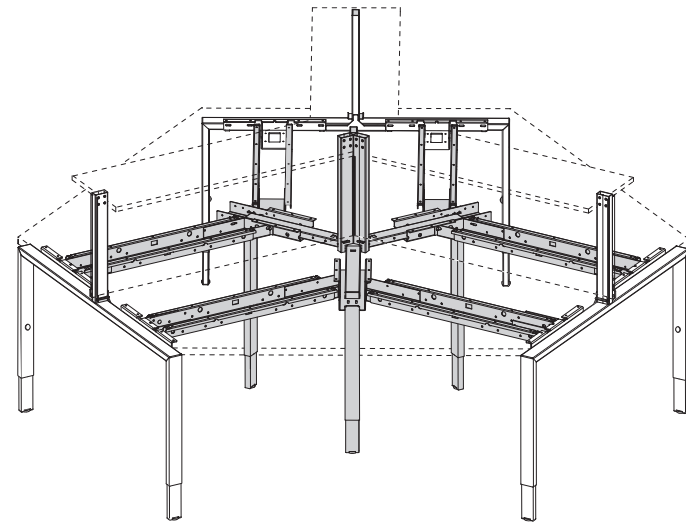

- Center three-way stanchion (stanchion model only)
- Three legs with adapter brackets
- Undersurface support rails to connect to U-legs

Fixed-height 120° corner support is $27\frac{3}{4}$ "H from undersurface to the floor. Plastic leveler insert is located at the bottom of leg. The glide stem is 1" long and provides $\frac{3}{4}$ " of adjustment.

Adjustable-height 120° corner support is $25\frac{7}{16}$ "H from undersurface to the floor, at the lowest position. They provide maximum height adjustment of $7\frac{1}{16}$ " in $\frac{3}{8}$ " increments from $25\frac{7}{16}$ " to $32\frac{1}{2}$ "H, plus an additional $\frac{3}{4}$ " of adjustment utilizing the plastic leveling insert. Adjustable-height models provide the best aesthetic appearance since both the inner and exterior legs are painted the same color.

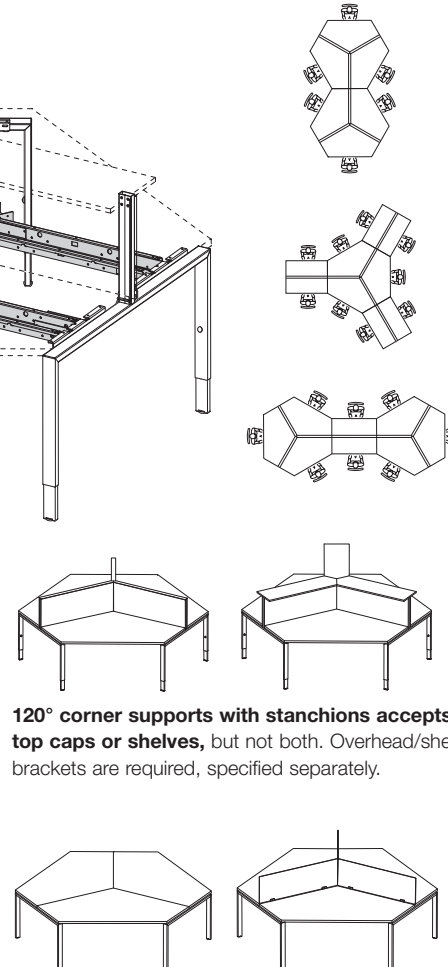

Incremental screw-adjust mechanism on adjustable-height model indexes into notches in the inner leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs are engineered to carry more load than the smaller width U-leg units. **IMPORTANT:** The intent of these adjustable frames is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.

Connections

Three U-legs, specified separately, are required. Specify end-support U-legs to support the ends of the application or mid-support U-legs to continue the run with additional worksurfaces.

Undersurface support rails to connect to U-legs are included with the frame.

120° corner supports with stanchions accepts top caps or shelves, but not both. Overhead/shelf brackets are required, specified separately.

120° corner supports without stanchions can be used to create a more open work area.

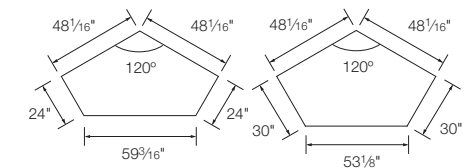

12" or 16" resin privacy screens can be added for visual privacy.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

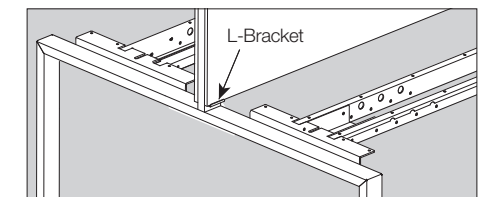

Planning Factors

Applications shown at left depict how the 120 degree stations provide more side-to-side visual privacy than typical lineal benching layouts. There are numerous ways to incorporate the 120 degree station in a floor plan; you are not limited to a typical 3 person station.

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended.

Two sizes accept either 24"D x 48"W or 30"D x 48"W corner worksurfaces, with or without a wire manager.

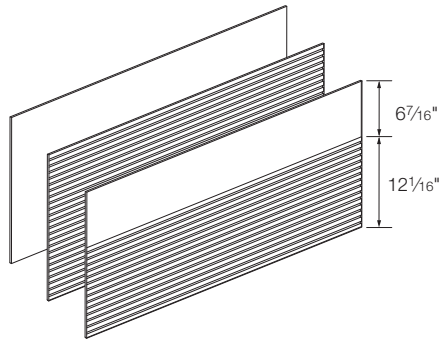

Tiles mount to the stanchions to provide visual privacy in two directions for all users. Tiles must be specified for both sides of the stanchion.

Tiles

For Floating-Surface Applications

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Details

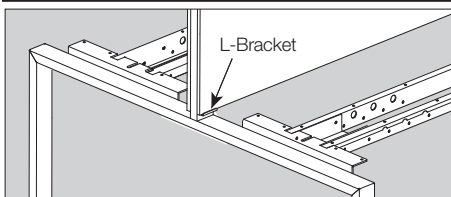

Tiles are 18½"H and available 36"–96"W (in 6" increments). Select from tackable fabric, slat and fabric/slat combination models.

Tackable fabric tiles are constructed of fiberglass and covered in fabric. Fabric is applied railroad style.

Slat tiles are powder-coated extruded aluminum. Slats are ¾"H with ½" space between each slat; total of 12 slats.

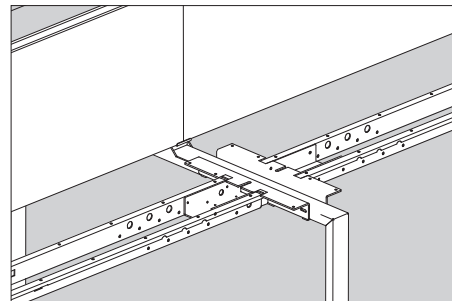

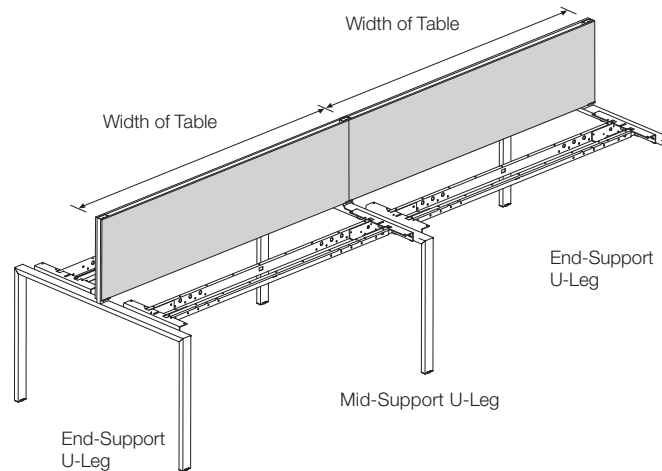

Fabric/slat tiles feature a nominal 6"H of tackable area above a 12"H of slat tile area with a total of 8 slats.

Connections

Tiles install into an L-shaped bracket that is part of the stanchion U-leg assembly.

Width of the tile aligns with the stanchion U-legs. For example, a 72"W tile is a true 72" dimension.

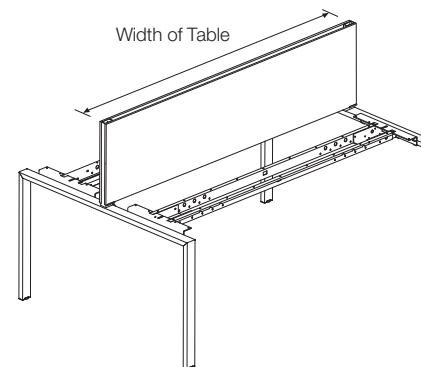

When tables are ganged together using the shared support U-leg, the tiles are centered relative to the mid-support stanchion. There is no dimensional creep.

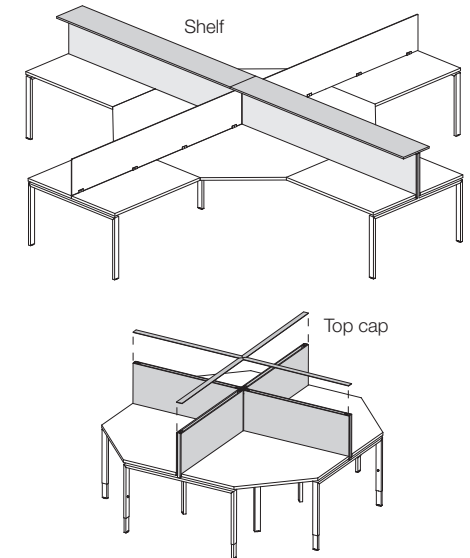

Slat tiles allow work tools to be placed in appropriate areas to accommodate individual needs. They accommodate all Kimball Office Perks work tools including monitor arm mounts.

Planning Factors

Tiles are required for both sides when using stanchion support U-legs. They do not need to be the same type of tile, but must be the same width.

Tiles must be specified the same width as the surface to mount correctly to stanchions.

When using tiles with stanchion support U-legs, either top caps, shelves or overheads must be specified to complete the top of the tile run.

Related Products

Perks single-monitor arms can be mounted on slat tile and fabric/slat tiles if spaced at least 24" apart. Maximum monitor weight up to 13 lbs.

➤ See the Perks Price List.

End Panels

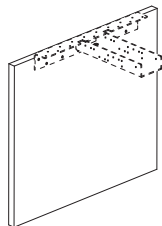

For Floating-Surface Applications

Details

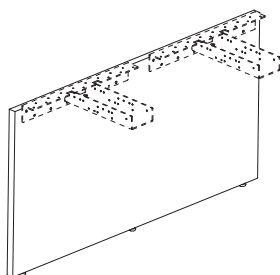

IMPORTANT: Only floating $1\frac{3}{16}$ " worksurfaces are for use with end panels for floating-surface applications. Priority worksurfaces for flush-surface applications and Systems worksurfaces are not applicable.

End panels are $1\frac{3}{16}$ " and available in both veneer and laminate. They are available multiple depths for use in either benching, open plan, or private office applications. End panels can be used in conjunction with other floating-surface supports, such as U-legs and open-frame legs.

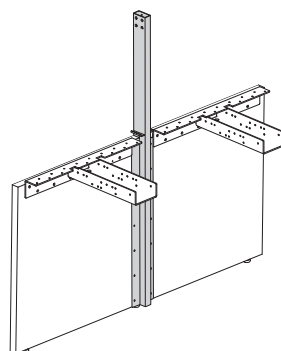

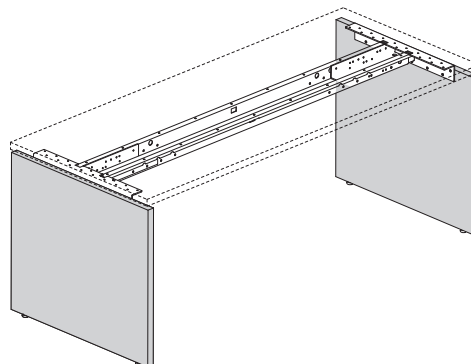

IMPORTANT: End panel illustrations on this page show end panels with a starter bracket, which must be specified separately.

24", 30", and 36"D end panels can be used for creating private office configurations.

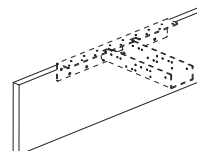

48" and 60"D end panels can be used to benching, collaboration, or conference environments.

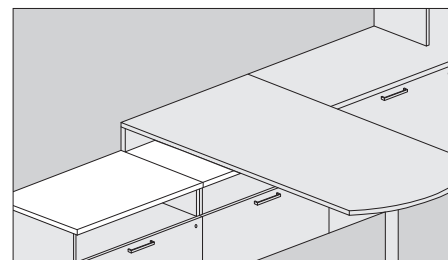

50"D and 62"D end panels are for use with end panel stanchion brackets (model 53KSSEPP), specified separately, to create dual sided benching applications. They are for use at the end of a run only.

Note: Stanchion bracket, model 53KSSDPP, cannot be used in this application.

5"H or 11"H end panels can be used to create layered applications with low height storage. 5"H model sits atop 22"H storage; 11"H model is for use with 15"H storage.

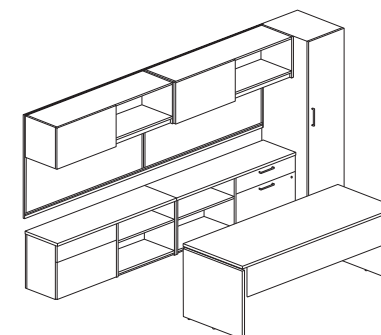

IMPORTANT: Component tops must be specified for low storage when short end panels will be placed on top for worksurface support.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Connections

Starter bracket must be specified separately for all end panel applications. Starter brackets are intended to be mounted $\frac{3}{4}$ " above the top edge of the panel to give the worksurface a "floating" appearance. Specify one starter bracket for 24"–36"D end panels; specify two starter brackets for 48"–62"D end panels.

➤ See page 77 for additional information.

Create conventional casegoods assemblies by specifying end panels, starter brackets, privacy screen used as a modesty panel, and undersurface support rails.

Planning Factors

Maximum run is dictated by the length of undersurface rails and the surface size.

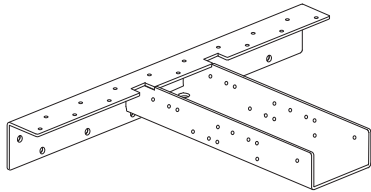

End panels are intended for use at the end of runs only not as a shared support.

Starter Brackets

For Floating-Surface Applications

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

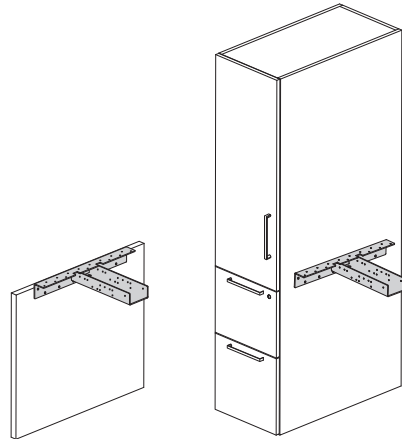

Details

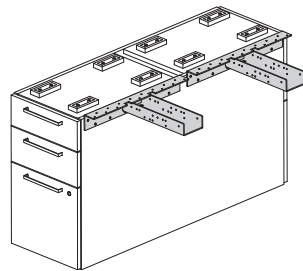

Starter brackets support many office configurations. This bracket connects to the undersurface support rails to provide support to surfaces. It is identical to, and performs the same function, as the brackets that are welded to U-legs and open-frame legs.

Starter brackets are the most versatile items in the Priority offering. Specify this bracket to begin or end an office layout with an end panel, pedestal or storage tower units. When used with an end panel, pedestal, or storage tower, this bracket replaces the need for leg support.

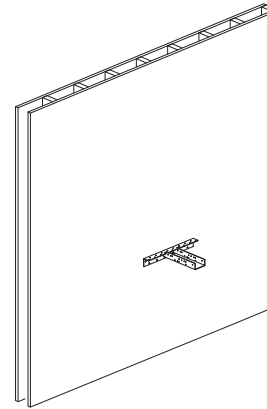

Connections

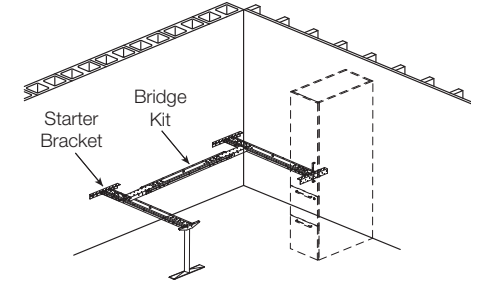

One bracket is required to connect to each set of undersurface support rails when using with 24", 30", and 36"D end panels or 36"D or smaller depth storage.

Two brackets are required when using 48", 50", 60", or 62"D storage or end panels.

Starter brackets can also be mounted directly to most interior walls, including steel or wood stud walls, masonry block, or solid masonry walls. **IMPORTANT:** It is the responsibility of the installer to ensure that the connection to the studs is adequate to support the worksurface load.

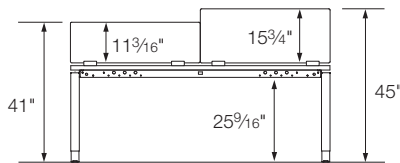

Wall-mounted starter brackets can be used in to create a U-configuration with a bridge kit between two surfaces. Connect the undersurface rails for the left and right surfaces to U-legs, open-frame legs, fixed T-legs, or any style of storage.

Resin Privacy Screens

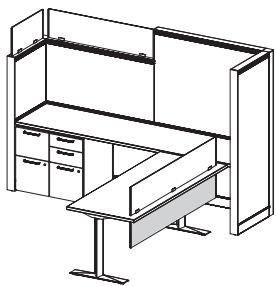

Details

Resin privacy screens provide visual privacy for users when in the seated position. Screens can mount onto worksurfaces in private office, benching, or height-adjustable table applications. Privacy screens are available in nominal 12" and 16"H models and in widths from 24"–90" (in 6" increments).

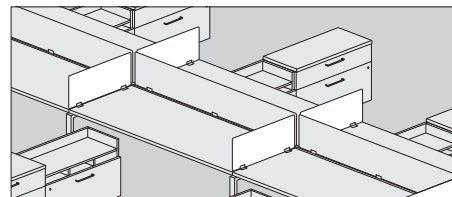

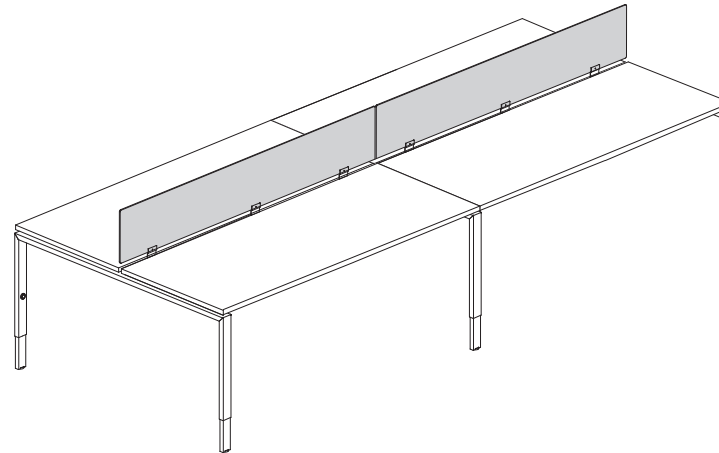

Screen material is ¼"-thick resin with a bullnose edge. Screens are available in three colors: Mist, Breeze, and Alpine White (upcharge applies). Both sides of the screen have a matte texture.

