

WEAPONS RACKS
AND STORAGE

MISSION SPECIFIC. ADAPTABLE. SECURE. FOR ANY ENVIRONMENT.

Universal Weapon Storage Solutions
designed to meet the growing
demand for adaptive weapons
security and storage configurations.

GLOBAL EXPERIENCE AND EXPERTISE.

TSI understands the specific requirements of effective weapon storage systems design and construction. Through 15 years experience working closely with military, law enforcement and security forces around the world, TSI has developed solutions to satisfy individual organizational needs and specific requirements.

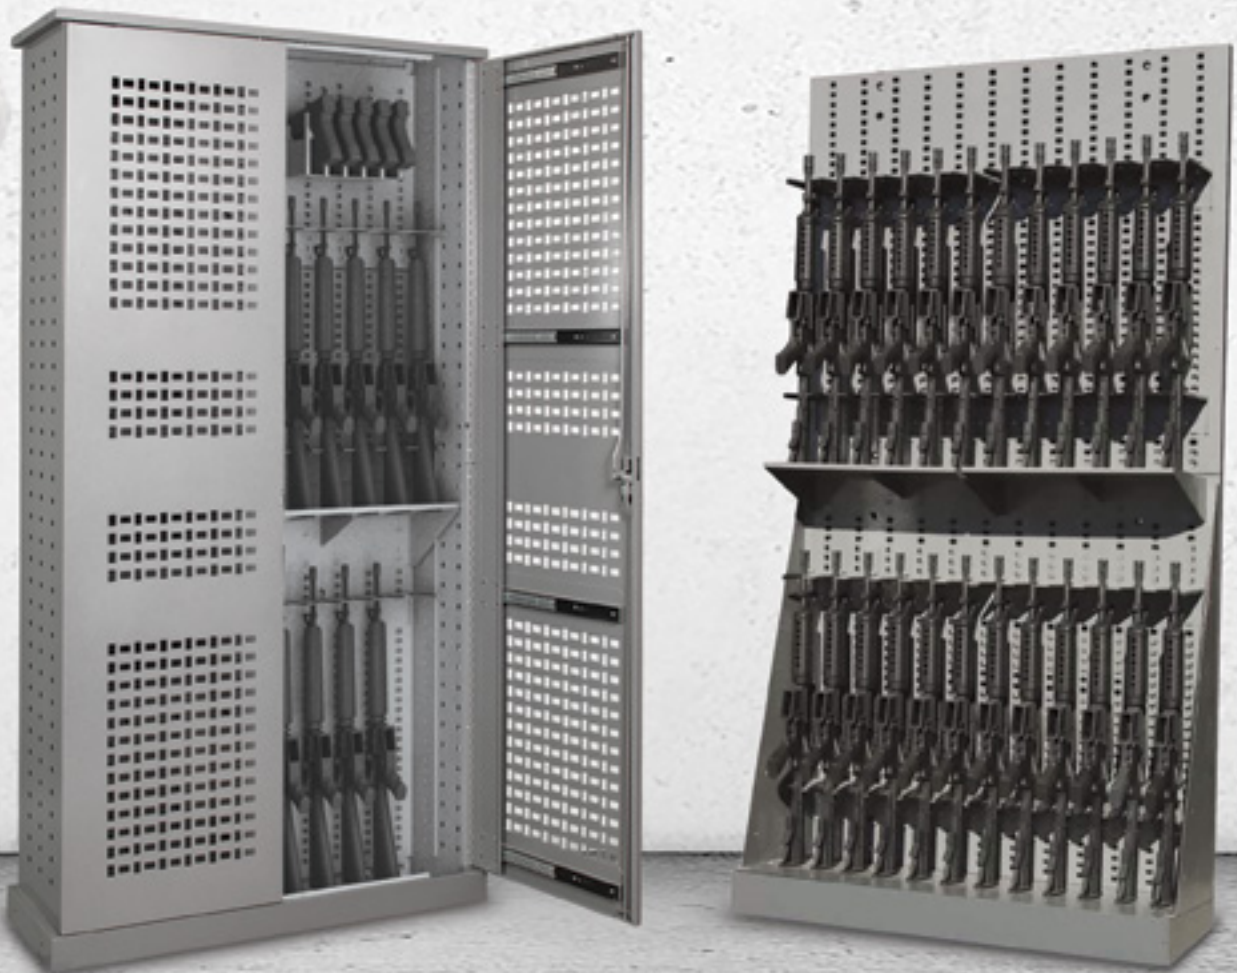

This depth of experience and commitment to “Strength of Industrial Quality” has provided TSI and Borroughs with the foundation to create advanced systems and solutions to meet practically any need for quality universal weapons storage in the world today. Every component, from basic Universal Weapons Racks to highly specialized cabinets and multi-purpose systems, has been designed from the ground up, delivering exceptional results.

