SPECIFICATIONS

Barron® Pedestal Base Table

This system employs 14-gauge tubular steel components in fixed, folding or flip-top models. Barron® includes T, TT, X, LX and cantilevered T base combinations. Fixed table column welded to an 8" x 8" formed steel plate.

Bases

Built of 1-3/4" round tubular steel feet, legs and plugs; highly polished finish. LX series is furnished with 3" o.d. seamless tubular steel column. Adjustable glides are secured to the legs. All ends capped with finished steel plugs brazed in place, ground and polished smooth.

Barron® Table's Folding Mechanism

Built of 11-gauge, black zinc finish steel, the folding mechanism easily releases and folds leg tightly to table bottom and securely locks with two polypropylene clips. When opened, legs engage into place for a tight, rigid fit

between leg and mechanism. Built-in nylon bumpers keep tables separated to prevent marring when tables are stacked on edge.

Table Surfaces

1-1/8" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Tops are pre-drilled.

A "standard" table consists of a standard laminate worksurface and a 1-1/4" vinyl bullnose edge for any KI table base. KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Flip-Top

Standard flip-top table does not have a detachable top.

Barron® Plus Ganging Mechanism

Built of black high-strength nylon, user-friendly ganger with pegs draws tables together. No tools are required when joining tables. Ganger is self-storing under table

top. Mounting screws are provided. Tops are pre-drilled for placement of ganging pegs. Two gangers per table. CAUTION: Gangers are not retrofittable to earlier purchased tables.

Folding Modesty Panels

.685" thick particleboard faced on both sides with laminate that matches table top. Modesty panels are 6-1/4" high by length of table. Mounting brackets are black and packed with base. Table top and panel are pre-drilled. Lower edge of panel extends 8-1/4" from underside of table. The modesty panel is shipped k.d.

Bright Chrome Finish

Surfaces are duplex nickel-chrome plated in a twenty-two step process.

Powder-Coated Finish

Hybrid powder coating is electrostatically applied. Finish is chemical-resistant, hard, tough and mar-resistant.

Barron® Lightweight Table

Top is 5-ply construction consisting of .050" thick laminate, 5.2mm 3-ply plywood, .75" thick high-density particleboard frame with honeycomb core, 5.2mm 3-ply plywood and .040" HPL backer.

Quick-Release Modesty Panels

.685" thick particleboard faced on both sides with laminate that matches table top laminate. Lower edge extends 7-1/4" from underside of table. Panel is easily removed from the table without tools. It locks into two 11-gauge steel retaining brackets and is removed by pulling down on vinyl-coated stainless steel release levers. Panel ships k.d.

Barron® Table Truck

Black powder-coated finish. Two swivel and two rigid 6" diameter casters with heavy-duty roller bearings. Rectangular or square table storage. Felt is standard on top edges.

Barron® with PowerUp®

Barron® tables are available with one or two power/data modules, PowerUp®, centrally located 4-1/4" from front edge of table top. PowerUp® is a UL Listed, Relocatable Power Tap, which mounts flush into the table top. When flipped up, cover open, one (1) duplex receptacle and two (2) data ports are exposed. The underside of the table is provided with a hinged plastic channel (cord management trough) which covers the bottom of the module. This channel, furnished with metal dividers, is provided for the routing of the power supply cords and data lines. The PowerUp® module is 6-1/4" long by 3" wide by 2-1/2" high when opened. It is provided with a 9 ft. or 15 ft., 3-conductor cord and is rated 120V a/c, 15A. The cover snaps into the upright position to allow cords to be unplugged without the cover closing. The data ports are molded to accept AT&T "M" Series, RJ45 jacks. The module can be modified to accept various brand jacks. Cords are further managed by the vertical leg wire manager which comes standard with PowerUp®.

Rolling Barron® Base

Rolling Barron® Base may be ordered with any two-column Barron® or Barron® Plus Table, or may be field-installed on existing two-column Barron® or Barron® Plus Table. By placing embedded wheels on one end of a Barron® two-column table, one person can easily move it by lifting the end without wheels and "driving" the table. Also, Rolling Barron® Base is only available on Single "T" Bases. Not available on "TT", "X" and "LX".

Constructed of high quality black velcro. Harness is fastened to table bottom with screws. Shipped assembled. Wire management options (HO, HW and WO) are only available on rectangle tables 96" and smaller (not available on any cantilever, flip-top or folding tables).

