Solid Cast Iron Base Construction

Drilled and Tapped Glides
J-Series Uses Fully Welded Construction

Mortise and Tenon Wood Edges

The Falcon Advantage

CAST IRON BASES: DURABLE AND ENVIRONMENTALLY SOUND

- Made from 98% recycled grey iron.
- Solid cast iron (not hollow), makes the base plates dent proof.
- Multiple glide options designed to meet all flooring requirements.
- Bases are drilled and tapped for glides. We do not use glide inserts which can easily break.
- J-Series steel bases offer fully welded construction; perfect for use in high abuse or extra heavy table tops such as stone.
- Proven track record of 51 years, the longest in the industry.

BASE FINISHES: STRONG, SAFE, AND BEAUTIFUL

- Environmentally responsible, blended epoxy and polyester based powdercoat.
- Unique phosphate washing system allows powdercoat to permanently adhere to base withstanding years of use.
- Heavy nickel undercoat is used before the plating process. This important step creates our high-quality finish..

TABLE TOPS: CRAFTSMANSHIP AND DESIGN

- 45lb high-density recycled engineered core provides durability.
- Use of phenolic backing sheet prevents delamination, warping, and surface deflection.
- Mortise and tenon wood edges are durable, while minimizing dirt grabbing gaps.
- High quality finish, consisting of one sealer and two conversion varnish top coats, creates a beautiful and durable matte finish.
- Turn your vision into reality™. We are able to manufacture any size or shape table with multiple non-standard material options.

TOP CONSTRUCTION

Substrate

High density 45 lb. core with backing sheet

Laminate

.050 thick high pressure plastic manufactured to N.E.M.A. standards, .045 thick phenolic resin sheet on underside.

Light Weight Top

Most light weight tops produced using light weight composite wood construction, specially designed to provide light weight rigidity. The core is 7/8" thick. Edges are built up to 1-1/4" using 1/4" fiberboard on perimeter of frame. Tops are balanced construction with plastic laminate or veneer surfaces and phenolic backer.

EDGE AND MODESTY PROFILES

1300 / 1308 Bumper T-Mold
1-1/4" laminate top. The edges are banded with solid vinyl "T" molding, with 3" radius at corners.
Modesty edge 1300

1333 / 1338 Eased T-Mold
1-1/4" laminate top. The edges are banded with solid vinyl "T" molding, with 1" radius at corners.
Modesty edge 1300

2300 / 2308 Wood Band
1-1/4" laminate top. The edges are banded with 1/4" hardwood. No radius at corners.

MATS POWER SOLUTIONS

DEFINE YOUR APPLICATION

We have a variety of power solutions appropriate for any of your power requirements. Please take a moment to evaluate your project and complete the following check list. It will help determine which power solution best fits your needs. After you have answered these questions, contact your sales representative, or customer service representative, who will assist you with the specific details for adding the power option to your table order.

My client is powering more than one table (Y/N)

- _____ Our plan calls for less than 16 users per row
- _____ I need data brought into the tables
- _____ I need power at the top surface
- _____ I need power accessible below the table for CPU's to plug into
- _____ The room is permanent and will not be reconfigured
- _____ The room will have bolt down tables
- _____ Power is currently available in the wall
- _____ Power is currently available in the floor
- _____ New construction, power can be located anywhere
- _____ What is the desired table length
- _____ How many users per table

What will be plugged into each table:

- _____ Number of Computers
- _____ Number of Monitors
- _____ Number of Printers or other equipment
- _____ Does the building have 15 amp power available (Y/N)
- _____ Does the building have 20 amp power available (Y/N)

SOLUTIONS

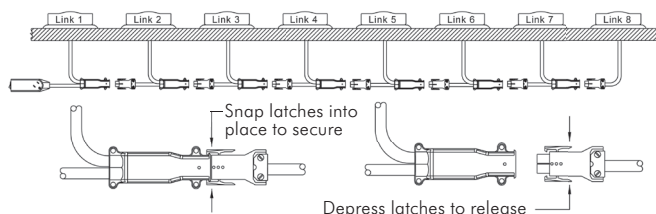

I. Simple Power

Simple power is defined as a 15 amp plug that is inserted into a standard outlet. Each electrical component in the table would plug directly into the floor or wall. This power is commonly used with conference tables or very small training rooms.

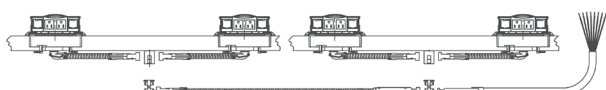

II. Table Top Daisy Chain Power

This power allows you run rows of tables in a training room. Up to 16 users can generally be provided with power from one access point. If there are more than 16 users, additional access points must be designated. The type of power can be applied using one of the following options.