EXPERIENCE

OUR RESPONSIBILITY.

Military forces and Law Enforcement agencies around the world depend on quality, durability and performance in their equipment. Storage and organization systems designed specifically to secure this equipment should deliver the same standard.

STRENGTH. DURABILITY. INTEGRITY.

SOLID STEEL WEAPONS CABINET AND RACK CONSTRUCTION

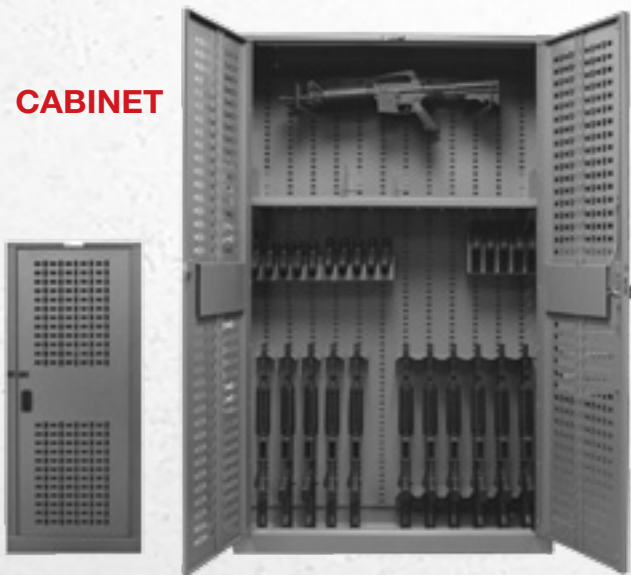

The world leader in steel storage design and engineering, Borroughs combines quality materials, advanced engineering and industry-leading construction to create weapons racks, cabinets and modular components with durability and functionality not readily available in competitive products.

- The only U.S. manufacturer using heavy duty, 14 and 16 gauge steel construction.
- The only cabinet that can hold 16 rifles across, providing 20% higher storage density than the competition*

Weapons can be mounted vertically or horizontally in a mixed configuration.

CABINET

Cabinets are available in heights of 50", 72" and 84", and in widths of 22" and 44" and are 15" deep. Cabinets can be secured to other units in side-by-side, back-to-back or stacked configurations, or secured to walls and flooring for added security. Cabinets meet AR-190-11 specifications and are deployable as shipment containers. Mobile Transport Carts are also available.

RACK

Racks are available in heights of 44" and 84", and are 15" deep. Specifically used in secure areas such as armories and vaults, racks can be secured back-to-back or continuous side-by-side configuration.

CART

* 44" compared to 42" wide competitive cabinet. TSI provides 16 rifle capacity for only 2 inches of additional width.

ADVANCED ENGINEERING AND INDUSTRY-LEADING CONSTRUCTION

14 and 16 Gauge
Heavy Duty
Steel Construction

14 16

CABINET

Single sheet, wrap-over cabinet design, which requires fewer welds, enhances strength and structural integrity.

