G-CONNECT

Valuable Attributes

- Lifetime Warranty
- Integrated power and data management systems
- UL listed power options in 2, 3 and 4 circuit systems
- Streamlined design offers the perfect blend of function and fashion
- Minimal tool construction saves time and money on installations and tear downs
- G-connect Standard and Level work seamlessly with all of WOFD and Gebesa panel Systems (Synergy, Elite and Optimus) to add a modern and cultivated look to any panel system application
- Continuity of finishes and textures with all other Gebesa products including panel systems
- Multi- functional uses; private office, benching and open plan
- Storage options include; freestanding, mountable, mobile and benches with storage
- Screens and modesty panels have a large variety of sizes, finishes and textures to provide a measure of privacy in an open plan environment

Technical Data

Work surfaces, Metal lateral file tops, doors and drawer fronts

- o Work surfaces (1 1/8"), drawer fronts (1/2") and door fronts are (1/2") with 3mm perfect match edge banding on all laminate edges.

Finishes

- o 9 thermal fused laminates with matching edge banding; Spanish Oak, English Oak, Irish Oak, Wengue, Anigre, Maple, Tweed, Silver and White
- o 4 veneer finishes with a veneer edge; Walnut, Wengue, Teak and Silver. Our Veneer has a perfect match veneer edge.

Case goods Bodies

- o Casegood **bodies** refer to the casing of storage items including back panels, end panels, understructure, interiors and shelves are 5/8" and are finished in white thermally fused laminate with 1, 2 and 3 mm edge banding.
- o Laminate casegood bodies are 5/8" particle board finished in White Thermal Fused Laminate with 1, 2 and 3 mm edge banding.
- o Metal casegood bodies, including mobile pedestals, 1, 2, 3 and 4 drawer lateral files, are made of 22" guage steel. 20" guage steel frame and drawer fronts, and 18" guage steel drawer sides.

Additional Finish Options

- o G-connect work surfaces, fronts and bodies are also available in all the Gebesa laminates, veneers and powder coated paints. Finishes not listed are considered non Standard. When ordering non Standard finishes a 5% up charge may apply. The up charge may be waived on large orders. For inquiries contact your Gebesa Distributor, W.O.F.D.

Desk / Credenza legs and handles

- o These items come Standard in the Aluminum Text, White, and Black paint finishes. *Please note Black or White paint can only be used on desk and/or credenza legs. G-connect handles are only sold in aluminum text paint. Paint color matching available with minimum quantity orders.

Structure

- o G-connect and G-connect Level are supported by steel "O" legs. These "O" legs have Standard grommets at the top and bottom to allow power and data cables to pass thru
- o A slide mechanism with lock is added to the G-connect Standard desks to allow easy access to the wiring duct.
- o Scallops or grommets may be added to any top at no additional charge
- o G-connect Level comes Standard with grommets to access the ducts
- o Easy assemble using cantilevers and hand bolts

Storage

- o G-connect locks are all core removable to add security. All Gebesa Keys are micro ban treated to help fight the spread of disease
- o All drawer slides are full extension ball bearing mechanisms. Our drawers all exceed ANSI/BIFMA standards.
- o All G-connect storage comes assembled. Feet and legs are the only parts necessary to be added

Wiring Capabilities

- o G-connect Standard and G-connect Level have the unique ability to manage power and data components without any wires hanging loosely from the product. Smart, simple wire management can be achieved in the private office, benching or open plan designs using either G-connect Level or G-connect Standard. G-connect Standard offer hidden wire management under the work surfaces and through the "O" legs.
- o G-connect Standard uses the same wire management as Level, but takes it a step further. In G-connect Standard patent pending design, wires come up through our the guttering system in the step down credenza and pass through the block into our duct which acts doubly as a structure support and wire management. From here the wires and connections may be easily accessed via our sliding tops for the user or continue to travel on through the leg and into the next station in a "benching" scenario.

Product Description

G-connect is a multi-functional line offering solutions for: Private Offices, Benching and Open Plan. It's ever evolving design and innovation meet the growing and changing need of today's modern workspace. Within the G-connect line are 3 components: **G-connect Standard, G-connect Level and G-connect shared components and accessories.** G-connect Standard and G-connect Level each have their own line specific components which are designed to function only with other G-connect Level or G-connect Standard items. Under the G-connect shared components category are items which can be integrated with G-connect Standard or G-connect Level. G-connect shared components include storage, filing, privacy screens, modesty panels and conference tables.

