

MSA G1 SCBA

MSA
The Safety Company

WHEN YOU GO IN, WE GO IN WITH YOU.

Pre-production images and information provided, production model may vary.

At MSA, **“When you go in...We go in with you”** is more than just words, it’s what drives us. Everything we do is done with your safety and comfort in mind. When we create our products, we’re guided by a single question: How do we meet and exceed our customers’ safety needs? In answer, we solicited feedback from firefighters across the nation, we listened closely and we incorporated those ideas to produce the most advanced, intelligent user-friendly self-contained breathing apparatus (SCBA) available today.

Introducing the MSA G1 SCBA: The most comfortable, streamlined, balanced, configurable, and customizable SCBA we’ve ever produced.

Our Commitment to the Fire Service

MSA’s long-standing commitment to the fire service began nearly 100 years ago. Our continuous goal has been to provide dependable, high-quality personal protective equipment, instruments and service to help to ensure a safe return home. MSA’s extensive knowledge and expertise has helped to harness new technologies to produce exceptional protective equipment. The MSA G1 SCBA offers integrated and enhanced solutions to exceed your needs today as well as years into the future.

A Timeline of Innovation

1917: MSA enters breathing apparatus market with Gibbs & Mcaas closed-circuit apparatus for rescue & firefighting.

1936: First firefighting breathing apparatus – MSA Lightweight Half-Hour OBA.

1954: Bureau of Mines approved Demand Air Mask for air or oxygen.

1967: MSA introduces Belt-Mounted Regulator SCBA, Model 401.

1980: Ultralite fully-wrapped cylinder launched.

1983: Custom 4500° Air Mask - MSA's first high pressure SCBA.

1985: Nomex SCBA shoulder straps introduced; all Nomex Flame & Heat Resistant (FHR) SCBA harness.

1987: First breathing apparatus to meet NFPA 1981 Edition fire service standards – Ultralight II & Custom 4500 II. Revolutionary Quick-Fill® System allows firefighters to replenish air supply; becomes requirement on all NFPA SCBA in 2002. ClearCom™ RI Communications System integrates facepiece mic with radio.

1990: Ultralite® MMR and Custom 4500 MMR Air Masks introduced. Composite III Cylinder can be pressurized to 3000 psig.

1992: FireFly® PASS System.

1994: Ultra Elite® Facepiece launched.

1999: MMR Xtreme® SCBA offers new levels of performance. Vulcan Carrier & Harness is first composite-molded SCBA back frame. DragonFly® PASS is offered in stand-alone or integrated versions.

2000: Integrated Control Module (ICM).

2002: FireHawk® Air Mask, first unit certified to new NFPA 1981, 2002 Edition standard that includes CBRN component and Quick-Fill System.

2007: FireHawk M7 - First SCBA compliant to NFPA 1981 & 1982, 2007 Edition.

2013: FireHawk M7XT Air Mask.

2014: MSA G1 SCBA.

“MSA has taken all of the firefighters’ concerns and addressed them in the MSA G1 SCBA.”

– TB, Firefighter

The MSA G1 SCBA stands out from the crowd.

1. G1 Facepiece is lightweight and compact:

No electronics needed

- Open port design with cross contamination protection
- Comfortable and easy to use, with low breathing resistance on and off air

2. Control Module provides both color LCD and analog displays

- Display automatically turns on when control module is lifted into viewing position
- Large print makes display easy to read
- Provides more data and functionality than ever before
- No matter which button is pressed, necessary information displays

3. Improved visibility through buddy lights and reflective material

- 4 buddy lights located on the backplate
- 2 control module lights
- Regulator light

4. Heads up display (HUD) shows remaining cylinder pressure in 4 increments via colored LEDs

- Clear and easy to understand and interpret provided information

5. Electronic communications are integrated into every unit

- Loud, clear communication
- Removes inhalation breathing noise

6. MSA G1 SCBA ergonomics

- Swiveling, adjustable lumbar pad manages SCBA weight
- Improved comfort, balance, fit

