Environmental Statement

David Edward has a long standing legacy of environmental stewardship. For greater than fifty years our family's company has practiced conservation and sustainability while producing environmentally friendly furniture.

Decades before the Green Wave, our tradition of minimizing waste and employing natural materials was established with concerns for our employees. Our in-house Industrial Design studio has dedicated years to researching environmental materials, exploring cutting edge solutions, and testing sustainable materials; resulting in our ability to produce low VOC, sustainable furniture that also meets David Edward's high design and quality standards.

To achieve this, David Edward incorporates anachronistic upholstery methods that do not rely upon glue adhesives, but rather encourages perpetual re-use, as the product is easily reupholstered. We also employ a waterproof, solvent and formaldehyde free, PVA based glue for all of our core materials. Our non-toxic processes last through high traffic commercial, healthcare, hospitality and retail settings.

All of our wood is sustainable harvested, which are among one of the many green materials used in our seating designs. Other green materials used include all-natural latex

foam, jute webbing, and formaldehyde-free stains. On a custom basis we can utilize water based stains and finishes.

Our belief is that it is necessary to be environmental stewards in every meaning of the word. We not only promote minimal off-gassing using natural materials, but we also strive to minimize or eliminate our waste and emissions through material reuse and recycling. Wood scraps are used as fuel in a bio-fuel furnace to heat the entire plant throughout winter, while leather remnants are saved and sent to a handbag manufacturer. Foam surplus is bundled and sent to a flooring company for under padding. To cut down on cardboard waste, we ship our furniture packed in reusable blankets, and have implemented a plant-wide cardboard recycling program saving four tons of cardboard a month. Excess materials are recycled from distilling all of our solvent rags to giving all of our excess fabrics and leathers to charities.

David Edward produces everything in our own facilities in the United States and it is this vertical integration that supports our confidence in our ability to certify the materials and manufacturing systems used to create each and every product design. To aide our customers we maintain complete and documented supervision of the environmental specifications, as all of our products are fully produced with little or no reliance on third

party vendors. In addition, we constantly encourage our designers and suppliers to seek out new solutions that will support our (as well as our customer's) environmental principles. As a benchmark project, we were proud to be selected to supply the furniture for the World Wildlife Fund Headquarters in Washington, D.C., designed by Envision Design as well as Al Gore's offices in New York.

Upcharges in price and extended lead-times may apply to custom furniture, so please utilize our **LEED-CI Point Request Form** for accuracy on each project.

Reconditioning Services

David Edward offers re-upholstery and refinishing services for any David Edward design encouraging perpetual reuse of the products. USGBC's LEED program provides additional points for salvaged, refurbished or used furniture for MR Credit 3.2 Materials Reuse - 1 point.

Please contact our customer service department to reuse, recycle and renew any current or discontinued David Edward as we can provide a comprehensive price for the service including freight in both directions to facilitate the process.

Indoor Air Quality

David Edward can provide a water based stain and water based finish that meets the LEED-CI Indoor Air Quality Tests.

Third party certification by Berkeley Analytical Labs. [CLICK HERE TO VIEW](#)

As a benchmark product of our efforts, David Edward has manufactured the Serengeti utilizing all the sustainable resources that we have available. In addition to the use of these sustainable resources and with the upmost concern of our products effect on ecological and human health, we had the Serengeti tested for VOC emissions by Berkeley Analytical Associates, LLC using the most stringent and current air quality standards available via the ANSI/BIFMA M7.1 test and the California 1350 requirement. Berkeley Analytical Associates, LLC is an independent testing facility located in Richmond, California. We are proud to be able to provide all of the materials used in the manufacturing, as well as the testing results.

BATTING

Hobbs Bonded Fibre's 100% organic cotton batting

WOOD FRAME

Frame built in sustainably harvested maple certified by the Forest Stewardship Council

WOOD GLUE

Franklin's Titebond GREENchoice solvent-free & low VOC adhesive

UPHOLSTERY

Indika Organic's 100% hemp fabrics

STAIN & FINISH

RPM's Aqua system water based & low VOC stain and finish

SEAT DECK

Farnsworth Fibre's seat deck of 100% post-industrial recycled materials

FOAMS

NCFI's Bio-Lux soy based foam & American Excelsior's natural latex rubber foam

WEBBING

Perelli's natural rubber webbing & 100% jute webbing

ANSI/BIFMA M7.1 AIR QUALITY TEST - Beyond GREENGUARD

The ANSI/BIFMA M7.1 air quality test represents the most stringent and current air quality standards available.

- This specific air quality emissions test (ANSI/BIFMA M7.1) used actually surpasses GREENGUARD's indoor air quality test, by meeting the criteria established by the Business and Institutional Furniture Manufacturer's Association (BIFMA) and endorsed by the American National Standards Institute (ANSI).
- The ANSI/BIFMA M7.1 test was created to provide the marketplace with a more balanced, consensus based standard, as an alternative to GREENGUARD's, in satisfying the U.S. Green Building Council's LEED-CI EQ 4.5 credit requirement.
- As opposed to GREENGUARD's certification program, which covers a wide variety of building products, the ANSI/BIFMA M7.1 test was designed specifically to address the air quality emissions of furniture products.
- This test minimizes the marketplace confusion that was a result of the proliferation of independently developed standards and proprietary certification programs.
- This test represents the input and consensus agreement of a broad, diverse and balanced group of stakeholders including architects, designers, laboratories, scientists, researchers, manufacturers and government agencies.
- This test standard will facilitate more comprehensive, meaningful and direct marketplace comparisons.

LEED-CI EQ - Credit 4.5 - Low-Emitting Materials, Systems Furniture and Seating

CHEMICAL	TEST: ANSI/BIFMA M7.1-2007	GRADE
TVOC	0.5 mg/m ³	PASS
Formaldehyde	0.05 ppb	PASS
Total Aldehydes	0.1 ppb	PASS
4-Phenylcyclohexene (4-PCH)	0.0065 mg/m ³	PASS

-
- The Serengeti was tested to determine air quality emissions compliancy with the California 1350 requirement of fourteen days, as well as the LEED-CI seven day requirement. Those results are listed below.