Grommet location for tables that are 36" deep and smaller will be on the corners of the table. Grommet location for the tables 42" deep and larger will be the centerline of the table. SPECIFICATIONS

DataLink® Multipurpose Pedestal Base Table

This system employs heavy-gauge steel, cast and extruded aluminum components in fixed, folding, or flip-top models. DataLink® Multipurpose pedestal table includes T, TT and X base configurations. Fixed table column and foot bolted to 3/16" solid steel plate with two 3/16" x 24" long through bolts. Fixed base shipped k.d., folding base shipped assembled.

Bases

Built of cast aluminum feet with heavy wall extruded aluminum columns (T and TT) or 2- 1/2" diameter 14-gauge steel leg column (X) and highly durable, smooth powder-coated finish. Adjustable nylon glides are secured to the legs.

DataLink® Multipurpose Tables Plus Ganging Mechanism

Built of black high-strength nylon, user-

friendly ganger with pegs draws tables together. No tools are required when joining tables. Ganger is self-storing under table top. Mounting screws are provided. Tops are predrilled for placement of ganging pegs. Two gangers per table.

CAUTION: Gangers are not retrofittable to earlier purchased tables.

DataLink® Multipurpose Table's Folding Mechanism

Built of 11-gauge, black zinc finish steel, the folding mechanism easily releases and folds leg tightly to table bottom and securely locks with two polypropylene clips. When opened, legs engage into place for a tight, rigid fit between leg and mechanism. Built-in rubber bumpers keep tables separated to prevent marring when tables are stacked on edge.

Table Surfaces

1-1/8" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Tops are pre-drilled.

A "standard" table consists of a standard laminate worksurface and a 1-1/4" vinyl bullnose edge for any KI table base. All Knife (KN) edge styles will use an M3 particle board composition. The undersurface edge is sanded, stained and sealed. KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Flip-Top

Standard flip-top table does not have a detachable top.

Folding Modesty Panels

.685" thick particleboard faced on both sides with laminate that matches table top. Modesty panels are 6-1/4" high by length of table. Gap from underside of worksurface to top of unfolded modesty panel is 2". Mounting brackets are black and packed with the base. Table top and panel are pre-drilled. Lower edge of panel extends 8-1/4" from underside of table. The modesty panel is shipped k.d.

Quick-Release Modesty Paels

.685" thick particleboard faced on both sides with laminate that matches table top laminate. Lower edge of modesty panel extends 7-1/4" from underside of table.

Panel is easily removed from the table without tools. It locks into two 11-gauge steel retaining brackets and is removed by pulling down on vinyl-coated stainless steel release levers. Modesty panel is shipped k.d.

Powder-Coated Finish

Hybrid powder coating is electrostatically applied. The dry coating is then fused and cured in a baking oven to form a smooth continuous film. Finish is chemical-resistant, hard, tough and mar-resistant.

DataLink® Multipurpose Lightweight Table

Top is 5-ply construction consisting of .050" thick laminate, 5.2mm 3-ply plywood, .75" thick high-density particleboard frame with

The core shall be laminated on both sides with phenolic resin sheets for high stiffness and sag resistance and high density particleboard core with high-pressure laminate top and phenolic backing sheet. Tops are to be a less than 7/8" thick. Tops are pre-drilled. Table top shapes shall be available that have curved sides for nonprescriptive arrangement.

1-1/4" Table Surfaces

Table work-surfaces shall be constructed with 1-1/8" thick particle board. Tables can

hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top. The core shall be laminated with high-pressure laminate top and phenolic backing sheet. Tops are pre-drilled. Table top shapes shall be available that have curved sides for non-prescriptive arrangement. (The thick top core is 1-1/8" thick.)

Powder Coated Finish

45 sheen epoxy powder coating is electrostatically applied. The dry coating is then fused and cured in a baking oven to form a smooth continuous film. Finish is chemical-resistant, hard, tough and mar-resistant.

Glides and Casters

Each table shall include either glides or casters. Each table with caster shall include two wheel locking casters. Glides and casters shall be molded nylon in two colors. Glides and casters shall be interchangeable without changing table height. Caster wheels shall be a minimum of 2.44" (62mm) diameter. Caster wheel treads shall be medium (75 max Shore A) hard for easy mobility on carpet or hard floors. Glides shall have a smooth convex bottom surface for mobility.

