INTRODUCTION

The Gunlocke Company is dedicated to providing the finest products and service possible. This price list reflects that commitment. Included is a current listing of our casegood models.

Seating and Lounge are presented in a separate price list. Contact your Gunlocke Customer Services Representative for more information, (800) 828-6300.

Designed for easy use, each page of this price list, and the inside front cover fold out provide all information required to order a product correctly. Should additional information be needed, contact your Gunlocke customer service representative.

PRICING

Prices shown cover standard product specifications. Any changes or alterations, other than those listed, will be subject to an additional charge. Prices include carton-ing and freight. Authorization and pricing must be secured in advance for orders or contracts calling for large quantities, indefinite quantities, or extended delivery dates. Prices are subject to change without notice; the most current prices are published on <http://www.gunlocke.com>.

ORDERING

To expedite order entry and to assure proper service, email or fax all orders directly to:

The Gunlocke Company

Attn: Order Entry
One Gunlocke Drive
Wayland, New York 14572
585-728-5111
585-728-8350 FAX
800-828-6300
www.gunlocke.com

Gunlocke will not be responsible for duplicate orders if purchase orders are left unmarked.

ACKNOWLEDGEMENT

Each order will be acknowledged by Gunlocke. Customers should check each acknowledgement for accuracy and immediately notify Gunlocke of any discrepancies. The printed acknowledgement is the final agreement between The Gunlocke Company and the customer, superseding all previous communications regarding the order.

SPECIFICATION CHANGES

Gunlocke reserves the right to change specifications for the improvement of products at any time, without notice.

ORDER CHANGES

Gunlocke is not required to accept changes in orders after confirmation. Reasonable changes are subject to additional charges for labor, material and administrative costs.

Order changes of acknowledgement may result in re-scheduling of product.

RETURNED MERCHANDISE

No merchandise may be returned without prior authorization.

CANCELLATIONS

Cancellation of orders cannot be accepted since every order is manufactured according to customer specifications.

STORAGE

If delivery cannot be made and products are ready, Gunlocke will transfer products to a storage facility and products will be invoiced at that time. The customer is responsible for storage charges and assumes and bears all risks associated with the storage of that product.

TERMS

Net 30 days from date of invoice. A service charge of eighteen percent (18%) per year or .0004931% per day, compounded monthly, will be added to balance due beyond the thirtieth day. Products are shipped FOB factory, freight prepaid and allowed. Title passes to purchaser and Gunlocke's responsibility ceases when shipment is accepted for transportation by a carrier. A full explanation of all payment terms is found on order and invoice forms.

ORDERING INFORMATION

1a.Intended use: The furniture on this schedule is intended for use by Government executives (or equivalent military rank) in the Executive, Judicial and Legislative Branches of the Federal Government. To help customers make a good purchasing decision based on their needs and budget, GSA has established four grades of furniture. Grade (1) includes furniture that tends to be the most expensive on this schedule, grade (2) furniture tends to be more moderately priced and grades (3) and (4) furniture tend to be affordably priced when compared to grades (1) and (2). Some pieces of furniture on this schedule may be significantly higher in price than GSA Traditional and Contemporary Executive Special Order Program furniture. The ordering agency or service is responsible for determining furniture appropriate for use in its offices which will fit within its budget and comply with applicable Federal or internal agency procurement regulations. Please see reverse for GSA terms and conditions.

Grade 1 All exposed solid parts such as top rims, base rails etc. (except decorative accents, inlays and painted parts) shall be the same species as the face veneer. Top and bottom edges of drawer fronts shall be solid wood in the same species as the face veneers. Drawer sides and backs shall be solid wood.

Grade 2 Exposed wood panel trim and trim on tops shall be the same wood species as the face veneer on the top. Some or all other exposed solid parts, such as base rails can be an alternative wood species (such as poplar or gum) different from the face veneers. Exposed, finished engineered wood core material such as MDF is acceptable only for the edges of drawer fronts. Drawer sides shall be solid wood or veneer core plywood/laminated construction. Silea is grade 2.

Grade 3 Most or all exposed solid parts can be an alternative wood species (such as poplar or gum), different from the face veneers. Exposed, finished engineered wood core material such as MDF is acceptable only for the edges of drawer fronts. Drawer sides shall be solid wood or veneer core plywood/laminated construction. Medley, Kennsington, Credentials, and all tables are grade 3.

Grade 4 Most or all exposed solid parts can be an alternative wood species (such as poplar or gum), different from the face veneers. Exposed, finished engineered wood core material such as MDF is acceptable only for the edges of drawer fronts. Drawer sides shall be composite wood material construction such as MDF. Trio is grade 4.

No returns of goods will be accepted without written consent and shipping instructions from Gunlocke, and the Government customer will be required to pay all return freight charges. A restocking fee of 30% net will apply on all authorized returns provided Gunlocke receives goods in the condition in which they left the factory. No credit will be given if goods cannot be reused. Special order items are in no event subject to return. Goods must be returned within 70 days of shipment from factory.
30. **Cancellations:**
No charge prior to production. After production has begun (5 days ARO), only the actual costs that the contractor can demonstrate will be billed to the customer if the merchandise cannot be resold within a reasonable period of time (90 days).
31. **Inside Delivery:**
Contact the Gunlocke Company Traffic Department at (800) 828-6300 for a quotation on inside delivery.
32. **Federal Tax ID #** 22 3887942

12 YEAR WARRANTY

Subject to the limitations set forth below. The Gunlocke Company warrants to the original purchaser all product in this price list to be free from defects in material and workmanship for a twelve year period from the date of shipment. This 12-year warranty applies to all products sold and installed by a Gunlocke authorized agent for normal commercial single shift service. Gunlocke will repair, or at its option, replace defective merchandise, free of charge. The following components not manufactured by Gunlocke have the following warranties:

- **High wear components** such as casters and glides are warrantied for five years after date of shipment to original owner.
- **Electrical components** are warranted 10 years from date of manufacture with exception of lamps and ballasts which are not warrantied. This includes Fluorescent Tasklights.
- **LED tasklights** are warrantied for 3 years from date of shipment to original owner.
- **Drawer suspensions** are warrantied for lifetime of product after shipment to original owner.
- **Personal corners** including covering (leather) are warrantied for three years of single shift and normal use after shipment to original owner.
- **Height adjustable electrical components** are warrantied for five years of single shift and normal use after shipment to original owner.

