Ordering and Shipping

Order Information

Order Processing

Orders are processed by fax (616-987-9446) or email (orders@enwork.com)

Acknowledgments

All orders will be acknowledged within 24 hours unless clarification, special engineering, or material sourcing is needed. Orders will be accepted, manufactured and invoiced based upon the information and terms on the acknowledgment. If there is any discrepancy, it is the responsibility of the dealer to notify our Customer Service department immediately at 800-815-7251.

Quoting Department

- > For any special provisions, requests, or pricing questions, submit an email to quotes@enwork.com and our department will work quickly and efficiently to answer your questions.
- > Quotes are typically turned around within 24-48 hrs.

Changes and Cancellations

Change or cancellation requests must be made in written form. Orders may not be changed or cancelled without the written consent of Enwork. Per the following guidelines, Enwork may accept changes if an order is in progress and/or material has been ordered.

- > Order is within 7 business days of shipping; Enwork cannot change or cancel without 100% fee.
- > Order is scheduled to ship more than 7 business days from receipt of written request: Dealer will be responsible for any manufacturing costs incurred as well as a \$250 (net) change/restock fee.

Product Non-Obsolescence Policy

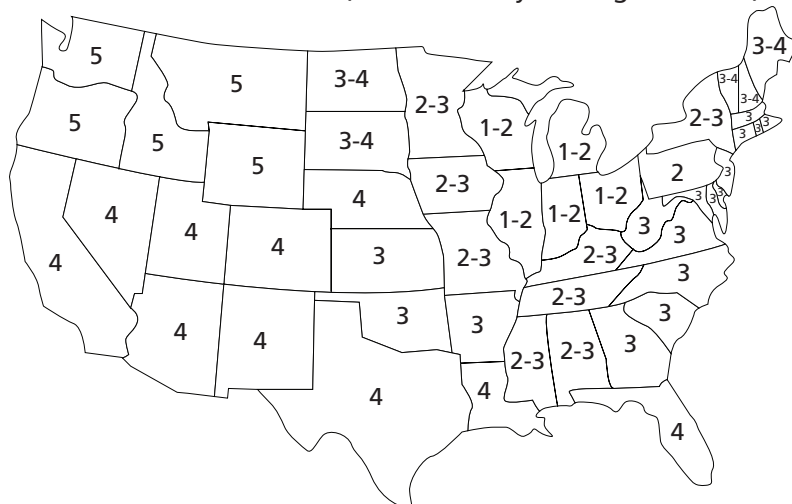

Enwork reserves the right to make changes in product design, or detail, and to discontinue any product or material without notice. Enwork will make a good faith effort to maintain product compatibility within our various generations of product platforms to provide our customers with spaces that adapt to change. Enwork's non-obsolescence policy commits to provide our customers with products of comparable function or operational characteristics for a term equal to the warranty period.

Shipment of Goods

Enwork ships products in the most efficient manner. Direct shipments and arrival appointments are available upon request for full truck load shipment. These appointments are occasionally delayed by unforeseen circumstances, including traffic, equipment problems, inclement weather, and local limitations for large trailers. For shipments less than a truck load in size, Enwork will work with carriers to try to meet specific delivery date requests. **Enwork does not guarantee arrival times for small orders (less than a truckload (LTL)).** Delivery by appointment (e.g. 9 am) is possible for an upcharge. Most of Enwork's LTL carriers can provide a 2-4 hour window in advance for delivery. Standard deliveries are made Monday through Friday between the hours of 8:00am and 5:00pm. The receiving party is responsible for unloading all freight at time of delivery. If your delivery requires special accommodations not outlined here (e.g. driver assist), please contact Enwork prior to shipment. Accommodations may carry an upcharge.

All tracking information can be found in the Dealer section of www.enwork.com. Tracking information isn't available until the day after the products have shipped.

Transit Time Guide (in business days – not guaranteed)

Ordering and Shipping

International Shipping

Enwork will drop ship to any US port of embarkation (excluding Alaska & Hawaii) and will not be responsible for any additional packaging required after that point. Products that come standard assembled can be KD upon request. Enwork will provide estimated weight & cube, but the dealer or freight forwarder is responsible for all customs/shipping paperwork as well as marine insurance. Product title transfers at port of embarkation.

Storage of Completed Orders

Enwork cannot store product beyond the acknowledged ship date. In the event that a customer cannot accept delivery of a finished order, the customer can request that the order is shipped to an alternate address. In the event that no alternate address is provided, Enwork may choose to send the product to a storage facility. The customer will be responsible for charges associated with storage (including transportation to storage) as well as damage or loss risks.

Freight and Minimum Quantities

- > Product is FOB Enwork freight prepaid in the continental United States. Title passes to dealer when it leaves our dock.
- > Orders less than \$1000 net are assessed a \$100 net freight fee. Exception – orders less than \$100 net that can be sent FedEx (e.g. small legs, brackets and lighting) have no freight fee.

Lead Time

Lead times vary. For current lead times by product category, consult Resources/Dealer Support at www.enwork.com.

Mock-ups

An accelerated lead time is available. Enwork will notify you of the anticipated ship date on your Order Acknowledgment.

Terms and Conditions

Exclusive Application of Terms and Conditions. These terms and conditions apply to all sales and related dealings between you, the customer ("Buyer"), and ASSA Group, Inc., also known as Enwork, a Michigan corporation ("Seller"). No additional or contrary terms, whether contained in an order, acknowledgment, or other document from Buyer, shall be binding upon Seller unless agreed to in writing signed by an authorized officer of Seller, and Seller expressly rejects all such additional or contrary terms as may be contained in Buyer's documents. Seller's performance is conditioned on Buyer's unmodified consent exclusively to these Terms and Conditions. BUYER'S ACCEPTANCE OF ANY TENDER OF DELIVERY CONSTITUTES ACCEPTANCE OF ALL OF THESE TERMS AND CONDITIONS.

Price, Payment & Delivery. All prices are those indicated on this document or a separate term sheet incorporated by reference. If pricing is based on Buyer purchasing a certain quantity of goods and Buyer subsequently reduces the quantity purchased, whether by return, cancellation or otherwise, the pricing will be adjusted based on the amount actually purchased. The price and terms of this Agreement are confidential and Buyer shall not disclose them to any person or entity without Seller's written consent, other than to essential personnel. Seller reserves the right at any time to demand payment in advance of shipment. Prices are subject to change at any time without notice. Prices do not include handling or taxes, and Buyer is responsible to pay all taxes of any type or kind regardless of whether collected by Seller. The purchase price is due and payable 30 calendar days from the date of invoice or the date of delivery, whichever is sooner. Seller may refuse to ship where Buyer is in default under this Agreement or any other agreement between the parties. Any payments not timely received by Seller will accrue interest at a rate of 1.5% per month, unless not permitted by law, in which case the interest charge shall be the highest rate permitted by law. In order to ensure payment, and in addition to all security interests granted by operation of law, Buyer grants Seller a security interest in all items sold pursuant to this Agreement and agrees to allow Seller to sign all documents allowing Seller to perfect this security interest. In the event that such items could be deemed to be inventory, Buyer agrees to allow Seller to do all things necessary to perfect its security interest including, but not limited to, notifying existing secured parties and filing a financing statement prior to delivery of the goods. If any payment required under this Agreement is past due, Buyer shall be in default and Seller may exercise all of its legal rights and remedies, including those set forth in Articles 2 and/or 9 of the Uniform Commercial Code. Delivery is F.O.B. Seller's point of shipment. Title passes on Seller's delivery to the carrier. Delivery dates are estimates only, and Seller is not responsible for any delays of any type or kind. Seller may cancel this Agreement without advance notice in the event of Buyer's breach, for failure to give adequate assurances of future performance after Seller's request for such assurances, or for any other reason in Seller's sole discretion. If Buyer terminates this Agreement, it shall only do so on 30 days advanced written notice, and Buyer will remain liable to Seller for all costs, commitments and liabilities incurred by Seller while fulfilling its obligations under this Agreement, including overhead allocated by Seller to such costs and Seller's anticipated profit from this Agreement. If this Agreement is placed in the hands of an attorney for collection of any amounts due, Buyer shall pay all of Seller's actual attorneys fees and costs of collection.