Chronic Reference Exposure Levels (CRELs) established by California OEHHA (Office of Environmental Health Hazard Assessment)

CHEMICAL	TEST: 1/2 CREL (ug/m ³)	GRADE
Formaldehyde	16.5	PASS
Acetaldehyde	9	PASS
Phenol	100	PASS

-
- In order to have complete disclosure with our clients regarding the validity of our claims, please refer to the sustainable design section of our website in order to download the full report of the Berkeley Analytical Associates, LLC emissions test results. Berkeley Analytical Associates, LLC is an independently certified testing facility located in Richmond, California.
-

General Information

Construction

Our furniture is designed and engineered for use in high density public areas. Kiln dried hardwood frames which embody mortise and tenon, joinery and corner block construction are produced in our vertically integrated facilities. Most of our fully upholstered pieces employ eight way hand-tied coil spring construction and all furniture is pre upholstered in muslin or dacron. Exposed woods feature a catalyzed sealer and top coat finish system which is resistant to scratches, cigarette burns and most chemicals. All woods are hand rubbed.

Custom Design and Standardization Capability

We are delighted to participate in design standardization programs or major custom design projects. We have three professional furniture designers on staff supported by in-house drafting, computer aided design, engineering and prototyping. Our product designers are available to visit your offices to collaborate in the design of new products or to customize our own products to your specific requirements. As we manufacture our entire product line in-house, we can respond quickly, often within standard lead time.

Custom Revisions to Standard Sizes

Changes in the length of designs with radius in either plan or elevation are also available; please inquire from factory for pricing, yardage requirements and delivery time. Revisions of visual elements not affecting the frame, such as tailoring or cutting details, cushion arrangements and the like can usually be accomplished at a small additional charge. Major changes to frame engineering are normally feasible in quantities of 50 units or more. Please mark all item numbers requiring revision with suffix R and submit a 50% deposit for custom order.

Published Dimensions

Seat height is calculated by placing a carpenter's level at the crown of the seat and measuring from the floor to the horizontal plane. Published dimensions are approximate (plus/minus one inch) and vary depending on cover used. If a unit must fit within a specific space, please notate on your purchase order. Arm heights given are measured from the front of the arm. Exact construction specifications of each individual design are available on request.

Reconditioning Services

David Edward offers reupholstery and refinishing services for any David Edward design encouraging perpetual reuse of the products. USGBC's LEED program provides additional points for salvaged, refurbished or used furniture for MR Credit 3.2 Materials Reuse - 1 point.

Please contact our customer service department to reuse, recycle and renew and current or discontinued David Edward as we can provide a comprehensive price for the service including freight in both directions to facilitate the process.

Access Excess

An online clearance center contains products for purchase that were utilized as showroom samples, Lending Library Samples, trade show product and prototypes. A comprehensive database is consistently updated to provide photographs, descriptions, pricing and dimensions for all available designs. Our standard freight and cartoning capabilities are available to insure timely arrival. Including the additional services of Reconditioning the product can be modified to your requirements.

DAVID EDWARD

Wood Finishes & Metal Finishes

Standard Wood Finishes

We feature solid Black Cherry and Northern Hard Maple wood species in 17 standard wood finishes listed below and sampled in the Data section of our catalog. Maple and Cherry woods are filled although some pore and texture is intended to show. These catalyzed finishes are resistant to scratches, cigarette burns and most chemicals. All Cherry wood finishes are cross matched on Maple wood. Macassar is a black stain, revealing grain structure; Ebony is solid black, revealing no grain. If a design is standard in Cherry wood and you wish to have it manufactured in Maple wood (or vice versa), simply specify the alternative wood species and add a flat cutting fee of \$855 NET on your order.

Cherry Wood Finishes

Finish	Number
Clear Satin on Cherry*	20A
Clear Satin on	
Bleached Cherry*	(Add 10%) 20B
Light Cherry on Cherry	21
Medium Cherry on Cherry	22
Noce on Cherry	23
Mahogany on Cherry	24
Ebony on Cherry	25
Macassar on Cherry	26
Walnut on Cherry	27
Oak on Cherry	29
Custom Finish on Cherry	200

Maple Wood Finishes

Finish	Number
Clear Satin on Maple*	40A
Clear Satin on	
Bleached Maple*	(Add 10%) 40B
Light Cherry on Maple	41
Noce on Maple	43
Medium Cherry on Maple	42
Mahogany on Maple	44
Ebony on Maple	45
Macassar on Maple	46
Walnut on Maple	47
Light Maple on Maple	48
Oak on Maple	49
Custom Finish on Maple	400

*Clear finishes on Maple or Cherry are non-colored. Therefore, natural variation in wood tone and grain will be present. There will be variations in color within the product and from product to product. The actual finish may vary from the sample that has been submitted. A signed disclaimer is required from the customer at the time the order is placed.

Metal Finishes

David Edward has four CNC metal machining centers in our Pennsylvania facility capable of creating solid and turned metal components.

We utilize a broad inventory of metals including aluminum, bronze, stainless steel and brass.

Each design will be manufactured in one alloy and a variety of finishes can be offered. Custom finishes are available, please consult your sales representative.

Standard Metal Finishes

Item	Name
DE-AA	Anodized Aluminum
DE-BA	Brushed Aluminum
DE-BN	Brushed Nickel
DE-PN	Polished Nickel
DE-BS	Brushed Stainless

Custom Wood Finishes

When an order is specified in a custom color that has been previously formulated, approved, and a counter sample is not required, there will be a \$23.00 NET upcharge per unit. If David Edward has to formulate a new finish and or submit a counter sample for approval, there will be a one time charge of \$250 NET, plus \$23.00 NET upcharge per unit.

Please submit a sample of the custom finish with the order.

\$250.00 NET for custom formula

\$23.00 NET per unit

Extra Options

Multiple fabric application

Down/feather cushions

Contrasting wood finish

Wood Samples

Since no two trees are exactly alike and different pieces of wood take stain differently, some variation between samples and finished goods should be anticipated. Moreover, as color chart samples are necessarily inexact, larger solid wood samples of specific standard finishes are available on request at no charge. If the finish on an order is to match a previous order, please indicate on your order.

