Designer Specifications

Groupe Lacasse distinguishes itself thanks to its flexibility and willingness to accommodate special requests, and successfully meets most specific requests for products that are not part of its standard offering. It is possible, among other things, to use C.O.M. fabrics for our PanGram divider panels, tackboards, cushions, etc. Translucent inserts as well as certain high-pressure laminates can also be special-ordered. The Quotations department can process such specific requests.

NICER FOR THE ENVIRONMENT

It's our corporate responsibility to contribute to the preservation of natural resources and to ensure that our operations have the least possible impact on the environment. We choose suppliers who support our efforts to reduce deforestation. The majority of our products are manufactured from particleboard, made from 100% post-industrial recycled materials. We recover the cuttings from all our activities and even sawdust for power cogeneration. What's more, we sort and recycle plastic, steel and aluminum.

Our St. Pie, QC and Bruce, MS facilities are certified ISO 9001 and ISO 14 001.

We're proud to say that all Lacasse products are GREENGUARD® certified. Which means that North Americans can be sure that these products will not affect the air quality of their working environments. And other groups, like architects, designers and specifiers who use Lacasse products can benefit from their GREENGUARD® certification to earn points towards meeting LEED® standards.

GREENGUARD Indoor Air Quality® and GREENGUARD Children & Schools® are trademarks of the GREENGUARD Environmental Institute

ENVIRONMENTAL TOOLS

A variety of informative tools which detail how Groupe Lacasse products help support green initiatives are available. All documents are routinely updated and placed on the Groupe Lacasse website under "**About Us > Environment**". Please check this page regularly for the most up-to-date documents.

Available documents: the corporate **Sustainability Policy**, how our products support **LEED Credits** (these documents include information on the percentage of recycled material in each product) and a listing of Groupe Lacasse products that are **GREENGUARD Certified**.

GREENGUARD CERTIFICATES

GREENGUARD Indoor Air Quality and Children and Schools certificates can be downloaded. These are found on www.greenguard.org. Search for Groupe Lacasse in the "Find Products" Search by Manufacturer" section. All GREENGUARD certifications are listed by product line.

STANDARDIZED DIMENSIONAL SPECIALS

“DIMENSIONAL SPECIALS” PROGRAM

Groupe Lacasse offers its dealers the possibility of making certain modifications to unit dimensions without having to go through the Quotations department. The following rules apply:

- Only one dimension may be modified on any given unit (width or depth or height).
- The modified dimension must fall within the range of standard dimensions offered.
Example: a 98"-wide desk may not be specified without going through the Specials department, because that width exceeds standard widths. However, a 70"-wide desk may be specified, because that width does fall between existing standard widths (namely, 66" and 72").
- The dimension change must not affect the overall construction of the furniture unit.
Example: a wider bookcase necessitating a central divider for added support.
- Drawers must remain in standard dimensions.
- Applicable to laminate units only. (Doors and modesty panels with metal frames cannot be modified, nor can metal legs.)
- Rounded reception desks are not included in this program.

PROCEDURE:

1. Choose the unit with the next **largest** dimension.
Example: if you need a right single pedestal desk 70" wide, choose model 41_N-S3672F.
2. Add the prefix “S” at the start of the product code. (Ex.: S41_N-S36__F.)
3. Change the dimensions of the standard unit to those required.
(Ex.: 41_N-F3672S becomes S41_N-F3670S.)
4. Use the price of the next largest unit from the price list in effect.
(Ex.: if the new unit is a S41_N-F3670S, the price to use is that of model 41_N-F3672S, from the February 2015 price list.)

*** If exact dimensions are required, be sure to specify it on the order form; otherwise, the unit will be manufactured using the corresponding Imperial units.**

* If a particular dimension includes a fraction, the code must be modified to show the measurement's rounded-off value; however, the measurement must be indicated with the fraction in the item description on the order form. (Example: a width of 68.5 is to be shown as 69 in the code, while the comments section of the order form must bear the mention “exactly 68.5”.)

*** The number of doors and shelves on a hutch / storage unit will be determined by Groupe Lacasse (in accordance with our manufacturing standards).**

* If the “Dimensional Specials” program does not apply to your particular situation, or for any questions concerning such specials, contact our Specials department at Quotation@groupelacasse.com.

TWO-TONE AND HIGH-GLOSS FINISH APPLICATION

Surfaces: The first finish specified will be applied to the top and to the legs. The second specified finish will be applied to the back of the unit. For adjustable surfaces, the first finish will be applied to the top of the surface and the legs. The second finish will be applied to the back panels.