Warranty

Exclusive 10 Year Limited Warranty

Enwork warrants that the goods shall be free from defects in materials or workmanship for a period of ten (10) years except as follows. Lighting, height-adjustable tables, electrical components, pneumatic cylinders, locks, drawer slides, and glides are warranted for a period of five (5) years. Casters are warranted for a period of one (1) year. There is no warranty for "self edge" chipping or peeling, on refrigerators or flat screen monitors.

Upholstery fabrics and vinyls are warranted from defects in material and workmanship for two (2) years. COM, COV, and COL are not covered by this warranty. Consult with upholstery materials suppliers for performance criteria and suitability of individual materials.

This warranty excludes any type of misuse, abuse, as well as ordinary wear and tear.

Pursuant to this warranty, if a product fails under ordinary use as a result of a defect in materials or workmanship, Enwork will, at its option, (a) repair the affected product at no charge, (b) replace the affected product at no charge with a new or refurbished product of comparable function, performance, and quality, or (c) refund the original purchase price for the affected product if repair or replacement is not commercially practicable or cannot be completed in a timely manner.

This warranty applies solely to the original Buyer with the period starting on the date of shipment, and only for products shipped to and sold for use in the U.S. and Canada. This is Enwork's sole and exclusive warranty, and the Buyer waives all others.

The foregoing warranty shall not apply to damage caused under the following circumstances:

(a) damage caused during shipping (this will be handled under separate terms); (b) modifications or attachments to the product that are not Enwork approved; (c) products that were not installed, used or maintained in accordance with product instructions and normal industry practice; (d) products used for rental purpose; (e) damage caused by misapplication of cleaning product; (f) natural variations in wood grain, figure, or the presence of character marks; or (g) changes in surface finishes due to aging or exposure to light. If a damaged product is repairable, Enwork may, at its option, permit the Buyer to repair the item and Enwork will issue a credit to the Buyer in accordance with Enwork's repair allowance schedule.

Warranty Disclaimer. Enwork expressly and unconditionally disclaims any and all warranties, express or implied, including but not limited to any warranties of fitness for a particular purpose or merchantability, or warranties based on oral representations from Enwork's personnel or agents, affirmations, models, drawings, samples, promotional literature whether in print, on the internet or in any other format or media.

Limitation of Liability. Enwork's maximum cumulative liability to buyer shall not exceed the purchase price of the goods claimed defective. In no event shall Enwork be liable for any indirect, incidental, special or consequential damages of any type or kind, including but not limited to lost profits, lost business opportunities or lost goodwill, relating to the goods sold hereunder, their installation or use, whether in contract, tort pursuant to statute or otherwise, even if Enwork has been advised of the possibility of such damages.

Indemnity. Buyer shall indemnify and save Enwork harmless from and against all claims of any type or kind for personal injury or property damage, including all costs and attorneys fees, made or alleged as a result of Buyer in any way or manner incorporating or installing any item purchased herein into another product manufactured, assembled, sold or marketed by Buyer.

No Design or other services provided. This agreement involves the sale of goods only. Buyer does not hire Enwork to perform any design services or for the production of any drawing or other media relative to the goods sold pursuant to this Agreement or Buyer's end product. To the extent that Enwork offers any advice or produces any drawings or other media, Enwork does so as a courtesy to the Buyer and Buyer agrees that it will not rely on such advice, drawing or other media and Enwork shall not be liable for any matter arising from such advice, drawings or other media. Buyer shall have no recourse against Enwork for any services of any type or kind. Buyer shall be solely and exclusively responsible for use and/or installation of all items purchased herein. The items sold herein are based on Buyer's descriptions and Buyer bears sole responsibility for ensuring that the products sold meet Buyer's needs and expectations and are suitable for Buyer's intended use. Enwork is not responsible for Buyer's inaccurate or inadequate design or Buyer's furnishing of incorrect information.

Correction of Errors. Enwork shall have the right to correct any errors, whether clerical or mathematical, which are contained in this Agreement or any term sheet or invoice.

Disputes. All disputes of any type or kind, shall be determined by a court of competent jurisdiction which is situated in Kent County, Michigan. Buyer irrevocably consents to such exclusive venue and jurisdiction.

Damages and Returns

Miscellaneous. Buyer shall not assign any rights under this Agreement without the prior written consent of Seller. Failure to exercise any rights under this Agreement shall not constitute a waiver and a waiver on one occasion will not constitute a waiver of the same item on any subsequent occasion. No waiver or amendment to this Agreement shall be effective unless it is in writing and signed by authorized representatives of both parties. Paragraph headings are for reference only and are of no legal force or effect. All notices shall be provided to the addresses set forth in this Agreement and if none is provided, to the party's resident agent in the state of incorporation or organization. This Agreement shall be governed by the law of the State of Michigan without regard to any conflicts of law principles. Wherever possible, all terms shall be interpreted consistently. In the event of a conflict with regard to price, payment terms or delivery, the typed provisions on a separate or attached term sheet shall control over the printed provisions on this Agreement. For any other conflict, these Terms and Conditions shall control. No usage in trade shall create a conflict with the terms of this Agreement. Seller reserves the right to correct any typographical errors anywhere in this Agreement. A facsimile signature or a legally valid electronic substitute for a signature shall bind Buyer. If any provisions are determined to be unenforceable, the remainder of the Agreement shall remain in full force and effect.

Entire Agreement. This is the complete and exclusive statement of the terms and conditions relating to the subject matter of this Agreement and all negotiations and representations, if any, made prior to the execution of this Agreement are merged into this Agreement. Seller shall not be bound by any agent's or employee's representations, promises, or inducements not set forth in this writing unless such representation, promise or inducement is set forth in writing, dated subsequent to this Agreement, and signed by an authorized officer of Seller.

Returns and Allowances

Shipping Damages and Claims

Should you receive any portion of a shipment in damaged condition, either apparent or concealed, it is the duty of the customer to note any suspected damage on the carrier's delivery receipt, to accept the damaged goods, and to contact Enwork immediately to begin the freight claim process. Do not install damaged product. All damaged product and packaging must be retained until the freight claim is settled. Failure to retain damaged product and packaging will result in a transfer of liability from Enwork to the customer. Enwork will not warranty custom one-piece tops over 96" from freight damage. **Concealed Damage:** Enwork has 15 days from receipt to file a concealed damage claim with the carrier. Failure to report concealed damage to Enwork within 10 days of receipt will result in a transfer of liability from Enwork to the customer. All returns and allowances requests/questions can be submitted to info@enwork.com.

