Building an Office in Five Easy Steps

Begin by evaluating the storage needs of your application and then the aesthetic goals for the space. X Series offers the broadest range of aesthetic design options, including executive styles, surface material choices, edge options, multiple pull styles, casters, legs, perforations, and transluents. V Series has a more limited statement of line and fewer options, but is a quality choice for cost-conscious applications. Both X Series and V Series caseloads, files, and storage can be integrated together to achieve multiple design and budget requirements.

Caseloads offer several steel modesty panel options, desk-height power, and Vertical Storage Units that can accommodate task lighting. Vertical Support Unit support brackets allow additional design options. Files and storage choices include pedestals, bookcases, wardrobes, storage units, lateral files, combination units, and personal storage tower options.

Regardless of what line is selected, a solution can be crafted for your office application from X Series and V Series. However, when planning, you should consider the following:

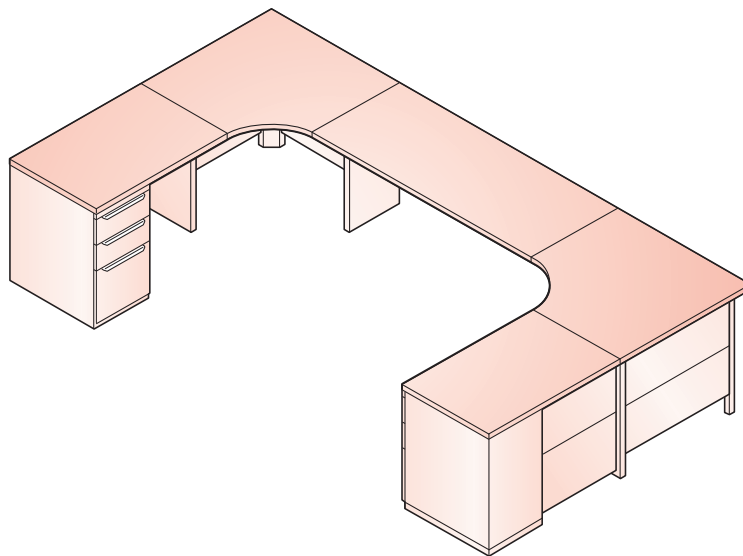

- Overall environment
- Future needs
- Privacy requirements
- Frequency of reconfiguration
- Human performance factors
- Technology needs
- Integration needs
- Surface options (aesthetics)
- Overall project budget

Step One: Specify Casegoods

Determining the overall layout of the workplace is by far the most challenging step in planning an office, but start by determining how many people are to be working in a given space and if the workspaces are to be connected, adjacent, or freestanding. Then identify the need for executive offerings, returns, credenzas, bridges, corners, wrap-arounds, and pedestals to fit the office layout. From there, select elements such as modesty panels where necessary for either privacy or access to wall power outlets.

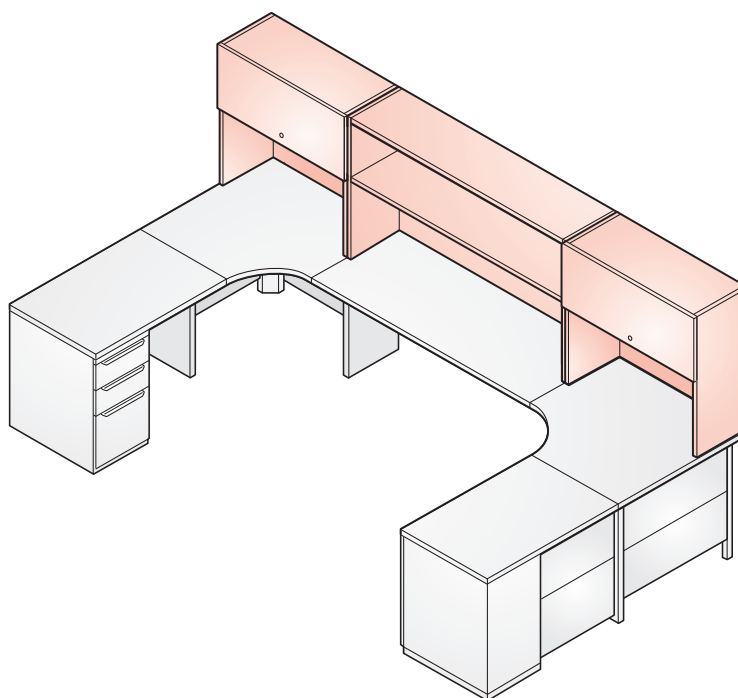

At this junction, worksurfaces also need to be selected as this will vary on what line has been selected. X Series comes in both wood and laminate; V Series standard in laminate. Worksurface edge options also need specifying.

Step Two: Specify Upper Storage

Upper storage, besides bringing additional storage to your application, can also be used to create systems with very different looks. A system without any upper storage is very open and affords no privacy to the occupants. Depending on the application, this may be desirable — or upper storage may be added to create privacy between workers. Vertical Storage Units (VSUs) can be used to create one “wall” or positioned end-to-end and corner-to-corner to create a more enclosed and private workspace. The arrangement is completely adaptable to your needs.

VSUs come in either open or closed options. If security is a priority, select a closed unit with a lock. An open VSU works exceptionally well for binder storage. Both styles working together add variety to the application and can simultaneously serve many needs.

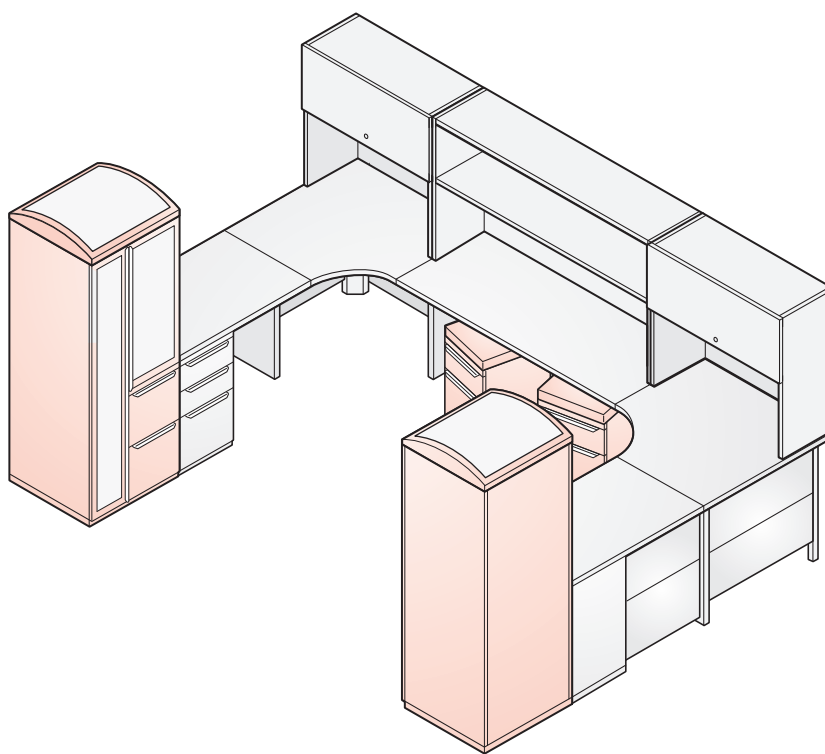

For Vertical Storage Units, specify the optional tackboard and task light at this step.

Step Three: Specify Freestanding Storage

Freestanding storage both pulls an office together and fills in the blanks for additional storage, seating, and aesthetic needs — such as where staff will hang a coat, store project materials, or where a coworker can briefly sit while reviewing a project. Among the numerous freestanding storage options, pedestals can be mobile and equipped with seat cushions, combination units configured for different types of materials, and a personal storage tower can answer the need for coat storage.

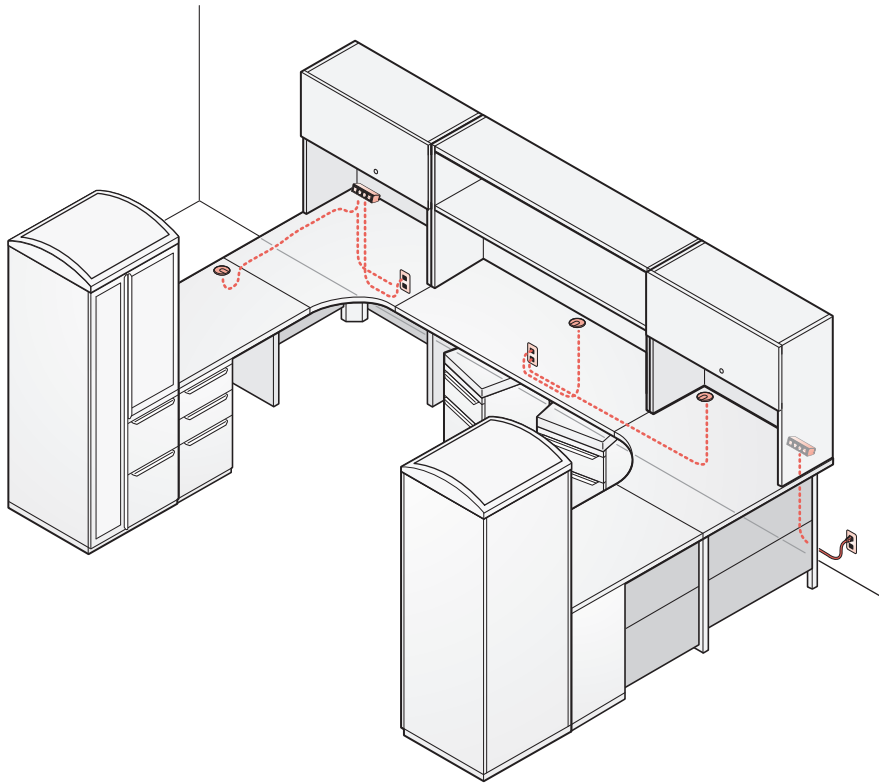

Several freestanding storage options have a variety of drawer and shelving configurations allowing for functionality in many settings, and some units are available up to five-high. Some units can also be mobile or on legs, giving more versatile and aesthetic options. Between pedestals, bookcases, wardrobes, storage units, lateral files, combination units, and personal storage towers — there is an answer to your every workplace need.