Enlite® with PowerUp®

Many tables are available with one and Boat tables are available with two power/data modules. PowerUp® shall be centrally located, and a minimum of 2" from the edge of table top. PowerUp® is a UL listed, relocatable power tap, which mounts flush into the table top. When flipped up, cover open, on (1) duplex receptacle and two (2) data ports are exposed. The PowerUp® module is 6-1/4" long by 3" wide by 2-1/2" high when opened. It is provided with a 9 ft. or 15 ft., 3-conductor cord and is rated 120V a/c, 15A. The cover snaps into the upright position to allow cords to be unplugged without the cover closing. The data ports are molded to accept AT&T "M" series, RJ45 jacks. The module can be modified to accept various brand jacks. Cords are further managed by the vertical leg wire manager which comes standard with PowerUp®.E

ENLITE® NESTING TABLES

Fixed Leg Assembly (Standard for all table shapes)

The leg assembly consists of one right and one left hand leg. There are two "Y" shaped leg widths of 16" and 22", and an 18 inch "T" straight leg assembly, all to fit a variety of table shapes and sizes. The standard height Y and T legs provide for a 29" table top height and an optional ADA "T" straight leg assembly provides a table height of 32". A single "Post Leg" design is included on some larger triangular tops.

The all-welded construction for the leg assemblies consist of 1" diameter round, 16-gauge steel tubing, with 7/16" diameter solid steel cross braces, a 1/8" thick steel gusset and a 1/4" thick steel spider plate for mounting to the underside of the work surface. The powder coated leg assemblies are shipped separately and mounted to the work surface using 1/4" pan head wood screws.

Decorative Leg End Panels (“Y” Legs only)

Optional decorative leg end panels are either die formed and powder coated 18-gauge perforated steel or a laminated construction consisting of 18-gauge die formed steel, permanently adhered to .030 thick HPL (KI laminate selection) or optionally a natural .040 thick oak or maple veneer, stained and finished to KI color specifications. All leg panels are fastened to the leg assemblies using steel thread cutting screws.

Flipping/Nesting Table Frame (48" and 60" Rectangular and “Swash” shapes only)

The framework for the table support and flipping/nesting operation consists of two main extruded aluminum rotating hinges, with extruded aluminum locking latches. These mechanism parts are machined to high tolerance and mounted over die cast aluminum hinge pins using molded nylon bushings for smooth operation. Actuating the lock mechanism is an aluminum extruded bar across the length of the table frame with a molded nylon pull handle.

Cross frame members are 1" x 2" 16-gauge steel oval, 1" diameter 16-gauge steel round tubing and a 1 x 3/4" solid steel rectangle stiffener (or 1" x 1/2" rect. 16-gauge for 48" tables) all fastened to the leg assemblies using 5/16" threaded steel bolts. All metal components are powder coat painted black. Molded nylon leg clips attached to the underside of the work top, provide spring retention of the top in the nesting position. The Flipping/Nesting table frame mechanism and work surface clips ship unassembled.

Wire Management

An open tubular, clear PVC extrusion is cut to length to fit the leg assembly diameter vertically and the Flipping/Nesting horizontal cross frame round tubing. The wire management extrusions are snap-fit using no tools.

SPECIFICATIONS

Hurry Up!® Worksurfaces

Standard worksurface tops are nominal 1-1/4" overall thickness with .030" thick high-pressure laminate top surface and .028 phenolic backer, (bottom surface). Density of the core in standard tops is 45 lb/cu ft. particleboard, M3 grade. Lightweight tops are 1-1/4" thick overall, with .040" thick high-pressure laminate top and .040" thick high pressure laminate backer. Inside is a .75" thick honeycomb paper board core and M3 grade particleboard, laminated between 2 layers of 5.2mm thick plywood.

A "standard" table consists of a standard laminate worksurface and a 1-1/4" vinyl bullnose edge for any KI table base.

Flipping/Nesting Table Frame

The framework for table support and flipping/nesting operation consists of 1-1/2" diameter, .06" thick wall, steel tubing with 1/2" threaded inserts welded inside the

tubes for mounting the legs. 4mm thick stamped steel brackets support the horizontal framework through injection molded Acetal bushings while 1/4" Phillips wood screws attach the framework brackets to the worksurface. The 3/4" diameter steel latch release handle is actuated at the center and front underside of the worksurface.

Pulling forward, using one hand, raises the worksurface for nesting storage. To lower the table for use, from the upright storage position, a steel locking latch is located on one support arm and must be released prior to lowering the table. All hinge pins for the flipping mechanism are zinc plated steel. Hinge pin spacers are molded nylon.

The framework is shipped separately, ready to be assembled to the worksurface and legs. Note: Undercarriage is standard in flannel.