Two different heights provide different levels of visual privacy.

12"H screens can also be used as an undersurface modesty panel. When used with U-legs or open-frame legs, screens must be specified 6" smaller in width than the nominal worksurface width to allow proper clearance from legs.

End-support screens provide side-to-side visual privacy, and are available in 12" and 16" heights and 22", 28", and 34"W. They are sized 2" smaller in width than the nominal worksurface depth and are mounted inboard of the table legs.

Connections

Four bracket styles are available: freestanding, surface mount, square edge, and knife edge. Brackets are extruded aluminum and have a powder-coated finish. Brackets must be specified separately.

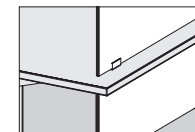

Freestanding brackets allow privacy screens to be placed freely on any surface or storage unit.

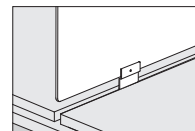

Surface-mount brackets can be used to mount screens above or below the worksurface. This bracket can also be used to mount screens to Priority top caps in benching applications.

Note: Using this bracket will deface the surface to which it is attached.

Square-edge brackets are for use in floating-surface applications on any worksurface with a softened rim, reed rim, or any worksurface with a wire manager. Bracket mounts under the worksurface to hold screen above the surface.

Note: Can be used in flush-surface applications if storage or support does not interfere with mounting.

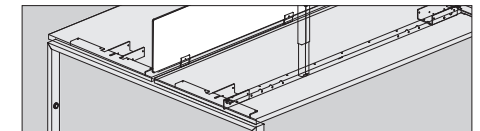

Statement of Line	➔ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Knife-edge brackets are for use in floating-surface applications on any knife-rim worksurface. Bracket mounts under the worksurface to hold screen above the surface.

Note: Can be used in flush-surface applications if storage or support does not interfere with mounting.

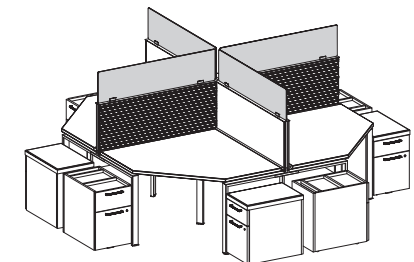

Planning Factors

Brackets should be placed 6" inward of either end and then evenly spaced for the remainder of the screen. For example, 72"W screen should have 27" between the center of each bracket.

Brackets are packaged in sets of two. Specify the number of brackets based on the screen size:

- 24"–54"W screens require 2 brackets
- 60"–78"W screens require 3 brackets
- 84"–90"W screens require 4 brackets

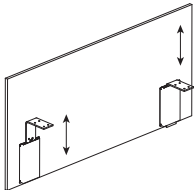

Add another layer of privacy with screens on top of Priority top caps or Xsite flat top caps using surface-mount brackets.

Accessories and work tools cannot be mounted on screens.

Click-Adjust Privacy Screens

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

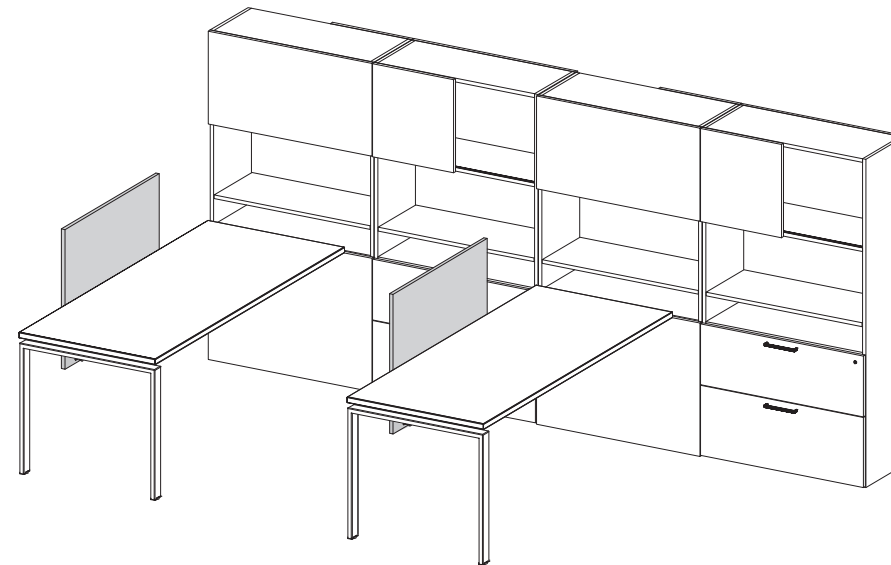

Details

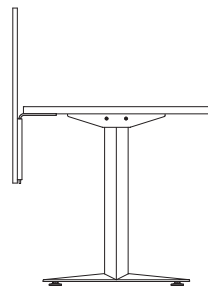

Click-adjust privacy screens are available in three widths: 36", 42", 48". They are constructed of ¾"-thick wood or laminate with a softened rim detail; finished on both sides.

Screen can be adjusted up or down to provide various heights of user-privacy. The screen features a mechanical ratchet mechanism that provides 4" of height adjustment in 1" increments. The height of screens adjusts from 12" above the worksurface to 16" above the worksurface and coordinates with the heights of the resin privacy screens.

At the 16" height position, the privacy screen will clear the underside of an overhead or shelf. The modesty section of the privacy screen varies in height from 7" to 11" depending on the position of the screen.

Connections

Click-adjust privacy screens can be attached to the underside of any style of table.

Planning Factors

Privacy screens do not accept accessories and work tools or carry load.

Take support placement into consideration when using the privacy screens.

Storage Overview

Low storage, overheads, highback organizers, and vertical storage can complement both flush-surface and floating-surface applications.

Undersurface storage models are specific for flush-surface or floating-surface applications.

Overheads, highback organizers, and set-on-surface storage are available in a variety of door selections.

Cable surround modesty panel conceals power and data below the surface and can also provide support.
➤ See page 68.

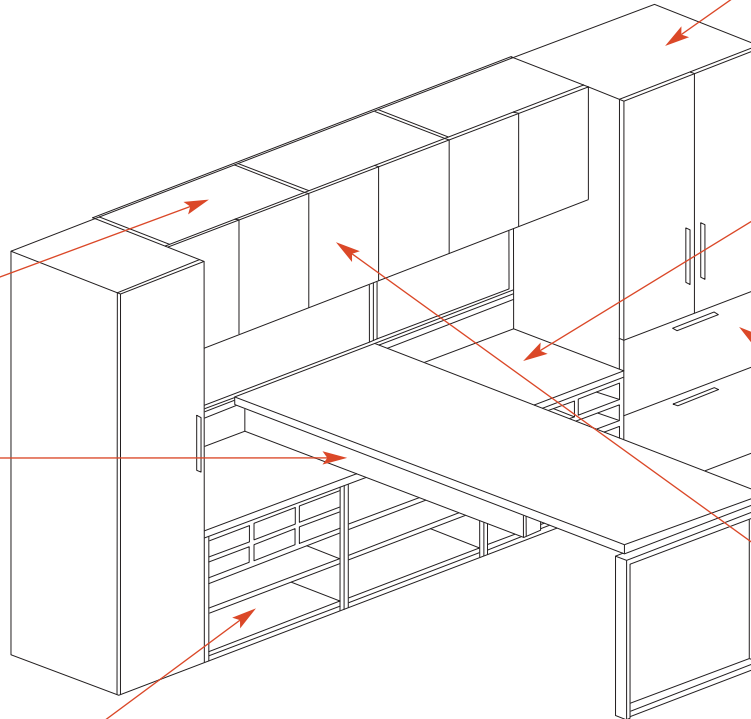

Utilize low storage for storage, extra work area, occasional seating and to divide space.

Vertical storage can be used in private office, open plan, and benching applications.

Low storage, when used with component work-surfaces and additional support such as a short end panels or cable surround modesty panel, can provide support for work-surfaces and create a layered affect to the workstation.

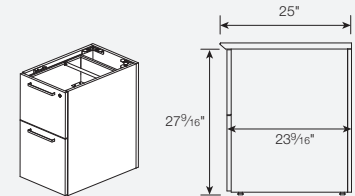

Face-mounted locks are optional on all storage doors and drawers.

Overheads can be wall-mounted or Traxx-mounted as shown here.

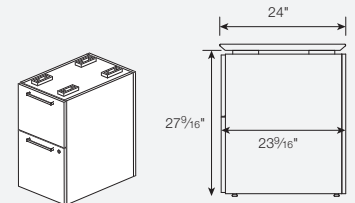

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Undersurface Storage:

Pedestals for flush-surface applications feature an open-top. The work-surfaces sits flush on top of the pedestal.
Note: Illustration shows knife-rim worksurface.

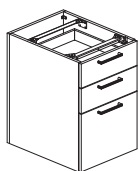

Pedestals for floating-surface applications feature spacers on top which suspend the worksurface for a floating appearance.
Note: Illustration shows knife-rim worksurface.

Undersurface Storage

For Flush-Surface Applications

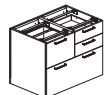

Details

IMPORTANT: Flush-surface storage is intended for use with worksurfaces and support for flush-surface applications, specified separately, unless otherwise noted. Flush-surface storage cannot be used with floating-surface knife rim worksurfaces.

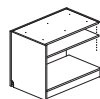

Flush-mount undersurface pedestals feature an open top or unfinished and a fully finished back panel. Pedestals connect directly to worksurfaces. Undersurface pedestals are available as:

- Box/box/file
- File/file
- Two-drawer lateral file
- Multi-file
- Hinged-door storage
- Printer/CPU storage

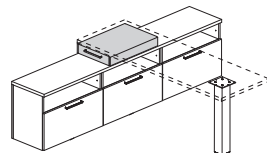

Multi-file units consist of two box drawers, open cubby or file drawer, and lateral file. Box drawers can be specified on the right or left of the unit.

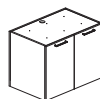

Locks are optional on all storage and located in the upper right corner of the top drawer face.

Printer/CPU storage organizes printers, CPUs, and paper for easy accessibility.

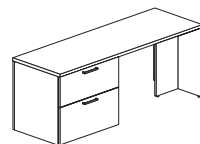

Support drawers and shelves can be used as support on top of low storage. 5"H support drawer unit is for use with 22"H low storage; 11"H support shelf is for use with 15"H low storage. They replace the need for a T-leg end panel as worksurface support on low storage. Component top for low storage must be specified.

30" and 36"D hinged-door pedestals include one fixed shelf and no cord openings.

Connections

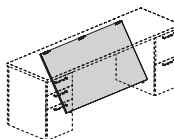

Use flush-surface storage with other flush-surface support to create a clean aesthetic.

Planning Factors

Undersurface storage can support the end of worksurfaces. Pedestal depth must match desk worksurface end depth.

Hinged modesty panel always spans between two pedestals or between a pedestal and an end-support panel. It cannot extend behind the back of a pedestal.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Pull Options:

➤ See page 53.

Locking Information:

➤ See page 54.

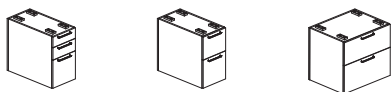

Undersurface Storage

For Floating-Surface Applications

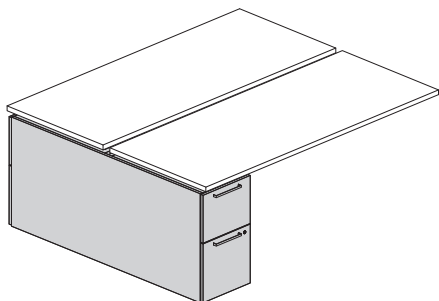

Details

IMPORTANT: Floating worksurfaces must be used with storage and support intended for use in floating-surface applications; however, undersurface storage identified for floating-surface applications may be used with worksurfaces for flush-surface applications.

3/4" silver-colored spacers on top of pedestals create a floating worksurface effect. Double-sided pedestals include a total of 8 spacers; regular depth pedestals have 4.

Undersurface pedestals with spacers are available in 24", 30", and 36"D x 15"W with box/box/file and file/file drawer configurations and 24"D x 30"W two-drawer lateral file; in wood or laminate. Chassis and door/drawer fronts on laminate models feature thermally fused laminate (TFL). Grain runs top to bottom. All units have finished backs and optional lock in bottom drawer.

Double-sided pedestals are a unique design to Kimball Office for creating 48"D or 60"D open-plan and benching applications. They create a clean aesthetic of one continuous end panel, eliminating the need to position two separate pedestals back to back and add filler panels to fill the gap.

Top of the double-sided pedestal features a 23/16" opening for cable routing.

Locks are optional on all storage and located in the upper right corner of the bottom drawer face.
➤ See page 54.

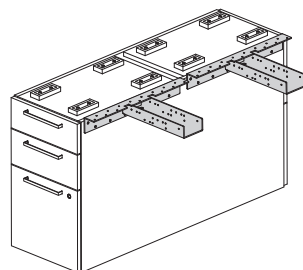

Drawer fronts are 3/4"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.

Drawer sides and back are 1/2" thick and wrapped in natural woodgrain vinyl. Bottoms are 3/16" thick.

Optional wood drawers are available on wood units. Drawer sides and back are 1/2" thick with veneer faces. Bottoms are 1/4" thick with veneer faces. Interiors are sealed, sanded, and finished with a clear durable topcoat.

Drawer suspensions feature black slides with precision steel ball bearings to ensure long-lasting, quiet, smooth operation. Box, file, and lateral file drawers feature full extension slides.

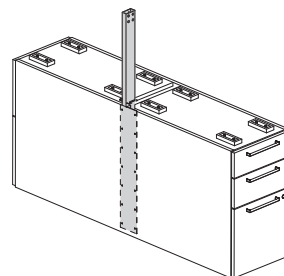

Connections

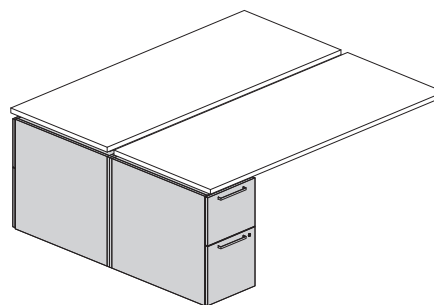

Starter bracket, specified separately, is required to connect pedestals to undersurface support rails and the worksurface.

- One starter bracket is required to connect to each set of undersurface support rails when using with 24", 30", and 36"D surfaces or 36"D or smaller depth storage.

- Two brackets are required when using 48"D or 60"D storage or surfaces.
➤ See page 77.

Pedestal stanchion bracket, (model 53KSSDPP) specified separately, is available for use with the 50" and 62"D double-sided pedestals. Double-sided pedestal models for use with stanchions bracket are deeper than the non-stanchion models (48" and 60"D). The difference accommodates two 24" or two 30"D worksurfaces in addition to the thickness of the stanchion plus two tiles for either side of the stanchion. The pedestal stanchion bracket aligns with stanchion support legs and features a vertical member that supports fabric tiles, slat tiles and fabric/slat tiles. Overhead/shelf brackets, specified separately, connect directly to the stanchion, to support center-mount overhead or shelf.

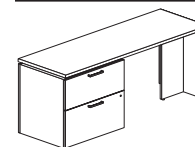

Two pedestals can be used in a back-to-back application; however, a double-sided pedestal is

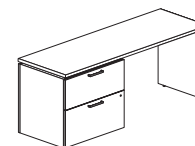

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

recommended for a clean visual. A stanchion bracket could not be used in the two-pedestal application.

Planning Factors

If using floating-surface storage to create a workwall with flush-surface support on the opposite end, starter brackets and undersurface support rails are not required if the unsupported span is 48"W or less.

If using storage to create a workwall with a continuous floating-surface effect, use pedestals with spacers in conjunction with appropriate surface support such as:

- Worksurface
- End panels with starter brackets
- U-legs or open-frame legs
- Undersurface support rails (required)

Mobile Pedestals and Low Storage

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Details

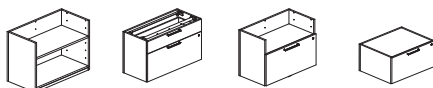

Mobile pedestals and low storage units are available in wood or laminate and are finished on all sides. Laminate units offer flexibility in color selection in on drawer fronts, back and chassis. This option enables you to utilize storage elements to create an environment to meet your brand and image.

Mobile cushion-top pedestal provides occasional seating as well as storage. The 24"H box/file mobile pedestal easily stows under surfaces.

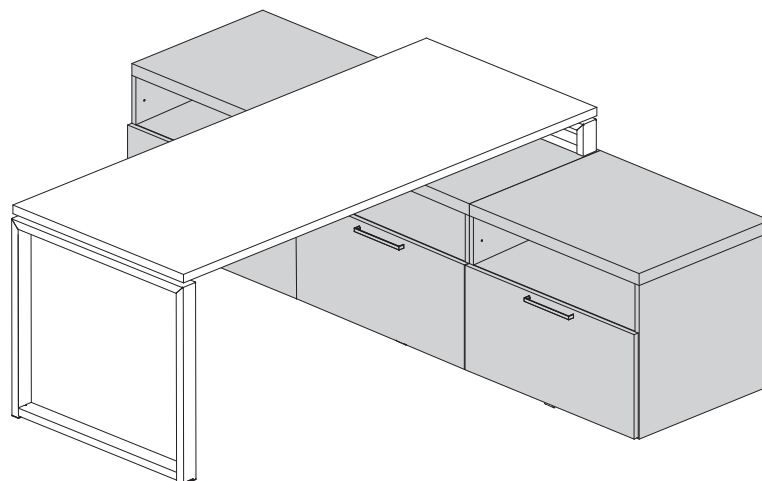

Mobile box/box/file and file/file pedestals stow under surfaces in flush-mount applications only. **IMPORTANT:** In applications with an undersurface support rail, these pedestals will not fit underneath the worksurface; however, they can be used next to the surface.

23"H active file provides two divided sections in the top area to place papers and folders for easy access to work-in-progress. The open slot in the rear of the pedestal allows for hanging Pendaflex® folders for hot project files. Active file easily stores under the worksurface.

Low storage is available freestanding or mobile. Units are available in two heights (15³/₁₆" and 21³/₈"H), two widths (30" and 36"W), and in two depths (16" and 24"D). Low storage is available in a variety of configurations, including open bookcase, open/lateral file and box/lateral file.

Mobile low storage units feature inset casters enabling the mobile and freestanding units to align

when sitting next to each other. Mobile low storage cannot be used to support worksurfaces or other storage.

Low storage bottom drawers align with other Priority storage units to keep a consistent visual within the office.

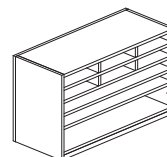

Anti-tip mechanism is standard on all mobile pedestals and low storage with drawers. Mobile low storage units also include counterweights.

Lock is optional and is located in the upper right corner of the bottom drawer. Lock in bottom of active file locks both box and file drawer. ➤ See page 54.

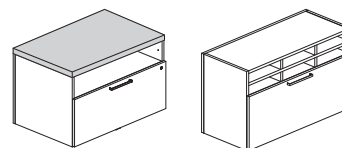

Connections

Use component tops to span multiple low storage units for a cleaner aesthetic.

15"H open bookcase features three holes spaced 3³/₁₆" apart and accepts either three straight or organizer shelves, specified separately.