Defective Products

No merchandise shall be returned or scrapped without prior approval from Enwork. Enwork may request samples demonstrating the defect before further action. All unauthorized returns may be refused by Enwork and returned to the customer. Credit or reimbursement will be issued for the original purchase price or a replacement will be sent. Enwork reserves the right to request the return of any or all of the defective products.

Repair Authorization

Requests for Enwork funded repairs must be submitted in writing prior to repair work. Repairs made without Enwork's consent will not be funded.

Credit for Returned Goods

Credit will not be honored for returned merchandise until all returned goods have been checked by the Enwork Quality Control Division. No allowance will be made for any outside labor repairs to Enwork products without prior written approval.

Pricing

Prices in this Price List are United States list prices and include freight (subject to minimum order quantities) within the continental U.S. Canadian dealers will be invoiced in U.S. dollars, freight and brokerage included. Canadian dealers must remit payment in U.S. dollars or equivalent.

COM Yardage Requirements

For Pixley COM information, go to Enwork.com/product/Pixley.

Procedure

- 1) Identify product type and size
- 2) Determine fabric roll width (Enwork uses the RAILROAD method exclusively)
- 3) Find corresponding fabric usage value from table below
- 4) Calculate fabric required using the formula below
 - a. $(\# \text{UNITS} \times \text{FABRIC USAGE}) + 2.0$
 - b. Add 10% to accommodate fabric flaws, wrinkles and other imperfections
 - c. Please order COM IN SEPARATE ROLLS for each product type (e.g. one roll for Grid Tiles, another roll for Ped Cushions) to accommodate multiple manufacturing centers. Tag each roll with the order number and send to **ENWORK, 12900 Christopher Dr., Lowell MI 49331**

Lock Program

Lock Cores

Lock cores are LL Series. UM Series and alternate lock cores on select products are available upon request.

Keyed Random

Random locks automatically ship with the product unless otherwise specified. Random means no effort has been made to match key numbers, or to make them different.

Keyed Alike

For the convenience of the user, furniture may be keyed alike at no charge. Using the keyed alike instructions, order lock cylinders and keys as line items on your purchase order. The Enwork Grand Rapids Lock Center will select key numbers. Key numbers will not be repeated unless the standard range has been exceeded. Lock cylinders will ship separately from the product, ready for field installation.

Installing Lock Cylinders

Installation of lock cylinders will be on-site. Enwork will not be responsible for lock cylinder installation. Lock cylinders are installed or removed using a change key. A change key is provided at no charge with each key-alike request. To order additional change keys, specify part number NWCHANGE (\$20 list) on your purchase order. Cylinders must be in the unlocked position to be removed.

Lock Distribution

All lock orders are packaged and shipped from the Grand Rapids Lock Center, regardless of where the products are manufactured. Lock cylinders and keys will ship via FedEx. Please provide a contact name on your purchase order to receive the keys.

Lock Part Numbers

| Part # | Description | List Price |
|----------|----------------|------------|
| NWSPEC2 | Set of 2 locks | N/C |
| NWSPEC3 | Set of 3 locks | N/C |
| NWSPEC4 | Set of 4 locks | N/C |
| NWSPEC5 | Set of 5 locks | N/C |
| NWCHANGE | Change Key | \$20 |
| NWMASTER | Master Key | \$20 |

How to Specify Keyed Alike

Following is an example of how to specify keyed alike locks for a 6-pack of workstations.

Step 1 – Using the floor plan (left), count the number of locks in each workstation.

Step 2 – Count the number of workstations with the same quantity of locks. Group together the workstations with a like number of locks.

3 workstations with 4 locks per station

1 workstation with 3 locks per station

2 workstations with 2 locks per station

Step 3 – For the first group (3 sets of 4 locks), enter the number of workstations in the quantity column.

| QTY | Part # | Description | List Price | Ext. List |
|-----|--------|-------------|------------|-----------|
| 3 | | | | |

Step 4 – Then enter the part number NWSPEC__ and add a suffix for the number of locks for that group (i.e. for 4 locks per station, add the suffix "4").

Step 5 – Repeat for other groups.

| QTY | Part # | Description | List Price | Ext. List |
|-----|---------|----------------|------------|-----------|
| 3 | NWSPEC4 | Set of 4 locks | N/C | N/C |
| 1 | NWSPEC3 | Set of 3 locks | N/C | N/C |
| 2 | NWSPEC2 | Set of 2 locks | N/C | N/C |

Enwork will select key numbers for each set from the available numbers.

Worksurfaces (Tops)

Worksurfaces are made of 1-3/16" M3 rated 45-pound, furniture-grade particle board, laminate and backer. Wood cores have ISO 140001 certification and are made from 98-100% post-industrial recycled contents. Wood cores have been granted Environmentally Preferable Product Certification by the CPA relating to their formeldahyde emissions, which are less than 0.09 PPM (CARB phase 2) meeting the current California Air Resources (CARB) requirement.

Grain Direction on all wood grain laminates runs as shown below. Alternative grain directions are available for a charge.

Grid Worksurface Sizing Grid worksurfaces can be sized to fit into Enwork Grid frames or into another manufacturer's panel system (ex.: Steelcase Kick®, Herman Miller Action Office®) as a blending solution. If you do not see a particular system in our price list, specify "M" for "Other" along with the manufacturer and system name so Enwork can work with you to fulfill your order.

Standard Laminate worksurfaces are made of High Pressure Laminate (HPL) and pass all applicable industry specifications. Edge choices include 3mm, Knife or PVC Ply. Grid worksurfaces will have the selected edge profile on the front edge and a 1mm edge on the sides and back to accommodate tight worksurface-to-worksurface fit. Table worksurfaces have the 3mm or 3mm Ply PVC Edge all the way around the worksurface.

Contour Laminate worksurfaces offer a seamless look (no visible edgebands or t-molds) and the attractive ergonomic Taper edge. They are made of rigid thermofoil plastic (RTF) which provides quality levels that are comparable to HPL, but are slightly more susceptible to nail polish remover and heat. Maximum depth of contour laminate is 48."

Veneer Worksurfaces are available in Maple, Cherry, and Walnut. Maple, Cherry, and Walnut have an open pore finish, are natural slip-matched and full-cut (not quartered). Veneer layup on 2-piece conference table tops is long grain.

Veneer Stains are defined by species:

- > Maple veneer is stained to match Kensington Maple (D) laminate.
- > Cherry veneer is stained to match either Wild Cherry (J) or Select Cherry (9) laminate.
- > Walnut veneer is stained to match either Cafelle (N), or Prestige Walnut (8) laminate.
- > Alternative stains are available upon request. The fee to match a stain is \$700 list. Additionally, there is a 10% upcharge to each item's list price. The matching and approval process must take place prior to order entry. For stain matching approval process email quotes@enwork.com or call customer service at 800.815.7251 for information.

Laminate Tables with wood edge have the following solid wood edge thicknesses (top view):

1. 3mm edge is 0.12" wide.
2. Taper edge is 1.75" wide.
3. Knife edge is 1.9" wide.
4. Bullnose edge is 1.25" wide.