Leg Assembly

The leg assembly consists of one right-hand

leg and one left-hand leg. There are two leg widths. One width fits 24" wide tables. One width fits 30" and 36" wide tables. Leg height is fixed to provide only 29" high table-top height. ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Leg construction consists of 1-1/4" diameter, .078" thick wall, bent steel tubing welded in an assembly. The legs are bolted to the table support mechanism using 1/2" hex bolts. Leg assemblies ship knocked down.

Casters and Glides

4 each, 3" diameter, twin wheel swiveling casters are provided as standard. 2 casters are locking, 2 are free wheeling. All are black nylon wheels with white hubs. Steel 1/2" threaded stems attach the wheels to the bottom of leg assemblies. 2-3/4" diameter black nylon glides are optional. Glides have 1" of telescoping height adjustment that adjust table height from 28-1/2" to 29-1/2". Steel 1/2" threaded stems attach the glides to legs. Casters and glides ship unassembled.

Leg Wireways

An extrusion made of PVC with self-adhesive tape attaches to the HurryUp leg managing cables and wires exiting PowerUp® or standard grommets installed on the worksurface top. The extrusion is 3" long and divided into two separate cable routing areas for separating wires if required. Factory installed. Black only.

Grommets

Grommets are constructed of ABS plastic which mounts flush into the top of the work-surface. Two grommets ship per table. They are located in the left- and right-hand corners of the tops. Grommets have a flip-up receding door and are identical in size to the PowerUp® module to allow for retrofitting of PowerUp® at a later date. The available opening for power or data cords, when the flip-up door is closed, is 1/2" wide x 5-3/4" long. Open door available space is 2-1/4" x 5-3/4". Field installed.

Ganging Mechanism

Built of black high-strength nylon, user-friendly ganger with pegs draws tables together. No tools are required when joining tables. Ganger is self-storing under table top. Mounting screws are provided. Tops are predrilled for placement of ganging pegs. Two gangers per table. Ganging is only available on Hurry Up!® tables with the following edges: 74P, 64E, ME, and 34S.

CAUTION: Gangers are not retrofittable to earlier purchased tables.

Hurry Up!® with PowerUp®

Tables are available with one to three power/data modules, PowerUp®, centrally located 4-1/4" from the front edge of table top.

PowerUp® is a UL Listed, Relocatable Power Tap, which mounts flush into the table top. When flipped up, cover open, one (1) duplex receptacle and two (2) data ports are exposed. The underside of the table is provided with a hinged plastic channel (cord

management trough) which covers the bottom of the module. This channel, furnished with metal dividers, is provided for the routing of the power supply cords and data lines.

The PowerUp® module is 6-1/4" long by 3" wide by 2-1/2" high when opened. It is provided with a 9 ft. or 15ft., 3-conductor cord and is rated 120V a/c, 15A. The cover snaps into the upright position to allow cords to be unplugged without the cover closing. The data ports are molded to accept AT&T "M" Series, RJ45 jacks. The module can be modified to accept various brand jacks.

Cords are further managed by the vertical leg wire manager which comes standard with PowerUp®.

Table Surfaces

KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Straight/Canted Leg

SPECIFICATIONS

This system employs heavy gauge steel columns screwed (for straight legs) or welded (for canted legs) to a steel mounting plate. Legs attach by threaded screws to standard particleboard laminate tops.

Table Legs

Legs are constructed of 1.5mm x 45mm o.d. steel tubing with a 125mm diameter flare over the top. All legs accept a leg socket with internal threads that allows for the attachment of casters or glides. The socket is made from molded nylon. Legs and mounting plates are shipped k.d. and can be assembled on-site with standard tools.

Straight Legs

Straight legs attach to underside of worksurface through the use of a concealed 2.5mm steel mounting plate, which is welded to the inside of the flared top section. The mounting plate has a center stud to facilitate mounting, and is held to the worksurface

by four #14 sized x 1-1/8" length screws. Straight legs may be installed or removed by spinning the leg relative to the top mounting plate without tools.

All straight legs mounted to the underside of the worksurface incorporate a 3-1/4" radius from the edge to the center of each vertical column. To determine the approximate spacing between vertical columns below the flared section, subtract 8-1/2" from the worksurface dimension in question (ex: a 30" dimension will allow 21-1/2" of clearance between the legs).

Canted Legs

Canted legs are welded to a 3.5mm rectangular mounting plate that is then attached by four #14 screws to the underside of the worksurface. Canted legs are available on select shapes and models only. Tables with canted legs are offered with glides only.