22"H open bookcase features a fixed shelf. There are two holes spaced 3³/₁₆" apart above the fixed shelf to accept either two straight or organizer shelves. There are 3 holes below the fixed shelf to accept either three straight shelves or organizer shelves, specified separately.

22"H open/lateral file unit accepts either two straight or organizer shelves in open area. If using as a pedestal cushion or component top with an open/lateral, shelves cannot be used in the top position.

Planning Factors

Component tops in either softened or knife rim are required for the box/lateral file units. Knife rim component tops extend 1/4" beyond the drawer fronts.

If using low height storage in conjunction with end panels for support, 1³/₁₆" component tops are required to span the low storage. 5" or 11" end panels are then placed atop the storage and properly align to undersurface height.

If using low height storage as freestanding units, component tops are required for the box/lateral unit but not required on other units.

Low storage cushion, specified separately, is the same thickness as component tops (1³/₁₆") for visual alignment. In depth, the pedestal cushion aligns with the drawer fronts on the low height storage. ➤ See page 171.

Open areas in the low storage accept either straight or organizer shelves. Organizer shelves should be installed with the organizer leg pointed downward. To add color contrast to units, specify shelves in different finish or material than the low storage unit. ➤ See page 170.

33"H highback organizers can be used above freestanding, fixed-height low storage with component tops to divide space and provide additional storage. ➤ See page 86.

If using 24"D low storage in a freestanding application without component tops or with a high-back organizer, pedestal ganging bracket (KACGB1) is recommended. If using 16"D low storage in a freestanding application, ganging bolts are recommended.

Wall-Mount or Traxx®-Mount Overhead Storage

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Details

Overhead storage cabinets are 16"D and with wood or laminate chassis.

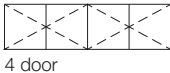

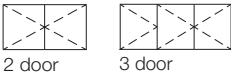

Sliding-door overhead cabinets are 16"H and available in widths from 30"–72". They feature one non-locking, solid or writable glass door that can slide from side to side. One side of the unit will be open at all times; center panel divides the space.

Hinged-door overhead cabinets are available in 30", 36", 48", 60", 66", and 72" widths. These 19"H units offer solid, opaque glass, or writable glass doors.

Lock is optional on hinged laminate or wood door models. Glass doors are non-locking.

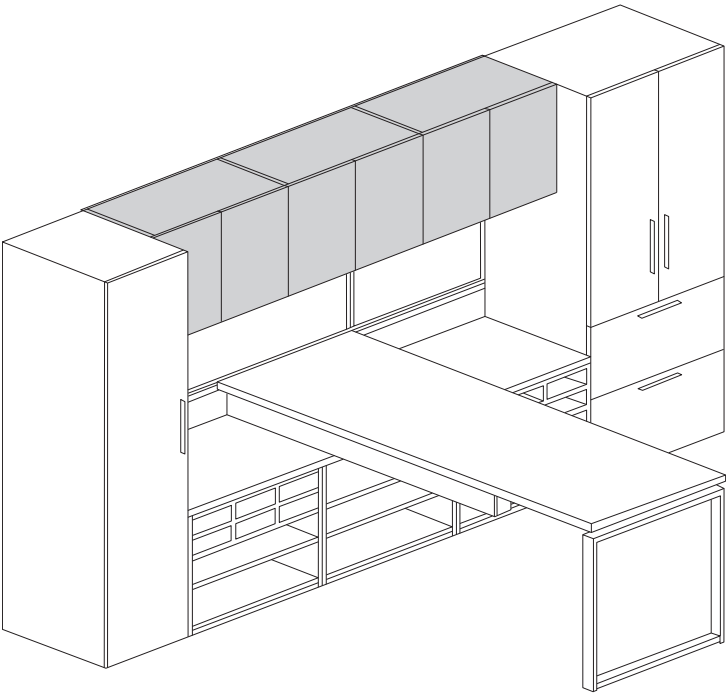

➤ See page 54.

Hinged-Door Configurations:

- 30"W and 36"W overhead storage cabinets have 2 doors.
- 48"W overhead storage cabinets have 3 doors.
- 60"–72"W overhead storage cabinets have 4 doors.

Note: A support panel divides the interior into separate sections as indicated above.

Finished inset top, finished bottom, and apron rail conceal lighting.

Wood hinged four-door models feature one set of doors with matching grain pattern; laminate models feature two sets of two-doors that match.

Back panels are inset between the end panels on both wall-mount and Traxx-mount models for a neat appearance.

Connections

Overhead storage cabinets can be Traxx or wall mounted. 30"W overheads must be supported by at least two solid attachment points on a wall. 36"W must be supported by at least three solid

attachment points on a wall. 48", 60", 66", and 72"W overheads must be supported by at least four solid attachment points on a wall.

Wall-mount models include attachment brackets and rail.

Traxx-mount models include an attachment bracket. Traxx and tiles must be specified separately.

Related Products

Interior shelves, specified separately, are available for wall-mount sliding door overheads to enhance organization.

➤ See page 174.

Glass Pattern/Door Frame Finish:

- Opaque Frost glass (11) with Silver Frost frame (510); available on hinged-door models only
- Ice Gloss Writable Glass (202G) with Silver Satin frame (511)

Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.

Center-Mount Overhead Storage

For Use in Floating-Surface Benching Applications

Details

IMPORTANT: Center-mount overhead storage is intended for use with benching stanchions, unless otherwise noted.

Center-mount overhead cabinets are available in 30"–72"W (in 6" increments) with hinged doors or sliding door. Units are finished on all sides; flat bottom.

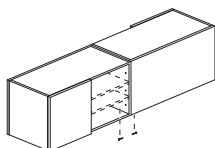

Hinged wood four-door models feature one set of grain pattern matching doors; laminate models feature two sets of two-doors that match in grain pattern. Lock is optional on hinged-door models. ▶See page 54 for locking information.

Sliding-door units feature one door and center divider panel. These units accept five ¾"-thick interior shelves spaced 1¼" apart. Shelves intended for use on the open side of the sliding door unit, specified separately.

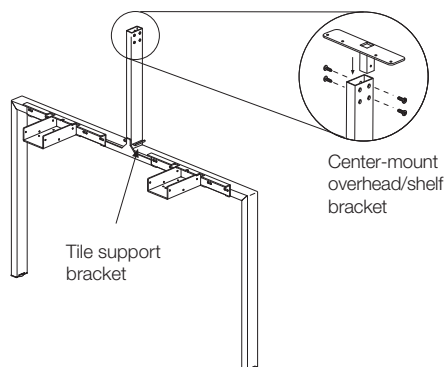

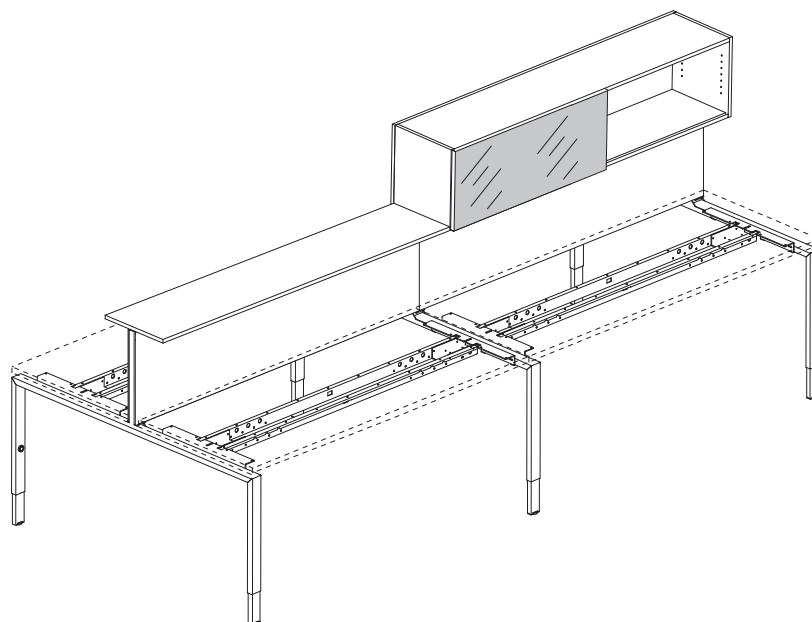

Writable glass models features thin aluminum frame finished in silver satin metallic; non-locking.

Center-mount shelves are available in 30"–96"W (in 6" increments), as well as models for use on 90° and 120° frames. Units have a finished top and bottom and feature a softened rim on all four sides of the shelf.

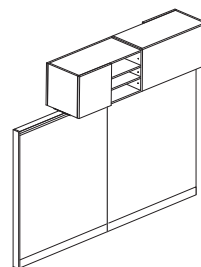

Connections

Center-mount cabinets can be ganged with the units facing the same direction side to side or facing opposite directions (shown above). Four ganging bolt assemblies ship standard with each model. *Note: Center-mount shelves and cabinets cannot be ganged to each other.*

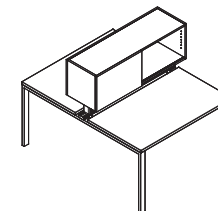

Overhead/shelf bracket (53KBP), specified separately, is required at each stanchion intersection. Sold in a set of two.

Center-mount storage can be mounted on top of Xsite panels using two Xsite transaction counter support brackets. Overheads must be the same length or longer than the frame it will be placed over. For example, a 48"W center-mount overhead can be mounted above a 30"W Xsite frame; however, a 30"W center-mount overhead cannot be mounted onto a 48"W Xsite frame. Not for use on Xsite stackable panels. ▶See the Systems Price List for other guidelines.

Statement of Line	▶See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Center-mount storage can be mounted to Xsede accessory rail using an Xsede stanchion kit (53KSKOP). Overhead can be any width.

Planning Factors

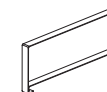

Multiple units can be ganged and then connected at the stanchion intersection. For example, two 36"W center-mount overheads can be ganged in opposite directions above a 72"W surface, and then connected to the stanchions as an assembled unit.

Shelves and overheads cannot be mixed between stanchions, but can be specified to align at the stanchion intersection (see illustration at left).

On laminate units 60"W and greater, the grain on the back panel runs horizontal.

Related Products

Interior shelves may be specified separately.

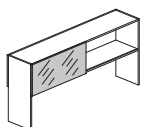

Shelf divider Shelf divider provides further organization to shared materials stored on center-mount shelves. Shelf divider, made of powder-coated metal, slides onto the center-mount shelf and attaches to the underside of shelf.

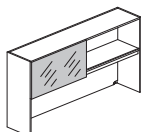

Expo or Expo2 dry-erase markers are recommended for use on writable glass doors.

Details

Sliding-door highback organizers feature a wood or laminate chassis and one non-locking, solid or writable glass door that can slide from side to side. One side of the unit will be open at all times; center panel divides the space.

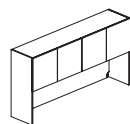

33"H sliding-door models are available in 60", 66", or 72" widths. Back is finished and the area below the cabinet is open for use in open plan applications.

38"H sliding-door models are available in 60", 66", 72", 90", and 96" widths. Back is unfinished and is for use in private office applications. Back panel features three black plastic grommets with cover (one at top center and one in each lower corner).

Grain direction on laminate backs 60"W or wider runs horizontally.

Hinged-door highback organizers are available in widths ranging from 60"–108"; they are 38"H (nominal). Back is unfinished for use in private office applications. These units are offered with solid, opaque glass, or writable glass doors.

4 door

6 door

Hinged-Door Configurations:

- 60"–72"W overhead storage and highback organizers have 4 doors.
- 90"–108"W highback organizers have six doors.

Note: A support panel divides the interior into separate sections as indicated above.

Lock is optional on hinged laminate or wood door models. Glass doors are non-locking.

➤ See page 54.

Wood hinged four-door models feature one set of doors with matching grain pattern; laminate models feature two sets of two-doors that match.

Finished, inset top and apron rail conceals lighting.

Back panels on overhead storage cabinets are inset between the end panels on both wall-mount and Traxx-mount models for a neat appearance.

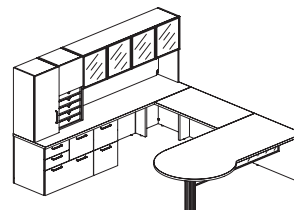

Connections

33"H highback organizers can be used above freestanding, fixed-height low storage with component worksurfaces to divide space and provide additional storage.

➤ See dimensions and illustrations at right.

Highback organizers require proper support, such as non-adjustable legs, end panels, or pedestals directly under the worksurface where the end panel of the highback rests.

Planning Factors

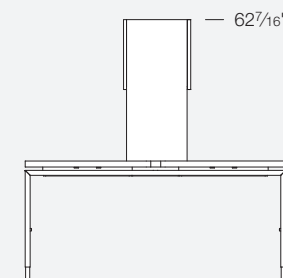

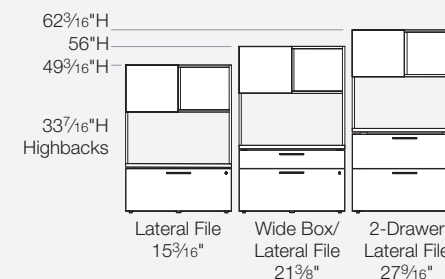

Highback organizers can be specified with set-on-surface storage to create a variety of configurations.

Related Products

38"H highback organizers accept slat tiles or tackboards, specified separately.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Dimensions:

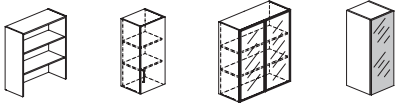

Glass Pattern/Door Frame Finish:

- Opaque Frost glass (11) with Silver Frost frame (510); available on hinged-door models only
- Ice Gloss Writable Glass (202G) with Silver Satin frame (511)

Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.

Set-on-Surface Storage

Details

Set-on-surface bookcases are for use on top of worksurfaces. Chassis is 16"D and available in wood or laminate. Single-door, double-door, and open bookcase models feature two ¾"-thick shelves; top shelf is adjustable.

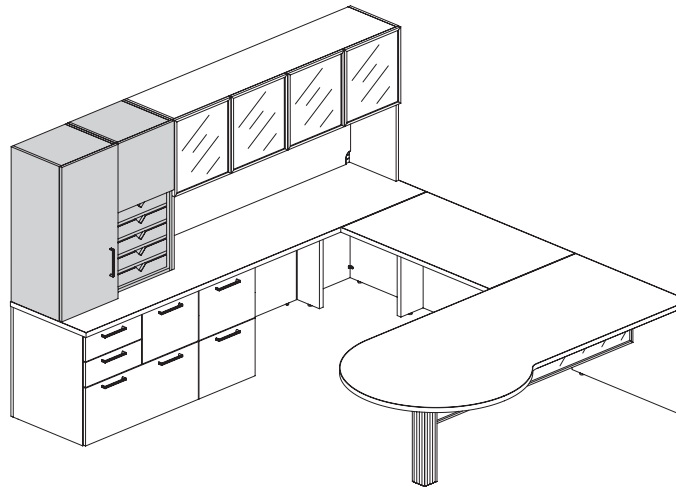

Set-on-surface organizers can be used in conjunction with set-on-surface bookcases, highback organizers, and overheads.

Doors are available in solid, opaque glass, and writable glass options.

Lock is optional on hinged laminate or wood door models. Glass doors are non-locking.
➤ See page 54.

Connections

Ganging adjacent units is recommended.
Ganging bolts are included.

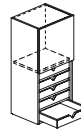

Planning Factors

Set-on-surface models align with highback organizers for a clean aesthetic.

Nominal widths of 15", 18", 30", and 36" can be used together to create a workwall. Bookcases and organizers can be used together.

IMPORTANT: Set-on-surface storage is not intended for freestanding applications.

Related Products

Project trays, specified separately, are available for use in 18"W set-on-surface organizer models; they will accommodate up to five project trays.

➤ See page 188.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Glass Pattern/Door Frame Finish:

- Opaque Frost glass (11) with Silver Frost frame (510); available on hinged-door models only
- Ice Gloss Writable Glass (202G) with Silver Satin frame (511)

Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.

Lateral Files, Shelving Units, and Bookcases

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Details

IMPORTANT: Lateral files with open tops must be used with flush-mount modular worksurfaces, specified separately. They cannot be used with floating worksurfaces with a knife rim.

Three-drawer and four-drawer lateral files with open top are available. These models have an unfinished back.

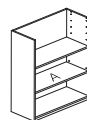

Finished top two-, three-, and four-drawer lateral files feature an interlock mechanism that allows only one drawer to be open at a time. Two-drawer units feature a finished back; three- and four-drawer units have an unfinished back.

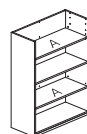

Lock is optional on all storage and located in the upper right corner of the top drawer face.

➤ See page 54.

Freestanding shelving units are available in 42" or 50"H with finished backs. Shelves are $\frac{3}{4}$ " thick. These units align with other vertical units and can be used to divide space as well as provide storage. Top section accepts straight and organizer shelves or can remain open for binder storage.

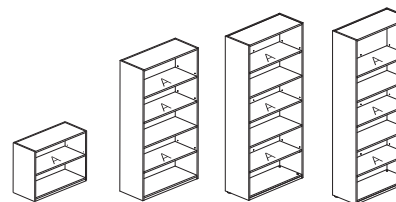

42"H shelving unit accepts up to four organizer shelves and one straight shelf. Straight shelf must always be used in top position. One adjustable shelf can be positioned up or down $1\frac{1}{4}$ "; shelves are $\frac{3}{4}$ " thick. $11\frac{7}{8}$ " shelf openings when shelves are in center position (excluding top section). Accommodates five straight shelves or four organizer shelves, and/or component top.

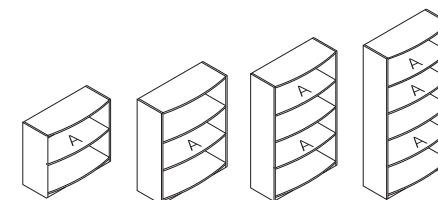

50"H unit accepts up to two organizer shelves and one straight shelf. Straight shelf must always be used in top position. Two adjustable shelves can be positioned up or down $1\frac{1}{4}$ "; shelves are $\frac{3}{4}$ " thick. $11\frac{7}{8}$ " shelf openings when shelves are in center position (excluding top section). Top area holds two organizer shelves or three straight shelves, and/or component top.

Freestanding bookcases are available with arc front or straight front in laminate or wood. These units have finished inset tops and unfinished backs. Shelves are $\frac{3}{4}$ " thick. Both straight and arc front models are $35\frac{7}{8}$ " wide and feature $11\frac{7}{8}$ " shelf openings when shelves are in center position unless otherwise noted.

Straight front units are $15\frac{3}{16}$ "D and feature adjustable shelves as noted below that can be positioned up or down $1\frac{1}{4}$ ".

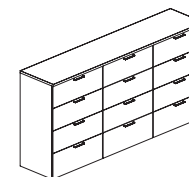

- Two-shelf unit features one adjustable shelf and is $27\frac{9}{16}$ "H.
- Five shelf unit features three adjustable shelves and is $66\frac{7}{8}$ "H. Top opening is $13\frac{3}{8}$ ".
- Six-shelf unit is available in two heights: $79\frac{3}{16}$ " or 84". Both units offer three adjustable shelves. 79"H unit has $13\frac{3}{8}$ " opening in top position while the 84" model has a $17\frac{15}{16}$ " top opening. 84" ships with a tip-resistant kit and must be attached to a wall.

Arc-front bookcases feature shelves that extend 3" beyond the $15\frac{13}{16}$ " end panels.