Difference of G-connect Standard and G-connect Level defined

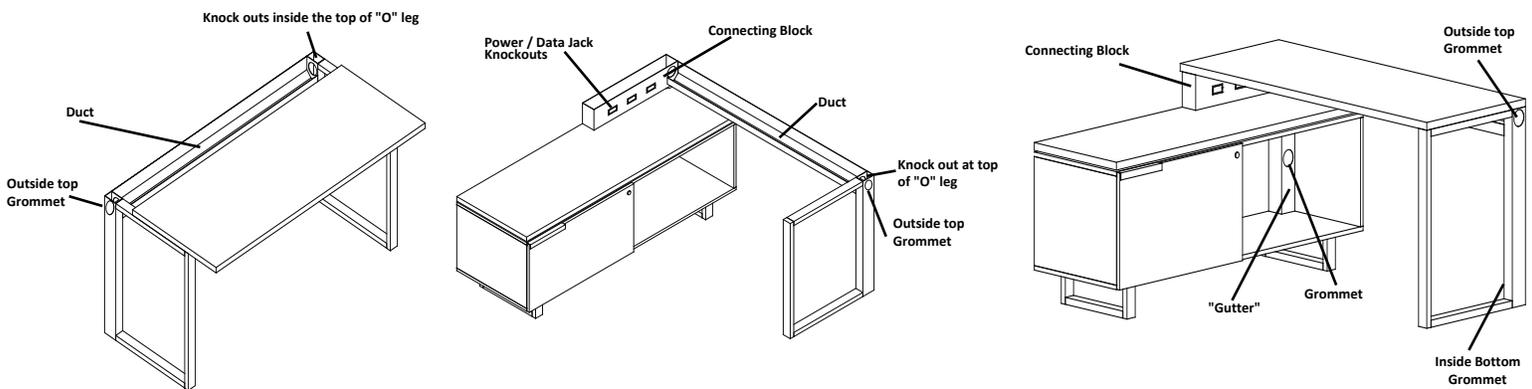

Both G-connect Standard and G-connect Level share the line's defining common denominators including its valuable attributes (page 1), uses, finishes and structure. What separates the two from one another is their wire management designs and desk supports.

G-connect Standard has a sliding top that allows for top side access to the wire management duct.

G-connect Level has all level worksurfaces and does not have the slide feature, though the duct can be accessed from below. Grommets are standard on G-connect Level, but need to be specified on G-connect Standard.

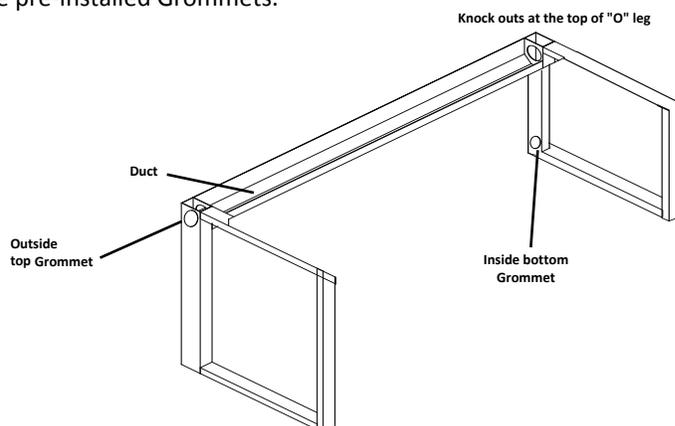

G-Connect Standard components consist of slide top desk with wire management ducts and low step down credenzas 20" in height. G-connect Standard desk are supported by two "O" legs or one "O" leg and a step down credenza. All G-connect Standard desk feature the slide top mechanism and wire management duct. Each "O" leg has a knockout at the top and grommets at the bottom for easy wire pass thru. Desks with one leg are designed to be supported by an "O" leg, and on the other side by a low, step down credenza. Credenza supported desk are configured in "L" or "U" shapes and must be ordered directionally. Low credenzas are connected to the desk by a steel block. The steel connecting blocks have a wire grommet and knockouts for power/data jacks. Inside each low credenza is a steel "gutter". The "gutter" is designed to allow wires to pass from the desk to credenza. Each gutter has two access grommets. Under the gutter is a grommet hole where wires can exit.

G-connect Standard Desk and Low Credenzas

G-connect Level features all "level" worksurfaces. G-connect Level desks all are supported by two legs. G-connect Level offers work surfaces used for bridges, credenzas and return work surfaces designed to be supported by pedestals, lateral files or "O" legs. Level desk do not have a slide top but have the same wire management duct under underneath the desk like the G-connect Standard desk. Level desk have the same "O" legs as G-connect Standard desk with a top knock out and a bottom grommet for easy wire pass thru. Grommets are also featured on all G-connect Level worksurfaces.

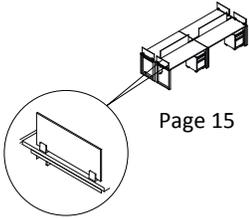

G-connect Level tops all include pre-installed Grommets.