Step Four: Power and Communication

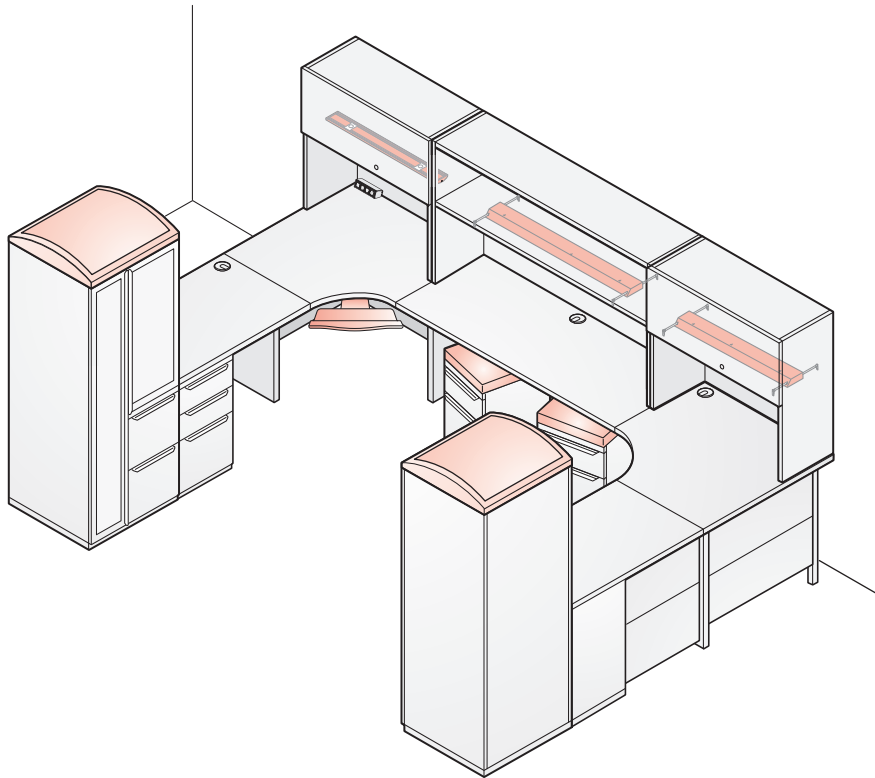

Computers, phones, and connectivity are necessities in offices — and getting staff plugged in, dialed in, and connected is a challenge met by X Series and V Series caseloads. Grommets can be field-drilled and installed easily facilitating worksurface pass-through for power and data cords. Combined with modesty panels that also have a wire pass-through, reaching wall outlets and the building's power is simple.

Desk-height power is also an option through the use of X Series and V Series power/data domes. These units install into the worksurface and give direct access to either four outlets or two outlets/two data ports. Positioning of grommets and power/data domes is dependent on the worksurface width and the presence or absence of pedestals.

Step Five: Lighting and Accessories

Accessories are offered that improve worker ergonomics and organization — such as Adjustable Keyboard Pads (AKPs), drawer dividers, pencil drawers, compressors, and mobile pedestal seat cushions. Accessories are available for either casegoods or files and storage; some can be used with both. Vertical Storage Units are compatible with Adaptable Electronic Ballast Task Lighting and LED Task Lights which brings more direct lighting to worksurfaces for users; several sizes are available depending upon the VSU width. Specifying lighting and accessories allows staff to customize their areas and work more comfortably and efficiently.

X Series and V Series Product Applications

X Series and V Series Attached Lower Storage Guidelines

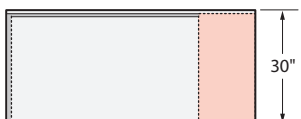

Depth Relationships : X Series & V Series Casegoods and Attached Lower Storage

When specifying a single or double pedestal X Series or V Series desk, Haworth will include a specific depth of pedestal, based on the depth of the desk.

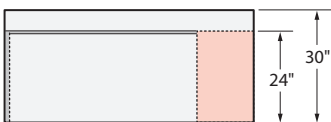

X Series and V Series Specified Pedestal Offering

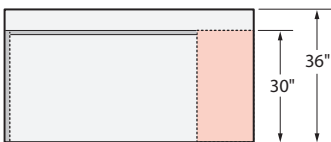

24" Deep Single Pedestal Desk includes a 24" pedestal

30" Deep Single Pedestal Desk includes a 30" pedestal

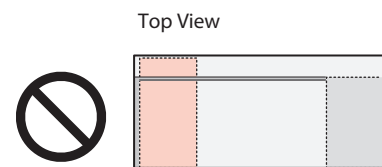

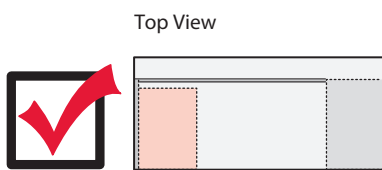

30" Deep Executive Overhang Single Pedestal Desk includes a 24" pedestal

36" Deep Executive Overhang Single Pedestal Desk includes a 30" pedestal

Specifying Lower Storage

When specifying either a single pedestal desk or desk shell with additional lower storage, the depth of the casegood should be taken into account to ensure that the additional lower storage will fit under the casegood since some lower storage may be too deep to fit under some casegoods..

Aesthetic of Separately Specified Pedestals

The aesthetic will vary on the visitor side of an X Series or V Series casegood when adding a separately specified pedestal to a casegood with an existing pedestal. The separately specified pedestal will be behind the modesty; the pedestal top will be visible through the wire pass-through and the pedestal bottom visible below the modesty. This look will differ from the specified double pedestal desk because the modesty is mounted to the inside edges of the pedestals.

X Series Single Pedestal Desk with Full Modesty and Separately Specified Pedestal

Grommets

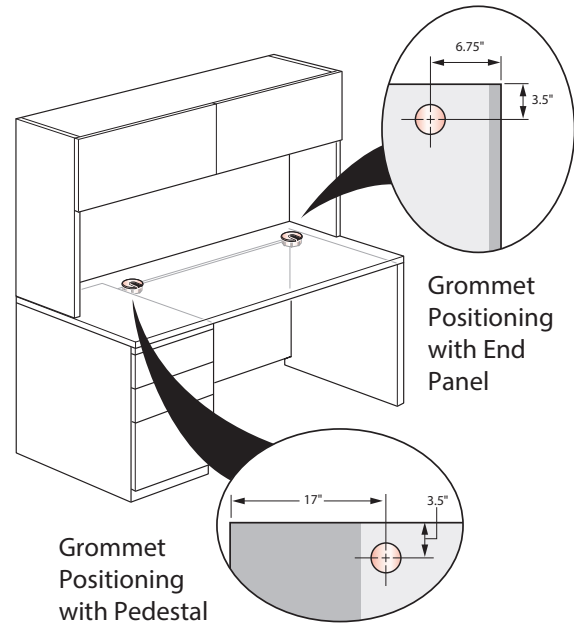

Grommets allow users to drop power, data, and communication cables through the worksurface top and then be routed through the modesty panel wire pass for access to power outlets. Standard grommets are 3" diameter and are available for X Series casegoods as separately specified components. Grommets are field drilled and installed — locations are dependent upon the presence of end panels, modesty panels, and/or attached pedestals.

Available in Black only
Removable Cap

Note Grommets must be separately specified and field-installed when using Vertical Storage Units.

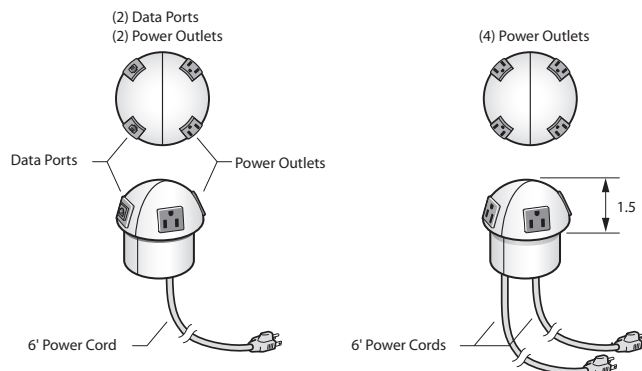

Grommet Application with End Panel and Pedestal

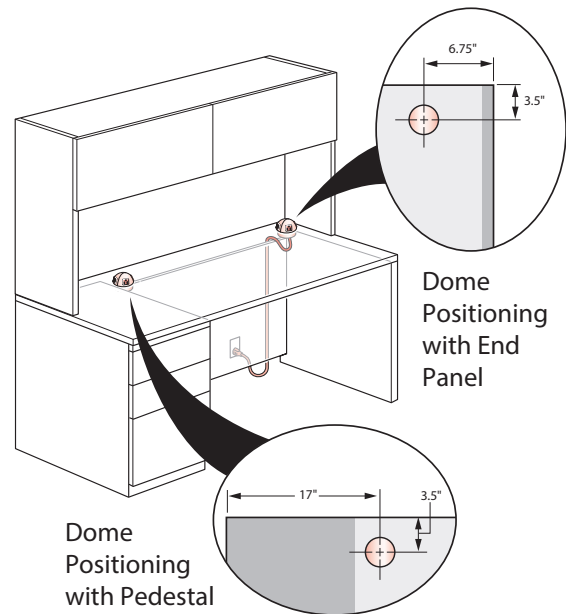

Power/Data Dome

Domes provide easy power and data access at desk-height and may be specified with power access only or with power and data access. Configurations are either four simplex power outlets or two simplex and two blank plates for data. Data ports are not supplied by Haworth and must be purchased from your local supplier. Domes include adaptor plates for data port installation. Receptacles are rated 15-amp and include a breaker.

The 3" diameter half-sphere dome comes in a black finish with one 72" long cord (two for four outlet model) and is field installed into the casegood worksurface. When designing with domes, refer to the same guidelines as designing with grommets as dome locations must clear modesty panels, end panels, and/or attached pedestal locations. Remember to specify horizontal wire management channels to route cords beneath the worksurface.

Dome Application with End Panel and Pedestal

Tip The Power/Data Dome is not used with the grommet.