Base Options

Bases may be specified with four glides or

four casters. Only glides may be specified on canted legs. Caster kits and glides kits are also offered as accessories for replacement or retrofit purposes.

Glides are molded from nylon, and have external threads that mate with the internal threads of the leg sockets. Glides allow for 1" of height adjustment and/or leveling of the table, and come standard in flannel trim color. Glides may be used with both straight and canted legs.

Caster receptors are molded from nylon. Receptors have 7/16" diameter openings to allow for mounting of industry standard 73mm locking soft-tread casters. Casters are available as standard in flannel trim color. Casters are offered only on straight legs.

Straight ADA Table Leg Mounting

Straight ADA legs are the same leg mounting as standard length legs but are 3" longer. Legs raise the finished table height to 32".

ADA legs are not offered on canted legs.

Table Finishes

Inquire® table legs are available as standard in black powder coat oven-cured paint finish. Powder coat colors other than black are available at an upcharge.

Table Surface

Laminate tops feature a 1-1/8" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Tops are pre-drilled. Total dimension is 1-1/4" thick. See KI Color Addendum for standard laminate edge color selections.

Inquire® tables are offered in square, round, trapezoid, half-round, rectangular, and waveshape tops. Wave tops increase in dimension 6" to the side as the user is seated at the wave side. For example, a "right wave" top increases to the user's right. See drawings in pricelist for further clarification of wave dimensions and modesty panel placement on wave tops. KI tables can

Rectangular Table (SS Legs)

Wave Table (CC Legs)

Table with Modesty Panel (SS Legs)

Rectangular T-Base

Square X-Base

hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Modesty Panel/Wire Trough

Modesty panel/wire management troughs are constructed of an aluminum extrusion. Panels are mounted to underside of the worksurface using #12 screws, and can be mounted in either of two directions. In the outward modesty position, the opening faces the outside of the table to facilitate running cables off the back edge of the worksurface to the trough. In the inward modesty position, the opening in between the panel and the tabletop faces toward the inside, allowing for under-table wire management. Either direction provides modesty function for persons seated at the opposite side of the table. Modesty panel may be powder coated in standard colors.

Vertical Wire Management Clips

Vertical wire management clips control the routing of cables from the tabletop to the floor. Clips are molded from translucent

polycarbonate, and feature an open section that allows cables to pass through. Clips easily snap onto any leg.

Inquire "T" and "X" Base Specifications

This system employs heavy-gauge tubular steel columns and main bars in fixed T-Base and X-Base models. The columns and main bars are secured together along with a heavy-gauge steel mounting plate with a draw bolt to create the leg assemblies. The leg assemblies are then attached by threaded screws to standard particle board laminate tops.

Bases are shipped KD for greater shipping density and can be assembled on site with standard tools. Overall base height (with glides installed) is 27-3/4", which allows an overall table height of 29".

SPECIFICATIONS

Bases

The Portico™ double pedestal base table employs 14-gauge, 1-3/4" round steel upright columns and 16-gauge, 1-3/4" x 7/8" elliptical steel foot tubes in fixed, folding or flip-top models.

Portico™ includes T, TT, LX and cantilevered T base combinations. LX bases consist of 14-gauge, 3" round steel upright columns and 16-gauge, 1-3/4" x 7/8" elliptical steel foot tubes. Fixed table columns are welded to an 8" x 8" formedsteel plate.

Portico™ bases are available in powder coat or bright chrome finish with plastic trim pieces (end caps and column caps) that can be color-matched to the vinyl table edge colors. Plastic end caps are secured via a "forcefit." The column cap is secured via a #8 x 3/4" tap screw.

Adjustable glides are secured to the foot

tubes by threaded inserts. Self-leveling glides are available by Custom Option Request only.

Portico™ Table's Folding Mechanism

Built of 11-gauge, black zinc finish steel, the folding mechanism easily releases and folds leg tightly to table bottom and securely locks with two polypropylene clips. When opened, legs engage into place for a tight, rigid fit between leg and mechanism. Built-in nylon bumpers keep tables separated to prevent marring when tables are stacked on edge.

Table Surfaces

1-1/8" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Tops are pre-drilled. A "standard" table consists of a standard laminate worksurface and a 1-1/4" vinyl bullnose edge for any KI table base. KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Flip-Top

Standard flip-top table does not have a detachable top.