Veneer Tables with wood edge have the following solid wood edge thicknesses (top view).

1. 3mm edge is 0.12" wide.
2. Knife edge is 0.12" wide (3mm). Undercut is MDF stained to match.
3. Bullnose edge is 1.25" wide.
4. Taper edge is 1.75" wide.
5. Ultra edge is 1.75" wide.

Enwork Supports and Bracing

Worksurface (Top) Support and Bracing Rules

- > **Conference and training table tops 60" wide and wider come with support braces (NWBRACE) at no charge, if required. See page 24 for a list of how many braces are included per top.**
- > **Grid worksurfaces do not include braces due to unknown applications (peds, lats, etc.).** Standard laminate worksurface (NWBRACE) support is required on unsupported spans 54"W and wider. Supports can be fixed peds, legs, or braces.
- > **The maximum allowable span between legs or supports is 72" - even with braces.**
- > As an alternate to braces, legs may be inset from table ends.
- > All 30"D tops 72"W or wider, as well as tops 36"D or deeper and 60"W or wider, require two braces instead of one. Braces are included automatically on all conference and table tops, if required.
- > Foundation Panel Base Trough Kits, Stealth, Lugano, and Concurrence conference tables are designed with support and don't utilize stand-alone (NWBRACE) braces.

Top (Worksurface) Specifications

General Information on Wood Cores

- > Passes all NEMA and BIFMA tests for high pressure laminate worksurfaces. Greenguard compliant.
- > Core material is 1.125" thick, M3 rated (45 lb.) FSC Certified furniture grade particleboard.
- > ISO 140001 certification for wood cores.
- > Made from SCS certified 98-100% post-industrial recycled content.
- > Environmentally Preferable Product Certification by the CPA relating to formaldehyde emissions, which are less than 0.09 PPM (CARB phase 2) meeting the current California Air Resources (CARB) requirement.
- > Adhesives are solvent free water based PVA (poly vinyl acetate).
- > Formaldehyde-free cores are available via special quote at quotes@enwork.com.
- > Tables have a 200 pound load capacity (functional load).

Standard Laminates

- > HPL (high pressure laminate) construction, .030" or .050" thick depending on color.
- > Backer is moisture-resistant phenolic material for balanced construction.
- > Laminates and backers are Greenguard certified for Indoor Air Quality.
- > PVC (default) or ABS (upon request) edge choices in 3mm, and Knife.
- > Other edge choices include Veneer and Solid Wood.

Contour Laminates

- > Commonly known as Rigid Thermofoil (RTF).
- > Contour Laminate is high performance, with comparable durability to HPL laminate.
- > The taper edge is seamless with no visible edgeband or t-molds, offering an inherent anti-microbial sealed surface.

Woods

- > Natural veneers are used in Maple, Cherry, and Walnut species.
- > Two and three piece tops use full-cut slip-matched veneers.
- > Edge choices in 3mm (wood), Taper (solid wood), Knife (wood), Bullnose (solid wood) and Ultra (solid wood).

Designer Finish Top Specifications

Back-Painted Glass

- > 3/8" thick, annealed, flat-polished low iron. 1-1/8" knife edge MDF substrate painted to match. Bright white as standard. Any Benjamin Moore color available upon request. \$2000 list custom color fee applies for orders of less than 250 sq. ft. There is also a 20% upcharge to each top's list price for custom colors. Actual depth of 60"D tops is 59" due to yield.

KrystalCast®

- > Acrylic on MDF or birch ply is available in any Benjamin Moore color. Super White is by far the most popular. See www.KrystalCast.com for technical specs and care instructions.

Solid Surface (Wilsonart)

- > Designer White as standard. See <http://wilsonart.com/commercial/solid-surfaces/designs> for additional finish/color choices. Price varies by finish/color, contact quotes@enwork.com with your preferred selection.

Quartz (Cambria)

- > See www.cambriausa.com for finish/color choices. 13/16" thick. Undersized 1-1/8" knife edge substrate painted black. Due to sheet size availability, 60"D (only) tops come in twice the quantity of pieces. (For example, a top that normally comes in 3 pieces will come in 6 pieces.)

Tip: Due to the extra weight, Quartz conference table tops are only recommended for use on *Concurrence*, *Stealth*, and *Foundation* (with trough) table bases.

Birch Ply Edges

- > Edge is clear coated when specified with laminate and stained-to-match when sold with veneer. Actual width of 96"W is 95". Actual width of 192"W is 190" due to yield.

TABLES STEP 1 - TOPS

Product Specifications:

- > **Back-Painted Glass** – 3/8" thick, annealed, flat-polished low iron. 1-1/8" knife edge MDF substrate painted to match. Bright white as standard. Any Benjamin Moore color available upon request. \$2000 list custom color fee applies for orders of less than 250 sq. ft. There is also a 20% upcharge to each top's list price for custom colors. Actual depth of 60"D tops is 59" due to yield.
- > **KrystalCast®** – Acrylic on MDF or birch ply is available in any Benjamin Moore color. Super White is by far the most popular. See www.KrystalCast.com for technical specs and care instructions.
- > **Solid Surface (Wilsonart)** – Designer White as standard. See <http://wilsonart.com/commercial/solid-surfaces/designs> for additional finish/color choices. Price varies by finish/color, contact quotes@enwork.com with your preferred selection.
- > **Quartz (Cambria)** – See www.cambriausa.com for finish/color choices. 13/16" thick. Undersized 1-1/8" knife edge substrate painted black. Due to sheet size availability, 60"D (only) tops come in twice the quantity of pieces. (For example, a top that normally comes in 3 pieces will come in 6 pieces.)
- > **Birch Ply Edges** – Edge is clear coated when specified with laminate and stained-to-match when sold with veneer. Actual width of 96"W is 95". Actual width of 192"W is 190" due to yield.

Choosing Power, Data, & Telecom Solutions

We make it easy to choose the right Power/Data assembly, assuring you have a highly functional yet cost effective solution. With a little bit of planning, empowering a table or a large training room can be simple – usually without the added complexity and expense of a technology integrator. Listed below are planning tips to help assure an impressive, productive installation.

Step 1 – Determine the number of power outlets needed.

Based on the size of the table and type of space, determine how many users might need power.

Tip: If the table will be used continuously for long periods of time, users will need to plug in their laptops. If so, a higher number of outlets may be needed.

Step 2 – Determine the number and type of datacom connections needed.

Which systems require physical connections? If the room or facility has a wireless network, fewer will be needed.

Step 3 – Determine which Power/Data unit best fits your requirements.

Use the Conference and Training/Teaming charts as well as the detailed assembly descriptions in this Price List to compare capabilities and features. Be sure to review the datacom options available for each assembly.

Data Options - Each unit is marked with an ▲ or ● to identify the category of datacom options available. Both types can meet most needs, but if you have diverse or unusual needs, assemblies with a ● have a wider variety of options available.

▲ : Power/Data units in this category come standard with data openings and a Voice/Data Adapter kit. Adapters from the kit are used to install jacks or couplers (ordered separately from Enwork or supplied by the customer) into the data openings of the power/data unit. Voice/data options are punch down. Audio/video options are inline.