Any non-standard material selected by the customer is not warrantied. Neither does this warranty apply to damage resulting from accident, alteration, or misuse, as well as damage from normal wear and tear such as dents, nicks, scratches, fading and improper maintenance. That is, Gunlocke's warranty is only valid if products are given proper use and care. Gunlocke assumes no responsibility for product damages resulting from improper installation or user modification.

WOOD FURNITURE

Wood owes its inherent beauty to variations in color, grain, and texture, and therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next even though they are finished at the same time. Exposure to light and the aging process will cause a darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. The Gunlocke Company does not guarantee the exact matching of grain, pattern, and color.

These finishes do not cover any of the natural characteristics of the wood, including nature's colorations, pitch pockets, and the variations of steambent wood. Merchandise will not be replaced because of these natural variations.

It is expressly understood and agreed that the buyer's sole and exclusive remedy for any and all losses or damages resulting from nonconforming goods, or from any other cause, shall be repair or replacement of defective parts, and that Gunlocke shall not be liable for damages or injury to persons or property, nor for replacement of the entire commercial unit, if repair or replacement of defective parts can reasonably render the unit conforming.

All warranty claims must be made in writing by the original owner. Owner may be required to produce the invoice or other evidence to establish that a claim is within the warranty period. Warranty claims may be submitted on the Gunlocke website. www.gunlocke.com/productservice/

As stated and illustrated on the website, serial numbers are required to process a warranty claim. No person, firm or corporation is authorized to assume for Gunlocke any liability in connection with the sale or installation of Gunlocke products except as stated above.

All other warranties, expressed or implied, are excluded. Gunlocke shall not be liable for incidental or consequential damages of any sort.

Within the Continental USA, all orders above \$2,000 list are shipped FOB factory, freight prepaid and allowed. All orders less than \$2,000 list will be subject to a \$100 net freight charge. Products shipped to Alaska and Hawaii FOB factory, freight prepaid and allowed to port of embarkation. Customer is responsible for freight charges from port of embarkation to final destination.

An anticipated shipping date is indicated on the order acknowledgement. Gunlocke cannot accept responsibility for shipping delays caused by outside sources or unforeseen problems. Delay of shipments requested by customers must be approved by Gunlocke. Any resultant storage charges will be charged to the customer.

Gunlocke may await completion of the entire order and ship all at once or may make partial shipments from time to time at its sole discretion unless the customer requests in writing that partial shipments are needed and Gunlocke approves the specific shipping schedule. Additional charges may apply.

Gunlocke is not liable for any delay or failure to deliver or perform due to strikes, lock-outs, or other labor or transportation difficulties, delay of sources or supply, accidents, fires, acts of God, or any other causes of like or unlike nature beyond the control of Gunlocke.

LIABILITY

Gunlocke products and their packaging are tendered to a transportation company only after passing rigid quality control inspection. At that time, title to the product is passed to the purchaser. However the transportation company assumes all liability from acceptance of shipment through its delivery. That is, Gunlocke's liability ceases at the time of shipment.

FILING OF CLAIMS

All claims for damage or loss must be submitted via our website at: www.gunlocke.com/productservices within 15 days after receipt of merchandise. Do not return freight damaged merchandise to Gunlocke. Follow the steps below to expedite processing and resolution of claims.

For Visible Damage

1. Make damage notation on delivery receipt and have driver sign. Do not reject or refuse the shipment.
2. Immediately contact Gunlocke Traffic Department at 585-728-8268.
3. Hold damaged carton and all interior packing for carrier's inspection. These materials will be needed to substantiate the claim.

For Concealed Damage

1. Open cartons within 15 days of receipt and inspect.
2. Follow steps 2, and 3 as listed under Visible Damage.
3. Do not remove product from delivered destination.

For Loss

1. Be sure loss notation is made on delivery receipt and have driver sign.
2. Contact Gunlocke Traffic Department at 585-728-8268.

Should transportation company seek to limit its liability on concealed, loss, or damage claims, please contact Gunlocke's traffic department. After a thorough investigation of the claim, the traffic department will provide you with guidance in corresponding with the carrier.

Returned merchandise, regardless of delivery method, will not be accepted unless specifically authorized by Gunlocke.

For Damage or Loss of Parcel Post or UPS Shipment

Notify the Gunlocke traffic department immediately at 585-728-8268.

NORMAL DELIVERY

All normal ground transportation by Gunlocke will be made on a dock-to-dock basis. The Gunlocke traffic department will determine the recommended method of shipment according to the ship to destination. If the delivery on a shipment takes longer than 3 hours to be unloaded, an additional charge will be billed at \$100/hour. Gunlocke reserves the absolute right to determine the method of shipping unless special delivery instructions have been previously approved.

Gunlocke cannot guarantee specific delivery times. If a guaranteed delivery time is needed please call Gunlocke Traffic Department at 585-728-8268 for a quote as additional charges will apply. Weekend or after hours deliveries are subject to additional charges.

WEEKEND DELIVERY

A \$500 charge will apply on weekend delivery after 3:00 PM Friday through Sunday evenings.

DROP SHIP / JOB SITE DELIVERY

Orders under \$50,000 list will incur a \$125 charge for ship to locations other than a designated dealer warehouse.

INSIDE DELIVERY

Inside delivery must be noted on order. A minimum \$100 charge will apply.

SPECIAL DELIVERY

Please contact the Gunlocke traffic department for special delivery services such as inside delivery, weekend or after hour deliveries, reconsignment or other special needs. These are billable services. Gunlocke will make every effort to meet the appointed time, however Gunlocke will not be responsible for any additional charges for late deliveries beyond our control.

