*Tip: Standard worksurfaces are 1 1/8" thick. However, the actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) worksurfaces is slightly different. It is recommended that only worksurfaces of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications. Please use caution when mixing and matching different worksurface types.*

*Tip: Reinforcing channel (TSATRC39, TSATRC48, TSATRC57, or TSATRC72) is available to add support to worksurfaces that have 60" or more of unsupported knee space and which will be heavily loaded. Must be ordered separately.*
