How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M., C.O.L. and C.O.V. Testing

KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production

Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1" square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

Intricate Patterns

In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

Diagram B

Treated Materials

If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders

If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.V. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L. and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

SPECIFICATIONS

Torsion® Seat
Seat and Backrest

Seats and backrests are molded compound curved polypropylene with a textured finish. Seat is two-piece construction. Upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the backrest and 15/16" on the seat.

Backrest Supports

Two die-cast aluminum backrest supports attach the backrest to the Torsion® mechanism. A steel tube is cast into each backrest support for added strength.

Torsion® Mechanism

The back flex is achieved by the Torsion® mechanism. It consists of two flat torsion springs captured at both ends by brass bushings which in turn engage with the backrest supports. The Torsion® mechanism creates gradually increasing resistance over the full 12° of back flex.

Design

Designed by Giancarlo Piretti and manufactured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A.

Intellect Wave™
Shell

One-piece contoured shell shall be made of static-free, high-impact polypropylene. Colorfastness ensured through complete color impregnation throughout the molded part. Strength and durability shall be assured through an engineered internal structural cavity which eliminates the need for unsightly ribs on the back of the shell. Rolled edges for comfort and strength. Textured front and back. Wide, ergonomic handle molded into chair back for ease of mobility. Shell fastens to frame with six 3/16" multi-grip, high-strength steel rivets.

Strive®
Shell

Injection-molded polypropylene backrest with integral steel cantilever springs. The

combination of the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5mm diameter chrome silicon valve spring wire. The injection-molded polypropylene seat and shroud shall be attached direction to the back structure. The underseat support structure is die-formed 13-gauge steel welded to a 1" O.D. x 14-gauge tubular steel cross member. An optional upholstered seat shall be constructed of molded urethane foam attached to an injection-molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners. An optional upholstered back shall be constructed of 1/2" thick urethane foam attached to an injection-molded polypropylene back board, then upholstered using a draw-string process. The assembled back pad is attached to the back by means of fasteners which are exposed and are color matched to the polypropylene.

Seat Height Adjustment

Seat height adjustment shall be available via pneumatic cylinder. Lever-controlled pneumatic height adjustment has infinite height selection within the range. Seat swivel shall be standard. An optional auto height, auto return cylinder is lever-controlled pneumatic height adjustment with infinite height selection within a range and returns seat to the highest forward position when unoccupied, leaving an orderly look to any room.

Worksurface

Worksurface construction shall be 3/4", 45# density, MDF worksurface with .030' laminate, .020" paper backer, and 74P edge. Square and rectangular worksurfaces shall have comfort curve on user side and 1.5" radius corners. Tops are predrilled.

Worksurface depth adjustment shall allow for 4" of belly room adjustment via holes in the spider plate and metal inserts in the worksurface.

**Wire Book Rack
(360WBR)**

**Plastic Book Box
(360PBR)**

Dimensions

Overall width	23"	23"
Overall depth	12"	12"
Worksurface height	4"	4"

Frame

Desk frame shall consist of one unitized welded frame consisting of a 1.00" x 3.00" x 14-gauge elliptical steel tube, 1.75" OD x 14-gauge round steel tubing, 13 ga. formed pipe, and a 0.250" thick steel plate. The 13 ga. steel tube is formed to a taper to accept the pneumatic cylinder for the seat.

Front and Rear Rollers

Front and rear rollers embedded in a grey TPU overmold to reduce floor marring. Front roller orientation with die-cast aluminum housing shall allow wheelbarrow type movement of desk when seat is lifted. Weight-activated rear roller orientation in die diecast aluminum housing shall allow desk rotation around worksurface column. Rear rollers compress when desk is occupied transferring the weight to three glides preventing movement. Glides will have a non-skid grey base.

Finishes

Metal surfaces are finished with baked-on,

electrostatically-applied, 30 sheen epoxy powder coating.

Wire Book Rack

Wire book rack construction is of .250" diameter steel wire.