DOCK RESTRICTIONS

Gunlocke trailers are 53' x 102". If delivery dock will not accommodate trucks of this sizes, the Gunlocke traffic department must be contacted prior to shipping. Alternate arrangements can be made; additional charges may apply.

CONVERGE WOOD FINISH COLORS

Please refer to the
Converge product page
on www.gunlocke.com for
standard finish options.

veneer 1 (Select)

CHERRY

MAPLE

WALNUT

veneer 2 (Premium)

RIFT CUT OAK

CONVERGE PAINT COLORS

(available on credenza chassis and some bases)

NOTE: For FSC Certified Product add "FSC" to beginning of finish option code.
Example: FSCNC260. A 5% list upcharge will be applied per unit ordered with
FSC option.

CONVERGE LAMINATE FINISH COLORS

(table tops and credenza tops only)

UV TOP FINISH

Converge worksurfaces feature two low emitting UV finish options that enhance the beauty of natural wood and ensures the depth, clarity, color consistency and durability throughout the life of the product.

UV finish options

Full-fill Cleartech (upcharge)	FF
Open Pore Low Sheen	OP
Full Fill Top ≤ 120" Length	(+\$75)
Full Fill Top > 120" Length	(+\$150)

laminate 11 (select) description		code	option name	supplier code	Gunlocke finish match*
WOODGRAIN	Natural Maple	PL800	Wilsonart	11021-38	NE800

*See cross reference above for Gunlocke wood / paint finish match. Although these are good matches, they are not exact matches.

Note:

Gunlocke does not guarantee an exact finish match to the plastic laminates listed.

CONVERGE CONFERENCING

Veneers

Converge is offered in three select veneers, one premium veneer, and four exotic veneers. Select veneers include Cherry, Maple, and Walnut. Premium veneer includes Rift Cut Oak. Exotic veneers include Anegre, Ribbon Sapele, Sycamore, and Birdseye Maple.

When choosing a select or premium veneer of Cherry, Maple, Walnut or Rift Cut Oak all exposed surfaces will be Cherry, Maple, Walnut or Rift Cut Oak. When choosing an exotic veneer, the worksurfaces only are of exotic veneer and other surfaces are of the complementary select Cherry or Maple veneer.

Figured Anegre and Ribbon Sapele are complemented with Cherry veneers and solidCherry hardwood bands.

Sycamore and Birdseye Maple are complemented with maple veneers and solid maple hardwood bands.

Specialty Finishes:

- Submit a color sample block (minimum size 3" x 3") to Gunlocke so that a finish formulation can be developed to match the special finish and color.
- Review the approval sample provided by Gunlocke.
- Written approval and sign off is required for Gunlocke customer service.
- Once written approval and sign off is received, the special finish order will be acknowledged.

Note: See Gunlocke Advantage website for special finish request forms.

All Casegoods & Tables Purchase Orders:

- 10% list upcharge per wood unit to base veneer option receiving special finish.

Costs for purchase orders over \$10,000 list:

- 10% list upcharge per wood unit receiving special finish.

Note: This procedure and related costs apply to new and previously formulated special finishes. Special finish orders may receive additional lead time.

LOCKS & KEYING

Two lock options are available. When the factory installed lock option is selected lock cores are installed at the factory. Note: when the random option is selected some units may be shipped with the same key number. When the field installed lock option is selected each unit is shipped with an empty lock cylinder. Locks are Silver or Black.

factory installed locks	option code
Option 1	
SILVER RANDOM KEYS	RMS
BLACK RANDOM KEYS	RMB
Option 2	
SILVER DESIGNATED KEYS	Specify a number between 100TAS - 150TAS
BLACK DESIGNATED KEYS	100TA - 150TA

Field installed locks are also available. When field installed locks are specified each unit is shipped with an empty lock cylinder. A separate line item must be ordered to receive the numbered lock cores for field installation. Field installed locks are available at an additional charge of \$5 list per lock core.

Field installed lock core set, specify model # and key number (add \$5 list per lock core):		
	model number	Specify a number between
SILVER DESIGNATED KEYS	ACLCKFLD	100TAS - 200TAS
BLACK DESIGNATED KEYS	ACLCKFLD	100TA - 200TA

Note: Add \$5 list per lock core.

Gunlocke sin# 711 9

veneers

All exposed wood surfaces utilize select plain sliced Cherry, Walnut, Maple veneer or premium Rift Cut Oak veneers. These veneers are carefully selected and slip matched to assure balance and consistency.

Exotic veneer choices include Ribbon Sapele, Figured Anegre, Birdseye Maple and Figured Sycamore. Ribbon Sapele is book matched, all other exotic veneers are slip matched.

When choosing exotic veneer, the table tops and credenza tops only are exotic veneer and the other surfaces are of select Cherry or Maple veneer. Figured Anegre and Ribbon Sapele are complemented with Cherry veneers and solid Cherry hardwood bands. Sycamore and Birdseye Maple are complemented with Maple veneers and solid Maple hardwood bands.

TABLE TOPS

Wood veneer tops feature a balanced 3-ply construction and are 1 5/16" thick. All hardwood edgebands are mitered on the corners. One standard Converge edge profile is available: taper. Optional edge details include the Menu knife and Medley softened details. All table tops are externally banded with a 1/2" solid hardwood edgeband.

The taper and knife edge details are banded with a 1/2" solid external hardwood edgeband on the top vertical portion, while the bottom vertical portion of these profiles consists of a finished non-banded premium grade MDF.

The Medley edge details are banded with a 1/2" solid external hardwood edgeband. Medley tops are 3-ply construction with 45 lb. density particleboard.

Multi-piece tops are connected with 1/8" thick masonite splines for vertical alignment and steel tite-joint fasteners for horizontal alignment to firmly connect the tops end to end.

