Environmental Statement

We make every effort to ensure that Maco's products are manufactured from materials that are CARB compliant, FSC Certified and have core veneers from sustainable managed plantations. Our 100% solids U.V. finish exceeds standards set by LEED'S for emissions and EQC4 indoor air quality for school environments.

A responsible and sustainable commitment to our environment is much more than a public relations effort. At Maco, it is a daily way of life. Our products touch the lives of children daily, thus our dedication to environmental stewardship is priority one.

When possible, we avoid using cardboard packaging. All of our cartons have a high percentage of post consumer content and are completely recyclable.

Our respect for the environment, our commitment to responsible and sustainable manufacturing and our promise of environmentally driven manufacturing initiatives demonstrate Maco's promise to pass to our children a better, cleaner world.

This brochure was printed on recycled paper.

Indeco Sales/Maco Mfg., Inc. is a family owned and operated business. We have been serving the education market since 1969. We own and operate two corporations, one being a sales company, the other a manufacturing plant.

Our motto is "A Satisfied Customer is Our Best Salesman" and we would like to earn your business.

Choose Your Style

Franklin Series

Maco products have been relied upon by schools and municipalities for years, featuring two distinct series: Designer and Traditional. These series names have been more a reference to the materials from which they are constructed rather than an aesthetic look. Our **Designer Series** features balanced hardwood veneer core construction and is, by far, what we sell the most of. The **Traditional Series** utilizes solid hardwoods in the upright panels and shelves. These names reference the type of material and construction methods used. As the marketplace evolved (and continues to do so...) we have as well!

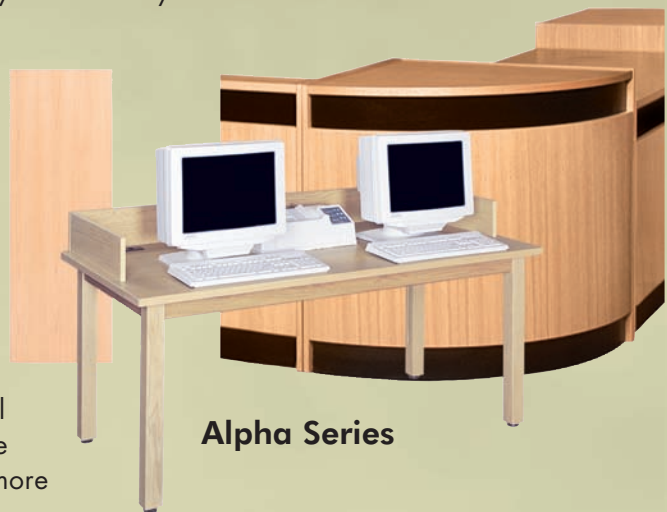

Our new product designs allow you to add a distinctive look to your library and media center environment to attract and retain more patrons. Throughout this catalog you will notice several new design styles with many more to come.

Momentum Series

The **Franklin Series** features elegant designs from a bygone era, lending a stately appeal to your library environment.

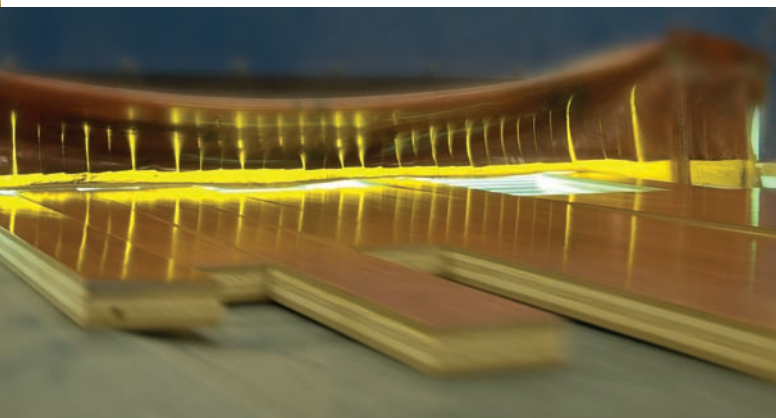

Our **Momentum Series** uses a combination of metal accents and laminate inlays to provide a more contemporary style.

Alpha Series

The **Alpha Series** is our "tried & true" offering with sleek lines and flow throughout. All circulation desk series are equipped with continuous wire chases throughout the assembly for easy cable management.

