**INTRODUCTION**

The Gunlocke Company is dedicated to providing the finest products and service possible. This price list reflects that commitment. Included is a current listing of our casegood models.

Seating and Lounge are presented in a separate price list. Contact your Gunlocke Customer Services Representative for more information, (800) 828-6300.

Designed for easy use, each page of this price list, and the inside front cover fold out provide all information required to order a product correctly. Should additional information be needed, contact your Gunlocke customer service representative.

**PRICING**

Prices shown cover standard product specifications. Any changes or alterations, other than those listed, will be subject to an additional charge. Prices include carton-ing and freight. Authorization and pricing must be secured in advance for orders or contracts calling for large quantities, indefinite quantities, or extended delivery dates. Prices are subject to change without notice; the most current prices are published on <http://www.gunlocke.com>.

**ACKNOWLEDGEMENT**

Each order will be acknowledged by Gunlocke. Customers should check each acknowledgement for accuracy and immediately notify Gunlocke of any discrepancies. The printed acknowledgement is the final agreement between The Gunlocke Company and the customer, superseding all previous communications regarding the order.

**SPECIFICATION CHANGES**

Gunlocke reserves the right to change specifications for the improvement of products at any time, without notice.

**ORDER CHANGES**

Gunlocke is not required to accept changes in orders after confirmation. Reasonable changes are subject to additional charges for labor, material and administrative costs.

Order changes of acknowledgement may result in re-scheduling of product.

**RETURNED MERCHANDISE**

No merchandise may be returned without prior authorization.

**CANCELLATIONS**

Cancellation of orders cannot be accepted since every order is manufactured according to customer specifications.

**STORAGE**

If delivery cannot be made and products are ready, Gunlocke will transfer products to a storage facility and products will be invoiced at that time. The customer is responsible for storage charges and assumes and bears all risks associated with the storage of that product.

**TERMS**

Net 30 days from date of invoice. A service charge of eighteen percent (18%) per year or .0004931% per day, compounded monthly, will be added to balance due beyond the thirtieth day. Products are shipped FOB factory, freight prepaid and allowed. Title passes to purchaser and Gunlocke's responsibility ceases when shipment is accepted for transportation by a carrier. A full explanation of all payment terms is found on order and invoice forms.

**ORDERING**

To expedite order entry and to assure proper service, email or fax all orders directly to:

**The Gunlocke Company**  
Attn: Order Entry

## ORDERING INFORMATION

**1a.** Intended use: The furniture on this schedule is intended for use by Government executives (or equivalent military rank) in the Executive, Judicial and Legislative Branches of the Federal Government. To help customers make a good purchasing decision based on their needs and budget, GSA has established four grades of furniture. Grade (1) includes furniture that tends to be the most expensive on this schedule, grade (2) furniture tends to be more moderately priced and grades (3) and (4) furniture tend to be affordably priced when compared to grades (1) and (2). Some pieces of furniture on this schedule may be significantly higher in price than GSA Traditional and Contemporary Executive Special Order Program furniture. The ordering agency or service is responsible for determining furniture appropriate for use in its offices which will fit within its budget and comply with applicable Federal or internal agency procurement regulations. Please see reverse for GSA terms and conditions.

**Grade 1** All exposed solid parts such as top rims, base rails etc. (except decorative accents, inlays and painted parts) shall be the same species as the face veneer. Top and bottom edges of drawer fronts shall be solid wood in the same species as the face veneers. Drawer sides and backs shall be solid wood.

**Grade 2** Exposed wood panel trim and trim on tops shall be the same wood species as the face veneer on the top. Some or all other exposed solid parts, such as base rails can be an alternative wood species (such as poplar or gum) different from the face veneers. Exposed, finished engineered wood core material such as MDF is acceptable only for the edges of drawer fronts. Drawer sides shall be solid wood or veneer core plywood/laminated construction. Silea is grade 2.

**Grade 3** Most or all exposed solid parts can be an alternative wood species (such as poplar or gum), different from the face veneers. Exposed, finished engineered wood core material such as MDF is acceptable only for the edges of drawer fronts. Drawer sides shall be solid wood or veneer core plywood/laminated construction. Medley, Kennsington, Credentials, and all tables are grade 3.

**Grade 4** Most or all exposed solid parts can be an alternative wood species (such as poplar or gum), different from the face veneers. Exposed, finished engineered wood core material such as MDF is acceptable only for the edges of drawer fronts. Drawer sides shall be composite wood material construction such as MDF. Trio is grade 4.

Contact the Gunlocke Company Traffic Department at (800) 828-6300 for a quotation on inside delivery.
32. **Federal Tax ID # 22 3887942**

## 12 YEAR WARRANTY

Subject to the limitations set forth below. The Gunlocke Company warrants to the original purchaser all product in this price list to be free from defects in material and workmanship for a twelve year period from the date of shipment. This 12-year warranty applies to all products sold and installed by a Gunlocke authorized agent for normal commercial single shift service. Gunlocke will repair, or at its option, replace defective merchandise, free of charge. The following components not manufactured by Gunlocke have the following warranties:

- **High wear components** such as casters and glides are warranted for five years after date of shipment to original owner.
- **Electrical components** are warranted 10 years from date of manufacture with exception of lamps and ballasts which are not warranted. This includes Fluorescent Tasklights.
- **LED Tasklights** are warranted for 3 years from date of shipment to original owner.
- **Drawer suspensions** are warranted for lifetime of product after shipment to original owner.
- **Personal Corners** including covering (leather) are warranted for three years of single shift and normal use after shipment to original owner.
- **Height adjustable electrical components** are warranted for five years of single shift and normal use after shipment to original owner.

Any non-standard material selected by the customer is not warranted. Neither does this warranty apply to damage resulting from accident, alteration, or misuse, as well as damage from normal wear and tear such as dents, nicks, scratches, fading and improper maintenance. That is, Gunlocke's warranty is only valid if products are given proper use and care. Gunlocke assumes no responsibility for product damages resulting from improper installation or user modification.