Tables

Table parts are primarily solid hardwood except for veneer inlays on table tops, as indicated. These inlays are of the same wood as the solid parts and are straight grain with the grain parallel to the long dimension unless otherwise noted. Some tables are also available with optional reverse diamond inlay tops where finish color will vary due to differing grain directions. See price list under each series for pricing. Laminate inlays (Laminate Chart page 7) are also available, inquire from factory for pricing. All table series are available in custom sizes depending on variation and quantity. Inquire from factory for pricing. Tables are shipped set up complete unless KD shipment is noted. Table price list indicates where a table series was designed for use with a particular seating design. Available finishes are the same for tables and seating.

Note: If dimensions in price list differ from those on catalog pages the price list is correct.

Custom Conference Tables and Reception Desks

Solid wood, wood veneer and laminate conference tables, architectural wood work or custom case goods are available on request. Contact customer service for design, development and pricing information.

Extra Options	NET Cost
Multiple fabric application	add 5%
Down/feather cushions	\$141 NET per cushion
Contrasting wood finish	add 10%

DAVID EDWARD

Quick Ship

15 Days: selected products are available in any standard finish and in all in-stock David Edward fabrics, our Bergamo black leather, any COM at our standard price for shipment within 15 working days of receipt of order and fabric. Our Textile Alliance program offers graded in fabrics from Anzea, Architex, Carnegie, CF Stinson, DesignTex, Garrett Leather, Knoll Textiles, LDI, Maharam, Mayer Fabrics, Pallas, Paul Brayton Textiles, Sina Pearson, Spinneybeck, Ultrafabrics and Unika Vaev on the following pages.

Please clearly indicate Quick Ship on purchase order; otherwise, standard delivery will be scheduled and acknowledged. Quick Ship orders can be entered by e-mail (info@davidedward.com) or FAX (410.242.0111) and cannot be changed or cancelled once entered.

Since no COD shipments can be made, new accounts without established credit can place orders by forwarding full payment with order. Some items not listed on Quick Ship may be available on a Quick Ship basis, please consult your sales representative. The quantities of items available on Quick Ship orders are accepted on the basis of product availability. If quantity ordered exceeds quantity available, we will notify you immediately by phone. We will reserve frames and fabrics for up to ten days for pending orders.

15 days: COM, DE fabric and Black leather with any standard wood finish

DAVID EDWARD

Optional Guaranteed Freight Program

In order to provide a fixed freight cost at the time the order is placed, you may opt to utilize our Guaranteed Freight Program for cartoned freight, outlined below. This program applies to **STANDARD DAVID EDWARD PRODUCT ONLY** and all products will be cartoned at no additional charge.

Instructions:

1. Determine zone where products are to be shipped.
2. Use table provided to calculate your fixed freight cost as a percentage of the total LIST COM cost of your order.
(Do not include extra charges)
3. You must indicate on your purchase order "Guaranteed Freight Program Option."

Otherwise your order will default to our standard pre-pay and David Edward will select carrier to be used. Note that freight charges will appear on your first invoice if the order is split shipped.

Subsequent invoices for the order will be for product only.

Remember:

1. A minimum charge of \$180 NET per shipment will apply.
2. All products will be cartoned.
3. Charges assume dock delivery only, an additional \$105 NET will be added for residential delivery and a \$42 NET added for any requiring a lift gate.
4. Product is shipped FOB origin, freight prepaid and added to your invoice.
5. Title of goods changes when merchandise leaves David Edward's dock. Any subsequent damage claims are the responsibility of the purchaser.
6. David Edward reserves the right to blanket wrap a shipment at the guaranteed freight rate.

****Guaranteed Freight should not be used on custom or revised product.**

DAVID EDWARD

Fire Resistance

All of David Edward's products are manufactured to conform to California TB 117-2013. Reference here is made to the furniture construction only and does not pertain to the upholstery material. The COM / COL specified will also need to meet the same technical bulletin to insure compliance of the design with CAL TB 117-2013. None of the polyurethane foam used in our products contain any fire retardant chemicals.

California Code 133 can be met by using a fireguard barrier to completely encapsulate the upholstery materials. Price by multiplying COM by \$32 NET per yard. Simply specify CA 133 on your purchase order.

David Edward will certify that our furniture will pass CAL 133 with out fire barrier in conjunction with fabrics that will pass CAL 117-2013. If you wish to have your fabric tested on our furniture in a composite burn test, the cost of this is the price of the item with its fabric plus \$875 NET for shipping to a laboratory and testing.

Materials used to meet fire resistance codes may alter the feel or visual appearance of furniture.

Moisture Barrier

Staphchek moisture barrier is available on all seating designs.

Please add \$32 NET per yard.

Bases and Mechanisms for Executive and Conference Chairs

Pricing is the same for the standard bases pictured here. Please specify on order which base is desired by adding letter designation to the number of the chair (50493-C). All bases are available on glides at the same price; specify by adding suffix G. Legislator series features a posture back mechanism so that seat and back tilt independently. Other mechanisms have knee swivel tilt and provide the ultimate in ergonomic design. Pneumatic lift covers a range of 3". Manual height adjustment is available; add \$27 NET and specify by adding suffix M. Jury bases available in black, chrome, antique brass or any painted color; inquire for pricing.

C Base Traditionally shaped Cherry wood over steel.

N Base 5 prong fiberglass reinforced nylon with integrated caster, dark charcoal.

W Base Maple wood over die cast aluminum under structure with twin wheel hooded barrel casters.

Cushions

Standard seat cushions are filled with high density foam core wrapped in polyester fiberfill. Standard back pillows have an inner liner filled with foam and wrapped in polyester fiberfill. Extra firm seat and back pillows can be supplied on request at no additional charge. Down or down and foam cushions are available; inquire for pricing. Unless otherwise specified, the number of cushions and the filling will be at our discretion. Vinyl and leather cushions have fabric zipper bands or vents in zipper bands to facilitate air escape. If some other method is desired, please indicate this on your purchase order. Loose seat or back cushions can be affixed by either sewing cushions to frame in a semi-attached manner or by means of chrome clips which snap to belts sewn to cushions. Specify method desired and add \$27 NET per cushion.