CREDENZA WOOD TOPS

Wood veneer tops feature a balanced 3-ply construction and are 1 5/16" thick. All hardwood edgebands are mitered on the corners. One standard Converge edge profile is available: taper. Optional edge details include the Menu knife and Medley softened details. Credenza wood tops are externally banded with a 1/2" solid hardwood edgeband on the user side and lateral

sides. The back has a 1/20" square (non-profiled) edgeband.

The taper and knife edge details are banded with a 1/2" solid external hardwood edgeband on the top vertical portion, while the bottom vertical portion of these profiles consists of a finished non-banded premium grade MDF.

The Medley edge details are banded with 1/2" solid external hardwood edgeband and feature a 3-ply construction with 45 lb. density particleboard.

Credenza tops are ordered and shipped separately and are installed in the field.

LAMINATE TOPS (Table and Credenza)

All laminate tops feature a 0.030" thick, Type 335 high pressure vertical grade Wilsonart Laminate. Gunlocke's standard offering of plastic laminates include 5 wood grain laminates and 3 solid color laminates. These laminates have been selected because they are good matches to specific Gunlocke standard finishes. We did the best to find laminates that match our finishes. The finishes we selected are a close match but we cannot guarantee a perfect match. Please check with the Gunlocke sales rep for samples of both wood and laminate before buying.

All laminate tops have a 2mm butt joined matching vinyl edgeband on all sides.

The laminate tops with square edge are balanced 3-ply construction and are made with 45lb particleboard.

The laminate tops with knife edge are balanced 3-ply construction and are made of MDF.

For complete Wilsonart technical specifications please refer to the Wilsonart website at <http://www.wilsonartcontract.com/Technical/>

UNITIZED CREDENZA CHASSIS CONSTRUCTION

All chassis are constructed of 3/4" thick balanced 3-ply panels. Decorative curved end panels are 7/32" thick, balanced 3-ply, HDF panels which slide into structural aluminum extrusions. Bottom and back panel are securely fastened together using lamello and mini-fix fasteners. End panel is connected to bottom panel with lamello and mini-fix fasteners. End panel is connected to back panel with wood cleats that are securely glued and screwed together.

Credenza top is connected to chassis with 9" steel angle brackets, dowels and mini-fix fasteners. An extruded aluminum support is connected on all four corners. Each leg extrusion includes a steel adjustable glide for leveling. Buffet height credenza units include standard size box drawers with full extension box drawer opening suspensions.

MODULAR CREDENZA CHASSIS CONSTRUCTION

All wood chassis are made with veneer end panels and fronts which are constructed with 3/4" thick balanced 3-ply panels. End panels are connected with an inset top, back, and bottom panel made of 3/4" thick MDF. Panels are securely fastened with cam fasteners and pressed hardwood biscuits using PVA glue (white polyvinyl acetate). A 1 1/16" H x 2 7/16" W solid hardwood stretcher is mounted to the underside of the inset bottom panel. A threaded steel glide plate is attached to the hardwood stretcher to provide a durable connection between the glide and the bottom of the credenza. The glide plate is 10-gauge or 0.134" thick steel.

Painted chassis are made with 3/4" thick premium grade MDF end panels and fronts. Construction is similar to the all wood chassis described above.

Steel glide plates are attached to single end panels with screws. End panels are pre-bored to accept the stem of the glide. The threaded steel glide plate provides a durable connection from glide to bottom of the unit panel.

Each unit is equipped with minimum 4 adjustable glides.

Credenza back is not finished.

DUAL BEAM FRAME UNDERSTRUCTURE

Each base assembly includes an extruded aluminum rectangular frame. The frame and bases are assembled prior to installing the table top. This allows the top to be installed last preventing damage to the table top.

The frame consists of extruded aluminum 1 1/2" W x 3 1/8" H beams, anodized silver. Beams are assembled at corners with steel angle brackets and screws. All frames include standard plastic wire managers mounted along the inside face of length beams.

See base ordering pages for number of frame sections. Longer frames ship in

multiple sections. Be sure to note the length of frames and sections to accommodate any building logistical issues. Multiple section frames are field assembled.

ALUMINUM FRAME FROSTED GLASS DOORS AND BACK PAINTED GLASS

Sliding door credenza can be ordered with glass doors. These feature an extruded aluminum mitered frame, clear anodized silver aluminum. Frame is $\frac{7}{8}$ " thick and $1\frac{3}{4}$ " high. Frosted glass is inset within the frame.

The frame is low profile allowing for only $\frac{1}{16}$ " visible frame around the perimeter of the glass from the front view. The back painted, low iron glass is 4mm thick and is available in 3 finishes: ice white clear, coffee acid etched, and aluminum acid etched.

ACCORDION BASE

The veneer end bases are made of $1\frac{1}{4}$ " 3-ply particle board, the painted bases have are made of $1\frac{1}{4}$ " premium grade MDF. The sides are made of $1\frac{1}{4}$ " premium grade MDF, covered by a 5"W aluminum extrusion. The access panel is made of $\frac{3}{4}$ " 3-ply particle board.

ACCORDION BASE ADD ON

The accordion add on was designed to help customers who need to cover large floor monuments or floor monuments placed closed to the outside of the base. The add on is ordered separately and gets installed in the field. It is available in 2 sizes: 5"W and 9"W. The client can specify an add on for a single base or multiple add on for all bases (works with both center base and end base).

Steel glides provide $1\frac{1}{8}$ " of vertical leveling adjustment.

The add on is made of a $1\frac{1}{4}$ " premium grade MDF covered by aluminum extrusion.

LEG BASE

Solid aluminum cast leg, silver finish. Bottom includes steel glide, with an aluminum sleeve to conceal the height adjustment of the glide. Top includes steel formed bracket for secure connection to aluminum frame.