Storage units: The first finish specified will be applied to the frame of the unit. The second finish will be applied to the unit's front.

Two-tone application and wood grain direction:

TWO-TONE AND HIGH-GLOSS FINISH APPLICATION (CONTINUED)

Application of the high-gloss finish to desks and modesty panels:

Application of the high-gloss finish to storage units:

Order examples:

YES N1NRN-UL206021BE CCL/SNO

YES N1NRW-UL206021BE CCL (The W in the code indicates that fronts will be in High-Gloss White finish.)

NO N1NRW-UL206021BE CCL/SNO (The W in the code indicates that fronts will be in High-Gloss White finish. Therefore, it is not possible to specify Snow SNO laminate finish as Color 02.)

UNACCEPTABLE CONFIGURATIONS

The surface's short leg must always rest on a low storage module.

The depth of the low storage module must be equal or greater than the depth of the surface.

The junction point between a surface and a return must be on a low storage unit.

Total stackable height must be 73" (1850 mm) or less.

Stackable storage units must be positioned on top of a solid and stable configuration such as a desk with legs or freestanding storage modules.

The hanging pedestal (NNN__-161820F) is NOT compatible on 20" (500 mm) deep desks and returns.

NON-RECOMMENDED CONFIGURATIONS

It is preferable to position a storage module underneath a surface, 2" in recess, when the surface and legs have knife edge detailing.

Overlapping furniture elements can result in drawers being completely or partially inaccessible underneath the surface. It is preferable to choose another storage configuration.

Choose the depths of the furniture elements carefully, thus avoiding a situation where a storage module exceeds the surface depth.

The uneven handle gives a noticeable design value to the configuration. To create the desired effect, a certain attention must be given when specifying the orientation of the handles.

SPECIFICATIONS

EDGEBANDING

Is applied automatically on top and sides.

N Edge

1" and 1½"

The **N** edge is matched with the finish specified for the surface.

Knife Edge

Left extended corner modules

Grommet. Full-width wiring access on both back panels.

Technical drawing of a left extended corner module. The drawing shows a rectangular module with a rounded bottom-right corner. Dimensions are provided in inches and millimeters. The top edge has a total width of 72" (1830 mm) and a segment of 66" (1676 mm). The left edge has a height of 24" (610 mm). The bottom edge has a total width of 48" (1219 mm) and a segment of 24" (610 mm). The rounded corner has a radius of R2. A small circle is located on the top edge, 60" (1524 mm) from the left edge. The table below lists the radii for the surfaces, R1, and R2.

Right extended corner modules

Grommet. Full-width wiring access on both back panels.

The diagram shows a right-extended corner module. The top edge has a total width of 72 inches, with a 24-inch section on the right. The left edge has a total height of 48 inches, with a 24-inch section at the bottom. A curved corner with radius R1 connects the 24-inch sections. A dimension R2 indicates the distance from the outer corner to the inner corner along the 24-inch edge. A grommet is located at the top-left corner. Labels 36, 42, and 48 are on the left, and 24 is at the bottom left.

TYPICAL WOOD GRAIN DIRECTION FOR OPTIONS:

CONCEPT 3 — EASY TO SPECIFY, EASY TO RECONFIGURE

3 LAYOUTS

Concept 3 envisions three classic office workstation layouts — **traditional T**, **U-shaped** and **L-shaped** — with generous surfaces and versatile storage. Inspired design ensures upscale looks and maximum functionality whichever setting you choose.

REVERSIBLE

As easy as flipping a coin, storage and non-handed work surfaces fit together left or right. In the **U-shaped** and **L-shaped** settings, you can attach the bridge or work surface on either side without losing access to the storage below. A big plus if you change your space... or change your mind!

3 HEIGHTS

Keep it sleek and low with the **33-inch** storage module, elevate the look to **49 inches** or top it off at **73 inches**. Each level has its own refined sense of proportion and scale.

3 SURFACE SHAPES

Customize the look and function of your work surface with the shape you prefer — classic **rectangular R**, stylish **bow front A** or our adaptable **Y shape**.

3 STORAGE OPTIONS

Choose from **storage modules** designed for filing, or for a multiplicity of functions with drawers and open bookcase. Whatever works best for you.