## WOOD FURNITURE

Wood owes its inherent beauty to variations in color, grain, and texture, and therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next even though they are finished at the same time. Exposure to light and the aging process will cause a darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. The Gunlocke Company does not guarantee the exact matching of grain, pattern, and color.

These finishes do not cover any of the natural characteristics of the wood, including nature's colorations, pitch pockets, and the variations of steambent wood. Merchandise will not be replaced because of these natural variations.

It is expressly understood and agreed that the buyer's sole and exclusive remedy for any and all losses or damages resulting from nonconforming goods, or from any other cause, shall be repair or replacement of defective parts, and that Gunlocke shall not be liable for damages or injury to persons or property, nor for replacement of the entire commercial unit, if repair or replacement of defective parts can reasonably render the unit conforming.

All warranty claims must be made in writing by the original owner. Owner may be required to produce the invoice or other evidence to establish that a claim is within the warranty period. Warranty claims may be submitted on the Gunlocke website.

[www.gunlocke.com/productservice/](http://www.gunlocke.com/productservice/)

As stated and illustrated on the website, serial numbers are required to process a warranty claim. No person, firm or corporation is authorized to assume for Gunlocke any liability in connection with the sale or installation of Gunlocke products except as stated above.

All other warranties, expressed or implied, are excluded. Gunlocke shall not be liable for incidental or consequential damages of any sort.

Within the Continental USA, all orders above \$2,000 list are shipped FOB factory, freight prepaid and allowed. All orders less than \$2,000 list will be subject to a \$100 net freight charge. Products shipped to Alaska and Hawaii FOB factory, freight prepaid and allowed to port of embarkation. Customer is responsible for freight charges from port of embarkation to final destination.

An anticipated shipping date is indicated on the order acknowledgement. Gunlocke cannot accept responsibility for shipping delays caused by outside sources or unforeseen problems. Delay of shipments requested by customers must be approved by Gunlocke. Any resultant storage charges will be charged to the customer.

Gunlocke may await completion of the entire order and ship all at once or may make partial shipments from time to time at its sole discretion unless the customer requests in writing that partial shipments are needed and Gunlocke approves the specific shipping schedule. Additional charges may apply.

Gunlocke is not liable for any delay or failure to deliver or perform due to strikes, lock-outs, or other labor or transportation difficulties, delay of sources or supply, accidents, fires, acts of God, or any other causes of like or unlike nature beyond the control of Gunlocke.

### **LIABILITY**

Gunlocke products and their packaging are tendered to a transportation company only after passing rigid quality control inspection. At that time, title to the product is passed to the purchaser. However the transportation company assumes all liability from acceptance of shipment through its delivery. That is, Gunlocke's liability ceases at the time of shipment.

### **FILING OF CLAIMS**

All claims for damage or loss must be submitted via our website at: [www.gunlocke.com/productservices](http://www.gunlocke.com/productservices) within 15 days after receipt of merchandise. Do not return freight damaged merchandise to Gunlocke. Follow the steps below to expedite processing and resolution of claims.

#### **For Visible Damage**

1. Make damage notation on delivery receipt and have driver sign. Do not reject or refuse the shipment.
2. Immediately contact Gunlocke Traffic Department at 585-728-8268.
3. Hold damaged carton and all interior packing for carrier's inspection. These materials will be needed to substantiate the claim.

#### **For Concealed Damage**

1. Open cartons within 15 days of receipt and inspect.
2. Follow steps 2, and 3 as listed under Visible Damage.
3. Do not remove product from delivered destination.

#### **For Loss**

1. Be sure loss notation is made on delivery receipt and have driver sign.
2. Contact Gunlocke Traffic Department at 585-728-8268.

Should transportation company seek to limit its liability on concealed, loss, or damage claims, please contact Gunlocke's traffic department. After a thorough investigation of the claim, the traffic department will provide you with guidance in corresponding with the carrier.

Returned merchandise, regardless of delivery method, will not be accepted unless specifically authorized by Gunlocke.

#### **For Damage or Loss of Parcel Post or UPS Shipment**

Notify the Gunlocke traffic department immediately at 585-728-8268.

### **NORMAL DELIVERY**

All normal ground transportation by Gunlocke will be made on a dock-to-dock basis. The Gunlocke traffic department will determine the recommended method of shipment according to the ship to destination. If the delivery on a shipment takes longer than 3 hours to be unloaded, an additional charge will be billed at \$100/hour. Gunlocke reserves the absolute right to determine the method of shipping unless special delivery instructions have been previously approved.

Gunlocke cannot guarantee specific delivery times. If a guaranteed delivery time is needed please call Gunlocke Traffic Department at 585-728-8268 for a quote as additional charges will apply. Weekend or after hours deliveries are subject to additional charges.

### **WEEKEND DELIVERY**

A \$500 charge will apply on weekend delivery after 3:00 PM Friday through Sunday evenings.

### **DROP SHIP / JOB SITE DELIVERY**

Orders under \$50,000 list will incur a \$125 charge for ship to locations other than a designated dealer warehouse.

### **INSIDE DELIVERY**

Inside delivery must be noted on order. A minimum \$100 charge will apply.

### **SPECIAL DELIVERY**

Please contact the Gunlocke traffic department for special delivery services such as inside delivery, weekend or after hour deliveries, reconsignment or other special needs. These are billable services. Gunlocke will make every effort to meet the appointed time, however Gunlocke will not be responsible for any additional charges for late deliveries beyond our control.

### **DOCK RESTRICTIONS**

Gunlocke trailers are 53' x 102". If delivery dock will not accommodate trucks of this sizes, the Gunlocke traffic department must be contacted prior to shipping. Alternate arrangements can be made; additional charges may apply.

SILEA OPEN OFFICE

**Stratawood Veneers**

All exposed wood surfaces utilize Stratawood - FSC reconstituted veneers, which are made from rapidly renewable wood. Stratawood veneer is an engineered wood veneer which provides a repeat-able, consistent straight-grain pattern. Stratawood does not include cathedrals and has very few defects compared to natural veneer. The grain direction on all surfaces is horizontal.