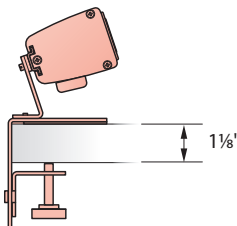

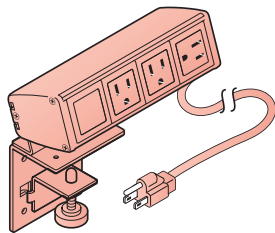

Enhanced Power Module

An Enhanced Power Module provides additional electrical functionality to a workstation. It provides three 15A outlets and a modular furniture telecommunications outlet opening in a housing that can be clamped to a worksurface in the following locations:

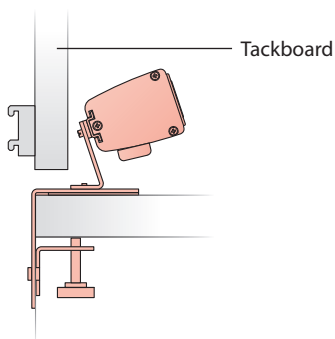

- Above a Worksurface
- Above a Worksurface with Tackboard
- Below a Worksurface
- To Storage Unit

Above a Worksurface

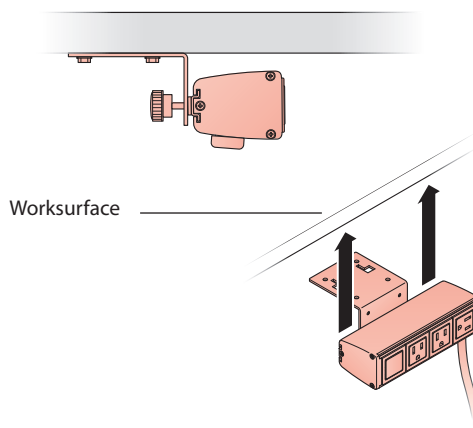

- Enhanced Power Module may be attached to a worksurface with a depth between 1 1/8" (29mm) – 2" (51mm).

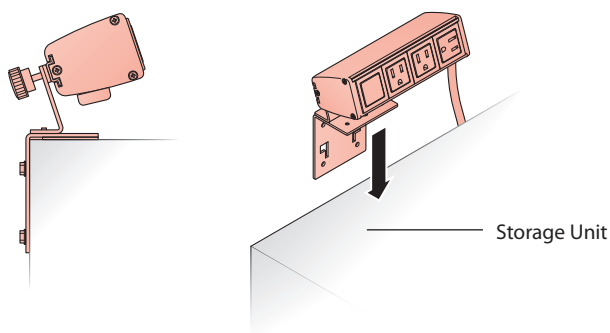

Above a Worksurface in Conjunction with Tackboard

Below a Worksurface

To Storage Unit

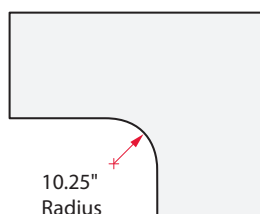

Tip

- Power cord plugs into a building receptacle outlet.
- Hardwired applications should be reviewed by local authorities (electrical inspector) prior to ordering.
- Enhanced Power Modules cannot be linked (daisy chained) together.
- Cord use should be reviewed by local authorities (electrical inspector) prior to ordering.

Note Certain support and storage options may interfere with AKP placement.

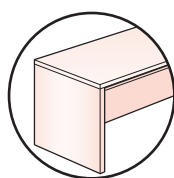

Support and Load of Vertical Storage Unit

End Panel/Pedestal Support

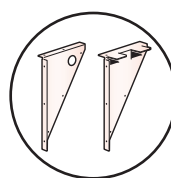

Vertical Storage Units can either span across one or multiple units; however, they require proper support under both VSU end panels. In this application, there must be either the support of a casegood end panel or attached pedestal under each end of the VSU. The pedestal and casegood end panel must also be the full-depth of the casegood worksurface. Vertical Storage Units cannot be used with executive desks because the worksurface overhang does not support a VSU's weight.

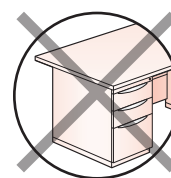

Full Depth End Panel

VSU Support Brackets

Executive Overhang

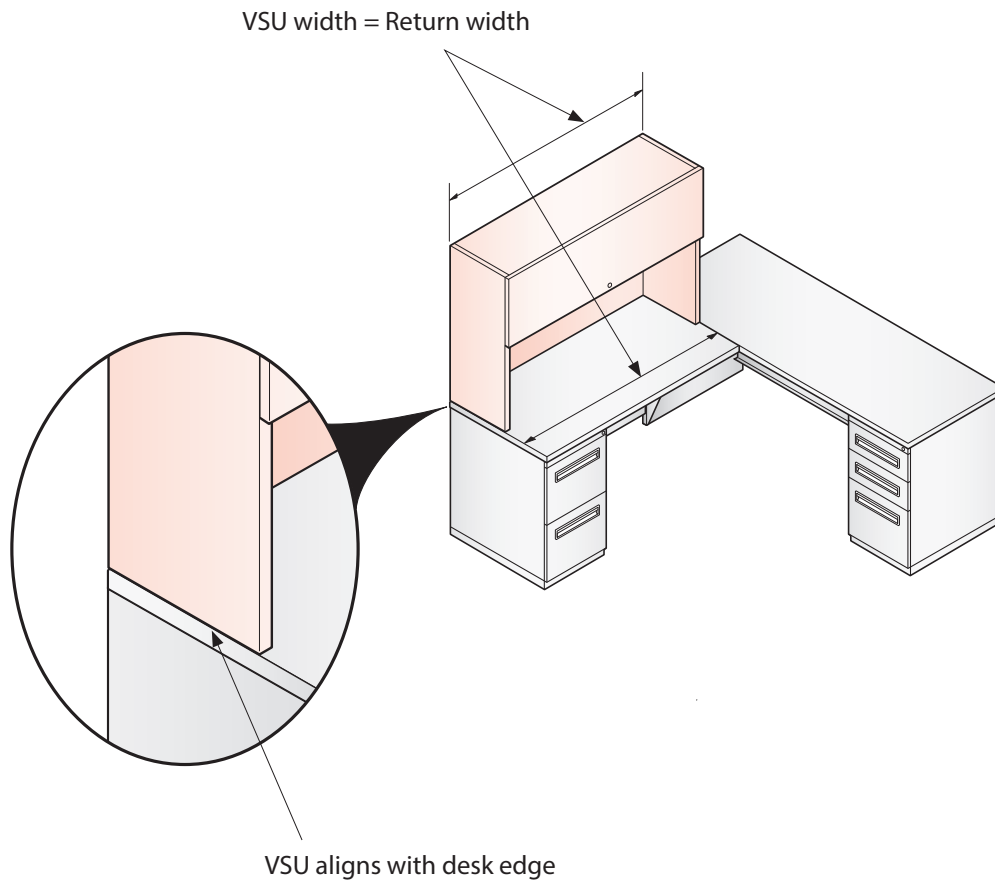

VSU Don't

Vertical Storage Units cannot be used with executive desks because the worksurface overhang does not support a VSU's weight.

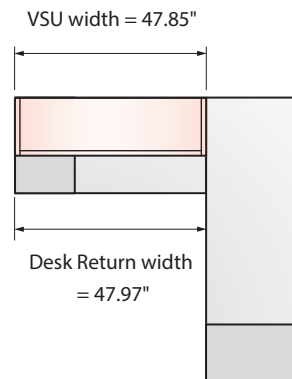

Vertical Storage Unit Dimensional Guidelines

Vertical Storage Units can either span across one or multiple units; however, there are some rules to remember that are illustrated over the following pages. When spanning the width of one unit, match the nominal width of the VSU to the nominal width of either the X Series or V Series casegood underneath.

All casegood actual widths are xx.97".
For example, a 48" return has an actual width of 47.97".

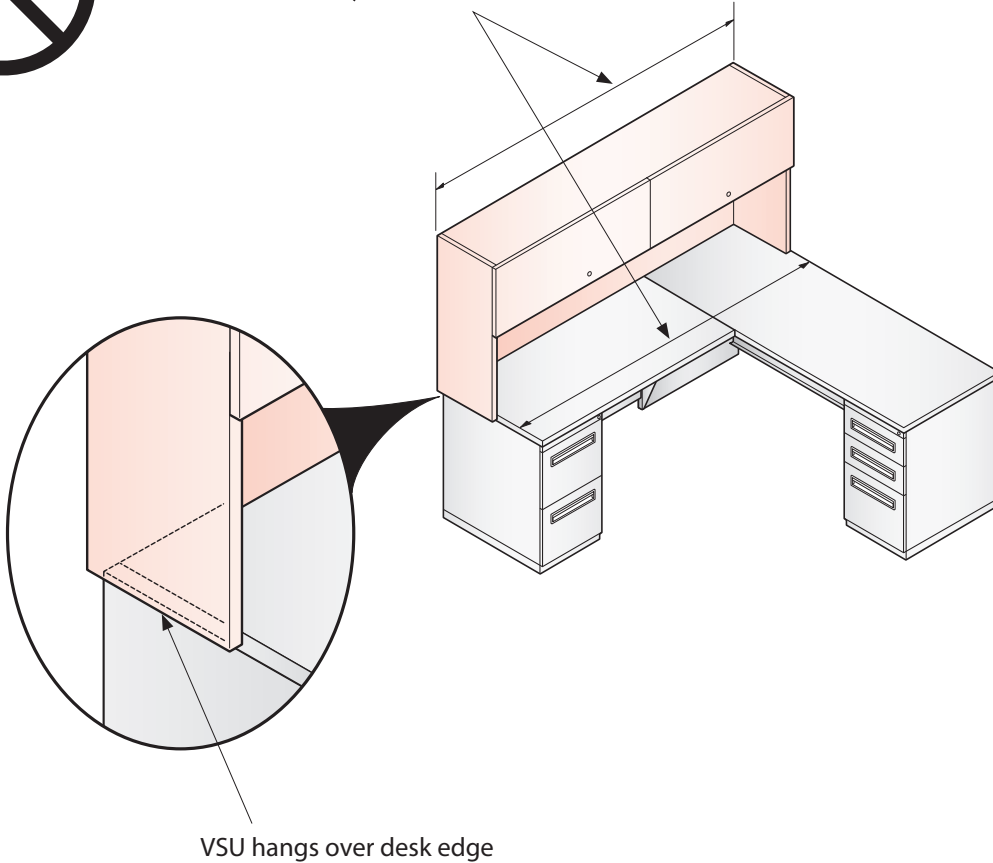

Vertical Storage Unit Application Guidelines: Dimensional Don't

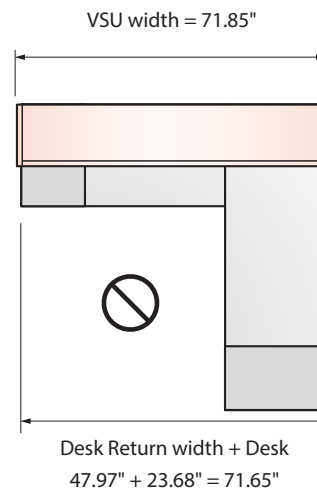

When spanning multiple units, note that the width of a VSU will not match the width of a lower caseload combined with the depth of another lower caseload because the actual dimensions are different — causing the VSU to hang over the combined lower caseload pieces.