DOOR OPTIONS

Concept 3 is designed to simplify your life, but you still have the final say. Choose from matching **lamine N** or **anodized aluminum frame T** door styles. Storage modules are shipped assembled but offer you the flexibility of modifying the door configuration on site.

SPECIFIC TWO-TONE APPLICATION ON 73", 49" AND 33" H STORAGE UNITS (unless otherwise specified)

The first finish specified will be applied to the lamine door(s) and to the drawer at the bottom of the unit. The second finish specified will be applied to the rest of the unit.

EDGEBANDING

Furniture with 1" (25 mm) thick tops.

N Edge

Smooth, 1/8" (3 mm) thick edge.

The **N** edge is matched with the finish specified for the surface.

PANGRAM

PANGRAM IS THE PERFECT SOLUTION FOR WORKSPACE DIVISION NEEDS

Panels provide affordable privacy and support for work surfaces and accessories. This well-designed laminate panel system focuses on ease of use, flexibility and modularity. Compatible with PanGram surfaces and all other Lacasse laminate series.

SPECIFICATIONS AND CONSTRUCTION

PANEL CONSTRUCTION

PANEL & STACKABLE PANEL HEIGHT COMBINATIONS

Base panels are available in heights of 33" to 65" (837 to 1650 mm) and are available in all Lacasse laminate finishes.

Stackable panels are available in a choice of laminate, fabric or translucent material.

180° PVC connectors fit snugly in the grooves of the panel end moldings for a tight link between panels in a straight line.

The end molding and the top cap have inverted slots that self-align the panels.

A 90° PVC connecting strip is used to attach two, three or four panels together, for corner, T plan or cluster application.

Accent translucent panels are easily installed.

Install accessories with metal support (pencil tray, rail, shelf) at the right height before installing the next stackable panel.

An adhesive channel is available to manage power and communication cables.

Replace a leveler by a stabilizer foot at the end of an unattached run of panels.

Start a panel run from a wall, a pillar... Screw the wall-starter, snap a 180° connector between the starter and the panel, *et voilà!* Really simple, isn't it?

SURFACES

Surfaces without GR in their product code are neither equipped with grommets nor pre-drilled along the edges.

Metal-on-metal assembly.

GR SURFACES

When GR is specified in the surface product code, one or more grommets are added. In addition, pre-drillings along the edges enables compatibility with SC screens.

SC SCREENS

SC screens may be installed and positioned as modesty panels or as privacy screens, according to needs.

SH SHELVES

SH shelves are used jointly with SC screens.

HOW TO SPECIFY:

RCST3496 with LGC-4TRAC296C1

RCDT6684 with LGC-4TRAC496C2

LGC-PASS36

STEP 1

Determine the number of users.

STEP 2

Determine the electrical requirements of users (1 or 2 duplex receptacles per workstation are usually sufficient) and then choose from the predefined kits.

Each kit must be ordered in function of the length of the surface and the required number of duplex receptacles.

STEP 3

Determine whether 1 or 2 circuits are needed and order the kits accordingly.

The kits are composed of duplex receptacles and cables. The hardware required to fix the cables in the raceway is included.

STEP 4

Each added surface must be connected to the adjacent surface using a pass cable (LGC-PASS36).

ELECTRICAL INFEED:

There are 2 ways to bring power to the tables. By using a floor mounted power module or by using a ceiling feed.

FLOOR FEED:

The floor feed cable is 60" (1524 mm) or 72" (1829 mm) long – assuming a table height of 29⁷/₈" (757 mm) and the first duplex is always positioned at 18" (450 mm) from the side of the surface.

The wire management base comes with a lockable door and with 2 or 4 cantilevers depending on the base type.

Electricity can come from the extremity of the table or through the center via the wire management base.

Each electrical entry can power 2 circuits for a maximum of 26 duplex receptacles (13 per circuit). The electrical installation of the entry must be made by a professional electrician.

CEILING FEED:

The electricity for the ceiling infeed can only come through the extremity of the table. The CFEED comes with a 120" H (3000 mm) column and with the necessary hardware to mount it to the end of the table.

The cable is 132" (3353 mm) long – assuming a table height of 29⁷/₈" H (757 mm) and the first duplex is always positioned at 18" (450 mm) from the side of the surface.

A communication plate can be installed on the aluminum rail in the surface raceway and can accommodate up to 4 connections per plate. The adaptors are included.

The installation of the cabling and jacks (not included) must be made by a professional electrician.

EDGEBANDING

Furniture with 1¹/₂" (38 mm) thick tops.