**Specialty Finishes:**

- Submit a color sample block (minimum size 3" x 3") to Gunlocke so that a finish formulation can be developed to match the special finish and color.
- Review the approval sample provided by Gunlocke.
- Written approval and sign off is required for Gunlocke customer service.
- Once written approval and sign off is received, the special finish order will be acknowledged.

**Note:** See Gunlocke Advantage website for special finish request forms.

**All Casegoods & Tables Purchase Orders:**

- 10% list upcharge per wood unit to base veneer option receiving special finish.

**Note:** This procedure and related costs apply to new and previously formulated special finishes. Special finish orders may receive additional lead time.

SILEA FINISH COLORS

**Laminate**

Gunlocke Silea's standard offering of plastic laminates include 3 Pionite patterned laminates and 3 Wilsonart solid color laminates. These laminates have been selected because they are good matches to specific Gunlocke standard finishes. See cross reference shown above. They are not intended to be a match to the stratawood finishes.

**LOCKS & KEYING**

Locks are standard on all below worksurface drawer units. Two lock options are available. When the factory installed lock option is selected lock cores are installed at the factory. Note: when the random option is selected some units may be shipped with the same key number. When the field installed lock option is selected each unit is shipped with an empty lock cylinder. Locks are Silver.

factory installed locks option code

**Option 1**

**SILVER RANDOM KEYS** **RMS**

**Option 2** Specify a number between  
**SILVER DESIGNATED KEYS** **100TAS - 150TAS**

Field installed locks are also available. When field installed locks are specified each unit is shipped with an empty lock cylinder. A separate line item must be ordered to receive the numbered lock cores for field installation. Field installed locks are available at an additional charge of \$5 list per lock core.

Field installed lock core set, specify model # and key number (add \$5 list per core)

EXAMPLE OF COMPLETE ORDER STRING

## STRATAWOOD VENEERS

All exposed wood surfaces utilize Strata-wood – FSC reconstituted veneers, which are made from rapidly renewable wood. Stratawood veneer is an engineered wood veneer, which provides a repeatable, consistent straight-grain pattern. Strata-wood does not include cathedrals and has significantly fewer defects compared to natural veneer. The grain direction on all surfaces runs horizontal.

## WOOD TOPS

Wood veneer tops feature a balanced 3-ply construction and are 1 3/16" thick. Each top has a 3/32" thick external band on all sides.

Standard tops are constructed of 45 lb particleboard.

Tops connect to the chassis with wood screws through the inset top panel of the pedestals and steel angle brackets. Panel legs attach to the top through 1/4" thick steel flat plates.

## LAMINATE TOPS

All laminate tops have a 2mm butt joined matching vinyl edgeband on all sides. The laminate tops with square edge are balanced 3-ply construction and are made with 45lb particleboard.

Gunlocke's standard offering of plastic laminates include 3 patterned Pionite laminates and 3 solid color Wilsonart laminates. These laminates have been selected because they are good matches to specific Gunlocke standard finishes. The patterned Pionites do NOT match the stratawood finishes, but work well with paint finishes. The finishes we selected are a close match but we cannot guarantee a perfect match. Please check with the Gunlocke sales rep for samples of both wood and laminate before buying.

Wilsonart laminate tops feature a 0.030" thick, Type 335 high pressure vertical grade Wilsonart Laminate. For complete Wilsonart technical specifications please

refer to the Wilsonart website at <http://www.wilsonartcontract.com/Technical/>

Pionite laminate tops feature a 0.028" thick, Type F28 high pressure vertical grade Pionite Laminate.

For complete Pionite technical specifications please refer to the Pionite website at [http://www.pionite.com/pionite/pages\\_pionite/pionite\\_specs.html](http://www.pionite.com/pionite/pages_pionite/pionite_specs.html)

## TABLE BASE CONSTRUCTION

Table bases are constructed of 3/4" thick 3-ply panels for wood units and 3/4" thick MDF panels for painted units. Panels are securely fastened together with mini-fix connectors, wood biscuits and solid wood cleats. Removable wire management access panels are connected with keku fasteners. Panel includes routed reveal along top edge for easy removal. All bases include aluminum end caps which are securely fastened with wood screws. Aluminum end caps are clear anodized aluminum finish. A welded steel base support is securely fastened to the base and allows for easy assembly to dual beam construction and center extrusion.

## DUAL BEAM CONSTRUCTION

Each base is connected to an extruded aluminum rectangular frame. The frame and bases are assembled prior to installing the table top. This allows the top to be installed last preventing damage to the table top.

The frame consists of extruded aluminum 1 1/2" W x 3 1/8" H beams, anodized silver. Beams are assembled at corners with steel angle brackets and screws. All frames include standard plastic wire managers mounted along the inside face of length beams.

## CHASSIS / PEDESTAL CONSTRUCTION

All wood pedestals are made with veneer

end panels and fronts which are constructed with 3/4" thick balanced 3-ply panels. End panels are connected with an inset top, back, and bottom panel which is made of 3/4" thick MDF. Panels are securely fastened together with cam fasteners in conjunction with pressed hardwood biscuits that are securely adhered with PVA (white polyvinyl acetate) glue. A 1 1/16" H x 2 7/16" W solid hardwood stretcher is mounted to the underside of the inset bottom panel. A threaded steel glide plate is attached to the hardwood stretcher to provide a durable connection between the glide and the bottom of pedestal. The glide plate is 10-gauge or 0.134" thick steel.

All painted pedestals are made with 3/4" thick premium grade MDF end panels and fronts. End panels are connected with an inset top, back, and bottom panel which is made of 3/4" thick MDF. Panels are securely fastened together with cam fasteners in conjunction with pressed hardwood biscuits that are securely adhered with PVA (white polyvinyl acetate) glue. A 1 1/16" H x 2 7/16" W solid hardwood stretcher is mounted to the underside of the inset bottom panel. A threaded steel glide plate is attached to the hardwood stretcher with screws to provide a durable connection between the glide and the bottom of pedestal. The glide plate is 10-gauge or 0.134" thick steel.

