Introducing...

The industry trendsetting **Edupod™** is Oklahoma Sound's newest solution to 21st Century Classroom and Educational environments.

#EDPD Edupod

Incorporating both a lectern and a teacher's desk in one, the Edupod™ addresses the presentation challenges educators today face. The teacher or presenter can use the Edupod™ sitting or standing. Incorporating an attractive hammer tone grey steel cabinet with locking storage & adjustable height shelves, the Edupod™ Lectern cabinet connects to a gorgeous lightweight plastic blowmolded desktop in matching grey, mounted on a contemporary frame and leg system with modesty panel.

Preset the adjustable-height grey lectern top with metal bookstop to your personal comfort zone and height requirements. Wire management grommets on Lectern cabinet allow for use of technology equipment such as projectors, laptops or tablets, and built-in attractive mesh front provides venting to prevent overheating.

Includes six double wheel hooded, two-inch caster wheels; three locking, for portability.

THE **charge • store • transport**
SOLUTION FOR YOUR SCHOOL'S
LAPTOPS AND TABLETS!

#TCSC Tablet Charging & Storage Cart

The Tablet Charging & Storage Cart from Oklahoma Sound makes it convenient and easy to charge and store up to 24 tablet computers. In-R-out entry through two wrap-around doors provide users easy access to their tablets and a quick, safe return for charging and storage. Protect your valuable tablets by securely locking the cart with heavy-duty locks. Cords will always remain safe and secure with a recessed power panel and the slotted panels will provide healthy ventilation during charging. The cart is constructed of high-pressure thermofused cherry/black laminate on particle board, rolling easily on four heavy-duty casters. Ships by truck. Fully assembled.

#WZD The Wizard Lectern

The most comprehensive, fully featured, presentation center available – a dream for any educator or presenter. Constructed of 18-gauge steel with square tube corner supports, accented with cherry wood surface, this unique cart offers both durability and beauty.

This unit is equipped with an easy-connect console – including both VGA & HDMI ports – that connects to a LCD projector, which can be placed/stored on the lockable sliding shelf built into the unit. The VGA/HDMI pass-through plate allows a presenter to easily connect a laptop or document camera in a flash. The lockable storage cabinet and sliding shelf are designed to support all leading brand document camera and LCD projectors. The built-in lockable storage drawer will keep all extra cables, pointers and important manuals safe and secure. The top surface is constructed from high quality one inch melamine laminate measuring 18" L x 21" W.

Additionally, this unit is outfitted with a flip up side shelf measuring 16" L x 14" W which provides the option of having your laptop and document camera available to use simultaneously. Storing equipment in the large secured cabinet with an adjustable shelf makes the setting up of your presentation as easy as 1-2-3. Equipped with 4" casters, unit easily rolls throughout entire venue. A 25-foot cord with winder and a 6-outlet power strip are mounted in the inside of the unit for easy wire management. For your convenience, the Wizard requires only minor assembly.

Oklahoma Sound® has introduced the perfect lectern solution for customizing logos for your institution or presentation slideshows. Designed with a new sleek curved shape in a modern cherry laminate, which provides a contemporary look for a variety of venues, The Vision is furnished with breakthrough technology; a 15-inch LCD screen built into the front of the unit. The screen has the ability to display images uploaded with a SD-card or flash drive. It includes a remote control, allowing the presenter to switch to various preloaded images with a touch of a button during a presentation or between speeches.

This integrated system can be used to display customized logos for schools, hotels or places of worship. Additionally, it enables a speaker to bring a presentation to life by displaying diagrams and photos for the audience. This beautifully hand crafted lectern is built with a ¾-inch stain and scratch resistant thermofused melamine laminate on MDF, and is available in a wood grain cherry color. The unit is equipped with two shelves for ample storage. Moves easily with four concealed casters, two locking.

Portable PA Systems

The All-New, Lighter Weight More Powerful Solution

NEW!

Smart Phone syncs directly with built-in Bluetooth technology

TRANSPORT EASILY WITH BUILT-IN HANDLE

USB PORT

CONTROL PANEL INCLUDES A 1/4" MIC INPUT FOR ADDITIONAL WIRED MICROPHONES, AND 1/4" & 1/8" AUXILIARY INPUTS FOR MP3 & OTHER MEDIA PLAYERS

WIRELESS HANDHELD MICROPHONE (INCLUDED) WILL BROADCAST EFFORTLESSLY UP TO 100 FEET AWAY

PRA-TRD: OPTIONAL TRIPOD FOR MOUNTING #PRA-8000 FOOTPRINT: 25"Wx22"Dx43"-95"H

#PRA8000 Pro Audio PA System

This new PA System incorporates all of today's technology advances in an easy to use stylistic cabinet.