N Edge

Smooth, 1¹/₈" (3 mm) thick edge.

The **N** edge is **matched** with the finish specified for the surface.

QUORUM MULTICONFERENCE

CONFERENCE TABLES

With its sophisticated, contemporary look and its ingenious and versatile design, the QUORUM MULTICONFERENCE™ collection offers absolute freedom of expression. Whether your needs include impromptu meetings between two colleagues or gatherings of 16 to 24 people, our conference tables can be adapted to a multitude of applications, with technology integration features and a wide choice of finishes, shapes and sizes.

TOPS

BASES

TECHNOLOGY INTEGRATION

CONSTRUCTION

Table surfaces are made of thermofused laminate panels, finished on both sides. Scratch-resistant (45 lb/ft³) tops are 1½" (38 mm) thick and are also offered in high-pressure laminate, adding a thickness of ⅛" (1,5 mm). All surface edges are finished with thick thermoplastic polymer edgebanding.

Table surfaces are pre-drilled and the position of the bases is assured with metal-on-metal hardware assembly and metal screws. Easy to assemble, all tables meet BIFMA standards.

The price list includes a column featuring an estimated number of seating places for each table. These numbers are based on the assumption that 28" (700 mm) is the minimum space required for people to work comfortably seated next to each other.

TABLE SURFACES

Most surfaces are offered in increments of 12" (300 mm):

- Depths: 36" to 60" (900 to 1500 mm)
 - Widths: 36" to 252" (900 to 6300 mm)
 - Can be ordered by the inch at no up charge.
- Refer to next highest dimension for price.

One-piece surfaces: 96" (2400 mm) and less

Two-piece surfaces: 108" to 192" (2700 to 4800 mm)

Three-piece surfaces: 204" to 252" (5100 to 6300 mm)

EDGEBANDING

1½" (38 mm) thick tops.

N Edge

Smooth, ⅛" (3 mm) thick edge.

The **N** edge is matched with the finish specified for the surface.

S Edge

Silver edge.

Textured 1 Edge

Textured, ⅝" (4 mm) thick edge.

The textured 1 and 2 edges are **available (and in matching color) ONLY when a wood grain finish is specified** for the surface.

Textured 2 Edge

Knife Edge

The knife edge **K** is **available (and in matching color) ONLY when a wood grain finish or Snow (SNO) is specified** for the surface.

ACCENT COLORS

S – Silver

A – Anthracite Grey

The accent color applies to non-laminate components such as bases and grommets.

Exceptions: Power units and CB base are available in Silver anodized aluminum only.

EDGEBOARDING POSITION

Smooth N & S edgebanding

Textured 1 & 2 edgebanding

Knife edgebanding (K)

Knife edgebanding applies to square, rectangular and A-shape tops only (same position as N & S edgebandings on rectangular and square tops only).

TWO-TONE APPLICATION

Surfaces that are available in two or three pieces can be ordered in a combination of two finishes, when N or S edgebanding is specified. In the case of a two-tone application, the first finish specified will be applied to the grey area and the second finish specified will be applied to the rest of the unit.

* The woodgrain is non-continuous on 3 section tables.

TECHNOLOGY INTEGRATION

All tables can be ordered with grommets or electrical / communication modules.

GC grommet

PC Electrical / communication module

At the end of the surface code, specify the code for the desired grommet or electrical / communication module. Holes for **G** grommets or **P** modules are pre-drilled in a set position by the manufacturer. After the **G** or **P** code, please add the code corresponding to the number of units:

- G1:** 1 grommet (center)
- G2:** 2 grommets (both ends)
- G3:** 3 grommets (2 at the ends and 1 in the center)
- P1:** 1 electrical / communication module (center)
- P2:** 2 electrical / communication modules (both ends)
- P3:** 3 electrical / communication modules (2 at the ends and 1 in the center)

(Available in Silver anodized aluminum finish only)

Refer to the Accessories section, page 193, for more electrical / communication modules. Cut-out to be made on-site or special-ordered.

GC/PC All work surfaces

G2/P2 72" (1800 mm) and wider work surfaces

G3/P3 108" (2700 mm) and wider work surfaces

WIRE MANAGEMENT SYSTEMS

The **LB__WM** thermofused laminate base offers a vertical wire management system with a lockable storage unit. It is designed with a 6" (150 mm) recessed bottom that can be positioned above a floor plug. The hinges of the storage unit easily open up to 110°.