GEO BASE

Geo base is constructed of $\frac{3}{4}$ " thick 3-ply panels. Panels are securely fastened together with mini-fix connectors, wood biscuits and steel angle brackets. Remov-

able wire management panel connected with keku fasteners. Panel includes routed reveal along top edge for easy removal. Steel attachment bracket and screws included to attach base to aluminum frame. Bottom includes 3" x 11" cutout for managing wires from floor monument to table top. Bottom of base elevated $2\frac{3}{8}$ " from floor to accommodate height of floor monument. (See base dimension info for additional information)

PANEL BASE

Panel base is constructed of $\frac{3}{4}$ " thick 3-ply panels. Panels are securely fastened together with mini-fix connectors, wood biscuits and steel angle brackets. Removable wire management panel connected with keku fasteners. Panel includes routed reveal along top edge for easy removal. Aluminum ends are $3\frac{11}{16}$ " width by $\frac{7}{16}$ " thick, connected with keku fastener brackets. Aluminum ends are clear anodized aluminum finish. Steel attachment bracket and screws included to attach base to aluminum frame. Bottom of base elevated $2\frac{7}{16}$ " from floor to accommodate height of floor monument. (See base dimension info for additional information)

GLIDES

Glides provide $1\frac{1}{8}$ " of vertical leveling adjustment. Glide bottom is durable non-rust nylon in Geo and Quad base models. All other models are steel glide.

DRAWERS

All drawers are constructed of four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts feature vertically matched veneer within each pedestal set.

The drawer side material is 9-ply construction, finished with a roll-coated 7-level UV cured polyester/acrylic finish that provides a high level of chemical and scratch resistance. The drawers are fastened together at each corner with dowel joinery for maximum drawer strength. The bottom material is a 3-ply substrate of consisting of high density fiberboard core with a melamine face and backer.

SUSPENSIONS

All Gunlocke casegoods utilize silver steel roll formed zinc plated high-grade drawer suspensions. All suspensions are warranted for the lifetime of the product. Suspensions feature positive dampened start/stop

fully progressive actions. Box drawers are full extension, featuring precision steel ball bearings for a smoother quieter range of motion and are load rated for 100 lbs.

CREDENZA DOOR HINGES

Units with doors include fully adjustable, 95° swing self closing hinges.

LOCKS

Silver or black face locks are optional on all standard height and buffet height credenza units. Locks specified on the buffet credenza are located on the lower hinged doors only, all drawers are non-locking. Lock plugs are either factory or field installed.

KEYING

Keying is available either factory or field installed.

Factory installed keying offers two options: random or designated. When the random keying option is selected an arbitrary key number will be assigned to the unit. Note: some furniture units may have like key numbers when random keying is selected. When the designated keying option is selected a key number must be specified between 100TAS-150TAS for silver lock core and 100TA-150TA for black lock cores. All keys are solid brass.

When the field installed keying option is selected, a lock cylinder will not be included in the furniture unit. A lock master key and lock cylinder package must be specified separately to install the lock cylinders in the field. The master key provides the ability for lock cylinders to be easily installed and removed in the field. (See page 9 to order master key and field installed lock cylinders.)

WIRE MANAGEMENT

Wire management capabilities in table tops include optional technology ports and technology troughs. Multiple options per table size available; see technology matrix for available options. Top technology option includes cutout for technology unit only, ports and troughs ordered separately.

All aluminum beam frame understructure units include a standard plastic wire manager running along the inside face of the length of beam to accommodate convenient wire management for the table top. Wires are then managed from the technology units through the bases to the floor monument or power source.

Panel and Geo bases include standard removable wire management panel, cutout in bottom of base to route wires from floor monument to technology unit and elevated bottom panel to accommodate the height of the floor monument and cord heads.

A wire management spine is recommended for managing wires in a table specified with legs. The spine can be positioned anywhere along the bottom of the table to manage wires between the floor monument and table top.

SMALL TECHNOLOGY PORT RECESSED IN TABLE TOP

Unit is 7 1/8" D x 5 7/16" W, powder coated silver finish. Each unit includes a power enclosure that contains (2) simplex receptacles per enclosure. Each enclosure is rated for 15 amp, 125 volt with circuit breaker. Units can be specified with 10' grounded standard plug or 6' hardwire conduit option, (2) electrical outlets and (2) voice/data openings. Numerous jack options available, see ordering page for available options. Cover recesses inside unit. Unit is field installed. UL Listed.

LARGE TECHNOLOGY PORT RECESSED IN TABLE TOP

Unit is 7 1/8" D x 9 13/16" W, powder coated silver finish. Each unit includes a power enclosure that contains (4) simplex receptacles per enclosure. Each enclosure is rated for 15 amp, 125 volt with circuit breaker. Units can be specified with 10' grounded standard plug or 6' hardwire conduit option, (4) electrical outlets and (5) voice/data openings. Numerous jack options available, see ordering page for available options. Cover recesses inside unit. Unit is field installed. UL Listed.

(5) voice/data openings. Numerous jack options available, see ordering page for available options. Cover recesses inside unit. Unit is field installed. UL Listed.

50" TECHNOLOGY TROUGH RECESSED IN TABLE TOP

Unit is 11 5/16" D x 49 3/8" W, powder coated silver finish. Includes (2) nominal 10" sliding doors. Doors are elevated 1/2" to accommodate cords entering and exiting wire access opening. Each standard unit includes (12) AC power outlets, (20) jack openings, (2) AAP Extron blank plates. Each 50" trough includes (4) power encl-

losures that contain (3) simplex receptacles per enclosure. Each enclosure is rated for 15 amp, 125 volt with circuit breaker. Units can be specified with 10' grounded standard plug or 6' hardwire conduit option. Each 50" trough includes (4) power supply cords. Numerous jack options available, see ordering page for available options. Unit is field installed. UL Listed.