VSU width $\neq$ Return width + Desk depth

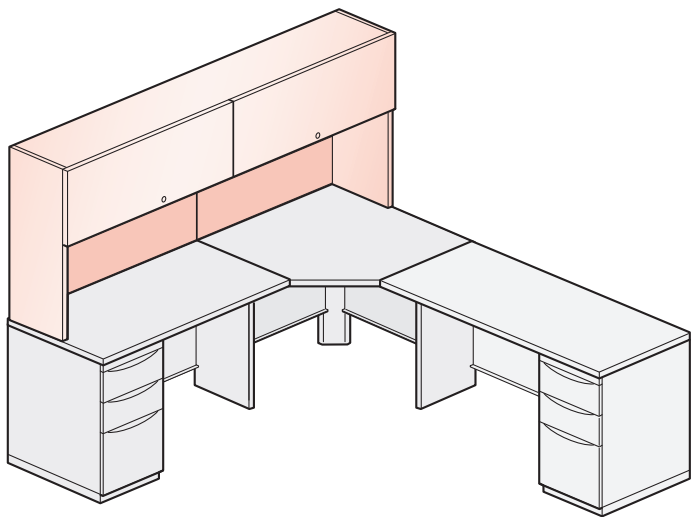

All caseload actual depths are xx.68".
For example, a 24" desk has an actual depth of 23.68".

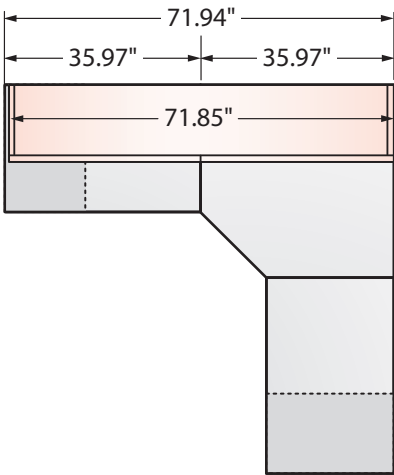

Vertical Storage Unit Application Guidelines

- When spanning multiple units, all lower unit nominal widths must match the nominal width of the VSU.
- As shown in the equation below, the VSU is 0.09" smaller than the casegoods that sit below it. However, it is still acceptable for the VSU to be installed over the casegoods and the application is still aesthetically acceptable.
 - Since the X Series VSU is 0.09" smaller than lower casegoods, in order to reduce the visibility of a gap on either side of the VSU, center the VSU over the casegoods.

Casegood Dimensions

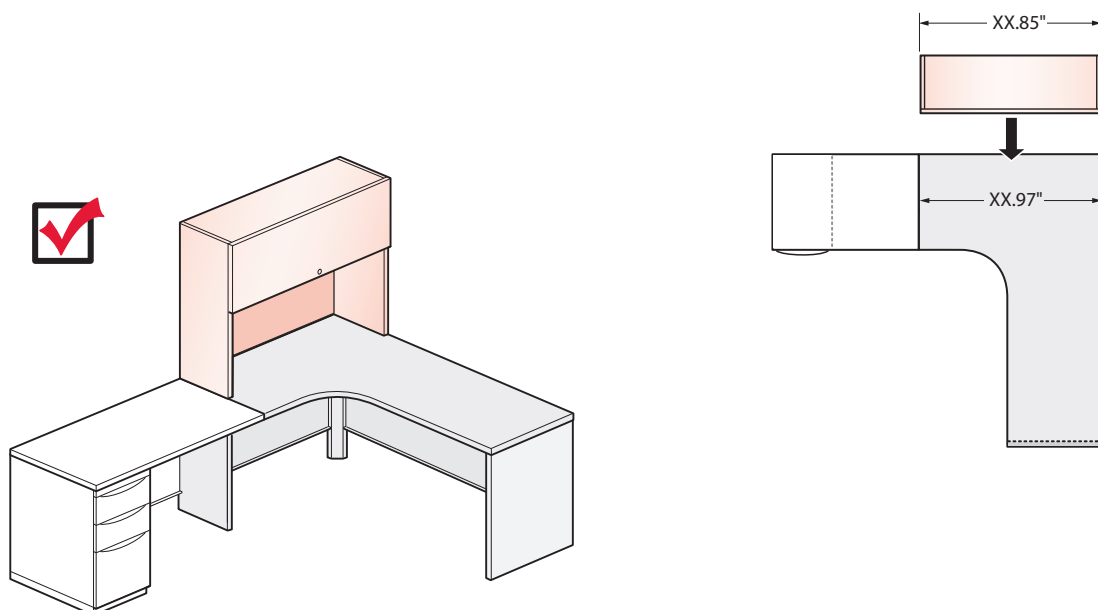

Actual VSU Width:	71.85"
Actual Corner Width:	35.97"
Actual Return Width:	35.97"
Actual Corner Width:	35.97"
+ Actual Return Width:	35.97"
Total Combined Actual Width:	71.94"
- Actual VSU Width:	71.85"
Difference:	0.09"

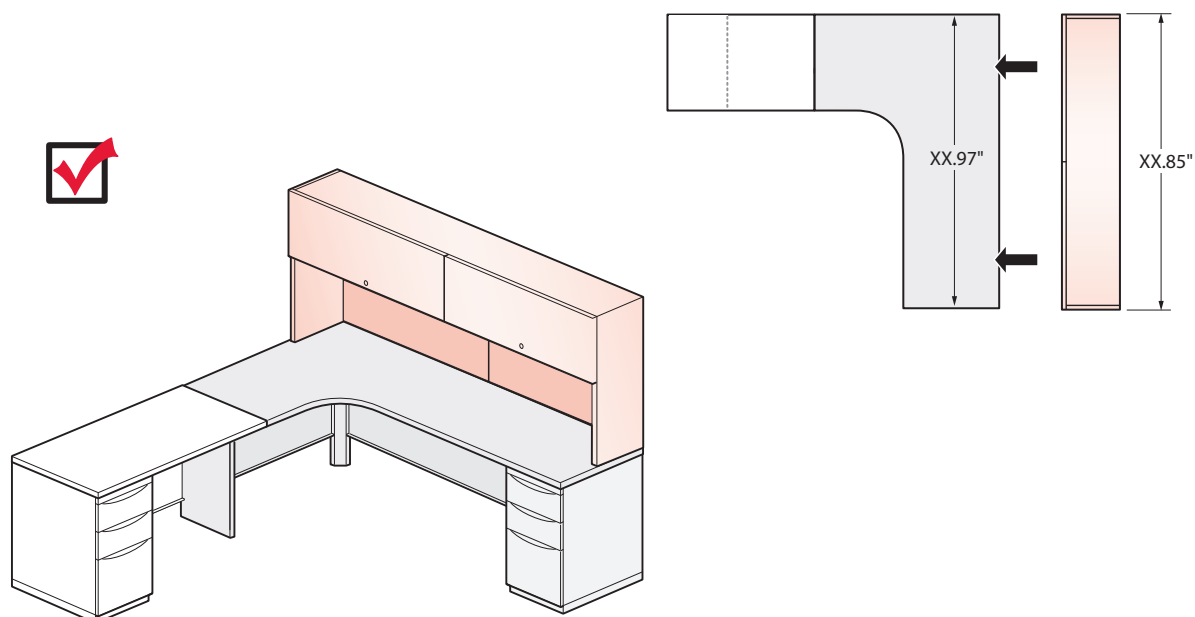

Vertical Storage Unit Application Guidelines

Curved Wrap-Around Extended and Extended Transitional

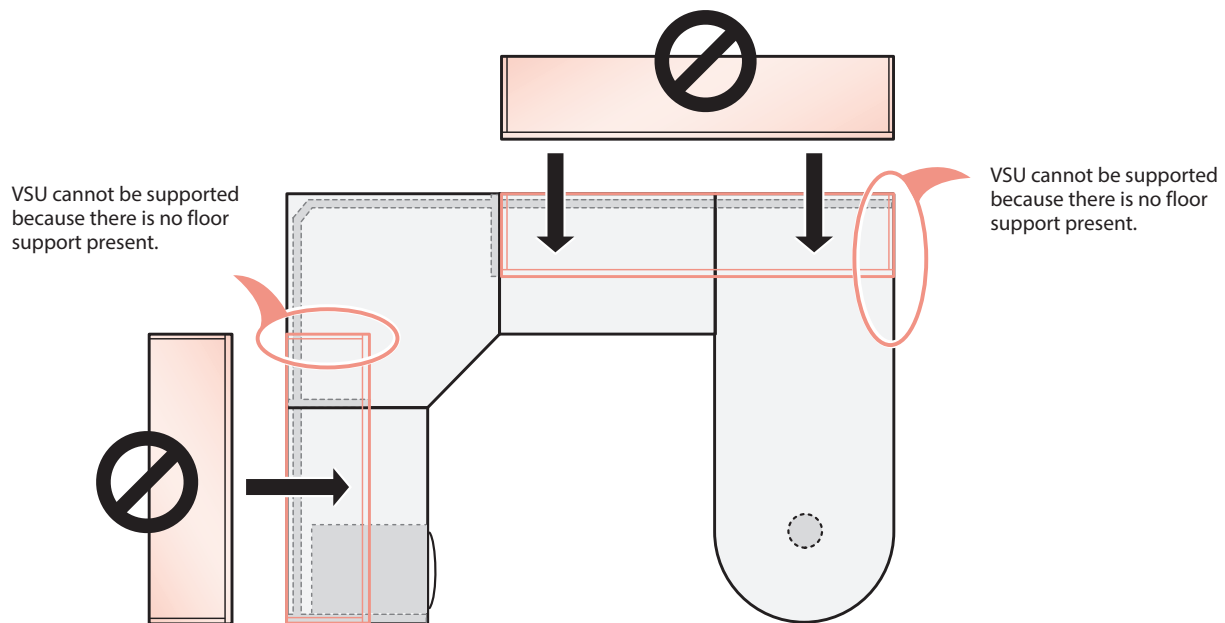

A X Series VSU can be positioned above the width of a Curved Wrap-Around Extended or Extended Transitional because the VSU width is smaller than the casegood width.