It is possible to add horizontal PVC wire management channels (LGC-HWMC__ (A, S)) under the table's surface or vertical PVC wire management channels (LGC-VWMC20(A, S)) on CB, ATL2, STL2, QTL2, VTL2 and TB bases. **Please refer to the Accessories section, page 193.**

Refer to the Electricom II section, page 200, for a complete electrification solution.

CONFERENCE TABLE BASES

Refer to the Compatibility Table, page 162, for the number of bases required for the dimensions of the table's surface. It is possible to order different types of bases for the same surface. CB and UCB combined bases are made of thermofused laminate with Silver anodized aluminum extrusions. Metal legs are finished with a Silver or Anthracite Grey ultra-resistant, electrostatic paint.

LEVELERS

All bases are equipped with levelers that can be adjusted to a height of 1¼" (31 mm), except for spider legs, which can be adjusted to a height of ½" (12 mm).

MODULAR TABLES

Try a modular table and you'll never want to use anything else. Highly original and adaptable, our freestanding modular tables can be easily configured to your needs and requirements, allowing you to organize all kinds of presentations, training sessions and meetings.

Explore their potential and multiple functionalities to help you find the ideal solution.

TOPS

BASES

TECHNOLOGY INTEGRATION

CONSTRUCTION

Table surfaces are made of thermofused laminate panels, finished on both sides. Scratch-resistant (45 lb/ft²) tops are 1½" (38 mm) thick and are also offered in high-pressure laminate, adding a thickness of ¼" (1,5 mm). All surface edges are finished with thick thermoplastic polymer edgebanding.

Table surfaces are pre-drilled and position of the bases is assured with metal-on-metal hardware assembly and metal screws. Easy to assemble, all tables meet BIFMA standards.

Connectors are available to attach two modular tables together, offering a quick and practical way to reconfigure your furniture, without the use of tools. Surfaces with a depth of 24" and 30" (600 and 750 mm) are perforated, ready to receive the connector. **Refer to the Accessories section, page 193.**

The price list includes a column featuring an estimated number of seating places for each table. These numbers are based on the assumption that 28" (700 mm) is the minimum space required for people to work comfortably seated next to each other.

TABLE SURFACES

- Depths: 24" and 30" (600 and 750 mm)
- Widths (depending on shapes): 36" to 96" (900 to 2400 mm), in increments of 6" (150 mm)

ACCENT COLORS

S – Silver

A – Anthracite Grey

The accent color applies to non-laminate components such as bases, grommets, and modesty supports.

Exceptions: Power units and Interlink modules are in Silver anodized aluminum.

EDGEBOARDING

1½" (38 mm) thick tops.

N edge

Smooth, ⅛" (3 mm) thick edge.

The N edge is matched with the finish specified for the surface.

S edge

Silver edge.

Textured 1 edge

Textured, ⅝" (4 mm) thick edge.

Textured 2 edge

The textured 1 and 2 edges are **available (and in matching color) ONLY** when a wood grain finish is specified for the surface.

EDGEBOARDING POSITION

Smooth N & S edgebanding

Textured 1 & 2 edgebanding

MODESTY PANEL

It is possible to order rectangular or fantail tops with or without a half-height modesty panel. Modesty panels are made of 3/8" (16 mm) thick thermofused laminate panels finished on both sides. A 1 1/2" (38 mm) space between the work surface and the panel allows wires to pass through. Modesty panels are not available for 10° and 15° pentagonal tops.

TWO-TONE APPLICATION

Rectangular or fantail tops for modular tables with optional modesty panel can be ordered in a combination of two finishes. For two-tone applications, the first finish specified will be applied to the surface (grey area) and the second finish specified will be applied to the modesty panel.

TECHNOLOGY INTEGRATION

All tables can be ordered with grommets or electrical / communication modules. At the end of the table code, specify the code for the desired cut-out type. Cut-outs for **G** grommets or **P** modules are manufactured in a preset position at the factory.

P modules are available with single cord option or with Interlink system which allows multiple units to be connected together in a sequence. Refer to Interlink electrical / communication module section on page 177 for more information.

Modules need to be ordered separately when **P** option is specified. Please see page 193. **G** grommet is included with the surface.

G grommet

P Electrical / communication module

Refer to the Accessories section, page 193 for more electrical / communication modules. Cut-out to be made on-site or special-ordered.

Please refer to the illustrations below for the two-tone application, the wood grain direction and the preset cut-out position for **G** grommets or **P** modules.