Check List for Ordering Furniture

Before submitting purchase order, please be sure it includes the following information:

1. Purchase order number.
2. Shipping destination and shipping instructions (if any).
3. Quantity, model number/name, size, and base type.
4. Any revisions to standard construction (designate revision with suffix "R" after item number and articulate).
5. Finish: wood species, finish and finish number.
6. Fabric: exact fabric number, name, color and application instruction. Cutting sample appreciated for verification. Please mark clearly if we are to order fabric.
7. Delivery requirement: indicate desired shipping date.

DAVID EDWARD

Conditions of Sale

Prices

Prices are list, FOB ORIGIN at our plant in either Baltimore, Maryland 21227 or Red Lion, Pennsylvania 17356. Prices are subject to change without notice.

Terms

All customers are required to complete our new customer form and your first order will be Cash Before Delivery (CBD). To open an account, our standard credit application must be completed and forwarded to the Baltimore office for credit evaluation. Terms are NET 20 for open accounts. After 20 days, an overdue surcharge calculated daily based at 1.5% per month (18% annually) is added and strictly enforced. Failure to pay this additional charge automatically places an account on CBD for future transactions. For CBD accounts, a 50% deposit is required. If terms are provided, we reserve the right to impose credit limits on your account. If credit limits are exceeded based upon open invoices and orders you may be required to make additional deposit payments before your order may be processed or shipped. All orders for custom product require a 50% deposit, regardless of terms.

Order Acknowledgement

Acknowledgement will be made for each order and indicates final production specifications. Buyer should check acknowledgement to be sure that all order details and pricing are correct. Orders will not be acknowledged or entered for production until all specification information is complete (see Check List for Ordering). Accepted orders are subject to the terms and conditions set forth herein and on our acknowledgement, not withstanding any variance in terms and conditions set forth on buyer's order form.

David Edward attempts to clarify all purchase orders. However, in the event the price list number and description on the purchase order differ, the price list number will prevail.

Note: All NSF checks are subject to a \$26 per check fee.

Warehousing

As production space is at a premium, orders will be shipped when completed. On orders which cannot be shipped, furniture will be invoiced and a weekly warehousing charge will accrue 7 days after completion. Warehousing charges will be levied at 1% of the NET invoiced price per piece by product line item. Minimum weekly warehousing charge will be \$26 NET per order. Full payment of invoice and warehousing charges required before shipment.

Note: If you have requested an extended delivery date at the time the order was placed, warehousing charges will not be imposed until after that date.

Cancellations, Changes and Returns

Requests must be in writing to our Baltimore office and are not allowed without factory consent. Authorized returns are subject to our shipping instructions. Changes are subject to our ability to comply and cancellations where production has begun will incur a charge of 10% or more, depending upon state of production. Custom items may not be cancelled. Table orders normally cannot be cancelled as veneers and laminate tops are ordered immediately.

Note: A minimum of \$105 NET administrative cost will apply for any cancelled order.

Credit Cards

We accept Visa, Mastercard and American Express. A fee of 3.5% for all credit card purchases will be applied to the invoice total.

DAVID EDWARD

Boxing Charges

All pricing includes cartoning (for standard product only). If you would like the product blanket wrapped, please specify on your order. Call factory for export grade cartons.

Shipping

Shipping options depend upon size of order, destination and whether the product is cartoned or blanket wrapped. Local shipments are often shipped in our own trucks blanket wrapped. For larger orders we will, on request, provide freight quotes and options. In order for customers to have a fixed freight cost at the time of order placement, the Optional Guaranteed Freight Program is available for standard, cartoned products only and is outlined on page 9. In the absence of specific instructions we will ship freight prepaid by what is in our opinion the best way. Prepaid freight shipments which go forward by factory selected carriers frequently enable us to extend a freight discount. A list of these carriers which service a particular area is available on request. We are not responsible for delays beyond our control and will ship when merchandise is ready, invoicing as of that date. If buyer cannot accept, warehousing charges will be imposed. Partial shipments may be made and invoices covering these shipments are to be paid as they fall due. CBD invoices not paid for within 7 days of notification will incur our standard 1.5% per month overdue surcharge. Failure to ship due to unpaid CBD invoices will be subject to warehousing charges 7 days after completion.

All shipments blanket wrapped and boxed should be inspected upon delivery even if there is not apparent damage to the packaging. Notations of damage if any need to be noted on the receipt and signed off by the delivering agent. If an order is signed off without any notions of damage or noted Subject To Further Inspection you are stating the furniture is received in good condition and this may be used against you if a claim is filed at a later date. If the shock Watch label is activated a very thorough and rigorous inspection of the product should occur immediately. No product may be returned

to David Edward for any reason without first obtaining a Return of Material Authorization (RMA) Form.

Freight Damage and Claims

All items must pass through final inspection before being released to a transportation company which assumes responsibility for goods at that time. Products are shipped FOB ORIGIN and, once in transit, title passes to buyer who is responsible for resolving any transit related issue. Therefore, if shipment is received damaged, buyer must both file a claim and look to the carrier for compensation. Our entire invoice must be paid by the original due date or will be subject to the charges previously stated. The following suggestion may assist buyers in handling freight claims:

- In the event of obvious damage, note damage on both copies of the freight bill and ask the driver to sign both copies.
- Note any excessive wear, damage or handling marks on cartons, especially if cartons appear to have been dropped, and follow written instructions on shock watch labels on cartons.
- Report concealed damage to carrier as quickly as possible.
- Request that the carrier send an inspector immediately.
- Retain all cartons and packing materials.
- Do not move the damaged goods to a new location (another floor or part of the warehouse).
- Read an inspection report carefully and sign it only if it is accurate and fair.