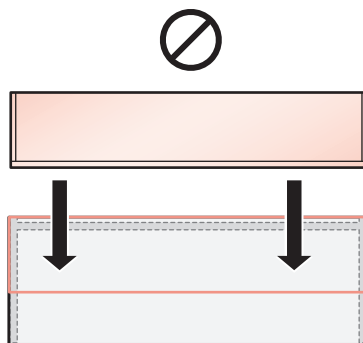

A X Series VSU can also be positioned above the length of a Curved Wrap-Around Extended or Extended Transitional.

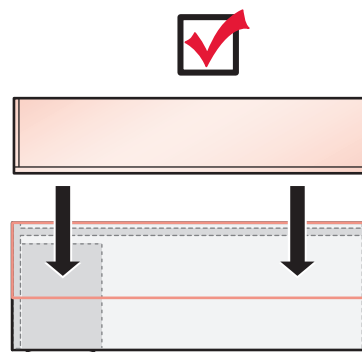

Vertical Storage Unit Application Guidelines

Desk Shell

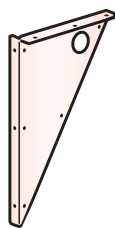

VSU cannot be supported on a desk shell because the application would be unbalanced.

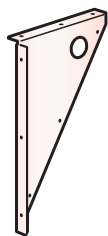

Adding a pedestal would make this application possible.

Vertical Storage Unit Corner Support

A Vertical Storage Unit Corner Bracket is required when a Vertical Storage Unit is positioned next to a Corner or Extended Corner unit in a bridge or return application. The bracket attaches to the adjoining corner unit's recessed end panel and will provide the additional support necessary for the VSU.

Left-Hand Bracket
JABB-L

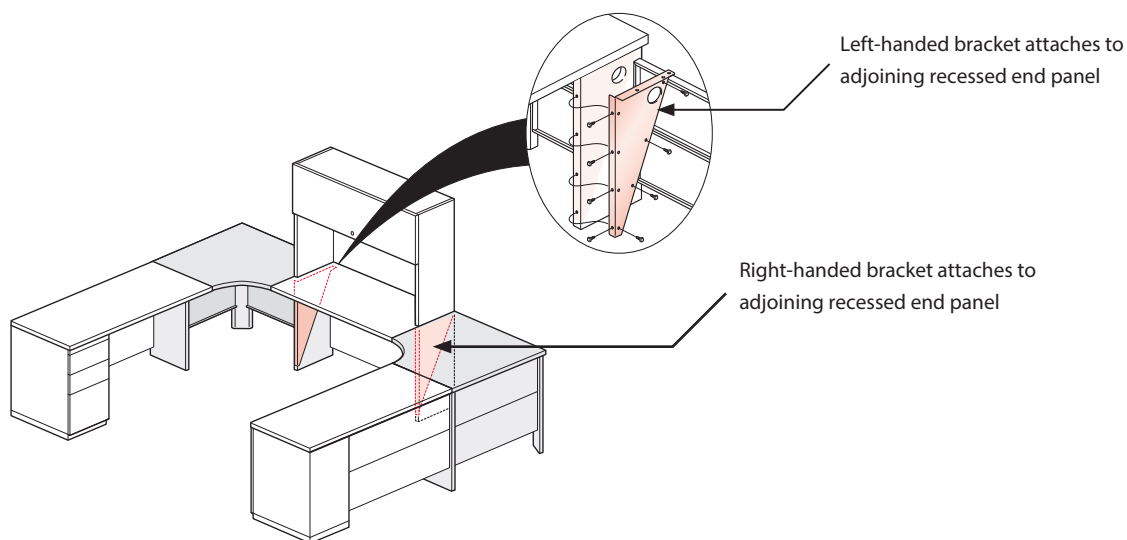

Right-Hand Bracket
JABB-R

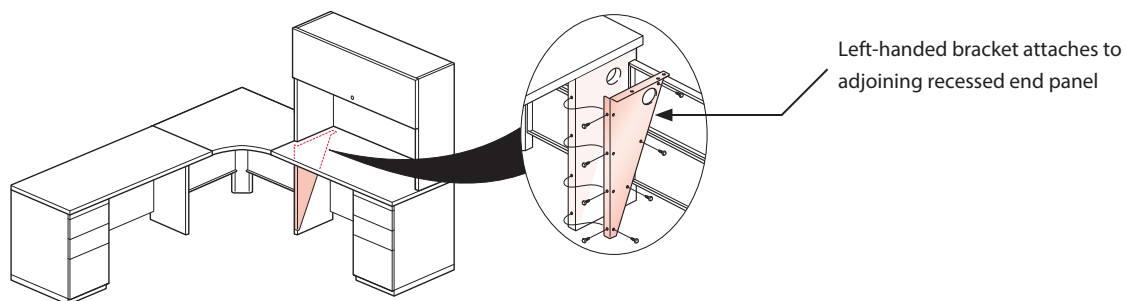

Tips

- Corner support bracket is specified separately.
- Orientation of bracket depends on side required for vertical storage unit direct floor support.
- Finish specification must match trim color of casework.

Example A: Bridge Application

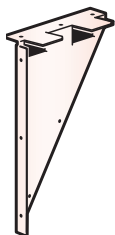

Example B: Return Application

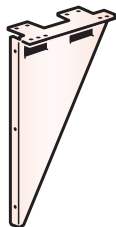

Vertical Storage Unit Bridge/Return Support

A VSU must be supported on at least one end by a casegood end panel or attached pedestal when spanning across a Bridge or Return unit on a single pedestal desk or shell with full end panels. For support of the opposite VSU end panel, a Bridge/Return Bracket is required. The bracket attaches directly below the worksurface where there is no casegood end panel or attached pedestal to provide the proper VSU end panel support.

Left-Hand Bracket
JABR-L

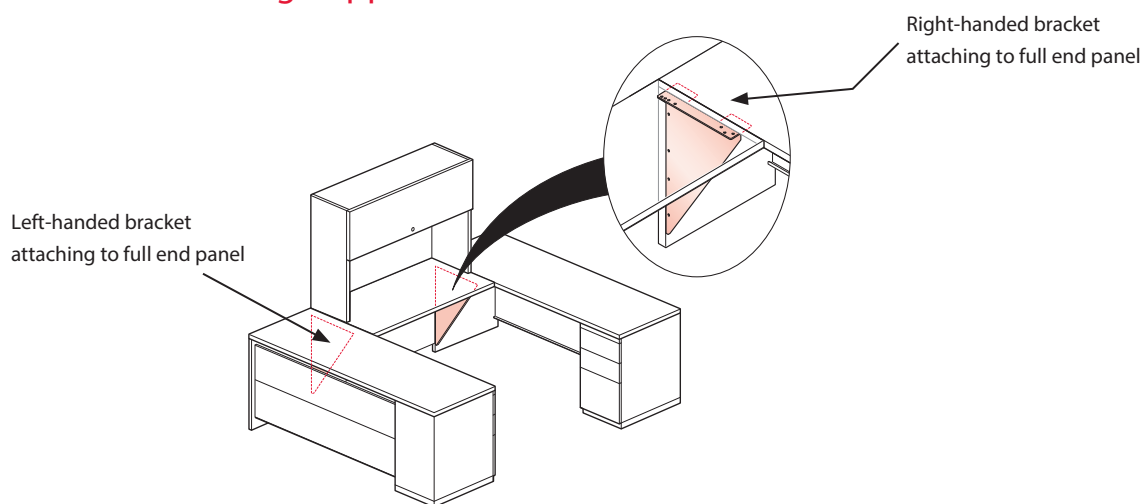

Right-Hand Bracket
JABR-R

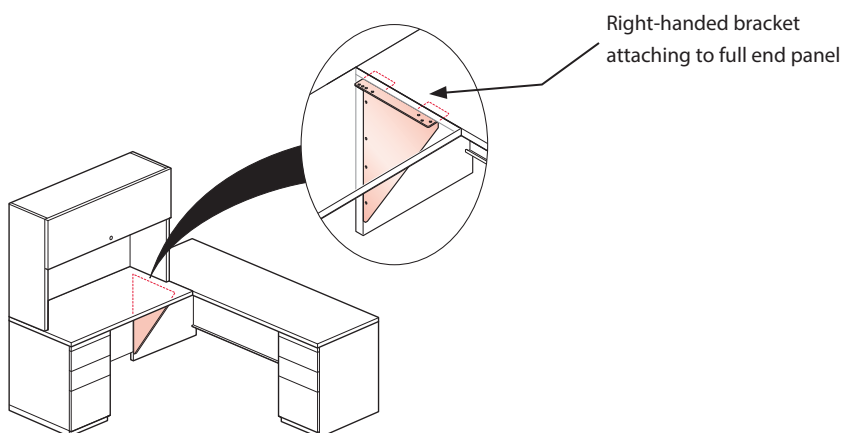

Tips

- Return/bridge support bracket is specified separately.
- Orientation of bracket depends on side required for vertical storage unit direct floor support.
- Finish specification must match trim color of casegood.

Adaptable Electronic Ballast Task Light

Adaptable Components task lights can be mounted below X Series Vertical Storage Unit (VSU) shelves with separately specified brackets. Their acrylic lenses provide a prismatic light distribution with an optional batwing lens. Lights are shipped standard with T8 fluorescent lamps which have a 20,000 hour rated life. All lights utilize electronic ballasts which are energy efficient, provide greater light output, and operate at a lower temperature — reducing energy consumption up to 40%.

Power

Task lights are shipped with a 6' (1829mm) power cord installed on the fixture's right-hand side; the cord can be field-retrofitted to a left-hand orientation on 42" and 54" lights. An optional 9' (2743mm) cord is available. Chicago Electrical code lights are also available.

Task Light Mounting

Task lights are not shipped with mounting brackets for installation under X Series Vertical Storage Units (VSUs). Task lights must be a minimum of 6" narrower than the supporting VSU.