● : Power/Data units in this category come standard with datacom plate openings. Datacom plates must be ordered from Enwork or openings can be left empty. Datacom plates can be configured to include multiple voice, data, audio and video solutions. Voice/data options are punch down. Audio/video options are inline.

Tip: Two or more smaller units can provide better user access on longer conference tables. When using multiple units, it is often easier and more convenient if power cords can be combined. Some assemblies can be daisy-chained together under the table. In other cases a UL listed power strip under the top or hidden in a base becomes the consolidation point, reducing the number of cords that need to be routed to the floor.

Tip: Some units are one-sided, others are two-sided. For the same number of outlets, a single two-sided unit will be lower cost than two one-sided units.

Tip: Be sure you understand how power and cabling will be routed from the building into the space and to the table(s).

Tip: To select an appropriate in-feed, determine if power will be coming from an outlet or hard-wired to the building. Hardwiring also allows the possibility of multi-circuit power within a table or series of interconnected tables. Note that only some units can be hardwired.

Tip: If power needs to run from one table to the next, look for units that can be daisy-chained. If connected tables will be re-configured into alternate set-ups, then units with non-sequential daisy-chaining are often the best solution.

| BASES | |
| POWER DATA | |
| SUPPORT FURNITURE | |
| ACCESSORIES | |

Step 4 – Determine the location and orientation of the Power/Data units in the table top.

The position of units in a table is important because it affects both access from different seating positions as well as the ease with which power and data can be routed from the building into the table.

Tip: For smaller tables, a single unit in the center is the most common solution. For tables longer than 96", multiple and/or two-sided units provide more convenient user access.

Tip: One-sided units typically open towards the end of a table. Two-sided units typically open towards the long sides of a table.

Tip: Multiple units are often spaced equally along the length of the table or positioned near the ends of the table, typically 20-24" in from the edge.

Tip: Positioning one or more units just next to legs or bases usually makes it easier to keep everything hidden. Placing assemblies directly over legs or bases requires special attention to assure there is no physical interference - contact quotes@enwork.com.

Tip: Refer to the Conference Table Power/Data Standard Cut-outs page in this Price List to see different positioning options.

Step 5 – Don't forget to order accessories

Cable Grippers, Cable Managers, and other accessories help keep all the wires and cables organized and out of sight. See page 170 for available options.

Power and Data

Overview

- Power is typically ordered as part of Frame and **comes installed**.
- Grid frames offer **lay-in** installation of power and data across multiple frames.
- Utilizes the Byrne Phase 3, 5-wire, three 15 amp circuit double (or single) sided power system. Phase 3 contains 3 hot wires, common neutral and common ground.
- Phase 3 is UL 1286 Listed.
- In situations requiring dedicated circuits the Byrne 8-Trac System (4 circuits) may be seamlessly substituted for an upcharge.
- Receptacles are part of the Frame Power option for 5-wire. When 8-Trac is specified, receptacles must be specified separately.

Power Data

Non-Powered Frames

- Includes no power or data.
- If Beltways are desired to maintain aesthetic continuity with Powered Frames they are ordered separately.
- Power and Data may be added at a later date.

1-Sided Power Frames

- Includes two 15 amp duplex receptacles on ONE side of Frame. Choose from Circuit 1, 2 or 3 for the ENTIRE Frame.
- Includes 1 data cover (with 2 data openings) on ONE side of Frame (Exception: 30"W frames have no data cover).
- Includes a jumper to connect the 2 duplex receptacles within the Frame.
- Includes a jumper to connect the Frame to the next Frame in line. NOTE: this jumper will be discarded in the field if the next Frame is a pass-thru Frame or if this Frame is the last in line.
- Includes 1 Beltway cover (with 3 cutouts). Left and Right cutouts are for duplex receptacles. Middle cutout is for the data plate.
- Non-powered side of panel does not include a beltway.

2-Sided Power Frames

- Includes two 15 amp duplex receptacles on EACH side of Frame. Choose from Circuit 1, 2 or 3 for the ENTIRE Frame.
- Includes 1 data cover (with 2 data openings) on EACH side of Frame (Exception: 30"W frames have no data cover).
- Includes a jumper to connect the 2 duplex receptacles in the Frame.
- Includes a jumper to connect the Frame to the next Frame in line. NOTE: this jumper will be discarded in the field if the next Frame is a pass-thru Frame or if this Frame is the last in line.
- Includes 2 Beltway covers (with 3 cutouts each). Left and Right cutouts are for duplex receptacles. Middle cutout is for data plate.

San Francisco Power or Municipalities with Metallic Conduit Requirements

For San Francisco and any other municipalities whose electrical code requires metallic conduit on all modular wiring, the Grid Base Power Ins must be specified in the metallic option for the 5-wire system. 8-Trac is fully San Francisco compliant. Note: All of the modular wiring harness for Grid Frames come standard with metallic conduit (5-wire, 3-circuit).

Chicago Power

For Circuit Choice (#), Select "9 - With empty j-boxes for Chicago Power".

New York City Power

New York City electrical code requires metallic conduit on all modular wiring. All of the modular wiring harnesses for Grid Frames come standard with metallic conduit (5-wire, 3-circuit), but the Grid Base Power Ins must be specified in the metallic option. In some cases, modular wiring components must also be field installed. To order the Grid Frames with this option, for circuit choice (#) select "Field Installed" power option.

8 Wire Power with Dedicated Circuit

If an 8-wire power system with a Dedicated Circuit (3+1 or 2+2) is required, select the "4-circuit Powerway" option. Unlike the standard 5-wiring system, receptacles for the 4-circuit system must be specified separately.

Note: All 8-wire modular wiring comes standard with metallic conduit.

Note: Splitter (UYCONN) not needed.

Power/Data Routing Planning Tips

- Power/Data is routed from the floor through the interior of the leg and into the Frame via base in-feeds.
- U-channel on open Frame ends provides lay-in installation of power and data across multiple frames.
- Separate power and data chambers exist within the Frame to keep wires somewhat separated if desired.
- 90 and 120-degree power connections require the purchase of a 90 or 120-degree Power Kit.
- Power Poles (10', 12', 15') are available.
- T-Legs and Straight Legs hold 12 CAT6 cables.

Grid Tile Types & Workstation Leg Types

Tile Types

Full Tile Options

- Tackable Fabric
- Non-tackable Fabric
- Acrylic, Frosted
- Laminate
- Veneer
- Whiteboard
- Magnetic Whiteboard

Full Tile Tips

- > Used where power is not present.
- > Specified and shipped separately from Frames. Requires 2 per frame.
- > Field Assembled
- > Thin and Rail (original design) profiles require different tile sizes

Upper Tile Options

- Tackable Fabric
- Non-tackable Fabric
- Acrylic, Frosted
- Laminate
- Veneer
- Whiteboard
- Magnetic Whiteboard

Upper Tile Tips

- > Requires presence of a beltway.
- > Specified and shipped separately from Frames. Requires 2 per frame.
- > Field Assembled.
- > Thin and Rail (original design) profiles require different tile sizes

Beltway Options

- Beltway with power and data cutouts
- Beltway with no power and data cutouts

Beltway Tips

- > Can be specified with Frames or separately. If specified with Frames comes installed.
- > Beltways with cutouts have 3 openings – one for dataplate in center (2 openings) and two for power (2 duplex receptacles on the left and right, inset 12" from sides of frame).