- Two shelf unit is $27\frac{5}{8}$ "H with one adjustable shelf.
- Three shelf unit is $40\frac{1}{4}$ "H with one adjustable shelf.
- Four shelf unit is $35\frac{7}{8}$ "H with two adjustable shelves.
- Five shelf unit is $52\frac{7}{8}$ "H with three adjustable shelves.

Connections

Ganging adjacent lateral files is recommended.

Planning Factors

Pull options

➤ See page 53.

Filing capacities

➤ See page 55.

Vertical Storage

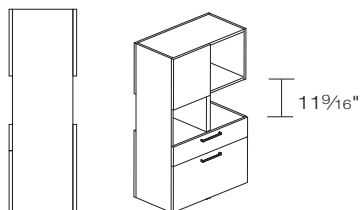

16"D

Details

16"D vertical storage is available in space divider and bookcase/lateral file models. Both are offered in laminate or wood.

Lock is optional on vertical storage models and located in the upper right box drawer of spacer dividers and in the upper right top lateral file on other units. Glass doors are non-locking.

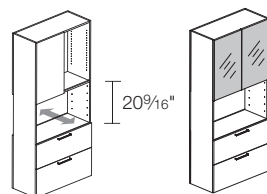

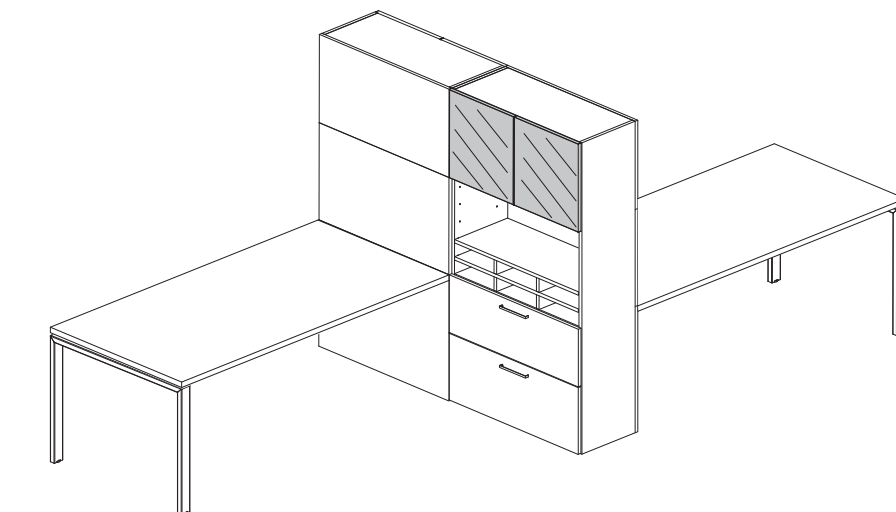

➤ See page 54.

Space divider vertical storage units provide storage as well as side-to-side privacy. These units can be positioned so that the overhead section spans above the worksurface while the box/lateral file spans below the surface; open area is 11 9/16". Units are 16"D x 29 1/16"W and 48 7/8"H and available in left or right orientation. Units feature a two piece, non-matched back panel set for the upper and lower sections.

Each space divider unit consists of:

- Bottom section with a wide box/lateral file with lock in bottom drawer; anti-tip device is standard in bottom drawer.
- Middle section with cubby area on one side and open area on the other.
- Top section with hinged door on one side and cubby area on the other.

Bookcase with two-drawer lateral files are available in nominal heights of 50", 67" and 80"H in wood or laminate. Lock in top drawer position. These units can be used to divide space in open plan areas. Units feature finished backs with finished inset top. Full back units for the 67" and 80"H units feature three-piece matched back panel set. Partial back units have open center sections and feature two-piece non-matched back panel sets.

All bookcase vertical storage models accept straight or organizer shelves in 20 9/16"H center

area, specified separately. 50"H units feature bookcase area with five holes spaced 3/4" apart. 67" and 80"H units feature center section with five holes spaced 3/4" apart.

Top section with center divider is available with one sliding door (non-locking) or two hinged doors in wood, laminate or writable glass. Hinged doors feature pulls in vertical position with locking or non-locking doors. Top section has 7 holes on 67"H model or 17 holes on the 80" model, spaced 1/4" apart to accept straight interior shelves for additional organization.

Connections

IMPORTANT: All units must be ganged with provided ganging bolt and are not intended for use as a single, freestanding unit.

Starter brackets, specified separately, can be attached to back of unit. Starter brackets connect to undersurface support rails to support surfaces,

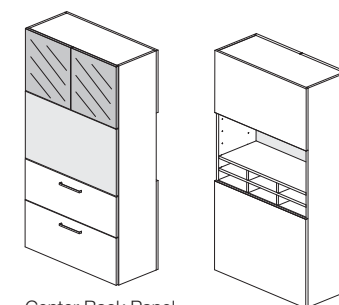

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

displacing the need for a support leg on that side. Storage unit will be defaced.

➤ See page 77 for starter bracket planning information.

Planning Factors

Units are designed so that the middle sections align with worksurface heights; see illustration at left.

Center Back Panel
Installed on Opposite Side

Specify back panels separately in a different material or finish to add a band of color to the center section to create a non-monochromatic aesthetic. Center back panels on full-back models can be removed in the field and replaced with another in a different material or finish, or moved to the front of the unit, exposing the center section to the opposite side.

Pull options

➤ See page 53.

Filing capacities

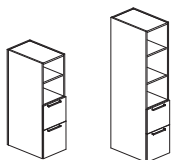

➤ See page 55.

Vertical Storage

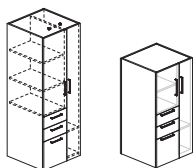

24" and 30"D

Details

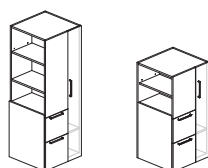

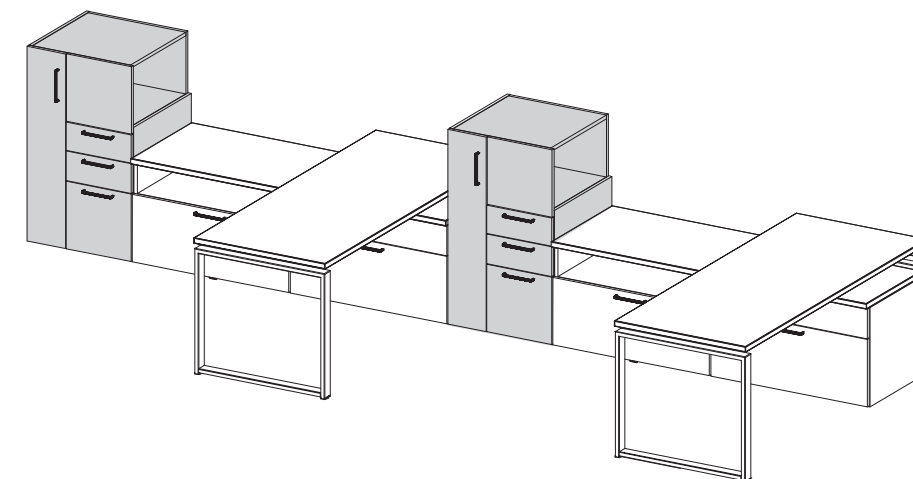

24" and 30"D vertical storage is available in a variety of shelf, door, drawer, and wardrobe configurations.

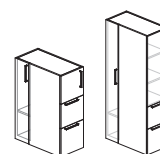

Open bookcase with letter-width file drawers have finished inset top and are 23½"D and 14¹⁵⁄₁₆"W. Three height options: nominal 42" and 50"H units have finished backs and one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf.

Front access vertical storage towers with finished inset top are available in left or right configurations and in nominal heights 42", 50", and 67". Nominal 42" and 50" H units have finished backs for use in open plan. Select from either box/box/file or file/file letter width drawer options with lock. Shelf storage above drawers include and one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf. Wardrobe area in applicable models includes removable coat rod and one fixed shelf 12" above bottom panel; interior width is 7⁷⁄₈"W. Door pulls are in vertical application.

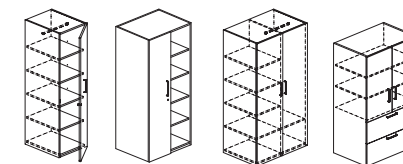

Side-access bookcase vertical storage towers with finished inset top are available in left or right configurations and in nominal heights 42", 50", and 67". Nominal 42" and 50"H units have finished backs for use in open plan. Select from either box/box/file or file/file letter width drawer options with lock. Shelf storage above drawers includes one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf. Wardrobe area includes removable coat rod and one fixed shelf 12" above bottom panel; interior width is 7⁷⁄₈"W. Door pulls are in vertical application.

Side-access wardrobe units are 29¹¹⁄₁₆"D and are intended for end-of-run applications with wardrobe sections facing outward in left or right configurations. Available in nominal heights of 42", 50", and 67" with finished inset tops. 42" and 50" units have finished backs for use in open plan; 67" units have unfinished backs. Units are 15"W with either letter width box/box/file or file/file configurations with optional lock. Front-access single-door storage area has one adjustable shelf on 50"H units; and one fixed and one adjustable shelf in 67" units. Wardrobe area is 7⁷⁄₈"W; 42" wardrobe has one coat hook while the 50" and 67" units contain removable coat rod and fixed shelf 12" above bottom panel.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Single- and double-door units are 68"H nominal heights feature combinations of shelf storage. Single-door units are 18" or 30"W nominal with left or right hinged doors with shelf or wardrobe storage. Double-door units offer combinations of shelves and lateral file or shelves and wardrobe.

Lock is optional.
➤ See page 54.

Connections

Starter brackets, specified separately, can be attached to back of unit. Starter brackets connect to undersurface support rails to support surfaces, displacing the need for a support leg on that side. Storage unit will be defaced.
➤ See page 77 for starter bracket planning information.

Planning Factors

When using storage in place of support legs, be aware of starter bracket location. In floating-surface applications, bracket is mounted ¾" higher than in flush-surface applications.

Pull options
➤ See page 53.

Filing capacities
➤ See page 55.

Fixed-Height Table Bases

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

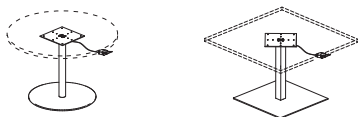

Details

Base requirements differ based on the table top shape and size.

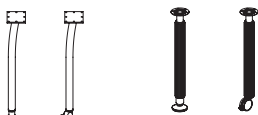

➤ See page 92 for base requirements.

Cylinder base is available in wood or laminate. For use with round, square, and racetrack tops. Specify two for racetrack tops.

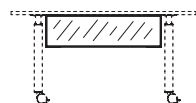

Round and square bases are available in fixed and adjustable-height (gas lift) models. Height-adjustable models are standard with a release paddle for field installation on the underside of the top. Adjustment range is 16" from 26"–42"H. Accepts round 36" or 42" 1³/₁₆" table tops only; neither base accepts casters.

Column legs are specified singly and are available in static model with glide or mobile model with locking caster. They are available in a paint finishes or chrome. These can be used to support table tops or as support at the end of a worksurface.

Adjustable-height column legs feature a fluted surface and are available in cinder, platinum metallic, or silver frost metallic finish. Static model or mobile model with locking caster are available; both models may be set to heights ranging from 25³/₄"–34⁵/₈"

(without top) to allow the table to nest under other worksurfaces or tables. Mobile models are not applicable to 36" round top. Standard model includes set of four legs.

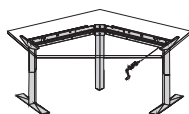

Modesty panels are available to attach to the underside of 36" x 72" racetrack or 40" x 72" elliptical table tops. They feature a metal frame with silver frost finish and an opaque frost glass insert.

Select table bases, available as part the Kimball Office tables offering, are available for use Priority table tops:

- 24"-diameter cylinder base (CBS2724CYL)
- 16" soft-square (CBS1627SSW)
- 16" square (CBS1627SQW)
- 24" square (CBS2427SQW)

➤ See the Meeting & Collaboration Price List to specify.

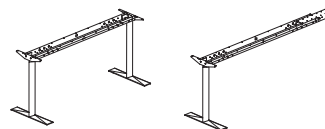

Fixed-height T-leg and post-leg style bases

are the same height as height-adjustable bases, but with no height adjustability. Fixed-height T-leg bases are applicable to rectangular worksurfaces or racetrack table tops. Fixed-height 90° and 120° bases (shown above) are applicable to 90° and 120° worksurfaces, respectively. These bases ship ready to assemble. Plastic leveling inserts located at the bottom of the feet provides 1" of adjustment.

Aluminum foot on T-legs can be specified in polished (upcharge applies) or in a contrasting color from the column. The maximum kneespace clearance is 20⁹/₁₆".

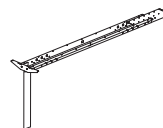

➤ See the pricing pages for the size of base required based on the table top size.

Fixed-height T-leg bases, for use with 24", 30", and 36"D worksurfaces, consist of one or two T-legs with feet and a set of undersurface support rails that run underneath the center of the worksurface. Return mounting bracket is included with the return model. Specify two flat brackets separately for return applications.

Maximum load*: 400 lbs. BIFMA/670 lbs. UL
Max. load L-config*: 775 lbs. BIFMA/1300 lbs. UL

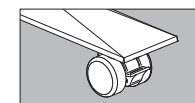

*Maximum load for tables with casters is 120 lbs.; applies to all table base types.

Fixed-height extension post-leg bases consist of one or post-leg and a set of undersurface support rails that run underneath the center of the worksurface. They are intended for use as a return base. Depending on the depth of the main worksurface and the depth of the extension worksurface, the post will be inset approximately 12"–15" from the end of the extension worksurface. Return mounting bracket is included. Specify two flat brackets separately for return applications.

Maximum load*: 400 lbs. BIFMA/670 lbs. UL
Max. load L-config*: 775 lbs. BIFMA/1300 lbs. UL

*Maximum load for tables with casters is 120 lbs.; applies to all table base types.

Field installed caster kits for T-leg bases are available for tables up to 36"D and 96"W.

➤ See page 221.

Note: Casters are not directly applicable to a 3-leg 90° or 120° base with center post. To create a mobile 3-leg table, order two caster kits, a return foot kit model 53KFKTR for the post leg, and hardware bag #2417313 (service parts) for screw to attach the foot and casters.

Height-Adjustable Tables Overview

For Floating-Surface Applications

Height-adjustable tables

are created by selecting floating worksurfaces and a height-adjustable base.

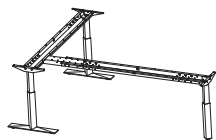

Table bases are available in stand-alone models, returns, and extension post-leg.

Manual-adjust bases are available in incremental, click, and crank models.

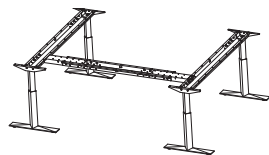

Electric-adjust bases are available in single- and dual-stage models.

Expandable cable manager is ideal to manage cords below height-adjustable tables.

Table Configurations:

- L Configuration** (non-handed)
- Main T-Leg Base
 - Post-Leg Extension

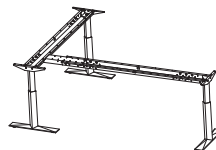

- U Configuration**
- Two Main T-Leg Bases
 - Bridge Mounting Kit

- 90° Corner**
- 90° Base (includes two T-Legs and a corner post leg)

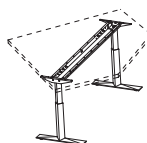

- 120° Corner**
- 120° Base (includes two T-Legs and a corner post leg)

- L Configuration** (non-handed)
- Main T-Leg Base
 - Return T-Leg Base

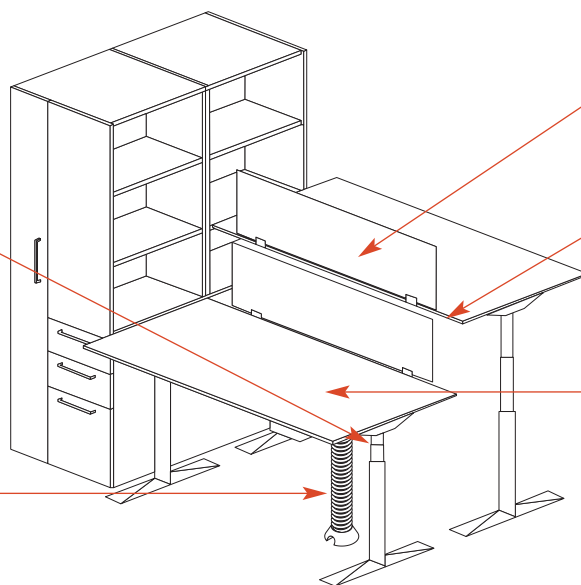

- Rectangle**
- Main T-Leg Base

- 90° Corner**
(alternate configuration)
- Main T-Leg Base

- 120° Corner**
(alternate configuration)
- Main T-Leg Base

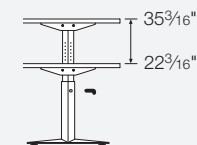

Resin privacy screens and modesty panels can be specified for privacy.

Consider possible pinch points when using height-adjustable tables within your workstation.

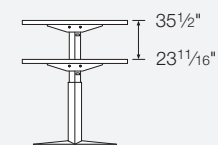

Worksurfaces, specified separately from the bases, are not undersized.

Height-Adjustable T-Leg Table Bases

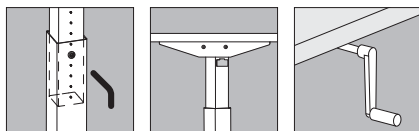

Manual Adjust for Floating-Surface Applications

Details

IMPORTANT: Only floating-surface Priority 1 $\frac{3}{16}$ " worksurfaces are for use with height-adjustable table bases. Worksurfaces for flush-surface applications and Systems worksurfaces are not applicable.

Height-adjustable T-leg table bases consist of one or two T-legs and a set of undersurface support rails that run underneath the center of the worksurface. Return T-legs include a return bracket for connecting to a main base at a 90° angle. Bases ship ready to assemble.

Manual-adjust bases are available in three styles: incremental, click, and crank. The T-legs on manual bases feature powder-coated steel 2"D x 2"W upper column, a 2 $\frac{3}{8}$ "D x 2 $\frac{3}{8}$ "W lower column, and a die-cast aluminum base (foot). Glide provides 1 $\frac{5}{16}$ " of adjustment.

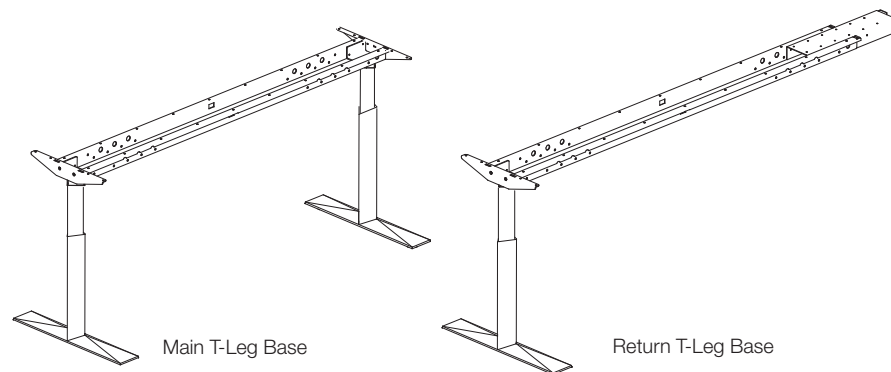

Incremental Click Crank

Incremental-adjust models can be adjusted in 1" increments using a 5mm Allen wrench.