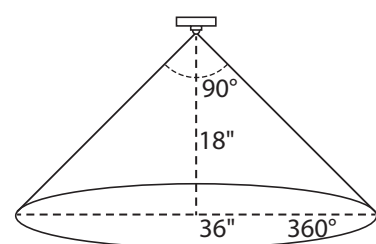

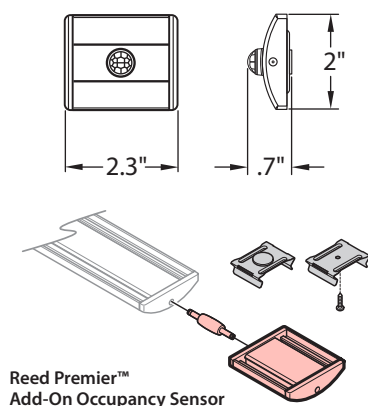

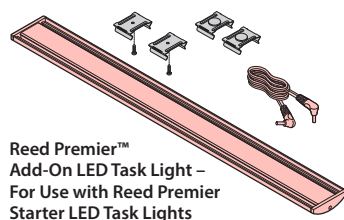

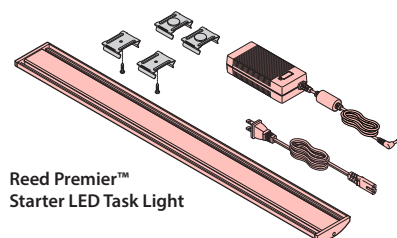

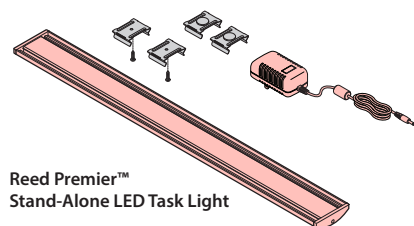

- Task light mounting brackets (JBBT-1) must be separately specified for VSU application.
- Narrower-width units, brackets allow both front-to-back and side-to-side fixture adjustment.
- Task light is flush to underside of shelf of Vertical Storage Unit.

Front-to-Back and Side-to-Side Adjustment

Note Daisy chain cannot be used on VSU applications.

Freestanding Storage Height Comparison: UniGroup® and PLACES®

Personal Storage Tower in a Panel Application

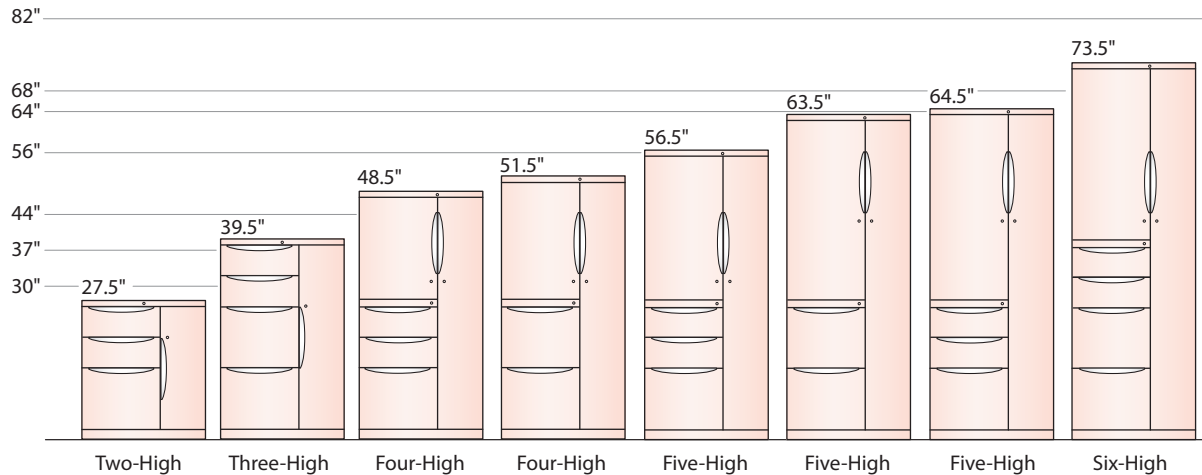

Personal Storage Towers (PSTs) are not intended to be the same height as a panel system, therefore actual PST heights do not match system panel heights. The top of a PST falls either above or below the system's panel height based on the actual PST height. This height difference allows the desired aesthetic to be specified.

Additional height factors that can impact the overall application height and aesthetic:

- PSTs with Legs: adds 5½" – 7" to the overall PST height (legs are an option on specific PST heights only)
- PSTs with Casters: adds 3" to the overall PST height (casters are an option on specific PST heights only)
- Uneven Floors: requires glides to be adjusted on the system panel and/or the PST

1.18" (30mm) thick top made with a wood composite core containing recycled content that is available with high pressure laminate top and backer with plastic edges or wood veneer top and backer with wood veneer edges. User edges are finished with 0.118" (3mm) edgeband on both the laminate and wood surfaces. The other edges of the laminate surfaces are finished with 0.040" (1mm) edgeband and 0.028" (.7mm) edgeband on wood surfaces.

Standard Core:

1.18" thick worksurfaces/tops are made with an engineered composite panel made with a minimum 90% wood fiber content with at least 10% post consumer and 80% pre-consumer wood fiber bonded with resin. These worksurfaces/tops are 3rd party certified compliant with GREENGUARD® and ANSI/BIFMA Standards for Low Emitting Products. The composite panel is 3rd party certified compliant with California Air Resource Board requirements for Phase 2 formaldehyde emission levels.

Green Core:

1.18" thick worksurfaces/tops are made with an engineered composite panel made with a minimum 90% pre-consumer wood fiber content bonded with no-added urea formaldehyde resin. These worksurfaces/tops are 3rd party certified compliant with GREENGUARD® and ANSI/BIFMA Standards for Low Emitting Products. The composite panel is 3rd party certified compliant with California Air Resource Board requirements for Phase 2 formaldehyde emission levels.

Surface Supports

Full and half support panels are constructed of 1 ½" (38.1mm)-thick wood composite core with high pressure laminate surfaces. The outer edges are finished with 0.118" (3mm) edgeband. Leveling glides on end panels provide 1 ½" (38.1mm) adjustment range. Corner and curved wrap around units feature a corner support that is constructed of 18-gauge (0.048" 1.2mm) steel.

Drawer Slides:

Full extension steel ball bearing slides provide smooth operation and complete access to drawer contents. The ratings for the slides are as follows. An optional daisy chain cord option is available for use with 42" and 54" lights. The Chicago version has a plug with an integral 3-amp resettable circuit breaker. The acrylic lens features a prism pattern. The linear prism pattern runs front-to-back directing light to the side to reduce veiling. Optional batwing lens is available.

LED Task Lights

The Stand-Alone LED Task Light has a peak output of 444 Lumens/ 76 Foot Candles at 7.8 Watts. Power cord consists of a 15 Watt 24 V transformer power supply contained in a molded plug and a 9' black cord. Fixture housing is 16.4" (417mm) long x 2" (51mm) wide x 0.5" (12 mm) high.

The Starter LED Task Lights have peak outputs of 444/980/1412/1791 Lumens, 76/131/148/151 Foot Candles, and 7.8/17.6/25.9/33.6 Watts for fixture lengths of 17" (431.8mm)/31" (787.4mm)/44" (1117.6mm)/58" (1473.2mm) respectively. Power cord consists of a 60 Watt 24 V in-line brick transformer with a 12' (304.80mm) black cord. Actual fixture housings are 30.1" (764.54mm), 43.7" (1110.0mm), or 57.4" (1458 mm) long x 2" (50.8mm) wide x 0.5" (12.7mm) high.

Add-On LED Task Lights fixtures are identical to Starter LED Light fixtures but contain a 54" (1371.6mm) black interlink cord instead of a power cord. Add-On LED Task Lights are used in conjunction with Starter LED Task Lights to form a Daisy Chain configuration.

All LED light fixtures have a color temperature of 3500 and a CRI of 84. Lights employ a touch sensitive switch with touch-and-hold continuous dimming from 100% to 15% and single touch on/off power. An auto off feature on each fixture activates after 10 hours (+/- 15 minutes) of use. Mounting options include clips with screws for attachment to wood/laminate surfaces or clips with magnets for attachment to steel surfaces. Fixtures carry the ETL mark indicating conformance to UL 153 and certified to CAN/CSA C22.2 No. 9.

LED Occupancy Sensor

A passive infrared (PIR) interlink occupancy sensor can be added to single or multiple interconnected (daisy-chained) LED Task Lights. The sensor will automatically turn off the lights after 30 minutes of no detection and back on as the user re-enters the workspace. In a daisy-chain application all fixtures connected after the sensor will be controlled. Sensor is attached to LED fixtures with either a 1" (25.4mm) long end-to-end connector or an interlink cord. Sensor is 2.3" (58.4mm) long x 2" (50.8mm) wide x 0.7" (17.78mm) high.

950 Product Details

950 Series Overview

950 Series Files and Storage Features:

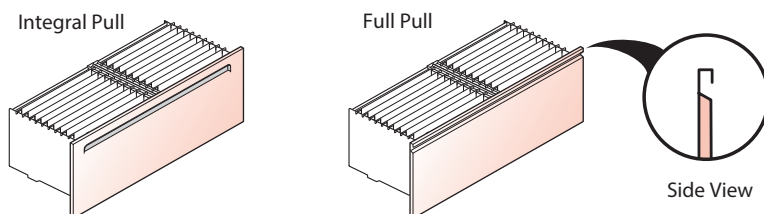

Product Offering

The 950 Series Files and Storage product offering consists of the following:

- Combination Lateral Files
- Credenza Lateral Files
- Custom File Cases and Components
- Lateral Files
- Lateral Files with Receding Doors and Roll-Out Shelves
- Overfiles

Pull Options

950 Series lateral file drawer pulls are available with Integral Pull or Full Pull integrated into the drawer front.

950 Series Overview

Drawer/Shelf Interior Components

950 Series files are available with four different drawer/shelf organization components: compressor (C), side-to-side hanging bars (H), dividers (D) and front-to-back hanging bars (F). Specification of these components may require a modification of the printed product number. Refer to the instructions for each model when ordering.

950 Series drawers and shelves will accommodate letter, legal, EDP, A4 International and Foolscap paper sizes filed either side-to-side or front-to-back. Side-to-side and front-to-back hanging bars can be field adjusted (without tools) to accommodate file size changes.

NOTE: Haworth recommends one (1) separately specified side-to-side hanging bar for every 12" (305mm) or 15" (381mm) drawer and one for each 12" (305mm) or 15" (381mm) shelf ordered with dividers (D) or a compressor (C). The side-to-side hanging bar functions as a letter- or A4-depth backstop for 3-ring binders or folders.