70" TECHNOLOGY TROUGH RECESSED IN TABLE TOP

Unit is 11 5/16" D x 69 3/8" W, powder coated silver finish. Includes (3) nominal 10" sliding doors. Doors are elevated 1/2" to accommodate cords entering and exiting wire access opening. Each standard unit includes (18) AC power outlets, (30) jack openings, (3) AAP Extron blank plates. Each 70" trough includes (6) power enclosures that contain (3) simplex receptacles per enclosure. Each enclosure is rated for 15 amp, 125 volt with circuit breaker. Units can be specified with 10' grounded standard plug or 6' hardwire conduit option. Each 70" trough includes (6) power supply cords. Numerous jack options available, see ordering page for available options. Unit is field installed. UL Listed.

RECYCLE BIN

The recycle bin has two buckets and fits in any Converge credenza except wall mount models. The recycle bin assembly uses a commercial-grade ball bearing track. Includes two color-coded polypropylene buckets (a blue 15L and a black 20L) to sort trash and recyclables. Quick and easy installation with pre-welded track. The unit is open market.

FINISH

Natural veneer is subject to nature's quality control. Each species will exhibit differences in grain pattern and tone. This is to be expected and, in fact, contributes to the beauty and individuality of each product. Flat Cut veneers emphasize the variations of wood by exhibiting cathedrals in the grain pattern. Quarter Cut and Rift Cut veneers are a premium cut that maintains variations in the grain but without cathedral patterns. Stratawood is a natural, FSC®-certified reconstituted veneer that is designed to exhibit a straight-grain pattern, absent of cathedrals or other significant grain and tone variations.

Worksurfaces, desktops, and tabletops are protected by one of the world's most advanced UV cured finish coatings, available in Full Fill ClearTech® or Open Pore low sheen finish, applied by state-of-the-art finishing equipment. Both finishes meet the EPA's stringent requirements for VOC emissions and air quality. Cured in a specially designed ultraviolet oven, the finish fuses to the wood, forming a durable shield that provides a high level of scratch, stain, chemical, and heat resistance, plus a high level of clarity.

Chassis, storage, overheads, and veneer bases are finished with a 30 sheen, conversion varnish finish.

All colors and species are not available on all products. Please refer to front cover of price lists for availability of finishes.

For the technical specifications see the Finish System Guide & Technical specifications available at www.gunlocke.com/finishsystem.

CLEANING FINISH

Regular dusting and occasional cleaning are recommended to maintain your wood finish. To clean, dampen a soft cloth with luke warm water and gently wipe the wood in the direction of the grain. A mild solution of Murphy's oil soap and water may also be used. Avoid cleaners with oil, waxes, or silicones as they may create a hazy look.

CLEANING LAMINATE TOPS

To clean the surface, use a damp cloth or sponge and a mild soap or detergent. For complete Wilsonart Care and Maintenance instructions please refer to the Wilsonart website at <http://www.wilsonartcontract.com/Technical/>.

CLEANING FROSTED GLASS

All frosted glass should be cleaned with a soft lint free cloth and non-ammonia based cleaner only.

table bases

TABLE BASES

(see pages 153-179)

Primary use: Conference room beam and bases for meeting rooms, staff conference rooms or board rooms

Key product information:

- Base options include Accordion, Geo, Panel and Leg
- Companion bases include Quad, X-base and Leg
- All units include 3 1/8" height, aluminum beam assembly
- NOTE: Please consider beam lengths to accommodate any building logistical issues
- Beams and bases are shipped separately and assembled together in field
- One piece beams ship fully assembled, two piece beams are field assembled

Technology Information and Wire Management:

- All beams include standard wire manager on the inside of beam to conceal and manage wires
- Panel, Geo and Quad bases include standard removable wire management access panel to conceal and route wires from floor to table
- A wire management spine is recommended when specifying the leg base (see page 101, model CVSPINE)
- Accordion base width can be increased 5" or 9" using the Add On (page 127)

(see page 184)

CONVERGE INSTALLATION SEQUENCE FOR TROUGHS

Note: Ports install directly to the bottom of the table top.

Step 1: Assemble base and beam. Place in proper location.

Example shown:

CVPBS108-A

Step 2: Add Technology

Example shown:

TPTR-501A

Step 3: Install data and electrical cables before installing table top

Step 4: Install Table Top

Example shown:
CVTRT42108

Step 5: Insert Bezel

Note: Bezel included when ordering technology.

MOBILE TECHNOLOGY CART

Lectern & Presentation/Projection

(see page 204)

Primary use: The Technology Cart is a combination mobile presentation station with a height adjustable platform that serves as a lectern or projector stand. It includes a standard enclosed compartment for storage of rackable technology/AV equipment. Mobility allows sharing of expensive AV equipment between multiple conference rooms.

Specification Tips:

Power required for AV cart. Recommended locations for power: beneath cart, wall receptacle or from table power source.

Order technology unit early in specification to allow AV integrator appropriate time to populate unit with AV equipment.

Standard AV rack holds any rackable equipment.

Key Product Information:

AV Rack system included with Lectern & Presentation Carts, accepts all standard 19" width rackable components. 8 usable rack spaces or 14" of usable height.

All units mobile, two front casters lockable, rear casters non-locking.

Adjustable height lectern top dimensions - 19"D* x 24"W. *depth from top of pencil lip to front of platform. Pencil lip is 3/8" H.

Top platform - 19 1/8"D x 17 1/2" W

Pull out side shelf dimensions - 15 3/4" d x 15"W

Keyboard mechanism provides 7" of vertical adjustment and 0° to +15° degrees of tilt adjustment
Opening above doors is 3 7/8" in height.

Technology Integration & Wire Management

Consult with AV integrator or internal IT department to determine power and technology requirements.

Consider power and AV/Data location sources to supply cart. Involve contractor to run conduit if locating power and data in floor or wall.

Key Features:

- Mobile unit
- Slide out tray includes soft self closing feature
- Height adjustable platform with tilt capability
- Access doors on both sides of unit
- Technology tray for user access to power and data
- AV rack included - fits all rackable equipment

See Page 45 for technology tray specifications.