WIRE MANAGEMENT SYSTEMS

The **LB__WM** thermofused laminate base offers a vertical wire management system with a lockable storage unit. It is designed with a 6" (150 mm) recessed bottom that can be positioned above a floor plug. The hinges of the storage unit easily open up to 110°. It is possible to add horizontal PVC wire management channels (**LGC-HWMCxx_(A, S)**) under the table's work surface or vertical PVC wire management channels (**LGC-VWMC20_(A, S)**) on legs. Please refer to the Accessories section, page 193.

MODULAR TABLE BASES

Refer to the Compatibility Table, on page 162, for the number of bases required for the dimensions of the table's work surface. It is possible to order different types of bases for the same surface. Metal legs are finished with a Silver or Anthracite Grey ultra-resistant, electrostatic paint.

LEVELERS

Fixed bases are equipped with levelers that can be adjusted to a height of 1 1/4" (31 mm), except for spider legs, which can be adjusted to a height of 1/2" (12 mm), and 24" (600 mm) T-bases, which can be adjusted to a height of 3/4" (19 mm).

INTERLINK ELECTRICAL & COMMUNICATION MODULES

- When multiple power modules are needed for modular tables, but there is not necessary power supply to do so, then Interlink Electrical and Communication modules are the solution. Interlink allows the connection of one power module to the next, providing power for all of them in the series. Designed specifically for movable furniture, Interlink allows you to configure your workspace exactly how you want it.
- Single circuit power.
- Interlink Electrical and Communication module allows the possibility to add two outlets for fax, phone, or computer.
- Up to 8 duplex devices, 40 ft maximum total length.

To have 8 tables connected on-line, they must be smaller or equal to 60" (1500 mm) in length. If the tables measure more than 60" in length, the links must be connected with a bypass link.

- Links are numbered and color-coded and must be connected in sequence, for example, black with black, red with red. It is an electrical system easy to connect and disconnect.
- Bypass Links: required for tables over 60" (1500 mm) in length, are color and number coded exactly like the links, must be connected in sequence. For each bypass link included in the connection, one link must be deducted to have a maximum of 8 units overall.
- Anodized aluminum finish.
- UL recognized electrical power module component per UL 962.

*Remember to use adhesive wire channel LGC-HWMC__ to manage wires.
Refer to the Accessories section, page 193.

COMPONENTS OF THE INTERLINK SYSTEM: STARTER AND ADD-ON

HOW TO CONNECT THE INTERLINK UNITS WITH EACH OTHER

Links and Bypass Links must be connected in sequence:

- Example with 8 tables of 60": 8 Links, no Bypass Links

- Example with 4 tables of 96": 4 Links, 3 Bypass Links

- Example with 4 tables of 72": 4 Links. Since the first Link is placed at more than 10 ft from the power source, the connection starts with the starter Bypass #1.

TRAINING TABLES

Coordinate shapes and sizes in record times as your needs change. With four locking casters and an optional Flip-Top mechanism that allows you to fold the top down, our training tables can be nested together, moved and stored away, depending on your daily activities.

Finally, a training table that truly makes your life easier!

TOPS

BASES

TECHNOLOGY INTEGRATION

CONSTRUCTION

Table surfaces are made of thermofused laminate panels, finished on both sides. Scratch-resistant (45 lb/ft³) tops are 1" (25 mm) thick and are also offered in high-pressure laminate, adding a thickness of 1/16" (1,5 mm). All surface edges are finished with thick thermoplastic polymer edgebanding.

Table surfaces are pre-drilled and bases are easy to position with metal-on-metal hardware assembly and metal screws. Easy to assemble, all tables meet BIFMA standards.

Connectors are available to attach two training tables together, offering a quick and practical way to reconfigure your workspace, without the use of tools. Surfaces with a depth of 24" and 30" (600 and 750 mm) are perforated, ready to receive the connector. **Refer to the Accessories section, page 193.**

The price list includes a column featuring an estimated number of seating places for each table. These numbers are based on the assumption that 28" (700 mm) is the minimum space required for people to work comfortably seated next to each other.

SURFACES

- Depths: 24" and 30" (600 and 750 mm)
- Widths: 48" to 72" (1200 to 1800 mm), in increments of 6" (150 mm)

EDGE BANDING

1" (25 mm) thick tops.

N Edge

Smooth, 1/8" (3 mm) thick edge.

