SPECIFICATIONS

Conference Table Top

Table tops are constructed of 1-1/8" thick, 45 lb density particle board core, with a 1/32" veneer finished top surface and 1/32" thick phenolic backing. Serenade is available in four top shapes - rectangle, racetrack, boat and sight line. The top shape can be specified with one of six different styles of wood edging. Edging is present on all sides, with several selected edge styles providing radius or square corners.

Tops specified at 144" or longer require two piece construction using steel joinery for vertical and lateral joint strength along the entire width of the top. The veneer pattern is reverse slip matched. All joinery is hidden on the underside of the top. A flush mounted Vault power module is available.

Conference Table Base

Table bases are constructed of 5/8" thick particle board. The veneer one-sided finish width is 41/64".

Bases are offered in six styles:

- Panel base - 4" wide
- Column base - 12" wide, base is wide enough to cover a 4 receptacle floor outlet for power wiring
- Veneer drum - 18", 20", 23" and 33" diameter
- Veneer half drum - 18", 20", 23" and 33" diameter
- Metal drum - 18", 24" and 28" diameter; available in all KI standard powdercoats
- Synthesis base - 32" and 38" TT legs available

All bases feature adjustable glides 1" in diameter, 5/16-18 threaded for level setup within 2" of adjustable height. Tables sized 168" or longer are configured with three bases; all other table sizes are configured with two bases. All enclosed bases are available with an access door for easy power source access.

Conference Table Modesty Panel

Modesty panel (base "stringer") is constructed of 5/8" thick particle board. The veneer one-sided finish width is 41/64". Modesty panel height is 12" x 10" wide. Power/data options and cables are routed and hidden within the modesty panel for an organized and clean appearance.

Conference Credenza

Credenza is offered in two heights: conference height (29") and buffet height (36"). Both heights feature standard adjustable shelves. The buffet height credenza offers two adjustable shelves per cabinet; conference height offers one adjustable shelf per cabinet.

The credenza top is constructed of 1-1/8" thick particle board, with 1/32" veneer finished, solid wood front edge and veneer finish on three sides. All credenza components are constructed of 5/8" thick particle board. The entire back of the credenza is finished in veneer. The veneer finish width is

21/32" for all 2-sided finished sides, doors, shelves and trim.

Door hinges are constructed of steel, spring loaded for soft-close, fully adjustable for gap and flush closure, hidden and flush mounted. Door pulls are offered in three styles: square bar, curved and straight. Curved pulls are available in black and silver. Straight and Square pulls are available in silver. Adjustable 1" diameter 5/16-18 threaded floor glides provide level setup within 1-1/2" total adjustability.

Vault Module

Available on conference table tops only. The optional Vault Module is a power and data module constructed of stained aluminum, flush with the surface of the table top. Surface cutout needs to be 14.5" x 4.0125", overall size of the module is 15.875" x 4.375" x 4.375".

Standard configuration includes three power outlets, three data ports and one VGA connection. The module is opened and

closed by touching the red and green arrows on the surface of the module. The module also contains a photo-electronic eye that prevents closure when power or VGA cords are plugged in.