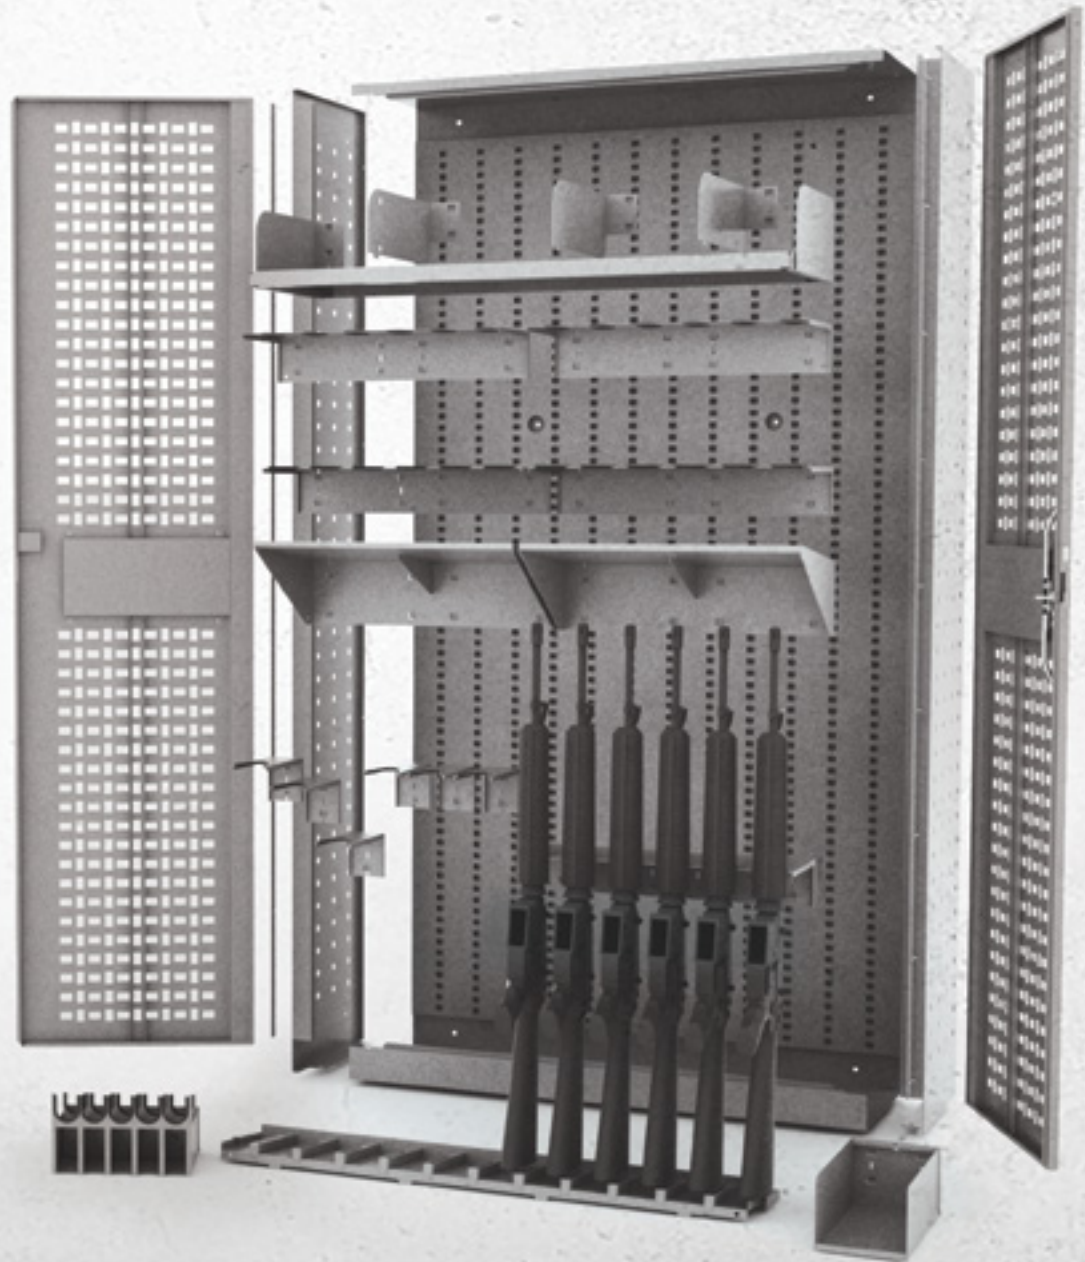

DOORS

Single sheet, 16 gauge steel doors provide excellent security and are perforated for quick sight inventory. Cabinet door rigidity and visual inspection is further enhanced by the fully perforated, full-length hat channel.

Cabinet doors feature three-point locking systems with padlock hasps, and a choice of hinged or sliding recessed doors.

SHELVING

Borroughs steel Box Edge® construction adds strength and integrity to TSI cabinets and racks. The smooth Box Edge finish also provides catch-free access and utility.

MODULAR. ADJUSTABLE. EASY.

UNIVERSAL AND SPECIALIZED WEAPON AND ACCESSORY STORAGE COMPONENTS

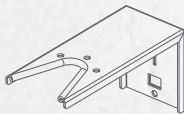

Modular weapons brackets and retainers are available for all small arms worldwide, including the complete U.S. Military arsenal. Any weapon package, special equipment, including optics packages, can be easily configured and stored to meet specific armory security requirements.

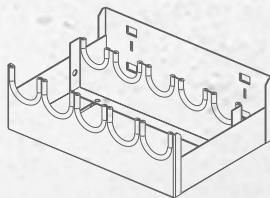

Standard brackets, shelving and/or pistol posts can be configured for multiple weapons or complete 1:1:1 packages.

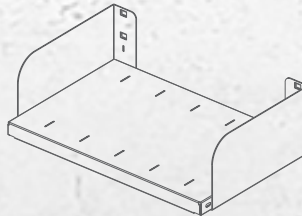

GO AHEAD. ACCESSORIZE.