Steel glide plates are attached to single end panels with screws. End panels are pre-bored to accept the stem of the glide. The threaded steel glide plate provides a durable connection from glide to bottom of unit end panel.

Each unit is equipped with a minimum of four adjustable glides.

## OVERHEAD / STORAGE CONSTRUCTION

All wood panels are constructed with 3/4" thick balanced 3-ply panels. The top, end, and bottom panels are securely fastened together with cam fasteners in conjunction with pressed hardwood biscuits that are

securely adhered with PVA (white polyvinyl acetate) glue.

All painted panels are constructed with  $\frac{3}{4}$ " thick premium grade MDF. The top, end and bottom panels are securely fastened together with cam fasteners in conjunction with pressed hardwood biscuits that are securely adhered with PVA (white polyvinyl acetate) glue.

Overhead cabinets are mounted to a steel support spanner with a spade bracket attachment method. Steel barrel nuts and spade brackets are securely mounted through the back of wall mount cabinets. Overheads mount directly to the steel support spanner. Z brackets are not required.

The steel support spanner is made of 12-gauge steel. The steel support spanner is mounted on each end to closets using 11-gauge galvanized hanger brackets. The hanger bracket is securely fastened to the closets through the end panel using inserts and bolts.

All overhead cabinets with doors include 95° self-closing hinges. Hinges are fully adjustable.

Wood shelves on 36" units are  $1\frac{3}{16}$ " thick balanced 5-ply panels, shelves less than 30" are  $\frac{3}{4}$ " thick balanced 3-ply panels.

## GLIDES

Glides provide  $1\frac{1}{8}$ " of vertical leveling adjustment. Glide bottom is durable nonrust nylon.

## TACKBOARDS

Tackboards are constructed of  $\frac{7}{8}$ " thick material comprised of a  $\frac{1}{8}$ " thick hardboard glued in between a layer of  $\frac{3}{8}$ " thick pressboard on each side. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples.

## DRAWERS

All drawers are constructed of four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts feature matched veneer within each pedestal set. Optional pencil tray is available for order on page 111.

The drawer side material is 9-ply baltic birch plywood, finished with a roll-coated 7-level UV cured polyester/acrylic finish that provides a high level of chemical and scratch resistance. The drawers are fastened together at each corner with dowel joinery for maximum drawer strength. The bottom material is a 3-ply substrate consisting of medium density fiberboard core with a melamine face and backer.

Box/Box/Box/File drawers are standard. All File/File drawers include a hidden accessory drawer. The accessory drawer is made of 9-ply baltic birch plywood.

## SUSPENSIONS

All Gunlocke casegoods utilize silver, steel, roll-formed, zinc plated, high-grade drawer suspensions. All suspensions are warranted for the lifetime of the product. Suspensions feature positive dampened start/stop fully progressive actions. Box drawers are full extension, featuring precision steel ball bearings for a smoother quieter range of motion and are load rated for 100 lbs. File drawers are full extension, featuring precision steel ball bearings for increased weight capacity and are load rated for 150 lbs. Lateral file suspensions are load rated for 150 lbs and include an anti-tip mechanism that prevents more than one drawer from being opened at the same time.

## HINGES

Units with doors include 95° self-closing hinges. Hinges are fully adjustable. Doors on 68 high and 81 high lateral file units utilize 95° free swinging hinges and are opened using a touch latch.

## FILING

The file hanging system is an integral part of the drawer. A highly durable black plastic extrusion is securely fastened into a route on the top of the drawer. The plastic extrusion and steel folder rails allow side to side and front to back filing in file and lateral file drawers. The plastic extrusion was designed to promote optimum filing capacity within the drawer while providing a durable, reliable and maintenance free filing system. (See filing capability section for technical information on drawer dimensions.)

## LOCKS

Silver locks are standard on all pedestals and storage units. Locks are optional on all surface mount and wall mount cabinets.

Doors below the worksurface, glass doors, and sliding doors do not lock. All full height pedestals lock in the kneewell. All low height pedestals face lock. Ganged pedestals have a single kneewell lock that controls all pedestals.

All lateral files feature double sided locking. Each lateral file consists of two lock bars - one attached to each end panel. The lock bars are connected by a shaft. When the unit is locked, both lock bars are engaged resulting in a very secure and structural locking system.

Lock plugs are either factory or field installed.

## KEYING

Keying is available either factory or field installed. Factory installed keying offers two options: random or designated. When the random keying option is selected an arbitrary key number will be assigned to the unit. Note: some furniture units may have like key numbers when random keying is selected. When the designated keying option is selected a key number must be specified between 100TAS-150TAS for silver lock cores and 100TA-150TA for black lock cores. All keys are solid brass.

When the field installed keying option is selected, a lock cylinder will not be included in the furniture unit.

### WIRE MANAGEMENT

All aluminum beam frame understructure units include a standard plastic wire manager running along the inside face of the length of beam to accommodate convenient wire management for the table top. Wires are then managed from the technology units through the bases to the floor monument or power source.

Temporary wire management can be accomplished in a black plastic wire manager and an anodized aluminum accessory track which runs the length of each top.

All bases include standard removable wire management access panels to route wires from floor monuments to technology and power.

Under worksurface wire managers (Model # ACWM) are sold separately to conceal wires beneath the worksurface. These units house and manage wire horizontally around a station.

### GROMMET

4 1/4" x 2 5/8" rectangular 2-piece die cast grommet. Grommet is inset in a black plastic sleeve. Grommet is available in silver matte chrome finish to match other aluminum accents.

### LIGHTING

Low profile LED overhead lighting is available in 4 standard lengths. LED lighting provides high efficiency, low energy lighting with a long life. All LED light strips are encased in a silver aluminum extrusion and include a built-in microswitch to turn the light on/off. Lights are field installed. All units include a 10' cord with a standard plug.