- a. Interlink:**
- i. 12 amp system rating with 15 amp power cord.
 - ii. Up to 8 duplexes devices such as Miniports.
 - iii. Meets UL 962.

- b. Interconnect:**
- i. 8 wire, 4-circuit system or 4 wire 2 circuit system depending on power need.
 - ii. 20 amp system rating.
 - iii. UL 183.
 - iv. Must be hard wired to the building or utilize quick connect.
 - v. Building must be wired for 20 amp rating.

III. Fully Integrated Power within the Wire Manager and Table Top

This solution allows for computer rooms to power a CPU, monitor, printer, etc. from underneath the table surface as well as power other ancillary equipment from the top surface. It allows for long runs of power with the ability to segregate for clean circuits.

- i. 20 amp single circuit solution that utilizes a 20 amp plug.
- ii. 2 circuit system that is rated at 20 amps per circuit or a total of 40 amps which requires hardwiring to the building.
- iii. 4 circuit system that is rated at 20 amps per circuit or a total of 80 amps which requires hardwiring to the building.
- iv. UL1286 rated.
- v. Building must be wired for 20 amp rating.

**Information is for planning purpose only.

required building codes are met.**

STANDARD TABLE HEIGHT: 28 3/4"

TOP CONSTRUCTION

Substrate

High density 45 lb. core with backing sheet

Laminate

.050 thick high pressure plastic manufactured to N.E.M.A. standards, .045 thick phenolic resin sheet on underside.

Veneer

1/32" thick genuine hardwood top which is stained and sealed on the bottom. Veneer not available with light weight core. Specify: oak, walnut, mahogany, maple, cherry. Edge species are the same as that of top veneer. See color chart for finishes. Not recommended on Folding Tables.

Light Weight Top

Most light weight tops produced using light weight composite wood construction, specially designed to provide light weight rigidity. The core is 7/8" thick. Edges are built up to 1-1/4" using 1/4" fiberboard on perimeter of frame. Tops are balanced construction with plastic laminate or veneer surfaces and phenolic backer.

EDGE AND MODESTY PROFILES

4720 Postformed

1-1/4" plastic laminate top. The front edge is sloped, reducing strain on the wrist. The side and rear edge are banded with rigid PVC molding. Modesty edge 1440

1300 / 1307 Bumper T-Mold

1-1/4" laminate top. The edges are banded with solid vinyl "T" molding, with 7/8" radius at corners. Modesty edge 1300

1333 / 1337 Eased T-Mold

1-1/4" laminate top. The edges are banded with solid vinyl "T" molding, with 1" radius at corners. Modesty edge 1300

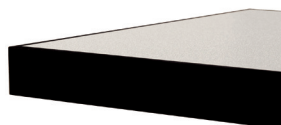

4150 / 4157 Sloped Urethane

1-1/4" laminate top. The front urethane edge is sloped, reducing strain on the wrist. The sides and rear have a flat urethane edge. Modesty edge 1440

1340 / 1347 Reveal T-Mold

1-1/4" laminate top. The edges are banded with 5/16" solid vinyl "T" molding, with 7/8" radius at corners. Modesty edge 1300

1440 / 1447 Flat PVC

1-1/4" laminate top. The edges are banded with flat PVC molding. No radius at corners. Modesty edge 1440

1444 / 1448 Flat PVC

1-3/4" laminate top. The edges are banded with flat PVC molding. No radius at corners. Modesty edge 1440

2405 / 2407 Wood Bullnose

1-1/4" laminate top. The edges are banded with hardwood. No radius at corners. Modesty edge Flat Wood Band

2323 / 2327 Wood Band

1-1/4" laminate top. The edges are banded with 1/4" hardwood. No radius at corners. Modesty edge Flat Wood Band

2344 / 2348 Wood Band

1-3/4" laminate top. The edges are banded with 1/4" hardwood. No radius at corners. Modesty edge Flat Wood Band

2420 / 2427 Wood Edge

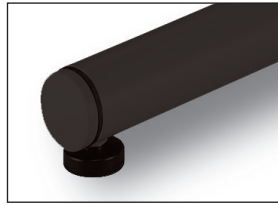

1-1/4" laminate top. The edges are banded with hardwood. No radius at corners. Modesty edge Flat Wood Band

UNDERSTRUCTURE SPECIFICATIONS

GLIDES

Adjustable glides are standard on all tables.