7. Central power system for all electronics

- Only **one** power source
- Uses either alkaline or rechargeable battery
- No need for multiple battery sizes
- **Low cost of ownership**

8. Available in easily-upgradeable threaded or quick-connect cylinder attachment

- Quick attachment and replacement for return to the fireground

Integrated technology for future expansion

- Bluetooth, RFID, Near Field Communication (NFC), long-range radio

Customizable — Built to meet your specific needs

- Control module and HUD display required information; easily adapt to your existing standard operating procedure
- Wires/hoses can be routed as necessary

MSA G1 SCBA Components

About FACE.

The G1 Facepiece was designed without electronic components, to minimize weight, reduce your stress and fatigue and improve your overall performance level. This design also means that there are no electronic components on the outside of the facepiece that may result in snag and entanglement hazards. What's more, by eliminating costly electronic components, the price is reduced substantially, allowing personal-issue facepieces to be a cost effective measure. As an added bonus, the facepiece is equipped with cross-contamination prevention to reduce the spread of illness when facepieces are shared. But MSA didn't stop there. The MSA G1 SCBA is also equipped with a speaking diaphragm to increase speech clarity while off air.

The new G1 Facepiece is not only lightweight and compact with overall low profile design, it's comfortable and built to last. Taking the preferred design features of the Ultra Elite Facepiece, including wide field of view and comfortable, robust seal geometry, we've taken the MSA G1 SCBA to the next level with an open port to provide low breathing resistance, both on and off air.

The G1 Facepiece can help you to conserve energy for when you need it most.

Be Heard.

Electronic Voice Amplification Shouldn't Be Optional.

Every MSA G1 SCBA is equipped with electronic voice amplification because high quality fireground communications shouldn't be optional. With patent-pending design, dual microphones integrated into the regulator eliminate the Darth Vader-like inhalation sound. This unique feature automatically activates and shuts down with the unit. Shoulder strap-mounted speaker module provides loud and clear communications from the regulator microphone while maintaining low profile to aid in reducing snag points. Every MSA G1 SCBA is equipped with this cutting edge technology.

Designed to fit YOUR needs.

Cutting edge technology. The MSA G1 SCBA has been designed to meet and exceed your demands, providing more functionality than ever before. The G1 Control Module has both analog and color digital LCD displays, making certain that your status is available at all times. Auto-start motion control mechanism built into the control module intuitively provides the information you need when you need it. Adding yet another layer to ease-of-use: no matter which button is pressed, your information displays.

Highly configurable and customizable. The MSA G1 SCBA's user selectable configurations are an industry first: pressure; time remaining calculation; breathing time; temperature (the ability to set your own temperature alarm); and pressure drop (to alert you to leaks, either primary or secondary). What's more, the control module and HUD can be programmed to display information required by your particular specification. But best of all, electronics

can be adjusted to the way YOU want. The MSA G1 SCBA provides the ability to configure this device to follow any standard operating procedure, with alarm settings, lights and information provided on the control module. The MSA G1 SCBA...designed for the flexibility you need!

Heads up.

Internal HUD display. No facepiece electronics? It's not only possible, it's here. By placing electronics that power the Heads Up Display within the regulator, MSA has effectively reduced weight, profile, pairing, and cross talk. The HUD is inside the facepiece, so external contaminants cannot block the view and vital displayed relayed information. This new design means that you no longer have to buy HUDs for each facepiece, reducing costs and maintenance. By using revolutionary light pipes, the MSA G1 SCBA heads up display is clear and simple to understand; it's a HUD system made easy!

Always in Demand.

G1 Mask-Mounted Regulator. The G1 Regulator houses easy-to-operate heads up display and communications, yet is the smallest and lightest regulator available. The G1 Regulator has an optional purge cover that can be used to start air flow during emergency situations. The G1 Regulator can also be shut off and removed from the mask with one simple action!

The G1 Regulator is always in DEMAND!

MSA G1 SCBA Components

Finally, an SCBA where one size really can fit all.