Locking Options

For lock options, refer to Lock Program Price list.

950 Series General Information

Seamless, One-Piece Case Construction

This feature, common to all 950 Series file and cabinet cases, results in an uninterrupted, cleanly finished appearance and structural superiority. This detail enables the unit to be used effectively as a space divider.

Safety Features

950 Series files have a number of features designed to ensure safety and security.

950 Series Overview

Positive Interlock System

A standard safety feature on all 950 Series file units, the interlock system prevents more than one component from being opened at a time. Excluded are 3"-high drawers and 3"-high roll-out shelves, and they are therefore limited to a maximum of four per unit. This fail-safe mechanism eliminates the possibility of tipping that could result when more than one component is extended at a time. Note: Haworth strongly recommends the use of counterweights in all freestanding files.

Ganging Capabilities

Banks of file cases can be bolted together as a single unit to help guard against tipping. Attachment hardware is standard with each unit.

Suspension System

950 Series drawers and roll-out shelves have a quality engineered, heavy-duty, ball bearing suspension system. It consists of a three-phase telescoping slide mechanism that permits all drawers and roll-out shelves to fully extend from their cases.

Compressors

- 7" high and adjustable

Lateral File/Combination File Dividers

- Sizes to accommodate each component height
- Manually seats into 1" incrementally slotted drawer or shelf back
- Full-depth in all drawers/shelves except 3-ring binder shelf

Side-to-side Hanging Bars

- Sizes to accommodate each component width
- Two included per drawer
- Required to suspend files side-to-side
- Adjust to accommodate letter, A4, foolscap, legal and EDP documents side-to-side
- Can be used as a backstop for letter or A4 depth with divider and compressor accessories

Front-to-back Hanging Bars

15¾" long to fit between two side-to-side hanging bars. Required to file front-to-back.

File Top Options

- Three types available:
 - Credenza File Tops for use on single credenza files (30", 36", 42" wide)
 - Credenza Common Tops for use on two credenza files of the same width (60", 72", 84" wide)
 - File and Cabinet Tops
- 1¼" thick x 18" deep
- Top options must be specified separately

Security

The 950 Series DOD Lockbar design consists of a vertically mounted bar positioned at the center of the cabinet which engages brackets at the top and base of the cabinet. The brackets are assembled in the field with blind rivets which are covered by the ends of the vertical rail. The vertical bar can be hung from the side of the cabinet when not in use. The Lockbar meets the requirements established by the U.S. Department of Defense.

For lock options, refer to Lock Program Price list.

Lateral File

Constructed with a one-piece 22-gauge steel draw formed top that is removable for replacement or for attachment of overfiles. A seamless one-piece 22-gauge steel case results in an uninterrupted, cleanly finished appearance and structural superiority. Drawer bodies are full-height welded components made of 20-gauge steel. Drawer fronts remove for replacement. All drawers (except 3") are attached to a positive drawer interlock system to prevent opening more than one drawer at a time. 950 Series file drawers feature heavy duty ball bearing full extension slides. Leveling glides provide 1" adjustment. Files are finished with high-solids enamel which is electrostatically charged and sprayed on all external and interior surfaces except mechanical hardware. Drawer height options range from 3" to 15" with upper position options of receding door with roll-out shelf or sliding doors with stationary shelf. The 950 Series custom file specification program allows for a variety of configurations to meet specific needs.

Overfiles can also be added to any 950 lateral files (except Two-High units) for additional storage. Open shelf and sliding door with lock option versions are available. Mounting hardware is included.

- Wood veneer top has 3mm edgeband on user and guest edge, and 1mm edgeband on sides.

To Order, Specify:

- 1) Product number.

Common Product Features

- Attaches to separately specified X Series attached lateral file(s), attached storage cabinets, attached combination units, and/or attached pedestals to create a credenza.

Specification Tips

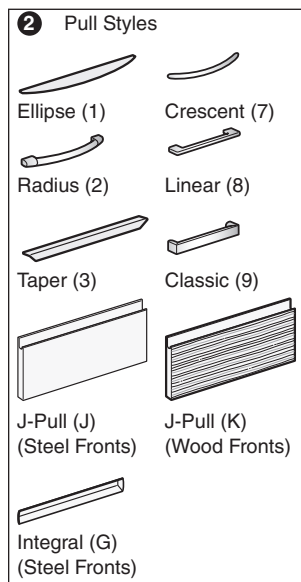

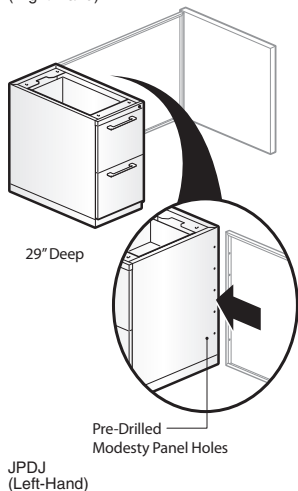

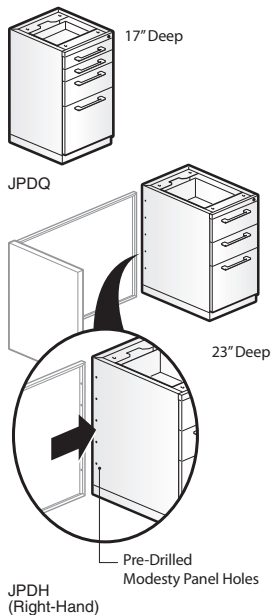

- Not for use with X Series Desk Pedestals; modesty panel mounting holes on the side of the desk pedestal will be visible.
- Not for use with X Series Freestanding Files, storage tops are included with freestanding casegoods.
- Designing a storage credenza with attached storage pieces less than 24"(610mm) deep will result in an overhang at the back of the credenza top.
- When using attached pedestals the recommended nominal depth is 24"(610mm) to minimize overhang of the top. The actual depth of a 24"(610mm) deep attached pedestal is greater than other storage pieces; the recommended application is to place the pedestal(s) at the end(s) of the credenza to conceal the depth difference. 18"(457mm) nominal depth pedestals are less deep than other storage pieces and therefore not recommended.
- For a storage credenza with attached pedestals and lateral files, specify a proud front attached lateral (not inset front) to match the pedestal front.
- When designing a credenza to support a Vertical Storage Unit, both ends of credenza must be 24"(610mm) deep attached pedestals.

950 Series Custom File Specifications

General Guidelines for Component Arrangement

- The total of drawer and door heights cannot exceed the interior height of the case.
- If total component heights do not equal the available vertical space in a custom file case, 3"(76mm)-high filler panels are used to fill the remaining space. These must be specified and assigned a component position number within the case.
- Individual components should be specified in descending order, starting at the top position in the case.
- **No more than four (4) 3"(76mm)-high drawers or roll-out shelves can be placed in one file case.**
- **Receding doors are used to cover roll-out or stationary shelves, and must be specified separately.**
- **3"(76mm) drawers or roll-out shelves cannot be configured in the bottom location.**

Receding Door / Shelf Configurations

Multiple roll-out or stationary shelves may be stacked behind one receding door.

A single-shelf or a multiple-shelf combination must be specified for the space behind each 6"(152mm)-, 9"(229mm)-, 12"(305mm)-, or 15"(381mm)-high receding door.

Shelves within each configuration must be specified individually, beginning with the top-most shelf position.

In some cases, the single shelf or total configuration dimension will be less than the available vertical space.

In each case, the remaining 3"(76mm) space will be at the top, behind the receding door. **A 3"(76mm)-high roll-out shelf cannot be specified as the top component behind a receding door.**

Example: 6"(152mm) receding door can be specified with one 6"(152mm) roll-out shelf or one 3"(76mm) roll-out shelf only.

6"(152mm)-, 9"(229mm)-, 12"(305mm)-, or 15"(381mm)-high shelves must be individually specified as either **roll-out** or **stationary**. 3"(76mm)-high shelves are available in roll-out style only.

The chart below lists the suggested shelf configurations that are possible behind receding doors of various heights.

Receding Door Height	Shelf Configurations
6"(152mm)	3"(76mm)-high roll-out shelf OR 6"(152mm)-high single shelf
9"(229mm)	6"(152mm)-high single shelf OR 9"(229mm)-high single shelf OR 3"(76mm)- and 3"(76mm)-high combination stack OR 6"(152mm)- and 3"(76mm)-high combination stack (in this order)
12"(305mm)	9"(229mm)-high single shelf OR 12"(305mm)-high single shelf OR 3"(76mm)-, 3"(76mm)-, and 3"(76mm)-high combination stack OR 6"(152mm)-, 3"(76mm)-, and 3"(76mm)-high combination stack (in this order) OR 6"(152mm)- and 6"(152mm)-high combination stack OR 9"(229mm)- and 3"(76mm)-high combination stack (in this order)
15"(381mm)	12"(305mm)-high single shelf OR 15"(381mm)-high single shelf OR 3"(76mm)-, 3"(76mm)-, 3"(76mm)-, and 3"(76mm)-high combination stack OR 6"(152mm)- and 6"(152mm)-high combination stack OR 6"(152mm)-, 6"(152mm)-, and 3"(76mm)-high combination stack OR 6"(152mm)-, 3"(76mm)-, 3"(76mm)-, 3"(76mm)-high combination stack (in this order) OR 12"(305mm)- and 3"(76mm)-high combination stack (in this order) OR 6"(152mm)- and 9"(229mm)-high combination stack OR 9"(229mm)- and 6"(152mm)-high combination stack

950 Series Custom File Specifications

Tie-Bar / Posting Shelf	The tie-bar is a 1”(25mm)-high structural member located on the file unit front under the case top or between components. It contains the lock or the lock knock-out. A posting shelf option, which replaces the tie-bar, is available on four-high and five-high files only. This feature is available in select combination files or is specified in custom files when selecting the desired case. A structural tie-bar or optional posting shelf on a custom unit will automatically be placed in the first available space starting at 36”(914mm) from the bottom of the case. Depending on how the file is configured, the tie bar/posting shelf could be located as low as 24”(610mm) from the case bottom. For instance, in a five-high case with two (2) 12”(305mm)-high components in positions one and two (counting from the top), the posting shelf will be located 36”(914mm) from the bottom of the case. In a five-high case with one (1) 15”(381mm)-high component and one (1) 12”(305mm)-high component in positions one and two, the posting shelf will be 33”(838mm) from the bottom. THERE IS NO OPTION FOR SPECIFYING THE POSITION OF THE STRUCTURAL TIE-BAR OR POSTING SHELF WITHIN THE LATERAL FILE CASE. THE POSITION WILL BE ASSIGNED BY HAWORTH BASED UPON THE DRAWER CONFIGURATION SPECIFIED.
Custom File Order Form	Use the Haworth custom file order form on page 412 and make a photocopy for each custom file size and component configuration required. Complete the custom file order form(s) and attach to a Haworth order form with all other information completed. Enter the words “custom file” on the Haworth order form under “description.” Transfer unit and total prices for each complete file unit from the custom file order form to the Haworth order form. The custom file order form contains a simplified elevation diagram showing the file interior heights and outside width dimensions. This scaled guide may be used for indicating the positions and heights of interior components. Completing the diagram is optional.