- 1-3/8" diameter black nylon with steel support housing
- 5/16-18 x 1" threaded stem

Legs

- **ST3T Stationary**
- **ST5T Folding**
- **ST6T Flip Top**
- **ST8T C-Leg**
- Inverted "T"-shape or double "T" (TT) depending on top width.
- Made from 1-3/4" diameter 14 gauge steel tubing.

Pedestal Base

- **ST3X Stationary**
- **ST5X Folding**
- **ST6X Flip Top**
- Foot - "X" shaped made with 1-3/4" diameter 14 gauge steel tubing.
- Column - one 2-1/4" diameter 14 gauge, or one 3" diameter 16 gauge, or four 1-3/4" diameter 14 gauge steel tubing depending on top size.
- Single column bases bolt together with a single 1/2"-13" x 26-1/4" long bolt. The bolt threads up through X-foot, column and into threaded insert in mounting plate.
- Four-column bases bolted together using eight 1/2"-13 bolts threaded into steel inserts welded into columns.
- Mounting plates are 10" x 10"-7 gauge cold formed steel for single column bases.
- 14" x 14"- 7 gauge for four-column bases.

END CAPS

- Die cast aluminum pressed in place.
- Black reveal rings are sandwiched between end cap and tube end.

Stationary Base

- **ST3 Series**
- 10" square 7 gauge cold formed steel mounting plates bolt to the leg columns.
- 1/2-13 x 1-1/2" long steel hex head bolts thread through the mounting plates and into steel inserts welded within the column.
- Each leg assembly fastens to the top with eight #14 x 3/4" long custom particle board screws.
- Tables greater than 72" have 2 bent steel rails screwed to the bottom of the top.

JOINTS

Continuous brazed welded for maximum strength.

FINISHES

Finished with powdercoat or optional chrome plating.

Folding Base

- **ST5T T-Base**
- **ST5C C-Leg**
- Self-supporting chassis made of two 1/8" thick L-shaped steel rails support the legs and folding mechanism.
- Rails act as stiffeners to resist top sag.
- Twin die cast zinc/aluminum diagonal braces are used as leg supports on ST5T Folding Series.
- Twin stamped steel braces are used on ST5T Folding Double end base Series.
- Latching devices will automatically engage to lock legs in their upright position.
- Folded thickness: 4-1/2".

DELUXE TRUCKS

- Saves wear and tear on tables.
- One person can set-up or knock down.
- Quiet, smooth movement on 6" diameter vulcanized rubber tired roller bearing casters.
- Load capacity 2,000 lbs.- up to six tables
- Finish is black enamel with carpeted bed.

NON SEQUENTIAL POWER SYSTEM – 15 AMP SYSTEM RATING

The Non Sequential Power System is designed for use with most Falcon tables in training/classrooms where tables are reconfigured on a regular basis. This unit provides 15 amps of power in a flexible format. A single run can accommodate up to eight tables (60" long or less) with one miniport per table, or four tables with two miniports per table. Tables 72" or longer require two units per table. Additional table top access units available, contact your local sale representative or customer service for information.

- Up to 8 duplex non sequential devices
- Single Circuit Power
- 12 Amp System Rating
- 15 Amp Power Cord with 15 Amp over-current protection
- 40 Ft. Maximum Total Length
- Color: Black
- UL recognized

ELECTRICAL WORKSHEET

We have a variety of power solutions appropriate for any of your power requirements. Please take a moment to evaluate your project and complete the following check list. It will help determine which power solution best fits your needs. After you have answered these questions, contact your sales representative, or customer service representative, who will assist you with the specific details for adding the power option to your table order.

My client is powering more than one table (Y/N)

- _____ Our plan calls for less than 16 users per row
- _____ I need data brought into the tables
- _____ I need power at the top surface
- _____ I need power accessible below the table for CPU's to plug into
- _____ The room is permanent and will not be reconfigured
- _____ The room will have bolt down tables
- _____ Power is currently available in the wall
- _____ Power is currently available in the floor
- _____ New construction, power can be located anywhere
- _____ What is the desired table length
- _____ How many users per table

SOLUTIONS

I. Simple Power

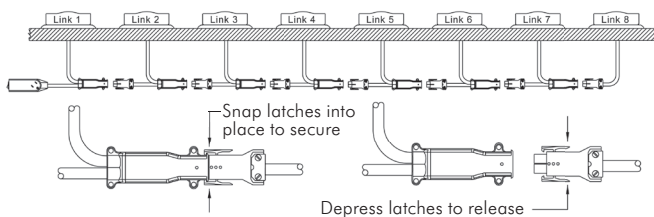

Simple power is defined as a 15 amp plug that is inserted into a standard outlet. Each electrical component in the table would plug directly into the floor or wall. This power is commonly used with conference tables or very small training rooms.