Plastic Book Box

Plastic book box construction is of .150" thick thermal-formed polystyrene.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering Torsion® or Dorsal® seats. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1441 Ontario Street
Green Bay, WI 54311

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

SPECIFICATIONS

Frames
Duplex nickel chrome plated or powder coated .75 x 1.5" o.d. x 15-gauge elliptical steel tubing.

Seat and Back
Solid, molded, 1/4" thick, ABS plastic attached to frame with screws.

Tops
Solid, molded ABS plastic with comfort curve along back edge, integral pencil grooves on each side. Glue-in, high-pressure, vertical-grade laminate insert is bonded into recessed area on desk top and has a shallow transition between laminate and the ABS edge.

ADA Top
Worksurface construction shall be 3/4". 45# high-density particleboard core with 0.030" high pressure laminate top, phenolic backing sheet, and 73P (2mm) edge. Radius corners

with comfort curve along user side.

behind seat back on chair on either size double-entry desk. Made of black nylon.

Glides
Glides are made of two components—the glide body and the glide cap. The glide body is made of heavy-duty nylon plastic for strength and durability. Front and rear nylon glides feature a molded plastic bottom with a flat contour for better weight distribution. The bottom is molded to the glide body for a secure bond. Rear steel glides consist of a zinc cap attached to the bottom of the glide body. Felt caps are also available for the bottom of the nylon glides and are field replaceable. The rear glides are angled to prevent tipping and act as a wallsaver. (Note: Specification of the swivel glides will increase the height of the product by 1".) A felt cap can be added to either the steel or nylon glide for enhanced floor protection. Steel glides are recommended for carpet floors and felt caps are recommended for tile floors.

Chair Handle
Ergonomically designed handles are located

Book Box
Optional solid, molded ABS plastic book box installs by sliding into integral steel track on underside of desk. Book box can be used as storage tote when removed from the unit. Stacks up to ten high. Can be used as a computer keyboard tray when in the extended position. Can be fitted with optional mouse tray.

Mouse Tray
Arced piece of solid, molded ABS plastic can be added to optional book box when used as keyboard tray. Slides side-to-side for either left- or right-handed use.

SPECIFICATIONS

Shell
One-piece contoured shell made of static-free, high-impact polypropylene. Colorfastness ensured through complete color impregnation throughout the molded part. Strength and durability shall be assured through an engineered internal structural cavity which eliminates the need for unsightly ribs on the back of the shell. Rolled edges for comfort and strength. Textured front and back. Wide, ergonomic handle molded into chair back for ease of mobility. Fastens to frame with six screws. Upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the back and seat and fastened to an inner shell with screws.

Frames

Cantilever Chair, 4-Leg Chair, 4-Leg w/ Casters, Music Chair, and Cafe Stool
.75" x 1.5" O.D. x 15-gauge elliptical steel

tubing welded to a 14-gauge steel plate. Frame shall be duplex nickel chrome plated or powder coated after all welding processes are complete.

Task Chair and Stool
The frame is constructed of a 12-gauge wire rod attached to the chair frame with a lever-activated pneumatic cylinder for seat height adjustment. Available with a seat tilt mechanism on armless chairs only. Tilt knob and a tilt lock on the seat height adjustment lever.

Book Rack (under seat)
External framework of 5/16" diameter solid wire rod attached to the chair frame with 4 screws. Cross braces of 5/16" diameter solid wire rod welded between the external framework. Book racks offered assembled at factory (cartoned "CTN" only). Chairs with book racks cannot stack and do not include stacking bumpers. Chrome only.

Glides
Swivel type polished zinc-plated steel, nylon, or felt Solo glides available. (Note: Felt Solo glides will increase the height of the product by 1/4".) Refer to the Glide Selection Guidelines for recommendations by floor type.

Glides - Task Chair and Stool
Adjustable molded, high-impact plastic glides.

Casters - Task Chair, Task Stool, and 4-Leg Chair w/Casters

Carpet Casters
Double wheels of high-impact thermoplastic. High-impact plastic frame. Black finish only.

Hard Floor Casters
Double wheels of soft plastic. High-impact plastic frame. Black finish only.