Discrepancies not due to transit damage must be reported to our Baltimore office at immediately upon receipt of product.

Warranty

David Edward warrants its standard catalog products to be free from defects in material and workmanship under normal single shift service for a period of 5 years from date of shipment.

During this 5 year period, David Edward, at its option, will replace, repair locally, repair at its factory or return the purchase price of any merchandise that, upon inspection by David Edward, is deemed to be defective. The foregoing constitutes the sole and exclusive remedy to the customer. In no event shall David Edward be responsible for dealer handling costs such as but not limited to recartoning, temporary delivery and warehousing of the product, rental or purchase of replacement furniture, unauthorized repair by others, nor are we liable for any consequential or incidental damages.

Damages resulting from freight, claimed or unclaimed, from accident, alteration, tampering, misuse, negligence or abuse voids this warranty. This warranty specifically excludes fabrics, leathers, vinyls and other textile materials for wearing quality, color fastness, shrinkage, stretching or dye lot match.

All returns for inspection, repair, or replacement must be authorized in writing and ship by an authorized carrier.

Certain chair styles with exposed wood require construction methods that accent color variation in light and natural stains. These variations are not considered product defects and are not warranty issues.

Damage to stacking chairs caused by stacking/unstacking methods are not controlled by David Edward and are not considered warranty issues.

Design Rights

Designs shown in David Edward catalogs and literature are, and remain, the property of David Edward who reserves the exclusive right to manufacture them. Any reproduction of these designs constitutes an infringement of David Edward's rights and will incur prosecution. David Edward reserves the right to make changes in price, dimensions and/or construction without prior notice.

Bariatric Seating Upgrade

SEATING

The need for Bariatric seating in today's modern healthcare facility has greatly increased over the years. According to a study done by the Centers for Disease Control and Prevention, an estimated 35% of adults, and almost 17% of children and youth are obese. These growing statistics indicate the need for hospitals and other healthcare facilities to consider the Bariatric patient when designing their spaces.

An important part of Bariatric seating, in addition to holding a large weight capacity, is the need for Bariatric seating to mesh well with the other furnishings to make patients feel comfortable and remain confident and dignified when entering into any healthcare facility. David Edward offers standard Bariatric seating with three of our already existing collections, while our vast knowledge of custom capabilities enables us to modify ALL of our products to meet the stringent demands of high density Bariatric seating. These abilities will allow the designer to create a beautifully designed healthcare space suited for patients of all shapes and sizes.

FEATURES:

Dimensions and structure engineered for Bariatric use

Steel reinforced framework adds stability to the chair

Upgraded foam package to a highly resilient urethane foam for additional support.

Meet and exceed ANSI-BIFMA tests.

TESTING DATA:

Static Test (Dead Load) - 1,400 lbs.

Structural Durability/Cyclic - 100,000 cycles, side to side force

Drop Test/Dynamic - Heavy impact abuse each seat, 300 lb. drop test

Back Strength/Vertical Static - 600 lbs. and 900 lbs. back pull

Back Durability/Horizontal Cyclic - 120,000 cycles, 225 lbs. back pull

Back Durability/Vertical Cyclic - 10,000 cycles, 200 lbs. force

Back Strength - 150 lbs. and 750 lbs. back pull

LEVEL 1 -

Upgrade seating capacity to a live load of 350 pounds per seat, a settee equates to a load of 700 pounds per seat.

LEVEL 2 -

Adds additional inches to the width of the product while upgrading the seating capacity to a live load of 500 pounds per seat, a settee equates to a load of 1,000 pounds per seat.

LOUNGE:

Increase width 12"

PULL-UP:

Increase width 8"

HOW TO READ PRODUCT NUMBERS:

David Edward has developed an easy to use numbering system when referring to the different Bariatric Levels. This system will help to make sure that you are getting the correct package with your order.

See below for examples:

09113-B1 = Open Arm Gower Lounge with Bariatric Level 1 Package

72993-B2 = Open Arm Aussie Pull-up with Crumb hole Back and Bariatric Level 2 Package

STANDARD BARIATRIC PRODUCT LIST:

09114 Gower Lounge

09214 Gower Lounge

11914 Aussie Lounge

29114 Bridgeport Lounge

29214 Bridgeport Lounge

72994 Aussie Pull-up

92214 Bridgeport Pull-up

92114 Bridgeport Pull-up

93124 Gower Pull-up

93114 Gower Pull-up

95444 Embrace Pull-up with crumb-hole

95445 Embrace Pull-up with full back

H12xxx Grand Island Patient series

On a custom basis; any David Edward product can meet Bariatric specifications.

DAVID EDWARD

Fabrics

David Edward Fabrics

Refer to fabric section following Conditions of Sale for a listing of our fabrics. To calculate cost simply multiply the normal NET price of the fabric times the number of yards required, add for repeats or narrow widths, add \$1.00 NET per yard for UPS and add to the NET COM price. Mark order clearly if we are to purchase fabrics. Furniture can also be ordered in white cotton duck at COM price plus \$6 NET per yard. Visit our website at <http://www.davidedward.com/resources/textiles/> to see all of our textile alliances.

Customers' Own Material (COM)

COM should be shipped prepaid to factory address and be clearly marked to indicate: buyer's name and furniture purchase order number; furniture items, catalog numbers and quantity of pieces to be covered; and any special instructions for COM application. Furniture orders should include this same information as well as a description of the fabric, including fabric's source, pattern number and color. A swatch of COM fabric attached to furniture purchase order is very helpful.

All COM fabrics are measured and inspected within 4 hours of receipt. We will not assume responsibility for defects, color inaccuracies or shortages. Customer retains responsibility for policing our receipt of COM to meet critical delivery dates. Orders are not scheduled for production until all COMs are received unless customer specifically requests partial shipping and billing.

COM yardage requirements shown are based on plain 54" wide fabric. Narrower widths or fabrics with a repeat 2" or larger will necessitate more yardage; use the accompanying chart as a guide. We are happy to assist in this calculation or to supply exact yardage required on large volume orders.