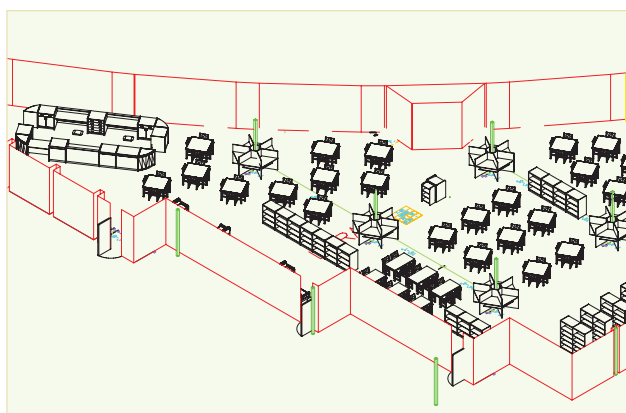

U.V. Finishing

An extremely high solids method, U.V. finishing is environmentally friendly and consistent in color, sheen and texture. It is a "State of the Art" process that is far superior to traditional sprayed finishes in durability and appearance.

Our 100% solids U.V. finish exceeds standards set by LEED'S for emissions and EQC4 indoor air quality for school environments.

Custom Design Services

Let Maco help you plan and design the perfect library space. Our experienced staff has the knowledge to design and specify a facility that is both functionally and aesthetically pleasing.

Table Construction

The combination of a steel plate bolted into threaded steel inserts and a corner bracket with a threaded lag bolt attached to both the leg and solid oak aprons make this the sturdiest table on the market.

Warranty

Maco warrants its products to be free from defects in materials and workmanship under normal use and service for 20 years from the date of installation.

Momentum Series Contemporary design

Open style patron
ledge for better
field of vision

This unique modular system offers versatile function and flexible design. The system allows abundant placement and configuration of different modules to optimize space and to create functional work areas. Some highlights of the system:

Full Wire Access

Removable front panels reveal a 4" deep wire raceway for continuous cable flow. Grommets in the work surface and interior panels allow for easy flow into and out of the wire raceway. Cut-outs in the bottom

panels of the raceway allow access to power and data connections in the floor. Remove any front panel at anytime for easy, immediate wire access to that section.

In addition, the removable front panels are available in multiple design options that are fully interchangeable to create different styles and personalities.

Customized designs are also available.

Easy cable access with
removable panels.

Continuous cable flow

details:

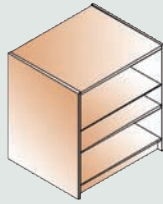

Our Circulation desks have features such as **solid hardwood drawer boxes** with old world dovetailed joinery. Additionally, they include **premium grade architectural hardware** that meets ANSI/BIFMA requirements for institutional specifications.

Select Rift-cut veneers are used on all circulation desk fronts, making our desks as beautiful to look at as they are to work with.

SHELVING

wood shelving

Maco's wood shelving is made from the finest red oak materials, selected for color and uniformity of grain pattern to ensure a truly pleasing appearance.

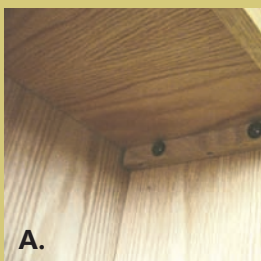

Both shelves and uprights are a full 1" thick (Designer Series) and will support fully loaded shelves with no flexing or bowing.

Oak plywood backs are included, adding value and structural integrity.

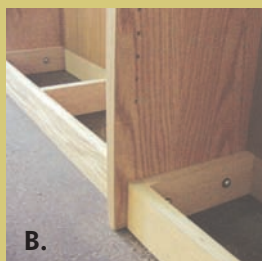

Starter and Adder configuration allow full flexibility for your requirements.

The Indeco Sales/Maco Manufacturing Story

INDECO Sales, Inc. / MACO MFG., is a family owned and operated business. We have been serving the education market since 1969. We own and operate two corporations, one being a sales company, the other a manufacturing plant.

Our motto is "A satisfied customer is our best salesman" and we would like to earn your business.

We offer the finest quality products at the lowest price in the educational market.

Our service is second to none, we service what we sell and we sell service. If you purchase our products, we guarantee you will be satisfied.

We have our own fleet of trucks and when possible, deliver all of our products on our trucks.

The corporate headquarters is located in Belton, Texas on 16 acres of land with 300,000 square feet of manufacturing and warehouse facility.

We invite you to come see us anytime at your convenience. Please come visit and tour our facilities.

CUSTOM CAPABILITIES

Whether you need a special size, design or edge detail, Maco can modify its products to fit your special needs and applications.

Maco Products can be ordered in other wood species, custom stains, steel colors and other laminates not part of our standard offering.