Pneumatic Height Adjustment - Task Chair and Stool
Lever-activated pneumatic cylinder enables seat height adjustment from 16-1/2" to

21-1/2" (large chair), 14" to 16-1/2" (medium chair), and 20-1/4" to 30-3/4" (stool).

Base

ADA tops measure 36-1/2" x 20" and the hard plastic ADA tops do not have a comfort curve or pencil groove.

Two Student Desk top measures 19" x 60" and is only available in 3/4" laminate. Two Student Desk has two comfort curves.

Contour Tripod Desk top measures 30-1/2" x 31-3/8" x 37-1/5" and is only available in 3/4" laminate.

Cantilever and 4-Leg Desks have choice of curved or straight front hard plastic top. Straight front tops are recommended when desks are back to back or when stacking flat on the desk is a requirement.

Tablet Arm Chair

Tablet boards are 5/8" 11-ply plywood core with high-pressure laminate with clear coat edge and plain backer sheet. Effective working surfaces:
Standard tablet arm = 14" x 11"
Laptop tablet arm = 18" x 14"
G2-tablet arm = 10" x 13-1/2"

Instruct® Classroom Furniture

Specifications

All Terrain® Instructor's Desk

Unit is based on a 22" deep x 22" wide and 35-1/2" high storage tower. The tower has three adjustable metal shelves and one laminate rollout shelf at the bottom of the storage unit. At the top of the storage tower is a landing pad that is made of 3/4" laminate with 74P edge, this surface is raised 3-3/4" above the top of the storage tower with aluminum extrusions.

A 1-1/4" thick laminate covered surface with a 74P edge is attached to the side of the storage tower on one end and supported by a 3" diameter support leg on the other end of the unit. There is a perforated partial modesty panel that is suspended from the underside of the surface. This modesty panel covers the area from the storage unit to the support leg.

There are three open grommets and one covered grommet for wire management on the storage tower. One grommet is on the top of the storage unit directly below the one covered grommet on the landing pad. The other two grommets are above and below the worksurface on the inside of the desk unit.

All Terrain® Mobile Instructor's Desk

This unit has an All Terrain® Binder Tower with the lectern option. Also there are four open grommets at the top and bottom of each of the binder's sides. There is a surface that is attached to the side of the Binder Tower and supported on the other end by an All Terrain® Table leg with casters. There is a perforated partial modesty panel that attaches to the leg and the binder tower.

Locks are standard on the Mobile Instructors' Desk with steel doors. Locks are not available on doors with acrylic doors. Locks are a high-security double-bit design. One KI break-away key and one standard key are included with each lock.

700 Series Instructor's Desk

This unit is identical to the standard 700 Series Desk with the following changes. The desk has a peninsula shaped top that overhangs the desks frame to allow for collaboration with students. The frame of the desk has a 12" deep bookcase that is the end panel opposite the peninsula overhang. The bookcase is 30" or 36" wide, which is the depth of the desktop. This unit is non-handed, there is no left or right, the side with the bookcase can be reconfigured after install should the need arise.

WorkZone Instructor's Desk

The WorkZone Instructors' desk is based on a standard WorkZone square shoe unit that has a worksurface supporting pedestal (BBF configuration) to support the extended side of the square shoe and a cantilevered frame on the other end. The surface is 1-1/4" thick with a high-pressure laminate.

All Terrain® Binder Tower (Lectern option)

The lectern option can be added to any All Terrain® Binder Tower that has both a land-

ing pad and outriggers. The podium option is an angled landing pad to allow better viewing for the instructor.

All Terrain® binder towers are available in heights and drawer combinations to suit personal or shared storage requirements. Binder towers specified without drawers are optimized for book, binder or bin storage. These units include two adjustable shelves. Units may be specified with a single file drawer that can be used for letter files, legal files or bins, or for A4 files. Units with a file drawer include one fixed and one adjustable shelf and may also be specified with pullout pencil drawer.

All Terrain® binder towers may be specified with or without a door, on casters or glides with outriggers. The binder tower always includes a laminate either directly attached or as a raised landing pad. These tops can be specified as bowed front rectangular or as shaped.