Click-adjust models feature an adjustment mechanism on each leg that works like a ratchet. Table height can be adjusted upward in $\frac{3}{16}$ " increments by lifting the table. To lower the table, pull and hold the small handle.

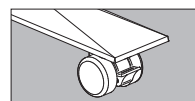

Two people are recommended when adjusting height for incremental- and click-adjust models.

Main T-Leg Base

Return T-Leg Base

Crank-adjust models feature an adjustment handle located on the right side of the base. On rectangular surface applications, the crank can be positioned on the left or right side of the base. Handle pulls in and out, receding to store flat under the worksurface. Crank-adjust models also include a hex rod that runs beneath the worksurface that allows both legs to raise and lower simultaneously; ships ready to assemble. These models are not applicable for L- or U-configurations.

Field installed caster kits are available for use on the main T-leg table bases up to 36"D x 96"W and in L-configurations. Casters feature a low neck with an M-8 thread; height is 1 $\frac{5}{8}$ "; set of 4.

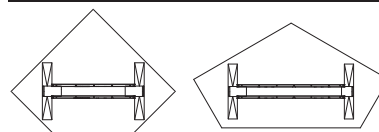

➤ See page 221.

Connections

IMPORTANT: Above-surface storage, highbacks, and organizers should not be used with height-adjustable tables.

Create a different visual by placing T-leg table base inboard from the end of the worksurface; specify a smaller width table base. Legs may be placed inboard 12" on 24"D surfaces, 15" on 30"D surfaces, and 18" on 36"D surfaces.

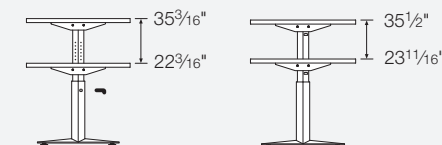

Planning Factors

90° and 120° corner worksurfaces can also be supported by height-adjustable T-leg bases placed parallel to the front edge of the worksurface. To create 48"W 90° application, use a 36"W base; for a 120° application, use a 54"W base. This application provides a lower-cost alternative to using a 3-leg base. Casters are not recommended for this application.

Height-Adjustable T-Leg Table Bases

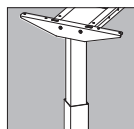

Electric Adjust for Floating-Surface Applications

Details

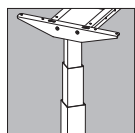

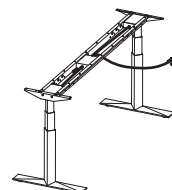

IMPORTANT: Only floating-surface Priority 1 $\frac{3}{16}$ " worksurfaces are for use with height-adjustable table bases. Worksurfaces for flush-surface applications and Systems worksurfaces are not applicable.

Height-adjustable T-leg table bases consist of T-leg(s) and a set of undersurface support rails that run underneath the center of the worksurface. Bases ship ready to assemble. The T-legs on electric bases feature powder-coated steel 2"D x 2"W upper column, a 2 $\frac{3}{8}$ "D x 2 $\frac{3}{8}$ "W lower column, and a die-cast aluminum base (foot). Glide provides 1 $\frac{5}{16}$ " of adjustment.

Electric-adjust bases provide sit-to-stand capabilities.

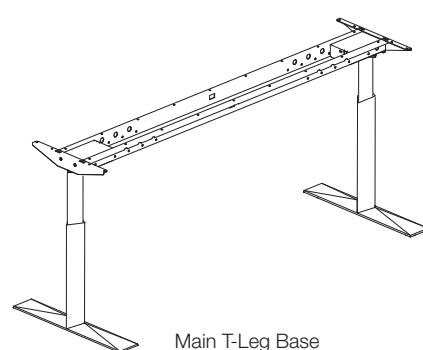

Single-stage electric models features a two-column leg, that compresses inside itself when in the lower positions.

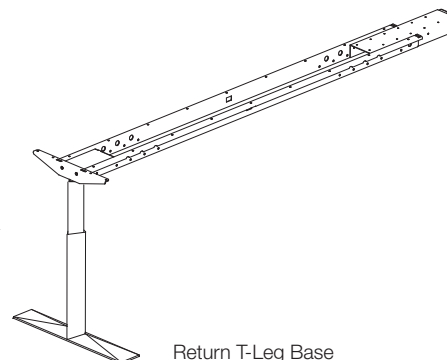

Dual-stage electric models features a three-column leg, that compresses inside itself when in the lower positions.

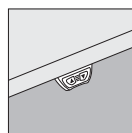

90° and 120° height-adjustable 3-leg bases are also available. Center leg is a post leg.

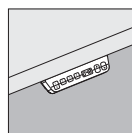

Main T-Leg Base

Return T-Leg Base

Standard

Programmable

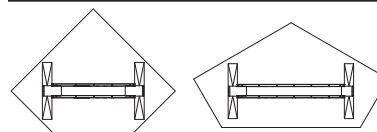

Select either a standard switch or a programmable switch. Standard switch features up and down arrows, and is 2 $\frac{1}{2}$ "W x .625" thick x 2 $\frac{1}{2}$ "D (front to back). Programmable switch allows the user to pre-set up to four-different table heights, and is 5 $\frac{1}{2}$ "W x .625" thick x 2 $\frac{1}{2}$ "D (front to back); upcharge applies. To move the table to one of the pre-set heights, the user must depress the button while the table is in motion. A digital indicator shows the overall height of the table. Switch can be located on either side of the table.

Connections

IMPORTANT: Above surface storage, highbacks, and organizers should not be used with height-adjustable tables.

Control box on main table without a return or extension is not interchangeable with control box with 3 outlets that is standard on main table base specified along with a return or extension.

Planning Factors

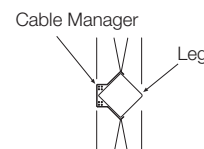

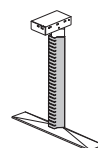

90° and 120° corner worksurfaces can also be supported by height-adjustable T-leg bases placed parallel to the front edge of the worksurface. To create 48"W 90° application, use a 36"W base; for a 120° application, use a 54"W base. This application provides a lower-cost alternative to using a 3-leg base. Casters are not recommended for this application.

Related Products

Field installed caster kits are available for use on the main T-leg table bases up to 36"D x 96"W.

Height-Adjustable Post-Leg Bases

Manual or Electric Adjust for Floating-Surface Applications

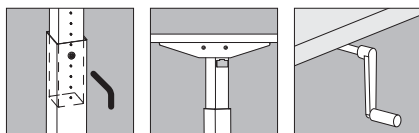

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Details

IMPORTANT: Only floating-surface Priority 1 $\frac{3}{16}$ " worksurfaces are for use with height-adjustable table bases. Worksurfaces for flush-surface applications and Systems worksurfaces are not applicable.

Post legs are a versatile table base extension that can be used in conjunction with other leg styles including U-legs, open-frame legs, fixed-height T-legs, and height-adjustable T-legs.

Rectangular, U-shape, extended, and arc-end worksurfaces can be supported by post legs when used as a return or extension surface.

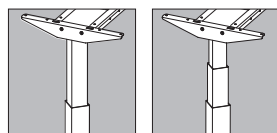

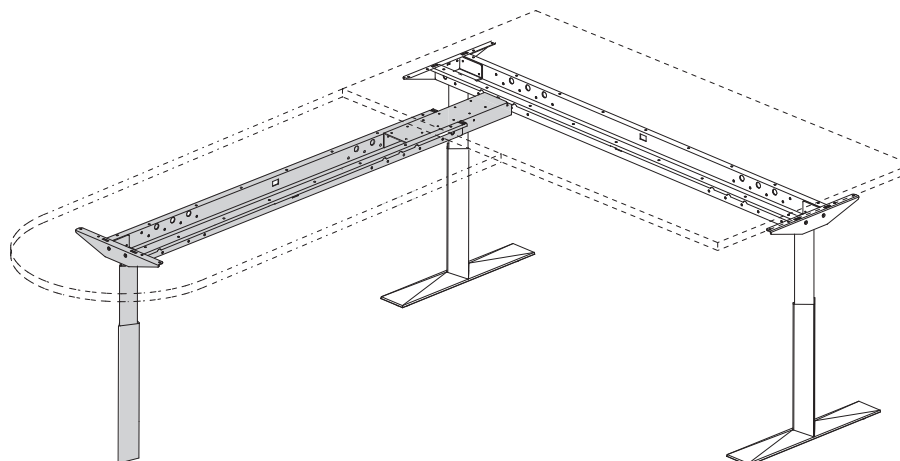

Incremental Click Crank

Incremental-adjust models can be adjusted manually in 1" increments using a 5mm Allen wrench.

Click-adjust models feature an adjustment mechanism on each leg that works like a ratchet. Pull upward on the handle to extend the height of the leg; to lower the table, depress the release handle and lift slightly.

Two people are recommended when adjusting height for incremental- and click-adjust models.

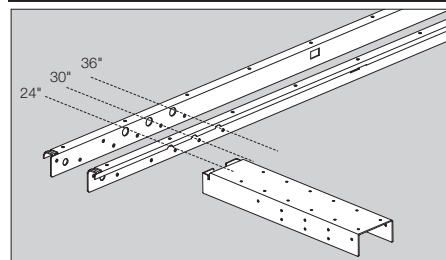

Single Stage Dual Stage

Single-stage electric models features a two-column leg, that nests inside itself when in the lower positions.

Dual-stage electric models features a three-column leg, that nests inside itself when in the lower positions.

Connections

Return mounting bracket is included with post-leg models for connection to main worksurface undersurface support rails. Post-leg is non-handed and can be attached to either end of an undersurface support rail to attach a 24", 30", or 36"D worksurfaces to the main worksurface as a return. Two flat brackets (model ACAWBP1), specified separately, are also required when mounting each return.

Mounting holes are located on the undersurface support rail in several locations to accommodate various return depths. For a 24"D main worksurface, bolt to the first set of holes; for a 30"D main worksurface, bolt to the middle set of holes; for a 36"D main worksurface, bolt to the end set of holes.

Planning Factors

Extension post-leg base model should be specified to match the adjustability mechanism of the main T-leg table base. For example, if specifying a single-stage electric-adjust height-adjustable T-leg as the main base, specify a single-stage electric-adjust extension post-leg base.

Extension post-leg bases are intended to be used as a return. Depending on the depth of the main worksurface and the depth of the extension worksurface, the post will be inset approximately 12"–15" from the end of the extension worksurface.

Height-Adjustable 90° and 120° Bases

Manual or Electric Adjust for Floating-Surface Applications

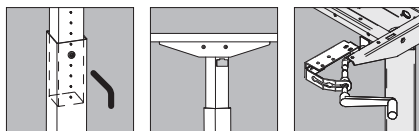

Details

IMPORTANT: Only floating-surface Priority 1 $\frac{3}{16}$ " worksurfaces are for use with height-adjustable table bases. Worksurfaces for flush-surface applications and Systems worksurfaces are not applicable.

90° and 120° height-adjustable 3-leg bases are available in manual or electric adjust models. These bases must be used with a corresponding size 90° or 120° corner worksurface. Center leg is a post leg.

90° and 120° tables are freestanding use only; L- and U-configurations are not applicable.

T-leg adjustable bases is powder-coated steel, with a 2"D x 2"W upper column, a 2 $\frac{3}{8}$ "D x 2 $\frac{3}{8}$ "W lower column, and a die-cast aluminum base (foot). Glide provides 1 $\frac{5}{16}$ " of adjustment.

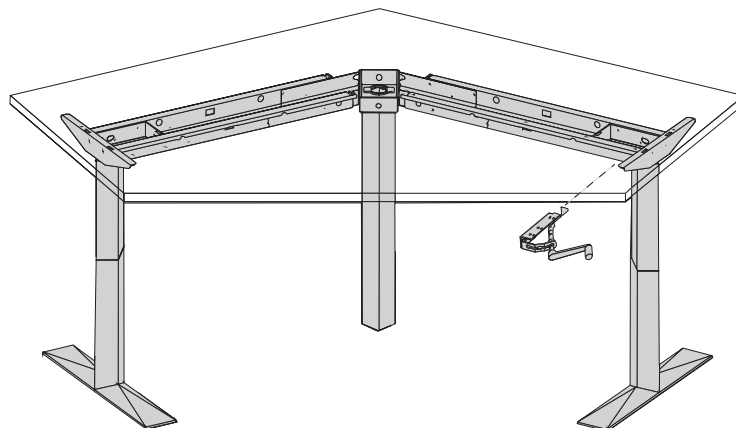

Incremental Click Crank

Incremental-adjust models can be adjusted manually in 1" increments using a 5mm Allen wrench.

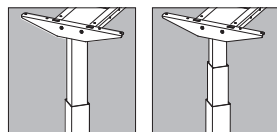

Click-adjust models feature an adjustment mechanism on each leg that works like a ratchet. Pull upward on the handle to extend the height of the leg; to lower the table, depress the release handle and lift slightly.

Two people are recommended when adjusting height for incremental- and click-adjust models.

Crank-adjust models feature an adjustment handle located on the right side of the base. The handle pulls in and out, receding to store flat under the worksurface. The handle is mounted so that it

swings to the side. Crank-adjust models include a hex rod that runs beneath the worksurface that allows both legs to raise and lower simultaneously; ships ready to assemble. These models are not applicable for L- or U-configurations.

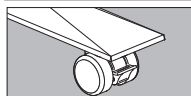

Single Stage Dual Stage

Single-stage electric models features a two-column leg, that nests inside itself when in the lower positions.

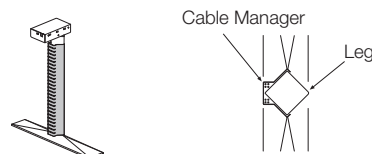

Dual-stage electric models features a three-column leg, that nests inside itself when in the lower positions.

Connections

Field installed caster kits are available; however, they are not directly applicable to a 90° or 120° 3-leg base with center post. To create a mobile 3-leg table, order two caster kits, a return foot kit model 53KFKTR for the post leg, and hardware bag #2417313 (service parts) for screw to attach the foot and casters.

Crank per inch: 12

Note: Worksurface is included in the height ranges shown above. Calculate kneespace by subtracting 3 $\frac{5}{16}$ " from desired height to allow for worksurface and rails.

Single-Stage Adjust

Range: 18 $\frac{7}{8}$ "
Lift Speed: 1.5" per sec.

Dual-Stage Adjust

Range: 26"
Lift Speed: 1.5" per sec

Load Capacity:

Note: Load capacity is defined as the recommended maximum distributed weight of items on or attached to the worksurface.

	Incremental or Click	Crank or Electric
BIFMA maximum load*	400 lbs.	400 lbs.
UL maximum load*	670 lbs.	135 lbs.
Max. load with casters	120 lbs.	120 lbs.
Maximum lift**		100 lbs.

* Static

** With or without casters; reflects the total weight allowed for the table to raise and lower

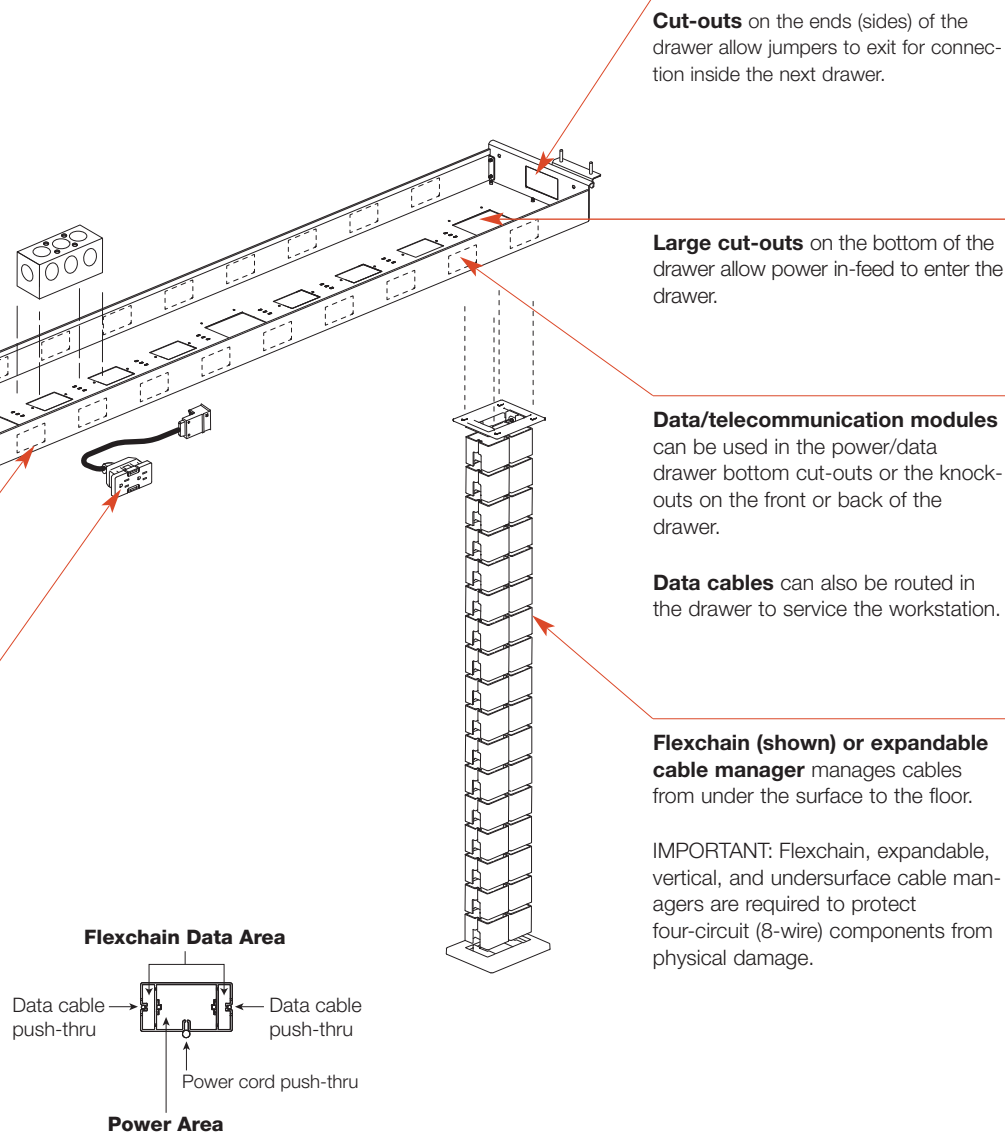

Power/data drawers and electrical components are for use in open planning and freestanding applications. They are recommended for use with Priority™, Definition®, Fluent® (where modesty panel is not used), and Footprint®.

Perks power/data sliding drawer brings both power and data to the underside of the worksurface. Unlike fixed troughs or baskets, the drawer pulls out to allow routing of excess cabling once the initial connection has been made.

Mounting hardware is field installed.

Metal knock-outs in the front face and back of the drawer can be removed as needed for data or electrical outlets.

Single-circuit, four-circuit, and hardwire electrical components are for use in power/data drawers.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Circuitry Options:

Power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably. Power/data drawers are U.L. listed.

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.

➤ See page 101 for application guidelines.

Four-circuit components combine to form an 8-wire, 4-circuit, power system.

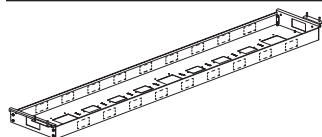

➤ See page 102 for application guidelines.