Customer's Own Leather (COL) and Vinyl (COV)

Please add 10% to the COM price for COL and note that leather requirement is calculated at 18 square feet of leather for each yard unless otherwise noted in the information for each design. Smaller hides than normal 45-55 square feet will necessitate more leather. For COV, add 5% to COM price; add 10% for suede vinyl; add 10% for laminated fabrics and faux leather. Please note that the up charges detailed above apply to all leather and vinyl orders except David Edward Leather and Vinyl.

Coverguard Stain Repellent

Price: \$5 NET per yard. Applied after furniture is upholstered, with extra saturation and care given to vulnerable areas such as arms, backs and seats, coverguard precludes delays and transit charges associated with off-site alternatives.

Written Cutting Instructions

In the absence of written cutting instructions accompanying the order, textiles will be cut, seamed and applied at our discretion at the customer's risk. The standard application of fabrics with stripes, vines or floral patterns will be vertical unless otherwise noted on the purchase order.

Checklist for Ordering Fabrics

Avoid needless correspondence and delay by providing:

1. Purchase Order Number
2. Quantity, pattern name, color name and number
3. Request cutting of current dye lot for approval (if color match is critical)
4. Marking instructions
5. Shipping instructions

Fabric Samples and Service

David Edward fabric samples (memos, clip swatches) are available on request at no charge and need not be returned. To obtain samples, dye lot cuttings, specialty finishing and other services from our outside fabric sources contact individual fabric suppliers directly with the contact information listed on each manufacturer grading chart.

Yardage Calculations Per Repeat

Fabric Width	Plain Fabric	2"-14" Repeat	15"-19" Repeat	20"-27" Repeat	28"-36" Repeat
--------------	--------------	---------------	----------------	----------------	----------------

54	0%	10%	15%	20%	25%
53-50	16%	20%	25%	30%	35%
48	16%	25%	30%	35%	40%
45	40%	50%	55%	60%	65%
36	50%	60%	65%	70%	75%

Aspen Base:

The Aspen Executive knee tilt mechanism uses a torsion bar design to provide a wide range of tension adjustment and supportive movement throughout the entire travel range.

Two key features of the mechanism, chair height adjustment and the travel restrictor are located coaxially.

Tension adjustment is achieved through a conveniently located side accessed handle.

The Aspen Executive's travel restrictor system allows the mechanism to be locked in the 0 degree forward position or to restrict the ride in three additional positions within the 16 degree travel range.

Aspen Base

11 Aussie Tandem by Paul Von Sas

Maple frame, rounded arm with mortise-tenon construction.

Matching lounge chair (11), tables (11T) and benches (62) available.

Send us your floor plan indicating your general requirements and we will submit a detailed CAD drawing with specifications and pricing for your approval.

This flexible system was designed for extremely high density use.

Tables have solid maple tops. With a minimum of four total tables, laminate inserts in standard textured finishes from Nevamar, Formica and Wilson Art can be supplied at no additional charge. Tandem units can be shipped in multiples of no more than 5 connected units.

Tables are easily connected on site by others (hardware supplied); seat units must be connected at the factory. It is essential that we know how you want all tandem products ultimately connected. Please submit a floor plan.

72 Aussie Tandem by Paul Von Sas

Maple frame with mortise-tenon construction.

Optional: solid wood seat and sled base, inquire with your rep.

Matching lounge chair (11), tables (11T) and benches (62) available.

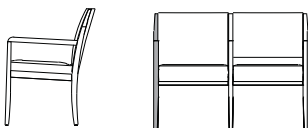

Send us your floor plan indicating your general requirements and we will submit a detailed

CAD drawing with specifications and pricing for your approval. This flexible system was designed for extremely high density use.

Aussie Tandem is specified from left to right facing. Tables have solid maple tops. Corner tables can be turned on either the long (30") or short (20") dimension. Please specify preference. With a minimum of four total tables, laminate inserts in standard textured finishes from Nevamar, Formica and Wilson Art can be supplied at no additional charge.

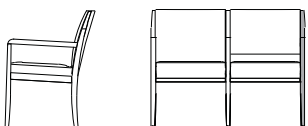

Tandem units can be shipped in multiples of no more than 5 connected units. Tables are easily connected on site by others (hardware supplied); seat units must be connected at the factory. It is essential that we know how you want all tandem products ultimately connected. Please submit a floor plan.

29 Bridgeport Tandem by Max Pearson

Hard clear maple frame, tight seat, open or closed back.

D28", H32", AH25", SH18", SD19.25"

1 Seater: W21.5", 2 Seater: W44.75", 3 Seater: 68", Arm width: 1.75"

Send us your floor plan indicating your general requirements and we will submit a detailed CAD drawing with specifications and pricing for your approval. This flexible system was designed for extremely high density use. Chairs, settees, sofas and tables can be joined as desired with or without separating arms.

Custom variations readily available (i.e. squared tables, free standing tables, special sizes, other woods etc.)

Reupholstery simplified by easily removable arms, panels, seats and back.

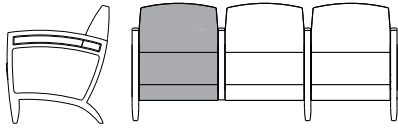

Bridgeport Tandem is specified from left to right facing. Maximum width of 3 seats (sofa size) without a supporting leg. Corner and 45 degree wedge tables interchangeable for inside or outside curves.

Tables are solid hard clear maple. With a minimum of four total tables, laminate tops in standard textured finishes from Nevamar, Formica and Wilson Art can be supplied at no additional charge.

Tandem units can be shipped connected in no more than 100 inch lengths. Tables, wedges and seating are easily connected in the field (hardware supplied). It is essential that we know how you want all tandem products ultimately connected. Please submit a floor plan.

Note: Coordinating Larger scale lounge (30), bench(66), pull-up(89, 90 & 92), pull-up tandem(92T) and tables(29T) are available.

61 Encore by Ken Reinhard

D19", H20"

Specify seat (S) or table (T) tops, Maple wood. NOTE: All Line art shown is (S) seat tops.

