Reflective Sheeting Type

MISSISSIPPI DEPARTMENT OF TRANSPORTATION
SUPPLY CONTRACT FOR REFLECTIVE MATERIALS

ITEM

RETROREFLECTIVE MATERIALS

1. TYPE II – A super engineering grade retroreflective sheeting. This shall be an enclosed lense glass-bead sheeting. This sheeting shall have a protected, pre-coated, pressure-sensitive adhesive backing.
2. TYPE IV – A high intensity prismatic retroreflective sheeting. This shall be an un-metallized micro-prismatic retroreflective material. This sheeting shall have a protected, pre-coated, pressure-sensitive adhesive backing.
3. TYPE V – A super high-intensity retroreflective sheeting for delineators. This shall be metallized retroreflective micro-prismatic sheeting. This sheeting shall have a protected, pre-coated, pressure-sensitive adhesive backing.
4. TYPE VI – An elastomeric retroreflective sheet for roll-up signs, cone collars and post bands. This shall be a vinyl micro-prismatic retroreflective material. This sheeting shall not have an adhesive backing.
5. TYPE IX – A very-high-intensity retroreflective sheeting. This shall be an un-metallized micro-prismatic retroreflective material. This sheeting shall have a protected, pre-coated, pressure-sensitive adhesive backing.

MISCELLANEOUS MATERIALS

Miscellaneous materials used in sign making process, including conspicuity tape for vehicles.

Electronic Cuttable Film (Acrylic)

Electronic Cuttable Film (Vinyl)