Hardwire components are also available to allow field hardwiring of power within the power/data drawer where required by local codes.

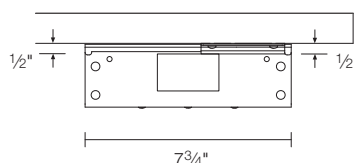

➤ See page 105 for application guidelines.

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Details

Power/data drawer is a powder-coated metal tray that mounts to the underside of a worksurface using two bent sheet metal drawer slides.

1/2" gap between the worksurface and the front and back edges of the drawer allows cords to exit. Cut-outs in the sides allow cables to pass to adjacent drawers.

➤ See next page for knock-out and cut-out details.

Holes centered in the floor of the power/data drawer are provided to attach Perks laptop/equipment lock (model 99KLTKCK).

Planning Factors

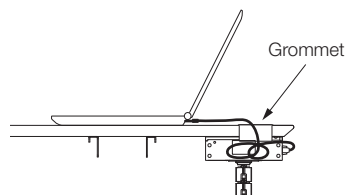

Power/data drawers are for use in open plan and freestanding applications. Recommended for use with Priority, Definition, Fluent, and Footprint. They are designed to work with 24", 30" and 36"W worksurfaces in single or back-to-back configurations.

Specify drawer size based on the width of the surface to which it will attach. Specify the drawer to be 10" shorter than the worksurface width to allow for it to mount inboard of the surface support. For example, specify a 62"W drawer for a 72"W worksurface. If using a surface with storage, base your calculation on the unsupported surface dimension to determine drawer size.

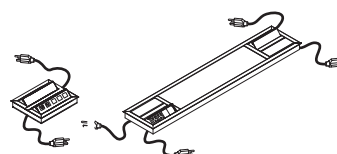

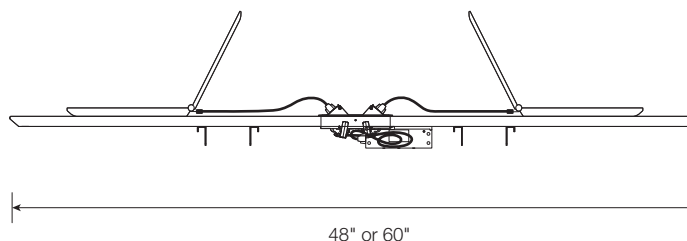

90° and 120° corner worksurfaces can accommodate a power/data drawer. Specify model 99K26PDD for use with a 90° corner support frame; specify model 99K26PDD or 99K32PDD, for use with 120° corner support frame.

Power/data drawers are not intended for use against a wall or in conjunction with Systems panels.

In single worksurface applications, the power/data drawer should be inset 1" from the back of the worksurface.

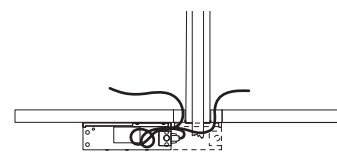

Factory-installed grommets in worksurfaces are located so excess cabling will fall directly into the drawer.

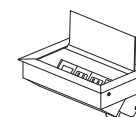

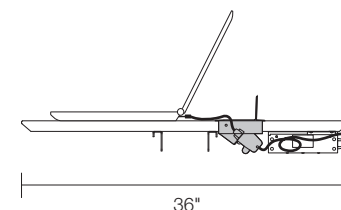

On 48" and 60"D worksurfaces (depicted above), power/data drawer can be located so that when the drawer is extended, it is located on the centerline of the surfaces. Both the 10" rectangular power/data center (KCU0810ELPDC) and the 40" rectangular power/data center (KCU0840ELPDC) will work in conjunction with the power/data drawer in this application.

Note: Not applicable for all surface widths due to interference with support legs.

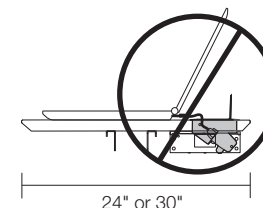

➤ See page 52.

Depending on user electrical needs, one drawer can be shared in back-to-back configurations. Some users may require an individual drawer.

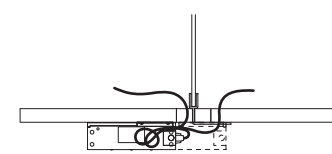

Power/data center (99KPDCAM) may be mounted (recessed) on 36"D worksurfaces with a power/data drawer.

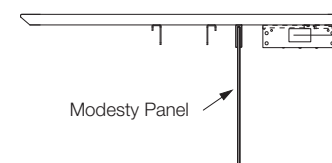

Use of a power/data center on a 24" or 30"D surface in conjunction with single power/data drawer is not possible due to clearance.

Note: Use two smaller power/data drawers on a single worksurface to allow power/data center, clamp-mounted accessories, or through-grommet accessories to extend below the surface between the power/data drawers.

When using wire manager work-surfaces in back-to-back configurations, the power/data drawer can be shared between the users depending on user electrical needs. It should align with the wire manager. The drawer can extend forward to store the excess cabling under the wire manager.

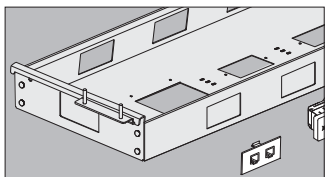

Modesty panel must be located behind the power/data drawer to allow the drawer to extend forward toward the approach side of the worksurface for cable access.

Perks® Power/Data Drawers

Knock-Out and Cut-Out Locations

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

Knock-outs in the front and back of the drawer are compatible with industry-standard data faceplates, such as Tyco/Amp, Panduit, ECA and Hubbell. Individual knockouts are 1 $\frac{3}{8}$ " x 2 $\frac{11}{16}$ ". Data and telecommunication modules are the responsibility of the user.

Knock-outs are located 6" on center. Distance between knockouts is 3 $\frac{1}{4}$ ".

Pre-punched cut-outs are located in the floor of the drawer and are sized similarly to knock-outs as described above. Use these cut-outs for hardwire applications. Receptacles placed in the drawer bottom cut-outs must be installed facing the floor.

Surface Width	Drawer Width	Model Number	Front & Back Knock-Outs	Small Bottom Cut-Outs	Flexchain Cut-Outs
36"	26"	99K26PDD	3	2	1

Details

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.

The following components comprise the single-circuit system:

- Power in-feed
- Duplex receptacles with an attached 12" modular feed
- 12", 24", 48", 74", 96" and 120" jumper cables

Power in-feed is a 10' cord with a "smart box" that monitors the number of receptacles connected. The system will automatically shut off if more than eight receptacles are plugged into the power in-feed. One end of the cord features a three-prong plug that plugs into a standard 110 volt, 15 amp wall or floor outlet.

For ease in installation, jumper cables feature a squeeze-latch connector and will only plug in one way.

Duplex receptacles snap into the power/data drawer. Receptacles feature a 12" modular feed with a double-out interface. Power is brought to the receptacle by a power in-feed or jumper cable. Power is passed to adjacent components by a jumper cable, forming a daisychain.

Planning Factors

When planning jumper cable lengths to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

For jumping between receptacles inside a power/data drawer, 12" jumpers are recommended for drawers that are 50"W or smaller; 24" jumpers are for 56"W and wider drawers.

In 120° applications, 24" jumper cables can be used to jump from one power/data drawer to another.

Jumpers must be secured every 24" when spanning under the work-surfaces.

This system should not be plugged into a GFCI outlet receptacle. The single-circuit system contains an overload breaker, and the sensing circuit in the "smart box" can affect the sensitivity of a GFCI power feed, causing the GFCI duplex receptacle to trip.

Related Products

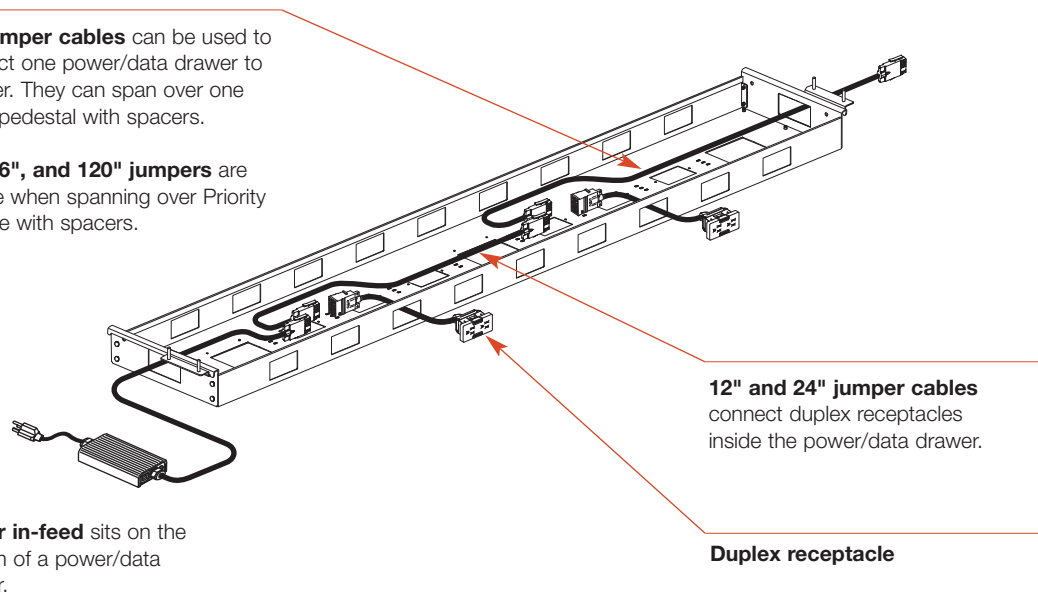

Single-circuit mini-adapt power module features an 18" modular feed with a double-over interface.

The unit contains two receptacles for power access at the worksurface. A hand-tightened clamp on the back of the unit allows flexibility for positioning it at the back of the worksurface.

48" jumper cables can be used to connect one power/data drawer to another. They can span over one 15"W pedestal with spacers.

74", 96", and 120" jumpers are for use when spanning over Priority storage with spacers.

Power in-feed sits on the bottom of a power/data drawer.

12" and 24" jumper cables connect duplex receptacles inside the power/data drawer.

Duplex receptacle

Power/Data Drawers:

Power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably.
➤ See page 99.

Approval/Compliance:

All Perks single-circuit components are U.L. 962 Listed and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.
Note: Any field modification of the electrical components voids the UL listing.

Details

The following components combine to form an 8-wire, four-circuit system:

- Hardwire power in-feeds (two options) or ceiling power entry
- Power distribution assemblies
- Duplex receptacles
- Jumper cables

For ease in installation, the connectors will only plug in one way.

There are three ways to bring power to the system:

- 10' floor/wall power in-feed;
- Modular wall starter and modular 10' power in-feed; or
- 12' ceiling power in-feed

IMPORTANT: Power in-feeds entering the power/data drawer from the floor or wall must be secured/ protected by a flexchain, expandable cable manager, vertical cable manager, or secured to the legs.

Floor/wall power in-feed features a 10' liquid tight conduit with a pigtail on one end that must be wired by a licensed electrician to a wall or floor-mounted junction box. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

Modular wall power in-feed features a 10' modular conduit with a squeeze-latch connector on each end. One end must connect to modular wall starter, specified separately, the other end connects to a power distribution assembly. Modular wall starter must be wired to building power by licensed electrician.

Note: This modular power in-feed option allows you to unplug the cable from the wall and store away when not in use.

Ceiling power in-feed features a 12' flexible, galvanized metal conduit with a pigtail on one end that must be wired by a licensed electrician to a junction box in the ceiling. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

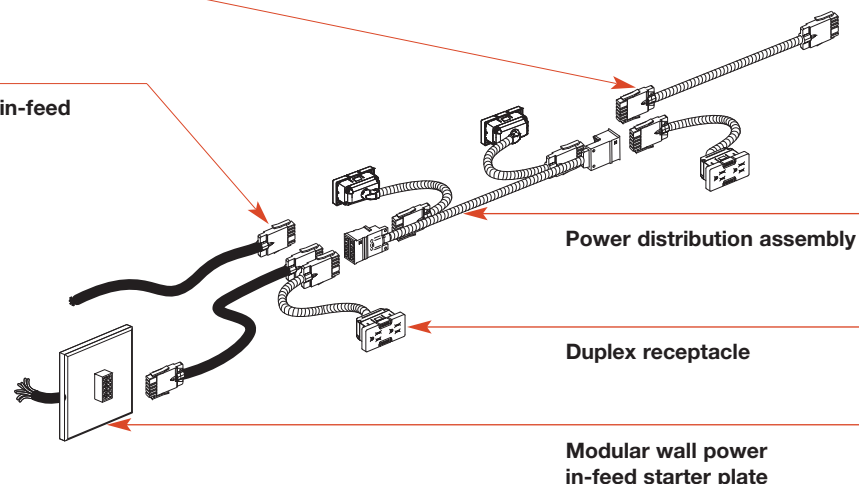

Power/data flexible ceiling pole is available to conceal ceiling power in-feed and other data cables. Pole is a flexible, metal conduit. Outer diameter of pole is 2 1/8"; inner diameter is 2".

Ceiling power pole can be field installed on Priority center-mount shelf on stanchions. Power can be routed between tiles to the bottom of the worksurface.

Perks® Four-Circuit Power System

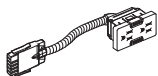

continued

Trim plates can be specified for field installation to conceal the intersection of the flexible ceiling pole at the ceiling and work surface.

Power distribution assembly supplies power for four duplex receptacles within a power/data drawer. Power distribution assemblies are 36" long.

Duplex receptacles feature a 12" flexible, metal conduit and a single squeeze-latch connector to attach it to the power distribution assembly.

Receptacles models are numbered 1, 2, 3, 4, or 5 to correspond to the circuit to which they will provide access.

Jumper cables feature a squeeze-latch connector on each end and are available in 24", 36", 48", 74", 96" and 120" widths. Jumpers are encased in a flexible, galvanized metal conduit.

Use 24" and 36" jumper cables inside the power/data drawer to connect power distribution assemblies and duplex receptacles.

When planning jumper cable lengths to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

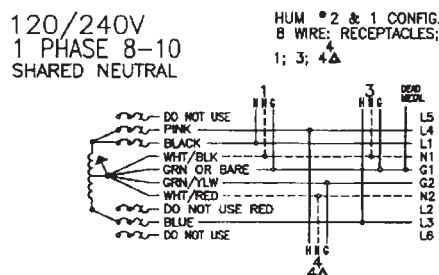

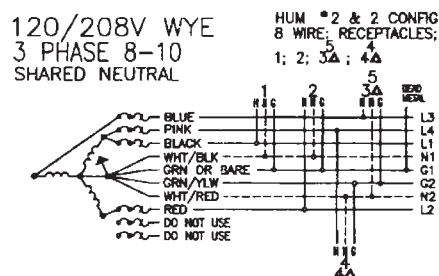

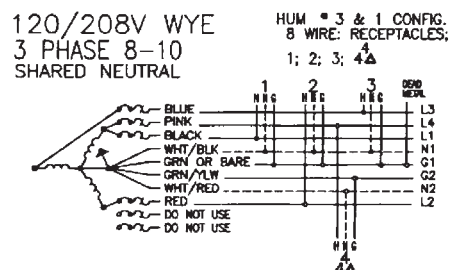

Use 48" jumper cables to connect a two power/data drawers on adjacent surfaces. 48" jumpers may also be used to span over one Priority 15"W pedestal with spacers.

78", 96", and 120" jumpers are for use when spanning over Priority storage with spacers.

Jumpers must be secured every 24" when spanning under the work-surfaces.

Wiring Schematics:

The 8-wire, multi-circuit configuration provides up to four circuits. Ideally a 4-wire, WYE, 208 volt service provides the best utilization.

Pricing	107
Finishes & Materials	A1

Planning Factors

Two wiring configurations are possible—3 and 1 or 2 and 2—utilizing the same components.

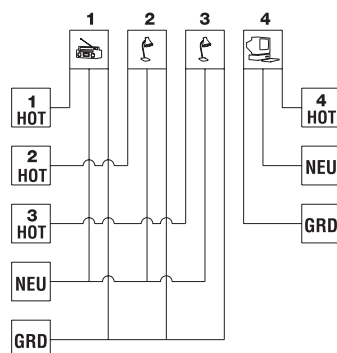

➤ See wiring configurations at right.

Duplex receptacles used for both types of wiring configurations are the same. This simplifies specifications and allows a faster understanding of the system.

➤ See page 102 for receptacle recommendations for four-circuit applications.

A maximum of 13 duplex receptacles can be accommodated per circuit.

3 and 1 (8-wire):

Statement of Line	➤ See page 11
Typical Configurations	39
Pricing	107
Finishes & Materials	A1

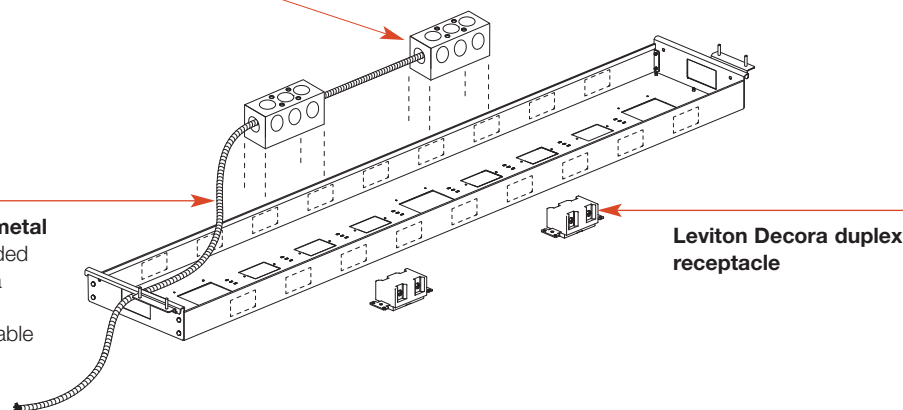

City of Chicago:

The City of Chicago requires that an electrician hardwire the electrical components to the furniture. The electrician can install hardwire boxes into the bottom of the power/data drawer utilizing the pre-punched rectangular cut-outs. Holes for attaching the duplex to the hardwire box are also provided.

Hardwired receptacles must be placed in the drawer bottom knock-outs and be installed facing the floor.

Hardwire box (99KPBH)

Flexible galvanized metal conduit is recommended so that the power/data drawer can still be extended for excess cable storage.

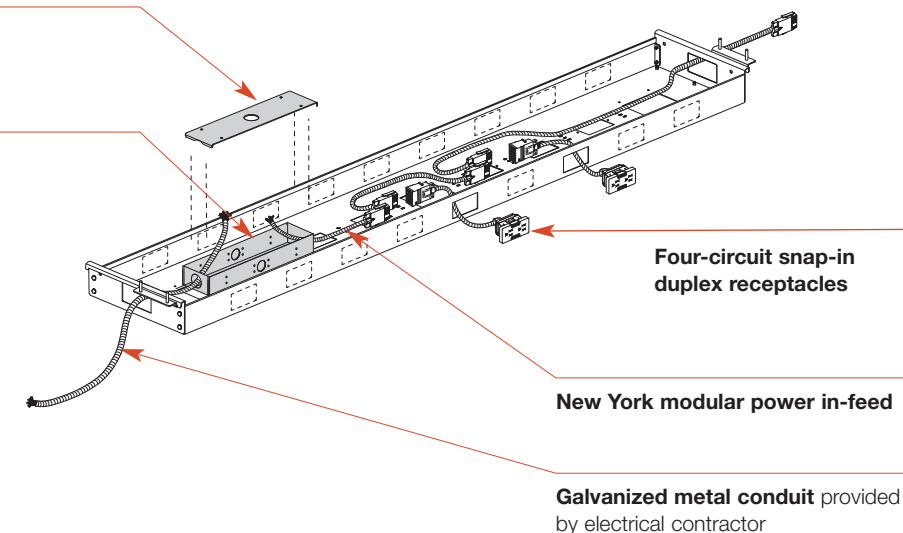

City of New York:

The City of New York requires that an electrician make the connection from the floor entry to the modular electrical system. The electrician can wire the floor/wall power in-feed hardwire boxes into the bottom of the power/data drawer using the pre-punched rectangular cut-outs. Power entry for NYC (99KP4FPFNYC) includes a modular floor/wall power in-feed, hardwire box and lid, 2' galvanized metal conduit to encase the power in-feed (not shown), and cover plate.