See light specs below for each length:

24" LED light includes 36 LED bulbs  
2.4W 12V and transformer 6W LED 120V  
6W 12VDC

36" LED light includes 72 LED bulbs  
4.95W 12V and transformer 6W LED  
120V 6W 12VDC

48" LED light includes 96 LED bulbs  
6.6W 12V and transformer 30W max LED  
120V 12V

60" LED light includes 120 LED bulbs  
6.25W 12V and transformer 30W max  
LED 120V 12V

### MONITOR ARM

Monitor arm is EVO II. Monitor arm is satin chrome finish. Monitor arm can be mounted inside grommet hole, desktop trough, or clamped to edge of desk.

### ALUMINUM PANEL LEG

Panel legs are utilized on desk and runoff units. Overall dimensions: 30" depth = 27 15/16"H x 3"W x 29 7/8"D and 36" depth = 27 15/16"H x 3"W x 35 7/8"D. Panel legs are constructed of clear anodized silver extruded aluminum components. Panel legs are available with a wood, painted wood, or glass insert. The thickness of the insert is approximately 1/4" thick. Glass inserts are tempered with a ripple pattern. The ripples run horizontally, resulting in a blurred image of any objects in the kneespace of the desk. An open panel leg is also available. Glides are threaded through a machined aluminum plate and provide 1 1/8" of vertical leveling.

### ACCESSORIES

All trough clip-in accessories are constructed from 10-gauge aluminum with a clear anodized finish. The accessories can be used with desk, runoff, and credenza troughs. See "TOPS" section for detailed information on troughs. The Power Unit is silver clear anodized aluminum finish. UL listed. Unit is rated for 125V, 15A and is provided with a (2) 15A simplex receptacles and a 14 GA, 15A cord and standard plug. Cord length is 6ft.

### EXPOSED POWER

Unit is 3"D x 18"W in a powder coated finish. Each unit includes a power enclosure that contains either (2) or (4) simplex receptacles. Each enclosure is rated for 15 amp, 125 volt with a circuit breaker. Units can be specified with 6' grounded standard plug or 6' hardwire conduit option. Numerous power / data configurations are available, see ordering page for available options. Data plug-ins are ordered separately. Unit is field installed. UL Listed.

### PERSONAL CORNER & DESKPADS

Personal corners can be used between two perpendicular worksurfaces to create an ergonomic corner for user. Deskpads are used in-line. All units are wrapped in leather. The bottom surface has a felt lining to protect the worksurface. The chassis is made from 10-gauge aluminum. Personal corners are 36"W x 12 1/2"D. Deskpads are 36"W x 18"D. Units are designed to fit over 1 5/16" thick worksurfaces.

## BACK PAINTED GLASS

All back painted glass units are captured by an extruded aluminum mitered frame which is clear anodized silver aluminum. Frame is 3/4" thick and 1 3/4" high. The frame is low profile allowing only 1/16" visible frame around the perimeter of the glass from the front view. Back painted glass is 4mm thick and is available on doors, modesty panels, and in the "tackzone" of overhead storage. Doors and modesty panels are available in ice white clear low iron, caffè (brown) acid low iron, and aluminum acid low iron. Tackzone glass units are available in white only and are magnetized with a steel backer. These units can also act as a whiteboard with use of dry-erase markers. 6 magnets are included with each magnetized whiteboard.

## GLASS CENTER SCREENS

Glass center screens are 10mm thick and available in 3 standard patterns. Glass is tempered.

Clear = 10mm low iron clear glass

Bi-Line = 10mm double sided low iron "Bi-Line" in horizontal pattern

Crossed Fuzzy = 10mm double sided low iron "Crossed Fuzzy" pattern

## CLEANING BACK PAINTED GLASS

All back painted glass should be cleaned with a soft lint free cloth and non-ammونيا based cleaner only.

## CLEANING LAMINATE TOPS

To clean the surface, use a damp cloth or sponge and a mild soap or detergent. For complete Care and Maintenance instructions please refer to the Wilsonart website at <http://www.wilsonartcontract.com/Technical/> or the Pionite website at [http://www.pionite.com/pionite/pages\\_pionite/pionite\\_specs.html](http://www.pionite.com/pionite/pages_pionite/pionite_specs.html).

## FINISH

Natural veneer is subject to nature's quality control. Each species will exhibit differences in grain pattern and tone. This is to be expected and, in fact, contributes to the beauty and individuality of each product. Flat Cut veneers emphasize the variations of wood by exhibiting cathedrals in the grain pattern. Quarter Cut and Rift Cut veneers are a premium cut that maintains variations in the grain but without cathedral patterns. Stratawood is a natural, FSC®-certified reconstituted veneer that is designed to exhibit a straight-grain pattern, absent of cathedrals or other significant grain and tone variations.

Worksurfaces, desktops, and tabletops are protected by one of the world's most advanced UV cured finish coatings, available in Full Fill ClearTech® or Open Pore low sheen finish, applied by state-of-the-art finishing equipment. Both finishes meet the EPA's stringent requirements for VOC emissions and air quality. Cured in a specially designed ultraviolet oven, the finish fuses to the wood, forming a durable shield that provides a high level of scratch, stain, chemical, and heat resistance, plus a high level of clarity.

Chassis, storage, overheads, and veneer bases are finished with a 30 sheen, conversion varnish finish.

All colors and species are not available on all products. Please refer to front cover of price lists for availability of finishes.

For the technical specifications see the Finish System Guide & Technical specifications available at [www.gunlocke.com/finishsystem](http://www.gunlocke.com/finishsystem).

## CLEANING FINISH

Regular dusting and occasional cleaning are recommended to maintain your wood finish. To clean, dampen a soft cloth with luke warm water and gently wipe the wood in the direction of the grain. A mild solution of Murphy's oil soap and water may also be used. Avoid cleaners with oil, waxes, or silicones as they may create a hazy look.

It is the customer's responsibility to ensure that the use of the pre-wired electrical system, the number of duplex receptacles used on a given circuit, and the connection to the building electrical supply, be in compliance with all local and national electrical codes.

- A licensed electrician must make connections to the buildings power supply.
- Harnesses do not stretch; special applications will require special power solutions
- Components from the 3+3+2 system cannot be used with the 3+1 system or the 2+2 system.