Leg Types for Workstations

Grid Straight Legs - Rectangular or Square

- Used in applications where 90 degree connections and/or tethered worksurface can supply stability.
- Legs are ordered separate from Frames.
- Legs are clear anodized alum or painted steel.
- Rectangular for Grid Frame and worksurface support
- Square only for worksurface support

Grid T-Legs

- Used in straight line "Spine Wall" applications where the spine is not attached to the worksurface and there are no 90 degree connections.
- Legs are ordered separate from Frames.
- Legs are painted steel (only).
- Used where overheads are present if there is no Double-Sided 90 degree connection.

Grid XTB Bases

Bases for XTB Linked Benching

Height-Adjustable Options

- 6 types of height-adjustable mechanisms are available.
 - Bases with different height-adjustable mechanisms can be intermixed within the same XTB Bench Pack.
- Note:** Images below show two Double-Sided Bases with a Double-Sided 2-pack connector package.

Ansi/BIFMA Electric

- Worksurface adjustable between 22" - 48" (including top)
- 250 lbs load capacity.
- Optional programmable controller
- Includes anti-collision
- Triple tube legs

Sit-Stand Electric

- Worksurface adjustable between 27" - 46" (including top)
- 250 lbs load capacity.
- Optional programmable controller
- Includes anti-collision
- Dual tube legs

Fast Crank (w/ pneumatic-assist)

- Worksurface adjustable between 27" - 46" (including top)
- Approximately one crank per inch adjustment
- Dual tube legs

Crank

- Worksurface adjustable between 27" - 46" (including top)
- Approximately five and a half cranks per inch adjustment
- Dual tube legs

Knob

- Worksurface adjustable between 27" - 42" (including top) in 1" increments
- Dual tube legs

Fixed Height

- Worksurface at 29" high
- Single tube legs

Applications

- Bases are specific for the application:
 - Double-Sided:
 - 24" or 30"D rectangle worksurface (two straight legs)
 - 24" or 30"D extended corner worksurface (three straight legs)
 - Single-Sided:
 - 24"D rectangle worksurface (T-legs)
 - 30"D rectangle worksurface (T-legs)
 - 120 planning:
 - 24"D worksurface (three straight legs)
- Bases for Double-Sided and Single-Sided applications include adjustable top support cross bars for use with 60" or 72"W Frames and worksurfaces
- Bases for 120 applications are for use with 48"W Frames and worksurfaces.
- Bases support any size Frame (Mini, Standard, or Mega).
- Bases ordered separate from Frames and worksurfaces
- Bases are painted steel (only) with levelers.

120 Planning

Planning - Grid Workstations

Frame Connections – Understanding Spine-Based Planning for Workstations

Step 1

- Always identify and specify the “Spine” first. The Spine is the dominant panel run that others are based on.
- Spines consist of 2 end of Run Frames and an unknown number of Mid Frames.

90 Degree Connections

- Requires Rail Profile Frames
- Connections are off modular and can be at any location on the Spine.
- A 90 Degree Connector package is specified separately from Frames.
- No Junctions (L,T,X) are utilized with Grid.

Connections are always off the spine and thus will affect worksurface specification requirements.

Tip: A 90 degree connection cannot span an in line connection on Rail Profile (original design) Frames

In-Line Connections

- The top of the Frames are connected via bolt on the inside top of the Frame. The bottom of the Frames are connected via shared legs.
- **In-Line connection hardware is included with every Frame.**
- No dimensional creep occurs at in-line connections.

120 Degree Connections

- Three Frame and Two Frame 120 degree connections are allowed (Exception: There are no 2-frame connections for Mega Frames).
- 120 connector package is specified separately from Frames.

120 Degree 2-Way Junction

Frame Stability for Workstations

Tip: Spine wall with no tethering requires T-Legs

Tip: Spine Wall with tethering can use T-Legs or Straight Legs

Overview

- Spine wall applications with no 90 degree connections and no worksurface tethering must utilize T-Legs.
- If utilizing T-Legs the panels are stable for indefinite lengths. (See local codes for fire/ADA requirements.)
- If utilizing straight legs, no more than 2 Frames may be connected without either a 90 degree Frame connection, worksurface tether brackets or T-legs for stability.

Leg Planning for Frames in Workstations

Planning

- Legs are ordered separately from Frames.
- Always start leg planning with the Spine first.
- A T-, C-, or rectangle leg is required at the end of each run. Legs at this location are inset from the end of the Frame by 6".
- A T-, C- or rectangle leg is shared when there is an In-line Frame-to-Frame connection.
- A T-, C- or rectangle leg is required at the start of any 90 degree connection point.
- If there are NO 90 degree connections or worksurface tether applications then "T" legs must be used. This is typically a single Frame or a Spine Wall application.

Planning - Grid Workstations

Worksurface Planning in Workstations

Freestanding vs. Tether Brackets

- Freestanding worksurfaces give optimum reconfigurability and mobility.
- Tether brackets eliminate legs and lower cost.

Tether Bracket Rules

- Tether brackets connect the back of the worksurface to the Frame. The front of the worksurface must be held up by a leg. A tether bracket is NOT THE SAME AS A CANTILEVER.
- As a general rule, two tether brackets are required to hold up the back of a rectangle surface. See diagram T1. Four tether brackets are required on a corner worksurface (two on each side).
- Braces are required on 60" wide and wider rectangle worksurfaces. Spans longer than 72" require additional mid-run floor support such as a leg or storage unit. (Braces are ordered separately.)
- If two worksurfaces are adjoining tether brackets may be shared. In this case surfaces 48" and less require one tether bracket plus a shared. Surfaces 54" + require two tether brackets plus a shared. See diagram T2 and T3.
- A support plate and brace are required for 90 degree application. See diagram T4 and T5.

T-, C-, Rectangle, and Square Legs

Grid Tether Brackets

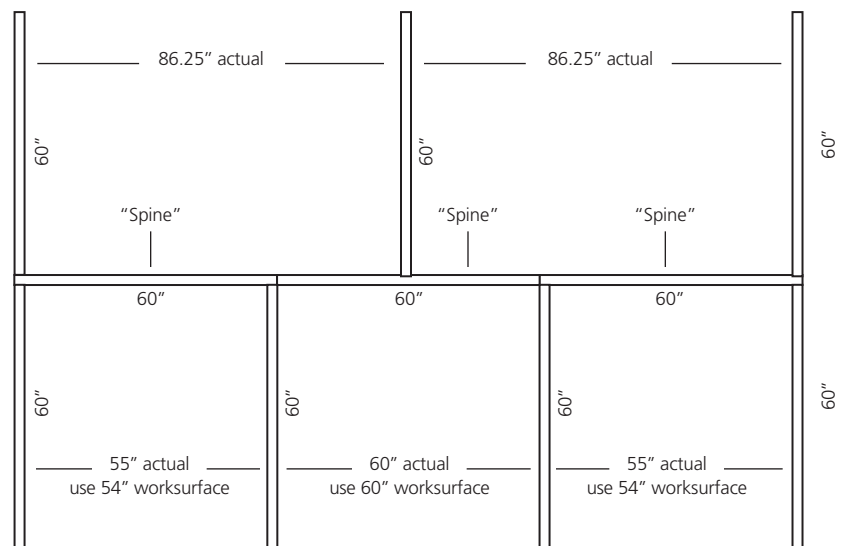

Worksurface Sizing Tips

- For Spine Wall only applications worksurface dimensions are true.
- In 90 degree applications worksurfaces are designed to be "loose fitting". The worksurface dimension depends on the number of 90 degree connections and WHERE THEY ARE LOCATED. Remember, Frame thickness is 2.5".
- **Rule:** available space for worksurface equals Frame length less 2.5" per 90 degree attachment.