Portico™ Plus Ganging Mechanism

Built of black high-strength nylon, user-friendly ganger with pegs draws tables together. No tools are required when joining tables. Ganger is self-storing under table top. Mounting screws are provided. Tops are predrilled for placement of ganging pegs. Two gangers per table.

CAUTION: Gangers are not retrofittable to earlier purchased tables.

Folding Modesty Panels

.685" thick particleboard faced on both sides with laminate that matches table top. Modesty panels are 6-1/4" high by length of table. Mounting brackets are black and packed with the base. Table top and panel are pre-drilled. Lower edge of panel extends 8-1/4" from underside of table. Panel ships k.d.

Bright Chrome Finish

Surfaces are duplex nickel-chrome plated in a twenty-two step process.

Powder-Coated Finish

Hybrid powder coating is electrostatically applied. The dry coating is then fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and mar-resistant.

Quick-Release Modesty Panels

.685" thick particleboard faced on both sides with laminate that matches table top laminate. Lower edge of modesty panel extends 7-1/4" from underside of table.

Panel is easily removed from the table without tools. It locks into two 11-gauge steel retaining brackets and is removed by pulling down on vinyl-coated stainless steel release levers. Modesty panel is shipped k.d.

Rolling Base

SPECIFICATIONS

Synthesis® Table

This system employs double-column noncircular uprights on a horizontal base. It is offered in fixed, folding, and flip-top models. Composition includes T, TT, X and cantilever configurations.

Bases

Base is built of double-column aluminum extrusion non-circular uprights. A flannel colored plastic (polypropylene) trim piece accents the bottom and a Flannel colored powdercoated steel trim piece accents the top of the uprights. Feet are extruded aluminum and endcaps are diecast aluminum. Uprights, feet and endcaps are powdercoated in all standard colors. Adjustable glides attach to feet. Trim pieces are available only in flannel.

Rolling Synthesis® Base

Rolling Synthesis® base may be ordered with any 'T', 'TT' or 'C' base with 2 legs. The

embedded wheels are integral to the base construction and cannot be added or retrofitted to earlier purchases. When rolling legs are used, one person can easily move a table by lifting the end without wheels and "driving" the table. Not available on 'Flip bases', 'X' bases or Plus table bases.

Synthesis® Tables Plus Ganging Mechanism

Built of black high-strength nylon, user-friendly ganger with pegs draws tables together. No tools are required when joining tables. Ganger is self-storing under table top. Mounting screws are provided. Tops are predrilled for placement of ganging pegs. Two gangers per table. CAUTION: Gangers may not be retrofittable to earlier purchased tables.

Synthesis® Tables Folding Mechanism

Built of 11-gauge, black zinc finish steel, the folding mechanism easily releases and folds leg tightly to table bottom and securely locks with two polypropylene clips. When opened,

legs engage into place for a tight, rigid fit between leg and mechanism. Built-in rubber bumpers keep tables separated to prevent marring when tables are stacked on edge. Not available with Veneer tops.

Laminate Table Surfaces

1-1/8" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Tops are pre-drilled. KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Veneer Table Surfaces

Reed (RE) and Facet (FA) veneer tops feature 1-1/8" particleboard cores layered with wood veneer and finished with a seven-step catalyzed varnish. Plateau (PT) and Undercut (UC) veneer tops feature wood veneer post-formed over 1-1/8" shaped MDF board and are finished with a seven-step catalyzed varnish. Veneer worksurfaces are not predrilled unless for quantities greater than 50 tables per

model. Veneer surfaces are available in 5 standard KI wood stains. 96" veneer tops are two pieces. KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Knife Edge Styles (KN)

Knife Edge styles use an M3 particle board composition. The undersurface edge is sanded, stained and sealed. Tops are pre-drilled.

Flip-Top

Standard flip-top table does not have a detachable top.

Powder-Coated Finish

Hybrid powder coating is electrostatically applied. The dry coating is then fused and cured in a baking oven to form a smooth continuous film. Finish is chemical-resistant, hard, tough and mar-resistant. Chrome finish not available.

Synthesis® with PowerUp®

Tables are available with one or two power/data modules, PowerUp®, centrally located 4-1/4" from the front edge of table top. PowerUp® is a UL Listed, Relocatable Power Tap, which mounts flush into the table top. When flipped up, cover open, one (1) duplex receptacle and two (2) data ports are exposed. This channel, furnished with metal dividers, is provided for the routing of

the power supply cords and data lines.