**8-TRAC ELECTRICAL SYSTEM**

The 8 trac modular power system offers three configurations to suit a variety of needs; two four circuit systems and one three circuit system. All systems utilize 8 wires rated at 20 amps (15 amps Canadian).

Each of the systems offer isolated/dedicated circuits for sensitive equipment. Depending on the specific need, customers can select from within the three after consulting with their facility manager and/or electrician.

**HOW TO ORDER**

1. Determine which electrical system you will use after consulting your electrician and computer support personnel.

- The four-circuit system  
(4-Hot/2-Neutral/2-Ground)  
- 3+1 option  
- 2+2 option
- The three-circuit system  
(3-Hot/3-Neutral/2-Ground)  
- 3+3+2 option

2. Select Power In-Feed.

3. Select Modular Power Units to distribute power to each user. Specify to match table size. Quantity (1) modular power required for each table top.

4. Select Duplexes. Quantity (2) duplexes required for each length of modular power.

5. Select Jumpers. In-line jumpers used to connect modular power units from table to table in-line. End of table jumpers used to connect modular power units around the end of double sided tables.

6. Select "H" connector if required.

**Typical power usage by the most commonly specified office equipment.**

## POWER IN-FEED

- Used to connect the power system to building supply
- A licensed electrician must make connection to the building
- Plugs into the end of any power block offering a variety of power entry points along the table

## MODULAR POWER

- Used to distribute power in table
- Available in lengths to match table sections
- Mounted on the table support beams
- Power distribution in either direction

## DUPLEX RECEPTACLE

- 15 amp outlet configuration
- 20 amp configurations available by special request
- Snaps into modular harnesses for easy reconfiguration
- Labeled with provided circuit. Isolated circuits are marked with an orange triangle

### MODULAR POWER JUMPERS

- Used to connect modular harness together across table sections
- "JTT" jumpers accommodates routing through the base assemblies. A licensed electrician must make connection to the building
- "JET" jumpers accommodates routing around the end of the table

### 8-WIRE "H" CONNECTOR

- Can be used when you need to bring power to the table somewhere else than at the ends of a table.
- This acts as a T-splitter and connects to 3 jumpers (two from the table and one from the power source)
- Used in conjunction with power in-feed and modular power units.

## WIRE MANAGEMENT

Silea's dual-beam, 5-slot center trough system provides permanent routing for power cables and data lines in hardwired configurations, as well as temporary wire management for each individual user.

- A** ● **Power cables** are managed along the outer beams to provide access along the full length of a table.
- B** ● **Data lines** can be easily separated from power cables via a two-compartment extrusion.
- C** ● **Temporary wire management** through the center trough keeps personal cords, such as mobile phone chargers, from cluttering desks.

### 3 KEY POWER COMPONENTS

- 1. Power In-Feed**  
Used to connect table to power source.

- 3. In-Line Jumper**  
Used to connect power assemblies.

- 2. Modular Power Assembly**  
Used to distribute power along beams.

TECHNOLOGY INTEGRATION

Silea is designed to integrate with technology, allowing users to keep today's work tools connected, charged up, and close at hand.

**a. Center trough**

Full-length center trough provides access along the entire table.

**b. Monitor arms**

Monitor arms can be easily clamped on back edge of worksurfaces and adjusted to the best location according to each user's preference.

**c. Accessory tracks**

Clip-in accessories including PDA holders, paper trays, and power units fit securely; a center track holds an optional center screen.

**d. Power units**

Flush exposed power units provide simple, clean power access.

**e. Removable access panels**

Cables can be managed within bases and from the table to the floor via removable access panels.

**f. Laptop storage**

Low-height pedestals provide a convenient location for docking stations and laptop storage.

## BUILD FOR YOUR NEEDS

All Silea stations start with a simple kit of parts. Stations can be built up or scaled back for the right amount of storage and privacy to suit the workers who use them. Whether you need a basic table or a four-pack of admin stations, Silea gives you options.

1

### START WITH A TABLE

A basic table can be assembled from Silea worksurfaces, support beams, and bases.

2

### ADD RETURNS

Storage returns can be added perpendicular to the table for a layered effect.

3

### ADD FREESTANDING STORAGE

Cabinets and storage closets provide personal storage space and complete the footprint of each station.

4

### ADD OVERHEADS

Overheads span the space between closets or structural walls to provide storage and create individual privacy.

5

### ADD ADMIN WALLS

Admin walls with transaction tops can be added to convert stations for use in support areas.

EXPAND AS NEEDED

Bringing the private office to the open plan means casegoods you can expand to create multiple stations that offer privacy and storage without panels. With Silea Open Office, you can build along storage or tables to create runs of stations to suit the needs of your space.

Full modesty panel

## CENTER SCREENS

Wood/paint; Clear/patterned glass;

**STEP 1:**

Order worksurfaces. See Item A.

**STEP 2:**

Order table beams and center trough assembly. See Item B.

**Spec Tip:**

Order to match work surface size.

An end base or center base is required at each end.

**STEP 3:**

Order table bases. See Item C.

**Spec Tip:**

An end base or center base is required at each end of every work surface

**STEP 4:**

Add optional center screens D, modesty panels E, and table pedestals F.

# HOW TO BUILD DOUBLE SIDED TABLES

## STEP 1:

Order worksurfaces. See Item A.

## STEP 2:

Order table beams and center trough assembly. See Item B.

### Spec Tip:

Order to match work surface size.  
An end base or center base is required at each end.

## STEP 3:

Order table bases. See Item C.

### Spec Tip:

An end base or center base is required at each end of every work surface

## STEP 4:

Add optional center screens D, modesty panels E, and table pedestals F.

There are 3 versions of center screens. Specify to match worksurface length for each application below. May be used in combination with each other.

1. End of worksurface - TO - end of worksurface. Ex. SXTCS1272E-W

**Spec Tip:**

Used when NO tackzone and NO tasklight cord manager is required and with floating height spanners.

2. End of worksurface - TO - tackzone of single sided overheads/closets. Ex. SXTCS1272S-W  
OR End of worksurface - TO - tasklight wire manager (Pg. 170) used in single sided overheads/closets with floating overheads.