Cable Management

- Worksurface may be specified with either no gap, 1/2" gap or 1" gap to Frame.
- Grommets and Full Scallop are recommended in no gap situations.
- Scallop are recommended in 1/2" gap situations.
- Full Scallop or 1" gap recommended for monitor arms
- Grid cable troughs are also available.

Planning - Grid XTB Flexible Benching

Bases and Connector Packages

- Six types of height-adjustable bases are available for rectilinear, extended corner, and 120 planning. (Fast Crank is not available for extended corner or 120 planning.)
- Bases with different adjustable mechanisms can be intermixed within the same XTB Bench Pack.
- Connector packages link bases together and are ordered separately.
- Connector packages are available to create Bench Packs of 1-12 workstations.
- Connector packages include links, cross links, and all necessary hardware.
- Connectors are different for Single-Sided, Double-Sided, and 120 planning applications. If creating different configurations within a space, be sure to order the correct connector package for each XTB Bench Pack.
- Double-Sided and 120 planning bases must be connected to other bases for stability.
- Single-Sided bases require extra infed legs for stability.

Frames

- Use 60"W or 72"W Frames with Double- and Single-Sided Bases.
- Use 48"W Frames with 120 Bases.
- Must be the same size - Mini, Standard, or Mega - within an XTB Bench Pack.

Worksurfaces

- Double-Sided rectangle bases fit tops 24" or 30"D and 60" or 72" W.
- Double-Sided extended corner bases fit tops 24" or 30"D and 60" or 72" W x 48"W.
- Single-Sided bases are different for 24" D and 30"D tops. Both bases fit tops 60" or 72" W.
- Straight, Transitional, Wedge, and Angled Transition worksurfaces fit Double- and Single-Sided rectangle bases.
- 120 Bases fit tops 24"D 24"D 48"W 48"W.
- Worksurfaces are undersized in width and depth for cable management and safety (to minimize pinch-points).
- Worksurfaces for XTB Benches must be specified with "A" in Step 2.
- Full scallops (Step 3) are recommended.

Power/Data and Cable Management

- Power/data access is provided by Grid Frame. In general, the same power/data information and requirements outlined for Grid workstations apply to Grid XTB Benches.
- Electric bases plug into one outlet in the Grid frame.
- Above worksurface power/data access can be provided with an Axil-X clamp-on power/data unit.
- Axil-Z power/data unit in a Landscape bookcase (top or lower shelf) can provide off-spine access to power/data.
- Cable troughs are available to keep wires and cabling neatly contained.
- High capacity troughs and the ULCM Cable Manager (vertebrae) are highly recommended.

Tip: For XTB applications, order Cable Trough one size smaller. (ie: UMHCP60 for 72" Frame).

Privacy

- See pages 200-201 for the Dimensional Overview of XTB Frame and privacy options.
- Choosing Standard or Mega frame increases visual privacy.
- Topper screens add another 11" of visual separation.
- 4" riser increases Frame mounting height for added privacy.
- *TIP: 4" Riser is generally not recommended for use with Ansi/BIFMA electric bases due to potential worksurface interference with plugs/cords. If use of the 4" riser is necessary within a Grid Bench pack with Ansi/BIFMA electric bases, a flat plug powerstrip can be laid in the high capacity trough for power access. Implications on data connections are application specific and need to be resolved in planning. If there will be storage below every Ansi/BIFMA base worksurface, it may stop downward travel such that special accommodations may not be necessary.*
- Multiple types of Privacy Screens are available for side-to-side privacy.
- End panels and modesty panels can be specified for additional privacy below the worksurface.

Planning - Grid XTB Flexible Benching

Overview

- XTB flexible benching is spine-based planning.

Bases, Connector Packages, and Frames

- Bases with six different types of height-adjustable mechanisms are available.
- Bases and Connectors are different for Double-Sided, Single-Sided and 120 applications. Be sure to order the correct connector package for each XTB Bench Pack.
- Double-Sided extended corner bases are also available..
- Double-Sided rectangle and extended corner bases can be intermixed.
- 60"W and 72"W Frames and worksurfaces can be intermixed.
- Frames cannot be connected 90 degrees to the spine within XTB Bench Packs.

6 Double-Sided Rectangle bases, Straight tops,
Double-Sided 6-pack Connector Package

6 Extended Corner bases, Extended Corner tops,
Double-Sided 6-pack Connector Package

2 Single-Sided bases, Straight tops,
Single-Sided 2-pack Connector Package.

6 Double-Sided Rectangle bases, 2 Extended Corner bases, 6 Straight
and 2 Extended Corner tops, Double-Sided 8-pack Connector Package

Planning Around Poles and Obstacles

Bases and connector packages can be easily combined to create odd-numbered Double-Sided XTB Bench Packs.

- Order the number of Double-Sided bases needed (e.g., 6) and the corresponding Double-Sided connector pack.
- Order the number of Single-Sided bases needed (e.g., 1) and the same number of 1-pack Single-Sided connector packages (UMCON11^).

120 Degree Planning

- Bases with five different types of height-adjustable mechanisms are available
- 120 Connector packages are available to create 3-packs and 6-pack boomerang.
- 120 bases fit 48" Frames with 24"x24"x48"x48" worksurfaces
- Connector packages are unique for 120 applications. If using different configurations, be sure to order the correct connector package for each XTB Bench Pack.
- The 36"W cable troughs are designed for use with 48"W Frames in 120 applications.

Planning - Options to Complete your Applications

Planning - Privacy

Frame Topper Screen

- May be placed into any Frame top slot at any time.
- 11.3"H above Frame.
- Actual width is 2" less than Frame nominal dimension.
- Styles: Frosted Acrylic, Designer Velour Etched Glass, Back Painted Glass Two-sided Markerboards. 3Form options are available, contact quotes@enwork.com for more information.

Modesty Panel

- Steel construction.
- Attached utilizing the Bottom Rail Bottom Slot. There are modesty slots on both sides of the Frame. Two modesty's on each Frame are possible but not necessary (see Grid Dimensional Overviews for more information).
- The modesty slides into Frame on the end and thus is labor intensive to install after furniture is already assembled. Requires disassembly to add-on.
- 12"H.
- Actual width is 1" less than Frame nominal dimension.
- Legs sit on inside of modesty.
- Does not fit XTB Bases.

Planning - Accessories

Monitor Arms

- Single or Dual Monitor
- Clamps to edge of worksurface or through a grommet
- Vertical Range +/- 5"; Horizontal Range +/- 18-1/2"
- Rotates 360-degrees at two joints; 180-degrees at base
- Landscape or portrait orientation

CPU Holder

- Width adjustment 5-1/2" to 9-1/4", height adjustment is 13.4" to 20-1/2"
- Very small CPUs may not fit.

Cable Management Options

- Numerous vertebrae and cable grippers available. See page 263.

