CLEAR

Clear outsert is for improved ballistic resistance and prevention of wear to primary polyurethane visor.

BREACH

Shade 5 Breach outsert provides eye protection for specialist operators while deploying a cutting torch.

SUNLIGHT

Sunlight outsert is for protection against high level UV light and flash flare. The outsert hides the wearers eyes to provide a psychological advantage in a threat scenario.

MIRRORED

Mirrored outsert is for protection of UV light and improve contrast and depth perception. In addition, they hide the wearers eyes while reflecting the surroundings to provide psychological advantage in a threat situation.

BLUEBLOCKER

BlueBlocker outsert is for specialist use to improve weapon sighting by filtering out blue light wavelengths to deliver a sharper image. This outsert is ideal for snipers.

LASER

Laser outsert is for the removal of harmful laser wavelengths commonly produced by laser sighted weapons.