Unless otherwise specified we will assume tops of benches are all seats (S) rather than tables (T). Seat (S) and table (T) tops are the same price; laminate tops are available; inquire from factory for 1 piece solid wood top; add \$433 List for 3 seat bench, add \$307 List for two seater. End design panels (which includes perimeter of insert frame) and spacers are available in a second finish; add a flat fee of \$96 List. The customer is required to complete and submit a finish specification sheet when ordering an Encore bench in two finishes.

Custom logo end designs available; please call factory for pricing. Yardage requirement for combinations of table and seat inserts is the same on 42" size; on 62" size, yardage required for any combination is 1 yard. Custom sizes are available up to 62" long; add \$242 list to next smaller size. Yardage required for custom sizes is the same as next larger size shown. Custom logo end designs available, for opening 141/4" square by 11/4" deep from your full scale supplied template; inquire from factory.

05 Facet by Studio David Edward

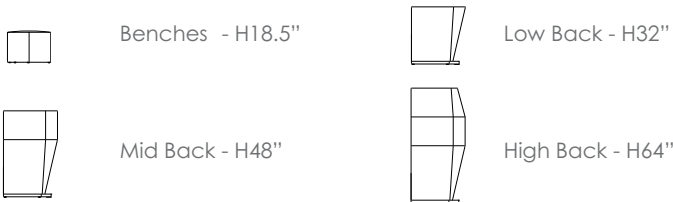

Modular lounge system featuring multiple pieces, configurations, and tablets for added functionality. Lounge styles include low back, mid back, and high backs, benches and ottomans. Maple frame with integrated metal support on back in a brushed aluminum finish (DE-BA).

Up to three units are able to be shipped together. Additional units will need to be ganged together on site. Ganged tablets are available, see product details at end of section. Factory installs units with ganging device on bottom of product. Please provide layout for ganging purposes.

NOTE: CAD blocks for all individual units are available on David Edward website. Configuration options below are provided for reference only, as we welcome custom applications.

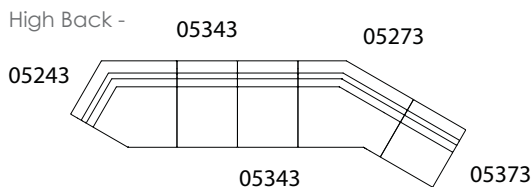

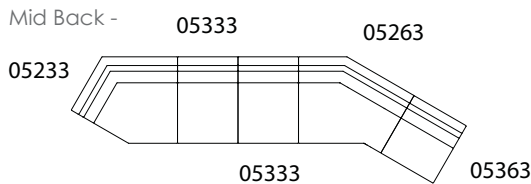

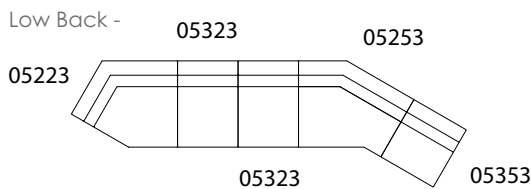

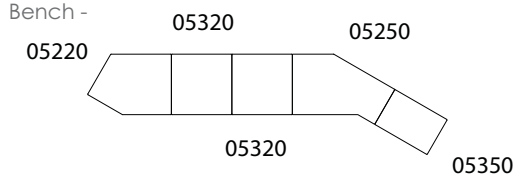

If you have a custom application, or design, Please submit a floor plan to your David Edward Representative. Please indicate your general requirements and we will submit a detailed CAD drawing with specifications and pricing for your approval. This flexible system was designed for large modular units with infinite possibilities.

Available Height Variations - Dimensions

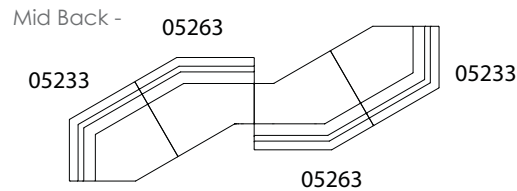

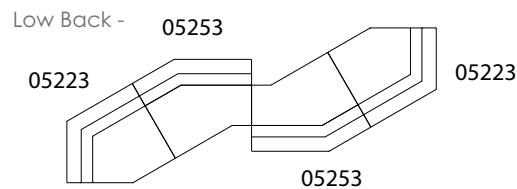

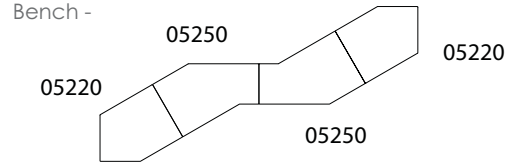

NOTE: To order example configurations, please instruct your representative which example, and height. Then provide the model numbers shown, reading clockwise from left unit to right unit.

93 Gower Tandem by Andrew Gower

D25.5", H33.5", AH25.75", SH19", SD18.75"

Open or upholstered left, right and universal arms. Full or open back, tight seat.

Single: W20", Double: W40"

Maple wood frames.

Arm Width: 2"

Solid maple wood table tops, laminate surfaces available. Companion pull-up chairs, lounge chairs and tables available.

Reupholstery simplified by easily removable arms, panels and seat/back.

The Gower tandem is always specified from left to right facing.

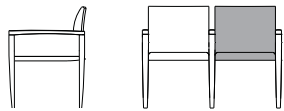

Tandem units can be shipped in multiples of no more than 5 connected units.

Table units are easily connected on site by others; seat units

must be connected at the factory. It is essential that we know how you want all tandem products ultimately connected.

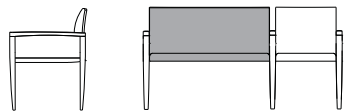

Please submit a floor plan.

H12 Grand Island Patient Series

Solid aluminum frame with wall-saver leg and water jet cut metal seat pan welded to aluminum arms finished in DE-BA Brushed Aluminum. Arm cap options attached with recessed fasteners for easy field recovery.

Arm cap options include Corian (Glacier White is standard with additional colors available by request), Solid Maple wood in a variety of finishes, or upholstered in similar or contrasting fabrics (additional yardage may apply).