II. Table Top Daisy Chain Power

This power allows you run rows of tables in a training room. Up to 16 users (2 per unit) can generally be provided with power from one access point. If there are more than 16 users, additional access points must be designated. The type of power can be applied using one of the following options.

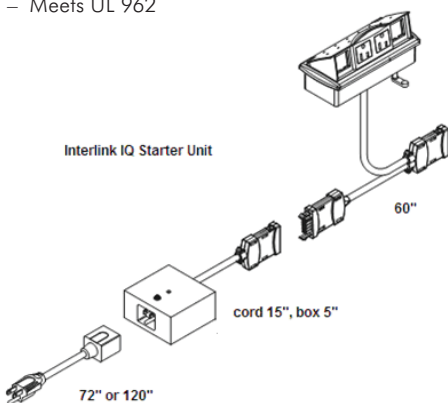

a. Interlink

- 12 amp system rating with 15 amp power cord
- Up to 8 duplexes devices such as Miniports
- Meets UL 962

b. Nonsequential

- 12 amp system rating with 15 amp power cord
- Up to 8 duplexes devices such as Miniports
- Meets UL 962

What will be plugged into each table:

- Number of Computers
- Number of Monitors
- Number of Printers or other equipment

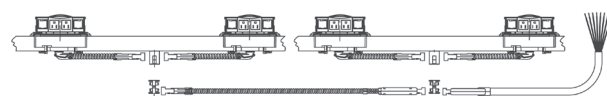

Does the building have 15 amp power available (Y/N)

Does the building have 20 amp power available (Y/N)

Note: Falcon's standard power options do not meet Chicago or New York codes, contact your sales representative for assistance.

c. Interconnect

- 8-wire, 4-circuit system or 4-wire 2-circuit system depending on power need.
- 20 amp per circuit rating
- UL 183.
- Must be hard wired to the building or utilize quick connect.
- Building must be wired for 20 amp rating.

III. Fully Integrated Power within the Wire Manager and Table Top

This solution allows for computer rooms to power a CPU, monitor, printer, etc. from underneath the table surface as well as power other ancillary equipment from the top surface. It allows for long runs of power with the ability to segregate for clean circuits.

- 20 amp single circuit solution that utilizes a 20 amp plug.
- 2 circuit system that is rated at 20 amps per circuit (requires hardwiring to the building)
- 4 circuit system that is rated at 20 amps per circuit (requires hardwiring to the building)
- Building must be wired for 20 amp rating
- UL1286 Rated

Information is for planning purpose only. Contact a licensed electrician to ensure required building codes are met.

IV. Small Order Charge

Orders with a combined Net price under \$1,000 will be subject to a Special Handling Charge of \$125 Net. One charge per order.

GLOSSARY OF ELECTRICAL TERMS

Amps, Amperage

Unit of electrical current. Considered to be the volume of electricity flowing through a wire (compare to voltage, wattage).

Chicago and New York Codes

Falcon's standard power options do not meet these requirements, contact your sales representative for additional information.

Circuit

A complete electrical path that leads from a power source, through an electrical device, and back to the source.

Conduit

Metal housing that is required by most codes for the protection of power-carrying wires. May either be a rigid casing or flexible tubing.

Dedicated Circuit

One circuit that is set aside, by nature of the system, for a specific use. For example, the four-wire 20 amp power cord has a dedicated ground wire which cannot be accessed by other circuits because terminals are polarized.

Downrated Circuit

A circuit that is under load continuously for three or more hours. To protect wires and terminals from overheating under this load, the circuit rating is lowered from the maximum 20 amps to 16 amps.

Hard-wire

An electrical connection made by stripping insulation from individual wires and physically joining them for a permanent installation. The hard-wire entry option must be performed by a licensed electrician who will connect the proper wires to support multiple option features.

Isolated Ground

Power in a specific circuit that has been protected from interference created in other circuits.

NEC, National Electrical Code

Volt, Voltage

Unit of electrical pressure in a circuit. Compare this to amperage which is the volume of current.

Watt, Wattage

A measure of electrical power. Equal to electrical pressure (voltage) multiplied by volume (amperage) in a circuit (ie: 120 volts multiplied by 1.5 amps equals 180 watts).