It is the perfect companion for a teacher in class. Plus, weighing in at a smart 19 lbs., it is easily transportable with its built-in handle, for use in the gym or playground. A 40-watt Solid State amplifier is matched to an 8-inch built-in speaker, knocking out more strong, clear sound than any in its class.

The included wireless handheld microphone will broadcast effortlessly up to 100 feet away from receiver/speaker. The control panel also includes a 1/4" mic input for additional wired microphones, as well as a 1/4" & 1/8" auxiliary inputs for MP3 & other media players. Sync your smart phone direct to the sound system through built-in Bluetooth technology or play MP3 files through a built-in USB port.

The PRA-8000 even includes an SD/MMC Port. Use with an AC wall plug, or use remotely for up to five hours while powered by its built-in rechargeable lead acid battery. The built-in underside receptacle allows for Tripod set up. Tripod optional.

environmental statement

Protecting the environment is one of the most important factors affecting the future of the planet. Most people are now aware of the necessity of preserving and protecting nature in order to ensure our well-being and that of our children. Pollution especially that related to the over-consumption of raw materials has reached alarming levels due to our current lifestyle. That is why at Oklahoma Sound® we are constantly striving to minimize the consequences of our activities.

At Oklahoma Sound® the quality of our products and the protection of the environment go hand in hand. As a consumer of raw material, we are committed to the use of pre and post consumer waste (recycled material), while preserving the high quality standards of our products.

Examples of this include:

- **Wood** 100% of wood used for our products come from non-boreal forests. Our wood products are produced in a factory that is ISO certified for its Environmental Management System and has been awarded a certificate for the compliance with the standard ISO14001:2004.
- **Steel** All of the steel used for our products contain 30-40% of post-consumer waste (recycled).
- **Corrugated Containers** Are made of recycled fiber. 100% total recycled content and 90% post consumer content minimum.
- **Plastic** Our plastic products are made of materials that are recyclable.
- **Powder Coating VS. Liquid Finishes** Our products are powder coated and are highly protective to our environment. While liquid finishes contain solvents which have pollutants known as volatile organic compounds (VOCs), powder coating contains no solvents and releases negligible amounts, if any, of VOCs into the atmosphere. In addition, most powder coating overspray that does not adhere to the part is retrieved and reused, virtually eliminating the waste commonly found in liquid finishing processes.
- **Energy** During November 2008, Oklahoma Sound® completed a retrofit of all its lighting (over 800 fixtures), to eco-friendly units, saving 135,586 kWh annually. This reduction in energy consumption has an environmental impact equivalent to removing 20 cars from the road, 84 tons of greenhouse gas (CO2) and saving 198 barrels of oil annually!
- **Solar Energy** As the industry leader in institutional-grade audio-visual furniture, including lecterns, public address systems, computer presentation carts, etc., OS® continues to trailblaze in setting the standard for environmental stewardship. In addition to minimizing its eco footprint in the areas of raw material sourcing, energy consumption & air emissions, OS® is proud to announce a major solar panel installation on the roof of its 200,000 square foot factory facility in its corporate headquarters in Clifton, NJ, completed Summer 2011. Via the installation of a 240KW solar PV system on its roof, we will offset most of the local utility's need to burn oil and gas for electrical production in the public grid and therefore reduce greenhouse gas emissions into the atmosphere. Since we will be generating 80% of the electricity that we use with this system, we have cut our carbon footprint significantly.

COMPREHENSIVE 5-YEAR WARRANTY

Our lectern undergoes the most rigid and exacting tests for superior quality and performance before leaving our factory. Oklahoma Sound® warrants all products to be free from defective material and workmanship on the electronic product speakers and microphones for five years from the date of resale by an authorized Oklahoma Sound® distributor. Oklahoma Sound® will replace defective parts and repair malfunctioning products under this warranty when the defect occurs under normal installation and use, provided the unit is returned to our factory via prepaid transportation after direct authorization and approval by Oklahoma Sound®. This warranty provides that examination of the returned product must disclose in our judgement, a manufacturing defect. This warranty does not extend to any product which has been subject to misuse, neglect, accident, improper installation, or where the serial number has been removed or tampered with and is given in lieu of any other warranty implied or expressed and will not cover any consequential damages.

Orders are accepted under the express agreement that under no circumstances will seller be liable for any incidental or consequential damages, or for any other loss, damage or expense of any kind, including loss of profits, arising in connection with the order or with the use or inability to use seller's products furnished under the order. Seller's maximum liability shall not exceed and buyer's remedy is limited to either (i) repair or replacement of the defective part or product, or at seller's option, (ii) return of the product and refund of the purchase price. Such remedy shall be the buyer's entire and exclusive remedy.

**At Oklahoma Sound® we are committed
to providing quality products while
preserving the quality of our environment.**