G-CONNECT (STANDARD) STEP-DOWN (BENCHING) CRENZENAS

* These items are used as the foundation for building all units within the G-connect Standard line. 48" Credenzas are free standing and cannot be used as a desk support. All 48", 60" and 71" Credenzas are directional and must be ordered as a right or left. The direction of a low credenza is determined by the direction of the door or drawers fronts face. When a credenza's open portion and door(s) or drawer(s) are facing to the right, the credenza is considered a right (facing) Credenza.

*For example: To order a right L-Group, you would specify a RIGHT GBG221075 (desk) and a LEFT GBG531150 (credenza).

G-CONNECT ORDERING INSTRUCTIONS

CASEGOODS

STEP 1) Indicate the chosen items part number(s)

STEP 2) Determine if the item is directional.

Then to specify a side, use (DER) for a Right and (IZQ) for a Left.

STEP 3) Add the letter "F" then the worksurface(s) and/or drawer fronts finish code. If the item ordered does not have a front or surface, such as a GBG800 ("O" Leg), then skip this step. A (F) will not need to be specified.

STEP 4) Add the letter "R" then the casegood(s) body finish code.

CUSHIONS

Indicate cushion part number and then add the fabric code to the end.
EXAMPLE: GBG801120THP18

MOBILE PEDESTALS WITH CUSHIONS

Specify the mobile pedestal code. Indicate the body finish (R) and then add the fabric code to the end.
EXAMPLE: GBU300R33THP11

SCREENS

When ordering MDF, Laminate or Fabric covered tackable screens, indicate the screen part number and then add the MDF, Laminate or Fabric code to the end.
EXAMPLE: GBG83508029

Acrylic Screens

The acrylic screens are only available in Frosted Acrylic. When ordering Acrylic Screens, it is not necessary to indicate an additional code for the Acrylic material. Only the screen part number must be specified.

* Orders above \$50,000 net in Zones 1, 2 and 3 may be subject to a waived or reduced freight fee. For inquires contact WOFD customer service or your WOFD sales representative.

FREIGHT PROGRAM EXCLUSIONS:

Small parcel orders less than \$1500 net such as single chairs will be sent UPS and actual freight will be billed to the customer. This will only be considered if appropriate to ship the item UPS and if the UPS fee is less than the Zone surcharge.

Deliveries under \$30,000 net to New York area codes ending in: -100, -101, -102, -103, -118, or -119 will incur \$100 fee added to the Zone 4 program.

Deliveries under \$30,000 net to the District of Columbia (DC) will incur \$100 additional fee added to Zone 3 program.

Due to their excessive weight and or cubes, work surface-only orders and orders consisting of 12 or more lateral files (2, 3 and 4 drawer) will be excluded from all freight programs. A freight quote will be provided for these orders and the actual freight will be billed to the customer.

LTL and Truck load additional services such as Lift-gate, inside delivery, residential delivery, limited access etc are an additional fee and will be charged to the customer. These services must be specified at order submission. Service charges will vary depending on the service type and the carrier. For service charge inquires please contact WOFD customer service. WOFD will not incur the costs for unforeseen issues neglected by the purchaser, including those previously stated as well as re-consignment fees, re-delivery fees and any other charge that may have been handled with complete information about the delivery location.

LTL Delivery appointments generally add 1 business day to standard transit times and can incur additional charges depending on the carrier. Truckloads may be scheduled without additional fees or transit times. Because of delivery delays beyond the carriers control such as weather, accidents, construction ect delivery appts should be expected to arrive within a 4 hour period from appt time. Please make sure appropriate measures are taken by receiving to insure detention fees are not incurred. WOFD will not take responsibility for delays due to weather, accidents, construction and any other factor beyond our control.

Please note: for LTL deliveries allow 15 minutes waiting and unload time. Dedicated (truckload) deliveries allow 2 hours waiting and unload time. After the allotted time, the customer will be responsible for any detention fees. It's recommended having a receiving dock with a height of at least 10' and a pallet jack or fork lift available at the time of delivery.

CLAIMS AND RESPONSIBILITY

Any shipments received with visible carton damage or shortages must be noted as "damaged" or "short" on the bill of lading and signed by the receiving agent, as well as the carrier. The damaged cartons should then be inspected immediately to determine if there is product damage. If there is obvious product damage to the shipment upon receipt, refuse the shipment and note on the bill of lading "damaged and refused" before signing. An inspection of the contents of all cartons immediately upon arrival is recommended. WOFD must be notified within 5 working days after product is delivered if any shortages or damages were found (including concealed damage that does not become apparent until the product is unpacked). Failure to note shortages and damages on the bill of lading and/or failure to notify WOFD within 5 working days after shipment receipt constitutes a waiver of claim. Freight claims for third party and/or collect shipments are the responsibility of the customer. Contact Customer Support at 800-288-9633 if shipment is not received within 10 days of shipment.