Worktools

- Attaches utilizing the slot on the side of the Top Rail on Rail Profile (original design) Frames.

Planning - Accessories

Cable Troughs

- Attached utilizing slots on the side of the Bottom Rail.
- Specify worksurface Suffix D (1/2" gap), V (1" gap), or Full scallop between Frame and top for access to trough.
- Trough is 3"H x 1.75"D.

High-Capacity Cable Trough

- Recommended for Grid XTB.
- Trough is 4"H x 2.5"D.

Tip: For XTB applications, order Cable Trough one size smaller. (ie: UMHCP60 for 72" Frame).

Planning - Storage

Landscape Storage

- 4-types available: Steel Box/Files, Bookcases, Personal Cabinets on levelers or casters, and Personal Towers
- Comes with Laminate Tops
- 20"H x 18"D
- Cushions available
- Plinth available for worksurface support
- Page 308

Gird Steel Storage

- Box Laterals and Bookcases
- 21.5"H x 18"D
- Page 310

Affinity Laminate Storage & Mobile Peds

- Laminate Mobile Peds, Fixed Peds, Laterals, Cabinets, etc. are found on pages 235-241.

Apex Metal Storage & Mobile Peds

- Steel Mobile Peds, Fixed Peds, Laterals, Cabinets, etc. are found on pages 200-207.

Overhead Storage

- T-Leg Grid Frame support required in some applications
- Only on Standard Frame with power above worksurface
- Centered over frame
- Has binder storage on both sides
- Tackboards and Acrylic doors available
- Not applicable for Grid XTB.

Specifying Grid Workstations

Specifying Grid Workstations

Step 1 – Pick your Frame size and Power

- Mini, Standard or Mega Frame
- Rail (original) or Thin Profile
- 30", 48", 60", 72", or 84"W
- Standard 5 Wire 3 circuit, Optional 8 Wire, or Hard wired

Step 2 – Specify Frame Supports and Connectors

- Supports determine power/data access above or below worksurface

Step 3 – Choose Tiles for Frames

- Tile size depends on the chosen Frame size, profile, and power/data access.
- Fabric, acrylic, laminate, veneer, or whiteboards

Step 4 – Select Worksurfaces

- Gaps, scallops, and a full scallop available for power/data access
- Rectangular, Wedge, Corners and Extended Corners, Conference,
- Multiple edge options
- Worksurface width typically matches Frame width

Step 5 – Specify Worksurface Supports

- Rectangular and square straight Legs, O-legs, Tether Brackets, Plinths
- Fixed peds and Landscape storage
- Worksurface braces required for tops 60"W and wider. Must be ordered separately.

Step 6 – Add Base Power-Ins and Power Infeed Legs

- Needed for every workstation pack
- **Tip:** Don't forget to order a UYCONN splitter if your 5-Wire infeed is not at the end of the typical.

Step 7 – Incorporate Privacy components

- Topper Screens, Privacy Screens, Modesty Panels, and End Panels
- Numerous attachment and material options including acrylic, whiteboard, magnetic whiteboard, fabric.

Step 8 – Add Cable Management Accessories and Work Tools

- Enwork offers fully articulating single and dual Monitor Arms
- Cable Troughs, Cable Managers, and CPU holders

Step 9 – Finish with Storage Components

- Mobile Peds, Fixed Peds, Laterals, Bookcases, and Towers.

Specifying Grid XTB Flexible, Height-Adjustable Benches

Specifying Grid XTB Flexible, Height-adjustable Benches

Step 1 – Pick your Base Configuration

- Mix or match from six Height-Adjustable options
- Different bases are used for Double-sided, Single-Sided, and 120 planning
- Double-Sided and Single-Sided XTB bases include expanding worksurface supports to fit 60" and 72" Frames
- 120 XTB bases fit 48" Frames
- Extended corner bases fit worksurfaces 60" or 72"W x 48"W

Step 2 – Add Connector Packages and Optional Riser

- Connector packages create 2-packs to 12-packs.
- Connector packages are different for Double-Sided, Single-Sided, and 120 planning
- 4" Riser available for added privacy.

Step 3 – Specify Frame size and Power

- Mini, Standard or Mega Frame
- Rail (original) or Thin Profile
- 60" W or 72" W Frames for Double and Single-Sided applications
- 48" W Frames for 120 degree applications
- Standard 5 Wire 3 circuit, Optional 8 Wire, or Hard wired

Step 4 – Choose Tiles for Frames

- Fabric, Laminate, Veneer, Acrylic, Whiteboard, Magnetic Whiteboard
- Tile size depends on the chosen frame size, profile, and power/data access.

Step 5 – Add Base Power-Ins and Power Infeed Legs

- Needed for every XTB pack
- **Tip:** Don't forget to order a UYCONN splitter if your 5-wire infeed is not at the end of the typical.
- **Tip:** For Double-Sided and 120 degree applications only one power infeed leg is required. For stability, additional power infeed legs must be ordered for Single-Sided Grid XTB applications. Two legs, one on each end, plus a leg in the middle (3 legs total) are required for each 2 Pack or 3 Pack. An additional leg (4 total) is required for 4 Pack and 5 Pack Single-Sided applications.

| Single-Sided Applications | | | | |
|---|---------------|--------|--------|--------|
|  | # Infeed Legs | 2 Pack | 3 Pack | 4 Pack |
| | | 3 | 3 | 4 |

Step 6 – Select Worksurfaces

- Straight, Transitional, Wedge, and Angled Transition worksurfaces fit Double- and Single-Sided rectangle bases.
- 24"D 24"D 48"W 48"W tops fit 120 Bases.
- Worksurfaces are undersized in width and depth for cable management and safety (to minimize pinch-points).
- Worksurfaces for XTB Benches must be specified with "A" in Step 2.
- Full scallops (Step 3) are recommended.

Step 7 – Incorporate Privacy components

- Topper Screens, Privacy Screens, Modesty Panels, and End Panels
- Numerous attachment and material options including acrylic, whiteboard, magnetic whiteboard, fabric.

Step 8 – Add Cable Management Accessories and Work Tools

- Enwork offers fully articulating single and dual Monitor Arms
- Cable Troughs, Cable Managers, and CPU holders

Step 9 – Finish with Storage Components

- Mobile Peds, Fixed Peds, Laterals, Bookcases, and Towers.

Avant Height-Adjustable Benching Environments Patent Pending

COMING WINTER 2016

Contact your local Enwork Sales Rep or visit www.enwork.com for additional information and the latest on availability.

Avant is the future of integrated, height-adjustable benching environments. An entirely new design concept, Avant restores the function and convenience of traditional workstations within the dense footprint of modern benching. Ergonomic, electric height-adjustable storage tops keep active documents right at your fingertips while providing the health benefits of a sit/stand environment.

Avant's anchored storage bases express a substantial, contemporary statement. The clean aesthetic fully conceals the moving leg mechanisms, power system components, and cabling of modern workspaces.

Product Specifications:

- > Convenient storage top with drawers
- > Sit/Stand electric height-adjustability (range of 29" - 43" H)
- > Individual Bosch® motor for each leg assures smooth operation and long life
- > Customizable with selection of laminate, and contour laminates
- > Linear applications available 24" or 30"D, 60" or 72"W