950 Series Custom File Specifications

Custom File Order Form Instructions

1. Enter Quantity

One order form must be prepared for each file type, size, finish color, and component configuration. Order must be a complete unit. Parts cannot be ordered separately for service parts through this order form. Individual parts must be ordered through the service parts program. Enter quantity of like units in the box provided.

2. Draw File Elevation

- A. As an option, use the file front elevation diagram on the order form to indicate the height and width of the file case you are specifying. Use the three-inch spaced incremental marks to identify the component heights and locations within the file case. This will help you in step 4 to list the components in descending order from the top of the case to the bottom.
- B. A horizontal tie bar, which contains the optional lock, or a specified posting shelf will automatically be placed within the stack of components and does not need to be included in your drawing. The tie bar or posting shelf will be placed between components in the first available position down from the top within the 36"(914mm) to 24"(610mm) space above the floor of the case.

3. Specify Case and Trim Color

- A. Select a file case from pages 413-415 and complete the specification number on the line provided. Be sure to consider the following:
 Locking or Non-locking
 Factory-installed counterweights (two-high standard and credenza cases only)
 Posting shelf (four- and five-high cases only)
- B. Indicate trim color for the case in the space provided. The tie bar or posting shelf will automatically be finished in the trim color selected for the components (4C., below).
- C. If building a custom credenza file, specify credenza file top if it is not being installed under a systems or freestanding steel worksurface. Enter selection on your purchase order, not the custom file order form.

4. Specify Components and Trim Color

- A. Select interior components from product options on pages 416-423. List the component specification numbers in order on the lines provided beginning with the top of the case and working toward the bottom. The top component will be in position 1, the next component down will be in position 2, and so on.
- B. A receding door and the shelf or shelves behind it should all be listed with the same position number. In the list, always place the receding door first, followed by the shelf or multiple shelves in descending order. When specifying 3"(76mm) roll-out shelves, see page 412 for additional instructions.
- C. Indicate one trim color for all receding doors, drawer fronts, or filler panels. This color can match the case color specified or can contrast with it. Shelves behind receding doors will always be finished in standard black paint and color need not be specified. Drawer bodies and all accessories will also be black. The tie bar or posting shelf will automatically match the external trim color of the components.

HAWORTH®

Photocopy and attach completed form to Haworth Order Form or your purchase order. Enter line item as "custom file." Enter unit costs and extension. Follow instructions provided in the price list for specifying custom files.

1. Enter Quantity

- Indicate quantity for each custom file of the same size, component configuration, and trim colors.

Wood Finish/Color Legends

Because of the natural properties of wood, variations of grain and finish color can be expected. Haworth carefully selects materials used in the manufacturing of products to ensure consistent and acceptable color. Wood is susceptible to color change from exposure to UV rays. Haworth controls this by using surface finishes to reduce color change. However, color change may be more evident in light-colored finishes.

COM Yardage Requirements

Procedure

To confirm approval of or request new approval for COM's, contact the **Haworth Inquiry Center (1.800.426.8562)**, or <http://hub.Haworth.com>, or www.haworth.com > **surface collection** > **COM Library** to determine if the COM you have selected has already been tested and approved for use on our product.

If the fabric is approved, and the directional orientation (directional rightway, directional railroad, or non-directional) of the tested fabric has been confirmed, then refer to the appropriate column in the chart for yardage requirements.

Steps to follow to calculate fabric usage:

- 1) Identify product type and size.
- 2) Determine method in which fabric is to be cut (directional rightway, directional railroad or non-directional).
- 3) Determine fabric roll width.
- 4) Find corresponding fabric usage value from the table.
- 5) Calculate fabric required using the formula below:

Fabric usage = number of units x number of sides with fabric x fabric usage (from tables) + C (constant).

Constant — Compose®, PREMISE®, PLACES® and UniGroup®

Product	C
Panels	2.5
Desktop Screens	1.5
Tackboards, Tackstrips	1.5
OSUs and Flipper Doors	1.5

Constant — RACE®

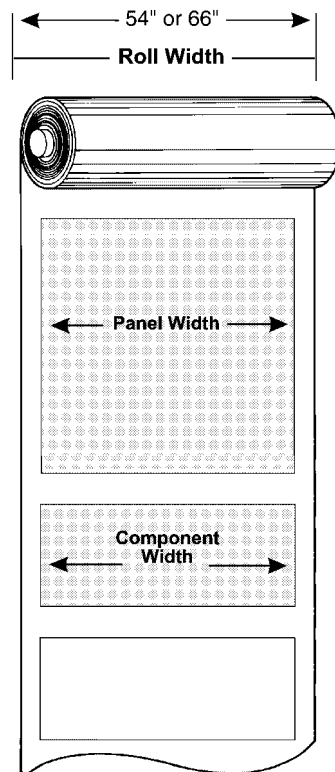

Product	C
Desktop Screens	1.5
RACE Privacy Screens*	0.0
RACE Pads	0.0

*Includes fabric for both sides. Sizes 51"-78" include two screens.

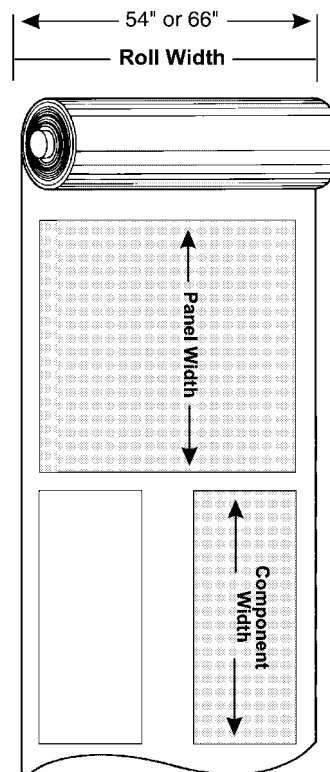

- 6) Repeat steps 1-5 for each product type, size and fabric.
- 7) Add all values together to find total number of linear yards required for the order. Add the appropriate percentage shown below to the total yardage to accommodate fabric flaws, wrinkles and other imperfections.

Up to 500 yards	Add 10%
501 to 1000 yards	Add 5%
More than 1000 yards	Add 3%

These Terms of Sale are part of a quotation, bid response, or other sales document issued by Haworth, Inc., Haworth, Ltd. ("Haworth").

These Terms of Sale do not cover products manufactured in North America shipping to non-North American countries nor do they cover products manufactured in non-North American countries shipping to North America. For those terms of sale, please contact Haworth's Global Trade and Compliance Department at 616.393.3000 or through Haworth.com.

A. Ordering Information

Haworth sells its products on the terms set forth in these standard Terms of Sale:

ORDERS MUST BE SUBMITTED IN WRITING OR ELECTRONICALLY (Lynx) AS REPRESENTED BY A VALID PURCHASE ORDER, WHICH INCLUDES PRODUCT TOTAL.

An order is not binding upon Haworth until Haworth issues an order acknowledgment to the customer (the "Customer"), which will include price information and an anticipated delivery date.

1. Order Changes/Cancellations

For Specials, Customer's Own Material (C.O.M.), finish matches, custom colors, custom products, Master lock and key orders, and RUSH orders, no changes or cancellations are allowed 24 hours after order placement. Ship-to addresses changed within five (5) business days of delivery will incur fees to cover administrative costs due to re-labeling of product and/or reconsignment fees with the carrier.

Order cancellations are complete annulments of orders. Order changes are the deletion of line items or a change in size, color, quantity, ship-to address, or scope of work. There is no penalty for additions; however, any change may cause the order or the line items affected to be rescheduled. Order changes involving additional product and services which increase the value must be accompanied by an amended Purchase Order or other document as agreed.

ALL CHANGES MUST BE IN WRITING, REGARDLESS OF THE (DOLLAR) VALUE. CHANGES ARE NOT BINDING UPON HAWORTH UNTIL HAWORTH ISSUES AN ACKNOWLEDGMENT OF THE CHANGE.

PRODUCT NON-OBSOLESCENCE AND WARRANTY POLICY

This North American Haworth Product Non-Obsolescence and Warranty Policy (the “policy”) applies to products manufactured after May 8, 2015. For products manufactured before this date please refer to the policy published in the NA Price List when purchased or contact your local Authorized Haworth Dealer. All Haworth products are warranted for 24 hour / 7 day use over the length of the Applicable Warranty Period as set forth below.

Haworth, Inc. or Haworth, Ltd., (each called “Haworth”) will make a good faith effort to maintain product compatibility within our various generations of integrated product platforms to provide our customers with spaces that adapt to change. Under our non-obsolence policy, we commit to provide our customers with products of comparable function or operational characteristics for a term equal to the Applicable Warranty Period. Haworth fabrics and finishes must be updated periodically to maintain the market appeal of our products and respond to the demands and changing preferences of our customers. As a result, we or the manufacturer may discontinue some fabrics and finishes before expiration of the Applicable Warranty Period.

If a new product purchased or leased from Haworth or from an Authorized Haworth Dealer proves to be defective (as defined below) while the product is still in the possession of the initial purchaser or lessee and if they, within the Applicable Warranty Period, inform Haworth of the defect by contacting the local Authorized Haworth Dealer, then, except as provided below, Haworth will, at Haworth’s option, either repair or replace the product, at Haworth’s expense, or refund the purchase price of the product. Except as provided below, a product shall be considered “defective” if Haworth finds that it is defective in material or workmanship and if the defect materially impairs the use of the product to the purchaser or lessee. The applicable warranty period begins on the day the product is manufactured.