New York box lid

New York box

Planning & Installation:

For Use with 72"W Single- and Double-Pedestal Desks				
20"	24"	2¾"	53KE2024CDL	\$119

Standard Includes

- Center drawer: wood or laminate (TFL)
- Attachment hardware

How to Specify

Wood Center Drawer

- ① Model
- ② Finish price group:
STD = Group 1
STD2 = Group 2 (+20%)
- ③ Finish designator
- ④ Wood interior drawer option (omit for standard drawers):
WD = Wood interior drawers (+5%)

Laminate Center Drawer

- ① Model
- ② Laminate (TFL) color

IMPORTANT: Not for use when undersurface support rails are in use.

Standard Includes

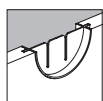

- File/file letter-width pedestal or 36"W multi-file pedestal (two box drawers, one file drawer, and one lateral file drawer)
- Fixed modesty panel (ships unattached; assembly required)
- Front-to-back grain direction on worksurface on file/file returns and wood multi-file returns; side-to-side on laminate multi-file return

How to Specify

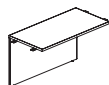

- 1 Model
- 2 Worksurface/chassis materials:
LL = TFL/TFL **L** = HPL/TFL
LW = HPL/wood **W** = Wood/wood
- 3 Pedestal option:
2 = File/file **10** = Multi-file
- 4 Rim profile:
P = Softened PVC (LL or L)
F = Softened wood (LW or W)
M = Reed wood (LW or W)
S = Knife wood (LW or W)
- 5 Pull option:
 ➤ See page 53 for designators.
- 6 Lock option:
X = Non-locking
KS = Key specific (+\$37); specify lock core separately
KRB = Key random, black lock core (+\$62)
KRS = Key random, silver lock core (+\$62)
- 7 Modesty panel option:
X = Fixed modesty panel
H = Hinged modesty panel (+\$54)
- 8 Worksurface grommet option:
X = No grommet
 ➤ See page 49 for designators.
- 9 Modesty panel grommet option:
X = No grommet
MG1MB = Center top (+\$59); matte black
- 10 Worksurface finish price group (omit for LL):

*Knife rim "main" worksurface cannot be used adjacent to corner worksurfaces.
➤ See previous page for **softened and reed rim** rectangular worksurfaces.

Abbreviation Key	➤ See page 3
Planning	47
Product Information	64
Finishes & Materials	A1

Standard Includes

- Worksurface (grain direction runs lengthwise)
- User's edge: knife rim profile (overhangs user side by 1/4")
- Side edges:
 - Flat (no rim profile) on "main" worksurfaces
 - Flat (no rim profile) on the pedestal side (exposed side edge) and reverse knife rim on abutting side on "extension" worksurfaces
 - Reverse knife rim on both sides on "filler" worksurfaces
- Back edge: flat (no rim profile)
- Attachment hardware

How to Specify

- 1 Model
- 2 Pedestal location (include for "extension" worksurface only):
R = Right (shown at left)
L = Left
- 3 Worksurface material:
LW = HPL with S rim
W = Wood with S rim
- 4 Rim profile:
S = Knife wood
- 5 Worksurface grommet option:
 ➤ See page 50 for designators
X = No grommet
- 6 Worksurface finish price group (omit for LL models):
STD = Group 1
STD2 = Group 2 (+20%)
- 7 Worksurface finish designator
- 8 Rim finish price group (omit for W models):
STD = Group 1
STD2 = Group 2 (+20%)
- 9 Rim finish designator (omit for W models)

Undersurface Storage
➤ See pages 161–162.

End Panels
➤ See page 135.

*Knife rim overhangs user side by 1¹/₄".
Arc top depth dimensions represent the widest point.

Standard Includes

- Worksurface
- Rim profile on all four sides

How to Specify

- ① Model
- ② Worksurface material:
LL = TFL with P rim
L = HPL with P rim
LW = HPL with F, M, or S rim
W = Wood with F, M, or S rim
- ③ Rim profile:
P = Softened PVC (LL or L)
F = Softened wood (LW or W)
M = Reed wood (LW or W)
S = Knife wood (LW or W)
- ④ Worksurface grommet option:
 ➤ See page 50 for designators.
X = No grommet
- ⑤ Worksurface finish price group (omit for LL):
STD = Group 1
STD2 = Group 2 (+20%)
- ⑥ Worksurface finish designator
- ⑦ Rim finish price group (omit for LL, L, and W models):
STD = Group 1
STD2 = Group 2 (+20%)
- ⑧ Rim finish designator (omit for W models)

IMPORTANT: Pedestals must match worksurface end depth. Kneespace should not exceed 48".

Pedestals
➤ See page 161.

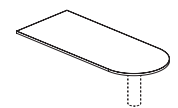

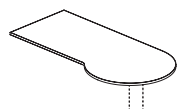

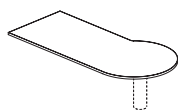

Center Drawers
➤ See page 112.

IMPORTANT: Support base and end panel must be specified separately. Modesty panel is also required for 84"W U-shaped worksurface.

Modesty Panels
➤ See page 141.

End Panels
➤ See page 136.

Support Columns
➤ See page 138.

Standard Includes

- Worksurface
- Rim on all sides

Note: For knife rim surfaces, straight end will feature a reverse knife rim on "extension" worksurface and a flat edge on "main" worksurfaces.

How to Specify

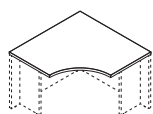

- 1 Model
- 2 Worksurface material:
 - LL** = TFL with P rim
 - L** = HPL with P rim
 - LW** = HPL with F, M, or S rim
 - W** = Wood with F, M, or S rim
- 3 Worksurface type:
 - M** = Main
 - E** = Extension
- 4 Rim profile:
 - P** = Softened PVC (LL or L)
 - F** = Softened wood (LW or W)
 - M** = Reed wood (LW or W)
 - S** = Knife wood (LW or W)

Note: Straight end will have a reverse knife rim on "extension" worksurfaces and flat edge on "main" worksurfaces.
- 5 Worksurface finish price group (omit for LL models):
 - STD** = Group 1
 - STD2** = Group 2 (+20%)
- 6 Worksurface finish designator
- 7 Rim finish price group (omit for LL, L, and W models):
 - STD** = Group 1
 - STD2** = Group 2 (+20%)
- 8 Rim finish designator (omit for W models)

*Knife rim corner worksurface must be used with knife rim rectangular "extension" or "filler" worksurfaces only.

Abbreviation Key	➤ See page 3
Planning	47
Product Information	64
Finishes & Materials	A1

Standard Includes

- Worksurface
- Grain direction runs parallel to the user edge
- Attachment hardware

How to Specify

- 1 Model
- 2 Worksurface material:
LL = TFL with P rim
L = HPL with P rim
LW = HPL with F, M, or S rim
W = Wood with F, M, or S rim
- 3 Rim profile:
P = Softened PVC (LL or L)
F = Softened wood (LW or W)
M = Reed wood (LW or W)
S = Knife wood (LW or W)
- 4 Worksurface grommet option:
 ➤ See page 50 for designators.
X = No grommet
- 5 Worksurface finish price group (omit for LL models):
STD = Group 1
STD2 = Group 2 (+20%)
- 6 Worksurface finish designator
- 7 Rim finish price group (omit for LL, L, and W models):
STD = Group 1
STD2 = Group 2 (+20%)
- 8 Rim finish designator (omit for W models)

IMPORTANT: Corner support base must be specified separately.

Corner Support
➤ See page 137.

* Height (thickness) for TFL worksurfaces is 1¹/₈".

IMPORTANT: Support rails or height-adjustable base must be specified separately.

Undersurface Support Rails
➤ See page 144.

Standard Includes

- Worksurface
- Rim on four sides

How to Specify

- 1 Model
- 2 Worksurface material:
LL = TFL with P rim
L = HPL with P rim
LW = HPL with F or M rim
W = Wood with F or M rim
1LW = HPL with S rim
1W = Wood with S rim
- 3 Rim profile:
P = Softened PVC (LL or L)
F = Softened wood (LW or W)
M = Reed wood (LW or W)
S = Knife wood (1LW or 1W)
- 4 Worksurface grommet/cutout option:
X = No grommet or cutout
 ➤ See page 51 for designators.
- 5 Worksurface finish price group (omit for LL):
STD = Group 1
STD2 = Group 2 (+20%)
- 6 Worksurface finish designator
- 7 Rim finish price group (omit for LL, L, W, and 1W models):
STD = Group 1
STD2 = Group 2 (+20%)
- 8 Rim finish designator (omit for W and 1W models)

* Height (thickness) for TFL worksurfaces is 1 $\frac{1}{8}$ ".

IMPORTANT: Support rails or height-adjustable base must be specified separately.

Undersurface Support Rails
➤ See page 144.

Standard Includes

- Worksurface
- Rim on three sides
- Wire manager on back side

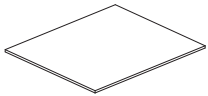

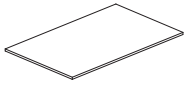

How to Specify

- 1 Model
- 2 Worksurface material:
LL = TFL with P rim
L = HPL with P rim
LW = HPL with F or M rim
W = Wood with F or M rim
1LW = HPL with S rim
1W = Wood with S rim
- 3 Rim option:
3 = Wire manager
- 4 Rim profile:
P = Softened PVC (LL or L)
F = Softened wood (LW or W)
M = Reed wood (LW or W)
S = Knife wood (1LW or 1W)
- 5 Worksurface grommet/cutout option:
X = No grommet or cutout
 ➤ See page 51 for designators.
- 6 Worksurface finish price group (omit for LL models):
STD = Group 1
STD2 = Group 2 (+20%)
- 7 Worksurface finish designator
- 8 Rim finish price group (omit for LL, L, W, and 1W models):
STD = Group 1
STD2 = Group 2 (+20%)
- 9 Rim finish designator (omit for W and 1W models)
- 10 Wire manager finish designator

* Height (thickness) for TFL worksurfaces is 1¹/₈".

IMPORTANT: Support rails must be specified separately.

Undersurface Support Rails
➤ See page 144.

Abbreviation Key	➤ See page 3
Planning	47
Product Information	65
Finishes & Materials	A1

Standard Includes

- Worksurface (120" and 144" widths are two-piece tops)
- Rim on four sides

Grain direction runs with the width on wood veneer and woodgrain laminate worksurfaces.
Exception: Grain runs with the depth on two-piece (120" and 144"W) worksurfaces with quarter-cut veneers (Monterey Oak, Canyon Oak, Tuscan Walnut, and Clear Zebrawood).

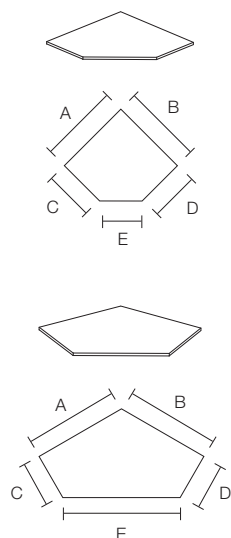

How to Specify

- 1 Model
- 2 Worksurface material:
LL = TFL with P rim
L = HPL with P rim
LW = HPL with F or M rim
W = Wood with F or M rim
1LW = HPL with S rim
1W = Wood with S rim
- 3 Rim profile:
P = Softened PVC (LL or L)
F = Softened wood (LW or W)
M = Reed wood (LW or W)
S = Knife wood (1LW or 1W)
- 4 Worksurface grommet/cutout option:
X = No grommet or cutout
➤ See page 52 for designators.
- 5 Worksurface finish price group (omit for LL models):
STD = Group 1
STD2 = Group 2 (+20%)
- 6 Worksurface finish designator
- 7 Rim finish price group (omit for LL, L, W, and 1W models):
STD = Group 1
STD2 = Group 2 (+20%)
- 8 Rim finish designator (omit for W and 1W models)

Corner Worksurfaces

For Floating-Surface Applications

GSA SIN 711-2

* Height (thickness) for TFL worksurfaces is 1 1/8".

Corner Support Frames
➤ See pages 151–152.

90° and 120° Height-Adjustable Bases
➤ See pages 216 and 220.

IMPORTANT: Support rails are included with corner support frames and height-adjustable bases, but must be specified separately if using U-legs for support.

Undersurface Support Rails
➤ See page 144.

1 3/16"	52 11/16"	10"		53K5309MPHG	\$526
For Use with 84"W P- or U-Shaped Worksurface					
1 3/16"	64 5/8"	10"		53K6509MPHG	\$560

IMPORTANT: Modesty panels on this page are for use with an end panel and a square fluted-metal column or half cylinder. They cannot be used with T-leg end panels.

Support Columns
➤ See page 138.

Field-Installed Grommets
➤ See the Perks Price List.

Abbreviation Key	➤ See page 3
Planning	47
Product Information	68
Finishes & Materials	A1

Standard Includes

- Modesty panel
- Horizontal grain direction on laminate full-height modesty panels
- Attachment hardware

How to Specify

Full-Height Modesty Panels

- ① Model
- ② Material:
L = Laminate
W = Wood
- ③ Finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
- ④ Finish designator

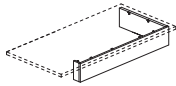

Partial-Height Glass Modesty Panels

- ① Model
- ② Glass pattern:
11 = Opaque Frost
- ③ Frame paint finish:
510 = Silver Frost metallic

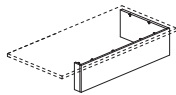

Cable Surround Modesty Panel

For Flush-Surface Applications

GSA SIN 711-2

Support Shelf					
14 ¹⁵ / ₁₆ "	22 ³ / ₄ "	11 ⁷ / ₁₆ "	53K2412WSS	\$439	\$578

Standard Includes

- Drawer or shelf unit
- Attachment hardware

How to Specify

Support Drawer

- 1 Model
- 2 Material:
L = Laminate
W = Wood
- 3 Pull option:
➤ See page 53 for designators.
- 4 Finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
- 5 Finish designator (omit for L model)
- 6 Drawer front finish designator (omit for W models)
- 7 Chassis finish designator (omit for W models)
- 8 Wood interior drawer option (omit for standard drawer and L models):
WD = Wood interior drawer (+5%)

Support Shelf

- 1 Model
- 2 Material:
L = Laminate
W = Wood
- 3 Finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
- 4 Finish designator

Undersurface Support Rail Sets

For Floating-Surface Applications

4 ⁵ / ₁₆ "	19 ¹¹ / ₁₆ "	2 ³ / ₁₆ "	53KWBRP	\$61

Flat Bracket				
2"	5 ¹ / ₂ "	1 ¹ / ₁₆ "	ACAWBP1	\$10

IMPORTANT: Return mounting bracket and flat brackets must be specified separately if installing rail set under a return or extension surface. Refer to the planning pages for required rail lengths of returns and bridges. If the length required is not listed above, order the next smaller size; the attaching brackets will compensate for the dimensional difference.

Abbreviation Key	➤ See page 3
Planning	47
Product Information	69
Finishes & Materials	A1

Standard Includes

- Set of 2 rails
- 90" and 96"W rails are comprised of 2 rails and a connecting bracket for the full length (4 rail sections)

Note: Both rails will run parallel under the same surface.

How to Specify

Support Rails and Return Mounting Bracket

- ① Model
- ② Finish designator:
405 = Designer White
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)

Flat Bracket

IMPORTANT: Tiles are for use on U-legs with stanchion only.

Center-Mount Shelves
➤ See page 180.

Center-Mount Overheads
➤ See page 177.

Standard Includes

- Tile and tile pan: fabric applied railroaded (horizontal)

Note: COM yardage is the quantity required for one tile.

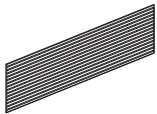

How to Specify

- ① Model
- ② Fabric grade
- ③ Fabric number
- ④ Finish price group:
STD = Group 1
STDM = Group M (+10%)
- ⑤ Finish designator

Freestanding Brackets (set of 2)

5 1/8"	2 3/8"	1"	53KPSBFP	\$58
--------	--------	----	-----------------	------

Surface-Mount Brackets (set of 2)

9/16"	2 3/8"	1"	53KPSBSP	\$58
-------	--------	----	-----------------	------

Square-Edge Brackets (set of 2)

2 3/4"	2 3/8"	2 5/16"	53KPSBU2P	\$58
--------	--------	---------	------------------	------

Knife-Edge Brackets (set of 2)

2 3/8"	2 3/8"	2 5/16"	53KPSBU1P	\$58
--------	--------	---------	------------------	------

Standard Includes

- Two brackets

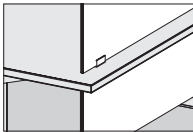

How to Specify

- 1 Model
- 2 Finish designator:
 - 405** = Designer White
 - 501** = Platinum Metallic (+10%)
 - 514** = Carbon Metallic (+10%)
 - 544** = Silver Pearl (+10%)

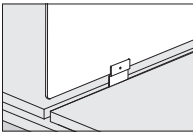

IMPORTANT: Brackets are packaged as a set of two. Specify the appropriate number of brackets based on the screen size:

- 24"–54"W screens require 2 brackets
- 60"–78"W screens require 3 brackets
- 84"–90"W screens require 4 brackets

Freestanding brackets allow privacy screens to be placed freely on any surface or storage unit.

Surface-mount brackets can be used to mount screens above or below the worksurface. This bracket can also be used to mount screens to Priority top caps in benching applications.
Note: Using this bracket will deface the surface to which it is attached.

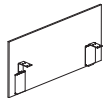

Square-edge brackets are for use in floating-surface applications on any worksurface with a softened rim, reed rim, or any worksurface with a wire manager. Bracket mounts under the worksurface to hold screen above the surface.
Note: Can be used in flush-surface applications if storage or support does not interfere with mounting.

Knife-edge brackets are for use in floating-surface applications on any knife-rim worksurface. Bracket mounts under the worksurface to hold screen above the surface.
Note: Can be used in flush-surface applications if storage or support does not interfere with mounting.