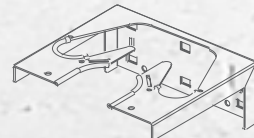

Universal Brackets

EXPANDABLE. EFFICIENT. DYNAMIC.

REDUCED FOOTPRINT WITH HIGHEST DENSITY STORAGE AVAILABLE

TSI Weapons® storage systems, by Borroughs, can be easily reconfigured and expanded to meet any future armory growth or changes in armament requirements and new weapon additions. Beyond the modular flexibility of TSI Weapons cabinet and rack systems, Borroughs also offers a wide range of additional storage solutions for optics, specialized gear, protective equipment and field wear. Borroughs also provides space saving storage solutions allowing armories to expand weapon and equipment storage capacity in an existing facility space.

TSI modular drawer and racking systems provide secure, safe storage of optics, tactical gear and equipment.

Cabinets and racks can be easily added, stacked and mounted onto mobile Aisle-Saver carriages. The smaller storage footprint provides the highest possible storage density with ease of sight inventory, movement and control.

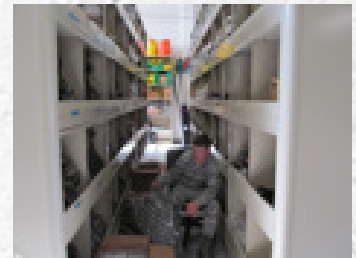

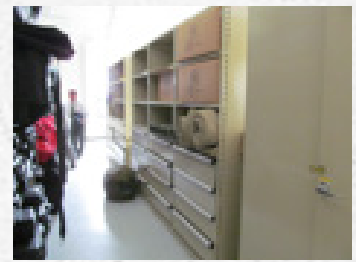

SITE: MACDILL AIR FORCE BASE TAMPA, FLORIDA

In 2010 Borroughs Corporation was selected to design, manufacture, and install an advanced storage system for The Special Security Forces in charge of all base security at MacDill Air Force Base located in Tampa, Florida. The building in which the system was designed was retrofitted to accommodate 3 zones of storage. The first, a warehouse area, utilized Borroughs' B-Span® wide-span shelving. The shelving is ideal for oversized, hard-to-store items ranging from office paper to ammunition. The second area utilized Borroughs' Aisle-Saver® mechanical system. This system was installed to hold tactical gear (sleeping bags, vests, helmets, etc....) for high-pick or high-traffic areas. The third and final area was a secured armory, where TSI Weapons cabinets were mounted onto mobile Aisle-Saver carriages. The smaller storage footprint provided the highest possible storage density with ease of inventory, allowing for quicker weapons retrieval than traditional storage.

SITE: KALAMAZOO VALLEY POLICE ACADEMY – GROVES CENTER

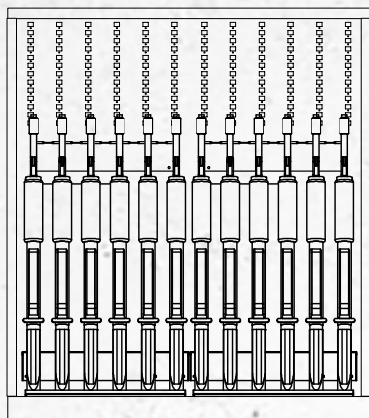

In 2014 Borroughs and their line of TSI Weapons cabinets were selected to optimize the Kalamazoo Valley Police Academy's storage needs. The KVCC Police Academy was in need of weapons storage that would mirror those used at an offsite shooting range where cadets could learn and fire weapons in a controlled environment.

The solutions were cabinets designed to store training handguns (Glock 9mm), training rifles (Colt 9mm), ammunition and magazines. In addition, for security purposes, the cabinets needed to provide the Arms Instructor with an instant sight inventory. The TSI Weapons cabinets have increased the program's ability to provide consistent weapons storage for cadets today and into the future.

PRE-CONFIGURED STORAGE SYSTEMS

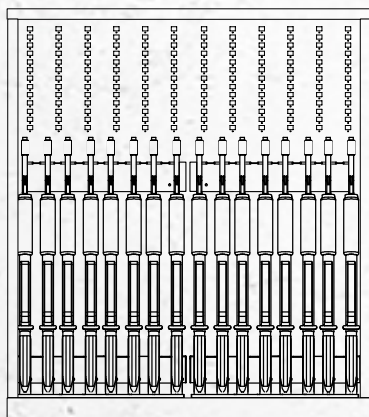

UNIVERSAL WEAPONS CABINET TWC-5012L

ACCOMMODATES: 12 - M4, M16 OR M500

12