The **N** edge is matched with the finish specified for the surface.

ACCENT COLORS

A – Anthracite Grey

The accent color applies to non-laminate components such as bases and modesty supports.

Exceptions: Flip-Top mechanisms and electrical modules.

TECHNOLOGY INTEGRATION AND WIRE MANAGEMENT SYSTEMS

An LGC-PCS (available in Silver only) electrical / communication module is available. This removable module can be quickly installed on the work surface, without the use of tools.

It is possible to add horizontal PVC wire management channels (LGC-HWMCxx_ (A, S)) under the table's work surface or vertical PVC wire management channels (LGC-VWMC20_ (A, S)) on L- or T-bases. **Please refer to the Accessories section, page 193.**

MODESTY PANEL OPTION

- Folds by gravity and allows tables to be nested
- Translucent acrylic
- Support brackets are finished in Silver (S) or Anthracite Grey (A)

BASES FOR TRAINING TABLES

Metal L- and T-bases are available for all work surfaces and are finished with Silver or Anthracite Grey ultra-resistant, electrostatic paint. All bases feature 3" (75 mm) diameter casters with brakes. Capacity: 100 lb (45 kg) per caster.

With L- or T-bases with locking casters and an optional Flip-Top mechanism (available with or without a handle) that allows you to fold the top down, our training tables can be nested to help you move and store them away easily.

HEIGHT ADJUSTABLE TABLES

- Complete base offer featuring adjustable and fixed height bases with same look and design throughout the whole table family.
- Different mechanisms to choose from to satisfy all user needs.
- Depending on the mechanism type, surface dimensions are reduced by 1" in depth and 2" in length. This is done in accordance with ergonomic standards, helps for wire management and minimizes the probability of pinching fingers during adjustments.
- No horizontal crossbar allows full clearance for knees and mobile pedestals.
- High quality, German engineered mechanical components. Steel gears in the gear boxes of the crank and electric drives.

CONSTRUCTION

Table surfaces are made of thermofused laminate panels, finished both sides. Scratch-resistant (45 lb/ft²) tops are 1" (25 mm) or 1 1/2" (38 mm) thick and are also offered in high-pressure laminate, adding a thickness of 1/16" (1,5 mm). All surface edges are finished with thick thermoplastic polymer edgebanding.

Work surfaces are pre-drilled and the position of the bases is assured with wood screws for height adjustable tables and with metal-on-metal hardware assembly and metal screws for fixed height tables. Easy to assemble, all tables meet BIFMA standards.

SURFACES with hand crank and electrical mechanism

- Depth: 23" and 29" (575 and 725 mm)
- Widths (depending on shapes): 28" to 70" (700 to 1750 mm)

SURFACES with fixed height base and incremental mechanism

- Depths: 24" and 30" (600 and 750 mm)
- Widths (depending on shapes): 30" to 72" (750 to 1800 mm)

LEVELERS

All bases are equipped with levelers that offer 1" (25 mm) of adjustment.

MODESTY PANELS

It is possible to order a half-height modesty panel for all shapes of surface. Modesty panels are made of 3/8" (16 mm) thick thermofused laminate panels finished both sides.

ACCENT COLORS

S – Silver

A – Anthracite Grey

The accent color applies to non-laminate components such as bases and modesty supports.

Exceptions: components such as top supports and crank remain black.

EDGEBANDING

Furniture with 1" and 1 1/2" (25 and 38 mm) thick tops.

Furniture with 1 1/2" (38 mm) thick tops.

N Edge

Smooth, 1/8" (3 mm) thick edge.

S Edge

Silver edge.

Textured 1 Edge

Textured, 5/32" (4 mm) thick edge.

Textured 2 Edge

The textured 1 and 2 edges are available (and in matching color) ONLY when a wood grain finish is specified for the surface.

The N edge is matched with the finish specified for the surface.

ELECTRICOM II Electrification System

GENERAL

Electrical and communication system fully compatible with Lacasse collections.

Electricom II is based on the principle that an aluminum raceway can serve to house both electrical and communication components. This versatile raceway may then be positioned at the desired location.

TYPICAL APPLICATIONS

Freestanding furniture
Concept 3, 70, 400E, 300, Morpheo, Quad, Options

PanGram

Quorum

TWO LEVELS OF ELECTRIFICATION

4-Trac

- 4 wires, 2 circuits, 20 AMP
- Common ground
- UL, CSA, ROHS certified
- Perfect for today's office automation needs

8-Trac

- 8 wires, 4 circuits, 20 AMP
- 1 isolated ground
- UL, CSA, ROHS certified
- Intended for more demanding electrification needs

COMPONENT SPECIFICATIONS

Raceways

Can accommodate 4 AMP or Panduit brand outlets adapted to fax machines, telephones or computers.