Finishes & Materials	A1

Standard Includes

- Enclosed top with 8 spacers
- One cord opening in center of pedestal top

How to Specify

Pedestal

- Model
- Material:
L = Laminate
W = Wood
- Pull option:
➤ See page 53 for designators.
- Lock option:
X = Non-locking
KS = Key specific (+\$74); specify two lock cores separately
KRB = Key random, black lock core (+\$124)
KRS = Key random, silver lock core (+\$124)
- Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
- Wood finish designator (omit for L model)
- Drawer front finish designator (omit for W model)
- Chassis finish designator (omit for W model)
- Wood interior drawer option (omit for standard drawers and L models):
WD = Wood interior drawers (+5%)

Starter Bracket or Stanchion

- Model
- Finish designator:
405 = Designer White
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)

Wall- or Traxx-Mount Overhead Cabinets

Pricing

Hinged Doors

GSA SIN 711-8
† GSA SIN 711-2

Standard Includes

- Recessed back panel: full height on wall-mount models; ¾-height on Traxx-mount models
- Finished inset top
- Doors on four-door models: one set of matching doors on wood models; two sets of two matching doors on laminate models
- Attachment brackets and rail on wall-mount models; Traxx overhead brackets on traxx-mount
- Ganging bolt

How to Specify

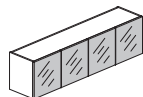

Solid Door Models

- Model
- Attachment method:
M = Wall mount **T** = Traxx mount
- Material:
L = Laminate **W** = Wood
- Lock option:
X = Non-locking
KS = Key specific (+\$37 per lock); specify lock core(s) separately
KRB = Key random, black lock core (+\$62 per lock)
KRS = Key random, silver lock core (+\$62 per lock)
- Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
- Wood finish designator (omit for L model)
- Front laminate designator (omit for W model)
- Chassis laminate designator (omit for W model)

Glass or Writable Glass Models

- Model
- Attachment method:
M = Wall mount **T** = Traxx mount
- Door material:
G = Glass **G2** = Writable glass
- Chassis material:
L = Laminate **W** = Wood
- Glass pattern/door frame finish:
11 510 = Opaque Frost Glass/Silver Frost
202G 511 = Ice Gloss Writable/Silver Satin
- Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
- Chassis finish designator

Filler Strips
▶ See page 176.

IMPORTANT:
Traxx-mounted overhead storage requires Traxx and tiles, specified separately.
▶ See the Systems Price List.

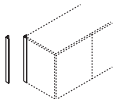

Planning	▶ See page 47
Product Information	84
Finishes & Materials	A1

Standard Includes

- One metal filler strip: black finish

How to Specify

- 1 Model

<i>D</i>	<i>W</i>	<i>H</i>	<i>Model</i>	<i>Price</i>
Filler Strips				
13⁄8"	16"		53K0116CPFS	\$55
13⁄8"	183⁄4"		53K0119CPFS	55

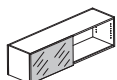

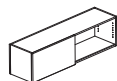

Filler strip can be applied to back edge of Traxx-mounted cabinet to conceal the exposed Traxx bracket. Non-handed. They are recommended, but not required; back panel of overhead cabinet is recessed between end panels.

➤ See page 185.

LED and Fluorescent Task Lights
➤ See the Casegoods Price List.

Standard Includes

- One non-locking door
- Back:
 - On 33"H, finished back on storage cabinet part and open below
 - On 38"H, unfinished back/back panel with three black plastic grommets with cover (one at top center and one in each lower corner)
- Horizontal grain direction on laminate backs 60"W and wider
- Finished inset top
- Center divider

How to Specify

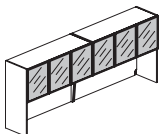

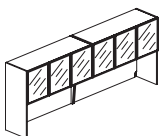

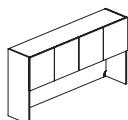

Solid Door Models

- 1 Model
- 2 Material:
 - L** = Laminate **W** = Wood
- 3 Wood finish price group (omit for L model):
 - STD** = Group 1
 - STD2** = Group 2 (+20%)
- 4 Wood finish designator (omit for L model)
- 5 Front laminate designator (omit for W model)
- 6 Chassis laminate designator (omit for W model)
- 6 Back laminate designator (omit for 38"H model and all W models)

Writable Glass Door Models

- 1 Model
- 2 Door material:
 - G2** = Writable glass
- 3 Chassis material:
 - L** = Laminate **W** = Wood
- 4 Glass pattern:
 - 202G** = Ice Gloss Writable
- 5 Door frame paint finish:
 - 511** = Silver Satin
- 6 Wood finish price group (omit for L model):
 - STD** = Group 1
 - STD2** = Group 2 (+20%)
- 7 Chassis finish designator
- 8 Back laminate designator (omit for 38"H model and all W models)

Click

IMPORTANT: Height-adjustable table bases are for use with 24", 30", and 36"D tops and are intended for use as a return base. Depending on the depths of the main and extension worksurfaces, the post-leg will be inset approximately 12"–15" from the end of the extension worksurface.

Crank- adjust extension post-leg models are not available.

IMPORTANT: Two flat brackets, specified separately, are required.

Product Information	93
Finishes & Materials	A1

Standard Includes

- Undersurface rails
 - One manually adjustable post leg (2³/₈"D x 2³/₈"W)
 - Incremental model adjusts from 21"–34"
 - Click model adjusts from 22¹/₂"–34⁵/₁₆"
 - Attachment hardware
- Note: Rails will extend underneath the adjoining main surface for connection.*
- Ships ready to assemble

How to Specify

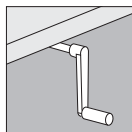

- ① Model
- ② Adjustability mechanism/base designator:
 - IMEP** = Incremental Manual Adjust
 - LMEP** = Click Manual Adjust
- ③ Rail and column finish:
 - 405** = Designer White
 - 501** = Platinum Metallic (+10%)
 - 514** = Carbon Metallic (+10%)
 - 544** = Silver Pearl (+10%)

Planning	➤ See page 47
Product Information	93
Finishes & Materials	A1

Standard Includes

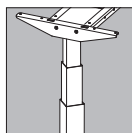

- Undersurface rails
- Two electronically adjustable T-legs (2³/₈"D x 2³/₈"W)
 - Single-stage model adjusts from 26¹/₄"–45¹/₈"
 - Dual-stage model adjusts from 21¹/₁₆"–47¹/₁₆"
- Control box with up/down control switch; one box/switch will control main or main plus a return surfaces in an L-configuration; 10' cord
Note: Control boxes are not interchangeable. Specify based on application.
- Attachment brackets
- Ships ready to assemble

How to Specify

- 1 Model
- 2 Adjustability mechanism/base designator:
SEMP = Single-Stage Electric Adjust
DEMP = Dual-Stage Electric Adjust
- 3 Height-adjustment switch/control box option:
➤ See designators and descriptions at left.
- 4 Rail and column finish:
405 = Designer White
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)
- 5 Foot finish:
405 = Designer White
497 = Polished Aluminum (+5%)
501 = Platinum Metallic
514 = Carbon Metallic
544 = Silver Pearl

Finishes & Materials	A1

Samples:

Samples of Kimball Office materials are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur between samples and finished products. Kimball Office carefully selects all materials used in every product, ensuring a commercially acceptable color and finish.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

Program Overview

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The fabric collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Fabrics	A11

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Kimball Office is known as the wood leader in the office furniture industry. Exceeding our customer expectations has always been our goal.

It is important to educate your customers on what to expect from the wood furniture they order. If they require a specific characteristic or look, please contact By Design to review veneer options and discuss special quotes.

Wood Finishes

Special Wood Finishes

Kimball Office offers the following options for special wood finishes:

- Standard finish color on alternate wood species
- Previously developed special finish
- Custom finish

Standard finish colors available on an alternate wood species include:

- Amber on Maple
- Amber on Walnut
- Mocha on Walnut

These finishes can be specified without going through the finish approval process described at right.

Previously developed special finishes can be selected from an extensive library developed by Kimball Office. Samples of previously developed special finishes are available from Customer Service upon request.

Custom finishes can be developed to meet specific needs, if an acceptable match is not available in our library.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a finish color.

Applicability:

Applicability of special finish colors depends on the wood species to which they are applied. The matrix at right shows the types of woods used for each series.

Note: Special finishes are not available on Zebrawood, Canyon Oak, Monterey Oak, or Tuscan Walnut.

Upcharges:

A one-time fee of **\$300** (net) will be billed for the development of each new custom finish. This fee covers all Kimball Office product lines on which the finish may be used.

A **10%** upcharge per line item (model number) will be applied for a standard finish on an alternative wood species, a previously developed special finish, or a custom finish. This upcharge is calculated on the base price, before other option upcharges are added.

For upholstered products, the upcharge is calculated on the Grade 1 upholstery price then added to the price for the selected fabric grade, to arrive at the list price.

Custom Finish

Approval Process:

- ① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the \$300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.
- ② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. If not, a custom finish will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.
- ③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

Note: The one-time fee of \$300 will not be charged unless a custom match finish is required.

How to Specify

① Model:

Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② Finish type:

For the "Finish type" step, insert a special code (in place of STD):

ZCHY1 = Special cherry finish

ZMAP1 = Special maple finish

ZWAL1 = Special walnut finish

ZSAP1 = Special sapele finish

Note: Choose the special finish code based on the standard wood species used in the product line (see matrix at left).

③ Finish designator:

For the "Finish designator" step, insert the designator below or the one provided to you by Customer Service:

MA00174KOG = Amber on Maple

WA02905KOG = Amber on Walnut

WA02905KOG = Mocha on Walnut

Wood Finishes

Characteristics, Care, and Maintenance Tips

Kimball Office's experience in wood finishing extends from past generations of craftsmen to present day state-of-the-art technology.

Our Pura® finish is a proprietary, water-based, ultra-violet (UV) wood finish that has virtually no volatile organic compounds (VOCs). It uses less energy than our conventional finishing process and meets or exceeds BIFMA Furniture Emission Standards (FES) and U.S. Green Building Council LEED requirements for indoor air quality. Pura is exceptionally clear and durable and allows the beauty of our wood to shine through. The durability, depth, clarity, and beauty of Pura meets the high expectations customers have of Kimball Office finishes.

Finish fill and sheen level for the top surfaces is appropriate for the design and wood species. If different specifications are required, contact Customer Service.

►See the individual chapters for fill and sheen information by line.

All wood products are very susceptible to darkening from age and exposure to UV rays (sunlight and other sources), especially cherry and maple. Although a special UV inhibitor is added to finishes, care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change of the wood.

Fine scratches from everyday use may be more visible on furniture with dark finishes. Darker finishes absorb more light, while fine scratches reflect the light. Therefore, scratches can be more emphasized due to this contrast. The use of a desk pad is recommended to keep scratching to a minimum.

The beauty of wood is that, as a natural product, it will have differences in grain characteristics, color, and other features among wood species. The characteristics of our top grade veneers are appreciated and welcomed; it's the differences in characteristics that offer each office a unique look.

Maple veneers are slip matched.

Brighton Maple is a clear finish for those who appreciate the inherent beauty of wood. Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

Walnut veneers are flat cut and applied book and center matched, except for Tuscan Walnut which is quarter cut.

Cherry veneers are slip matched. Grain characteristics of cherry veneer such as gum streaks and gum pockets occur naturally and add to the authentic look and feel of natural veneer. These are inherent to this veneer and should not be considered defects.

Oak veneer is quarter cut.

Specification of particular cuts, characteristics, or wood species can be accommodated. For example, a customer may ask for a limited amount of cathe-drals or very limited variation in color from one veneer flitch to the next. Kimball Office systems products are able to satisfy those expectations, as long as we are notified prior to order placement. Depending on the request, the higher grade veneer may require an upcharge. Orders would also need to be handled through our custom quote process.

The wood species on seating may vary from the wood species on the casegood or system. Different wood species offer unique texture and grain which provide more variation in finish color; however seating finishes are compatible with casegoods and systems finishes.

To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth following direction of the grain.
- Dry with a separate cloth if needed.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.

Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminate surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

Customer-Specified Laminate

GSA Non-Contract

Customer-specified, high-pressure laminate (CSL) is available on select products.

- See page A6 for availability.
- Contact Customer Service to initiate approval.

Kimball Office reserves the right to decline a customer specified laminate which may not be suitable for application.

Kimball Office assumes no responsibility for the durability, consistent coloration or any other performance characteristic of a customer specified laminate.

Metal, embossed, specialty, and supplier discontinued laminates must be custom quoted.

- Contact By Design at 800.482.1616 extension 6002.

Kimball Office orders and procures all customer specified laminates.

Laminate sheen level must not exceed 60° for maximum durability of worksurfaces.

Lead times may vary for certain laminates. Minimum order quantities may apply.

Upcharges:

A **20%** upcharge per line item (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

How to Specify

- ① Model:
Build the complete model specification (excluding the finish type and finish designator) by following the How to Specify on the appropriate pricing page for the product that is to receive the special finish.
- ② Finish type: For the "Finish type" step, insert a special finish code (in place of STD).
ZFMA1 = Formica
ZLMT1 = Lamin-Art
ZLTC1 = Lamitech
ZNEV1 = Nevamar
ZPTE1 = Pionite
ZWST1 = Wilsonart
- ③ Finish designator: For the "Finish designator" step, insert the laminate designator (color number) of the laminate to be applied to the product.

Fabric Application

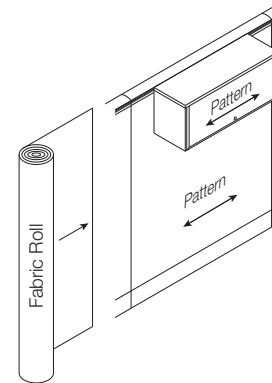

Wood Finishes	➤ See page A3
Laminate	A6
Paint	A8
Panel Fabrics	A11

Standard Application:

Directional fabrics are “cut up the roll” for standard application unless specified differently.

Railroad Application:

All fabrics will be applied in railroad (horizontal) fashion to:

- Xsite tiles
- Xsede tiles
- Priority tiles
- Stow wallpanels
- Tackboards greater than 48"W when using a seating fabric or greater than 60"W when using a panel fabric

When viewing swatch cards or memo samples, turn 90° to get an accurate indication of how the fabric will appear on when railroaded.

Railroad application of Kimball Office panel fabrics and COM for all products that are not listed above or do not have railroading listed as an option in the price list requires a custom quote.

➤ Please contact **By Design**.

Alliance Fabrics:

Kimball Office has formed partnerships with top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Lead times for alliance fabrics are based on supplier availability. Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply.

➤Contact Customer Service for availability before finalizing orders.

The information provided in this section is the most current information available at the time this price list was printed.

Application of Alliance Program upholstery will be as depicted on the swatch card unless otherwise instructed on the order.

80109	Bittersweet
80110	Jet

Key:

A = Heavy duty
a = General contract

Cleaning Leather:

Regular Cleaning

- Remove as much soil or staining as possible by carefully vacuuming or brushing.
- Dust with a dry or damp cloth.

Deep Cleaning

- Use mild non-detergent soap or cleaner. Wipe surface with a light circular motion. Repeat with clean water.
- Do not soak leather.
- Air dry.

Note: Never use furniture polishes, oils, solvents, varnishes, abrasive cleaners, ammonia, wax, or saddle soaps on leather.

Leather Characteristics:

Leather is a natural product. Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristic of leather.

Alliance Program Fabrics

For Use on Cushion-Top Pedestals and Low Storage Cushions

Kimball Office has formed partnerships with the top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

Patterns from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics are available in a variety of design aesthetics and price points to meet all of your fabric needs. Carded fabrics are listed in this price list. ▶See Surface Materials at www.kimballoffice.com for a wide variety of additional graded-in fabrics from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Application of Alliance Program fabrics will be as depicted on the website or memo sample unless otherwise instructed on the order.

Directional fabrics, such as stripes, patterns, and plaids, may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return.

Fabric that requires non-stock special treatments such as flame proofing, anti-microbial treatment, electrical conductive backing, water repellent, stain repellent, or acrylic backing are not part of this program. Such orders should be specified as a COM.

Alliance graded pricing includes the cost of the material. Repeat is also accounted for and no additional upcharge is required.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

IMPORTANT: The information provided in this section of the price list is the most current information available at the time this price list was published. Contact Customer Service before finalizing any orders to check availability.

Lead Time:

Lead times for alliance fabrics are based on supplier availability.

Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply. Contact Customer Service for availability before finalizing orders.

TB133:

Contact Customer Service about TB133 requirements.

Note: Many of these fabrics may pass additional flammability tests. Please inquire about compliance with specific regulations.

Samples:

How to Specify

To take advantage of this program, simply follow the “How to Specify” steps listed on the alliance upholstery pricing page within each section. Add the appropriate three-letter supplier prefix to the fabric grade:

ARC[grade] = Arc Com

CAR[grade] = Carnegie

CFS[grade] = CF Stinson

KNL[grade] = KnollTextiles

MHM[grade] = Maharam

MAF[grade] = Mayer Fabrics

MOM[grade] = Momentum

ULT[grade] = Ultrafabrics

Alliance Program Fabrics

Carded Patterns

Kimball Office has formed partnerships with Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics to provide a broad range of design-oriented fabrics. Carded patterns are listed here.

Customer's Own Material (COM) and Leather (COL)

GSA Non-Contract

Program Overview	➤ See page A2
Cut Yardage	A11
Cleaning Codes	A12
Seating Upholstery	A15

Customer's Own Material (COM) Policy:

While Kimball Office inspects fabrics for mill imperfections, some are difficult to recognize. Kimball Office is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring, appearance, or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Customers are responsible for ordering COM/COL and expediting delivery of the material, sent prepaid, to Kimball Office.

IMPORTANT: Kimball Office reserves the right to decline a fabric that may not be suitable for application to product.

COM Application Testing:

Application testing on product for non-preapproved fabrics is required.

➤ Contact your Customer Service Team for the appropriate forms to initiate application testing.

The application test will render your fabric either:

- Approved
- Not recommended
- Restricted

A "not recommended" result is usually due to questionable construction of the material or pattern that is difficult to align. You will be required to sign a waiver to use any "not recommended" COM.

U.L. Listing/Flammability:

COM must be U.L. listed for use on tiles for benching stanchions before Kimball Office accepts and enters an order which will have COM fabrics. All COM testing and processing costs are the responsibility of the customer. A minimum of 2 yards of production run yardage is required for U.L. testing and flammability testing. Approval of a COM fabric may result in extended lead times. For cost estimates, yardage requirements and project lead times, consult your Customer Service Team.

Customer is responsible for fabric meeting the appropriate Cal. TB133.

Customer's Own Leather (COL):

Customer's Own Leather (COL) is available for use on pedestal and low storage cushions.

Yardage/Sq. Footage Requirements:

➤ See the product's pricing pages for COM yardage and COL square footage requirements.

Shipment of COM/COL:

After the fabric has passed the approval process described, Kimball Office will enter the product order and send an acknowledgement of the tentative ship date. A notification will be sent giving the date the COM must be received. If it is not received by the specified date, your ship date will be reassigned.

For Priority tackboards and tiles for benching stanchions:

Kimball Office
Attn: COM Department
Dock 20 or 21
1037 East 15th Street
Jasper, IN 47549

For Priority mobile pedestal cushion and low storage cushions:

Kimball Office
COM Department
340 East 11th Avenue
Jasper, IN 47549-1001

IMPORTANT: Tag all materials with the Kimball Office dealer name and the purchase order number.

Production of Order:

When COM production yardage is received, COM is cut for the order and inspected for flaws. If flaws are found, you will be notified of the additional fabric required.

A return tag (e.g. COD shipment, UPS call tag) is required from the specifier within 45 days of the acknowledged ship date or all excess COM yardage will be discarded.

Preapproved COM:

➤ Contact your Customer Service Team to obtain information on preapproved COMs.

Checklist:

When ordering COM for Kimball Office products, please make sure you have done the following:

- Supplied vendor name, fabric name, color name and number.
- Supplied arrival date of COM to Kimball Office.
- Received application testing approval before sending purchase order (or signed waiver if not approved for application).
- Received U.L. listing before sending purchase order.