Ergonomics. The MSA G1 SCBA is the only SCBA on the market that offers harness customization to ensure improved comfort, balance and fit. By providing an adjustable lumbar pad, you can have a tailored unit with up/down and pivot capabilities that can actually move with you. Widened, adjustable shoulder straps enhance weight distribution and comfort. Through use of interlocking shoulder straps and strategically placed friction pads, the MSA G1 SCBA provides increased fit and stability while allowing for easy donning and doffing. The G1 Control Module, G1 Regulator and G1 Speaker Module can be configured on either shoulder, easily integrating into any standard operating procedure.

The Power of One.

Central Power System. With only one centralized power source, you can use either alkaline or an industry first rechargeable battery. As the ONLY manufacturer to offer rechargeable batteries, we've taken SCBA protection to a whole new level — finally, an SCBA that doesn't require multiple battery sizes! No need to manage battery types, compartments and change-outs, resulting in lower cost of ownership.

Make a Connection.

Pressure Reducer. Designed to work with quick connect or CGA threaded cylinders, there's a connection to meet your need. Adding to this flexibility are available direct and remote quick-connect attachment options to enable effortless cylinder change-outs. Pressure reducer accessory ports allow for future upgrades, including the high pressure Quick Fill® System. The MSA G1 SCBA is available in both quick-connect and threaded-connection options. With minimal parts, you can easily upgrade from one option to the other! All in all, this unit provides each user with many choices, all of which result in lower cost of ownership.

When Air is Low, Seconds Matter.

Universal Air Connection (UAC). When air is low and you must access the UAC for emergency purposes, seconds matter. That's why MSA invented the patent-pending RIT light to shine a bright white LED on the UAC connection, making it easier to find and connect to a rescue air source. The primary UAC illuminates when End of Service Time Indicator (EOSTI) reaches 35%.

The Quick-Fill System

The Quick-Fill System lets MSA air mask users refill and transfill air cylinders while SCBA is worn, without removing air cylinder — even in IDLH atmospheres. Use this MSA option to:

- Fill SCBA cylinder from mobile compressor or cascade system in less than a minute.
- Transfill between two cylinders, providing emergency breathing system.
- Extend air supply over longer durations, using remote compressed-air source.

Air masks compliant to recent NFPA standards have Quick-Fill URC fitting located at the Audi-Larm™ Audible Alarm warning device. Quick-Fill System hose with quick-disconnect connects air source to adapter for air transfer. See Bulletin 0105-92-MC for a Quick-Fill System Q&A.

Ordering Information

QUICK-FILL SYSTEM REPLACEMENT PARTS	Part Number	Description
	10156464	ExtendAire II Kit for MSA G1 SCBA

25-ft lengths are stocked; other custom lengths are available on special material basis. All SAE fittings are for high-pressure service. Female quick-disconnect fittings have dust covers.

Spectacle Kit for G1 Facepiece

We have taken the old and outdated spectacle kits of the past and thrown them in the trash. Working with TriSpec, MSA has designed a modern and sophisticated option, providing both clear sight and style.

MSA—The Safety Company

Our business is safety. We've been the world's leading manufacturer of high-quality safety products since 1914. MSA products may be simple to use and maintain, but they're also highly-sophisticated devices and protective gear — the result of countless R&D hours, relentless testing, and an unwavering commitment to quality that saves lives and protects thousands of men and women each and every day. Many of our most popular products integrate multiple combinations of electronics, mechanical systems, and advanced materials to ensure that users around the world remain protected in even the most hazardous of situations.

Our **Mission**

MSA's mission is to see to it that men and women may work in safety and that they, their families, and their communities may live in health throughout the world.

Note: This bulletin contains only a general description of the products shown. While uses and performance capabilities are described, under no circumstances shall the products be used by untrained or unqualified individuals and not until the product instructions including any warnings or cautions provided have been thoroughly read and understood. Only they contain the complete and detailed information concerning proper use and care of these products.