The PowerUp® module is 6-1/4" long by 3" wide by 2-1/2" high when opened. It is provided with a 9 ft. or 15 ft., 3-conductor cord and is rated 120V a/c, 15A. The cover snaps into the upright position to allow cords to be unplugged without the cover closing. The data ports are molded to accept AT&T "M" Series, RJ45 jacks. The module can be modified to accept various brand jacks.

Cords are further managed by the vertical leg wire manager which comes standard with PowerUp®.

Leg Wireways

Scuff-resistant, translucent high-impact rigid plastic. Securely attaches over either of the double column uprights. Translucent only. One wireway per leg; ordered separately. One additional wireway may be attached per leg. Shipped KD.

Grommets

Plastic grommets are 3" diameter and recessed into table top. Cap is removable and has retractable slot cover. Two grommets per top. Grommets not available on 18" x 60" fixed base tables, 18" x 60" and 24" x 60" cantilevered base and folding tables (the exclusion of 18x60 folding does not apply for the 18x60 cantilevered folding). Grommets not available on standard veneertop tables. Grommet location for tables that are 36" deep and smaller will be on the corners of the table. Grommet location for the tables 42" deep and larger will be the centerline of the table. See graphics above.

General Information

SPECIFICATIONS

SYNTHESIS MODESTY PANEL

Modesty panel is constructed of an aluminum/steel frame, surrounding a choice of materials for filler panels. Modesty panel is offered in choice of two sizes: full modesty panel (MF) to allow for uninterrupted design, or short modesty panel (MS) for single-table or desking. Overall dimension are as follows: MF (full modesty panel): Nominal width of top x 10" tall x 1" wide, with a 1" cable gap at underside of table top, for pass-thru cabling.

MS (short modesty panel): Nominal width of top minus 6" x 10" tall x 1" wide with 1" cable gap.

Filler panel is field removable/replaceable using no tools. Entire modesty panel is attached to the underside of the table top using 2 each, 5/16-18 threaded pan head screws, into zinc, threaded inserts or two 5/16-18 thumb shoulder bolts. Both are included to allow the modesty panel to be tamper resistant (panhead) or to have tool-less modesty panel removal (thumb bolt).

Frame construction is .06 thick extruded profile aluminum rails, top and bottom with 10 ga (.13 thk.) formed steel hanger brackets at each end. All parts are fastened with steelscrews. Cast aluminum end caps complete each frame end. All frame components are powder paint coated. Aluminum rails and cast aluminum end caps are color matched. Formed steel hanger is standard black.

Filler panel construction may be:

a. 20 ga. (.036 thk.) formed, ribbed steel. Perforations effective opening is estimated at 20%. Insert is powder coated in choice of standard colors.

b. 3/8" thick, 6 ply plywood, with .025 thick laminate of choice, and .025 thick backer. Edges are cut to finished dimensions and bare (not banded or finished).

Customer may supply own 3/8" thick material of choice, cut to finished dimension. UL - HB rating minimum is required. A special order is required for this option.

CONCEALED WIRE MANAGEMENT (TT- LEGS ONLY)

Concealed wire manager consists of 20 ga (.036 thick) powder coated formed steel panel assembled to the outside of the leg using one screw. Color is standard "Flannel".

Inside of leg is molded 1/8" thick, High Impact Polystyrene vacuum-formed vertical wire/cable channel, attached using two screws and a steel fixing bracket on the underside of the table top. Plastic channel standard color is black with lightly textured surface. Fixing bracket is powder coated standard color "Flannel".

Basic dimensions for the wire manager are; 8-3/8" x 2-1/2" x 26". Wire handling capability is large enough for one 1-1/4" dia bundle or single cable, or approx. 8 square inches total area for cordage.

PIN HEIGHT ADJUSTABLE BASES

Standard double column, fixed T-base construction with trim accents applied (top accent trim will be covered by sheath). Height adjustability is accomplished using extruded aluminum channel, over the dual aluminum columns. Aluminum is powder coated and color matched. Steel spring loaded pins, actuated by finger pressure, adjust table height from 27" to 32", in one inch increments.

SPECIFICATIONS

Trek® Pedestal Table

This system employs heavy gauge tubular steel components in fixed, folding, or flip-top models. Trek® includes T, TT and X base configurations. Fixed table column welded to 1/4" solid steel plate.

Bases

Built of 2-1/4", 14-gauge round tubular steel leg column with steel end cap and 16-gauge steel tapered legs elliptically swaged down to 1" diameter at end; highly durable, smooth powder-coated finish. Adjustable glides or casters are secured to the legs. Two casters in each set shall have wheel brakes (locking).