LECTERN TECHNOLOGY CART with adjustable platform

model CVMTC-KM

User Side

Approach Side

MOBILE TECHNOLOGY CART

PC/CPU Cart

(see page 204)

Specification Tips:

Power required for AV cart. Recommended locations for power: beneath cart, wall receptacle, or from table.

Order technology unit early in specification to allow AV integrator appropriate time to populate unit with AV equipment.

Key Product Information:

All units mobile, two front casters lockable, rear casters non locking.

Top platform dimensions - 19 1/8"D x 17 1/2"W

Pull out side shelf dimensions - 15 3/4"D x 15"W

Keyboard tray dimensions - 12"D x 21"W

Technology Integration and Wire Management

User side of cabinet includes 2 hinged doors to access technology equipment, opposite side includes single hinged door for wiring of AV components.

Bottom and intermediate panels include cutouts for vertical wire management. Wires can be routed from bottom of unit (floor) up to 2" diameter grommet in technology tray.

Technology Tray Specifications:

Technology tray includes 2 electrical receptacles with 10' standard plug, blank double space AAP Extron plate, Leviton RJ11 (phone) & RJ45 CAT5 (data) jacks and 2" diameter wire management grommet.

Jack cutouts in tray will fit the following manufacturers:

Allen Tel - VERSATAP

AMP/TYCO (NETCONNECT) - SL series & 110

Leviton - QuickPort

Panduit - NetKey

Siemon - Max Keystone

Note:

Wood shelves fixed on PC cart.

Key Features:

- Mobile unit
- Slide out tray includes soft self closing feature
- Access doors on both sides of unit
- Technology tray for user access to power and data
- Keyboard Tray

VISUAL DISPLAY CENTER

Segmented

(see page 200)

Segmented version frames TV in wood and provides 3 aluminum rails located top, center, and bottom of unit for clip in shelving/accessories. Shelving and accessories clip into aluminum rails.

Primary use: The Visual Display Center provides additional communication and visual presentation capability for wall-mounted LCD or Plasma TVs. Key multi-functional features include; retractable white boards, shelving for DVD player, video conferencing camera, audio speakers and conference room accessories.

Unit will accommodate LCD/Plasma TV sizes 42"-71" and up to 200 lbs depending on the bracket model.

Specification Tips:

Note: **LCD/Plasma TV mounting not included.**
With the Visual Display Center Gunlocke recommends a full motion flat panel TV mount that allows maximum flexibility – Extend, Tilt, and Swivel. Overall size not to exceed cutout size of 31 1/2" W x 20" H. Width of unit with whiteboards fully extended is 120 7/8".

Speakers should be exterior mounted.

Weight limit of shelving:

Small shelf	6" = 10 lbs.
Large shelf	18" = 35 lbs.
Full width shelf	77" = 100 lbs.

Pre Install Tips:

Order LCD/Plasma TV mounting bracket.
Mount to a wall that is properly blocked or reinforced.
Mounting brackets included, installers responsible for providing appropriate fasteners for wall conditions.

If drywall or other material is in front of mounting surface it may not exceed 5/8" to ensure proper stability of the mounting bracket.

See bracket specification on page 48 for location of wall outlets.

Key Product Information:

Whiteboard version includes aluminum handles
Each whiteboard extends 20 1/4". Providing total area of approximately 6 sq. ft. of writing surface. Integral marker & eraser holder included.
Each unit includes an eraser and markers.
Wood surface is UV cured Cleartech finish
Unit is fully assembled.

Technology Integration & Wire Management

Power and data for TV can be provided behind visual display center or routed up from existing outlets in wall.

To locate outlets behind visual display center see openings in attachment brackets on page 54.

Segmented

Segmented with extendable whiteboards overall width 120 7/8"

Shown with LCD/Plasma TV and accessories (not included)

Accessories and shelves clip into top, center and bottom horizontal tracks

VISUAL DISPLAY CENTER

Basic All Wood

(see page 202)

All wood version frames TV in wood.

Primary use: The Visual Display Center provides additional communication and visual presentation capability for wall-mounted LCD or Plasma TVs. Key multi-functional features include; retractable white boards.

Unit will accommodate LCD/Plasma TV sizes 42" to 60".

TV must not exceed 63" diagonally or exceed 175 lbs.

Specification Tips:

Note: **LCD/Plasma TV mounting not included.**
With the Visual Display Center Gunlocke recommends a full motion flat panel TV mount that allows maximum flexibility – Extend, Tilt, and Swivel. Overall size not to exceed cutout size of 31 1/2" W x 20" H. Width of unit with whiteboards fully extended is 120 7/8".

Speakers should be exterior mounted.

Weight limit of shelving:

Small shelf 6" = 10 lbs.

Large shelf 18" = 35 lbs.

Full width shelf 77" = 100 lbs.

Pre Install Tips:

Order LCD/Plasma TV mounting bracket.

Mount to a wall that is properly blocked or reinforced.

Mounting brackets included, installers responsible for providing appropriate fasteners for wall conditions.

If drywall or other material is in front of mounting surface it may not exceed 5/8" to ensure proper stability of the mounting bracket.

See bracket specification on page 48 for location of wall outlets.

Key Product Information:

Whiteboard version includes aluminum handles.

Each whiteboard extends 20 1/4". Providing total area of approximately 6 sq. ft. of writing surface. Integral marker & eraser holder included.

Each unit includes an eraser and markers.

Wood surface is UV cured Cleartech finish.

Unit is fully assembled.

Technology Integration & Wire

Management

Power and data for TV can be provided behind visual display center or routed up from existing outlets in wall.

To locate outlets behind visual display center see openings in attachment brackets on page 54.

VISUAL DISPLAY CENTER
MOUNTING RECOMMENDATIONS

Visual display center and cutout dimensions

TV Wall Mounting Bracket example

Wall blocking locations

Blocking area #1 - blocking for mounting visual display center to wall. Minimum blocking width of at least 78".

Blocking area #2 & #3 - blocking for mounting TV wall bracket. Minimum blocking width of at least 36".