Optional field recoverable seat covers facilitate easy seat fabric replacement over the cushion. (There is a \$90 increase to list for recoverable seat option - specify with 'R' - i.e. H1250R, R: Recoverable Seat Option).

Replaceable Components

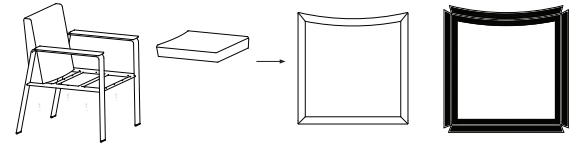

Field recoverable seat cover \$240 COM

Utilizing existing hook and loop system, replacement covers can be easily installed over the seat cushion. **Only available for products originally ordered with Optional field recoverable seat covers**

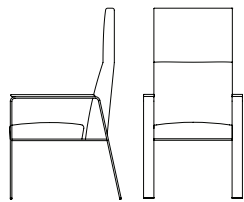

Field removable seat \$420 COM

The entire seat (cushion, platform, and seat cover) can be ordered for easy replacement of your existing seat cushions with a simple screwdriver

DAVID EDWARD

Grand Island Sleep Sofa

Back Shelf is standard on Grand Island Sleeper Sofas.

Flip shelf on back allows a complete sleep surface, yet allows the cushions

to flip between sit and sleep position. If shelf is not desired, subtract 346 List and reduce fabric yardage by 1.5 yards.

Removal of shelf must be requested upon ordering.

GS1 - W77.5", D34", H32", AH25.25", SH18.5", SD19.75"

GS2 - W86", D34", H32", AH25.25", SH18.5", SD19.75"

List Prices and Options

The unique features of the Grand Island Sleeper Sofas allow for a multitude of custom options for maximum versatility in a variety of stylistic and functional settings. Begin with a choice of two basic frame sizes (GS1 or GS2) and then choose your options custom suited to your style and setting. Your options include: Option 1: Base, Option 2: Arm Unit, Option 3: Arm Cap and Option 4: Front Kick Panel.

GS1 or GS2 +

Base

Arm Unit

Arm Cap

Kick Panel

Custom sizes are available for the Sleeper Sofas. Please note that we can easily facilitate changes to the width of the unit. The depth and height are more difficult to revise as they impact the folding process generating the sleep surface. The following sizes are being developed, or are already developed: Chair, Settee and non-sleeping Sofa. Also available are armless sofas or one arm sofas if a wall niche needs to be accommodated.

Grand Island Dimensions

GS1 - Sofa W77.5", D34", H32", AH25.25", SH18.5", SD19.75"

GS2 - Sofa W86", D34", H32", AH25.25", SH18.5", SD19.75"

90 Mt. Royal Tandem by Max Pearson

Open left, right and universal arms.

Full or Open Back, Tight Seat.

Clear Hard Maple Wood Frames.

Solid Maple Wood Table Tops.

Companion pull up chairs, stacking chairs, armless chairs (89) St. Charles, lounge chairs

(29) Bridgeport, small lounge and tables (29T) available

Reupholstery simplified by easily removable arms, panels and seat/backs.

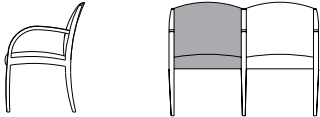

The Mt. Royal Tandem is always specified from left to right facing. Tandem units can be shipped in multiples of no more than 5 connected units. Table units are easily connected on site by others; seat units must be connected at the factory. It is essential that we know how you want all tandem products ultimately connected. Please submit a floor plan.

11T Aussie by Paul Von Sas

Maple wood with a wood shelf. Designed to coordinate with (11) Aussie lounge seating and (72) guest chairs.

Custom sizes, veneers, patterns and finishes available, lower shelves are wood.

• **Quick Ship: 11T11, 11T12, 11T27, 11T46**

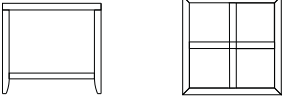

Note: Custom insets are available, i.e., marble, granite.

Quartered maple veneer inserts set in a reverse diamond pattern. One piece wood tops have straight grain veneer inserts.

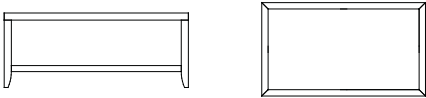

Console table can not have the reverse diamond pattern. All console tables are quarter sawn veneer straight grain.

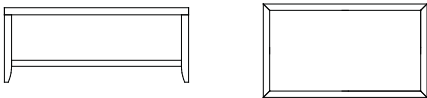

The grain direction runs the long way on the insert.

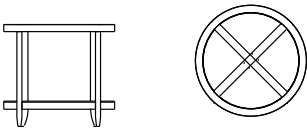

Add 10% for reverse diamond veneer inserts on the one piece wood tops.

DAVID EDWARD

Grand Island Series

Back Shelf is standard on Grand Island Sleeper Sofas.

Flip shelf on back allows a complete sleep surface, yet allows the cushions

to flip between sit and sleep position. If shelf is not desired, subtract 346 List and reduce fabric yardage by 1.5 yards.

Removal of shelf must be requested upon ordering.

GS1 - W77.5", D34", H32", AH25.25", SH18.5", SD19.75"

GS2 - W86", D34", H32", AH25.25", SH18.5", SD19.75"

List Prices and Options

The unique features of the Grand Island Sleeper Sofas allow for a multitude of custom options for maximum versatility in a variety of stylistic and functional settings. Begin with a choice of two basic frame sizes (GS1 or GS2) and then choose your options custom suited to your style and setting. Your options include Option 1: Base, Option 2: Arm Unit, Option 3: Arm Cap and Option 4: Front Kick Panel.

GS1 or GS2 +

Base

Arm Unit

Arm Cap

Kick Panel

Custom sizes are available for the Sleeper Sofas. Please note that we can easily facilitate changes to the width of the unit. The depth and height are more difficult to revise as they impact the folding process generating the sleep surface. The following sizes are being developed, or are already developed: Chair, Settee and non-sleeping Sofa. Also available are armless sofas or one arm sofas if a wall niche needs to be accommodated.