3. End of worksurface - TO - tackzone of double sided overheads/closets. Ex. SXTCS1272D-W  
OR End of worksurface - TO - tasklight wire manager (Pg. 170) used in double sided overheads/closets with floating overheads.

## WIRE MANAGEMENT

Silea's dual-beam, 5-slot center trough system provides permanent routing for power cables and data lines in hardwired configurations, as well as temporary wire management for each individual user.

- A** ● **Power cables** are managed along the outer beams to provide access along the full length of a table.
- B** ● **Data lines** can be easily separated from power cables via a two-compartment extrusion.
- C** ● **Temporary wire management** through the center trough keeps personal cords, such as mobile phone chargers, from cluttering desks.

### 3 KEY POWER COMPONENTS

**1. Power In-Feed**  
Used to connect table to power source.

**3. In-Line Jumper**  
Used to connect power assemblies.

**2. Modular Power Assembly**  
Used to distribute power along beams.

TECHNOLOGY INTEGRATION

Silea is designed to integrate with technology, allowing users to keep today's work tools connected, charged up, and close at hand.

**a. Center trough**

Full-length center trough provides access along the entire table.

**b. Monitor arms**

Monitor arms can be easily clamped on back edge of worksurfaces and adjusted to the best location according to each user's preference.

**c. Accessory tracks**

Clip-in accessories including PDA holders, paper trays, and power units fit securely; a center track holds an optional center screen.

**d. Power units**

Flush exposed power units provide simple, clean power access.

**e. Removable access panels**

Cables can be managed within bases and from the table to the floor via removable access panels.

**f. Laptop storage**

Low-height pedestals provide a convenient location for docking stations and laptop storage.

It is the customer's responsibility to ensure that the use of the pre-wired electrical system, the number of duplex receptacles used on a given circuit, and the connection to the building electrical supply, be in compliance with all local and national electrical codes.

- A licensed electrician must make connections to the buildings power supply.
- Harnesses do not stretch; special applications will require special power solutions
- Components from the 3+3+2 system cannot be used with the 3+1 system or the 2+2 system.

## 8-TRAC ELECTRICAL SYSTEM

The 8 trac modular power system offers three configurations to suit a variety of needs; two four circuit systems and one three circuit system. All systems utilize 8 wires rated at 20 amps (15 amps Canadian).

Each of the systems offer isolated/dedicated circuits for sensitive equipment. Depending on the specific need, customers can select from within the three after consulting with their facility manager and/or electrician.

## HOW TO ORDER

1. Determine which electrical system you will use after consulting your electrician and computer support personnel.

- The four-circuit system  
(4-Hot/2-Neutral/2-Ground)  
- 3+1 option  
- 2+2 option
- The three-circuit system  
(3-Hot/3-Neutral/2-Ground)  
- 3+3+2 option

2. Select Power In-Feed.

3. Select Modular Power Units to distribute power to each user. Specify to match table size. Quantity (1) modular power required for each table top.

4. Select Duplexes. Quantity (2) duplexes required for each length of modular power.

5. Select Jumpers. In-line jumpers used to connect modular power units from table to table in-line. End of table jumpers used to connect modular power units around the end of double sided tables.

6. Select "H" connector if required

### Typical power usage by the most commonly specified office equipment.

EQUIPMENT	AMPS	EQUIPMENT	AMPS	EQUIPMENT	AMPS
<b>Computers</b>		<b>Copiers</b>		<b>Fax Machines</b>

15" Plasma Monitor .....	0.5	Personal Laser or LED .....	8		
20" Plasma Monitor .....	1	Workgroup Laser or LED .....	15		

## POWER IN-FEED

- Used to connect the power system to building supply
- A licensed electrician must make connection to the building
- Plugs into the end of any power block offering a variety of power entry points along the table

## MODULAR POWER HARNESS

- Used to distribute power in table
- Available in lengths to match table sections
- Mounted on the table support beams
- Power distribution in either direction

## DUPLEX RECEPTACLE

- 15 amp outlet configuration
- 20 amp configurations available by special request
- Snaps into modular harnesses for easy reconfiguration
- Labeled with provided circuit. Isolated circuits are marked with an orange triangle

## MODULAR POWER JUMPERS

- Used to connect modular harness together across table sections
- "JTT" jumpers accommodates routing through the base assemblies. A licensed electrician must make connection to the building
- "JET" jumpers accommodates routing around the end of the table

## 8-WIRE "H" CONNECTOR

- Can be used when you need to bring power to the table somewhere else than at the ends of a table.
- This acts as a T-splitter and connects to 3 jumpers (two from the table and one from the power source)
- Used in conjunction with power in-feed and modular power units.

# SINGLE SIDED TABLE WORKSURFACES

SILEA OPEN OFFICE  
01/16

	D	W	H	model number + type	laminate 1	veneer 1
STANDARD 	27	60	1 3/16	<b>SXTWS3060-</b> [ ]	821	967

--	---	---	---	--------------	------

**UNIVERSAL SURFACE MOUNT  
CIRCUITRAC™ ENERGY  
MANAGEMENT SYSTEM**

11 3/16	8 3/4	2 5/8	<b>ACT24-UCTEMS</b>	1,447
---------	-------	-------	---------------------	-------

- Universal Surface Mount Circuitrac™ Energy Management System (MCD module).
- Supports up to 16 sensors per system.
- Unit is hardwired to building.
- Modular Power In-Feed is hardwired to MCD module.

**CIRCUITRAC™  
RECEPTACLE LABELS**

1	1	1	<b>ACT24-LABEL</b>	32
---	---	---	--------------------	----

- Circuitrac™ Controlled Circuit labels required on controlled receptacles.
- At least one controlled circuit must be installed within 6 ft from each uncontrolled receptacle.
- Sheet of 40 Controlled Circuit labels with "conTrolled" on them for easy viewing.
- Receptacles upstream from MCD are uncontrolled - place MCD as close to power input as possible.