- The raceways support the electrical and communication components.
- 5 lengths are available, in 12" increments.
- 12" covers supplied; may be trimmed on-site as necessary.
- The covers and duplex receptacles have no pre-set location within the raceway; they may be positioned anywhere.

- The supports make possible a range of installation positions:

Underneath the surface, sideways

Underneath the surface, facing down

On vertical panel, sideways

On vertical panel, facing down

Space allocation within raceways:

- When specifying, it is recommended to order a raceway in the size immediately smaller than the dimension of the furniture it will be installed on (for example: DT2472 + EC2RACE60) in order to allow space for exteriors, enable cables to round a corner, or any other reason.

4-TRAC DUPLEX

- Connects to a junction cable or an electrical entry.
- Each duplex receptacle comes with required hardware and support to fix on raceway.
- 2 outlets per duplex receptacle.
- Specify circuit 1 or 2.

8-TRAC BLOCK

- Connects to a junction cable or an electrical entry.
- Each block comes with required hardware and supports to fix on raceway.
- Available in single and double formats.
- Can receive 1 or 2 duplex receptacles.

8-TRAC DUPLEX

- Connects to an 8-Trac block.
- 2 outlets per duplex receptacle.
- Specify circuit 1, 2, 3 or 4.
- Circuit 4 has an isolated ground.

4-TRAC / 8-TRAC CONNECTOR CABLES

- Connect duplex receptacles to each other.
- If in doubt, it is recommended that the largest size available be specified.
- Metallic sheath.

4-TRAC / 8-TRAC FLOOR FEED

- Used to connect a duplex to electrical power source.
- 72" in length. (Longer models available; contact the Customer Service department.)
- Must be installed by an electrician.
- Metallic sheath.

4-TRAC / 8-TRAC CEILING FEED

- Runs from the Lacasse unit to the ceiling.
- The cable is plugged into a duplex.
- Pole: 120"; cable: 132".

- Can be installed on a horizontal or vertical surface.

CONNECTORS

Duplex receptacle connector

- 4-Trac
- Allows the connection of 2 duplex receptacles.

H connector

- 4-Trac / 8-Trac
- Allows up to 4 cables to be connected together.

NOTES FOR SPECIFICATION

Given the remarkable versatility of ELECTRICOM II, particular attention should be given to the location of grommets, exterior panels, pedestals and any other items that might interfere with the raceway or the cables.

Under certain circumstances, grommets may need to be added to furniture. This can be done on-site by a professional installer or at the manufacturing facility according to your specifications. In the latter case, refer to the "Standard Specials" section on page 4 for the appropriate procedure, or contact Groupe Lacasse's Customer Service department.

TECHNICAL PERFORMANCES

THERMOFUSED LAMINATE (TFL):

- Depending on the furniture collection, Lacasse casegoods have TFL surfaces and side panels made of particleboard panels of 1" (25,4 mm) or 1½" (38 mm) thick finished with a mar-resistant high-performance thermofused laminate (45 lbs/ft3). The particleboard panels are laminated on both sides for proper balance.
- TFL technology consists on a decorative paper impregnated with reactive melamine resins which is thermally fused to a substrate (particleboard). The heat and pressure produces a **permanent thermal bond** between the melamine resins, the decorative paper and the substrate. The bonding process results in a clear, hard and non-porous surface.
- TFL panels, unlike wood, will not gouge or dent.
- Delamination is not possible, due to the manufacturing process.
- TFL panels carry a 25-year warranty.

HIGH-PRESSURE LAMINATE (HPL):

- Certain collections are also available with HPL surfaces made of 1¼" (27 mm) or 1⅝" (40 mm) thick particleboard finished with high-pressure laminate (laminate plus a ⅛" (0,8 mm) black backing).
- HPL technology consists of multiple layers of Kraft paper saturated with phenolic resin, a decorative layer of paper saturated with melamine resin, and a very thin top sheet of heavily saturated melamine resin. The high-pressure laminate sheet is then glued to a substrate (particleboard).
- HPL panels offer a good wear and impact resistance.
- HPL panels carry a 5-year warranty.