Locating outlets for data/electrical
junction boxes on wall

TV wall mount bracket contains (3) 5 5/8 x 5 5/8 access holes for data/power management.

VISUAL DISPLAY CENTER INSTALLATION SEQUENCE

1) Mount visual display center

2) Install TV mounting bracket

3) Mount TV arm to mounting bracket

4) Install LCD or Plasma TV

term	definition
AAP	Architectural Adapter Plates, General application is for multiple audio visual and communications connection options. AAP's are manufactured by Extron.
AAP Double Plate	A modular adaptor. General application is connection of user specified audio and video equipment. Each double plate uses twice the space as a AAP Single Plate.
AC	Power input, alternating current.
Blank	A blank clip in module to fill jack opening. Black
Extron	Manufacturer of AAP plates and a wide range of connectivity solutions. 800 633 9876 www.extron.com
RJ11	A wiring pattern for 6-position modular jacks. Voice/Communications. General application is the source of connection of phone or modem.
RJ45	A wiring pattern for 8-position modular jacks. Data source. General application is connection from a computer to a network system.
VGA	15 pin pass-through connector. General application is connection of computer display output to a monitor or projector input.
3.5 MM Audio	Stereo mini. General application is connection from computer sound card, mp3 player or Apple i-Pod to amplified sound system.

Technology options available in Converge tables include technology ports and technology troughs.

TECHNOLOGY PORTS

Technology ports are available in 2 sizes.

SMALL TECHNOLOGY PORT

Primary use: The small technology port is utilized in round and quad arc tables

Features:

- Receding door
- (2) AC Power outlets
- Power source (10' standard plug or 6' hardwire)
- (2) Data/communication jacks
- customizable blank openings (see page 128)

LARGE TECHNOLOGY PORT

Primary use: The large technology port is utilized in rectangular, arc end, arc boat and sight line tables

Features:

- Receding door
- (4) AC Power outlets
- Power source (10' standard plug or 6' hardwire)
- (5) Data/communication jacks
- customizable blank openings (see page 129)

TECHNOLOGY TROUGHS

Technology troughs are available in 2 sizes. See matrix on table top pages for available options.

50" TECHNOLOGY TROUGH

Primary use: The 50" technology trough is utilized in rectangular, arc end, arc boat and sight line tables

Features:

- (2) sliding access doors
- (2) AAP Extron Double Space Blank Plate
- (20) Data/communication jack locations
- (12) AC Power Outlets
- customizable blank openings (see page 131)

70" TECHNOLOGY TROUGH

Primary use: The 70" technology trough is utilized in rectangular, arc end, arc boat and sight line tables

Features:

- (3) sliding access doors
- (3) AAP Extron Double Space Blank Plate
- (30) Data/communication jack locations
- (18) AC Power Outlets
- customizable blank openings (see page 133)

Hardwired ports and troughs (-HW suffix in model number) are typically the required solution for New York City, Chicago and San Francisco. Requires a certified electrician to install junction boxes and connect ports or troughs to the floor core location(s). Please check your local codes for electrical requirements before purchasing the electrical components.

For all other markets select standard plug or hardwired based on preference. If standard plug is selected, surge protectors (not provided) or power cable kit (order from page 146) are required to connect technology ports/troughs. For a visual detail of these installations see inside back cover.

JACK COMPATIBILITY

Additional flexibility is provided in the Converge technology solution by offering a range of technology solutions in the jack openings.

Blank jack openings may be populated in the field with any of the following manufacturers jacks:

Example

The large technology port blank jacks (4) shown above can be populated with any of the jacks including RJ45, CAT5, CAT5e, and CAT6 from the manufacturers listed below. The Leviton RJ-45 connectors are CAT6.

Note: Refer to page 140-144 for a recommended list of Extron Double Space and Single Space Plates to be ordered directly from Gunlocke or from a local Extron reseller. Extron offers a large variety of connectors in addition to those listed in those pages.

EXTRON TEAMWORK®

Extron TeamWork® offers a pre-configured collaborative system designed for fast, easy implementation with minimal setup. Allowing for groups of 4 to 6 users to share content by connecting the "Show Me" cable to a laptop or tablet. As soon as a signal is detected, power is automatically directed to the video display. Users can switch the display automatically to another device by pressing the "Share" button on the "Show Me" cable, and the switcher automatically displays the appropriate input on the video display. TeamWork® systems works with most flat panel displays, laptops, and tablets.

Extron TeamWork® system must be ordered directly from Extron. Visit www.extron.com or call 1-800-633-9876 for more information.

Gunlocke recommends an Extron APP double space cable organizer with TeamWork® to help keep the wires untangled and organized. See Page 79 for this technology option. Model AC-7054211.

POWER CABLE KIT WITH 6 RECEPTACLE OUTLETS	172	CVPWRKT6	440

Example

- Provides enough receptacles for all port and (1) technology trough options.
- Power cable kit must be specified with standard plug technology units. (Example: TPLG-1A or TPTR-501A). Technology unit electric cords plug into receptacle outlets of power cable kit.
- Power cable kit is hardwired to power source

POWER CABLE KIT WITH 12 RECEPTACLE OUTLETS	244	CVPWRKT12	775
--	-----	-----------	-----

Example

- Provides enough receptacles for (2) technology trough options.
- Power cable kit must be specified with standard plug technology units. (Example: TPTR-501A quantity 2). Technology unit electric cords plug into receptacle outlets of power cable kit.
- Power cable kit is hardwired to power source

PRODUCT INFO

- note
- To be installed by certified electrician
 - Convenient way to connect all power cords to a single power source
 - Includes 10' power in feed conduit
 - The power cable kit is rated for 20 amps per circuit allowing the use of 2 circuits with 2 line conductors, 1 neutral and 1 ground. The line conductors, neutral and ground are all 12 AWG. The kit can be wired in both single and 3-phase configurations, 240/ 120V, 208/ 120V, respectively.