**CIRCUITRAC™  
OCCUPANCY SENSOR**

4 1/4	4 1/4	4 1/4	<b>ACT24-SENSOR</b>	471
-------	-------	-------	---------------------	-----

- Circuitrac™ occupancy sensors are mounted on ceiling and have a sensor distance of up to 8 meters.
- Occupancy sensor has an 82" field of view.
- Up to 16 sensors can be synced with an MCD module

**MCD First Boot Process:**

Note: Out of the box, all circuits will be ON.

1. Power up MCD, Power LED will always flashes RED at first power up.
2. Hold down both MODE and SELECT buttons until all LEDs flash RED.
3. Open sensor. Remove plastic tab from batteries.
4. Start with providing power to only one MCD and one sensor at a time.
5. Each MCD will pair with up to 16 sensors.

MODEL NUMBER

### TITLE 24 SUMMARY

The 2013 California Title 24, addresses building energy efficiency standards with an objective to reduce energy use in California. The owner or tenant is responsible to meet these specific requirements. The impacts:

- All building permits, new or renovation
- Office improvements, including moving or reconfiguring existing furniture

### OFFICE FURNITURE IMPACT

In Subchapter 4, Section 130.5(d) controlled receptacles are required and non-controlled receptacles are allowed. A factory-marked controlled receptacle is required within 6 feet of any non-controlled receptacle. Circuit controls for 120 volt receptacles will run on timers, sensors, or both. A power strip or surge bar does not meet the standard. These requirements are for new spaces and retrofits, with all building permits, and any time furniture with electrical is moved. A post-installation inspection is also required.

### SPECIFICATION

1. Order qty. 1 MCD Module **ACT24-UCTEMS** for each hardwire infeed.
2. Order labels for controlled receptacles
3. Order occupancy sensor qty. based on room size. See diagram below for sensor range

## PRODUCT INFO

All file/file drawers include a hidden accessory drawer.

All pedestals lock in the kneewell.

Includes a finished back panel standard.

## TO ORDER PLEASE SPECIFY THE FOLLOWING:

.  .

**MODEL NUMBER + TYPE      FINISH      KEYING**

Type must be specified as part of model number.

P = Paint  
W = Wood Veneer

See inside front cover for required option codes

### Example

SXDPD3010L-2W.SC701.FT110TAS  
 SXDPD3010L-2W      SC701      FT110TAS  
 MODEL NUMBER + TYPE      FINISH      KEYING

1/2 HEIGHT

D	W	H	model number + type	paint	veneer 1
$\frac{3}{4}$	$38 \frac{3}{8}$	$13 \frac{11}{16}$	<b>SXDMPH38-</b> [ ]	439	516
$\frac{3}{4}$	$44 \frac{3}{8}$	$13 \frac{11}{16}$	<b>SXDMPH44-</b> [ ]	453	531
$\frac{3}{4}$	$50 \frac{3}{8}$	$13 \frac{11}{16}$	<b>SXDMPH50-</b> [ ]	466	549

• Modesty panel is inset 3" from approach side.

**Modesty Width Calculation**

- (48" worksurface) - (10" pedestal) = 38" width modesty
- (54" worksurface) - (10" pedestal) = 44" width modesty
- (60" worksurface) - (10" pedestal) = 50" width modesty

**PRODUCT INFO**

## TACKZONE

Fabric Tackboard

Back painted glass

Overhead cabinets always run perpendicular to the table.  
See below for specification sequence of overheads used with  
double-sided storage units.

**STEP 1:**

Specify 59H x 36D double sided storage with SAY option.

**STEP 2:**

Calculate dimension between storage units and order steel  
overhead support spanner (A).

Note: support spanners can be specified as  
floating height OR full height for  
use with tackzone.

**STEP 3:**

Specify top cap (B).

**STEP 4:**

Specify overhead zone product (C).  
Include tackzone if required.

# SPECIFICATION TIPS

single sided overheads w/back panels

Overhead cabinets always run perpendicular to the table.  
See below for specification sequence of overheads used with single-sided storage units.

**STEP 1:**

Specify 59H x 18D single sided storage with SAY option.

**STEP 2:**

Calculate dimension between storage units and order steel overhead support spanner (A).

Note: support spanners can be specified as floating height OR full height for use with tackzone.

**STEP 3:**

Specify top cap (B).

**STEP 4:**

Specify overhead zone product (C).  
Include tackzone if required.

**STEP 5:**

Specify floating height (D). A back panel is required.

Note: back panel height must match overhead spanner height.

**CONDITION 1:**

Returns - low height

Overheads - floating height back panel (open)

**CONDITION 2: NOT RECOMMENDED**

Returns - low height

Overheads - full height back panel (closed)

**Note:** Full height returns are recommended when closing off tackzone area. Low height returns will result in an open gap.

**CONDITION 3:**

Returns - full height

Overheads - floating height back panel (open)

**CONDITION 4:**

Returns - full height

Overheads - full height back panel (closed)

FOR USE WITH FLOATING OVERHEADS	1/2	5	15 3/4	<b>SXTCS-WIREMGR</b>	60

- For use with floating overheads
- Tasklight cord manager fits into center trough and is used in conjunction with center screens
- Scaled to match thickness of tackzone of single sided and double sided overheads/closets.
- Center screens must be specified accordingly

**Specifying center screens. (Also see pg. 69 for reference)**

Example 1: End of Worksurface - TO - Tasklight Wire Manager used in single sided overheads/closets.

- Center screen example: SXTCS1272S-W

WIRE MANAGER USED IN SINGLE SIDED OVERHEADS/CLOSETS

END WKSF

Example 2: End of Worksurface - TO - Tasklight Wire Manager used in double sided overheads/closets.

- Center screen example: SXTCS1272D-W

WIRE MANAGER USED IN DOUBLE SIDED OVERHEADS/CLOSETS

END WKSF

**NOTE:** For use with tackzone  
If a tackzone is required, then the cord manager is **NOT** required.  
The tasklight cord can be managed behind the tackboards to the center trough.

**PRODUCT INFO**

Cord manager is anodized aluminum