Trek® Tables Plus Ganging Mechanism

Built of black high-strength nylon, user-friendly ganger with pegs draws tables together. No tools are required when joining tables. Ganger is self-storing under table

top. Mounting screws are provided. Tops are predrilled for placement of ganging pegs. Two gangers per table. CAUTION: Gangers are not retrofittable to earlier purchased tables.

Trek® Tables Folding Mechanism

Built of 11-gauge, black zinc finish steel, the folding mechanism easily releases and folds leg tightly to table bottom and securely locks with two polypropylene clips. When opened, legs engage into place for a tight, rigid fit between leg and mechanism. Built-in rubber bumpers keep tables separated to prevent marring when tables are stacked on edge.

Table Surfaces

1-1/8" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Tops are pre-drilled.

A "standard" table consists of a standard laminate worksurface and a 1-1/4" vinyl bullnose edge for any KI table base. All Knife(KN) edge styles will use an M3 par-

ticle board composition. The undersurface edge is sanded, stained and sealed. KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Flip-Top

Standard flip-top table does not have a detachable top.

Folding Modesty Panels

.685" thick particleboard faced on both sides with laminate that matches table top. Modesty panels are 6-1/4" high by length of table. Mounting brackets are black and packed with the base. Table top and panel are pre-drilled. Lower edge of panel extends 8-1/4" from underside of table. The modesty panel is shipped k.d.

Bright Chrome Finish

Surfaces are duplex nickel-chrome plated in a twenty-two step process.

Powder-Coated Finish

Hybrid powder coating is electrostatically applied. The dry coating is then fused and cured in a baking oven to form a smooth continuous film. Finish is chemical-resistant, hard, tough and mar-resistant.

Trek® Lightweight Table

Top is 5-ply construction consisting of .050" thick laminate, 5.2mm 3-ply plywood, .75" thick high-density particleboard frame with honeycomb core, 5.2mm 3-ply plywood and .040" HPL backer.

Quick-Release Modesty Panels

.685" thick particleboard faced on both sides with laminate that matches table top laminate. Lower edge of modesty panel extends 7-1/4" from underside of table. Panel is easily removed from the table without tools. It locks into two 11-gauge steel retaining brackets and is removed by pulling down on vinyl-coated stainless steel release levers. Modesty panel is shipped k.d.

The underside of the table is provided with a hinged plastic channel (cord management trough) which covers the bottom of the module. This channel, furnished with metal dividers, is provided for the routing of the power supply cords and data lines.

The PowerUp® module is 6-1/4" long by 3" wide by 2-1/2" high when opened. It is pro-

vided with a 9 ft. or 15ft., 3-conductor cord and is rated 120V a/c, 15A. The cover snaps into the upright position to allow cords to be unplugged without the cover closing. The data ports are molded to accept AT&T "M" Series, RJ45 jacks. The module can be modified to accept various brand jacks.

SPECIFICATIONS

Laminate Surfaces

1-1/8" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Laminate Top Edges

Wood edges of solid red oak with a clear lacquer finish are standard. Options include: Radius or square corners. Bullnose edges in vinyl with radius corners. 74P edges have square corners.

Laminate Top Wood Edge Finish

Exposed wood is protected by a conversion catalyzed lacquer.

Perimeters® Edges

Perimeters® edge is a resin edge molded to the core, creating a homogeneous link and a seamless union with the laminate. Overall

thickness is 1-1/4". Corners are radius or square.

The resin edge is a yielding, matte finish. Perimeters® is a registered trademark of Tables International and is used under license by KI.

Veneer Surfaces

1-1/8" thick high-density particleboard core. Veneer thickness varies with species, 1/28" to 1/40". Bottom surfaces are veneer to resist warpage. Top surfaces are center-matched for one-piece tops; end matched for two-piece tops.

Veneer Top Edges

Edges of solid hardwood lumber to harmonize with veneer surface.

Veneer Surface Finish

Wood surfaces are protected by a catalyzed alkyd urea finish.

Pattern Variations

Because of variations in veneer and laminate

patterns from suppliers, KI cannot guarantee the exact matching of patterns on large conference table tops.

Wood Color Variations

High quality wood table edges and surfaces are characterized by distinctive natural colors and grain patterns. Due to natural variations of fine woods, it is impossible to exactly match colors and grains with consistency.

Radius wood corner colors may not match side edges due to exposed end grain.

Standard Table

A "standard" table consists of a standard laminate worksurface and a 1-1/4" vinyl bullnose edge for any KI table bas
